- a) après consultation, faire obligation à l'armateur à la pêche d'établir, conformément à la législation, aux conventions collectives et à la pratique nationales, des procédures à bord visant à prévenir les accidents du travail et les lésions et maladies professionnelles, compte tenu des dangers et risques spécifiques du navire de pêche concerné;
- b) exiger que les armateurs à la pêche, les patrons, les pêcheurs et les autres personnes concernées reçoivent suffisamment de directives et de matériel de formation appropriés ainsi que toute autre information pertinente sur la manière d'évaluer et de gérer les risques en matière de sécurité et de santé à bord des navires de pêche;

3. Les armateurs à la pêche doivent:

- a) fournir aux pêcheurs des vêtements et équipements de protection appropriés;
- b) veiller à ce que tous les pêcheurs à bord aient reçu une formation de base en matière de sécurité, approuvée par l'autorité compétente. Cette dernière peut cependant accorder une dérogation écrite dans le cas des pêcheurs qui lui démontrent qu'ils possèdent des connaissances et une expérience équivalentes;
- c) veiller à ce que les pêcheurs soient suffisamment et convenablement familiarisés avec l'équipement et les opérations de pêche, y compris avec les mesures de sécurité s'y rapportant, avant d'utiliser cet équipement ou de participer auxdites opérations.

SÉCURITÉ SOCIALE

*Article 33*

Tout Membre veillera à ce que les pêcheurs résidant habituellement sur son territoire et, dans la mesure prévue par la législation nationale, les personnes à leur charge bénéficient de la sécurité sociale à des conditions non moins favorables que celles s'appliquant aux travailleurs résidant habituellement sur son territoire.

*Article 34*

Tout Membre s'engage à prendre des mesures, en fonction de la situation nationale, pour assurer progressivement une protection complète de sécurité sociale à tous les pêcheurs résidant habituellement sur son territoire.

*Article 35*

Les Membres s'engagent à prendre des mesures, en fonction de la situation nationale, à titre individuel comme dans le cadre de la coopération internationale, y compris d'accords bilatéraux et multilatéraux de sécurité sociale, pour assurer progressivement une protection complète de sécurité sociale aux pêcheurs qui ne résident pas habituellement sur leur territoire.

*Article 36*

Members shall adopt measures to ensure the maintenance of social security rights which have been acquired or are in the course of acquisition by all fishers, regardless of residence.

## PROTECTION IN THE CASE OF WORK-RELATED SICKNESS, INJURY OR DEATH

*Article 37*

1. Each Member shall take measures to provide fishers with protection, in accordance with national laws, regulations or practice, for work-related sickness, injury or death.

2. In the event of injury due to occupational accident or disease, the fisher shall have access to:

- (a) appropriate medical care;
- (b) the corresponding compensation in accordance with national laws and regulations.

3. Taking into account the characteristics within the fishing sector, the protection referred to in paragraph 1 may be ensured through:

- (a) a system for fishing vessel owners' liability; or
- (b) compulsory insurance, workers' compensation or other schemes.

## PART VII. COMPLIANCE AND ENFORCEMENT

*Article 38*

Each Member shall exercise effective jurisdiction and control over vessels that fly its flag by establishing a system for ensuring compliance with the standards of the Convention including, as appropriate, inspections, reporting, monitoring, complaints procedures, appropriate penalties and corrective measures, in accordance with national laws or regulations.

*Article 39*

Members shall require that fishing vessels of [24] metres in length and over or those engaged on international voyages carry a valid document issued by the competent authority stating that the vessel has been inspected by the competent authority or on its behalf, for compliance with the provisions of this Convention concerning living and working conditions. Such a document shall be valid for a period of [three] years or, if issued on the same date as the International Fishing Vessel Safety Certificate, for the period of validity of that certificate.

*Article 40*

1. The competent authority shall appoint a sufficient number of qualified inspectors to fulfil its responsibilities under Article 39.

2. In establishing an effective system for the inspection of living and working conditions on board fishing vessels, a Member, where appropriate, may authorize public

*Article 36*

Les Membres doivent adopter des mesures pour assurer le maintien des droits en matière de sécurité sociale acquis ou en cours d'acquisition par tous les pêcheurs, indépendamment de leur lieu de résidence.

PROTECTION EN CAS DE MALADIE, LÉSION OU DÉCÈS LIÉS AU TRAVAIL

*Article 37*

1. Tout Membre prend des mesures en vue d'assurer aux pêcheurs une protection, conformément à la législation et à la pratique nationales, en cas de maladie, de lésion ou de décès liés au travail.

2. En cas de lésion provoquée par un accident du travail ou une maladie professionnelle, le pêcheur doit:

- a) avoir accès à des soins médicaux appropriés;
- b) bénéficier d'une indemnisation correspondante conformément à la législation nationale.

3. Compte tenu des caractéristiques du secteur de la pêche, la protection visée au paragraphe 1 pourra être assurée:

- a) soit par un régime reposant sur la responsabilité de l'armateur à la pêche;
- b) soit par un régime d'assurance obligatoire, d'indemnisation des travailleurs ou autre régime.

PARTIE VII. RESPECT ET APPLICATION

*Article 38*

Tout Membre exerce une compétence et un contrôle effectifs sur les navires battant son pavillon en se dotant d'un système propre à garantir le respect des normes de la convention, notamment en prévoyant, s'il y a lieu, la conduite d'inspections, l'établissement de rapports, une procédure de règlement des plaintes, un suivi et la mise en œuvre de sanctions et mesures correctives appropriées conformément à la législation nationale.

*Article 39*

Les Membres doivent exiger que les navires de pêche d'une longueur égale ou supérieure à [24] mètres ou qui entreprennent des voyages internationaux aient à bord un document valide délivré par l'autorité compétente, indiquant qu'ils ont été inspectés par l'autorité compétente ou en son nom, en vue de déterminer leur conformité aux dispositions de la convention concernant les conditions de vie et de travail. La durée de validité de ce document est de [trois] ans ou identique à la durée de validité du certificat international de sécurité des navires de pêche, s'il a été délivré à la même date.

*Article 40*

1. L'autorité compétente désignera un nombre suffisant d'inspecteurs qualifiés afin d'assumer les responsabilités qui lui incombent en vertu de l'article 39.

2. Aux fins de l'instauration d'un système efficace d'inspection des conditions de vie et de travail à bord des navires de pêche, un Membre peut, s'il y a lieu, autoriser des

institutions or other organizations that it recognizes as competent and independent to carry out inspections and issue documents. In all cases, the Member shall remain fully responsible for the inspection and issuance of the related documents concerning the living and working conditions of the fishers on fishing vessels that fly its flag.

#### *Article 41*

1. A Member which receives a complaint or obtains evidence that a fishing vessel that flies its flag does not conform to the requirements of this Convention shall take the steps necessary to investigate the matter and ensure that action is taken to remedy any deficiencies found.

2. A Member may prepare a report, with a copy to the Director-General of the International Labour Office, addressed to the government of a country in which a fishing vessel is registered, where such vessel flies the flag of the other State and calls in the normal course of its business or for operational reasons in a Member's port and the Member receives a complaint or obtains evidence that the fishing vessel does not conform to the requirements of the Convention. In such case, the Member may take the measures necessary to rectify any conditions on board which are clearly hazardous to safety or health.

3. In taking the measures referred to in paragraph 2, the Member shall notify forthwith the nearest representative of the flag State and, if possible, shall have such representative present. The Member shall not unreasonably detain or delay the vessel.

4. For the purpose of this Article, the complaint may be submitted by a fisher, a professional body, an association, a trade union or, generally, any person with an interest in the safety of the vessel, including an interest in safety or health hazards to the fishers on board.

5. This Article does not apply to complaints which a Member considers to be manifestly unfounded.

#### *Article 42*

Each Member shall apply the Convention in such a way as to ensure that the fishing vessels flying the flag of States that have not ratified the Convention do not receive more favourable treatment than the fishing vessels that fly the flag of Members that have ratified it.

### PART VIII. AMENDMENT OF ANNEXES I AND III

#### *Article 43*

1. Subject to the relevant provisions of this Convention, the International Labour Conference may amend Annexes I and III. The Governing Body of the International Labour Office may place an item on the agenda of the Conference regarding proposals for such amendments established by a tripartite meeting of experts. The decision to adopt the proposals shall require a majority of two-thirds of the votes cast by the delegates present at the Conference, including at least half the Members that have ratified this Convention.

2. Any Member that has ratified this Convention may give written notice to the Director-General within six months of the date of the adoption of such an amendment that it shall not enter into force for that Member, or shall only enter into force at a later date upon subsequent written notification.

institutions publiques ou d'autres organismes dont il reconnaît la compétence et l'indépendance à réaliser des inspections et à délivrer des certificats. Dans tous les cas, le Membre demeurera entièrement responsable de l'inspection et de la délivrance des certificats correspondants relatifs aux conditions de vie et de travail des pêcheurs à bord des navires battant son pavillon.

#### *Article 41*

1. Un Membre qui reçoit une plainte ou qui acquiert la preuve qu'un navire battant son pavillon ne se conforme pas aux prescriptions de la convention prend les dispositions nécessaires aux fins d'enquête et s'assure que des mesures sont prises pour remédier aux défaillances constatées.

2. Un Membre dans le port duquel un navire de pêche battant pavillon d'un autre Etat fait escale, dans le cours normal de son activité ou pour une raison inhérente à son exploitation, et qui reçoit une plainte ou acquiert la preuve que ce navire de pêche n'est pas conforme aux prescriptions de la convention, peut adresser un rapport au gouvernement du pays dans lequel ce navire est immatriculé, avec copie au Directeur général du Bureau international du Travail, et prendre les mesures nécessaires pour redresser toute situation à bord qui constitue manifestement un danger pour la sécurité ou la santé.

3. S'il prend les mesures mentionnées au paragraphe 2, le Membre doit en informer immédiatement le plus proche représentant de l'Etat du pavillon et demander à celui-ci d'être présent si possible. Il ne doit pas retenir ou retarder indûment le navire.

4. Aux fins du présent article, une plainte peut être soumise par un pêcheur, un organisme professionnel, une association, un syndicat ou, de manière générale, toute personne ayant un intérêt à la sécurité du navire, y compris un intérêt à la sécurité ou à la santé des pêcheurs à bord.

5. Cet article ne s'applique pas aux plaintes qu'un Membre considère manifestement infondées.

#### *Article 42*

Tout Membre appliquera la convention de manière à garantir que les navires de pêche battant pavillon d'Etats qui n'ont pas ratifié la convention ne bénéficient pas d'un traitement plus favorable que celui accordé aux navires battant pavillon des Membres qui l'ont ratifiée.

### PARTIE VIII. AMENDEMENT DES ANNEXES I ET III

#### *Article 43*

1. Sous réserve des dispositions pertinentes de la présente convention, la Conférence internationale du Travail peut amender les annexes I et III. Le Conseil d'administration du Bureau international du Travail peut inscrire à l'ordre du jour de la Conférence des propositions d'amendements établies par une réunion tripartite d'experts. La majorité des deux tiers des voix des délégués présents à la Conférence, comprenant au moins la moitié des Membres ayant ratifié cette convention, est requise pour l'adoption d'amendements.

2. Chaque Membre qui a ratifié la convention peut adresser au Directeur général, dans un délai de six mois suivant l'adoption d'un amendement, une notification précisant que cet amendement n'entrera pas en vigueur à son égard ou n'entrera en vigueur qu'ultérieurement, à la suite d'une nouvelle notification.

## ANNEX I

## EQUIVALENCE IN UNITS OF MEASUREMENT

1. For the purposes of this Convention, where the competent authority, after consultation, decides to use length overall (LOA) rather than length (L) as the basis of measurement:

- (a) a length overall (LOA) of [26.5] metres shall be considered equivalent to a length (L) of [24] metres;
- (b) a length overall (LOA) of [16.5] metres shall be considered equivalent to a length (L) of [15] metres;
- (c) a length overall (LOA) of [50] metres shall be considered equivalent to a length (L) of [45] metres.

2. For the purposes of this Convention, where the competent authority, after consultation, decides to use gross tonnage (gt) rather than length (L) as the basis of measurement:

- (a) a gross tonnage of [100] gt shall be considered equivalent to a length (L) of [24] metres;
- (b) a gross tonnage of [30] gt shall be considered equivalent to a length (L) of [15] metres;
- (c) a gross tonnage of [500] gt shall be considered equivalent to a length (L) of [45] metres.

ANNEXE I

ÉQUIVALENCE DES UNITÉS DE MESURE

1. Aux fins de la convention, lorsque l'autorité compétente, après consultation, décide d'utiliser la longueur hors tout (LHT) comme critère de mesure plutôt que la longueur (L):

- a) une longueur hors tout (LHT) de [26,5] mètres sera considérée comme équivalente à une longueur (L) de [24] mètres;
- b) une longueur hors tout (LHT) de [16,5] mètres sera considérée comme équivalente à une longueur (L) de [15] mètres;
- c) une longueur hors tout (LHT) de [50] mètres sera considérée comme équivalente à une longueur (L) de [45] mètres.

2. Aux fins de la convention, lorsque l'autorité compétente, après consultation, décide d'utiliser la jauge brute comme critère de mesure plutôt que la longueur (L):

- a) une jauge brute de [100] tonnes sera considérée comme équivalente à une longueur (L) de [24] mètres;
- b) une jauge brute de [30] tonnes sera considérée comme équivalente à une longueur (L) de [15] mètres;
- c) une jauge brute de [500] tonnes sera considérée comme équivalente à une longueur (L) de [45] mètres.

## ANNEX II

## FISHER'S WORK AGREEMENT

1. The fisher's work agreement shall contain the following particulars, except in so far as the inclusion of one or more of them is rendered unnecessary by the fact that the matter is regulated in another manner by national laws or regulations:

- (a) the fisher's family name and other names, date of birth or age and birthplace;
- (b) the place at which and date on which the agreement was concluded;
- (c) the name of the fishing vessel or vessels on board which the fisher undertakes to work;
- (d) the name of the employer, or fishing vessel owner, or other party to the agreement with the fisher;
- (e) the voyage or voyages to be undertaken, if this can be determined at the time of making the agreement;
- (f) the capacity in which the fisher is to be employed or engaged;
- (g) if possible, the place at which and date on which the fisher is required to report on board for service;
- (h) the provisions to be supplied to the fisher, unless some alternative system is provided for by national law or regulation;
- (i) the amount of wages, or the amount of the share and the method of calculating such share if remuneration is to be on a share basis, or the amount of the wage and share and the method of calculating the latter if remuneration is to be on a combined basis, and any agreed minimum wage;
- (j) the termination of the agreement and the conditions thereof, namely:
  - if the agreement has been made for a definite period, the date fixed for its expiry;
  - if the agreement has been made for a voyage, the port of destination and the time which has to expire after arrival before the fisher shall be discharged;
  - if the agreement has been made for an indefinite period, the conditions which shall entitle either party to rescind it, as well as the required period of notice for rescission, provided that such period shall not be less for the employer, or fishing vessel owner or other party to the agreement with the fisher;
- (k) the insurance that will cover the fisher in the event of sickness, injury or death in connection with service;
- (l) any other particulars which national law or regulation may require.

2. On fishing vessels of [24] metres in length and over, or those engaged on international voyages, the fisher's work agreement referred to in Article 20 shall include the following additional particulars:

- (a) the amount of paid annual leave or the formula for calculating it where leave is calculated using a formula, where applicable;
- (b) the health and social security coverage and benefits to be provided to the fisher by the employer, fishing vessel owner, or other party or parties to the fisher's work agreement, as applicable;
- (c) the fisher's entitlement to repatriation;
- (d) a reference to the collective bargaining agreement, as applicable;
- (e) the minimum periods of rest or maximum hours of work per day and per week, in accordance with national laws, regulations or other measures.

## ANNEXE II

## ACCORD D'ENGAGEMENT DU PÊCHEUR

1. L'accord d'engagement du pêcheur devra comporter les mentions suivantes, sauf dans les cas où l'inclusion de l'une de ces mentions ou de certaines d'entre elles est inutile, la question étant déjà réglée d'une autre manière par la législation nationale:

- a) les noms et prénoms du pêcheur, la date de naissance ou l'âge, ainsi que le lieu de naissance;
- b) le lieu et la date de la conclusion du contrat;
- c) la désignation du ou des navires de pêche à bord duquel ou desquels le pêcheur s'engage à travailler;
- d) le nom de l'employeur ou de l'armateur à la pêche ou autre partie à l'accord;
- e) le voyage ou les voyages à entreprendre, s'ils peuvent être déterminés au moment de l'engagement;
- f) la fonction pour laquelle le pêcheur doit être employé ou engagé;
- g) si possible, la date à laquelle et le lieu où le pêcheur sera tenu de se présenter à bord pour le commencement de son service;
- h) les vivres à allouer au pêcheur, sauf si la législation nationale prévoit un système différent;
- i) le montant du salaire du pêcheur ou, s'il est rémunéré à la part, le pourcentage de sa part et le mode de calcul de celle-ci, ou encore, si un système mixte de rémunération est appliqué, le montant du salaire, le pourcentage de sa part et le mode de calcul de celle-ci, ainsi que le salaire minimum qui pourrait être convenu;
- j) l'échéance de l'accord et les conditions y relatives, soit:
  - si l'accord a été conclu pour une durée déterminée, la date fixée pour son expiration;
  - si l'accord a été conclu au voyage, le port de destination convenu pour la fin de l'accord et l'indication du délai à l'expiration duquel le pêcheur sera libéré après l'arrivée à cette destination;
  - si l'accord a été conclu pour une durée indéterminée, les conditions dans lesquelles chaque partie pourra dénoncer l'accord ainsi que le délai de préavis requis, lequel n'est pas plus court pour l'employeur, l'armateur à la pêche ou autre partie que pour le pêcheur;
- k) l'indemnisation en cas de maladie, de lésion ou de décès du pêcheur lié à son service;
- l) toutes autres mentions que la législation nationale peut exiger.

2. L'accord d'engagement de tout pêcheur travaillant à bord d'un navire de pêche d'une longueur égale ou supérieure à [24] mètres ou entreprenant un voyage international prévu à l'article 20 de la convention doit contenir les indications complémentaires suivantes:

- a) le congé payé annuel ou la formule utilisée pour le calculer, s'il y a lieu;
- b) les prestations en matière de protection de la santé et de sécurité sociale qui doivent être assurées au pêcheur par l'employeur, l'armateur à la pêche ou autre partie, s'il y a lieu;
- c) le droit du pêcheur à un rapatriement;
- d) la référence à la convention collective, s'il y a lieu;
- e) les périodes minimales de repos ou la durée maximale du travail par jour et par semaine, conformément à la législation ou autres mesures.

## ANNEX III

## FISHING VESSEL ACCOMMODATION

*General provisions*

1. The following shall apply to all new, decked fishing vessels, subject to any specific exemptions provided for in accordance with Article 3 of this Convention. The competent authority shall also apply the requirements of this Annex to existing vessels, when and in so far as it determines that this is reasonable and practicable.

2. The competent authority, after consultation, may permit variations to the provisions of this Annex for fishing vessels normally remaining at sea for less than 24 hours where the fishers do not live on board the vessel in port. In the case of such vessels, the competent authority shall ensure that the fishers concerned have adequate facilities for resting, eating and sanitation purposes.

3. Any variations made by a Member under paragraph 2 shall be reported to the International Labour Organization in accordance with Article 4 of this Convention.

4. The requirements for vessels of [24] metres in length and over may be applied to vessels of [15] metres in length and over which are less than [24] metres in length where the competent authority determines, after consultation, that this is reasonable and practicable.

5. Fishers working on board feeder vessels which do not have appropriate accommodation and sanitary facilities shall be provided with such accommodation and facilities on board the mother vessel.

*Planning and control*

6. The competent authority shall satisfy itself that, on every occasion when a vessel is newly constructed, the crew accommodation of a vessel has been reconstructed or substantially altered, or a vessel changes the flag it flies to the flag of the Member, such vessel complies with the requirements of this Annex.

7. For the occasions noted in paragraph 6, for vessels of [24] metres in length and over which are not less than [100] gt, detailed plans and information concerning accommodation shall be required to be submitted for approval to the competent authority, or an entity authorized by it.

8. For vessels of [24] metres in length and over which are not less than [100] gt, on every occasion when the vessel changes the flag it flies to the flag of the Member or the crew accommodation of the fishing vessel has been reconstructed or substantially altered, the competent authority shall inspect the accommodation for compliance with this Convention. The competent authority may carry out additional inspections of crew accommodation at its discretion.

### ANNEXE III

#### LOGEMENT À BORD DES NAVIRES DE PÊCHE

##### *Dispositions générales*

1. Les dispositions suivantes s'appliquent à tous les nouveaux navires de pêche pontés, sauf dérogations particulières autorisées aux termes de l'article 3 de la présente convention. L'autorité compétente doit également appliquer les prescriptions de la présente annexe aux navires existants, dès lors que et dans la mesure où elle décide que cela est raisonnable et réalisable.

2. L'autorité compétente peut, après consultation, autoriser des dérogations aux dispositions de la présente annexe pour des navires de pêche ne restant normalement en mer que pour des durées inférieures à 24 heures si les pêcheurs ne vivent pas à bord du navire lorsqu'ils sont à quai. Dans le cas de tels navires, l'autorité compétente doit veiller à ce que les pêcheurs concernés aient à leur disposition des installations adéquates pour leur repos, alimentation et hygiène.

3. Toute dérogation faite par un Membre en vertu du paragraphe 2 doit être communiquée à l'Organisation internationale du Travail conformément à l'article 4 de la convention.

4. Les prescriptions valables pour les navires d'une longueur égale ou supérieure à [24] mètres peuvent, après consultation, s'appliquer aux navires d'une longueur comprise entre [15] et [24] mètres si l'autorité compétente décide, après consultation, que cela est raisonnable et réalisable.

5. Les pêcheurs travaillant à bord de navires auxiliaires dépourvus de logements et d'installations sanitaires appropriés pourront utiliser ceux du navire mère.

##### *Planification et contrôle*

6. L'autorité compétente doit vérifier que, lorsque le navire vient d'être construit, ou que le logement de l'équipage à bord du navire a été refait à neuf ou considérablement modifié, ou que le navire remplace son pavillon par le pavillon du Membre, ledit navire est conforme aux prescriptions de la présente annexe.

7. Dans les situations visées au paragraphe 6, pour les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, l'autorité compétente doit demander que les plans détaillés du logement de l'équipage et des informations à son sujet soient soumis pour approbation à l'autorité compétente ou à une entité qu'elle a habilitée à cette fin.

8. Pour les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, l'autorité compétente doit vérifier, chaque fois que le navire remplace son pavillon par le pavillon du Membre ou que le logement de l'équipage a été refait à neuf ou considérablement modifié, que celui-ci est conforme aux prescriptions de la présente convention. L'autorité compétente peut réaliser, lorsqu'elle le juge opportun, des inspections complémentaires du logement de l'équipage.

*Design and construction**Headroom*

9. There shall be adequate headroom in all accommodation spaces. For spaces where fishers are expected to stand for prolonged periods, the minimum headroom shall be prescribed by the competent authority.

10. For vessels of [24] metres in length and over which are not less than [100] gt, the minimum permitted headroom in all accommodation where full and free movement is necessary shall not be less than 200 centimetres. The competent authority may permit some limited reduction in headroom in any space, or part of any space, in such accommodation where it is satisfied that such reduction is reasonable, and will not result in discomfort to the fishers.

*Openings into and between accommodation spaces*

11. There shall be no direct openings into sleeping rooms from fish rooms and machinery spaces, except for the purpose of emergency escape. Direct openings from galleys, storerooms, drying rooms or communal sanitary areas shall be avoided where reasonable and practicable, unless expressly provided otherwise.

12. For vessels of [24] metres in length and over which are not less than [100] gt, there shall be no direct openings, except for the purpose of emergency escape, into sleeping rooms from fish rooms and machinery spaces or from galleys, storerooms, drying rooms or communal sanitary areas; that part of the bulkhead separating such places from sleeping rooms and external bulkheads shall be efficiently constructed of steel or another approved material and shall be watertight and gas-tight.

*Insulation*

13. Accommodation spaces shall be adequately insulated; the materials used to construct internal bulkheads, panelling and sheeting, and floors and joinings shall be suitable for the purpose and shall be conducive to ensuring a healthy environment. Sufficient drainage shall be provided in all accommodation spaces.

*Other*

14. All practicable measures shall be taken to protect fishing vessels against the admission of flies and other insects, particularly when those vessels are operating in mosquito-infested areas.

15. Emergency escapes from all crew accommodation spaces shall be provided as necessary.

*Noise and vibration*

16. The competent authority shall take measures to limit excessive noise and vibration in accommodation spaces.

17. For vessels of [24] metres in length and over which are not less than [100] gt, the competent authority shall adopt standards for noise and vibration in accommodation spaces

*Conception et construction**Hauteur sous plafond*

9. Tous les logements doivent avoir une hauteur sous plafond adéquate. L'autorité compétente doit prescrire la hauteur sous plafond minimale des locaux où les pêcheurs doivent se tenir debout pendant de longues périodes.

10. Sur les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, la hauteur sous plafond minimale autorisée dans tous les logements où les pêcheurs doivent pouvoir se déplacer complètement et librement ne doit pas être inférieure à 200 centimètres. L'autorité compétente peut autoriser une hauteur sous plafond légèrement inférieure dans tout logement ou partie de logement où elle s'est assurée qu'une telle diminution est raisonnable et ne causera pas d'inconfort aux pêcheurs.

*Ouvertures donnant sur les locaux d'habitation et entre eux*

11. Les ouvertures directes entre les postes de couchage et les cales à poissons et salles des machines doivent être évitées, sauf lorsqu'il s'agit d'issues de secours. Dans la mesure où cela est raisonnable et réalisable, les ouvertures directes entre les postes de couchage et les cuisines, cambuses, séchoirs ou installations sanitaires communes doivent également être évitées, à moins qu'il n'en soit expressément disposé autrement.

12. Sur les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, il ne doit y avoir aucune ouverture reliant directement les postes de couchage et les cales à poissons et salles des machines ou les cuisines, cambuses, séchoirs ou installations sanitaires communes, sauf lorsqu'il s'agit d'issues de secours; la partie de la cloison séparant ces locaux des postes de couchage et des cloisons externes doit être construite de manière judicieuse en acier ou autre matériau homologué et être étanche à l'eau et aux gaz.

*Isolation*

13. L'isolation du logement de l'équipage doit être adéquate; les matériaux employés pour construire les cloisons, les panneaux et les vaigrages intérieurs, ainsi que les revêtements de sol et les joints doivent être adaptés à leur emploi et de nature à garantir un environnement sain. Des dispositifs d'écoulement des eaux suffisants doivent être prévus dans tous les logements.

*Autres*

14. Tous les moyens possibles doivent être mis en œuvre pour empêcher que les mouches et autres insectes ne pénètrent dans les navires de pêche, en particulier lorsqu'ils opèrent dans des zones infestées de moustiques.

15. Tous les logements d'équipage doivent être dotés d'issues de secours suivant les besoins.

*Bruit et vibrations*

16. L'autorité compétente doit prendre des mesures pour réduire les bruits et vibrations excessifs dans les locaux d'habitation de l'équipage.

17. Sur les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, l'autorité compétente doit adopter des normes

which shall ensure adequate protection to fishers from the effects of such noise and vibration, including the effects of noise- and vibration-induced fatigue.

#### *Ventilation*

18. Accommodation spaces shall be ventilated, taking into account climatic conditions. The system of ventilation shall provide air in a satisfactory condition whenever fishers are on board.

19. Wherever practicable, ventilation arrangements shall be such as to protect non-smokers from tobacco smoke.

20. Vessels of [24] metres in length and over which are not less than [100] gt shall be equipped with a system of ventilation for accommodation; it shall be controlled so as to maintain the air in a satisfactory condition and to ensure sufficiency of air movement in all weather conditions and climates. Ventilation systems shall be in operation at all times when fishers are on board.

#### *Heating and air conditioning*

21. Accommodation spaces shall be adequately heated, taking into account climatic conditions.

22. For vessels of [24] metres in length and over which are not less than [100] gt, adequate heat shall be provided, through an appropriate heating system, except in fishing vessels operating exclusively in tropical climates. The system of heating shall provide heat in all conditions, as necessary, and shall be in operation when fishers are living or working on board, and conditions so require.

23. For vessels of [24] metres in length and over which are not less than [100] gt, with the exception of those regularly engaged in areas where temperate climatic conditions do not require it, air conditioning shall be provided in accommodation spaces, the bridge, the radio room and any centralized machinery control room, and shall be available in work areas, where practicable.

#### *Lighting*

24. All accommodation spaces shall be provided with adequate light.

25. Wherever practicable, accommodation spaces shall be lit with natural light in addition to artificial light. Where natural light is provided in sleeping spaces, a means of blocking the light shall be provided.

26. Adequate reading light shall be provided for every berth in addition to the normal lighting of the sleeping room.

27. Where a vessel is not fitted with emergency lighting in sleeping rooms, mess rooms, passageways, and any spaces that are or may be used for emergency escape, permanent night lighting shall be provided in such spaces.

28. For vessels of [24] metres in length and over which are not less than [100] gt, lighting in accommodation spaces shall meet a standard established by the competent authority.

réglementant les niveaux de bruit et de vibrations dans les locaux d'habitation de nature à protéger adéquatement les pêcheurs des effets nocifs de ces bruits et vibrations, notamment de la fatigue qu'ils induisent.

#### *Ventilation*

18. Les locaux d'habitation doivent être ventilés en fonction des conditions climatiques. Le système de ventilation doit permettre une aération des locaux satisfaisante, lorsque les pêcheurs sont à bord.

19. Lorsque cela est possible, le système de ventilation doit être conçu de manière à ce que les non-fumeurs ne soient pas incommodés par la fumée de tabac.

20. Les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux doivent être équipés d'un système de ventilation des cabines réglable, de façon à maintenir l'air dans des conditions satisfaisantes et à en assurer une circulation suffisante par tous les temps et sous tous les climats. Les systèmes de ventilation doivent fonctionner en permanence lorsque les pêcheurs sont à bord.

#### *Chauffage et climatisation*

21. Les locaux d'habitation doivent être chauffés de manière adéquate en fonction des conditions climatiques.

22. Sur les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, un chauffage adéquat fourni par un système de chauffage approprié doit être prévu sauf sur les navires de pêche opérant exclusivement en zone tropicale. Le système de chauffage doit fournir de la chaleur dans toutes les conditions, suivant les besoins, et fonctionner lorsque les pêcheurs séjournent ou travaillent à bord et que les conditions l'exigent.

23. Sur les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, à l'exception de ceux opérant dans des zones où les conditions climatiques tempérées ne l'exigent pas, les locaux d'habitation, le pont, les salles de radio et toute salle de contrôle des machines centralisé doivent être équipés d'un système de climatisation qui doit être disponible dans les zones de travail, si cela est possible.

#### *Eclairage*

24. Tous les locaux d'habitation doivent bénéficier d'un éclairage adéquat.

25. Dans la mesure du possible, les locaux d'habitation doivent être éclairés par la lumière naturelle outre un éclairage artificiel. Lorsque les postes de couchage sont éclairés par la lumière naturelle, un moyen de l'occulter doit être prévu.

26. Chaque couchette doit être dotée d'un éclairage de chevet en complément de l'éclairage normal du poste de couchage.

27. Si à bord d'un navire les postes de couchage, les réfectoires, les coursives et les locaux pouvant être traversés comme issues de secours ne sont pas équipés d'un éclairage de secours, un éclairage permanent doit y être prévu pendant la nuit.

28. Sur les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, les locaux d'habitation doivent être éclairés

In any part of the accommodation space available for free movement, the minimum standard for such lighting shall be such as to permit a person with normal vision to read an ordinary newspaper on a clear day.

### *Sleeping rooms*

#### *General*

29. Where the design, dimensions or purpose of the vessel allow, the sleeping accommodation shall be located so as to minimize the effects of motion and acceleration but shall in no case be located forward of the collision bulkhead.

#### *Floor area*

30. The floor area per person, excluding space occupied by berths and lockers, and the number of persons per sleeping room shall be such as to provide adequate space and comfort for the fishers on board, taking into account the service of the vessel.

31. For vessels of [24] metres in length and over which are not less than [100] gt but which are less than [45] metres in length and less than [500] gt, the floor area per person of sleeping rooms, excluding space occupied by berths and lockers, shall not be less than [1] square metre.

32. For vessels of [45] metres in length and over which are not less than [500] gt, the floor area per person of sleeping rooms, excluding space occupied by berths and lockers, shall not be less than [1.5] square metres.

#### *Persons per room*

33. To the extent not expressly provided otherwise, the number of persons allowed to occupy each sleeping room shall not be more than six persons.

34. For vessels of [24] metres in length and over which are not less than [100] gt but which are less than [45] metres in length and less than [500] gt, the number of persons allowed to occupy each sleeping room shall not be more than four persons. The competent authority may permit exceptions to this requirement in particular cases if the size, type or intended service of the vessel make the requirements unreasonable or impracticable.

35. To the extent not expressly provided otherwise, a separate sleeping room or sleeping rooms shall be provided for officers, wherever practicable.

36. For vessels of [24] metres in length and over which are not less than [100] gt, sleeping rooms for officers shall be for one person wherever possible and in no case shall the sleeping room contain more than two berths. The competent authority may permit exceptions to the requirements of this paragraph in particular cases if the size, type or intended service of the vessel make the requirements unreasonable or impracticable.

conformément à une norme établie par l'autorité compétente. En tous points du local d'habitation où l'on peut circuler librement, la norme minimale de cet éclairage doit être telle qu'une personne dotée d'une acuité visuelle normale puisse lire, par temps clair, un journal imprimé ordinaire.

### *Postes de couchage*

#### *Dispositions générales*

29. Lorsque la conception, les dimensions ou l'utilisation du navire le permet, les postes de couchage doivent être situés de telle manière que les mouvements et l'accélération du navire soient ressentis le moins possible mais en aucun cas au-delà de la cloison d'abordage.

#### *Superficie au sol*

30. La superficie au sol par personne, déduction faite de la superficie occupée par les couchettes et les armoires, ainsi que le nombre de personnes par poste de couchage doivent permettre aux pêcheurs de disposer de suffisamment d'espace et de confort à bord, compte tenu de l'utilisation du navire.

31. Sur les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, mais d'une longueur inférieure à [45] mètres et dont la jauge brute est inférieure à [500] tonneaux, la superficie au sol par occupant d'un poste de couchage, déduction faite de la superficie occupée par les couchettes et les armoires, ne doit pas être inférieure à [1] mètre carré.

32. Sur les navires d'une longueur égale ou supérieure à [45] mètres dont la jauge brute n'est pas inférieure à [500] tonneaux, la superficie au sol par occupant d'un poste de couchage, déduction faite de la superficie occupée par les couchettes et les armoires, ne doit pas être inférieure à [1,5] mètre carré.

#### *Nombre de personnes par poste de couchage*

33. Dans la mesure où il n'en est pas expressément disposé autrement, le nombre de personnes autorisées à occuper un poste de couchage ne doit pas être supérieur à six.

34. Sur les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, mais d'une longueur inférieure à [45] mètres dont la jauge brute est inférieure à [500] tonneaux, le nombre de personnes autorisées à occuper un poste de couchage ne doit pas être supérieur à quatre. L'autorité compétente peut accorder des dérogations à cette prescription dans certains cas si la taille et le type du navire ou son utilisation la rendent déraisonnable ou irréalisable.

35. Dans la mesure où il n'en est pas expressément disposé autrement, une ou plusieurs cabines séparées doivent être réservées aux officiers, lorsque cela est possible.

36. Sur les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, les postes de couchage réservés aux officiers doivent accueillir une seule personne dans la mesure du possible et ne doivent en aucun cas contenir plus de deux couchettes. L'autorité compétente peut accorder des dérogations aux prescriptions de ce paragraphe dans certains cas si la taille et le type du navire ou son utilisation les rendent déraisonnables ou irréalisables.

*Other*

37. The maximum number of persons to be accommodated in any sleeping room shall be legibly and indelibly marked in a place in the room where it can be conveniently seen.

38. The members of the crew shall be provided with individual berths of appropriate dimensions. Mattresses shall be of a suitable material.

39. For vessels of [24] metres in length and over which are not less than [100] gt, the minimum inside dimensions of the berths shall not be less than [190] by [68] centimetres.

40. Sleeping rooms shall be so planned and equipped as to ensure reasonable comfort for the occupants and to facilitate tidiness. Equipment provided shall include berths, individual lockers sufficient for clothing and other personal effects, and a suitable writing surface.

41. For vessels of [24] metres in length and over which are not less than [100] gt, a desk suitable for writing, with a chair, shall be provided.

42. Sleeping accommodation shall be so situated or equipped as to provide appropriate levels of privacy for men and for women, as practicable.

43. The provision of separate sleeping rooms for men and women is desirable on all vessels, and shall be provided on vessels of [24] metres in length and over which are not less than [100] gt.

*Mess rooms*

44. Mess rooms shall be as close as possible to the galley.

45. Vessels shall be provided with mess room accommodation suitable for their service. To the extent not expressly provided otherwise, mess room accommodation shall be separate from sleeping quarters, where practicable.

46. For vessels of [24] metres in length and over which are not less than [100] gt, mess room accommodation shall be separate from sleeping quarters.

47. The dimensions and equipment of each mess room shall be sufficient for the number of persons likely to use it at any one time.

48. For vessels of [24] metres in length and over which are not less than [100] gt, a refrigerator of sufficient capacity and facilities for making hot and cold drinks shall be available and accessible to fishers at all times.

*Sanitary accommodation*

49. Sanitary facilities, which include toilets, washbasins, and tubs or showers, shall be provided for all persons on board as appropriate for the service of the vessel. These facilities shall meet at least minimum standards of health and hygiene and reasonable standards of quality.

*Autres*

37. Le nombre maximal de personnes autorisées à occuper un poste de couchage doit être inscrit de manière lisible et indélébile à un endroit où il peut se lire facilement.

38. Les membres d'équipage doivent disposer d'une couchette individuelle de dimensions suffisantes. Les matelas doivent être d'un matériau adéquat.

39. Sur les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, les dimensions internes minimales des couchettes ne doivent pas être inférieures à [190] centimètres sur [68] centimètres.

40. Les postes de couchage doivent être conçus et équipés de manière à garantir aux occupants un confort raisonnable et à faciliter leur maintien en ordre. Les équipements fournis doivent comprendre des couchettes, des armoires individuelles suffisamment grandes pour contenir des vêtements et autres effets personnels et une surface plane adéquate où il est possible d'écrire.

41. Sur les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, un bureau pour écrire et une chaise adaptés doivent être fournis.

42. Les postes de couchage doivent être situés ou équipés de telle manière que tant les hommes que les femmes puissent convenablement préserver leur intimité, dans toute la mesure du possible.

43. Il est souhaitable que des postes de couchage séparés soient mis à la disposition des hommes et des femmes sur tous les navires, et cette séparation doit exister sur les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux.

*Réfectoires*

44. Les réfectoires doivent être aussi proches que possible de la cuisine.

45. Les navires doivent posséder un réfectoire adapté à leur utilisation. Le local du réfectoire doit être si possible à l'écart des postes de couchage, dans la mesure où il n'en est pas expressément disposé autrement.

46. Sur les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, le réfectoire doit être à l'écart des postes de couchage.

47. Les dimensions et l'aménagement de chaque réfectoire doivent être suffisants pour qu'il puisse accueillir le nombre de personnes susceptibles de l'utiliser en même temps.

48. Sur les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, les pêcheurs doivent à tout moment avoir accès à un réfrigérateur d'un volume suffisant et avoir la possibilité de se préparer des boissons chaudes ou froides.

*Installations sanitaires*

49. Des installations sanitaires appropriées à l'utilisation du navire, qui comprennent des toilettes, lavabos, baignoires ou douches, doivent être prévues pour toutes les personnes à bord. Ces installations doivent correspondre aux normes minimales en matière de santé et d'hygiène et offrir un niveau de qualité raisonnable.

50. The sanitary accommodation shall be such as to eliminate contamination of other spaces as far as practicable. The sanitary facilities used by women fishers shall allow for reasonable privacy.

51. Cold fresh water and hot fresh water shall be available to all fishers and other persons on board, in sufficient quantities to allow for proper hygiene. The competent authority may establish, after consultation, the minimum amount of water to be provided.

52. Where sanitary facilities are provided, they shall be fitted with ventilation to the open air, independent of any other part of the accommodation.

53. All surfaces in sanitary accommodation shall be such as to facilitate easy and effective cleaning. Floors shall have a non-slip deck covering.

54. On vessels of [24] metres in length and over which are not less than [100] gt, for all fishers who do not occupy rooms to which sanitary facilities are attached, there shall be provided at least one tub or shower or both, one toilet, and one washbasin for every [four] persons or fewer.

#### *Laundry facilities*

55. Amenities for washing and drying clothes shall be provided as necessary, taking into account the service of the vessel, to the extent not expressly provided otherwise.

56. For vessels of [24] metres in length and over which are not less than [100] gt, facilities for washing, drying and ironing clothes shall be provided.

57. For vessels of [45] metres in length and over which are not less than [500] gt, facilities for washing, drying and ironing clothes shall be provided in a compartment separate from sleeping rooms, mess rooms and toilets, and shall be adequately ventilated and heated and equipped with lines or other means for drying clothes.

#### *Facilities for sick and injured fishers*

58. Whenever necessary, an isolated cabin shall be made available for a fisher who suffers illness or injury.

59. For vessels of [45] metres in length and over which are not less than [500] gt, there shall be a separate sick bay. The space shall be properly equipped and shall be maintained in a hygienic state.

#### *Other facilities*

60. A place for hanging foul-weather gear shall be provided outside, but convenient to, sleeping rooms.

#### *Bedding, mess utensils and miscellaneous provisions*

61. Appropriate eating utensils, and bedding and other linen shall be provided to all fishers on board.

50. Les installations sanitaires doivent être conçues de manière à éliminer dans la mesure où cela est réalisable la contamination d'autres locaux. Les installations sanitaires utilisées par les pêcheuses doivent leur préserver un degré d'intimité raisonnable.

51. Tous les pêcheurs et toute autre personne à bord doivent avoir accès à de l'eau douce froide et chaude en quantité suffisante pour assurer une hygiène convenable. L'autorité compétente peut déterminer, après consultation, le volume d'eau minimal nécessaire.

52. Lorsque des installations sanitaires sont prévues, elles doivent être ventilées à l'extérieur et situées à l'écart de tout local d'habitation.

53. Toutes les surfaces des installations sanitaires doivent être faciles à nettoyer correctement. Les sols doivent être recouverts d'un revêtement antidérapant.

54. Sur les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, tous les pêcheurs n'occupant pas un local doté d'installations sanitaires doivent avoir accès au moins à une baignoire ou une douche, ou les deux, une toilette et un lavabo pour [quatre] personnes ou moins.

#### *Buanderies*

55. Dans la mesure où il n'en est pas expressément disposé autrement, des équipements appropriés pour le lavage et le séchage des vêtements doivent être prévus selon les besoins, en tenant compte des conditions d'utilisation du navire.

56. Sur les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, des installations pour le lavage, le séchage et le repassage des vêtements doivent être prévues.

57. Sur les navires d'une longueur égale ou supérieure à [45] mètres dont la jauge brute n'est pas inférieure à [500] tonneaux, ces installations doivent occuper des locaux séparés des postes de couchage, des réfectoires et des toilettes qui soient suffisamment aérés et chauffés et pourvus de cordes à linge ou autres moyens de séchage.

#### *Installations pour les pêcheurs malades ou blessés*

58. Chaque fois que nécessaire, une cabine isolée doit être mise à la disposition d'un pêcheur blessé ou malade.

59. Sur les navires d'une longueur égale ou supérieure à [45] mètres dont la jauge brute n'est pas inférieure à [500] tonneaux, une infirmerie séparée doit être prévue. Ce local doit être correctement équipé et maintenu dans un état de propreté.

#### *Autres installations*

60. Un endroit approprié à l'extérieur des postes de couchage et aisément accessible à partir de ces derniers doit être prévu pour pendre les vêtements de gros temps.

#### *Literie, vaisselle et couverts et fournitures diverses*

61. Tous les pêcheurs à bord doivent avoir à leur disposition de la vaisselle, du linge de lit et autres linges appropriés.

*Recreational facilities*

62. For vessels of [24] metres in length and over which are not less than [100] gt, appropriate recreational facilities, amenities and services shall be provided for all fishers on board.

*Communication facilities*

63. All fishers on board shall be given reasonable access to communication facilities, to the extent practicable, at a cost not exceeding the actual cost to the fishing vessel owner.

*Galley and food storage facilities*

64. Cooking equipment shall be provided on board. To the extent not expressly provided otherwise, this equipment shall be fitted, where practicable, in a separate galley.

65. The galley, or cooking area where a separate galley is not provided, shall be of adequate size for the purpose, well lit and ventilated, and properly equipped and maintained.

66. For vessels of [24] metres in length and over which are not less than [100] gt, there shall be a separate galley.

67. The containers of butane or propane gas used for cooking purposes in a galley shall be kept on the open deck.

68. A suitable place for provisions of adequate capacity shall be provided which can be kept dry, cool and well-ventilated in order to avoid deterioration of the stores and, to the extent not expressly provided otherwise, refrigerators or other low-temperature storage shall be used, where possible.

69. For vessels of [24] metres in length and over which are not less than [100] gt, a provisions storeroom and refrigerator and other low-temperature storage shall be used.

*Food and potable water*

70. Food and potable water shall be sufficient, having regard to the number of fishers, their religious requirements and cultural practices as they pertain to food and the duration and nature of the voyage, and shall be suitable in respect of nutritional value, quality, quantity and variety.

71. The competent authority may establish requirements for the minimum standard and quantity of food and water to be carried on board.

*Clean and habitable conditions*

72. Accommodation shall be maintained in a clean and habitable condition and shall be kept free of goods and stores which are not the personal property of the occupants.

73. Galley and food storage facilities shall be maintained in a hygienic condition.

*Installations de loisirs*

62. A bord des navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, tous les pêcheurs doivent avoir accès à des installations, des équipements et des services de loisirs.

*Installations de communications*

63. Dans la mesure du possible, tous les pêcheurs à bord du navire doivent avoir raisonnablement accès à des équipements pour effectuer leurs communications à un coût n'excédant pas le coût réel facturé à l'armateur à la pêche.

*Cuisine et cambuse*

64. Des équipements doivent être prévus pour la cuisson des aliments. Dans la mesure où il n'en est pas expressément disposé autrement, les équipements sont installés, si possible, dans une cuisine séparée.

65. La cuisine, ou coin cuisine lorsqu'il n'existe pas de cuisine séparée, doit être d'une dimension adéquate, être bien éclairée et aérée et être correctement équipée et entretenue.

66. Les navires d'une longueur supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux doivent être équipés d'une cuisine séparée.

67. Les bouteilles de gaz butane ou propane utilisés à des fins de cuisson doivent être placées sur le pont découvert.

68. Un emplacement adéquat pour les provisions, d'un volume suffisant, doit être prévu et pouvoir être maintenu sec, frais et bien aéré pour éviter que les provisions ne se gâtent. Dans la mesure où il n'en est pas expressément disposé autrement, des réfrigérateurs ou autres moyens de stockage à basse température sont utilisés, si possible.

69. Pour les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, une cambuse et un réfrigérateur ou autre local d'entreposage à basse température doivent être utilisés.

*Nourriture et eau potable*

70. Un avitaillement suffisant d'une valeur nutritionnelle, d'une qualité, d'une quantité et d'une variété satisfaisantes doit être effectué compte tenu du nombre de pêcheurs à bord, de leur religion et de leurs habitudes culturelles en matière alimentaire ainsi que de la durée et de la nature du voyage.

71. L'autorité compétente peut établir des normes minimales régissant la qualité et la quantité de nourriture et d'eau devant être disponibles à bord.

*Conditions de salubrité et de propreté*

72. Le logement des pêcheurs doit être maintenu dans un état propre et habitable et ne doit contenir aucun bien ni marchandise qui ne soit pas la propriété personnelle des occupants.

73. La cuisine et les installations d'entreposage des aliments doivent être maintenues dans des conditions hygiéniques.

74. Waste shall be kept in closed, well-sealed containers and removed from food-handling areas whenever necessary.

*Inspections by the skipper or under the authority of the skipper*

75. For vessels of [24] metres in length and over which are not less than [100] gt, the competent authority shall require frequent inspections to be carried out, by or under the authority of the skipper, to ensure that accommodation is clean, decently habitable and safe, and is maintained in a good state of repair, that food and water supplies are sufficient, and that galley and food storage spaces and equipment are hygienic and in a proper state of repair. The results of such inspections, and the actions taken to address any deficiencies found, shall be recorded and available for review.

*Variations*

76. The competent authority, after consultation, may permit derogations from the provisions in this Annex to take into account, without discrimination, the interests of fishers having differing and distinctive religious and social practices, on condition that such derogations do not result in overall conditions less favourable than those which would result from the application of this Annex.

74. Les déchets doivent être gardés dans des conteneurs fermés et hermétiques qui sont retirés, quand il y a lieu, des espaces de manutention des vivres.

*Inspections effectuées par le patron ou sous ses ordres*

75. Sur les navires d'une longueur égale ou supérieure à [24] mètres dont la jauge brute n'est pas inférieure à [100] tonneaux, l'autorité compétente doit demander que des inspections fréquentes soient conduites par le patron ou sous son autorité pour veiller à ce que les logements soient propres, décentement habitables, sûrs et maintenus en bon état, que les provisions d'eau et de nourriture soient suffisantes et que la cuisine, la cambuse et les équipements servant à l'entreposage de la nourriture soient hygiéniques et bien entretenus. Les résultats de ces inspections ainsi que les mesures prises pour remédier à toute défaillance sont consignés et les registres peuvent être examinés.

*Variations*

76. L'autorité compétente peut, après consultation, permettre des dérogations aux dispositions de la présente annexe pour tenir compte, sans discrimination, des intérêts des pêcheurs ayant des pratiques religieuses et sociales différentes et particulières, sous réserve qu'il n'en résulte pas des conditions qui, dans l'ensemble, seraient moins favorables que celles qui auraient découlé de l'application de l'annexe.

## **B. Proposed Recommendation concerning work in the fishing sector**

The General Conference of the International Labour Organization,  
Having been convened at Geneva by the Governing Body of the International Labour  
Office, and having met in its 93rd Session on 31 May 2005, and  
Taking into account the need to revise the Hours of Work (Fishing) Recommendation,  
1920, and the Vocational Training (Fishermen) Recommendation, 1966, and

Having decided upon the adoption of certain proposals with regard to work in the fish-  
ing sector, which is the fifth item on the agenda of the session, and

Having determined that these proposals shall take the form of a Recommendation  
supplementing the Work in Fishing Convention, 2005 (hereinafter referred to as  
“the Convention”);

adopts this                    day of June of the year two thousand and five the following Recom-  
mendation, which may be cited as the Work in Fishing Recommendation, 2005.

### **PART I. CONDITIONS FOR WORK ON BOARD FISHING VESSELS**

#### *Protection of young persons*

1. Members should establish the requirements for the prior training of persons between the ages of 16 and 18 working on board fishing vessels, taking into account international instruments concerning training for work on board fishing vessels, including occupational safety and health issues such as night work, hazardous tasks, work with dangerous machinery, manual handling and transport of heavy loads, work in high latitudes, work for excessive periods of time and other relevant issues identified after an assessment of the risks concerned.

2. The training of persons between the ages of 16 and 18 might be provided through participation in an apprenticeship or approved training programme, which should operate under established rules and be monitored by the competent authority, and should not interfere with the person’s general education.

3. Members should take measures to ensure that the safety, lifesaving and survival equipment carried on board fishing vessels carrying persons under the age of 18 is appropriate for the size of such persons.

4. The working hours of fishers under the age of 18 should not exceed eight hours per day and 40 hours per week, and they should not work overtime except where unavoidable for safety reasons.

5. While sufficient time should be allowed for all meals, fishers under the age of 18 should be assured of a break of at least one hour for the main meal of the day.

## **B. Projet de recommandation concernant le travail dans le secteur de la pêche**

La Conférence générale de l'Organisation internationale du Travail,  
Convoquée à Genève par le Conseil d'administration du Bureau international du Travail,  
et s'y étant réunie le 31 mai 2005, en sa quatre-vingt-treizième session;

Tenant compte de la nécessité de réviser la recommandation sur la durée du travail  
(pêche), 1920, et la recommandation sur la formation professionnelle des pêcheurs,  
1966;

Après avoir décidé d'adopter diverses propositions relatives au travail dans le secteur  
de la pêche, question qui constitue le cinquième point à l'ordre du jour de la session;

Après avoir décidé que ces propositions prendraient la forme d'une recommandation  
complétant la Convention sur le travail dans la pêche, 2005 (ci-après dénommée  
«la convention»),

adopte, ce                    jour de juin deux mille cinq, la recommandation ci-après, qui sera  
dénommée Recommandation sur le travail dans la pêche, 2005.

### **PARTIE I. CONDITIONS DE TRAVAIL À BORD DES NAVIRES DE PÊCHE**

#### *Protection des adolescents*

1. Les Membres devraient fixer les conditions requises en matière de formation préalable des personnes de 16 à 18 ans appelées à travailler à bord des navires de pêche, en prenant en considération les instruments internationaux relatifs à la formation au travail à bord de ces navires, notamment pour ce qui a trait aux questions de sécurité et de santé au travail telles que le travail de nuit, les tâches dangereuses, l'utilisation de machines dangereuses, la manutention et le transport de lourdes charges, le travail effectué sous des latitudes élevées, la durée excessive du travail et autres questions pertinentes recensées après évaluation des risques encourus.

2. La formation des personnes âgées de 16 à 18 ans pourrait être assurée par le biais de l'apprentissage ou de la participation à des programmes de formation approuvés, qui devraient être menés selon des règles établies sous la supervision des autorités compétentes et ne devraient pas nuire à la possibilité pour les personnes concernées de suivre les programmes de l'enseignement général.

3. Les Membres devraient prendre des mesures visant à garantir qu'à bord des navires de pêche où travaillent des jeunes de moins de 18 ans les équipements de sécurité, de sauvetage et de survie soient adaptés à leur taille.

4. Les pêcheurs de moins de 18 ans ne devraient pas travailler plus de huit heures par jour ni plus de quarante heures par semaine, et ne devraient pas effectuer d'heures supplémentaires à moins que cela ne soit inévitable pour des raisons de sécurité.

5. Outre le fait qu'une pause suffisante devrait être accordée pour chacun des repas, les pêcheurs de moins de 18 ans devraient être assurés de bénéficier d'une pause d'au moins une heure pour prendre leur repas principal.

*Medical examination*

6. When prescribing the nature of the examination, Members should pay due regard to the age of the person to be examined and the nature of the duties to be performed.

7. The medical certificate should be signed by a medical practitioner approved by the competent authority.

8. Arrangements should be made to enable a person who, after examination, is determined to be unfit for work on board fishing vessels or certain types of vessels, or for certain types of work on board vessels, to apply for a further examination by a medical referee or referees who should be independent of any fishing vessel owner or of any organization of fishing vessel owners or fishers.

9. The competent authority should take into account international guidance on medical examination and certification of persons working at sea, such as the ILO/WHO *Guidelines for conducting pre-sea and periodic medical fitness examinations for seafarers*.

10. For fishers exempted from the application of the provisions concerning medical examination in the Convention, the competent authority should take adequate measures to provide health surveillance for the purpose of occupational safety and health.

*Competency and training*

11. Members should:

- (a) take into account generally accepted international standards concerning training and competencies of fishers in determining the competencies required for skippers, mates, engineers and other persons working on board fishing vessels;
- (b) address the following issues, with regard to the vocational training of fishers: national planning and administration, including coordination; financing and training standards; training programmes, including pre-vocational training and short courses for working fishers; methods of training; and international cooperation;
- (c) ensure that there is no discrimination with regard to access to training.

12. For each vessel of [24] metres in length and over, the competent authority should issue a document evidencing the minimum level of manning for the safe navigation of the vessel, and specifying the number and the qualifications of the fishers required.

**PART II. CONDITIONS OF SERVICE***Record of service*

13. At the end of each voyage, a record of service in regard to that voyage should be made available to the fisher concerned, or entered in the fisher's service book.

*Examen médical*

6. Aux fins de la détermination de la nature de l'examen, les Membres devraient tenir compte de l'âge de l'intéressé ainsi que de la nature du travail à effectuer.

7. Le certificat médical devrait être signé par du personnel médical agréé par l'autorité compétente.

8. Des dispositions devraient être prises pour permettre à toute personne qui, après avoir été examinée, est considérée comme inapte à travailler à bord d'un navire de pêche ou de certains types de navires, ou à effectuer certains types de tâches à bord des navires, de demander à être examinée par un ou plusieurs arbitres médicaux indépendants de tout armateur à la pêche ou de toute organisation d'armateurs à la pêche ou de pêcheurs.

9. L'autorité compétente devrait tenir compte des directives internationales relatives à l'examen médical et au brevet d'aptitude physique des personnes travaillant en mer, telles que les Directives OIT/OMS relatives à la conduite des examens médicaux d'aptitude précédant l'embarquement et des examens médicaux périodiques des gens de mer.

10. L'autorité compétente devrait prendre des mesures adéquates pour que les pêcheurs auxquels ne s'appliquent pas les dispositions relatives à l'examen médical prescrites dans la convention soient médicalement suivis aux fins de la sécurité et de la santé au travail.

*Compétence et formation*

11. Les Membres devraient:

- a) prendre en compte les normes internationales généralement admises en matière de formation et de qualifications des pêcheurs en définissant les compétences requises pour exercer les fonctions de patron, de second, de mécanicien et autres fonctions à bord d'un navire de pêche;
- b) examiner les questions suivantes relatives à la formation professionnelle des pêcheurs: organisation et administration nationales, y compris la coordination; financement et normes de formation; programmes de formation, y compris la formation préprofessionnelle et les cours de courte durée destinés aux pêcheurs en activité; méthodes de formation; et collaboration internationale;
- c) s'assurer qu'il n'existe pas de discrimination en matière d'accès à la formation professionnelle.

12. Pour tout navire d'une longueur égale ou supérieure à [24] mètres, l'autorité compétente devrait délivrer un document attestant de l'effectif minimal propre à garantir la sécurité de navigation du navire et précisant le nombre de pêcheurs requis et les qualifications qu'ils doivent posséder.

PARTIE II. CONDITIONS DE SERVICE

*Relevé des états de service*

13. A la fin de chaque voyage, un relevé des états de service concernant ce voyage devrait être mis à la disposition de chaque pêcheur concerné ou noté dans son livret de travail.

*Special measures*

14. For fishers excluded from the scope of the Convention, the competent authority should take measures to provide them with adequate protection with respect to their conditions of work and means of dispute settlement.

*Payment of fishers*

15. For vessels of [24] metres in length and over or those engaged on international voyages, all fishers should be entitled to minimum payment in accordance with national laws, regulations or collective agreements.

## PART III. ACCOMMODATION

16. When establishing requirements or guidance, the competent authority should take into account relevant international guidance on accommodation, food, and health and hygiene relating to persons working or living on board vessels, including the most recent editions of the FAO/ILO/IMO *Code of safety for fishermen and fishing vessels* and the FAO/ILO/IMO *Voluntary guidelines for the design, construction and equipment of small fishing vessels*.

17. The competent authority should work with relevant organizations and agencies to develop and disseminate educational material and on-board information and guidance concerning safe and healthy accommodation and food on board fishing vessels.

18. Inspections of crew accommodation required by the competent authority should be carried out together with initial or periodic surveys or inspections for other purposes.

*Design and construction*

19. Adequate insulation should be provided for overhead exposed decks over crew accommodation spaces, external bulkheads of sleeping rooms and mess rooms, machinery casings and boundary bulkheads of galleys and other spaces in which heat is produced, and, as necessary, to prevent condensation or overheating in sleeping rooms, mess rooms, recreation rooms and passageways.

20. Protection should be provided from the heat effects of any steam or hot water service pipes. Main steam and exhaust pipes should not pass through crew accommodation or through passageways leading to crew accommodation. Where this cannot be avoided, pipes should be adequately insulated and encased.

21. Materials and furnishings used in accommodation spaces should be impervious to dampness, easily kept clean and not likely to harbour vermin.

*Noise and vibration*

22. Noise levels for working and living spaces established by the competent authority should be in conformity with the guidelines of the International Labour Organization on

*Mesures spéciales*

14. Pour les pêcheurs exclus du champ d'application de la convention, l'autorité compétente devrait prendre des mesures prévoyant une protection adéquate en ce qui concerne leurs conditions de travail et des mécanismes de règlement des différends.

*Païement des pêcheurs*

15. Pour les navires d'une longueur égale ou supérieure à [24] mètres ou qui entreprennent des voyages internationaux, tous les pêcheurs devraient avoir droit à un païement minimal, conformément à la législation nationale ou aux conventions collectives.

PARTIE III. LOGEMENT

16. Lors de l'élaboration de prescriptions ou directives, l'autorité compétente devrait tenir compte des directives internationales applicables en matière de logement, d'alimentation, et de santé et d'hygiène concernant les personnes travaillant ou vivant à bord de navires, y compris l'édition la plus récente du Recueil FAO/OIT/OMI de règles de sécurité pour les pêcheurs et les navires de pêche ainsi que des Directives facultatives FAO/OIT/OMI pour la conception, la construction et l'équipement des navires de pêche de faibles dimensions.

17. L'autorité compétente devrait travailler avec les organisations et agences pertinentes pour élaborer et diffuser des documents pédagogiques et des informations disponibles à bord du navire ainsi que des instructions sur ce qui constitue une alimentation et un logement sûrs et sains à bord des navires de pêche.

18. Les inspections du logement de l'équipage prescrites par l'autorité compétente devraient être entreprises à l'occasion des enquêtes ou inspections initiales ou périodiques menées à d'autres fins.

*Conception et construction*

19. Une isolation adéquate devrait être fournie pour les ponts extérieurs recouvrant le logement de l'équipage, les parois extérieures des postes de couchage et réfectoires, les encaissements de machines et les cloisons qui limitent les cuisines et les autres locaux dégagant de la chaleur et, pour éviter, au besoin, toute condensation ou chaleur excessive, pour les postes de couchage, les réfectoires, les installations de loisirs et les coursives.

20. Une protection devrait être également prévue pour calorifuger les canalisations de vapeur et d'eau chaude. Les tuyauteries principales de vapeur et d'échappement ne devraient pas passer par les logements de l'équipage ni par les coursives y conduisant. Lorsque cela ne peut être évité, les tuyauteries devraient être convenablement isolées et placées dans une gaine.

21. Les matériaux et fournitures utilisés dans le logement de l'équipage devraient être imperméables, faciles à nettoyer et ne pas être susceptibles d'abriter de la vermine.

*Bruit et vibrations*

22. Les niveaux de bruit établis par l'autorité compétente pour les postes de travail et les locaux d'habitation devraient être conformes aux directives de l'Organisation interna-

exposure levels to ambient factors in the workplace and, where applicable, the specific protection recommended by the International Maritime Organization, together with any subsequent amending and supplementary instruments for acceptable noise levels on board ships.

#### *Heating*

23. The heating system should be capable of maintaining the temperature in crew accommodation at a satisfactory level under normal conditions of weather and climate likely to be met with on service, as established by the competent authority, and should be designed so as not to endanger the health or safety of the fishers or the safety of the vessel.

#### *Sleeping rooms*

24. Each berth should be fitted with a spring mattress of approved material, or with a spring base and a mattress of approved material. Berths should not be placed side by side in such a way that access to one berth can be obtained only over another. The lower berth in a double tier should not be less than 0.3 metres above the floor, and the upper berth should be fitted with a dust-proof bottom and placed approximately midway between the bottom of the lower berth and the lower side of the deck head beams. Berths should not be arranged in tiers of more than two. In the case of berths placed along the vessel's side, there should be only a single tier when a sidelight is situated above a berth.

25. Sleeping rooms should be fitted with curtains for the sidelights, as well as a mirror, small cabinets for toilet requisites, a book rack and a sufficient number of coat hooks.

26. As far as practicable, berthing of crew members should be so arranged that watches are separated and that no day worker shares a room with watch keepers.

#### *Mess rooms*

27. For vessels of [45] metres in length and over which are more than [500] gt, a separate mess-room facility for officers should be provided, taking into consideration the number of officers on board.

#### *Sanitary accommodation*

28. Sanitary accommodation spaces should have:

- (a) floors of approved durable material which can be easily cleaned, and which are impervious to dampness and properly drained;
- (b) bulkheads of steel or other approved material which should be watertight up to at least 0.23 metres above the level of the deck;
- (c) sufficient lighting, heating and ventilation;

tionale du Travail relatives aux niveaux d'exposition aux facteurs ambiants sur le lieu de travail ainsi que, le cas échéant, aux normes de protection particulières recommandées par l'Organisation maritime internationale, et à tout instrument relatif aux niveaux de bruit acceptables à bord des navires adopté ultérieurement.

### *Chauffage*

23. Le système de chauffage devrait permettre de maintenir dans le logement de l'équipage la température à un niveau satisfaisant établi par l'autorité compétente, dans les conditions normales de temps et de climat que le navire est susceptible de rencontrer en cours de navigation. Le système devrait être conçu de manière à ne pas constituer un risque pour la santé ou la sécurité de l'équipage, ni pour la sécurité du navire.

### *Postes de couchage*

24. Toute couchette devrait être pourvue soit d'un matelas à ressorts, soit d'un fond élastique et d'un matelas rembourré, l'un et l'autre d'un matériau approuvé. Les couchettes ne devraient pas être placées côte à côte d'une façon telle que l'on ne puisse accéder à l'une d'elles qu'en passant au-dessus d'une autre. Lorsque des couchettes sont superposées, la couchette inférieure ne devrait pas être placée à moins de 0,3 mètre au-dessus du plancher et la couchette supérieure devrait être équipée d'un fond imperméable à la poussière et disposée approximativement à mi-hauteur entre le fond de la couchette inférieure et le dessous des barrots du plafond. La superposition de plus de deux couchettes devrait être interdite. Dans le cas où des couchettes sont placées le long de la muraille du navire, il devrait être interdit de superposer des couchettes à l'endroit où un hublot est situé au-dessus d'une couchette.

25. Les postes de couchage devraient être équipés de rideaux aux hublots, d'un miroir, de petits placards pour les articles de toilette, d'une étagère à livres et d'un nombre suffisant de patères.

26. Dans la mesure du possible, les couchettes des membres de l'équipage devraient être réparties de façon à séparer les quarts et à éviter qu'un pêcheur de jour ne partage le même poste qu'un pêcheur prenant le quart.

### *Réfectoires*

27. Sur les navires d'une longueur égale ou supérieure à [45] mètres dont la jauge brute n'est pas inférieure à [500] tonneaux, un réfectoire séparé devrait être réservé aux officiers en fonction de leur nombre à bord.

### *Installations sanitaires*

28. Les espaces destinées aux installations sanitaires devraient avoir:

- a) des sols revêtus d'un matériau durable approuvé, facile à nettoyer et imperméable, et être pourvus d'un système efficace d'écoulement des eaux;
- b) des cloisons en acier ou en tout autre matériau approuvé qui soient étanches sur une hauteur d'au moins 0,23 mètre à partir du pont;
- c) une aération, un éclairage et un chauffage suffisants;

- (d) soil pipes and waste pipes of adequate dimensions which are constructed so as to minimize the risk of obstruction and to facilitate cleaning; they should not pass through fresh water or drinking water tanks, nor should they, if practicable, pass overhead in mess rooms or sleeping accommodation.

29. Toilets should be of an approved type and provided with an ample flush of water, available at all times and independently controllable. Where practicable, they should be situated convenient to, but separate from, sleeping rooms and washrooms. Where there is more than one toilet in a compartment, the toilets should be sufficiently screened to ensure privacy.

#### *Recreational facilities*

30. Where recreational facilities are required, furnishings should include, as a minimum, a bookcase and facilities for reading, writing and, where practicable, games. Recreational facilities and services should be reviewed frequently to ensure that they are appropriate in the light of changes in the needs of fishers resulting from technical, operational and other developments.

31. For vessels of [45] metres in length and over which are more than [500] gt, the recreational space should be separate from the mess room.

#### *Food*

32. Fishers employed as cooks should be trained and qualified for their position on board.

### PART IV. HEALTH PROTECTION, MEDICAL CARE AND SOCIAL SECURITY

#### *Medical care on board*

33. The competent authority should establish a list of medical supplies and equipment appropriate to the risks concerned to be carried on fishing vessels; such list should include women's sanitary protection supplies together with discreet, environmentally friendly disposal units.

34. A qualified medical doctor should be on board fishing vessels carrying 100 or more fishers and ordinarily engaged on international voyages of more than three days' duration.

35. Fishers should receive training in basic first aid in accordance with national laws and regulations, taking into account applicable international instruments.

36. A standard medical report form should be specially designed to facilitate the confidential exchange of medical and related information concerning individual fishers between the fishing vessel and the shore in cases of illness or injury.

37. For vessels of [24] metres in length and over, in addition to the provisions of Article 30 of the Convention, the following additional elements should be taken into account:

d) des conduites d'évacuation des eaux-vannes et des eaux usées de dimensions adéquates et installées de manière à réduire au minimum les risques d'obstruction et à en faciliter le nettoyage, et qui ne devraient pas traverser les réservoirs d'eau douce ou d'eau potable ni, si possible, passer sous les plafonds des réfectoires ou des postes de couchage.

29. Les toilettes devraient être d'un modèle approuvé et pourvues d'une chasse d'eau puissante, en état de fonctionner à tout moment et qui puisse être actionnée individuellement. Là où cela est possible, les toilettes devraient être situées en un endroit aisément accessible à partir des postes de couchage et des locaux affectés aux soins de propreté, mais devraient en être séparées. Si plusieurs toilettes sont installées dans un même local, elles seront suffisamment encloses pour préserver l'intimité.

#### *Installations de loisirs*

30. Là où des installations de loisirs sont prescrites, les équipements devraient au minimum inclure une bibliothèque et des moyens nécessaires pour lire, écrire et, si possible, jouer. Les installations et services de loisirs devraient faire l'objet de réexamens fréquents afin qu'ils soient adaptés aux besoins des pêcheurs, compte tenu de l'évolution des techniques, des conditions d'exploitation ainsi que de toute autre nouveauté.

31. Sur les navires d'une longueur égale ou supérieure à [45] mètres dont la jauge brute est supérieure à [500] tonneaux, l'espace réservé aux loisirs devrait être séparé du réfectoire.

#### *Nourriture*

32. Les pêcheurs faisant office de cuisinier devraient être formés et compétents pour occuper ce poste à bord.

### PARTIE IV. PROTECTION DE LA SANTÉ, SOINS MÉDICAUX ET SÉCURITÉ SOCIALE

#### *Soins médicaux à bord*

33. L'autorité compétente devrait établir une liste des fournitures médicales et du matériel médical devant se trouver à bord des navires de pêche, compte tenu des risques encourus. Cette liste devrait inclure des produits de protection hygiénique pour les femmes et des récipients discrets non nuisibles pour l'environnement.

34. Un médecin qualifié devrait se trouver à bord des navires de pêche transportant 100 pêcheurs ou plus et effectuant régulièrement des voyages internationaux d'une durée supérieure à trois jours.

35. Les pêcheurs devraient recevoir une formation de base aux premiers secours, conformément à la législation nationale et compte tenu des instruments internationaux pertinents.

36. Un formulaire médical type devrait être spécialement conçu pour faciliter l'échange confidentiel d'informations médicales et autres informations connexes concernant les pêcheurs entre le navire de pêche et la terre en cas de maladie ou d'accident.

37. Pour les navires d'une longueur égale ou supérieure à [24] mètres, en sus des dispositions de l'article 30 de la convention, les éléments supplémentaires suivants devraient être pris en compte:

- (a) when prescribing the medical equipment and supplies to be carried on board, the competent authority should take into account international recommendations in this field, such as those contained in the most recent editions of the ILO/IMO/WHO *International medical guide for ships* and the WHO *Model list of essential medicines*, as well as advances in medical knowledge and approved methods of treatment;
- (b) inspections of medical equipment and supplies should take place at intervals of no more than 12 months. The inspector should ensure that expiry dates and conditions of storage of all medicines are checked, the contents of the medicine chest are listed and conform to the medical guide used nationally, and medical supplies are labelled with generic names in addition to any brand names used, expiry dates and conditions of storage;
- (c) the medical guide should explain how the contents of the medical equipment and supplies are to be used, and should be designed to enable persons other than a medical doctor to care for the sick or injured on board, both with and without medical advice by radio or satellite communication. The guide should be prepared taking into account international recommendations in this field, including those contained in the most recent editions of the ILO/IMO/WHO *International medical guide for ships* and the IMO *Medical first aid guide for use in accidents involving dangerous goods*;
- (d) medical advice provided by radio or satellite communication should be available free of charge to all vessels irrespective of the flag they fly.

### *Occupational safety and health*

#### *Research, dissemination of information and consultation*

38. In order to contribute to the continuous improvement of safety and health of fishers, Members should have in place policies and programmes for the prevention of accidents on board fishing vessels which should provide for the gathering and dissemination of occupational health and safety materials, research and analysis, taking into consideration technological progress and knowledge in the field of occupational safety and health, as well as relevant international instruments.

39. The competent authority should take measures to ensure regular consultations on safety and health matters with the aim of ensuring that all concerned are kept reasonably informed of national, international and other developments in the field and on their possible application to fishing vessels flying the flag of the Member.

40. When ensuring that fishing vessel owners, skippers, fishers and other relevant persons receive sufficient and suitable guidance, training material, or other appropriate information, the competent authority should take into account relevant existing international standards, codes, guidance and other information, and should keep abreast of and utilize international research and guidance concerning safety and health in the fishing sector, including relevant research in occupational safety and health in general which may be applicable to work on board fishing vessels.

- a) En prescrivant le matériel médical et les fournitures médicales à conserver à bord, l'autorité compétente devrait tenir compte des recommandations internationales en la matière, telles que celles prévues dans l'édition la plus récente du Guide médical international de bord de l'OIT/OMI/OMS et la Liste des médicaments essentiels, publiée par l'Organisation mondiale de la santé, ainsi que des progrès réalisés dans les connaissances médicales et les méthodes de traitement approuvées.
- b) Le matériel médical et les fournitures médicales devraient faire l'objet d'une inspection tous les douze mois au moins. L'inspecteur devrait s'assurer que les dates de péremption et les conditions de conservation de tous les médicaments sont vérifiées, que le contenu de la pharmacie de bord fait l'objet d'une liste et qu'il correspond au guide médical employé sur le plan national, que les fournitures médicales portent des étiquettes indiquant le nom générique outre le nom de marque, la date de péremption et les conditions de conservation.
- c) Le guide médical devrait expliquer le mode d'utilisation du matériel médical et des fournitures médicales et être conçu de façon à permettre à des personnes autres que des médecins de donner des soins aux malades et aux blessés à bord, avec ou sans consultation médicale par radio ou par satellite. Le guide devrait être préparé en tenant compte des recommandations internationales en la matière, y compris celles figurant dans l'édition la plus récente du Guide médical international de bord de l'OIT/OMI/OMS et du Guide des soins médicaux d'urgence à donner en cas d'accidents dus à des marchandises dangereuses.
- d) Les consultations médicales par radio ou par satellite devraient être assurées gratuitement à tous les navires quel que soit leur pavillon.

### *Sécurité et santé au travail*

#### *Recherche, diffusion d'informations et consultation*

38. Afin de contribuer à l'amélioration continue de la sécurité et de la santé des pêcheurs, les Membres devraient mettre en place des politiques et des programmes de prévention des accidents à bord des navires de pêche prévoyant la collecte et la diffusion d'informations, de recherches et d'analyses sur la sécurité et la santé au travail, en tenant compte du progrès des techniques et des connaissances dans le domaine de la sécurité et de la santé au travail et des instruments internationaux pertinents.

39. L'autorité compétente devrait prendre des mesures propres à assurer des consultations régulières sur les questions de sécurité et de santé au travail, en vue de garantir que toutes les personnes concernées soient tenues convenablement informées des évolutions nationales et internationales ainsi que des autres progrès réalisés dans ce domaine, et de leur application possible aux navires de pêche battant le pavillon du Membre.

40. En veillant à ce que les armateurs à la pêche, les patrons, les pêcheurs et les autres personnes concernées reçoivent suffisamment de directives et de matériel de formation appropriés ainsi que toute autre information pertinente, l'autorité compétente devrait tenir compte des normes internationales, des recueils de directives, des orientations et de toutes autres informations utiles disponibles, et se tenir au courant, pour en faire usage, de la recherche et des orientations internationales en matière de sécurité et de santé dans le secteur de la pêche, y compris de la recherche dans le domaine de la sécurité et de la santé au travail en général qui pourrait être applicable au travail à bord des navires de pêche.

41. Information concerning particular hazards should be brought to the attention of all fishers and other persons on board through official notices containing instructions or guidance or other appropriate means.

42. Joint committees on occupational safety and health should be established:

- (a) ashore; or
- (b) on fishing vessels, where determined by the competent authority, after consultation, to be practicable in light of the number of fishers on board the vessel.

*Occupational safety and health management systems*

43. When establishing methods and programmes concerning safety and health in the fishing sector, the competent authority should take into account any relevant international guidance concerning occupational safety and health management systems, including the *Guidelines on occupational safety and health management systems, ILO-OSH 2001*.

*Risk evaluation*

44. (1) Risk evaluation in relation to fishing should be conducted, as appropriate, with the participation of fishers or their representatives and should include:

- (a) risk assessment and management;
- (b) training, taking into consideration the relevant provisions of Chapter III of the International Convention on Standards of Training, Certification and Watchkeeping for Fishing Vessel Personnel, 1995 (STCW-F Convention);
- (c) on-board instruction of fishers.

(2) To give effect to Paragraph 1(a), Members, after consultation, should adopt laws, regulations or other measures requiring:

- (a) the regular and active involvement of all fishers in improving safety and health by continually identifying hazards, assessing risks and taking action to address risks through safety management;
- (b) an occupational safety and health management system that may include an occupational safety and health policy, provisions for fisher participation and provisions concerning organizing, planning, implementing and evaluating the system and taking action to improve the system;
- (c) a system for the purpose of assisting in the implementation of a safety and health policy and programme and the provision of fishers with a forum to influence safety and health matters. On-board prevention procedures should be designed so as to involve fishers in the identification of hazards and potential hazards and in the implementation of measures to reduce or eliminate such hazards.

(3) When developing the provisions referred to in Paragraph 1(a), Members should take into account the relevant international instruments on risk assessment and management.

41. Les informations concernant les risques particuliers devraient être portées à l'attention de tous les pêcheurs et d'autres personnes à bord au moyen de notices officielles contenant des instructions ou des directives ou d'autres moyens appropriés.

42. Des comités paritaires de santé et de sécurité au travail devraient être établis:

- i) à terre; ou
- ii) sur les navires de pêche, si l'autorité compétente, après consultation, décide que cela est réalisable compte tenu du nombre de pêcheurs à bord.

*Systèmes de gestion de la sécurité et de la santé au travail*

43. Lors de l'élaboration de méthodes et de programmes relatifs à la sécurité et à la santé dans le secteur de la pêche, l'autorité compétente devrait prendre en considération toutes les directives internationales pertinentes concernant les systèmes de gestion de la sécurité et de la santé au travail, y compris les Principes directeurs concernant les systèmes de gestion de la sécurité et de la santé au travail, ILO-OSH 2001.

*Evaluation des risques*

44. (1) Des évaluations des risques concernant la pêche devraient être conduites, lorsque cela est approprié, avec la participation de pêcheurs ou de leurs représentants et devraient inclure:

- a) l'évaluation et la gestion des risques;
- b) la formation, en prenant en considération les dispositions pertinentes du chapitre III de la Convention internationale de 1995 sur les normes de formation du personnel des navires de pêche, de délivrance des brevets et de veille (Convention STCW-F);
- c) l'instruction des pêcheurs à bord.

(2) Pour donner effet aux dispositions de l'alinéa a) du paragraphe 1, les Membres devraient adopter, après consultation, une législation ou d'autres mesures exigeant que:

- a) tous les pêcheurs participent régulièrement et activement à l'amélioration de la sécurité et de la santé en répertoriant de façon permanente les dangers, en évaluant les risques et en prenant des mesures visant à les réduire grâce à la gestion de la sécurité;
- b) un système de gestion de la sécurité et de la santé au travail soit mis en place, qui peut inclure une politique relative à la sécurité et à la santé au travail, des dispositions prévoyant la participation des pêcheurs et concernant l'organisation, la planification, l'application et l'évaluation de ce système ainsi que les mesures à prendre pour l'améliorer;
- c) un système facilitant la mise en œuvre de la politique et du programme relatifs à la sécurité et la santé au travail soit mis en place et que les pêcheurs disposent d'une tribune pour influencer sur les questions de sécurité et de santé. Les procédures de prévention à bord devraient être conçues de manière à associer les pêcheurs au repérage des dangers existants et potentiels et à la mise en œuvre de mesures propres à les atténuer ou à les éliminer.

(3) Lors de l'élaboration des dispositions mentionnées à l'alinéa a) du paragraphe 1, les Membres devraient tenir compte des instruments internationaux pertinents se rapportant à l'évaluation et à la gestion des risques.

*Technical specifications*

45. Members should address the following, to the extent practicable and as appropriate to the conditions in the fishing sector:

- (a) seaworthiness and stability of fishing vessels;
- (b) radio communications;
- (c) temperature, ventilation and lighting of working areas;
- (d) mitigation of the slipperiness of deck surfaces;
- (e) machinery safety, including guarding of machinery;
- (f) vessel familiarization for fishers or fisheries observers new to the vessel;
- (g) personal protective equipment;
- (h) fire-fighting and lifesaving;
- (i) loading and unloading of the vessel;
- (j) lifting gear;
- (k) anchoring and mooring equipment;
- (l) safety and health in living quarters;
- (m) noise and vibration in work areas;
- (n) ergonomics, including in relation to the layout of workstations and manual lifting and handling;
- (o) equipment and procedures for the catching, handling, storage and processing of fish and other marine resources;
- (p) vessel design, construction and modification relevant to occupational safety and health;
- (q) navigation and vessel handling;
- (r) hazardous materials used on board the vessel;
- (s) safe means of access to and exit from fishing vessels in port;
- (t) special safety and health requirements for young persons;
- (u) prevention of fatigue;
- (v) other issues related to safety and health.

46. When developing laws, regulations or other measures concerning technical standards relating to safety and health on board fishing vessels, the competent authority should take into account the most recent edition of the *FAO/ILO/IMO Code of Safety for Fishermen and Fishing Vessels*, Part A, Safety and Health Practice for Skippers and Crews.

*Establishment of a list of occupational diseases*

47. Members should establish a list of diseases known to arise out of exposure to dangerous substances or conditions in the fishing sector.

*Social security*

48. For the purpose of extending social security protection progressively to all fishers, Members should maintain up-to-date information on the following:

- (a) the percentage of fishers covered;

*Spécifications techniques*

45. Les Membres devraient, dans la mesure du possible et selon qu'il convient au secteur de la pêche, examiner les questions suivantes:

- a) navigabilité et stabilité des navires de pêche;
- b) communications par radio;
- c) température, ventilation et éclairage des postes de travail;
- d) atténuation du risque posé par des ponts glissants;
- e) sécurité d'utilisation des machines, y compris les dispositifs de protection;
- f) familiarisation des nouveaux pêcheurs ou observateurs des pêches avec le navire;
- g) équipement de protection individuelle;
- h) dispositifs de lutte contre les incendies et de sauvetage;
- i) chargement et déchargement du navire;
- j) appareils de levage;
- k) appareils d'ancrage et d'amarrage;
- l) sécurité et santé dans les locaux d'habitation;
- m) bruits et vibrations dans les postes de travail;
- n) ergonomie, y compris en ce qui concerne l'aménagement des postes de travail et le levage et la manipulation des chargements;
- o) équipement et procédures pour la prise, la manipulation, le stockage et le traitement du poisson et des autres ressources marines;
- p) conception et construction du navire et modifications touchant à la sécurité et à la santé au travail;
- q) navigation et manœuvre du navire;
- r) matériaux dangereux utilisés à bord;
- s) sécurité des moyens d'accès et de sortie des navires dans les ports;
- t) prescriptions spéciales en matière de sécurité et de santé applicables aux adolescents;
- u) prévention de la fatigue;
- v) autres questions liées à la sécurité et à la santé.

46. Lors de l'élaboration d'une législation ou d'autres mesures relatives aux normes techniques concernant la sécurité et la santé à bord des navires de pêche, l'autorité compétente devrait tenir compte de l'édition la plus récente du Recueil FAO/OIT/OMI de règles de sécurité pour les pêcheurs et les navires de pêche, partie A, directives pratiques de sécurité et d'hygiène à l'usage des patrons et des équipages.

*Etablissement d'une liste de maladies professionnelles*

47. Les Membres devraient dresser la liste des maladies dont il est connu qu'elles résultent de l'exposition à des substances ou à des conditions dangereuses dans le secteur de la pêche.

*Sécurité sociale*

48. Aux fins d'étendre progressivement la sécurité sociale à tous les pêcheurs, les Membres devraient établir et tenir à jour des informations sur les points suivants:

- a) le pourcentage de pêcheurs couverts;

- (b) the range of contingencies covered;
- (c) the level of benefits.

49. The benefits referred to in Article 37 of the Convention should be granted throughout the contingency covered.

50. Every person protected under Article 33 of the Convention should have a right of appeal in the case of a refusal of the benefit or of an adverse determination as to the quality or quantity of the benefit.

#### PART V. OTHER PROVISIONS

51. A Member, in its capacity as a coastal State, may require that fishing vessels comply with the standards of the Convention when granting licences for fishing in its exclusive economic zone.

- b) l'éventail des éventualités couvertes;
- c) le niveau des prestations.

49. Les prestations visées à l'article 37 de la convention devraient être accordées pendant toute la durée de l'éventualité couverte.

50. Toute personne protégée en vertu de l'article 33 de la convention devrait avoir le droit de faire recours en cas de refus de la prestation ou d'une décision défavorable sur la qualité ou la quantité de celle-ci.

#### PARTIE V. AUTRES DISPOSITIONS

51. Un Membre, en sa qualité d'Etat côtier, pourrait exiger que les navires de pêche respectent les normes énoncées dans la convention avant d'accorder l'autorisation de pêcher dans sa zone économique exclusive.

**Fifth item on the agenda:  
Work in the fishing sector  
(second discussion)**

**Report of the Committee on the Fishing Sector**

1. The Committee on the Fishing Sector held its first sitting on 31 May 2005. It was originally composed of 123 members (54 Government members, 21 Employer members and 48 Worker members). To achieve equality of voting strength, each Government member entitled to vote was allotted 56 votes, each Employer member 144 votes and each Worker member 63 votes. The composition of the Committee was modified ten times during the session and the number of votes attributed to each member adjusted accordingly.<sup>1</sup>

<sup>1</sup> The modifications were as follows:

- (a) 1 June: 143 members (71 Government members entitled to vote with 598 votes each, 26 Employer members with 1,633 votes each and 46 Worker members with 923 votes each);
- (b) 2 June: 124 members (83 Government members entitled to vote with 414 votes each, 18 Employer members with 1,909 votes each and 23 Worker members with 1,494 votes each);
- (c) 3 June: 120 members (85 Government members entitled to vote with 304 votes each, 16 Employer members with 1,615 votes each and 19 Worker members with 1,360 votes each);
- (d) 4 June: 120 members (87 Government members entitled to vote with 266 votes each, 14 Employer members with 1,653 votes each and 19 Worker members with 1,218 votes each);
- (e) 6 June: 120 members (89 Government members entitled to vote with 238 votes each, 14 Employer members with 1,513 votes each and 17 Worker members with 1,246 votes each);
- (f) 7 June: 116 members (89 Government members entitled to vote with 182 votes each, 14 Employer members with 1,157 votes each and 13 Worker members with 1,246 votes each);
- (g) 8 June: 112 members (89 Government members entitled to vote with 130 votes each, 10 Employer members with 1,157 votes each and 13 Worker members with 890 votes each);
- (h) 9 June: 105 members (88 Government members entitled to vote with 9 votes each, 9 Employer members with 88 votes each and 8 Worker members with 99 votes each);
- (i) 10 June: 105 members (89 Government members entitled to vote with 63 votes each, 7 Employer members with 801 votes each and 9 Worker members with 623 votes each);
- (j) 13 June: 103 members (90 Government members entitled to vote with 7 votes each, 7 Employer members with 90 votes each and 6 Worker members with 105 votes each).

---

2. The Committee elected its Officers as follows:

- Chairperson:* Mr. F. Ribeiro Lopes (Government member, Portugal) at its first sitting
- Vice-Chairpersons:* Ms. R. Karikari Anang (Employer member, Ghana) and Mr. P. Mortensen (Worker member, Denmark) at its first sitting
- Reporter:* Mr. G. Boumbopoulos (Government member, Greece) at its second sitting

3. At its second sitting the Committee appointed a Drafting Committee composed of the following members: Ms. M. Martyn (Government member, United Kingdom) and Mr. A. Moussat (Government member, France); Ms. T. French (Employer member, United States), Mr. R. Manda (Employer member, South Africa) and Mr. A. Piggott (Employer member, United Kingdom); Ms. E. Lynch (Worker member, Ireland) and Mr. I. Victor (Worker member, Belgium); and the Reporter, Mr. G. Boumbopoulos (Government member, Greece) (ex officio).
4. At its second sitting, the Committee appointed a Working Party to consider Article 5 and Annex I. It was composed of the following members: Mr. N. Campbell (Government member, South Africa), Mr. J. Downie (Government member, United Kingdom), Mr. H. Endo (Government member, Japan), Mr. P. Livet (Government member, France), Mr. P. Mannion (Government member, Canada), Ms. V. Ribeiro Albuquerque (Government member, Brazil) and Mr. R. Sylvestersen (Government member, Denmark); Ms. M.-C. Hervouet-Dion (Employer member, France), Mr. Y. Okazaki (Employer member, Japan) and Ms. C. Penney (Employer member, Canada); Mr. H. Angriman (Worker member, Argentina), Mr. M. Claes (Worker member, Belgium), Mr. J. Hansen (Worker member, Norway), Mr. R. Kapenda (Worker member, Namibia), Mr. S. Kondo (Worker member, Japan) and assisted by Mr. R. Karavatchev (International Transport Workers' Federation). At its fifth sitting the mandate of the Working Party was extended to consider Articles 25-28 and Annex III. The members of the Working Party were Mr. N. Campbell (Government member, South Africa), Mr. J. Downie (Government member, United Kingdom), Mr. P. Livet (Government member, France), Mr. P. Mannion (Government member, Canada), Ms. V. Ribeiro Albuquerque (Government member, Brazil), Mr. R. Sylvestersen (Government member, Denmark) and Mr. Y. Takeba (Government member, Japan); Mr. C. Blonk (Employer member, Netherlands), Mr. B. Chapman (Employer member, Canada), Ms. M.-C. Hervouet-Dion (Employer member, France) and Mr. Y. Okazaki (Employer member, Japan); Mr. H. Angriman (Worker member, Argentina), Mr. M. Claes (Worker member, Belgium), Mr. J. Hansen (Worker member, Norway) and Mr. K. Masemola (Worker member, South Africa) assisted by Mr. R. Karavatchev (International Transport Workers' Federation).
5. The Committee held 16 sittings. The Committee had before it Reports V(2A) and V(2B), prepared by the office on the fifth item of the agenda of the Conference: Work in the fishing sector.

## Introduction

6. The Chairperson thanked the Committee for his election and recalled that the goal of this Committee was to present the International Labour Conference with a Convention and Recommendation on work in the fishing sector for its consideration and adoption. The overarching objective was to ensure that the ILO's goal of decent work – promoting opportunities for men and women to obtain decent and productive work in conditions of

---

freedom, equity, security and dignity – could be achieved in the fishing sector. The challenge before the Committee was threefold: to develop a standard that provided protection for as much of the world’s fishing population as possible; to develop a standard that could be widely ratified in order to have a real impact on the life of fishers; and to ensure that its implementation would improve matters not only for fishers working on small vessels close to shore, but also those working on distant-water vessels that would remain at sea for extended periods. During discussions on the draft consolidated maritime labour Convention, it had been decided to exclude fishers from the provisions of that Convention. It was therefore the task of this Committee to ensure that fishers were not left without protection. Fishers, like all other workers, had the right to decent work and were entitled to good living and working conditions. The Chairperson emphasized that due to the length of the proposed instruments, the Committee would have to work in a very focused and deliberate manner in order to complete its work.

7. The representative of the Secretary-General recalled the first discussion on this issue, held during the 92nd Session of the International Labour Conference. During that first discussion, the Committee was not able to consider all of the proposed text due to time constraints. In particular, Part V on accommodation and food; the provisions concerning social security; Annex I concerning fishers’ work agreements; Annex II concerning accommodation; and the proposed Conclusions with a view to the Recommendation were not examined. The Committee agreed that the Office should enable consultation on Part V and Annex II of the Conclusions, both of which covered accommodation, between the end of the 92nd Session of the International Labour Conference and the beginning of its 93rd Session.
8. The Office accordingly held a Tripartite Meeting of Experts on the Fishing Sector. The purpose of that Meeting was to review and formulate provisions on accommodation and to handle any other pending issues identified by the Conference. The ILO Governing Body asked the Meeting of Experts also to consider provisions for larger vessels in order to assist the Office in drafting such provisions. The Meeting was also provided with copies of various amendments to Part V and to Annex II that had been submitted during the 92nd Session of the International Labour Conference but had not been considered due to lack of time. The report of the Meeting of Experts should be read in conjunction with Annex I entitled “Provisions for accommodation, large fishing vessels and social security discussed at the Tripartite Meeting of Experts on the Fishing Sector”, both of which were included as an Appendix to Report V(2A).
9. The speaker then introduced the Office reports. Report V(1) contained the Conclusions adopted by the Committee last year in the form of a proposed Convention and Recommendation. Governments were sent copies of this report and were requested to consult with the most representative organizations of workers and employers and inform the Office of any amendments or comments on the proposed text. Report V(2A) contained a summary of the replies received from 43 member States. Report V(2B), which would be the main focus of the Committee’s work, included the proposed text of a Convention and Recommendation concerning Work in the Fishing Sector.
10. The speaker highlighted certain significant changes to Report V(1) that had been introduced since the first discussion at the 92nd Session of the International Labour Conference. These included: the placement of provisions for “larger” vessels throughout the text rather than in a separate section; a new Annex I on equivalence in units of measurement; slight changes to length overall figures in light of IMO analysis; new proposed figures for equivalent units as concerned gross tonnage; the introduction of definitions for “length overall” and “international voyage”; and clarification to Part VII in the provisions on compliance and enforcement. These, as well as other changes, were noted in the commentary in Report V(2A).

- 
11. In closing, the speaker drew attention to the significant potential impact an ILO Convention and Recommendation on work in the fishing sector could have, not only on fishers themselves, but also in a broader context encompassing related industries, families and coastal communities. The exclusion of fishers from the protection afforded by existing maritime labour Conventions and Recommendations, as a result of the development of the draft consolidated maritime labour Convention, highlighted the importance of the Committee's work.
  12. The Legal Adviser recognized the challenge the Committee faced in examining a much longer text than was usually examined during standard setting discussions. To address this issue, the Meeting of Experts on the Fishing Sector had accepted the suggestion to have a standing drafting committee that would meet daily. This is fully in keeping with article 59 of the Standing Orders of the International Labour Conference, which does not contain any provisions as to when the drafting committee could meet or what its work should consist of. The Office therefore proposed holding daily meetings of the drafting committee to ensure that the provisions approved by the Committee say the same thing in the two authentic languages. The text adopted on a daily basis by the drafting committee will be, in principle, the final version submitted to the Committee for its approval. In addition, the drafting committee could also assist the Committee by drafting text for provisions on which there was consensus in the Committee, but for which exact wording needed to be formulated. These draft provisions could then be returned to the Committee for further deliberation and eventual adoption, further amendment, or rejection.

## General discussion

13. The Employer Vice-Chairperson stated that the Committee was in a position either to develop a widely ratifiable Convention or one that would remain unratified and would leave the majority of fishers without standards. While fishers in developed countries were covered by existing Conventions, other fishers were not protected by international standards since developing countries had not been in a position to ratify the fishing instruments. It was thus essential for the Committee to develop an inclusive Convention that would strike a balance between developed member States with regulations and developing countries without regulations. Furthermore, the Convention should seek to establish minimum standards, not maximum standards, since individual member States could always increase protection if practicable in their national contexts. The Committee should also seek to develop a Convention that governments would enforce and that would maintain jobs in the sector. The challenge therefore was to develop an instrument providing both strong protection and enough flexibility to accommodate the diverse conditions in the fishing industry. Unfortunately, it appeared that the Committee was not heading towards a widely ratifiable instrument. Furthermore, given the diversity of the industry and the need for flexibility, vessel length or tonnage should not be used as a basis for additional requirements in areas such as minimum age, medical examination or accommodation. Fishers worldwide should enjoy the same protection, regardless of vessel size.
14. The Worker Vice-Chairperson noted the importance in striking a balance between existing standards and their possible improvement on the one hand, and the necessary flexibility for small-scale fisheries in developing countries and widespread ratification on the other. This balance also included the question of requirements for larger vessels. The Workers' group however, would find it difficult to agree to the removal of existing standards. This was especially true given the development of the draft consolidated maritime labour Convention, which, if adopted, would lead to the suspension of a number of maritime Conventions covering fishers. The disastrous consequences of the tsunami for fishers and fishing communities further strengthened the need for a meaningful Convention. The

---

Workers intended to table a resolution to that effect and invited Governments and Employers to assist in its drafting.

15. The Government member of Lebanon recalled the importance of the fishing industry and hoped that the standard under discussion would help to solve the problems of this sector. Questions that needed to be considered by the Committee included the scope of the instrument, as well as its consistency with other instruments. In particular, the Committee needed to ensure that the Convention would be in line with the Minimum Age Convention, 1973 (No. 138), and its provisions on the education and training of young workers. The Committee's goal was to develop a clear and flexible standard with provisions that were easily understood. Accordingly, a request was made that the Arabic translation be as simple as possible.
16. The Government member of Norway said that there was a strong need for a new and effective international standard on fishers' working and living conditions. There were, however, a few major obstacles to the successful adoption of the instrument, for example the attempt to regulate social security. It would be unacceptable to have regulations that would place heavy burdens on countries with developed social security systems and practically none on countries without such systems. It would likewise be unacceptable to confer rights in a contributory system to those who were not contributing, and to treat fishers who had chosen to be self-employed as employees. In order to safeguard the lives and health of fishers, the Committee needed to create a standard that would not force fishing vessel owners to adopt lower standards in order to remain competitive. Only a Convention aimed towards the highest common denominator could provide the best possible foundation for the future of the fishing industry.
17. The Government member of India stated that, given the hazardous nature of the fishing sector, the proposed instruments were crucial to provide a regulatory framework for large fishing operations. However, the draft provisions did not adequately address the concerns of small-scale fishers. In the case of subsistence fishing, provisions concerning minimum wage, medical examination, manning and hours of rest, fishers' work agreements, repatriation and similar issues, would be difficult to enforce. The new fishing instrument should be practicable and enforceable in countries with diverse ecologies and long coastlines.
18. The Government member of Turkey said the standard should provide stronger protection for workers, while being flexible enough to enable less-developed member States to ratify it. She described recently adopted national legislation covering the fishing sector that conformed with much of the draft text.
19. The Government member of Japan noted the number of ratifications of existing ILO fishing Conventions was low due to overly detailed and prescriptive requirements. It was therefore crucial that the new Convention and Recommendation be flexible enough to attain wide ratification. In this context, the issue of accommodation was of concern and there was a need for more flexibility in this area. The conversion of length into gross tonnage would have to be discussed to take into account the equal application of the Convention among member States.
20. The Government member of Greece stated that the adoption of the lengthy Convention and Recommendation in the time available would not be an easy task. However, he was optimistic that the spirit of tripartism would prevail and that a modern fishing standard maintaining the ILO's maritime tradition would be adopted.
21. The Government member of Canada stated the Committee's goal was to adopt a credible standard that provided appropriate protection for fishers worldwide. The new instruments

---

should be meaningful and practicable to accommodate a diverse industry and should avoid including prescriptive provisions that would impede widespread ratification and implementation. To this end, the Committee should consider the possibility of using other tools for providing detailed guidance, such as codes of practice.

22. The Government member of Brazil said that due to the over-exploitation of fishing grounds, small fishing vessels in many developing countries tended to operate in increasingly remote and unsafe areas. Fishers lacked social security and had unacceptable working conditions. This Convention offered the opportunity to improve this situation. Even though the Convention had not yet been adopted, the fishing sector had already benefited from the attention brought about by these discussions.
23. The Government member of the Bahamas noted the importance of the fishing sector for his country and expressed support in ensuring a productive outcome of the discussions.
24. The Government member of South Africa stated that the Convention should modernize the protection contained in the existing fishing instruments and provide sufficient flexibility. The provisions on social security could place a heavy burden on Members with respect to fishers not resident in their territories. The creation of separate provisions for different sizes of fishing vessel was another area for concern; the Convention should be a minimum standard.
25. The Government member of Australia welcomed the rationalization of standards as part of an integrated approach to ILO maritime and fishing instruments. The proposed Convention should specify broad principles focused on appropriate goals and protection, and be flexible enough to accommodate different national circumstances and levels of development. Prescriptive detail should be included in the Recommendation or in a code of practice. The definition of “fisher” should not include self-employed persons and the terms of genuine independent contracting arrangements should not become subject to the provisions of this Convention. Given the exclusion of fishers from the draft consolidated maritime labour Convention, it was essential to adopt a Convention covering the fishing sector.
26. The Government member of Namibia noted the importance of crafting an instrument that would be protective, but also widely ratifiable. In this regard, there were a number of critical areas such as accommodation, social security, and length and tonnage issues. It was important to avoid unnecessary duplication and to avoid deviating from established principles. This could be accomplished by cooperating with the work of organizations such as the IMO.
27. The Government member of China noted the fishing industry was very diverse. While sophisticated vessels were sometimes used, there was also much more smaller scale fishing. The Convention would need to take these varying levels of employment into consideration, as well as differences in national regulations. She added that the standard should not be overly detailed, in order to ensure that the rights of fishers could be protected.
28. The Government member of Indonesia stated that improved working conditions in the fishing sector would make the sector more attractive, reduce unemployment and contribute to sustainable development. The Convention needed to take into account local conditions and the fact that small-scale fisheries were often family businesses with limited financial resources. Financial implications should be taken into account so as to avert any loss of employment. While it was important to improve working conditions on fishing vessels, a Convention should not be too detailed so that member States could adapt its principles to local circumstances.

- 
- 29.** The Government member of the United Kingdom stated the goal was to create a ratifiable Convention that struck the right balance between detail and general principles. Even countries with well-developed standards would be unable to ratify the new Convention if one or two small provisions presented them with difficulties. Flexibility should not be seen as a weakness, rather a reflection of the diversity of the circumstances to be covered by the instrument.
  - 30.** The Government member of Nigeria urged the Committee to continue to consider the situation of developing countries, particularly in respect to issues such as accommodation, social protection and conditions of employment. The debt burden of many developing countries was huge and the instrument, therefore, needed to be flexible. The suggestions resulting from the Tripartite Meeting of Experts on the Fishing Sector were supported, in so far as these were all-embracing and integrated.
  - 31.** The Government member of the Bolivarian Republic of Venezuela described the situation in his country, providing information on the national system of labour inspection and emphasizing the importance of communication, training, education and prevention.
  - 32.** The representative of the Food and Agricultural Organization of the United Nations (FAO) stressed that fishing was a vital source of food, employment, trade and economic well-being and needed to be conducted in a reasonable manner. An important step towards this goal was the promotion of safety and health of fishers. The FAO/ILO/IMO Code of Safety for Fishermen and Fishing Vessels and the Voluntary Guidelines for the Design, Construction and Equipment of Small Fishing Vessels had recently been revised. These revisions had been approved by the FAO and the IMO and were pending approval by the ILO. On the issue of accommodation, it was emphasized that while provisions on this topic should be included in the new ILO instruments, it was important that any major conflicts with the aforementioned FAO/ILO/IMO instruments be avoided. The speaker supported the text of the proposed Recommendation requesting that competent authorities take into account relevant international guidance. He also agreed with the current draft on the scope of the Convention and equivalent units of measurement. Length (L) as defined in Article 1 was the main basis for the measurement of vessels in several international instruments. Alternative parameters should, as foreseen, be allowed to take into account the different traditions of some regions. The equivalent figures for length overall corresponded fairly well to length (L); the figures for gross tonnage might, however, need to be increased.
  - 33.** The representative of the International Christian Maritime Association (ICMA) suggested the medical care provisions should be amended in order to preserve the rights that fishers and other seafarers currently enjoyed. Shipowners were responsible for providing medical care for any illness or injury a fisher suffered while in service; however the proposed provisions on this topic shifted financial responsibility away from shipowners. Also, given the high risks of fishing, it was suggested that the minimum age for working on fishing vessels should be raised to 18 years.
  - 34.** The representative of the International Collective in Support of Fishworkers (ICSF) noted that certain types of fishing were excluded from the instrument, such as commercial beach fishing and diving. The provisions on health care, in particular, needed to be extended to cover workers in these areas. To this effect, the definition of fisher needed to be broadened to include persons employed in shore-based fishing operations who did not necessarily work on board a fishing vessel. Consultations with various fishers' organizations had indicated overwhelming support for the inclusion of social security. The Convention's provisions should be no less than those contained in the Social Security (Minimum Standards) Convention, 1952 (No. 102). The tsunami disaster had demonstrated the need for social security for small-scale fishers. The provisions covering small-scale fishers undertaking long voyages should be no different from those applicable to fishers on larger

---

vessels undertaking similar voyages. Concerning larger vessels, the protection afforded to fishers aboard those vessels should be at least equal to that provided by current ILO instruments. Finally, the ILO should also strive to create links with international standards on fishery management, particularly on regional levels.

### ***Consideration of the proposed Convention concerning work in the fishing sector***

Preamble

D.6

35. The Worker Vice-Chairperson proposed an amendment to insert a new paragraph after the fourth paragraph to read: “Noting that the International Labour Organization has designated fishing as an especially hazardous sector, and”. This wording was based on the conclusions of the ILO Tripartite Meeting on Safety and Health in the Fishing Industry (1999).
36. The Employer Vice-Chairperson requested clarification from the Office as to the exact wording found in the conclusions of the Tripartite Meeting on Safety and Health in the Fishing Industry (1999) and questioned the implications of referring to fishing as especially hazardous.
37. The Government member of Norway, speaking on behalf of the Government group, shared the Employers’ group’s concerns.
38. The representative of the Secretary-General said the unanimously adopted conclusions of the Tripartite Meeting on Safety and Health in the Fishing Industry (1999), as contained in its *Note on the proceedings*, had been approved by the Governing Body and subsequently sent to all member States, who had been asked to circulate them to the most representative workers’ and employers’ organizations. The exact wording used in these conclusions was “Fishing is a hazardous occupation when compared to other occupations”.
39. The Employer Vice-Chairperson opposed the amendment since it was not in line with the original wording, and since the addition of “especially” had further implications.
40. The Worker Vice-Chairperson proposed a subamendment to his group’s amendment to read: “Noting that the International Labour Organization has designated fishing as a hazardous occupation when compared to other occupations,”.
41. The Government members of Egypt and Lebanon and the Employers’ group supported the subamendment.
42. The Government member of the United Kingdom pointed out that “designated” implied the ILO had given fishing a special status. Instead, the ILO had simply accepted that it was a hazardous profession. She proposed a further amendment to replace “designated” by “accepted”.
43. The Government member of Namibia agreed since it would avoid creating any unwanted implications.
44. The Committee agreed to send the amendment as subamended to the Drafting Committee with the request that it provide an alternative formulation for “designated” that would reflect the Committee’s concerns.

---

## New preambular paragraphs

### *C.R./D.1(C.S.P.)*

- 45.** The Drafting Committee proposed the following wording: “Recognizing that the International Labour Organization considers fishing as a hazardous occupation when compared to other occupations, and”, which was accepted by the Committee.

### *D.20, D.22*

- 46.** The Government member of Denmark introduced two amendments that had been submitted by the Government members of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Malta, Netherlands, Norway, Portugal, Spain, Sweden and the United Kingdom. The first amendment deleted the words “and the Seafarers’ Identity Documents Convention (Revised), 2003,” at the end of the sixth paragraph, and inserted the word “and” after “1981,”. The second amendment added a new paragraph after the sixth paragraph to read: “Noting also Article 1, paragraph 3, of the Seafarers’ Identity Documents Convention (Revised), 2003, and”. The purpose was to replace the general reference to the Seafarers’ Identity Documents Convention (Revised), 2003 (No. 185), with a more specific reference to the Article contained therein that dealt with fishers.
- 47.** The Employer and Worker Vice-Chairpersons supported both amendments.
- 48.** The Government member of Norway, speaking on behalf of the Government group, also supported the amendments.
- 49.** The two amendments were adopted.
- 50.** Subsequent to the Committee’s discussions on social security, the Drafting Committee proposed for the Committee’s consideration a draft text C.R./D.4(C.S.P.) relating to the placement and wording of the reference to Convention No. 102 in the Preamble of the Convention. The words “the Social Security (Minimum Standards) Convention, 1952 notwithstanding the provisions of Article 77 of that Convention” had been deleted from the sixth preambular paragraph in which the Committee had placed them and a new preambular paragraph was added to read as follows: “Noting, in addition, the Social Security (Minimum Standards) Convention, 1952, and considering that the provisions of Article 77 of that Convention should not be an obstacle to protection extended by Members to fishers under social security schemes, and”. The Chairperson invited the Legal Adviser to clarify the reasons for the revision of the text.
- 51.** The Legal Adviser stated that the Committee had made its intentions clear, but the text adopted by the Committee had been unsound from a legal point of view. The Drafting Committee had proposed a revised text that would discourage member States that chose to ratify the new Convention from considering Article 77 of Convention No. 102 as an obstacle to the extension of protection to fishers under their social security schemes.
- 52.** The Chairperson thanked the Drafting Committee for their excellent work and, noting there was no objection, declared the text in C.R./D.4(C.S.P.) adopted.

### *D.7*

- 53.** The Worker Vice-Chairperson introduced an amendment to add a new paragraph after the eighth paragraph: “Recalling that the United Nations Convention on the Law of the Sea, 1982, sets out a legal framework within which all activities in the oceans and seas must be carried out and is of strategic importance as the basis for national, regional and global

---

action and cooperation in the marine sector, and that its integrity needs to be maintained, and". The United Nations Convention on the Law of the Sea, 1982, was an important instrument that provided a global legal framework which had an impact on some of the provisions of the new Convention.

54. The Government members of Cameroon, Egypt and Mauritania supported the amendment.
55. The Government member of the Bolivarian Republic of Venezuela noted that the Preamble already covered the important aspects of safety and health. Also, while his Government was not opposed to the United Nations Convention on the Law of the Sea, 1982, States that were not contracting parties to that Convention were not bound by its provisions. He therefore proposed a subamendment to address these issues. The subamendment was not seconded and so was not discussed.
56. The Government member of the United States, while not opposed to referring to the United Nations Convention on the Law of the Sea, 1982, noted that the explanatory text proposed in the amendment gave this Convention greater emphasis than other instruments referred to in the Preamble.
57. The Government members of Japan and the Bolivarian Republic of Venezuela and the Employers' group supported the comment made by the Government member of the United States.
58. The Government member of Germany said the United Nations Convention on the Law of the Sea, 1982, should be referred to in the same succinct manner as the other instruments.
59. The Employer Vice-Chairperson proposed subamending the text to read: "Recalling the United Nations Convention on the Law of the Sea, 1982" in order to remove an unnecessary level of detail.
60. The Worker Vice-Chairperson accepted the subamendment.
61. The amendment was adopted as subamended.

### D.3

62. The Worker Vice-Chairperson introduced an amendment to insert the following paragraph after the eighth paragraph: "Recalling that Article 94 of the United Nations Convention on the Law of the Sea, 1982, establishes the duties and obligations of a flag State with regard to, inter alia, labour conditions, crewing and social matters on vessels that fly its flag, and". The purpose was to provide guidance to the competent authorities on flag State responsibilities under the United Nations Convention on the Law of the Sea, 1982, with regard to labour conditions and social matters. This amendment was especially important given the Committee's decision on the previous amendment.
63. The Government member of Mauritania considered this amendment was unnecessary, given the adoption of the previous amendment.
64. The Government member of Portugal proposed further amending the previously discussed amendment to read: "Recalling the United Nations Convention on the Law of the Sea, 1982, in particular Article 94, which established the duties and obligations of a flag State with regard to, inter alia, labour conditions, crewing and social matters on vessels that fly its flag, and". This would address the concerns of the Workers' group.

- 
65. The Government members of Egypt and Japan, as well as the Workers' group, supported this further amendment.
  66. The Government member of Germany stated it was unnecessary to include a specific reference to Article 94. Any government that had ratified the United Nations Convention on the Law of the Sea, 1982, did not need a reminder of its responsibilities under that Convention.
  67. The Employer Vice-Chairperson opposed the further amendment on both procedural and substantive grounds. The previous amendment had already been adopted and should therefore not be opened for further amendment. In addition, the reference already made to the United Nations Convention on the Law of the Sea, 1982, was sufficient.
  68. The Government members of Cameroon, Côte d'Ivoire, Lebanon and Mozambique opposed the further amendment and the amendment.
  69. The Worker Vice-Chairperson withdrew the amendment.
  70. The Preamble was adopted as amended.

## ***Part I. Definitions and scope***

### Definitions

#### Article 1

##### *Subparagraph (a)*

##### *D.4*

71. The Government member of Indonesia introduced an amendment submitted by the Government members of Indonesia and the Philippines to insert the words "fishing for research, fishing for training" in the second line of subparagraph (a) after the words "subsistence fishing". She noted that Article 4 provided guidance on exclusion from the scope of the Convention for ratifying member States, and fishing research and fishing training vessels should be included in the categories of excluded vessels.
72. The Worker Vice-Chairperson opposed the amendment.
73. The Employer Vice-Chairperson and the Government member of Egypt supported the amendment since the proposed Convention was aimed at commercial fishing.
74. The Government member of Norway, speaking on behalf of the Government group, indicated that a clear majority of Governments opposed the amendment.
75. The Government member of Namibia opposed the amendment, considering that Article 2, paragraph 1, and Article 3, paragraph 1, addressed the concerns of the Government members of Indonesia and the Philippines.
76. The Employer Vice-Chairperson stated that in light of the intervention of the Government member of Namibia, her group withdrew its support for the amendment.
77. The amendment was not adopted.

---

*Subparagraph (e)*

*D.17*

- 78.** The Government member of Australia submitted an amendment, seconded by the Government member of India, to delete the words “or engaged in any capacity or carrying out an occupation” in subparagraph (e).
- 79.** As the Government member of Australia was not present, the amendment was not discussed.

*D.13*

- 80.** An amendment submitted by the Government member of Spain was not seconded and therefore not discussed.

*D.24*

- 81.** The Workers’ group withdrew an amendment.
- 82.** On a point of order, the Government member of Lebanon, supported by the Government member of Egypt, stated that even though an amendment to Article 1(e) had not been discussed, the definition of fisher was very relevant and clarification from the secretariat was necessary.
- 83.** The representative of the Secretary-General clarified that Article 1(e) had been adopted without amendment.

*Subparagraph (h)*

*D.16*

- 84.** The Government member of Greece introduced an amendment submitted by the Government members of Belgium, Finland, France, Germany, Greece, Netherlands, Norway, Portugal, Spain, Sweden and the United Kingdom to insert, in clauses (i), (ii) and (iii) of subparagraph (h), the words “for the Member concerned” after the words “the entry into force of the Convention”. The definition of the term “new fishing vessel”, which was used for technical issues such as accommodation, entailed practical problems for member States that ratified the Convention some time after it had come into force. For example, in the period between the entry into force of the Convention and the entry into force of the Convention for a particular Member, said Member might have accepted a certain number of vessels into its register. However, after entry into force of the Convention for the Member concerned, those vessels would have to leave the register because of non-compliance with provisions they had not been required to comply with at the time of registration. Subparagraph (h) as found in the draft text would require parliaments to regulate retroactively.
- 85.** The Government members of Canada, Denmark, Japan, Lebanon, Namibia and the United States, as well as the Employers’ group, supported the amendment.
- 86.** The Worker Vice-Chairperson expressed concerns about the amendment for control reasons, but did not oppose it.
- 87.** The amendment was adopted.

---

*Subparagraph (l)*

*D.2*

- 88.** The Government member of South Africa introduced an amendment submitted by the Government members of Iceland and South Africa to insert, in subparagraph (l), between the words “line” and “between”, the words “parallel to the designated waterline”. This was a technical amendment intended to bring the wording in line with the FAO/ILO/IMO Code of Safety for Fishermen and Fishing Vessels and the Voluntary Guidelines for the Design, Construction and Equipment of Small Fishing Vessels, and to reflect the wording of subparagraph (k).
- 89.** The Employer and Worker Vice-Chairpersons supported the proposal.
- 90.** The amendment was adopted.

*Subparagraph (m)*

*D.18*

- 91.** The Government member of the United Kingdom introduced an amendment submitted by the Government members of Belgium, Finland, France, Germany, Greece, Netherlands, Norway, Portugal, Spain, Sweden and the United Kingdom to replace, in subparagraph (m), the words “in recruiting fishers on behalf of employers or placing fishers with employers” by the words “in recruiting or placing fishers on behalf of employers, fishing vessel owners or operators”. This amendment sought to reflect the variety of employment and work relationships in the fishing sector.
- 92.** The Worker Vice-Chairperson felt that, in the light of the definitions of “fishing vessel owner” in subparagraph (d) and “fisher’s work agreement” in subparagraph (f), the amendment would be confusing. The Workers therefore opposed the amendment.
- 93.** The Employer Vice-Chairperson opposed the amendment and proposed a subamendment to replace the words “in recruiting fishers on behalf of employers or placing fishers with employers” by the words “in recruiting or placing fishers respectively on behalf of or with employers, fishing vessel owners or operators, unless such service is provided within a group of connected legal entities”. The purpose of the subamendment was twofold: (1) to reflect the fact that recruitment could be done on behalf of someone but placement could only be done with someone; and (2) to ensure that licences would not be required where a company providing recruitment services was part of a group of companies that owned a fishing vessel or fishing vessels and was providing those services to the other companies in the group.
- 94.** The Worker Vice-Chairperson expressed concern at the words “operators” and “entities” and proposed an alternate subamendment to replace the words “in recruiting fishers on behalf of employers or placing fishers with employers” by the words “in recruiting or placing fishers on behalf of fishing vessel owners”.
- 95.** The Government members of Portugal, South Africa and the United Kingdom supported the Workers’ group’s subamendment.
- 96.** The Government member of Greece also supported the Workers’ group’s subamendment, and suggested that the concern expressed by the Employers’ group might be better dealt with in Article 22 on “Recruitment and placement”.

- 
97. The Employer Vice-Chairperson withdrew her group's subamendment and proposed a further amendment to the Workers' subamendment to read: "in recruiting or placing fishers, respectively on behalf of or with fishing vessel owners."
  98. The Government member of Egypt supported this further amendment because it clarified that a fishing vessel owner must assume his or her responsibilities.
  99. The Workers' Vice-Chairperson also agreed with the further amendment.
  100. The amendment was adopted as subamended.

*D.9*

101. The Employer Vice-Chairperson withdrew an amendment in light of the adoption of the previous amendment.

*Subparagraph (o)*

*D.15*

102. The Government member of the United Kingdom introduced an amendment submitted by the Government members of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Malta, Netherlands, Norway, Portugal, Sweden and the United Kingdom to delete subparagraph (o). The Government group had tried to refine the definition of "international voyage" but it had proved too difficult given the number of occurrences throughout the text in which the term was used with different applications. It would therefore be more appropriate to delete the definition here and consider the application within each article where the term was mentioned.
103. The Government member of Norway, speaking on behalf of the Government group, expressed support for the amendment.
104. The Worker Vice-Chairperson sought assurances that appropriate wording would be introduced in the Articles where there was a reference to "international voyage". He suggested that paragraph (o) be put in square brackets until this issue was resolved.
105. The Employer Vice-Chairperson agreed to the Workers' proposal and suggested also postponing discussion of her group's amendment on subparagraph (o).
106. The Government members of Greece, Netherlands and Norway were in favour of the proposals of the Employers' and Workers' groups.
107. After subsequent discussions and decisions regarding the replacement or removal of the term "international voyage" wherever it had occurred in the Office text, the Chairperson drew the Committee's attention to the fact that it was no longer necessary to retain subparagraph (o) of Article 1, which defined international voyages. The Government members' amendment to delete it was therefore adopted.

*D.14*

108. The Employer members' amendment (D.14) fell as a result.
109. Article 1 was adopted as amended.

---

Scope

Article 2

*Paragraph 1*

*D.10*

- 110.** The Government member of Germany introduced an amendment to replace the words at the beginning of paragraph 1 “Except as provided otherwise, the Convention” by the words “Except as provided otherwise in this Convention, it” in order to lend greater precision to the text.
- 111.** The Government member of Greece supported the amendment, as did the Government member of Namibia, speaking on behalf of the Government members of Cameroon, Côte d’Ivoire, Mauritania, Mozambique, Nigeria and South Africa.
- 112.** The Government member of the United Kingdom, in supporting the amendment, suggested that it be referred to the Drafting Committee to make it more precise.
- 113.** The Worker Vice-Chairperson and the Employer Vice-Chairperson also expressed support.
- 114.** The amendment was adopted and the text referred to the Drafting Committee.

*Paragraph 3*

*D.5*

- 115.** The Government member of Denmark introduced an amendment submitted by the Government members of Denmark, Germany and Norway to add in paragraph 3, after the words “on smaller vessels”, the words “in whole or in part”. The purpose was to enable the extension of protection to fishers working on smaller vessels as and when possible.
- 116.** The Workers’ group supported the amendment.
- 117.** The Employers’ group also supported the amendment, observing that the length of vessels concerned had not yet been decided and therefore the number 24 should remain in square brackets.
- 118.** The amendment was adopted.
- 119.** Article 2 was adopted as amended.

Article 3

- 120.** Article 3 was adopted without amendment.

Article 4

- 121.** Article 4 was adopted without amendment.

Article 5 and Annex I

- 122.** A Working Party was appointed to consider Article 5 in conjunction with Annex I and all relevant amendments thereto (D.8, 19, 11, 12, 21). The Government member of Brazil, who served as the Chairperson of the Working Party, introduced the conclusions of their

---

work, contained in document C.S.P./D.101. She noted the great difficulty encountered in forming a consensus on the use of gross tonnage as an alternative to length and length overall. Initially, discussion had focused on replacing the gross tonnage figure of 100 by 300 as an equivalent to a length of 24 metres, but then various alternative figures were discussed for 15 and 45 metres as well. The Working Party agreed that the primary impact of equivalency would be on crew accommodation. Some representatives believed that discussing gross tonnage equivalents for size limits contained in Annex III on accommodation might help resolve the issue in Annex I. After the Committee extended the Working Party's mandate to discuss the relevant figures for tonnage in Annex III, the Working Party was able to agree that the use of equivalent tonnage, as indicated in Annex I, could be used as an alternative to length and length overall, but that it would only be applicable to eight paragraphs in Annex III. Those paragraphs were 10, 31, 32, 34, 36, 39, 54 and 59. After much debate on which figures to apply, in an effort to achieve compromise, the Employers' group proposed the following equivalent measures of gross tonnage to length: a gross tonnage of 200 gt should be considered equivalent to a length of 24 metres; a gross tonnage of 55 gt should be considered equivalent to a length of 15 metres; and a gross tonnage of 700 gt should be considered equivalent to a length of 45 metres. These figures and the revised text for Annex I, paragraph 2, were to be considered as an integrated package. A majority of the Government members accepted this proposal, but the Workers could not agree, since, in their opinion, the figures proposed were not supported by sufficient evidence.

- 123.** The Employer Vice-Chairperson recalled the divergent views expressed with regard to the figures proposed for Annex I, paragraph 2. Originally, the Employers had proposed greater gross tonnage equivalents, but in the course of discussion had agreed to those contained in the Working Party's report. She stressed the need for an all-inclusive, widely ratifiable Convention and asked Government members to express their views on the package proposed.
- 124.** A Worker member from Argentina stressed that the issue of equivalence was highly sensitive for his group and could make or break the Convention. Initially, the Workers had supported the Office text. They wished to avoid coming up with tonnage equivalents that might result in the requirements for accommodation not being obtained. The International Commission for the Conservation of Atlantic Tunas had already reported that a fleet of vessels 23.9 metres in length was being built in an effort to avoid compliance with legislation on vessels of 24 metres or longer. The Workers' group offered a compromise proposal to have the values set at 150 gt as an equivalent to a length of 24 metres, 55 gt as an equivalent to a length of 15 metres, and 700 gt as an equivalent to a length of 45 metres.
- 125.** The Government member of Norway, speaking on behalf of the Government group, pointed out that the Government group had considered the proposal contained in C.S.P./D.101 as a package deal and that the tonnage equivalents proposed were to be limited to the eight paragraphs mentioned. On that basis, a clear majority of governments supported the conclusions of the Working Party. The Government group had not had the opportunity to discuss the Workers' alternative proposal just presented.
- 126.** The Government member of France would not comment on the gross tonnage figures proposed by the Workers' group, but noted that, of the eight paragraphs in Annex III which referred to tonnage, only six were still at issue, as paragraphs 32 and 59 referred to a tonnage that was agreed by all three groups. It might be possible to consider deleting paragraph 2(b) of Annex I, which referred to a gross tonnage equivalent length of 15 metres.
- 127.** The Government member of Japan felt that the Committee should adopt a compromise that would be applicable to all countries. He preferred the larger gross tonnage figures that had

---

been discussed, but was willing to accept the Employers' figures, which should apply to all parts of the Convention and its annexes.

- 128.** The Government member of Portugal in principle preferred the Office text. She could not agree with the Employers' proposal, but could support that of the Workers. She agreed with the proposal of the Government member of France.
- 129.** The Government member of Brazil preferred the original text, but would support the Workers' proposal. She noted that two of the three figures were the same as those proposed by the Employers.
- 130.** The Government member of Indonesia supported the compromise proposal of the Working Party. According to a study carried out in his country, 24 metres was equivalent to 200 gross tonnes for steel vessels and 150 gross tonnes for wooden ships.
- 131.** The Government member of Norway expressed sympathy for the Workers' group's view, but stressed the importance of preserving the package deal.
- 132.** The Government members of Germany, Namibia, South Africa and Turkey also supported the package deal. In response to a query from the Government member of South Africa, it was confirmed that only the figures in square brackets (and not the three subparagraphs) in Annex I, paragraph 2, would be replaced if the Working Party's conclusions were accepted by the Committee.
- 133.** The Government member of Egypt asked for clarification as to how the figures contained in the Working Party's report had been determined.
- 134.** The Government member of Brazil stated that the Working Party had examined statistical information from Argentina, Japan and the United Kingdom. The aim had been to arrive at widely acceptable, comparable figures, although it was clear that fishing vessels and fleets varied widely across different regions of the world. She pointed out that under Article 43, Annex III could be amended to take account of changes in the size and shape of vessels in the future as design and technology evolved.
- 135.** The Employer Vice-Chairperson reported that, following consultations with the Workers' group and some Government members, a compromise had been reached to the effect that a gross tonnage of 175 gt should be deemed equivalent to a length of 24 metres.
- 136.** The Worker Vice-Chairperson confirmed his group's acceptance of this.
- 137.** The Government member of Norway supported the Employers' and Workers' proposal and pointed out that, although full consultation had not been possible, he had received positive feedback from a number of Government members.
- 138.** The Government member of Japan expressed disappointment and grave concern with the outcome. He stated with regret that the lower compromise figure would pose an obstacle for the internal process of ratification in his country.
- 139.** The Committee adopted Article 5 and Annex 1 as amended and referred the text to the Drafting Committee.

#### Article 5, Annex I and Annex III

- 140.** The Legal Adviser presented changes to Article 5 and Annex III that had been made by the Drafting Committee when revising Article 5 and Annex I, as adopted by the Committee.

---

These proposed modifications did not change the intent behind the provisions but offered additional precision and ensured greater consistency and flexibility throughout the Convention.

**141.** In revising the adopted text, it seemed to the Drafting Committee that the equivalent units of measurement, referring to length overall, could apply to the whole Convention, whereas the others referring to gross tonnage were to apply only to the specified provisions of Annex III. Given that equivalence could be applied to all provisions after consultation, it was necessary to be more specific about regular tonnage. Also for reasons of monitoring and possible exceptions, there was a need to be clear that two types of exceptions could be subject to the reporting requirements of article 22 of the ILO Constitution. The Drafting Committee therefore proposed replacing Article 5 with the following text (C.R./D.2):

1. For the purpose of this Convention, the competent authority, after consultation, may decide to use length overall (LOA) in place of length (L) as the basis for measurement, in accordance with the equivalence set out in Annex I. In addition, for the purpose of the paragraphs specified in Annex III of this Convention, the competent authority, after consultation, may decide to use gross tonnage in place of length (L) or length overall (LOA) as the basis for measurement in accordance with the equivalence set out in Annex III.

2. In the reports submitted under article 22 of the Constitution, the Member shall communicate the reasons for the decision taken under this Article and any comments arising from the consultation.

**142.** In order to ensure consistency, it was also necessary to add a new paragraph to the general provisions of Annex III. Therefore, paragraph 2 was deleted from Annex I and the following paragraph was inserted after paragraph 5 of Annex III (C.R./D.3):

The use of gross tonnage as referred to in Article 5 of this Convention is limited to the following specified paragraphs of this Annex: 10, 31, 32, 34, 36, 39, 54 and 59. For these purposes, where the competent authority, after consultation, decided to use gross tonnage (gt) as the basis of measurement:

- (a) a gross tonnage of 175 gt shall be considered equivalent to a length (L) of 24 metres or a length overall (LOA) of [26.5] metres;
- (b) a gross tonnage of 55 gt shall be considered equivalent to a length (L) of 15 metres or a length overall (LOA) of [16.5] metres;
- (c) a gross tonnage of 700 gt shall be considered equivalent to a length (L) of 45 metres or a length overall (LOA) of [50] metres.

This provided a clear view of the exceptions and scope of application of exceptions.

**143.** The Legal Adviser further noted that some minor consequent changes might be necessary as a result of these proposals, such as a change in the definition of gross tonnage so that it referred to Annex III and not Annex I.

**144.** In response to a query from the Government member of France, the Legal Adviser clarified that Annex I had been reduced to one paragraph to cover the provisions on length overall, which applied to the whole Convention.

**145.** Both the Employer and Worker Vice-Chairpersons accepted the proposed texts.

**146.** In order to take into account concerns expressed by the Government member of Japan, the Chairperson proposed the Committee accept the texts proposed by the Drafting Committee with the understanding that they could be adjusted in accordance with any subsequent changes agreed by the Committee. The Committee agreed and Article 5, the new paragraph

---

in Annex III and the resulting changes in Annex I were adopted as amended by the Drafting Committee.

## ***Part II. General principles***

### Implementation

#### Article 6

**147.** Article 6 was adopted without amendment.

### Competent authority and coordination

#### Article 7

**148.** Article 7 was adopted without amendment.

### Responsibilities of fishing vessel owners, skippers and fishers

#### Article 8

##### *Subparagraph 2(a)*

##### *D.39*

**149.** The Employer Vice-Chairperson introduced an amendment to replace the word “best” by the words “most appropriate” as “best” was too subjective.

**150.** The Worker Vice-Chairperson opposed the amendment.

**151.** The Government member of Norway, speaking on behalf of the Government group, opposed the amendment.

**152.** The Employer Vice-Chairperson withdrew the amendment.

##### *Subparagraph 2(b)*

##### *D.36*

**153.** The Employer Vice-Chairperson introduced an amendment to delete the words “, including prevention of fatigue” as the measurement and prevention of fatigue could not be quantified. Moreover, the respect for safety and health encompassed issues of fatigue, making the addition of a specific reference to that issue unnecessary.

**154.** The Government member of India supported the amendment.

**155.** The Worker Vice-Chairperson strongly opposed the amendment and noted that similar wording was used in IMO guidelines.

**156.** The Government member of Norway, speaking on behalf of the Government group, opposed the amendment.

**157.** The Government member of Turkey opposed the amendment and explained that a link existed between working hours and fatigue. Fatigue directly affected workers’ health and needed to be included.

- 
158. The Government member of Namibia, speaking on behalf of the Government members of Cameroon, Côte d'Ivoire, Mauritania, Mozambique, Nigeria and South Africa, opposed the amendment.
  159. The Government member of Egypt said the legal aspects of the term "fatigue" required clarification. It was important for the Committee to identify what kind of work led to fatigue.
  160. The Government member of Lebanon supported the statement of the Government member of Egypt.
  161. The Employer Vice-Chairperson proposed a subamendment to read "including the prevention of excessive fatigue".
  162. The Worker Vice-Chairperson strongly opposed the subamendment, noting that fatigue was a well-defined term.
  163. The Government member of Greece pointed out that the subamendment seemed to allow for certain levels of fatigue, as long as they were not excessive.
  164. The Government member of Norway opposed the subamendment. Allowing certain levels of fatigue while disallowing others was unacceptable. Also, the issue had links to Article 14 on manning and hours of rest.
  165. The Government member of Denmark opposed the subamendment. The Seafarers' Hours of Work and the Manning of Ships Convention, 1996 (No. 180), used the word "fatigue" in Article 11, demonstrating there were already ILO instruments addressing this issue.
  166. The Government member of Germany agreed with the Government members of Denmark and Norway.
  167. The Employer Vice-Chairperson withdrew the subamendment and the amendment.

*Subparagraph 2(c)*

*D.37*

168. The Employer Vice-Chairperson introduced an amendment to replace the text of subparagraph 2(c) by: "facilitating training in awareness of on-board occupational safety and health risks", in order to clarify the nature of the training.
169. The Worker Vice-Chairperson supported the amendment.
170. The Government member of Norway, speaking on behalf of the Government group, opposed the amendment and noted the link with Article 32, subparagraph 3(b). The original wording was reasonable as an obligation for a skipper. The wording suggested by the Employers' group seemed to describe an employer's obligation.
171. The Employer Vice-Chairperson stated that the amendment was not intended to detract from the responsibility of the skipper.
172. The Government member of Norway noted that the amendment was substantively different from the original draft, since the new wording no longer required on-board training. The skipper was responsible for on-board training, but not necessarily for training on safety and health on board which could be done ashore.

- 
- 173.** The Government member of France agreed with the Government member of Norway.
- 174.** The Government member of Denmark said on-board training was an essential aspect of occupational safety and health training. The amendment suggested onshore training could suffice to comply with the provision, which was unacceptable.
- 175.** The Government member of the Philippines opposed the amendment, preferring the broader, less restrictive nature of the original text.
- 176.** The Government member of the United Kingdom, seconded by the Government member of Norway, proposed a subamendment to replace the text of subparagraph 2(c) by: “facilitating on-board occupational safety and health awareness training”.
- 177.** The Employer and Worker Vice-Chairpersons supported the subamendment.
- 178.** The amendment was adopted as subamended.

*Paragraph 4*

*D.40, D.43*

- 179.** The Committee considered two amendments to delete the words “and reasonable” in paragraph 4. The amendments had been submitted by the Employers’ group and the Government members of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Netherlands, Norway, Portugal, Spain, Sweden and the United Kingdom. The Employer Vice-Chairperson introduced the amendments, stating “reasonable” was unnecessary in this context. Orders were required to be lawful, and it was the law that determined what was reasonable.
- 180.** The Government member of Greece added that it was a maritime tradition to obey the orders of the skipper, who had specific rights and obligations on board a ship.
- 181.** The Worker Vice-Chairperson supported the amendments.
- 182.** The amendments were adopted.

*D.34*

- 183.** The Government members of Belgium and France submitted an amendment which was a drafting change affecting only the French version of the text.
- 184.** The amendment was adopted and sent to the Drafting Committee.
- 185.** Article 8 was adopted as amended.

---

### **Part III. Minimum requirements for work on board fishing vessels**

Minimum age

Article 9

*Paragraph 2*

*D.25, D.28*

- 186.** The Committee considered two amendments to delete paragraph 2. The amendments were submitted respectively by the Government members of Brazil, Spain and the Bolivarian Republic of Venezuela, and Canada, Switzerland and the United States. The Government member of Switzerland introduced the amendments, which sought to address inconsistencies with the Minimum Age Convention, 1973 (No. 138), and Worst Forms of Child Labour Convention, 1999 (No. 182). The possibility for persons of the age of 15 to perform light work did not appear coherent with these labour standards. In a sector considered hazardous, it was difficult to categorize certain activities as light work. During the Government group's meeting, the Legal Adviser had noted that care was needed when sectoral Conventions dealt with subjects also covered by general and broadly ratified Conventions.
- 187.** The Worker Vice-Chairperson recalled that the provisions agreed upon for Article 9 during the first discussion of the proposed standard were a "package" that balanced all the concerns expressed and should not be reopened.
- 188.** The Employer Vice-Chairperson opposed the amendment, as it removed the flexibility introduced by paragraph 2.
- 189.** The Government member of Norway, speaking on behalf of the Government group, stated the Government group was evenly divided on the amendments to Article 9 and had not reached a common position.
- 190.** The Government member of Greece shared the concerns of the Government member of Switzerland, but agreed that Article 9 was a "package" solution complemented by the new paragraph 7. According to paragraph 2, persons of 15 years of age could only perform light work if authorized by the competent authority in accordance with national laws and practice and after consultation. Moreover, paragraph 1 already allowed persons of 15 years of age to work on board in the framework of vocational training. In addition to being flexible, paragraph 2 reflected maritime tradition and provided safeguards for continuing to attract new entrants into the industry. He opposed the amendments.
- 191.** The Government members of Denmark, France and Nigeria supported the Government member of Greece and opposed the amendments, as did the Government members of Egypt, India, Mexico and Norway.
- 192.** The Worker Vice-Chairperson opposed the amendments, noting that the wording of paragraph 2 was consistent with Article 7, paragraph 2, of Convention No. 138.
- 193.** The Government member of Switzerland stated the Committee had addressed her concerns and withdrew the amendment, as well as amendments D.27, D.28, D.31 and D.32, which dealt with the same matter.
- 194.** The other amendment (D.25) was not adopted.

---

*Paragraph 3*

*D.41*

- 195.** The Government member of Norway introduced an amendment, submitted by the Government members of Austria, Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Netherlands, Norway, Portugal, Spain, Sweden and the United Kingdom, to replace the text of Article 9, paragraph 3, by the following: “Fishers under the age of 18 shall not be required to perform tasks which are particularly hazardous in nature”. Paragraph 3 implied that fishing was not an honest profession and that it was necessary to protect the morals of fishers under the age of 18 but not of fishers over that age. The amendment modernized the provision while retaining its intention.
- 196.** The Government member of Switzerland stated that the original text reflected the wording of Conventions Nos. 138 and 182, which many countries had already ratified. The amendment introduced new concepts that had not been clearly defined in internationally accepted texts.
- 197.** The Worker Vice-Chairperson opposed the amendment, agreeing with the Government member of Switzerland.
- 198.** The Government member of Egypt felt the instrument should simply state that the minimum age for working on a fishing vessel should be 18.
- 199.** The Government members of India, Lebanon and Namibia opposed the amendment.
- 200.** The Employer Vice-Chairperson supported the amendment. The context of this draft Convention was different from that of Conventions Nos. 138 and 182. The issue of morals did not belong in a discussion on fishing. Also, paragraph 7 clearly stipulated that none of its provisions affected obligations arising from having ratified other Conventions.
- 201.** The Government member of the United States said the original wording was designed to protect children. There was a danger that the use of different wording might suggest that the intention of the present Convention was different.
- 202.** The Chairperson requested an indicative show of hands and noted that the majority of Governments opposed the amendment.
- 203.** The Employer Vice-Chairperson requested a record vote.
- 204.** After consultation, the Government member of Norway, on behalf of the Government members sponsoring the amendment, withdrew it.

*Paragraph 5*

*D.26*

- 205.** The Government members of Brazil and Spain withdrew an amendment (D.26) prior to its discussion.
- 206.** Article 9 was adopted without amendment.

---

Medical examination

Article 10

*Paragraph 1*

*D.38*

- 207.** The Employer Vice-Chairperson introduced an amendment to replace the words “No fishers shall work on board a fishing vessel” by “Skippers and other fishers directly involved in navigation or the safe operation of the vessel, as determined by national laws or regulations or the competent authority, shall not work on board a vessel”. A reference to national laws or regulations or the competent authority was necessary since a valid medical certificate might not be required for small-scale fishing,
- 208.** The Worker Vice-Chairperson opposed the amendment and observed that the necessary flexibility was provided by paragraph 2 of the same Article.
- 209.** The Government member of Norway, speaking on behalf of the Government group, stated a majority of the Government group opposed the amendment.
- 210.** The Government member of Egypt stressed that medical fitness was essential to guard fishers and their catch from disease.
- 211.** The Government member of Lebanon agreed that a valid medical certificate should be a prerequisite for any person working on a fishing vessel.
- 212.** The Government member of Turkey opposed the amendment.
- 213.** The Employer Vice-Chairperson withdrew the amendment.

*Paragraph 3*

*D.33*

- 214.** The Employer Vice-Chairperson withdrew an amendment prior to its discussion.

*D.45*

- 215.** The Government member of Greece introduced an amendment submitted by the Government members of Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Netherlands, Norway, Portugal, Spain, Sweden and the United Kingdom, to replace the word “person” by the word “fisher” in the three instances in which it occurred in the paragraph. This was a drafting issue, since the Committee had already accepted a definition of the term “fisher”.
- 216.** The Worker and Employer Vice-Chairpersons supported the amendment and agreed that it be referred to the Drafting Committee.
- 217.** The amendment was adopted and submitted to the Drafting Committee.

*D.44*

- 218.** The Government member of Greece introduced an amendment submitted by the Government members of Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Netherlands, Norway, Portugal, Spain, Sweden and the United Kingdom to replace the

---

words “or on an international voyage or” by the word “and”. This amendment was concerned solely with Article 10, paragraph 3, which dealt with instances where exemptions from the requirement concerning medical certificates were not allowed. The amendment did not seek to address the issue of the definition of “international voyage” as dealt with in Article 1.

- 219.** The Worker Vice-Chairperson strongly opposed the amendment.
- 220.** The Employer Vice-Chairperson supported the amendment.
- 221.** The Government member of Norway, speaking on behalf of the Government group, supported the amendment.
- 222.** The Worker Vice-Chairperson proposed a subamendment to replace “and” with “or”.
- 223.** The Government members of Denmark, France, Greece, Namibia, Philippines, Portugal and Spain supported the subamendment.
- 224.** The Government member of India and the Employer Vice-Chairperson were concerned that the subamendment would imply that small vessels remaining at sea for more than three days but staying close to shore would not be exempt from the requirement regarding medical certificates.
- 225.** The Chairperson pointed out that the concern voiced by the Government member of India and the Employer Vice-Chairperson was covered by Article 3, paragraph 1, which stipulated that the competent authority might exclude limited categories of fishers or fishing vessels from the requirements of the Convention.
- 226.** The amendment was adopted as subamended.
- 227.** Article 10 was adopted as amended.

## Article 11

### *Subparagraph (d)*

#### *D.30*

- 228.** The Government member of Norway introduced an amendment submitted by the Government members of Norway and Spain to add, after the word “certificates”, the words “, which in no case shall exceed two years”, in order to promote and improve safety and health on small vessels. The current formulation could be read to permit indefinite validity of medical certificates. Where required, Article 3 provided sufficient flexibility.
- 229.** The Government member of Egypt pointed out that Article 10, paragraph 1, clearly indicated no fisher could work without a valid medical certificate. From a legal perspective, there was thus no need to mention the frequency of medical examinations and the period of validity as once certificates expired they had to be renewed.
- 230.** The Government member of Norway, speaking on behalf of the Government group, stated a clear majority of the Government group opposed the amendment. The original text adequately reflected the need for flexibility regarding the period of validity.
- 231.** The Employer Vice-Chairperson opposed the amendment.

---

**232.** The Government member of the Syrian Arab Republic stated that paragraphs 2 and 3 of Article 12 adequately addressed the issue of period of validity of medical certificates. The Government member of Lebanon agreed.

**233.** The Government members of Norway and Spain withdrew the amendment.

*Subparagraph (e)*

*D.35*

**234.** An amendment submitted by the Government member of Spain was not seconded and not discussed.

*D.42*

**235.** The Government member of Greece introduced an amendment submitted by the Government members of Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Netherlands, Norway, Portugal, Spain, Sweden and the United Kingdom to replace the word “person” by the word “fisher” in subparagraph (e). This was a drafting issue.

**236.** The Employer Vice-Chairperson supported the amendment.

**237.** The Worker Vice-Chairperson opposed the amendment, noting that in this context “person” was correct, since a person seeking a medical certificate might not yet be a fisher.

**238.** The Government member of Greece underlined that the draft Convention dealt specifically with fishers and owners of fishing vessels, rather than members of the general public. The term “fishers” was more appropriate.

**239.** The Government member of Egypt stated there was need for clarification on the legal background of the terms “fisher” and “person”.

**240.** The Government member of Lebanon preferred to keep the original text in order to remain consistent with the definition in Article 1(e).

**241.** The Government member of Namibia supported the amendment. Article 1(e) provided a definition for “fisher” which indicated that it included every person employed or engaged in any capacity or carrying out an occupation on board any fishing vessel.

**242.** The Employer Vice-Chairperson requested clarification from the secretariat as to what was meant by “Except as provided otherwise, the Convention applies to all fishers and all fishing vessels engaged in commercial fishing operations” in Article 2.1.

**243.** The deputy representative of the Secretary-General clarified the provision “Except as provided otherwise” in Article 2.1 could cover such cases as those of “persons” referred to in Article 11, subparagraph (e), that, for example, had applied for and were refused fishing licences or had failed to obtain medical certificates and thus were not, and perhaps would never become, fishers.

**244.** The Government member of Greece withdrew the amendment in light of the foregoing explanation.

**245.** Article 11 was adopted.

---

Medical examination

Article 12

*D.148*

**246.** The Employer Vice-Chairperson withdrew an amendment (D. 148) without discussion.

*D.172*

**247.** The Government member of Denmark introduced an amendment submitted by the Government members of the Bahamas, Belgium, Brazil, Côte d'Ivoire, Cuba, Denmark, Egypt, Finland, France, Germany, Greece, Ireland, Iceland, Kenya, Mauritania, Mexico, Mozambique, Namibia, Netherlands, Norway, Portugal, South Africa, Spain, Sweden, Syrian Arab Republic, Turkey, United Arab Emirates, United Kingdom and Uruguay to delete the words "or on an international voyage" from the introductory phrase of Article 12. He praised the cooperative spirit of the many Government members who had worked together to examine every provision that contained a reference to international voyages and to develop an alternative definition. The solution found for Article 10, paragraph 3, was equally applicable here.

**248.** The Worker Vice-Chairperson, the Employer Vice-Chairperson and the Government member of Norway, speaking on behalf of the Government group, all expressed support for the amendment, which was adopted.

*D.149*

**249.** The Employer Vice-Chairperson introduced an amendment to replace the text of paragraph 2 by the following: "Each Member shall adopt laws, regulations and other measures providing for the frequency of medical examinations and the period of validity of medical certificates." and immediately proposed a subamendment to insert "after consultations" after "shall". The purpose of the amendment was to increase flexibility to enable wide ratification. Reference to the frequency and the period of validity of medical certificates had been retained.

**250.** The Government member of Greece noted that these ideas were already covered in subparagraph (d) of Article 11 and Article 12 covered larger vessels. The subamendment offered nothing extra apart from the idea of "consultations" and that was not sufficient.

**251.** The Government member of Norway stated that the content of Article 12, paragraph 2, was crucial for safety aboard larger vessels. He would have preferred amending Article 11 to contain similar provisions.

**252.** The Worker Vice-Chairperson joined the Government members of Greece and Norway in rejecting the amendment, as did the Government members of Denmark, France and Germany.

**253.** The Employer Vice-Chairperson withdrew the amendment.

**254.** Article 12 was adopted as amended.

---

## **Part IV. Conditions of service**

### Manning and hours of rest

#### Article 13

##### *D.132*

- 255.** The Government member of Denmark presented an amendment, submitted by the Government members of Denmark, Finland, France, Germany, Ireland, Netherlands, Norway, Portugal, Spain, Sweden and the United Kingdom, which was intended to replace the text of subparagraph (b) by the following text: “fishers are given regular periods of rest of sufficient length to ensure health and safety.” Regularity of rest periods was essential for the health and safety of fishers.
- 256.** The Worker Vice-Chairperson supported the amendment.
- 257.** The Employer Vice-Chairperson requested clarification as to the intended meaning of “regular”. The term seemed to imply “at fixed intervals” and this was not always practicable on fishing vessels. Vessels engaged in night fishing could not accord fishers rest periods at night, for example. She proposed a subamendment to replace the word “regular” by “appropriate”.
- 258.** The Worker Vice-Chairperson opposed the Employer members’ subamendment.
- 259.** The Government member of Denmark remarked that the Convention offered sufficient flexibility with regard to exceptional circumstances. In normal circumstances, however, it was important to maintain the regularity of rest periods as a matter of occupational safety and health. The timing of rest periods could vary according to the fishing operations being undertaken.
- 260.** The Government member of Norway observed that there was a clear majority in the Government group in favour of the amendment. He could not, however, comment on the Employer members’ subamendment.
- 261.** The Government member of Lebanon noted that it was obvious that fishers should take rest periods that were regular and appropriate, and proposed that the phrase “regular periods of rest of sufficient length” be replaced by “sufficient daily rest periods”.
- 262.** The Government member of China seconded the subamendment of the Government member of Lebanon, which was supported by the Government members of Egypt, Japan and the Syrian Arab Republic.
- 263.** The Government member of Belgium did not support either subamendment. The word “regular” was a flexible term, not a fixed one, and was better than the alternatives proposed.
- 264.** The Government members of the Bahamas, Germany, Namibia, Norway, Philippines and Turkey also preferred the amendment to either of the proposed subamendments. The Government member of Germany noted that “regular” implied “on a daily basis”, but not necessarily at a fixed time. The Government member of the Philippines observed that the regularity of rest periods could be discerned both in established work arrangements between employers and workers and in the policies of individual countries.

- 
- 265.** The Employer Vice-Chairperson noted the various understandings of what the term “regular” implied for various members of the Committee, in particular “not at an appointed time” and “based on established work arrangements”. She asked for clarification as to the flexibility that the Convention offered with regard to the determination of rest periods.
- 266.** The Government member of Denmark responded that the non-prescriptive chapeau of Article 13 provided sufficient flexibility, since it was for the competent authority to decide. As for the additional requirements in Article 14, its paragraphs 2 and 3, enabled the competent authority to make other arrangements as necessary in the light of circumstances.
- 267.** The Government member of Germany noted that flexibility was also evident in the requirement that fishers have appropriate periods of rest within a 24-hour period, but not at a specific time each day.
- 268.** The Employer member of the Netherlands felt that the interpretations of the term “regular” made by the Government members of Denmark and Germany were contradictory. Also, the flexibility granted in Article 14 only related to larger vessels. Therefore, countries like Egypt or the Syrian Arab Republic, where most fishing was carried out on small vessels, would not derive much benefit from it.
- 269.** The Government member of Egypt affirmed that everybody agreed that fishers should be entitled to periods of rest specified in national laws or regulations and that details should be left to work arrangements between employers and workers taking into account the circumstances on board the vessel.
- 270.** The Government member of South Africa supported the amendment and stated that the two subamendments could have unintended consequences. For example, the term “appropriate” might mean that periods of rest could be accumulated and given at the end of the voyage. International studies illustrated that irregular periods of rest had serious consequences for occupational safety and health. As to the query of the Employer Vice-Chairperson, there was sufficient flexibility because neither hours of work nor hours of rest were specified, and rest periods were not required at a specific time.
- 271.** The Chairperson concluded that a sufficient majority of the Committee members supported the amendment, which was therefore adopted.
- 272.** Article 13 was adopted as amended.

## Article 14

### *D.177*

- 273.** The Government member of Denmark introduced an amendment, on behalf of the Government members of the Bahamas, Belgium, Brazil, Côte d’Ivoire, Cuba, Denmark, Egypt, Finland, France, Germany, Greece, Iceland, Ireland, Kenya, Mauritania, Mexico, Mozambique, Namibia, Netherlands, Norway, Portugal, South Africa, Spain, Sweden, Syrian Arab Republic, Turkey, United Arab Emirates, United Kingdom and Uruguay to replace paragraph 1 by the following paragraph:
1. In addition to the requirements set out in Article 13, the competent authority shall:
    - (a) for vessels of [24] metres in length and over, establish a minimum level of manning for the safe navigation of the vessel, specifying the number and the qualifications of the fishers required;
    - (b) for fishing vessels regardless of size remaining at sea for more than three days, after consultation and for the purpose of limiting fatigue, establish the minimum hours of rest

---

to be provided to fishers. Minimum hours of rest shall be no less than ten hours in any 24-hour period, and 77 hours in any seven-day period.

The speaker explained that subparagraph (a) dealt with manning, whilst subparagraph (b) dealt with rest hours. These two issues were too different to be covered by the same parameters. As a consequence, the amendment proposed to delete the reference to international voyages in (a) and to extend the notion of rest hours in (b) to cover all vessels which were at sea for more than three days, regardless of size.

- 274.** The Employer Vice-Chairperson did not support the totality of the amendment. The Employer members had submitted their own amendments to delete the reference to international voyages from the introductory phrase and the number and qualifications of fishers from subparagraph (a) and to lessen the requirements in subparagraph (b). Overly prescriptive details would have a negative impact on the cost of operations as well as on the livelihoods of those whose earnings were derived from a share of the catch. She urged the Committee to take the Employer members' amendments into account.
- 275.** The Worker Vice-Chairperson strongly supported the Government members' amendment, which was important in terms of fishers' safety and health.
- 276.** The Government member of Norway, on behalf of the Government group, supported the proposed amendment.
- 277.** The Government member of Canada commented that the second sentence of subparagraph (b) was too prescriptive and could be shifted to the Recommendation, an opinion shared by the Government members of Japan and the United States and the Employers' group.
- 278.** The Government member of Denmark did not support the moving of subparagraph (b) to the Recommendation and added that paragraphs 2 and 3 of Article 14 of the Office text offered sufficient flexibility.
- 279.** The Worker Vice-Chairperson observed that fatigue was the principal cause of many accidents and, for this reason, the specific requirements regarding minimum hours of rest should remain in the Convention.
- 280.** The Government member of Norway supported that view, noting that only 10 hours of daily rest amounted potentially to 14 hours of work per day. This was a major safety concern.
- 281.** The Government member of France noted that, while hours of work were difficult to regulate in the sector due to the nature of fishing, minimum hours of rest could be determined and it was vital to retain this provision in the Convention.
- 282.** The Government members of Portugal, South Africa and the United Kingdom agreed.
- 283.** The amendment was adopted. As a result, amendments D.173, D.181, D.108, D.109, D.152, D.154, D.180, and D.111 fell.

*D.182*

- 284.** The Employer Vice-Chairperson introduced an amendment to replace the text of paragraph 2 by the following text: "In accordance with general principles of protection of health and safety of workers, and for objective or technical reasons or reasons concerning the organization of work, Members may allow exceptions from the provision laid down in

---

paragraph 1(b).” It was important to ensure flexibility. She noted that the notion of compensatory rest periods was included in the phrase “general principles of protection of health and safety”.

- 285.** The Worker Vice-Chairperson found the amendment undermined paragraph 1(b), which the Committee had just adopted. As a consequence, he could not support it.
- 286.** The Government member of Norway indicated that the Government group did not support the amendment.
- 287.** The Employer Vice-Chairperson withdrew the amendment.

*D.113*

- 288.** The Worker Vice-Chairperson introduced an amendment in paragraph 2, to insert after the words “specified reasons” the words “, as set out in a collective agreement,” stating that such a provision would increase the influence of the social partners.
- 289.** The Government member of Norway, speaking on behalf of the Government group, did not support the amendment.
- 290.** The Employer Vice-Chairperson did not support the amendment.
- 291.** The Worker Vice-Chairperson therefore withdrew the amendment.
- 292.** Article 14 was adopted as amended.

Crew list

Article 15

*D.151*

- 293.** The Government member of Greece introduced an amendment submitted by the Government members of Denmark, Finland, France, Germany, Greece, Ireland, Netherlands, Norway, Portugal, Spain, Sweden and the United Kingdom, to add the words “and when” after the word “whom” in the second sentence. The proposal sought to ensure the proper handling of administrative procedures.
- 294.** The Employer Vice-Chairperson, the Worker Vice-Chairperson and the Government member of Norway, speaking on behalf of the Government group, supported the amendment, which was thus adopted.

*D.103*

- 295.** The Worker Vice-Chairperson introduced an amendment submitted by the Workers’ group to add the words “and for what purpose(s)” at the end of the second sentence.
- 296.** The Employer Vice-Chairperson supported the amendment.
- 297.** The Government member of Norway, speaking on behalf of the Government group, reported that a clear majority of Governments opposed this amendment.
- 298.** The Government members of Egypt, Germany and the Syrian Arab Republic preferred the Office text.

- 
- 299.** The Government member of Greece supported the amendment because crew lists contained fishers' personal data, and applicable legislation concerning the protection of personal data should be taken into account.
- 300.** The Government member of Namibia supported the amendment, since it was logical that the Government should know the purpose before providing the crew list to anybody.
- 301.** The Government member of India supported the amendment for security reasons.
- 302.** The amendment was adopted.

*D.127, D.128*

- 303.** The Employer Vice-Chairperson introduced an amendment to replace the word "*rôle*" by "*liste*" in the French version and "*un rol de tripulación*" by "*una lista de tripulantes*" and the words "*dicho rol*" by the words "*dicha lista*" in the Spanish version. The amendment did not concern the English text.
- 304.** The Government member of Spain introduced an amendment to the same effect, submitted by the Government members of Belgium, France and Spain. This was not just a translation issue; there were substantive differences between the two types of lists.
- 305.** The Worker Vice-Chairperson said that Spanish-speaking Worker members had pointed out that the terms were often used interchangeably.
- 306.** The Government member of Spain explained that a "*rol*" and a "*lista*" were two different documents: a "*rol*" contained additional information on, inter alia, the vessel's characteristics, the duties of the crew members, and safety certificates. A "*lista*" was simply a list containing the crew members' names.
- 307.** A member of the secretariat recalled the background and evolution of the provision. The proposed Conclusions discussed by the Committee in 2004 had referred to a "list of persons on board" and a subsequent Drafting Committee had replaced this formulation by the technical term "crew list". The intention of the provision was to ensure that authorities would be in a position to quickly assess the number and identity of crew members on board a specific ship, in the event of a maritime accident.
- 308.** The Government member of Mexico, in the light of the explanation given by the Office, agreed that the word "*lista*" should be used instead of "*rol*" in the Spanish version.
- 309.** The Government member of France also supported the amendments.
- 310.** The Worker Vice-Chairperson agreed to the amendments, which were adopted.
- 311.** Article 15 was adopted as amended.

Fisher's work agreement

Article 16

- 312.** Article 16 was adopted without amendment.

---

Article 17

*D.150, D.156*

- 313.** The Government member of Greece introduced an amendment, submitted by the Government members of Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Netherlands, Norway, Portugal, Spain, Sweden and the United Kingdom, to delete subparagraph (b). The requirement to keep records concerning a fisher's work under a work agreement was an unnecessary bureaucratic burden. Article 15 ensured that authorities would know how many fishers were on board and Article 16 provided for the fisher to be given a work agreement in accordance with the Convention, making subparagraph (b) of Article 17 unnecessary.
- 314.** The Government member of Egypt referred to Article 5 of the Fishermen's Articles of Agreement Convention, 1959 (No. 114), and supported the original draft text.
- 315.** The Worker Vice-Chairperson said that the Worker members could not support the proposal to delete subparagraph (b), but signalled their support for an amendment (D.156) submitted by the Employer members.
- 316.** The Employer Vice-Chairperson introduced an amendment to insert the words "where applicable," before the word "maintenance" in subparagraph (b). This proposal would offer governments discretion as to whether or not to keep such records. Both amendments before the Committee were acceptable to her group.
- 317.** The Government member of Greece stated that his delegation, which had been one of the sponsors of the amendment to delete subparagraph (b), was willing to withdraw its support for that amendment in favour of the Employer members' proposal.
- 318.** The Government members of Denmark, France, Norway and Portugal also withdrew support for their own amendment, which was then considered withdrawn with the tacit approval of all sponsors.
- 319.** The Government members of Lebanon and the Syrian Arab Republic supported the Employers' amendment, which was adopted.
- 320.** Article 17 was adopted as amended.

Article 18

*D.158*

- 321.** The Employer Vice-Chairperson introduced an amendment, which would replace the text of Article 18 by the following: "A copy of the fisher's work agreement shall be provided to the fisher." Possession by the fisher of the work agreement was sufficient; any requirement that the agreement be carried on board the fishing vessel was superfluous.
- 322.** The Worker Vice-Chairperson rejected the amendment. The Office text was preferable for compliance and inspection purposes.
- 323.** The Government member of Namibia opposed the amendment. Article 18 rightfully addressed two issues: first, that the fisher should have a copy of the agreement; and second, that a copy should be kept on board the vessel.

- 
- 324.** The Government member of the Bahamas, speaking on behalf of the Government members of CARICOM, and the Government members of Egypt and Spain, also supported the Office text, citing the arguments presented by the Worker Vice-Chairperson and the Government member of Namibia.
- 325.** The Government member of Spain suggested that the Drafting Committee be informed that the term used in Article 17 should also be used in Article 18.
- 326.** The Employer Vice-Chairperson withdrew the Employer members' amendment.
- 327.** Article 18 was adopted without amendment.

## Article 19

### D.147

- 328.** The Government member of Greece introduced an amendment submitted by the Government members of Denmark, Greece and the Netherlands to add at the end of the Article the following sentence: "For fishing vessels of less than [24] metres in length, a Member may, after consultation, not apply Articles 16-18 and Annex II to fishers that are husband or wife, brothers or sisters, or children of the fishing vessel owner." The purpose of the amendment was to reflect a special cultural element. The key elements of the proposed amendment were to allow Members, should they so decide and only after consultation, to permit small fishing vessels on which members of the same family are working not to follow certain procedures. The aim was to reflect the real situation on many small vessels with small crews. Following consultations with the other Government members that had submitted the amendment, the speaker proposed a subamendment that would read as follows: "For fishing vessels with fewer than five fishers employed or engaged, a Member may, after consultation, not apply Articles 16-18 and Annex II to those who are husband or wife, brothers or sisters, or children of the fishing vessel owner."
- 329.** The Government member of Egypt supported the subamendment, which was in compliance with Article 1, paragraph 2, of the Fishermen's Articles of Agreement Convention, 1959 (No. 114).
- 330.** The Worker Vice-Chairperson stated that the Worker members could agree with the subamendment on condition that the [24] metre vessel length be kept in the text.
- 331.** The Government member of Greece accepted the further subamendment submitted by the Worker members.
- 332.** The Government member of Norway then proposed a further subamendment to replace the word "children" with the words "sons or daughters" because children would not be allowed to work on fishing vessels. This proposal was seconded by the Government member of Greece.
- 333.** The Employer Vice-Chairperson pointed out that there might be cases in which more than five family members of the fishing vessel owner could be working on the fishing vessel and wondered whether the intention was not to apply the said Articles in such cases. She proposed to further subamend the text to remove the reference to "fewer than five fishers employed or engaged".
- 334.** The Government member of China agreed there was no need for the reference to "fewer than five fishers".

- 
- 335.** The Worker Vice-Chairperson opposed the Employers' group's proposal to remove the reference to "fewer than five fishers".
- 336.** The Government member of Spain preferred the original text. The amendment contradicted Spanish regulations and did not cover the possibility that family members could be living independently from the vessel owner.
- 337.** The Government member of Portugal supported the comments of the Government member of Spain.
- 338.** The Government member of Germany supported the amendment, but said it should be considered an exception, and that a limit of five fishers should be adopted.
- 339.** The Government member of the Syrian Arab Republic opposed the amendment, stating that an overly detailed text would create difficulties in implementation.
- 340.** In the interest of time, the Worker Vice-Chairperson suggested reverting to the original text.
- 341.** The Committee agreed and the amendment was not adopted.
- 342.** Article 19 was adopted.

## Article 20

### *D.176*

- 343.** The Government member of Denmark introduced an amendment submitted by the Government members of the Bahamas, Belgium, Brazil, Côte d'Ivoire, Cuba, Denmark, Egypt, Finland, France, Germany, Greece, Iceland, Ireland, Japan, Kenya, Mauritania, Mexico, Mozambique, Namibia, Netherlands, Norway, Portugal, South Africa, Spain, Sweden, Syrian Arab Republic, Turkey, United Arab Emirates, United Kingdom and Uruguay to delete Article 20. He proposed an immediate subamendment, however, to retain the reference in Article 20 to a written and signed work agreement and to refer it to the Drafting Committee for redrafting and appropriate placement. As an aid to the Committee and purely for illustrative purposes, the sponsors had provided the text of Annex II which would result, should the amendment be adopted. Annex II would apply to all vessels regardless of size. The speaker assured the Committee that Annex II remained open to discussion.
- 344.** The Worker Vice-Chairperson supported the amendment as subamended.
- 345.** The Government group also supported the proposal.
- 346.** The amendment was adopted as subamended.

### *D.178*

- 347.** The Employer Vice-Chairperson withdrew an amendment (D.178).

### *D.107*

- 348.** The Worker Vice-Chairperson introduced an amendment to replace paragraph 2 with the following text: "It shall be the responsibility of the fishing vessel owner to ensure that each fisher has a written work agreement signed by both the fisher and the fishing vessel owner

---

or an authorized representative of the fishing vessel owner.” The intention was to make clear that both contracting parties needed to sign the agreement.

- 349.** An Employer member from the Netherlands proposed a subamendment to replace the second mention of “fishing vessel owner” with “contracting party of the fisher”. This subamendment would deal with cases where the fishing vessel owner, as defined in Article 1 of the Convention, was not party to the fisher’s work agreement. Such situations were recognized in subparagraph 1(d) of Annex II of the Office text, which referred to “the employer, or fishing vessel owner, or other party to the agreement with the fisher”.
- 350.** The Worker Vice-Chairperson did not support the subamendment, since it was too detailed.
- 351.** The Government member of the Syrian Arab Republic found the Office text complete and comprehensive and therefore opposed both the amendment and the subamendment.
- 352.** The Government member of the United Kingdom felt that the wording proposed by the Employers was difficult to understand and wondered whether the definition of “fishing vessel owner” in Article 1 was not broad enough to cover the cases that were of concern to the Employers.
- 353.** The Government member of Namibia rejected the Employer members’ subamendment for the reasons cited by the Government member of the United Kingdom. The term “contracting party of the fisher” was not defined, nor did it appear elsewhere in the Convention.
- 354.** The Government member of the Netherlands suggested that the wording found in subparagraph 1(d) of Annex II be used instead of the new term proposed by the Employer member from the Netherlands.
- 355.** The Government member of Egypt stressed that it was important that the Article be drafted in a clear manner. The essential point was to ensure that there was a written contract signed by the two parties and that it was in conformity with the provisions of the Convention.
- 356.** The Employer member from the Netherlands clarified that the definition of “fishing vessel owner” in Article 1 did not include employment services. These services were defined in Article 1, subparagraph 1(b), of the Private Employment Agencies Convention, 1997 (No. 181), as services a private employment agency might provide, including “services consisting of employing workers with a view to making them available to a third party, who may be a natural or legal person (referred to below as a ‘user enterprise’) which assigns their tasks and supervises the execution of these tasks”. Employment services were not covered by the definition of “fishing vessel owner” in Article 1, although these businesses were legal enterprises operating in all countries. Such services were often used in the fishing industry to supply crew to fishing vessels. The subamendment would bring the Worker members’ amendment into line with this reality. The Employer members therefore supported the proposal of the Government member of the Netherlands, which addressed these concerns.
- 357.** The Government member of Norway believed that the wording “or an authorized representative of the fishing vessel owner”, as contained in the Workers’ amendment, took care of the concerns raised by the Employers. Fishing vessel owners could authorize employment services to sign the agreement on their behalf, while remaining responsible for ensuring that each fisher had a written and signed agreement.

- 
- 358.** The Worker Vice-Chairperson shared the view expressed by the Government member of Norway. The proposal of the Government member of the Netherlands would undermine the intent of their amendment.
- 359.** Further support for the position of the Government member of Norway was expressed by the Government members of Algeria, Belgium, Denmark, France, Germany, Ireland, Namibia, Nigeria, Portugal and Tunisia.
- 360.** The Government member of South Africa supported the subamendment of the Government member of the Netherlands. Outsourcing had become the predominant means of providing crew to fishing vessels. Workers thus engaged should be provided with the protection of the Convention.
- 361.** The Government member of the Syrian Arab Republic believed that the concept of “fishing vessel owner” as it appeared in the Office text was sufficiently broad and balanced.
- 362.** The Government member of the Philippines felt that the Office text was sufficient in form and substance, and consistent with the principle that the liability rested on the fishing vessel owners, regardless of their representation by another entity.
- 363.** The Government member of Egypt agreed that, whether it was the fishing vessel owner or his or her representative who signed the agreement, the legal relationship and responsibilities of the fishing vessel owner remained the same.
- 364.** As the majority of Committee members had expressed support for the Workers’ amendment, it was adopted.
- 365.** Article 20 was adopted as amended.

## Repatriation

### Article 21

#### *D.183*

- 366.** The Employer Vice-Chairperson introduced an amendment to replace the text of paragraph 1 with the following text:

Members shall ensure that fishers on a fishing vessel that flies their flag and that enters a foreign port are entitled to repatriation in the event that the fisher’s work agreement has expired or has been terminated for justified reasons by the fisher or by the fishing vessel owner, or the fisher is no longer able to carry out the duties required under the work agreement or cannot be expected to carry them out in the specific circumstances. This also applies to fishers from that vessel who are transported from the vessel to the foreign port.

She then subamended it by adding “for the same reasons” after “transported” in the last line.

- 367.** The Worker Vice-Chairperson supported the amendment as subamended.
- 368.** The Government member of Norway, speaking on behalf of the Government group, preferred the Office text.

---

**369.** The Government member of Denmark remarked that an amendment (D.171) submitted by numerous Government members had the same intention as the Employers' proposal, which he supported

**370.** The Government members of Algeria, Egypt, Germany, Greece, India, Lebanon, Syrian Arab Republic and Tunisia also supported the amendment as subamended.

**371.** The amendment was adopted as subamended.

*D.171*

**372.** The Government member of Denmark withdrew an amendment (D.171).

*D.146*

**373.** The Government member of Denmark remarked that there could be situations where the cost of repatriation might be borne by the fisher himself. The draft consolidated maritime labour Convention had provided some guidance in this respect. The Government members of Denmark, Finland, Ireland, Netherlands, Portugal, Sweden and the United Kingdom therefore proposed an amendment to replace paragraph 2 by the following paragraph: "Members shall, after consultation, prescribe the circumstances where the fishers have a right to be repatriated at no cost to themselves."

**374.** The Employer Vice-Chairperson stated that the Employer members did not support this amendment. The phrase "or other measures" in the Office text would cover the Governments' concerns, as such measures could be prescribed by Members to take account of special circumstances.

**375.** The Worker Vice-Chairperson agreed and did not support the amendment.

**376.** The Government member of Norway said a clear majority of the Government group supported the amendment.

**377.** The Government member of Spain did not support the amendment. He preferred a clear definition of the circumstances under which a fisher would have to cover the costs of repatriation. These costs were high and should only be borne by a fisher who failed to meet his or her obligations.

**378.** The Government member of Egypt favoured the Office text because there was a reference to the obligations of the fishing vessel owner regarding the cost of repatriation. If, however, the fisher failed to respect his obligations, then the fishing vessel owner would not be liable for the cost of repatriation.

**379.** The Government members of Algeria, Japan, Lebanon, Syrian Arab Republic and Tunisia also preferred the Office text.

**380.** The amendment was not adopted.

*D.179*

**381.** The Employer Vice-Chairperson withdrew an amendment (D.179).

---

*D.110*

- 382.** The Worker Vice-Chairperson introduced an amendment to insert in paragraph 3, after the words “entitled to repatriation” the words “, which shall not exceed nine months,”. At present, no maximum duration of service was set after which a fisher would be entitled to see his or her family. He suggested inserting a maximum period of nine months of service for the entitlement to repatriation.
- 383.** The Government member of Norway stated that the Government group did not support the amendment. The period of service which would give rise to an entitlement to repatriation was an issue to be agreed between the employer and the worker.
- 384.** The Employer Vice-Chairperson endorsed this view.
- 385.** The Worker Vice-Chairperson withdrew the amendment.

*D.184*

- 386.** The Employer Vice-Chairperson withdrew an amendment (D.184).
- 387.** Article 21 was adopted as amended.

Recruitment and placement

Article 22

*Paragraph 2*

*D.134*

- 388.** The Government member of Denmark, speaking on behalf of the Government members of Denmark, Germany, Ireland and Sweden, proposed an amendment to replace the text of paragraph 2 by the following:

Any private service providing recruitment and placement of fishers operating in its territory shall be operated in conformity with the general rules of the public employment service covering recruitment and placement of all workers and employers and/or the established practice of recruitment and placement of fishers. If there are no regulations or established practice in the member State in question or the employment conditions of fishers necessitate it, any private service providing recruitment and placement for fishers operating in its territory shall be operated in conformity with a standardized system of licensing or certification or other form of regulation, which shall be established, maintained or modified only after consultation.

The text of the existing paragraph 4 would be moved to the end of this new text. The purpose of this amendment was to make it possible for countries with established systems for shore-based recruitment and placement to continue using these systems after ratification.

- 389.** In response to requests from the Employer and Worker Vice-Chairpersons, the deputy representative of the Secretary-General provided the following clarification on the relationship between the amendment and the Recruitment and Placement of Seafarers Convention, 1996 (No. 179), and the Private Employment Agencies Convention, 1997 (No. 181). The text of Article 22, paragraph 2, was similar to the second sentence of the amendment. Both were in line with the principles set out in Article 2, paragraph 2, of Convention No. 179 and in Article 3, paragraph 2, of Convention No. 181, save in so far as the amendment introduced the concept of a standardized system of licensing or

---

certification or other form of regulation. The first sentence of the amendment, however, was not founded in either of these Conventions, and it was for the Committee to decide whether or not to include this sentence in the Convention.

- 390.** The Government member of Denmark proposed a subamendment to replace the words “. If there are no regulations or established practice in the member State in question or the employment conditions of fishers necessitate it, any private service providing recruitment and placement for fishers operating in its territory shall be operated” by “, or”.
- 391.** The Worker Vice-Chairperson proposed an alternate subamendment to delete the words “and employers and/or the established practice of recruitment and placement of fishers.”
- 392.** The Government member of the Netherlands supported the subamendments of both the Government member of Denmark and the Workers’ group.
- 393.** The Government member of the United Kingdom said that, under the terms of the amendment, private services would have to operate under the same conditions as the public employment service, which seemed unreasonable. She therefore proposed a subamendment to delete the words “of the public employment service”.
- 394.** The Government members of France and Ireland supported the subamendment proposed by the Government member of the United Kingdom.
- 395.** The Government member of Greece stated that often the general rules covering recruitment and placement were the rules that governed public employment services and so the subamendment proposed by the Government member of the United Kingdom would not free private services from having to operate under the same conditions as the public employment services.
- 396.** The Worker Vice-Chairperson opposed the subamendment proposed by the Government member of the United Kingdom and supported the original text.
- 397.** The Employer Vice-Chairperson also supported the original text.
- 398.** The Chairperson concluded that a sufficient majority of the Committee members opposed the amendment and its subamendments, which were therefore not adopted.

*D.160*

- 399.** The Employer Vice-Chairperson introduced an amendment to add the following new sentence at the end of Article 22, paragraph 2: “This shall not apply to a private service providing recruitment and placement solely within a legal group of companies to which it belongs.”
- 400.** The Worker Vice-Chairperson and the Government member of Norway, speaking on behalf of the Government group, opposed the amendment
- 401.** The Employer Vice-Chairperson withdrew the amendment.

*Paragraph 3*

*D.129*

- 402.** The Government member of the United Kingdom introduced an amendment submitted by the Government members of Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Netherlands, Portugal, Spain, Sweden and The United Kingdom. Noting an error

---

in the original amendment she immediately proposed a subamendment to replace in subparagraph (c) the words “under which the licence, certificate or similar authorization” by the words “under which any licence, certificate or similar authorization”. The purpose of this subamendment was to cover the circumstances under which there might not be a licence, certificate or authorization.

- 403.** The Employer Vice-Chairperson, the Worker Vice-Chairperson and the Government member of Norway, speaking on behalf of the Government group, supported the subamendment, which was adopted.

*D.145*

- 404.** The Government member of Greece introduced an amendment submitted by the Government members of Finland, Greece, Ireland, Netherlands, Norway, Spain and the United Kingdom to insert the word “private” before all instances of the word “recruitment” in subparagraph (c). The aim of the proposed amendment was to clarify that only private recruitment or placement services would require a licence, certificate or similar authorization and not public ones. The Government member of Ireland further clarified that the intention was that the word “private” would refer to both “recruitment” and “placement service”.

- 405.** The Employer Vice-Chairperson, the Worker Vice-Chairperson and the Government member of Norway, speaking on behalf of the Government group, supported the amendment, which was adopted.

*Paragraph 4*

*D.159, D.144*

- 406.** The Committee considered two amendments submitted by the Employer members and by the Government members of Denmark, Finland, France, Germany, Greece, Ireland, Netherlands, Portugal Spain, Sweden and the United Kingdom to delete paragraph 4. The Employer Vice-Chairperson introduced the amendment and stated it did not appear logical that a fisher who would seek employment should be compensated if he or she did not succeed in getting that employment.
- 407.** The Government member of the United Kingdom supported the amendment, noting that paragraph 4 was too prescriptive and might deter ratification.
- 408.** The Worker Vice-Chairperson opposed the amendments and pointed out that paragraph 4 was taken from Article 4, subparagraph 2(f), of the Recruitment and Placement of Seafarers Convention, 1996 (No. 179). He proposed a subamendment to insert the word “private” before the phrase “recruitment or placement service”.
- 409.** The Chairperson stated the subamendment proposed by the Worker Vice-Chairperson was not valid and it was therefore not discussed.
- 410.** The Government member of Norway, speaking on behalf of the Government group, supported the amendments.
- 411.** The Government member of Uruguay opposed the amendment.
- 412.** The Chairperson concluded that a sufficient majority of the Committee members supported the amendment, which was therefore adopted.
- 413.** Article 22 was adopted as amended.

---

Payment of fishers

Article 23

*Paragraph 1*

*D.143*

- 414.** The Government member of the United Kingdom introduced an amendment submitted by the Government members of Finland, France, Germany, Ireland, Netherlands, Portugal, Sweden and the United Kingdom to delete the second sentence of paragraph 1 because the original text was not clear as to what other fishers might be paid. The sentence was also too detailed for the Convention.
- 415.** The Worker Vice-Chairperson opposed the amendment.
- 416.** The Employer Vice-Chairperson and the Government member of Norway, speaking on behalf of the Government group, supported the amendment.
- 417.** The Chairperson concluded that a sufficient majority of the Committee members supported the amendment, which was adopted.

Article 23

*Paragraph 2*

*D.142*

- 418.** The Government member of the United Kingdom introduced an amendment submitted by the Government members of Belgium, Denmark, Finland, France, Germany, Greece, Ireland, Netherlands, Norway, Portugal, Spain, Sweden and the United Kingdom to delete paragraph 2 because it was too prescriptive and there would be practical difficulties in implementing its provisions.
- 419.** The Employer Vice-Chairperson and the Government member of Norway, speaking on behalf of the Government group, supported the amendment.
- 420.** The Worker Vice-Chairperson opposed the amendment.
- 421.** The Chairperson concluded that a sufficient majority of Committee members supported the amendment, which was adopted.

*New paragraph to follow paragraph 2*

*D.114*

- 422.** The Worker Vice-Chairperson withdrew an amendment before its discussion.
- 423.** Article 23 was adopted as amended.

---

## Payment of fishers

### Article 24

#### *D.175*

- 424.** The Government member of Denmark introduced an amendment submitted by the Government members of the Bahamas, Belgium, Brazil, Côte d'Ivoire, Cuba, Denmark, Egypt, Finland, France, Germany, Greece, Iceland, Ireland, Japan, Kenya, Mauritania, Mexico, Mozambique, Namibia, Netherlands, Norway, Portugal, South Africa, Spain, Sweden, Syrian Arab Republic, Turkey, United Arab Emirates, United Kingdom and Uruguay to delete the words "of [24] metres in length and over or engaged on international voyages". The provisions of this Article should apply to all fishing vessels.
- 425.** The Worker Vice-Chairperson expressed support.
- 426.** The Government member of Norway, speaking on behalf of the Government group, also supported the amendment, as did the Government members of Algeria, Lebanon and Tunisia.
- 427.** The Employer Vice-Chairperson stated that the Employer members supported the amendment, but wished to bring to the attention of the Committee the contents of an amendment (D.192) that they had submitted, which added the words "normally remaining at sea for more than 14 days". If their amendment were adopted, then only very small boats that did not stay at sea for such a long period of time would in practice be exempted.
- 428.** The Government-sponsored amendment was adopted.

#### *D.192*

- 429.** The Employer Vice-Chairperson introduced an amendment, which she immediately subamended to insert only the words "normally remaining at sea for more than 14 days" after "vessels".
- 430.** The Worker Vice-Chairperson did not support this proposal.
- 431.** The Government member of Norway stated that the Government group did not support the Employer members' amendment, a view reiterated by the Government member of Argentina.
- 432.** The Government member of India supported the amendment as subamended. It was important for countries like hers to have the opportunity to exempt small fishing vessels from the provisions of Article 24.
- 433.** The amendment as subamended was not adopted.

#### *D.116*

- 434.** The Worker Vice-Chairperson introduced an amendment to replace the words "payments received" by the word "earnings". The purpose was to make a clearer, more understandable text.
- 435.** The Employer Vice-Chairperson requested clarification from the Worker members as to the difference in meaning between "earnings" and "payments received, including advances".

- 
436. The Worker Vice-Chairperson explained that payment might take many forms. In order to ensure that all forms of payments, including share of catch, would be included, the term “earnings” was proposed.
437. The Employer Vice-Chairperson felt that the term “payments” included share of catch and preferred the Office text.
438. The Government member of Norway said that the Government group supported the amendment for the same reasons put forward by the Worker members. The term “earnings” included diverse methods of payments.
439. The Government member of Egypt, speaking also on behalf of the Government members of Algeria, Lebanon, Saudi Arabia, Syrian Arab Republic and Tunisia, said that the term “payments” was preferable to “earnings” as the discussion was about salaries paid to fishers.
440. The Employer Vice-Chairperson wondered why, if the aim of the Worker members was for a clearer, more inclusive text, they had deleted the word “received”.
441. The Worker Vice-Chairperson withdrew the amendment.

#### *D.117*

442. The Worker Vice-Chairperson introduced an amendment to replace the words “reasonable cost” by the words “no cost”. There had been frequent reports of occasions when fishers faced difficulties with some manning agencies when remitting payments to their families, especially when payments were to be made in different currencies.
443. The Employer Vice-Chairperson expressed her group’s support for the amendment.
444. The Government member of Norway stated that the Government group did not support the amendment.
445. The Government member of France initially had reservations about the amendment but, in the light of the Employer members’ support, also supported it.
446. The Government members of Argentina, Côte d’Ivoire, Japan, Portugal and Spain agreed with the Government member of France.
447. The amendment was therefore adopted.
448. Article 24 was adopted as amended.

### ***Part V. Accommodation and food***

#### Articles 25-28

449. The Committee agreed on a further mandate for the Working Party. It should examine all relevant amendments submitted to Articles 25-28 and Annex III and develop and propose text on the above provisions for consideration by the Committee.
450. Following the deliberations of the Working Party on Articles 25-28 and Annex III, the Government member of Brazil, who served as Chairperson, presented her report to the Committee. She recalled the terms of reference and stated that the Working Party had considered all amendments submitted on these items (D.46-D.93, D.95-D.100 and

---

C.S.P/WP/D.4-D.25), as well as other proposals and subamendments put forward by various Members. A document (C.S.P./D.221) was distributed to the Committee, which contained a list of paragraphs on which consensus had been reached and a list of those on which there had been no consensus.

- 451.** The Chairperson of the Working Party then highlighted the substantive changes made by the Working Party.
- 452.** In Article 25, there was some concern that the expression “potable water” was not universally understood and “drinking water” might be a better term (D.46). The Working Party suggested that the Drafting Committee should examine this issue, which was also relevant to Article 27(b) (D.49) and paragraph 70 (D.72) of Annex III.
- 453.** In Article 26, subparagraph (g), it was agreed that the words “that does not meet the requirements of this Convention” (D.76) be added at the end.
- 454.** In Article 27, subparagraph (c), it was agreed that a fishers’ work agreement be added as an option to recover the cost of food and drinking water (D.51).
- 455.** Regarding Article 28, some members had felt the provisions of Annex III were too prescriptive and that more flexibility was needed. After much debate, it was decided that a new paragraph should be added to this Article, to read: “A Member which is not in a position to implement the provisions of Annex III may, after consultation, adopt provisions in its laws and regulations or other measures which are substantially equivalent to the provisions set out in Annex III, with the exception of provisions related to Article 27.” With the exception of one Government member, all members of the Working Party had supported this paragraph. Since there was not unanimous agreement by the Working Party, and as it was such a significant issue, it was decided that this suggestion would remain in square brackets for further consideration by the Committee.
- 456.** As a result of a subamendment (D.78) to paragraph 1 of Annex III, the Working Party suggested that the competent authority “may, after consultation,” apply requirements in this Annex to existing vessels.
- 457.** Two new paragraphs were proposed to the general provisions of the Annex. The first was in response to various amendments to apply some of the provisions to working spaces, in addition to accommodation. It read as follows:

Members may extend the requirements of this Annex regarding noise and vibration, ventilation, heating and air conditioning, and lighting to enclosed working spaces and spaces used for storage, if after consultation, such application is considered appropriate and will not have a negative influence on the function of the process or working conditions or the quality of the catches.

- 458.** The second paragraph was agreed upon as a result of the conclusions of the Working Party on Annex I, which had been adopted by the Committee. The text was received by the Drafting Committee, which recommended in C.R./D.3(C.S.P.) the inclusion of the following wording in Annex III.

The use of gross tonnage as referred to in Article 5 of this Convention is limited to the following specified paragraphs of this Annex: 10, 31, 32, 34, 36, 39, 54 and 59. For these purposes, where the competent authority, after consultation, decides to use gross tonnage (gt) as the basis of measurement:

- (a) a gross tonnage of 175 gt shall be considered equivalent to a length (L) of 24 metres or a length overall (LOA) of 26.5 metres;

- 
- (b) a gross tonnage of 55 gt shall be considered equivalent to a length (L) of 15 metres or a length overall (LOA) of 16.5 metres;
  - (c) a gross tonnage of 700 gt shall be considered equivalent to a length (L) of 45 metres or a length overall (LOA) of 50 metres.”

Consequently, all references to tonnage elsewhere in the Annex were removed. The square brackets around the length limits throughout the Annex were also removed.

- 459.** At the end of paragraph 12, a new sentence was added so as not to exclude the possibility of sanitary areas being shared by two cabins.
- 460.** Consensus was reached to add “crew accommodation” to paragraph 14 (D.62).
- 461.** The phrase “as far as practicable, in accordance with relevant international standards” was added to paragraph 16 (D.96).
- 462.** Paragraph 19 was subamended (D.67) to allow for other measures besides ventilation to protect non-smokers from tobacco smoke on board.
- 463.** Two amendments to paragraph 27 (D.97, D.95) were agreed upon to ensure that emergency lighting was provided in sleeping rooms.
- 464.** Paragraph 44 was amended (D.70) to ensure that mess rooms would not be located forward of the collision bulkhead.
- 465.** The square brackets around the word “four” were removed in paragraph 54 (D.91).
- 466.** The word “adequate” was inserted in front of “facilities” in paragraphs 56 and 57 (D.77, D.71).
- 467.** In paragraph 60, a reference to “other protective equipment” was inserted (D.92).
- 468.** A sentence was added at the end of paragraph 61 to provide for cases where certain fishers bore the cost of bed linen, which could happen under certain collective agreements.
- 469.** In paragraph 62, it was specified that mess rooms could be used for recreational activities.
- 470.** In paragraph 63, it was underlined that the cost of communications should be reasonable and should not exceed the full cost to the vessel owner (D.73).
- 471.** A reference to the protection needed for gas bottles on deck was inserted in paragraph 67 (D.94).
- 472.** The Government member of Brazil concluded her intervention by recommending document C.S.P/D.219, which contained the Working Party’s proposals for the text of Articles 25-28 and Annex III, to the Committee for the adoption of the text on which there was consensus and for further consideration of the remaining text, taking the Working Party’s views into account.
- 473.** After discussion between the Officers of the Committee and the Legal Adviser, the Chairperson announced that the proposals from the Working Party would be treated as a global amendment and were therefore open to subamendment. For the paragraphs on which the Working Party had not reached consensus, the Committee would consider each paragraph individually and members could present their proposals in the form of subamendments for consideration by the Committee. He hoped that the paragraphs on

---

which consensus had been achieved in the Working Party would not be subject to further subamendment by the Committee.

Articles 25, 26, 27, 28

- 474.** On the basis of the consensus reached in the Working Party, the Committee adopted Articles 25, 26 and 27, as proposed by the Working Party.
- 475.** The Government member of Japan did not believe the Working Party had achieved consensus on paragraph 1 of new Article 28. He thanked the Working Party for its hard work but regretted that the result did not provide sufficient flexibility. He presented a subamendment (D.81), submitted by the Government members of China, Indonesia, Japan and the Republic of Korea, to replace, in Article 28, the words “shall give full effect” by the words “shall give effect, as far as possible according to the condition of the Member,”. His delegation’s calculations indicated that the equivalency of a vessel of 24 metres in length should be 300 gt, rather than the 175 gt the Committee had agreed upon in Annex III. Given the Committee’s decision, it had become even more crucial to ensure the Convention was sufficiently flexible. This was especially true for his Government. In Japan it was very difficult to increase the tonnage of fishing vessels because fishing resources were managed through the strict restriction of the number and tonnage of vessels. A vessel that was 23.95 metres long and 300 gt was obviously larger than one of 24.05 m and 176 gt. The former, larger vessel would not be subject to the stricter rules because of its length, whereas the latter would, despite being much smaller. He questioned this rationale, in terms of the equal and fair application of the Convention. The Accommodation of Crews (Fishermen) Convention, 1966 (No. 126), had few ratifications, yet the current draft of Annex III introduced stricter and more prescriptive provisions than those found in that Convention. This would unintentionally pose problems in terms of equal and fair application, and create serious obstacles for ratification for many countries, including Japan. Because of Japan’s legal framework, these obstacles would not be removed by including the proposed new paragraph in Article 28. He urged the Committee to consider carefully the implications of rejecting the subamendment he had introduced.
- 476.** The Committee agreed to examine this subamendment in conjunction with the Working Party’s proposed additional paragraph for Article 28, as presented by the Chairperson of the Working Party.
- 477.** The Government member of the United States emphasized that when the process of drafting the instruments had begun, he had understood that the intention was to address the interests of the most vulnerable workers. Thus, the aim had been not to be overly prescriptive, in order to adopt a Convention that could enjoy wide ratification. Nonetheless, too much prescription had been introduced into the text. The proposed new paragraph in Article 28 alleviated this problem, and he had no objection to the wording, which would help to encourage wider ratification.
- 478.** The Government member of Norway, speaking on behalf of the Government group, stated there had been a clear majority in favour of the proposed new paragraph in Article 28.
- 479.** The Employer and Worker Vice-Chairpersons supported this view.
- 480.** The Government member of Japan supported the statement of the Government member of the United States, but as he had stated previously, the proposed new paragraph in Article 28 was not sufficient to allow his Government to find a way to ratify the Convention. He therefore opposed it.

- 
- 481.** The Government member of China strongly supported Japan’s statement and agreed with the statement of the Government member of the United States. It was noteworthy that few Members had ratified the Accommodation of Crews (Fishermen) Convention, 1966 (No. 126), and other related Conventions. Perhaps these Conventions had been overly prescriptive. Since 80 per cent of fishing vessels were in Asia, the Convention ought to take Asian vessels into account. The key issue was to maximize the rights of fishers, especially the most vulnerable among them. The Working Party had introduced some flexibility into the text, but it was not sufficient. The text of the subamendment introduced by the Government member of Japan should be introduced into Article 28.
- 482.** The Government member of Norway referred to Article 3, and felt that reference could also be made there to “substantial equivalence”, to resolve some of the problems raised by the Government members of China and Japan with regard to compliance with Annex III.
- 483.** The Government member of Japan requested confirmation on whether or not Article 3 would be applied to larger vessels of 24 m and over. The Chairperson replied that Article 3 had already been discussed, including explanations on the scope of its coverage. It was not possible to reopen discussion on a provision that had already been adopted.
- 484.** The Government member of Japan reiterated his wish to have the subamendment included in Article 28.
- 485.** The Chairperson concluded that a majority of the Committee members opposed the subamendment, which was therefore not adopted. A majority of Committee members supported the new paragraph in Article 28, which was adopted.
- 486.** Article 28 was adopted, as proposed by the Working Party.

## ***Part VI. Health protection, medical care and social security***

### Medical care

#### Article 29

- 487.** Article 29 was adopted without amendment.

#### Article 30

##### *D.170*

- 488.** The Government member of Denmark introduced an amendment submitted by the Government members of the Bahamas, Belgium, Brazil, Côte d’Ivoire, Cuba, Denmark, Egypt, Finland, France, Germany, Greece, Iceland, Ireland, Japan, Kenya, Mauritania, Mexico, Mozambique, Namibia, Netherlands, Norway, Portugal, South Africa, Spain, Sweden, Syrian Arab Republic, Turkey, United Arab Emirates, United Kingdom and Uruguay to replace, in the introductory phrase of Article 30, the words “or those engaged on international voyages or normally remaining at sea for more than three days” by the words “taking into account the number of fishers on board, the area of operation and the duration of the voyage”. Since the Article concerned medical care and medical equipment, it would be best to use the same wording as in Article 29, subparagraph (a).
- 489.** The Employer and Worker Vice-Chairpersons, the Government member of Argentina, and the Government member of Norway, speaking on behalf of the Government group, supported the amendment.

---

**490.** The amendment was adopted.

D.189

**491.** Due to the adoption of the previous amendment, the Employer Vice-Chairperson withdrew an amendment (D.189).

D.139

**492.** The Government member of the United Kingdom introduced an amendment submitted by the Government members of Denmark, Finland, France, Germany, Greece, Ireland, Netherlands, Norway, Portugal, Spain, Sweden and the United Kingdom, to add, at the end of subparagraph (c), the words “or the *International Medical Guide for Ships*”. On the suggestion of the International Maritime Health Association, it was felt it was important to make a reference to this publication.

**493.** The Worker and Employer Vice-Chairpersons and the Government member of Norway, speaking on behalf of the Government group, supported the amendment.

**494.** The amendment was adopted.

**495.** Article 30 was adopted as amended.

#### Occupational safety and health and accident prevention

##### Article 31

D.140

**496.** The Government member of Denmark introduced an amendment submitted by the Government members of Denmark, Finland, France, Germany, Greece, Ireland, Netherlands, Norway, Portugal and Sweden to insert, at the beginning of subparagraph (b), before the word “training”, the words “on board”. The insertion aimed to ensure that laws, regulations or other measures provided for on-board training.

**497.** Both the Employers’ and Workers’ groups agreed that on-board training was important, but thought that the text of the Convention should refer to training in a more general sense and not be restricted to on-board training. They therefore did not support the proposed amendment.

**498.** The Government member of Denmark withdrew the amendment with the permission of the other sponsors.

D.138

**499.** The Government member of Greece presented an amendment submitted by the Government members of Denmark, Finland, Germany, Greece, Ireland, Netherlands, Norway, Spain, Sweden and the United Kingdom to insert the words “or, after consultation, of other appropriate bodies” after the word “committees”. The proposal aimed at ensuring that, should bodies other than joint committees be set up to deal with occupational safety and health issues, this would be done only after consultation in accordance with Article 1.

**500.** Both the Employer and Worker Vice-Chairpersons expressed their groups’ support for the amendment.

---

**501.** The Government member of Norway indicated that the Government group also supported the amendment.

**502.** Article 31 was thus adopted as amended.

Article 32

*D.187*

**503.** The Employer Vice-Chairperson withdrew an amendment (D.187).

*D.174*

**504.** The Government member of Denmark introduced an amendment submitted by the Government members of the Bahamas, Belgium, Brazil, Côte d'Ivoire, Cuba, Denmark, Egypt, Finland, France, Germany, Greece, Iceland, Ireland, Japan, Kenya, Mauritania, Mexico, Mozambique, Namibia, Netherlands, Norway, Portugal, South Africa, Spain, Sweden, Syrian Arab Republic, Turkey, United Arab Emirates, United Kingdom and Uruguay to replace, in paragraph 1, the words "or those engaged on international voyages" by the words "taking into account the number of fishers on board, the area of operation and the duration of the voyage". This was an occupational safety and health issue and could therefore use the wording found in Article 29(a), as had been done with Article 30.

**505.** The Employer Vice-Chairperson and the Government member of Norway, speaking on behalf of the Government group, supported the amendment.

**506.** The Worker Vice-Chairperson proposed a subamendment to add the words "normally remaining at sea for more than three days" at the end of the amendment text.

**507.** The Government members of Denmark, Egypt, Norway and the Philippines supported the subamendment.

**508.** The Government member of Namibia opposed the subamendment, as it would mean the duration could be indefinite.

**509.** The Government member of Uruguay considered the subamendment rendered the text unclear once the implications of the words "duration of the voyage" and "more than three days" were combined.

**510.** The Government member of Côte d'Ivoire, also speaking on behalf of the Government members of Congo and Guinea, opposed the subamendment.

**511.** The Government member of Lebanon, speaking on behalf of the Government members of Algeria, Egypt, Lebanon, Saudi Arabia, Syrian Arab Republic, Tunisia and the United Arab Emirates, supported the subamendment, but suggested the wording be clarified.

**512.** Numerous proposals were put forward as to the formulation and position of various elements contained within the subamendment.

**513.** The Government member of Uruguay enquired whether the intent of the subamendment was to have the provision cover all vessels or only vessels of [24] metres in length and over. If it was meant to refer only to vessels of [24] metres in length and over, then the subamendment was unnecessary as the time element was captured by the words "duration of the voyage". If the provision was meant to refer to all vessels, then the wording would need to be revised to make this clear.

- 
- 514.** A Worker member stated that the intent of the subamendment was to have the provision cover all fishing vessels of [24] metres in length and over irrespective of the length of the voyage, and all fishing vessels normally remaining at sea for more than three days irrespective of size. Moreover, the administration should take into consideration the number of fishers on board, the area of operation and the duration of voyages of less than three days, for the purposes of extending the application of the Article.
- 515.** The Government member of South Africa said that, in the light of the clarifications provided, he could not support the subamendment. The proposal would change the intent of Article 32 by extending its application to all fishing vessels.
- 516.** Following consultations, the Employer Vice-Chairperson introduced the following text: “The requirements of this Article shall apply to fishing vessels of [24] metres in length and over normally remaining at sea for more than three days and, after consultation, to other vessels, taking into account the number of fishers on board, the area of operation and the duration of the voyage.” This proposal had the support of the social partners, although the Employer members had agreed to this text with great reluctance. The provision was overly prescriptive and the Committee risked drafting a Convention that would place too many burdens on small-scale fishers in less developed countries.
- 517.** The Government member of Egypt asked for clarification on the meaning of “after consultations” and “other vessels”.
- 518.** The Government members of Cameroon, Côte d’Ivoire, Egypt, Germany, Japan, Mauritania, Mozambique, Namibia, Nigeria, Norway, Saudi Arabia, South Africa, Syrian Arab Republic and the United Arab Emirates all supported the social partners’ proposal.
- 519.** The amendment as subamended was adopted

*D.112*

- 520.** The Worker Vice-Chairperson withdrew an amendment (D.112).

*D.185*

- 521.** The Employer Vice-Chairperson introduced an amendment to replace the words “provide fishers” by the words “ensure that every fisher on board is provided” in subparagraph 3(a). Such wording would be clearer than the Office text.
- 522.** The Government member of Norway noted that a clear majority of the Government group was in favour of the amendment.
- 523.** The Worker Vice-Chairperson opposed the amendment as it would change the whole meaning of the Office text.
- 524.** The Employer Vice-Chairperson reassured the Worker members that the definition of “fishing vessel owner” included any other organization or person who assumed the responsibility for the operation of the vessel and agreed to take over the duties and responsibilities of the fishing vessel owners. The aim was to make the subparagraph clearer and fairer than the original text. There was nothing hidden in the wording of the amendment.
- 525.** The Worker Vice-Chairperson, in the light of the explanation, accepted the amendment.
- 526.** The amendment was adopted.

---

*D.130*

- 527.** The Government member of France introduced an amendment submitted by the Government members of Belgium, Denmark, Finland, France, Germany, Ireland, Netherlands, Norway, Portugal, Spain, Sweden and the United Kingdom to insert the word “personal” after the word “appropriate” in subparagraph 3(a). The word “personal” made clear what type of protective gear was to be provided.
- 528.** The Worker Vice-Chairperson, the Employer Vice-Chairperson and the Government member of Norway, speaking on behalf of the Government group, all supported the amendment.
- 529.** The amendment was adopted.

*D.118*

- 530.** The Worker Vice-Chairperson introduced an amendment to delete the words “; the competent authority may grant written exemptions from this requirement for fishers who have demonstrated equivalent knowledge and experience” from subparagraph 3(b). Even fishers with vast experience could benefit from basic safety training.
- 531.** The Government member of Norway stated that the Government group opposed the amendment by a clear majority.
- 532.** The Employer Vice-Chairperson also opposed the amendment.
- 533.** The Worker Vice-Chairperson withdrew the amendment.
- 534.** Article 32 was adopted as amended.

New Article after Article 32

*D.126*

- 535.** The Government member of Denmark introduced an amendment submitted by the Government members of Denmark, France, Norway and Spain to insert a new Article containing the provisions of Paragraph 44 of the proposed Recommendation. This idea had been discussed in the Meeting of Experts held in September 2003, and the Government of Denmark had proposed its inclusion in the Convention in 2004, but the text had been placed in the Recommendation. The involvement of the fisher in risk assessment was a vital aspect of the Convention. The fishers were the most knowledgeable about the risks and could contribute substantially to improving safety and health on board fishing vessels.
- 536.** The Employer Vice-Chairperson asked whether this proposal presupposed that all ratifying States would also have to ratify the International Convention on Standards of Training, Certification and Watchkeeping for Fishing Vessel Personnel, 1995 (STCW-F Convention), when that standard had not yet come into force. Text on risk evaluation was more appropriate in the Recommendation.
- 537.** The Government member of Denmark responded that the intention was not to oblige any country to ratify the STCW-F Convention, but rather to offer inspiration. The Government member of France agreed that including this text would involve no obligation for member States to ratify the STCW-F Convention.

- 
- 538.** The Government member of Norway stated that a clear majority of the Government group opposed the amendment. The Government member of Chile opposed the amendment.
- 539.** The Government member of the United Kingdom was part of the Government group majority opposed to the amendment. She was not opposed to risk assessment, which was important, but noted that the general principle was already included in Article 32. The text of Paragraph 44 of the proposed Recommendation was inspirational, but also aspirational and would be better placed in the proposed Recommendation.
- 540.** The Worker Vice-Chairperson considered risk assessment to be very important. Although the text could have been better formulated, he supported the amendment as proposed.
- 541.** The Government member of Ireland remarked that many work-related accidents were due to the lack of risk assessment and risk management. He supported the inclusion of the text on risk assessment in the Convention as did the Government members of Argentina and Belgium.
- 542.** The Government member of Norway said that risk assessment was crucial for fishers and vessel owners. It encouraged those with the best knowledge of the vessels and the risks to take preventive measures to avoid accidents. It was important to include the text in the Convention.
- 543.** The Government member of Greece agreed with the Government member of the United Kingdom. Although he supported the principles that lay behind it, he could not support the amendment. Despite the views expressed by other Government members, the inclusion of the reference to the STCW-F Convention might be interpreted differently by the Committee of Experts on the Application of Conventions and Recommendations.
- 544.** The Government member of Brazil felt that it was very important to take the views of the Government members of Greece and the United Kingdom into account. The text of the proposed Article was too detailed, and its proper place was in the Recommendation.
- 545.** The Government member of Japan associated his delegation with the views expressed by the Government members of Brazil, Greece and the United Kingdom.
- 546.** The Government member of Denmark asked for legal advice on the implications in relation to STCW-F. He suggested a subamendment to delete the text of Paragraph 44(1)(b) of the Recommendation after the word “training”, which was seconded by the Government member of Norway.
- 547.** The Government member of Greece appreciated the subamendment, but agreed with the Worker members that the text could have been better drafted. While he shared the concerns of the sponsors of the amendment and the subamendment, he could not support the proposals.
- 548.** The Government member of South Africa, also speaking on behalf of the Government member of Namibia, expressed reservations about the inclusion of such a restrictive clause in the Convention. He did not support the subamendment.
- 549.** The Worker Vice-Chairperson suggested a further subamendment to move just the introductory phrase of Paragraph 44(1) from the Recommendation to the Convention, to change “should” to “shall”, and to have a full stop after “representatives”, thereby deleting the last three words. The remainder of the text on risk assessment should be left in the Recommendation.

- 
- 550.** The Government member of Portugal supported the Workers' further subamendment.
- 551.** The Employer Vice-Chairperson remarked that the notion of risk assessment was already present in Article 31(a), which included risk evaluation and management.
- 552.** The Government member of the United Kingdom supported the Worker members' proposal. The inclusion of the reference to the participation of fishers or their representatives added an important element not found in Article 31.
- 553.** The Government members of Argentina, Brazil, Denmark, Egypt, France, Greece, Japan, Mozambique, Namibia, Philippines and South Africa all supported the Workers' further subamendment.
- 554.** The Government member of Mexico also supported the further subamendment, but suggested adding "as appropriate", a view also endorsed by the Government member of the Bolivarian Republic of Venezuela.
- 555.** The Government member of China did not support the further subamendment.
- 556.** The amendment was adopted as subamended.
- 557.** The new Article after Article 32 was adopted.

#### Social security

#### Articles 33 to 36

#### *D.105, D.196*

- 558.** The Government member of Norway submitted an amendment, seconded by the Government member of Spain, to replace the words "benefit from" by the words "participate in".
- 559.** The Government member of Spain proposed a subamendment to retain "benefit from" following "participate in" to read, "participate in and benefit from". Participating in a social security system usually referred to making contributions; benefiting from the system was a separate concept. It was important to include both ideas.
- 560.** The Government member of Norway seconded the subamendment and concurred with the comment of the Government member of Spain.
- 561.** The Government member of South Africa favoured the wording "participate in". The concept of benefiting was implied in the concept of participation and seemed redundant.
- 562.** The Employer Vice-Chairperson suggested examining amendments D.105 and D.196 together, in view of prior consultations.
- 563.** The Government member of Norway, also speaking on behalf of the Government member of Spain, withdrew their amendment and subamendment in order to allow the Committee to focus on the results of prior consultations between governments and the social partners.
- 564.** In reply to a request for clarification by the Government member of Norway, a member of the secretariat explained that Article 33 of the Office text did not prevent member States from concluding that fishers might need to make contributions for the acquisition of social security benefits arising from this Article. Fishers were entitled to benefit from national

---

schemes as dictated by the specificities of each system. In States where schemes were based on contributions, States could ask fishers to contribute; States that based the acquisition of rights purely on residency could not require such payments to be made.

- 565.** The Government member of Egypt outlined Egypt's national system and emphasized the difference between the concepts of social security and social assistance. The meaning of social security should be clarified in the context of the draft Convention.
- 566.** The Government member of the Netherlands summarized prior tripartite consultations, which had focused on three issues. First, in view of several amendments submitted by the Worker members to insert references to the Social Security (Minimum Standards) Convention, 1952 (No. 102), it had been decided to insert a general reference to Convention No. 102 in the Preamble. Secondly, amendment D.133, submitted by the Government members of Belgium, Denmark, Finland, France, Germany, Ireland, Netherlands, Portugal, Spain, Sweden and the United Kingdom, to replace Articles 33 and 34 by new text, had been the basis for compromise and had been subamended to address the groups' concerns. Thirdly, the amendment submitted by the Employers to add "comparable" after "other" in Article 33 had been examined by the groups in their separate group consultations.
- 567.** The Employer Vice-Chairperson reported that, as a result of the consultations, her group suggested subamending D.196 to replace "comparable" with "to other workers with comparable employment status".
- 568.** The Government member of Norway, as a result of the Government group's consultations, suggested a subamendment to replace "comparable" with "to other workers, including employed and self-employed, ordinarily resident in its territory".
- 569.** A Worker member from Denmark explained that the Employer members' original amendment (D.196) had raised serious concerns in his group, since it was not possible to determine what fishers should be compared to. The Workers' group opposed the amendment because fishers should be treated no differently from other workers resident in a country. Since the newly proposed subamendments seemed to substantially change the amendment, he suggested that the Government and Employer members should elaborate on their reasoning behind these subamendments.
- 570.** After further consultations among the groups, the Government member of the Netherlands was happy to report that agreement had been reached by a clear majority of Government members as well as the Employer and Worker members on the Articles on social security being included in the draft Convention. The first point on which there was agreement related to the sixth preambular paragraph, starting with "Noting the relevant instruments" where after the words "in particular" the following words should be inserted: "the Social Security (Minimum Standards) Convention, 1952, notwithstanding the provisions of Article 77 of that Convention,". The second issue on which agreement had been reached was Article 33 where, after the words "other workers" the following words should be inserted " , including employed and self-employed persons,". There were no changes to Article 34, but Article 35 was revised to read as follows: "Members shall cooperate through bilateral or multilateral agreements or other arrangements, in accordance with national laws, regulations or practice, to achieve progressively comprehensive social security protection for fishers, taking into account the principle of equality of treatment irrespective of nationality, and to ensure the maintenance of social security rights which have been acquired or are in the course of acquisition by all fishers regardless of residence." As Members had some concerns about the readability of the new text of Article 35, which was considered to be too long, there was a proposal that it be split into two sentences, but without changing the meaning. It was suggested that it be referred to the

---

Drafting Committee for this purpose. Finally, new wording was also proposed for Article 36 to read as follows: “Notwithstanding the attribution of responsibilities in Articles 33, 34 and 35, Members may determine, through bilateral and multilateral agreements and through provisions adopted in the framework of regional economic integration organizations, other rules concerning the social security legislation to which fishers are subject.” These proposals were supported by a clear majority of Government members, as well as the Employers’ and Workers’ groups. Should the Committee as a whole accept and adopt them, there would be no need to deal with the individual amendments proposed on the Articles related to social security.

**571.** The Worker Vice-Chairperson confirmed that his group was in full accord with the statement of the previous speaker.

**572.** The Employer Vice-Chairperson indicated that Employers had participated in the discussions and agreed to the package. They nevertheless wished to have a clearer definition of the term “worker” in light of the reference in Article 33 to a worker also including employed and self-employed persons. Concerning the new wording in Article 35, the Employers’ group subscribed to the view that the Drafting Committee should break the sentence into two parts, taking care with the references to bilateral and multilateral agreements or arrangements.

**573.** The Legal Adviser, responding to the Employer members’ request, explained that the term “worker” had defied definition since the founding of the ILO in 1919. While there was as yet no definitive answer, elements of a definition could be inferred from an examination of international labour Conventions. Although unstated, the notion of a “waged” or “salaried” person was often implicit. In the Discrimination (Employment and Occupation) Convention, 1958 (No. 111), however, the concept of “worker” had been extended beyond a person who earns a wage or salary to encompass any person who works, even including an employer. In the current draft Convention, in the absence of a definition, the concept of worker would include not only waged workers, but also independent or self-employed fishers, who might be covered by their country’s social security system, which applied to a wide range of people.

**574.** The Chairperson noted the Committee’s acceptance of the text agreed by the majority of the Government group and the Employers’ and Workers’ groups on the sixth preambular paragraph, and Articles 33, 34, 35 and 36, as reported on by the Government member of the Netherlands and the sponsors’ willingness to consider all other proposed amendments on social security to have been withdrawn. Those provisions were considered as adopted. Article 35 was being referred to the Drafting Committee as suggested by the Government member of the Netherlands in his report and similarly proposed by the Employers’ group. The Chairperson thanked the Committee members for their excellent work.

**575.** Articles 33 to 36 were adopted as amended.

#### New Article after Article 37

##### *D.123, D.124*

**576.** The Worker Vice-Chairperson stated that the Article should cover all types of sickness, not just those that were work-related. The Workers’ group was therefore proposing that, in the heading preceding Article 37 as well as in paragraph 1, the words “work-related” be deleted.

**577.** The Government member of Norway, speaking on behalf of the Government group, opposed the amendments. Article 37 aimed to offer fishers protection for work-related

---

sickness, injury or death. Non-work-related contingencies should be addressed through other, more general instruments covering wider population groups.

**578.** The Employer Vice-Chairperson agreed with the views expressed by the Government member of Norway. Her group did not support the amendments.

**579.** The Worker Vice-Chairperson withdrew both amendments.

**580.** Article 37 was adopted without amendment.

New Article after Article 37

*D.141, subamended by D.220*

**581.** A Worker member from Denmark presented his group's proposed amendment. Fishing vessel owners had the same liabilities regarding the costs of accident and illness as shore-based employers, and it was important that fishers working on vessels operating in foreign waters should be able to obtain medical care in foreign countries and that such care would be paid for. Having heard many comments in the Committee about the need to avoid being overly prescriptive, the Workers' group had decided to subamend their amendment to read as follows:

1. Each Member shall adopt laws and regulations requiring that the owners of fishing vessels that fly its flag are responsible for health protection and medical care of all fishers working on board their vessels, including all related costs, providing the same level of protection as applies to workers in shore-based industries.

2. Each Member shall adopt laws and regulations requiring fishing vessel owners to be liable for defraying the expense of medical care and related maintenance during medical treatment in a foreign country, at least until the fisher has been repatriated."

**582.** The Worker Vice-Chairperson said that following consultations, an agreement had been reached to add the following new Article after Article 37:

1. In the absence of national provisions for fishers, each member shall adopt laws, regulations or other measures to ensure that fishing vessel owners are responsible for the provision to fishers on vessels flying their flag, health protection and medical care while employed, engaged or working on a vessel at sea or in a foreign port. Such laws, regulations or other measures shall ensure that fishing vessel owners are responsible for defraying the expenses of medical care, including related material assistance and support, during medical treatment in a foreign country, until the fisher has been repatriated.

2. National laws or regulations may permit the exclusion of the liability of the fishing vessel owner if the injury occurred otherwise than on the service of the vessel or the sickness or infirmity was concealed during engagement or the injury or sickness was due to an wilful act, default or misbehaviour.

**583.** The Employer Vice-Chairperson and the Government member of Norway, speaking on behalf of the Government group, supported the text.

**584.** The Committee adopted the new Article to follow Article 37.

## ***Part VII. Compliance and enforcement***

Article 38

**585.** Article 38 was adopted without amendment.

- 586.** The Government member of Denmark introduced an amendment submitted by the Government members of the Bahamas, Belgium, Brazil, Côte d'Ivoire, Cuba, Denmark, Egypt, Finland, France, Germany, Greece, Iceland, Ireland, Japan, Kenya, Mauritania, Mexico, Mozambique, Namibia, Netherlands, Norway, Portugal, South Africa, Spain, Sweden, Syrian Arab Republic, Turkey, United Arab Emirates, United Kingdom and Uruguay to replace the words "or those engaged on international voyages" by the words "or those normally engaged in voyages to or from foreign ports". He explained that the guiding principle in the drafting of this amendment had been to find alternative wording for the notion of international voyages.
- 587.** The Worker Vice-Chairperson, noting that port State control was a complex issue, subamended the amendment by replacing the phrase "those normally engaged in voyages to or from foreign ports" by the words "vessels on a voyage 200 nautical miles beyond the coastline of the flag State and remaining at sea for more than three days".
- 588.** The Government member of Denmark responded that the sponsors of the amendment could accept the Worker members' subamendment.
- 589.** The Government members of Argentina, Brazil, Germany, Mexico, Mozambique, Namibia and South Africa also supported the subamendment.
- 590.** The Government member of China expressed her preference for the Office text.
- 591.** The Government member of the Philippines asked what the justification was for selecting 200 nautical miles.
- 592.** The Government member of Egypt responded that the distance of 200 nautical miles was the exclusive economic zone according to the United Nations Convention on the Law of the Sea.
- 593.** The Employer Vice-Chairperson asked whether the subamendment was intended to cover vessels normally engaged on such voyages or those that were engaged on one occasion on such a voyage.
- 594.** The Worker Vice-Chairperson indicated that if the Employer members wished to submit a further subamendment to add the word "normally", the Worker members would support it.
- 595.** The Government member of Greece also expressed support.
- 596.** The Employer Vice-Chairperson proposed a further subamendment which would result in the following text for Article 39:
- Members shall require that fishing vessels of [24] metres in length and over and all vessels normally on voyages 200 nautical miles beyond the coastline of the flag State or the outer edge of its continental shelf, whichever is greater, and remaining at sea for more than three days carry a valid document issued by the competent authority stating that the vessel has been inspected by the competent authority or on its behalf, for compliance with the provisions of this Convention concerning living and working conditions. Such a document shall be valid for a period of [three] years or, if issued on the same date as the International Fishing Vessel Safety Certificate, for the period of validity of that certificate.
- 597.** The Worker Vice-Chairperson expressed support for the proposal.

---

**598.** The Government member of Ireland stated that, while he did not have any objection in principle to the proposed text, the wording seemed a bit vague and might therefore pose some difficulty for ratifying Members.

**599.** The Government members of Algeria and Saudi Arabia supported the further subamendment.

**600.** The amendment was adopted as subamended.

*D.193*

**601.** The Employer Vice-Chairperson withdrew an amendment (D.193).

*D.125*

**602.** The Government member of Denmark introduced an amendment submitted by the Government members of Denmark, Finland, Germany, Greece, Ireland, Netherlands, Norway, Portugal, Sweden and the United Kingdom to replace the word “[three]” by “five”. He stressed the desirability of achieving harmonization regarding the validity of certificates with the different IMO Conventions, such as the MARPOL Convention, and reminded the Committee of the Global and uniform implementation of the harmonized system of survey and certification.

**603.** The Worker Vice-Chairperson pointed out that intermediate surveys were undertaken within the five-year period of validity.

**604.** The Government member of Denmark emphasized that the issue here was one of the validity of documents rather than the frequency of inspections. While there might indeed be some other frequency for inspections under other Conventions, he underlined the need for the validity of certificates under the Convention to be consistent with the five years specified under IMO Conventions.

**605.** The Employer Vice-Chairperson expressed support for the proposed amendment for the reasons given by the Government member of Denmark.

**606.** The Government member of Egypt preferred the Office text because the validity of documents was left to the prerogative of competent national authorities and three years’ duration was more reasonable than five.

**607.** The Government member of Norway indicated that the Government group supported the amendment.

**608.** The Worker Vice-Chairperson expressed his group’s support for the amendment as well.

**609.** The amendment was adopted.

**610.** Article 39 was adopted as amended.

Article 40

**611.** Article 40 was adopted without amendment.

*D.157*

- 612.** The Worker Vice-Chairperson introduced an amendment to replace the text of paragraph 2 by the following:

If a Member, in whose port a fishing vessel calls in the normal course of its business or for operational reasons, receives a complaint or obtains evidence that such vessel does not conform to the standards of this Convention, it may prepare a report addressed to the Government of the country in which the vessel is registered, with a copy to the Director-General of the International Labour Office, and may take measures necessary to rectify any conditions on board which are clearly hazardous to safety or health.

The text was drawn from the Merchant Shipping (Minimum Standards) Convention, 1976 (No. 147), which had proven its worth. The proposal was editorial, rather than substantive in nature.

- 613.** The Government member of Norway expressed the Government group's support for the proposed amendment.
- 614.** The Employer Vice-Chairperson observed that a Member that had not ratified the Convention should not have its standards imposed on it. She therefore suggested subamending the proposal as follows: in the first line, add "that has ratified this Convention" after the word "Member" and "from the country of a Member that has also ratified this Convention" after "vessel" and in the third line replace "standards" with "requirements".
- 615.** The Government member of Greece rejected the amendment on the grounds that it conflicted with the provisions of Article 42 on which the Employers had not proposed any amendment.
- 616.** The Worker Vice-Chairperson agreed with the position of the Government member of Greece and did not support the subamendment.
- 617.** The Government member of Norway also concurred. The Employers' proposed subamendment would be a disincentive for ratification and so could not be supported.
- 618.** The Employer Vice-Chairperson withdrew the subamendment.
- 619.** The amendment was adopted.

*D.162*

- 620.** The Worker Vice-Chairperson proposed an amendment to replace the text of paragraph 4 by the following: "For the purpose of this Article, 'complaint' means information submitted by a fisher, a professional body, an association, a trade union or, generally, any person with an interest in the safety of the vessel, including an interest in safety or health hazards to the fishers on board". The text was adapted from Article 4 of the Merchant Shipping (Minimum Standards) Convention, 1976 (No. 147).
- 621.** In answer to a query from the Government member of Egypt, a member of the secretariat stated that the relevant authority with whom a complaint could be filed were the flag State in relation to paragraph 1 and the port State in relation to paragraph 2.

- 
- 622.** The Government member of Norway observed that there was a clear majority in the Government group against adopting this amendment.
- 623.** The Employer Vice-Chairperson also opposed the text. There was no need for a definition of complaints.
- 624.** The Worker Vice-Chairperson withdrew the amendment.
- 625.** Article 41 was adopted as amended.

#### Article 42

##### *D.153*

- 626.** The Government member of Japan introduced an amendment, jointly sponsored with the Government member of Indonesia, to replace the words “apply the” by the words “implement its responsibility under this” [Convention]. This wording would be consistent with that adopted in the draft consolidated maritime labour Convention.
- 627.** The Government member of Norway observed that there was a clear majority in the Government group against adopting this amendment.
- 628.** The Government member of Ireland had reconsidered his original view after the explanation by the Government member of Japan, and now supported the amendment.
- 629.** The Worker Vice-Chairperson felt that the proposal was more about drafting than substance and could support it.
- 630.** The Employer Vice-Chairperson believed that the original wording was probably closer to ILO usage than the amendment and sought the advice of the secretariat.
- 631.** The deputy representative of the Secretary-General stated that the term “apply” was the usual ILO term, while “implement its responsibility under this Convention” would be a novelty.
- 632.** The Employer Vice-Chairperson preferred the Office text.
- 633.** The amendment was rejected.
- 634.** Article 42 was adopted without amendment.

### ***Part VIII. Amendment of Annexes I and III***

#### Article 43

##### *D.155, D.161*

- 635.** The Worker Vice-Chairperson introduced two amendments the effect of which would be to include Annex II within the list of annexes in both the heading and the body of Article 43.
- 636.** The Government member of Norway, speaking on behalf of the Government group, supported both amendments.
- 637.** The Employer Vice-Chairperson also expressed support.

---

**638.** The amendments were adopted.

**639.** Article 43 was adopted as amended.

#### Bracketed figures

**640.** The Committee then turned to the question of the figures which remained in brackets.

**641.** The Employer Vice-Chairperson indicated that, at the outset of discussions, it had been considered fundamental to develop a Convention that did not make reference to vessel size. The Employers' group still considered this a vital issue and so proposed to replace the figure of 24 metres by 45 metres, throughout the Convention. Fishing vessels below 45 metres in length accounted for innumerable small fishing vessels and the majority of the world's fishing vessels in Asia, Africa and South America. The Convention should focus on the protection of those small-scale fishers who lived in unacceptable conditions, rather than fishers in developed countries who were already protected by relatively high standards. If the majority of the world's fishers did not benefit from the Convention, the Committee would not have fulfilled its mandate. If the figure of 45 metres replaced the figure of 24 metres, all the other provisions would still cover fishing vessels below 45 metres. Also, it should be noted that the previous Conventions and Recommendations on the fishing sector had received few ratifications as a result of being too prescriptive. Most member States who supported the figure of 24 metres, would later find it difficult to ratify the Convention.

**642.** The Government member of Japan supported the proposal of the Employers' group, since his delegation had great problems with the gross tonnage equivalent for 24 metres. He also stated that this amendment would facilitate worldwide ratification of the Convention.

**643.** The Worker Vice-Chairperson did not support the proposal of the Employers' group. The Workers' group supported removing the brackets and maintaining the figures as they appeared in the text.

**644.** The Government member of South Africa appreciated the sentiments of the Employers' group. However, modern fishing vessels of 45 metres in length could have at least 1,000 gross tons, and if these vessels flew a flag of convenience, fishers would suffer from exactly the conditions referred to by the Employers' group, despite working on board a large vessel.

**645.** The Government member of Brazil supported the position of the Workers' group. Fishing vessels below 24 metres would be covered by less stringent requirements, which would greatly facilitate ratification by developing countries.

**646.** The Government members of Algeria, Argentina, Cameroon, Mexico, Namibia, Portugal, Saudi Arabia, South Africa and the Bolivarian Republic of Venezuela, supported the deletion of the square brackets and the retention of the figures as they were in the text.

**647.** The Chairperson concluded that the majority of the Committee supported the deletion of the square brackets and the retention of the figures 24 and 45 metres, as they appeared throughout the text. It was so adopted.

**648.** The Employer Vice-Chairperson challenged the Governments that supported the inclusion of 24 metres throughout the Convention to ratify and apply the Convention.

---

## Final provisions

- 649.** The representative of the Legal Adviser provided clarification on the final provisions of the proposed Convention. Since the outset, the ILO had used standard final provisions that were not submitted to the standard-setting Committees. The Conference Drafting Committee added these standard final provisions to the proposed Convention as adopted by the standard-setting Committee. Nonetheless, certain parameters of the standardized final provisions were left open, such as the number of ratifications and the period of time required for the entry into force of the Convention and the time-span required for denunciation purposes. The standard final provisions usually provided that the Convention should come into force 12 months after the date on which the ratifications of two Members had been registered with the Director-General. The five fishing Conventions currently in force contained that standard provision. However, the number of months and of ratifications required constituted open parameters that the Committee could modify. In the framework of maritime Conventions, it was recognized that, in addition to the total number of ratifications required for a Convention's entry into force, a given number of these could be required to come from member States that fulfilled certain conditions, for example, member States whose merchant fleets represented a certain gross tonnage of shipping. In such cases, it was essential that any qualifying conditions concerning the necessary ratifications were based on objective criteria and easily applicable. If it so wished, the Committee could instruct the Drafting Committee as to the manner in which the open parameters should be fixed. This could be done at any time by means of a simple oral or written motion.
- 650.** The Chairperson invited the Legal Adviser to shed light on the impact of the adoption of the new Convention under discussion on the status of other international labour standards related to the fishing sector.
- 651.** The Legal Adviser noted that the Preamble of the draft Convention mentioned the need to revise the seven international instruments adopted specifically for the fishing sector to bring them up to date. Preambular paragraphs had no mandatory force, however. Should the Committee wish to decide that some or all of the Conventions listed in the Preamble were to be considered revised by the draft Convention, a provision to that effect would need to appear within the body of the Convention. The revised Conventions would be closed to further ratification once the new Convention came into force, although they would remain binding on those Members that had previously ratified them and did not ratify the new Convention. Only the new Convention would be open to ratification. The Committee would need to provide a clear indication as to which of the earlier Conventions had been revised by the new Convention and which, if any, were to remain open to ratification.
- 652.** In response to a query from the Government member of Greece, the Legal Adviser explained that the ratification of the new Convention would also entail automatic denunciation of the revised Convention(s) by the ratifying Member, unless the Committee wished to have a clause that provided otherwise included in the new Convention. The Drafting Committee would need clear guidance from the Committee on whether or not the new Convention revised any or all of the earlier Conventions and whether the ratification of the new Convention would entail the automatic denunciation of the revised Conventions.
- 653.** The Government member of Norway, speaking on behalf of the Government group, stated that the present Convention should revise all relevant Conventions and its ratification result in the denunciation of those Conventions for Members who had ratified them. However, the Fishermen's Competency Certificates Convention, 1966 (No. 125), should

---

not figure on the list of those to be revised by the new Convention, as the issues covered in Convention No. 125 had not been covered by the proposed Convention.

- 654.** The Worker Vice-Chairperson supported the view expressed by the Government member of Norway.
- 655.** In the light of these suggestions, the Legal Adviser proposed, for the Committee's consideration, the following text to be submitted as a new Article following Article 45 of the Convention: "This Convention revises the Minimum Age (Fisherman) Convention, 1959, the Medical Examination (Fishermen) Convention, 1959, the Fisherman's Articles of Agreement Convention, 1959, and the Accommodation of Crews (Fishermen Convention), 1966." If this new Article were adopted, the Committee might also wish to instruct the Conference Drafting Committee on a consequential revision to the 13th paragraph in the Preamble of the Convention, to replace the words "the seven" by "the following" in the first line and to delete "the Fisherman's Competency Certificate Convention, 1966".
- 656.** The Worker Vice-Chairperson supported the text proposed by the Legal Adviser. He noted however that the Vocational Training (Fishermen) Recommendation, 1966 (No. 126), should not be revised, since vocational training was not covered in the draft Convention.
- 657.** The Employer Vice-Chairperson supported the text proposed by the Legal Adviser, as well as the views expressed by the Workers' group.
- 658.** The Government member of Norway inquired whether it was appropriate to refer to Recommendations in the Preamble.
- 659.** The Legal Adviser recommended that the Hours of Work (Fishing) Recommendation, 1920 (No. 7), be considered as revised since the issue of hours of work had been dealt with in the draft Convention through its provisions on hours of rest, and the Recommendation adopted in 1920 was obsolete. The Vocational Training (Fishermen) Recommendation, 1966 (No. 126), however, concerned an issue that was not addressed in the proposed Convention or Recommendation. It was for the Committee to decide whether it should be maintained, as it was the only ILO instrument on that subject, or whether it should be considered as revised.
- 660.** The Government member of Norway stated that during its consultations, the Government group had not discussed whether the Accommodation of Crews (Fishermen) Convention, 1966 (No. 126), should be revised by the proposed Convention. It appeared logical, however, that it not be considered revised, given that the issue of vocational training was not covered in the proposed Convention.
- 661.** The Committee therefore adopted the text proposed by the Legal Adviser, and further agreed that the reference to the Accommodation of Crews (Fishermen) Convention, 1966 (No. 126), the 13th preambular paragraph, be removed.
- 662.** The Committee then considered the issue of entry into force of the proposed Convention.
- 663.** The Government member of Japan introduced a motion submitted by the Government members of China, Japan and the Philippines, requesting the Committee to "invite the Conference Drafting Committee to modify the standard final article governing entry into force of the Convention in order to provide that the Convention shall come into force 12 months after the date on which there have been registered with the Director-General, the ratifications by at least 15 coastal States representing 50 per cent of the total number of fishing vessels registered in coastal States worldwide." It was important for the new Convention to be supported by enough countries with large fishing capacity. Share of

---

vessels should be used as a criterion for entry into force. The International Convention on Standards of Training, Certification and Watchkeeping for Fishing Vessel Personnel (STCW-F), 1995, required ratification by 15 coastal States to enter into force. The United Nations Convention on the Law of the Sea (UNCLOS) required ratification by 60 countries for entry into force. If the Committee wished the Convention to be a truly international instrument that could be effectively implemented, it should adopt the motion submitted by the Government members of China, Japan and the Philippines.

- 664.** The Worker Vice-Chairperson said that it was not normal practice for ILO instruments to provide for entry into force in terms of a percentage. Moreover, the STCW-F Convention did not contain entry-into-force provisions based on percentages.
- 665.** The Government member of Norway stated that the present Convention was very different from the draft consolidated maritime labour Convention and that the introduction of a percentage would impede the entry into force of the proposed Convention and was therefore not desirable.
- 666.** In response to a query from the Employer Vice-Chairperson, the Legal Adviser said that the issue was not a legal one, but rather a matter for decision by the Committee, as there was no particular rule on entry into force of a Convention. Since standard final clauses were adopted in the 1920s, two member States had been considered to be a default number. Where there was no stipulation to the contrary, a Convention entered into force following its ratification by two member States. The Committee could choose whatever number it deemed appropriate. The Government member of Norway, speaking on behalf of the Government group, proposed that the Convention enter into force after ratification by ten countries, of which at least eight were coastal States.
- 667.** The Worker Vice-Chairperson supported the proposal made by the Government group.
- 668.** The Employer Vice-Chairperson supported the proposal of the Government members of China, Japan and the Philippines.
- 669.** The Government member of Namibia, speaking on behalf of the Government members of Cameroon, Côte d'Ivoire, Mauritania, Mozambique, Nigeria and South Africa, supported the Government group's proposal. The figures proposed were a compromise with which most Governments felt comfortable.
- 670.** The Government member of South Africa noted his country was emerging from an era of apartheid, and therefore fishers in that country were not covered by the older fishing instruments. As a result, his Government was very much committed to this process. He supported the proposal of the Government group.
- 671.** The Government members of Argentina, Belgium, Denmark, France, Greece, Netherlands, Portugal, Spain and the United Kingdom also supported the proposal of the Government group.
- 672.** The Government member of the Syrian Arab Republic said that, given the specificity of the fishing sector in Asian countries, his Government supported the motion presented by the Government members of China, Japan and the Philippines.
- 673.** The Chairperson concluded that the motion had not carried. He further concluded that a sufficient majority of the Committee members supported the Government group's proposal, which was adopted.

---

## **Annex I**

- 674.** Annex I was discussed in conjunction with Article 5, and the summary of the discussions is found under Article 5 of this report.

## **Annex II**

### Fisher's work agreement

#### *D.186, D.164*

- 675.** The Employer Vice-Chairperson proposed an amendment to the introductory phrase of paragraph 1, to add the words “or through collective agreement or by a written employment policy that is made available to the fisher”, after the word “regulations”. She then proposed a subamendment to replace the words “or through collective agreement or by a written employment policy that is made available to the fisher” by “or measures that are substantially equivalent, or through collective agreement, where applicable”.
- 676.** The Worker Vice-Chairperson proposed an amendment to insert the words “or a collective bargaining agreement”, at the end of the introductory phrase of paragraph 1. This was intended to reflect the fact that in some countries these matters were regulated by collective agreement.
- 677.** The Government member of Norway stated that the Government group supported the Workers’ amendment. The Employers’ initial proposal had raised some concern as to the implications of the phrase “written employment policy”, but the group had not had a chance to discuss the Employers’ subamendment.
- 678.** The Employer Vice-Chairperson explained that the “measures” referred to in her group’s subamendment would be measures regulated by government, not by industry. The Employers’ subamendment had removed the wording that had been of concern to the Government group.
- 679.** The Government member of France preferred the Workers’ amendment.
- 680.** The Employer Vice-Chairperson withdrew her group’s amendment and proposed a subamendment to add the words “where applicable” at the end of the Workers’ amendment.
- 681.** The amendment was adopted as subamended.

#### *D.168*

- 682.** The Government member of Denmark introduced an amendment submitted by the Government members of Denmark, Greece and Ireland to replace the last “and” in subparagraph 1(a) by “and/or”. Denmark had a system for uniquely identifying each fisher, without needing to specify the fisher’s birthplace.
- 683.** The Employer Vice-Chairperson requested clarification from the Office about the use of the term “and/or” in Conventions.
- 684.** A representative of the Legal Adviser confirmed that the term “and/or” should be avoided in ILO Conventions. It could usually be replaced by the simple “or”, which had an inclusive meaning. When the context required alternatives, one should rather resort to “either ... or”.

- 
- 685.** The Worker Vice-Chairperson opposed the amendment as unnecessary.
- 686.** The Government member of Norway stated that the Government group had agreed to support the amendment.
- 687.** The Employer Vice-Chairperson stated that, in view of the explanation from the Office, it should be possible to retain the original text for subparagraph 1(a).
- 688.** The Government member of the Bahamas noted that there had been much talk in the Committee relating to social security and problems related to the repatriation of social security income to the worker's country of origin. He expressed concern about how the proposed amendment might affect the payment of social security benefits if countries issued work agreements in which the place of birth of the fisher could not be identified.
- 689.** The Government member of Spain suggested that the problem raised by the Government member of Denmark might be addressed by adding the words "as necessary" at the end of subparagraph 1(a).
- 690.** The Worker Vice-Chairperson pointed out that within the introductory portion of paragraph 1, the phrase "except in so far as the inclusion of one or more of them is rendered unnecessary" might offer the flexibility being sought by the Government member of Denmark.
- 691.** The Government member of Denmark agreed that paragraph 1 might indeed provide the solution and, in light of the explanation provided by the Office regarding the use of "and/or", he withdrew the amendment.

*D.165*

- 692.** The Worker Vice-Chairperson introduced an amendment to insert the words "and the registration number of the vessel or vessels" before the words "on board" in subparagraph 1(c). He argued that vessel names were not unique, but registration numbers were.
- 693.** The Government member of Norway stated that the Government group had agreed to support the amendment.
- 694.** The Employer Vice-Chairperson asked for clarification as to which registration number should be used. Would fishers have to change their work agreements each time they changed vessels?
- 695.** The Worker Vice-Chairperson said that it was important that the work agreement be changed in accordance with the vessel.
- 696.** An Employer member from the Netherlands pointed out that there were several registration number systems, and indeed the same vessel could be registered in various countries under different numbers. He asked whether the Worker Vice-Chairperson was referring to IMO registration numbers.
- 697.** The Worker Vice-Chairperson replied that IMO registration numbers were not valid for fishing vessels.
- 698.** The amendment was adopted.

---

*D.166*

- 699.** The Government member of the United Kingdom observed that in subparagraph 1(k) the current text referred to “insurance”. She introduced an amendment submitted by the Government members of Finland, France, Germany, Greece, Ireland, Netherlands, Norway, Portugal, Spain, Sweden and the United Kingdom to replace the word “insurance” with the word “protection”. The term “protection” was broader and provided other options for social security.
- 700.** The Employer Vice-Chairperson supported the amendment for the same reasons stated by the Government member of the United Kingdom.
- 701.** The Worker Vice-Chairperson preferred the original text, and felt that the term “protection” was too broad and vague. Financial security protection was the heart of the matter.
- 702.** The Government member of Norway reported that the Government group had agreed to support the amendment.
- 703.** The Government member of Egypt preferred the Office text. He believed that protection should in fact be provided through a social security system that covered all citizens.
- 704.** The Government member of the United Kingdom observed that the title of Article 37 was “Protection in the case of work-related sickness, injury or death”. Protection was the right word to use.
- 705.** The Worker Vice-Chairperson, after hearing the comments of the Government member of the United Kingdom, proposed a subamendment to replace the word “insurance” by the words “financial security protection”.
- 706.** The Employer Vice-Chairperson opposed the subamendment.
- 707.** The amendment was adopted.

*D.191, D.188, D.190*

- 708.** The Employer Vice-Chairperson withdrew amendments D.191, D.188, and D.190 in light of the reorganization of Annex II, which had resulted from the adoption of Article 20 as amended. In her view, the reordered Annex II, which had been provided for illustrative purposes in amendment D.176, rather than the Office text, should be the basis for the current discussion.
- 709.** To clarify the situation, the representative of the Secretary-General stated that through its adoption of Article 20 as amended, the Committee had made its intentions clear as to its objective for the second part of Annex II, which was to delete the chapeau of paragraph 2 and add the remaining subparagraphs to paragraph 1. The question was how to achieve it. The Committee agreed to continue discussions on this basis. That text and all subsequent agreed changes would be referred to the Drafting Committee for determination of the order of the subparagraphs.

*D.167*

- 710.** The Government member of Greece presented an amendment submitted by the Government members of Belgium, Denmark, Finland, France, Germany, Greece, Ireland,

---

Netherlands, Norway, Portugal, Sweden and the United Kingdom to delete the words “or maximum hours of work per day and per week” in subparagraph 2(e).

**711.** The Worker Vice-Chairperson, the Employer Vice-Chairperson and the Government member of Norway, speaking on behalf of the Government group, all supported the amendment, which was adopted.

**712.** Annex II was adopted as amended.

### ***Annex III***

**713.** Discussion of Annex III was based on document C.S.P./219, which contained the recommended text of the Working Party on Articles 25-28 and Annex III. That text was treated as a global amendment open to subamendment by the Committee. The Chairperson observed that the Working Party had reached consensus on paragraphs 2-5, 7, 9, 11-16 and 18- 22. The Committee adopted these paragraphs.

**714.** The Employer Vice-Chairperson noted that there was still an issue pending regarding paragraph 23. Referring to the report of the Chairperson of the Working Party, she stated that the Employers’ group had understood there would no longer be any references to working areas and working spaces. Yet paragraph 23, as found in document C.S.P./D.219, maintained such a reference.

**715.** The Government member of the United Kingdom explained that the remaining reference was an oversight by the Working Party. To resolve the issue, he suggested subamending paragraph 23 by ending the sentence immediately after the words “control room”. The words “where applicable” at the end of the paragraph did not need to be retained as they had only referred to the preceding words, “work areas”.

**716.** The Government member of Brazil, as Chairperson of the Working Party, pointed out that there had been no amendment presented to the Working Party on paragraph 23. She noted that the only difference between the text agreed upon by the Working Party and the Office text was the removal of the reference to gross tonnage.

**717.** The Government member of Spain suggested subamending the text as follows: “For vessels of 24 metres in length and over, with the exception of those regularly engaged in areas where temperate climatic conditions do not require it, air conditioning shall be provided in accommodation spaces.” Furthermore, the provision, as subamended by the Government member of the United Kingdom, still dealt with spaces other than accommodation spaces. Thus, it encroached upon the scope of Annex III, which referred only to accommodation.

**718.** The Government member of the United Kingdom noted that the paragraph on heating and air conditioning was meant to cover all areas, especially working spaces. The proposal from the Government member of Spain would have the effect of making heating and air conditioning optional in areas such as the bridge, the radio room and any centralized machinery control room, as well as in working spaces. The Working Party had not meant to change the intent of the paragraph in this manner.

**719.** The Worker Vice-Chairperson expressed his support for the proposal of the Government member of the United Kingdom. Clearly, air conditioning and heating should also be provided on the bridge, the radio room and any centralized machinery control room.

**720.** In view of the statements made, the Government member of Spain withdrew the subamendment he had proposed.

- 
- 721.** The Employer Vice-Chairperson and the Government members of Denmark, France, Namibia and South Africa supported the subamendment proposed by the Government member of the United Kingdom.
- 722.** The Committee adopted the subamendment.
- 723.** The Committee adopted paragraph 23, as subamended.
- 724.** The Committee adopted paragraphs 24-30, 35, 37, 38, 40-42, 44-53, 55, 58, 60-69, 71, 73, 74, 76, and three new unnumbered paragraphs proposed by the Working Party.
- 725.** In response to a question from the Government member of Japan, the Chairperson pointed out that the current discussion only concerned the placement of the provision on equivalences of tonnage and length. The discussion on the provision's substance could not be re-opened by the Committee, since it had already been addressed and decided upon.
- 726.** The Committee then considered the paragraphs in Annex III on which there had not been consensus in the Working Party.

*Paragraph 1*

*D.79*

- 727.** The Government member of Japan introduced a subamendment, submitted by China, Indonesia and Japan to insert the words “, as far as possible according to the condition of the Member,” in paragraph 1, after the words “fishing vessels”. The subamendment was intended to provide additional flexibility, thus allowing for wide ratification of the Convention.
- 728.** The Government member of the United Kingdom reminded the Committee of the discussion on the subamendment to Article 28 and suggested that this subamendment should be rejected for the same reasons.
- 729.** A Worker member from Argentina agreed with the Government member of the United Kingdom and opposed the subamendment. The text agreed upon by the Working Party should be retained.
- 730.** The Government member of China insisted on the subamendment and hoped the Committee would consider it favourably.
- 731.** The Chairperson concluded that a sufficient majority of the Committee members opposed the subamendment, which was not adopted.
- 732.** The Committee adopted paragraph 1, as proposed by the Working Party.

*Paragraph 6*

- 733.** An Employer member from Canada introduced a subamendment to delete the words “the crew accommodation of a vessel has been reconstructed or substantially altered” and replace the words “such vessel” by the words “such new vessel”. This would effectively remove the requirement for existing fishing vessels to comply with the provisions of Annex III in case of reconstruction or substantial alteration of their crew accommodation. Paragraph 1 of Annex III still enabled the competent authority to apply the provisions of Annex III to existing vessels, when and in so far as it determined that this was reasonable and practicable. While paragraph 1 allowed such an extension, paragraph 6 imposed it,

---

thus limiting the market for such vessels and increasing costs. Paragraph 6 should, therefore, only relate to new fishing vessels.

- 734.** A Worker member from Argentina disagreed with the proposed subamendment. Paragraph 1 established that Annex III would apply only to new fishing vessels, unless the competent authority extended it to existing fishing vessels. This extension could only be done in a limited manner, since imposing new requirements to vessels already in use involved substantial changes. However, in the case of rebuilding, fishing vessels should cater for the requirements of the Convention.
- 735.** An Employer member from Canada agreed that, where possible, fishing vessels where the crew accommodation was reconstructed or substantially altered should be brought into conformity with the requirements of the Convention. However, to impose this in all cases was unacceptable. Fishing vessels were sometimes altered for commercial reasons, with the effect of the crew accommodation being altered, but this did not mean these fishing vessels were in a position to meet the requirements of the Convention. If compliance was possible, paragraph 1 enabled the competent authority to extend Annex III to these fishing vessels. A forced extension would increase costs and have the indirect effect that existing modified fishing vessels would not be available for use in developing countries.
- 736.** The Government member of the United Kingdom appreciated the concerns raised but believed that the Employers referred to subsequent alterations of crew accommodation arising from other alterations, and not to “substantial alterations”. It was common practice, in the case of real substantial alterations, to make every effort to meet the new requirements. This was a standard phrase in international legislation.
- 737.** An Employer member from Canada indicated there was no commonly agreed upon definition of “substantial alteration”. Some administrations considered the subsequent alterations of crew accommodation as a result of commercial alterations to be substantial alterations.
- 738.** The Government member of Denmark stated that, in the context of the grandfather clause of the International Convention for the Safety of Life at Sea, the IMO had issued a circular describing the term “substantial alteration”, which was used by most administrations.
- 739.** The Government member of Egypt supported the subamendment, as the application of Annex III to existing fishing vessels would create practical difficulties.
- 740.** The Government member of Germany felt the problem was resolved by the new paragraph in Article 28.
- 741.** An Employer member from Canada found that the new paragraph in Article 28 did not address the Employer members’ concerns, since the competent authority would have to interpret it and vessel operators were not necessarily aware of the requirements.
- 742.** The Government member of the United Kingdom considered that there was scope in paragraph 6 to provide that the competent authority should take its decision after consultations. This would accommodate the Employers’ concerns, since fishing vessel owners and the competent authority would decide to what extent compliance with the requirements was practicable.
- 743.** Following consultations, an Employer member from Canada introduced a subamendment to replace paragraph 6 with:

---

The competent authority shall satisfy itself that, on every occasion when a vessel is newly constructed or the crew accommodation of a vessel has been reconstructed, such a vessel complies with the requirements of this Annex. The competent authority shall, to the extent practicable, require compliance with this Annex for a vessel that changes the flag it flies to the flag of a Member, or when the crew accommodation is substantially altered.

**744.** The Worker Vice-Chairperson and the Government members of Algeria, France, Republic of Korea, Norway, Saudi Arabia and the United Kingdom expressed their support for the subamendment.

**745.** The subamendment was adopted.

**746.** Paragraph 6 was adopted as subamended.

#### *Paragraph 8*

**747.** In view of the adoption of paragraph 6, the Employer members supported the text of paragraph 8.

**748.** Paragraph 8 was adopted.

#### *Paragraph 10*

##### *D.82*

**749.** A subamendment (D.82) was not seconded and therefore not discussed.

**750.** The Employer Vice-Chairperson presented a subamendment to delete the word “limited” in the second sentence of paragraph 10 in order to meet some of the concerns of certain Asian countries.

**751.** The Worker Vice-Chairperson considered that the original text afforded ample leeway and did not support the subamendment.

**752.** The Government member of Norway believed that, taken in conjunction with the new paragraph in Article 28, paragraph 10 provided sufficient flexibility.

**753.** The Government member of Germany emphasized that the concept of “substantial equivalence” introduced in the new paragraph in Article 28 was of the utmost importance. If the headroom of 190 cm was sufficient for Japanese fishers, then the Convention should provide for the necessary flexibility for Japan and other countries to be able to ratify.

**754.** The Government member of Japan supported the subamendment presented by the Workers’ group and recalled that paragraph 10 had not been unanimously agreed upon at the Tripartite Meeting of Experts in December 2004.

**755.** The Government member of Namibia opposed the subamendment, as the concept of substantial equivalence was sufficiently explicit in this provision.

**756.** The Government member of China thanked the Government member of Germany for stressing the need for flexibility and confirmed that the prescriptive paragraphs in the Convention relating to headroom and size of beds did not take into account the national contexts of certain Asian countries.

**757.** The Government member of Greece observed that the concept of substantial equivalence had been accepted by all member States that had ratified the Merchant Shipping (Minimum

---

Standards) Convention, 1976 (No. 147), among which figured Japan. Specific figures were contained in the Accommodation of Crews Convention (Revised), 1949 (No. 92), which appeared in the Appendix to Convention No. 147.

**758.** The Government member of the United Kingdom pointed out that the Government of Japan, in its comments on the proposed Convention and Recommendation reproduced in Report V(A), had urged the inclusion of the concept of substantial equivalence for the purpose of widespread ratification.

**759.** The representative of the Legal Adviser stated that the concept of substantial equivalence in Article 28 of the Convention only applied to Annex III. The concept appeared in Article 2 of Convention No. 147 under which each ratifying Member undertook to satisfy itself that its laws and regulations on safety standards, social security measures and shipboard conditions of employment and shipboard living arrangements were substantially equivalent to the Conventions or Articles of Conventions referred to in the Appendix to that Convention. In practice, that meant that the Member was permitted to achieve the goals of the Convention by means other than those specified within the detailed provisions of the Convention. The Member's compliance might be subject to monitoring, however, and it was for the Member to prove that the goals of the Convention had been achieved.

**760.** Paragraph 10 of Annex III was adopted without amendment.

*Paragraph 17*

*D.84*

**761.** A subamendment (D.84) was not seconded and therefore not discussed.

*D.64*

**762.** A Worker member from Argentina withdrew a subamendment (D.64), since text on working spaces had been included in the general clauses.

**763.** The Employer Vice-Chairperson introduced a subamendment to insert "develop and" after "the competent authority shall". Since no standards for vibration in accommodation spaces existed, these needed to be developed.

**764.** The Government member of Norway opposed the Employers' group's proposal. The resulting wording would put an obligation on competent authorities to develop standards themselves. The original wording allowed for the adoption of standards developed elsewhere but did not preclude the development of national standards.

**765.** The Government members of the Bahamas and the Syrian Arab Republic and a Worker member from Argentina supported the Norwegian position.

**766.** The Employer Vice-Chairperson withdrew her group's proposal.

**767.** Paragraph 17 was adopted.

*Paragraph 31*

*D.93*

**768.** The Government member of Japan introduced a subamendment (D. 93), seconded by the Government member of China, to delete the words "which are not less than [100] gt but which are less than [45] metres in length and less than [500] gt" after the word "over" from

---

paragraph 31 and at the end of the paragraph to add the following: “For vessels of less than [45] metres in length, the competent authority, after consultation, may permit some limited reduction in the floor area per person of sleeping rooms in particular cases if the size and type of intended service of the vessel make the requirements unreasonable or impracticable.” The requirements currently envisaged in the Convention were too high and did not suit the conditions on Asian vessels. The subamendment would provide flexibility and thus help States to implement the Convention.

**769.** The subamendment was not adopted.

*D.52*

**770.** A Worker member from Argentina introduced a subamendment to replace “[1]” by “1.5”. The aim was to increase the per person living space on board. This was a very sensitive and important issue for fishers. This subamendment reflected the considerable increase of area available on ships, following the prior decision on tonnages. The Committee had an opportunity to improve substantially the living and accommodation conditions of fishers.

**771.** The Government member of China opposed the subamendment, since the resulting requirements were not suitable for Asian vessels.

**772.** The Government members of Japan and the Republic of Korea supported the Chinese position. The proposed dimensions were much larger than those contained in the Accommodation of Crews (Fishermen) Convention, 1966 (No. 126). If adopted, they would create a major obstacle for ratification.

**773.** The Government member of Norway informed the Committee that a clear majority of Government members supported the subamendment.

**774.** The Government member of Lebanon supported the amendment. When considering human comfort in sleeping areas, no distinction could be made according to vessel size.

**775.** The subamendment was adopted.

**776.** Paragraph 31 was adopted as subamended.

*Paragraph 32*

*D.100*

**777.** A subamendment (D.100) was not seconded and therefore not discussed.

*D.55*

**778.** A Worker member from Argentina introduced a subamendment to replace “[1.5]” by “2”. The reasons were the same as those stated for paragraph 31.

**779.** The Government member of Norway, speaking on behalf of the Government group, indicated that a clear majority of Government members supported the proposal.

**780.** An Employer member from Canada objected to the subamendment and referred to the previous intervention of the Government member of Lebanon. There should be no distinction as to comfort between fishing vessels of 24 m and fishing vessels of 45 m in length or over. The appropriate standard for smaller vessels was also suitable for the larger ones. Furthermore, larger rooms led to fishing vessels with greater gross tonnage but less fishing capacity. The speaker noted that various jurisdictions had rules and regulations

---

regarding fishing capacity in relation to gross tonnage. Moreover, the serious concerns raised by the Asian countries should be taken into account in order not to impede ratification.

**781.** The Government member of France considered that, according to the length-gross tonnage equivalents adopted, the gross tonnage of vessels of 45 m (700 gt) was four times greater than the gross tonnage of vessels of 24 m (175 gt), while the per person floor area on the larger vessels would only be increased by one third. The argument of the Employers' group was therefore not convincing.

**782.** The Government member of Lebanon opposed the subamendment reiterating his views regarding comfort.

**783.** The Government member of the Republic of Korea opposed the subamendment in light of the size of fishing vessels in his country.

**784.** The subamendment was adopted.

**785.** Paragraph 32 was adopted as subamended.

### *Paragraph 33*

#### *D.87*

**786.** The Government member of Japan introduced a subamendment submitted by the Government members of Japan and the Republic of Korea to add, after the word "persons", the words "as far as practicable" in paragraph 33. The addition would make the provision more flexible and thus facilitate ratification.

**787.** The subamendment was not adopted.

**788.** Paragraph 33 was adopted without amendment.

### *Paragraph 34*

#### *D.86*

**789.** A subamendment (D.86) was not seconded and therefore not discussed.

**790.** The Government member of Norway, speaking on behalf of the Government group, proposed a subamendment to delete the words "but which are less than 45 metres in length".

**791.** The Government member of the United Kingdom believed that the present wording of paragraph 34 was the result of a consequential amendment relating to gross tonnage that offered the possibility to choose between fishing vessels of 24 m and 45 m in length. The Government group had agreed to the deletion of the words "but which are less than 45 metres in length", since, otherwise, Annex III would contain no requirements concerning the number of persons per sleeping room for fishing vessels of 45 m in length and over.

**792.** In response to a request for clarification from an Employer member from Canada, the representative of the Secretary-General reminded the Committee that paragraph 34 of the Office text had not accurately reflected the results of the Meeting of Experts held in December 2004. The intention was to have two alternatives.

---

**793.** The subamendment was adopted.

*D.56*

**794.** A Worker member from Argentina introduced a subamendment to replace the words “not be more than four persons” by “generally be two persons and, at a maximum, four persons”. The space required for two two-person cabins was not much more than that required for one four-person cabin, but such a provision would certainly improve the conditions.

**795.** An Employer member from Canada sought clarification from the Office as to the legal meaning of “shall generally be”.

**796.** The representative of the Legal Adviser advised that this meant “in the absence of exceptional circumstances”.

**797.** An Employer member from Canada, speaking on behalf of the Employers’ group, opposed the subamendment on the basis that it would have a negative impact on the development of fisheries.

**798.** The Government members of Argentina, Brazil, Denmark, Philippines and Spain supported the amendment.

**799.** The Government members of Cameroon, France, Japan, Kenya, Republic of Korea, Mauritania, Mozambique, Namibia, Nigeria, South Africa and the Syrian Arab Republic preferred the text proposed by the Working Party.

**800.** The Government member of the United Kingdom, although sympathizing with the Worker members’ subamendment, could not support it. He suggested that the provision be shifted to the Recommendation, a proposal supported by both the Workers’ and the Employers’ groups.

**801.** The subamendment was adopted and referred to the Drafting Committee for appropriate rewording and placement in the Recommendation.

*D.57*

**802.** A Worker member from Argentina withdrew a subamendment (D.57).

**803.** Paragraph 34 was adopted as amended.

*Paragraph 36*

*D.58, D.59*

**804.** A Worker member from Argentina withdrew two subamendments (D.58 and D.59).

**805.** Paragraph 36 was adopted without amendment.

*Paragraph 39*

*D.90*

**806.** A subamendment (D.90) was not seconded and therefore not discussed.

---

*D.61, D.98*

- 807.** A Worker member from Argentina introduced a subamendment to replace “[190]” by “198” and replace “[68]” by “80”. The aim of the subamendment was to increase the size of berths.
- 808.** The Government member of Norway explained that a clear majority of the Government group had supported this subamendment as well as a similar subamendment (D.98) on the length of berths submitted by a number of Government members. The Government group favoured increasing berth sizes.
- 809.** The Government member of Japan opposed the subamendment because the proposed dimensions were too large for Asian people. When ships rolled in rough seas, fishers would slide about in their berths. This sideways movement was uncomfortable and not desirable.
- 810.** The Government member of China agreed.
- 811.** The subamendment was adopted and that of the Government members withdrawn.
- 812.** An Employer member from Canada, while acknowledging the majority support the subamendments had received, expressed his group’s reservations with regard to this decision. He regretted that the needs of the Asian countries seemed to be ignored by the Committee and foresaw problems for the ratification of the Convention. The Employers’ group had suggested shifting the provision to the Recommendation.
- 813.** Paragraph 39 was adopted as amended.

*Paragraph 43*

*D.99*

- 814.** The Government member of France introduced a subamendment, submitted by the Government members of Belgium, Denmark, Finland, France, Germany, Greece, Netherlands, Norway, Portugal, Sweden and the United Kingdom, to delete “, and shall be provided on vessels of [24] metres in length and over which are not less than [100] gt”. The amendment sought to remove the proposed requirement for larger vessels to provide separate sleeping rooms for men and women fishers. Given the very limited number of women fishers, such a provision might lead to further discrimination against women fishers, something the sponsors of the subamendment strongly objected to.
- 815.** The Government member of Norway said that the Government group supported the subamendment.
- 816.** A Worker member from Argentina proposed a further subamendment to move the paragraph to the Recommendation with the following wording: “Separate sleeping rooms for men and women should be provided on vessels of 24 metres in length and over.”
- 817.** The Employer Vice-Chairperson supported the proposal.
- 818.** The Government member of Norway, speaking on behalf of the Government group, was confident that Governments could support the proposal.
- 819.** The subamendment was adopted.
- 820.** Paragraph 43 was adopted as amended and moved to the Recommendation.

---

*Paragraph 54*

*D.83*

**821.** The Government member of Japan introduced a subamendment submitted by the Government members of Japan and the Republic of Korea to replace the existing text in Paragraph 54 of the conclusions of the Working Party by the following:

On vessels of 24 metres in length and over, for all fishers who do not occupy rooms to which sanitary facilities are attached, there shall be provided at least one tub or shower or both and one toilet for every eight persons or fewer, and one washbasin for every six persons or fewer. The competent authority, after consultation, may establish alternative requirements to the above requirement in particular cases if the size and type of intended service of the vessel make the requirements impracticable.

**822.** The exceptions contained in the proposal corresponded to those adopted in the framework of the Accommodation of Crews (Fishermen) Convention, 1966 (No. 126), and the FAO/ILO/IMO Code of Safety for Fishermen and Fishing Vessels. The current wording of paragraph 54 imposed overly strict conditions without providing for exceptions. While paragraph 2 of Article 28 of the Convention allowed for substantial equivalence, it could not be applied in the case of paragraph 54 of Annex III. The frequency of visiting sanitary facilities was the same in all countries.

**823.** The subamendment was not adopted.

*D.75*

**824.** A Worker member of Argentina introduced a subamendment submitted by the Workers' group to add the sentence "Separate sanitary facilities shall be provided for woman fishers." at the end of paragraph 54. He suggested a further subamendment to move the sentence to the Recommendation using the word "should" instead of "shall".

**825.** The Employer Vice-Chairperson agreed with the proposal.

**826.** The Government member of Norway, speaking on behalf of the Government group, was confident that Governments could support the proposal, considering that paragraph 50 already provided that sanitary facilities used by women fishers should allow for reasonable privacy.

**827.** The subamendment was adopted.

**828.** Paragraph 54 was adopted as amended and moved to the Recommendation.

**829.** Paragraphs 56 and 57 were adopted.

*Paragraph 59*

**830.** An Employer member from Canada proposed a subamendment to replace "sick bay" with the phrase "cabin designated for fishers who suffer illness or injury" and to add the words "in accordance with national standards" after the words "properly equipped ". While the Employers' group did not disagree with the intent of the provision, there was a lack of clarity regarding the definition of "sick bay".

**831.** The Government member of France preferred the Working Party text. He also remarked that the Working Party text for paragraph 58 no longer contained the word "isolated" and the subamendment to paragraph 59 removed the word "separate".

- 
- 832.** The Government member of South Africa could not support the subamendment; there had to be a dedicated sick bay or hospital on large vessels, not a mere cabin.
- 833.** The Government member of Brazil agreed with the Government member of South Africa. As Chairperson of the Working Party, she confirmed that the Working Party had decided to remove the word “isolated” from paragraph 58, but there had been no consensus on paragraph 59.
- 834.** An Employer member from Canada drew a distinction between paragraphs 58 and 59. Paragraph 58 required that a cabin be made available to a fisher who suffered an illness or injury. This cabin did not necessarily need to be a designated sick bay. Paragraph 59 required that a separate sick bay be available. There was no dispute with the idea that a facility had to be available. What was unclear was the meaning of “sick bay”. It was important to remember that the Convention sought to establish minimum standards. Some modern 60-70 metre long vessels did not have hospitals or sick bays, and could be run efficiently for health purposes. A designated cabin could be supplied with oxygen and first aid materials such as bandages. Medicines might be kept separately, for instance in the captain’s cabin.
- 835.** In reference to the comment of the previous speaker, the Government member of Greece noted these provisions would apply to new fishing vessels.
- 836.** An Employer member from Canada requested a definition of “sick bay”.
- 837.** The Government member of the United Kingdom stated that a sick bay was a cabin that was used for no other purpose. This definition had long existed. Also, the issue of medical supplies was adequately covered in Article 29, subparagraph (c).
- 838.** An Employer member from Canada noted that Article 29, subparagraph (c), could be interpreted as saying that medical supplies would be carried on board, but not necessarily in the sick bay or designated cabin.
- 839.** The Government members of Argentina, France, South Africa, United Kingdom and Uruguay preferred the term “sick bay”.
- 840.** An Employer member from Canada said that the term “sick bay” as defined by the Government member of the United Kingdom was acceptable to his group.
- 841.** The subamendment was not adopted.
- 842.** Paragraph 59 was adopted.

#### *Paragraph 70*

- 843.** Paragraph 70 was adopted, on the understanding that the question of “drinking water” as opposed to “potable water” would be referred to the Drafting Committee.

#### *Paragraph 72*

- 844.** An Employer member from Canada stated that his group withdrew the objection it had formulated in the Working Party.
- 845.** Paragraph 72 was adopted.

---

*Paragraph 75*

*D.74*

- 846.** A Worker member from Argentina withdrew a subamendment before it was discussed.
- 847.** An Employer member from Canada proposed deleting the last sentence of the paragraph, as it could entail unnecessary paperwork for owner-operated coastal vessels, where such inspections were carried out routinely and corrective steps taken before the vessel left the port.
- 848.** The Government members of France and South Africa observed that the recording of inspections was standard practice in the majority of maritime acts and should not create undue administrative burdens.
- 849.** In the absence of any statements of support for the subamendment, the Chairperson concluded that it was not adopted.
- 850.** Paragraph 75 was adopted.
- 851.** Annex III, as proposed by the Working Party and subamended by the Committee, was adopted.

**Consideration of the proposed Recommendation  
concerning work in the fishing sector**

***Part I. Conditions for work on board fishing vessels***

Protection of young persons

*Paragraphs 1 to 5*

- 852.** Paragraphs 1 to 5 were adopted without amendment.

Medical examination

*Paragraphs 6 to 10*

- 853.** Paragraphs 6 to 10 were adopted without amendment.

Competency and training

*Paragraph 11*

- 854.** Paragraph 11 was adopted without amendment.

*Paragraph 12*

*D.203*

- 855.** The Government member of the United Kingdom introduced an amendment submitted by the Government members of Finland, France, Germany, Greece, Ireland, Netherlands, Norway, Portugal, Spain, Sweden and the United Kingdom to delete Paragraph 12, because the matter was already adequately covered in the Convention.

---

**856.** The Worker Vice-Chairperson, the Employer Vice-Chairperson and a clear majority of the Government group supported the amendment.

**857.** The amendment was adopted and Paragraph 12 was deleted.

## ***Part II. Conditions of service***

Record of service

### *Paragraph 13*

*D.209*

**858.** The Employer Vice-Chairperson introduced an amendment to replace the word “voyage” by “contract” both times it appeared in Paragraph 13. Fishers worked under contract and many voyages could be undertaken under a single contract. A record of service would be more appropriately established on the basis of the whole contractual period.

**859.** The Worker Vice-Chairperson could not agree with the proposal. A new term, “contract”, was being introduced.

**860.** The Government member of Norway stated that a clear majority of the Government group supported the amendment.

**861.** The amendment was adopted.

**862.** Paragraph 13 was adopted as amended.

Special measures

### *Paragraph 14*

**863.** Paragraph 14 was adopted.

Payment of fishers

### *New Paragraph before Paragraph 15*

*D.201*

**864.** The Government member of France introduced an amendment jointly submitted with the Government member of Denmark to insert a new Paragraph before Paragraph 15 under the heading “Payment of fishers” to read as follows: “Collective agreements or measures adopted by the competent authority shall ensure advances against earnings for fishers under prescribed conditions.” Irregular payment of wages was a problem in the sector. The speaker subamended the French version of the text.

**865.** The Worker Vice-Chairperson supported the amendment as subamended.

**866.** The Government member of Norway noted that the Government group had supported the intent of the amendment, but not the wording. Speaking on behalf of the Government group, he proposed a subamendment, which read as follows: “Fishers should have the right to advances against earnings under prescribed conditions.”

**867.** The Employer Vice-Chairperson supported the Government group’s subamendment as did the Worker Vice-Chairperson.

---

**868.** The amendment was adopted as subamended.

**869.** The new Paragraph before Paragraph 15 was adopted.

*Paragraph 15*

*D.208*

**870.** The Employer Vice-Chairperson introduced an amendment to add the words “If applicable” at the beginning of Paragraph 15.

**871.** The Worker Vice-Chairperson opposed the amendment as did the Government member of Norway, speaking on behalf of the Government group.

**872.** The Employer Vice-Chairperson withdrew the amendment.

*D.207*

**873.** The Employer Vice-Chairperson introduced an amendment to delete the words “or those engaged on international voyages”. Since many countries would make use of the Recommendation as guidelines, the reappearance of the term “international voyage” could create problems. The original wording suggested that vessels of less than 24 metres length that undertook international voyages were also targeted by this provision. This needed to be rectified in order to protect workers on small fishing vessels, which might undertake international voyages.

**874.** The Worker Vice-Chairperson supported the amendment.

**875.** The Government member of Norway said that the Government group supported the amendment.

**876.** The amendment was adopted.

*D.199*

**877.** The Worker Vice-Chairperson noted that nowhere in the present text was the regularity of payments mentioned. Yet regular payments were important to fishers so that they could meet their obligations at home. He, therefore, proposed to insert the word “regular” after the word “minimum”.

**878.** The Government member of Norway stated that the Government group did not support the amendment.

**879.** The Employer Vice-Chairperson also opposed the amendment.

**880.** The Worker Vice-Chairperson withdrew the amendment.

**881.** Paragraph 15 was adopted as amended.

***Part III. Accommodation***

*Paragraphs 16 to 18*

**882.** Paragraphs 16 to 18 were adopted without amendment.

---

## Design and construction

### *Paragraphs 19 to 21*

**883.** Paragraphs 19 to 21 were adopted without amendment.

## Noise and vibration

### *Paragraph 22*

#### *D.206*

**884.** The Employer Vice-Chairperson introduced an amendment to delete the word “and” after the word “workplace” and to delete the rest of the sentence after the words “where applicable”. The reference to “specific protection” was unclear and needed to be explained

**885.** The Government member of Norway said that a clear majority in the Government group was against the amendment. The IMO reference offered helpful guidance and should be kept.

**886.** The Worker Vice-Chairperson agreed with the Government member of Norway and opposed the amendment.

**887.** A member of the secretariat explained that during the Tripartite Meeting of Experts on the Fishing Sector held in December 2004, experts had raised the issue of noise and vibration and had suggested that IMO Resolution A.468(XII) – Code on Noise Levels on Board Ships was relevant and should be referred to in the recommendatory provisions.

**888.** The amendment was not adopted.

#### *D.205*

**889.** The Worker Vice-Chairperson stated that many fishers were regularly exposed to vibrations over long periods of time, with negative effects on their health, making it necessary to include this issue in the Recommendation. He therefore introduced an amendment to insert the following Paragraphs after Paragraph 22:

1. The competent authority in each Member, in conjunction with the competent international bodies and with representatives of organizations of fishing vessel owners and fishers and taking into account, as appropriate, relevant international standards, should review on an ongoing basis the problem of vibration on board fishing vessels with the objective of improving the protection of fishers, as far as practicable, from the adverse effects of vibration.

2. Such review should cover the effect of exposure to excessive vibration on the health and comfort of fishers and the measures to be prescribed or recommended to reduce vibration on fishing vessels to protect fishers.

3. Measures to reduce vibration to be considered should include the following:

- (a) instruction of fishers in the dangers to their health of prolonged exposure to vibration;
- (b) provision of approved personal protective equipment to fishers where necessary;
- (c) assessment of risks and reduction of exposure in sleeping rooms, mess rooms, recreational accommodation and catering facilities and other fishers accommodation by adopting measures in accordance with the guidance provided by the ILO Code of practice on ambient factors in the workplace and subsequent revisions, taking into account the difference between exposure in the workplace and in the living space.

- 
- 890.** The Employer Vice-Chairperson supported the inclusion of a Paragraph on vibration, but felt that the suggested text was too detailed. She therefore suggested a subamendment to delete Paragraphs 2 and 3.
- 891.** The Government member of Norway explained that the Government group had supported the amendment's intent, but their opinions were divided as to the actual content. Some felt that the wording was too prescriptive, others thought it provided the right amount of detail.
- 892.** The Government member of the Bolivarian Republic of Venezuela opposed the subamendment, stating this issue was linked with the Committee's previous discussions on the protection of workers from occupational health problems and needed to be given due consideration. Paragraphs 2 and 3 highlighted the important issues of prevention and protection from risk, and so needed to be retained.
- 893.** The Government member of Norway opposed the subamendment, noting that noise and vibration were concerns for the safety and health of fishers and for effective fishing. These recommendatory provisions provided important information on prevention measures.
- 894.** The Government members of Denmark and Spain opposed the subamendment.
- 895.** The Employer Vice-Chairperson withdrew the subamendment.
- 896.** The amendment was adopted.
- 897.** Paragraph 22 was adopted as amended.

### *Paragraph 23*

#### *D.202*

- 898.** The Worker Vice-Chairperson introduced an amendment to insert the following section after Paragraph 23:

#### *Lighting*

Methods of lighting should not endanger the health or safety of the fishers or the safety of the vessel.

The intent was to draw attention to the fact that some methods of lighting could be dangerous to the crew and to the vessel.

- 899.** The Employer Vice-Chairperson and the Government member of Norway, speaking on behalf of the Government group, supported the amendment.
- 900.** The amendment was adopted.
- 901.** Paragraph 23 was adopted as amended.

### *New Paragraph before Paragraph 24*

- 902.** The Committee then examined a proposal by the Drafting Committee (C.R./D.5(C.S.P.)), relating to the Recommendation. The proposal was to insert the following new Paragraph after the title "Sleeping rooms" and before Paragraph 24: "For vessels of [24] metres in length and over, the number of persons allowed to occupy each sleeping room should not normally be more than two and, at a maximum, four persons."

- 
- 903.** The Legal Adviser stated that, as requested by the Committee, a new Paragraph was to be inserted in the Recommendation, rather than in the Convention. The provision was, therefore, not binding. The English text as it appeared in document C.R./D.5(C.S.P.) was correct, while the French and Spanish versions contained minor errors which would be corrected.
- 904.** The Chairperson thanked the Drafting Committee for their excellent work and, noting there was no objection, declared the text in C.R./D.5(C.S.P.) adopted.

*Paragraph 24*

*D.213, D.197*

- 905.** The Employer Vice-Chairperson introduced an amendment to delete the word “spring” in the first line of Paragraph 24, as springs were no longer widely used in mattresses, having been replaced by more modern materials.
- 906.** The Government member of Norway stated that the Government group shared the concerns of the Employers’ group. It had, however, favoured the amendment submitted by the Republic of Korea and the Philippines to replace the words “spring mattress of approved material, or with a spring base and a mattress” by the words “comfortable mattress with a cushioned bottom or a combined mattress, including a spring bottom, or a spring mattress. The cushioning material used should be made”. This amendment was superior in wording.
- 907.** The Worker Vice-Chairperson supported the statement of the Government member of Norway.
- 908.** The Employer Vice-Chairperson supported the amendment favoured by the Government members and withdrew her group’s amendment.
- 909.** The amendment was adopted.
- 910.** Paragraph 24 was adopted as amended.

*Paragraphs 25 and 26*

- 911.** Paragraphs 25 and 26 were adopted without amendment.

*Paragraph 27*

*D.198, D.212*

- 912.** The Government member of the Republic of Korea introduced an amendment (D.198), submitted by the Republic of Korea and the Philippines, to delete Paragraph 27. The Office text assumed that incompatibilities between crew and officers existed and threatened harmonious conviviality on board. Furthermore, divided mess rooms did not allow space to be used efficiently. A decision to require mess rooms to be divided should be left to the discretion of member States.
- 913.** The Worker Vice-Chairperson opposed the amendment, but supported an amendment (D.212), submitted by the Employers to add the words “In accordance with national law and practice,” to the beginning of the Paragraph.

---

**914.** The Government member of Norway, speaking on behalf of the Government group, stated that a clear majority of Government members favoured the amendment to delete the Paragraph.

**915.** The Employer Vice-Chairperson withdrew her group's amendment and supported the amendment to delete the Paragraph.

**916.** The amendment was adopted

**917.** Paragraph 27 was deleted.

#### *Paragraphs 28 and 29*

**918.** Paragraphs 28 and 29 were adopted without amendment.

#### *Paragraph 30*

##### *D.204*

**919.** The Worker Vice-Chairperson introduced an amendment to insert the following text at the end of Paragraph 30:

Consideration should also be given to including the following facilities at no cost to the fishers, where practicable:

- (a) a smoking room;
- (b) television viewing and the reception of radio broadcasts;
- (c) projection of films or video films, the stock of which should be adequate for the duration of the voyage and, where necessary, changed at reasonable intervals;
- (d) sports equipment including exercise equipment, table games, deck games;
- (e) a library containing vocational and other books, the stock of which should be adequate for the duration of the voyage and changed at reasonable intervals;
- (f) facilities for recreational handicrafts;
- (g) electronic equipment such as radio, TV, video recorder, DVD/CD player, personal computer and software, cassette recorder/player.

The objects and facilities listed were already part of the daily life on board many fishing vessels to varying degrees. It was advisable, however, to draw the attention of national legislators to these measures, which would enrich leisure time on board.

**920.** The Government member of Norway, speaking on behalf of the Government group, supported the amendment.

**921.** The Employer Vice-Chairperson opposed the amendment. She proposed a subamendment to delete "at no cost" since in most cases, these facilities or items were not provided free of cost. In any case, this issue was subject to collective bargaining and was decided upon between employers and workers.

**922.** The Government members of Argentina, France and Spain did not support the subamendment.

**923.** The subamendment was not adopted.

**924.** The amendment was adopted.

---

**925.** Paragraph 30 was adopted as amended.

*Paragraph 31*

*D.211*

**926.** The Employer Vice-Chairperson introduced an amendment to delete Paragraph 31, since it seemed impracticable to separate mess and recreation areas.

**927.** The Government member of Norway, speaking on behalf of the Government group, supported the amendment.

**928.** The Committee adopted the amendment to delete Paragraph 31.

*Paragraph 32*

**929.** Paragraph 32 was adopted without amendment.

***Part IV. Health protection, medical care  
and social security***

*Paragraph 33*

**930.** Paragraph 33 was adopted without amendment.

*Paragraph 34*

*D.210*

**931.** The Employer Vice-Chairperson introduced an amendment to delete the words “and ordinarily engaged on international voyages of more than three days’ duration”. Vessels carrying 100 or more fishers required a qualified medical doctor on board, irrespective of the duration of the voyage.

**932.** The Worker Vice-Chairperson and the Government member of Norway, speaking on behalf of the Government group, supported the amendment.

**933.** The amendment was adopted.

**934.** Paragraph 34 was adopted as amended.

*Paragraphs 35 to 37*

**935.** Paragraphs 35 to 37 were adopted without amendment.

Occupational safety and health

Research, dissemination of information and consultation

*Paragraphs 38 to 42*

**936.** Paragraphs 38 to 42 were adopted without amendment.

---

## Occupational safety and health management systems

### *Paragraph 43*

#### *D.216*

**937.** The Employer Vice-Chairperson withdrew an amendment (D.216) prior to its discussion.

**938.** Paragraph 43 was adopted without amendment.

## Risk evaluation

### *Paragraph 44*

#### *D.218*

**939.** The Employer Vice-Chairperson submitted an amendment to add the words “as soon as it comes into force” at the end of subparagraph (1)(b). The reason was that the Paragraph currently referred to an international instrument that was not yet in force.

**940.** The Government member of Norway, speaking on behalf of the Government group, opposed the amendment. Although the International Convention on Standards of Training, Certification and Watchkeeping for Fishing Vessel Personnel had not come into force, it could provide useful guidance.

**941.** The Worker Vice-Chairperson agreed with the Government group and opposed the amendment.

**942.** The amendment was not adopted.

#### *D.214*

**943.** The Employer Vice-Chairperson submitted an amendment to delete subparagraph (2)(b) concerning an occupational safety and health management system, given that the issue of occupational safety and health was already dealt with in Paragraph 43.

**944.** The Government member of Norway, speaking on behalf of the Government group, opposed the amendment. While subparagraph (1)(a) provided that risk evaluation in relation to fishing should include risk assessment and management, subparagraph (2)(b) stipulated that, to give effect to subparagraph 1(a), Members should adopt laws, regulations or other measures requiring, inter alia, an occupational safety and health management system with certain recommended features. It was essential to keep this subparagraph.

**945.** The Employer Vice-Chairperson withdrew the amendment.

**946.** Paragraph 44 was adopted without amendment.

## Technical specifications

### *Paragraph 45*

#### *D.215*

**947.** The Employer Vice-Chairperson withdrew an amendment (D.215) prior to its discussion.

**948.** Paragraph 45 was adopted without amendment.

---

*Paragraph 46*

**949.** Paragraph 46 was adopted without amendment.

Establishment of a list of occupational diseases

*Paragraph 47*

**950.** Paragraph 47 was adopted without amendment.

Social security

*Paragraphs 48 to 50*

**951.** Paragraphs 48 to 50 were adopted without amendment.

**Part V. Other provisions**

*Paragraph 51*

*D.217*

**952.** The Employer Vice-Chairperson introduced an amendment to insert the words “which has ratified the Convention” after the word “Member”. A coastal State that had not ratified the Convention could not require fishing vessels from other States to comply with the Convention when granting fishing licences.

**953.** The Government member of Norway, speaking on behalf of the Government group, opposed the amendment. The proposal did not serve the intent of the Employers’ group, since only ratifying member States were bound by the Convention and would be called upon to take into consideration the Recommendation. Moreover, the amendment would impede on the sovereign right of member States that had not ratified the Convention to set requirements as they deemed fit within their territory.

**954.** The Government member of China supported the amendment and suggested adding a point concerning Members having signed bilateral fishing agreements.

**955.** The Worker Vice-Chairperson stated the amendment would support flag of convenience vessels and was therefore not acceptable.

**956.** In response to a request for clarification as to the meaning of the word “Member”, the representative of the Legal Adviser stated that each Convention had a clause starting with the words “Each Member which ratifies this Convention shall ...” and any subsequent mentions of Members were dictated by this clause. Since Recommendations could not be ratified and were addressed to all Members of the ILO, the word “Member” in a Recommendation did not refer to a ratifying State, but to all Members.

**957.** The Government member of Namibia therefore inferred that the term “Member” had two meanings. In Recommendations, it had to be understood in its broad sense of all ILO member States. Referring to the arguments of the Government member of Norway, he opposed the amendment.

**958.** The Employer Vice-Chairperson reiterated that it was perplexing why coastal ILO member States that had not ratified the Convention should require fishing vessels from other States to comply with the Convention.

---

**959.** The Chairperson concluded that a sufficient majority of the Committee members opposed the amendment, which was not adopted.

**960.** Paragraph 51 was adopted without amendment.

*New Paragraph after Paragraph 51*

*D.200*

**961.** The Government member of France, also speaking on behalf of the Government member of Denmark, introduced an amendment seeking to insert a new Paragraph after Paragraph 51. In light of the decision taken on Paragraph 51, he immediately subamended the text to read: “If such licences are issued by coastal States, these coastal States should take into account certificates or other valid documents stating that the vessel concerned has been inspected by the competent authority or on its behalf and has been in compliance with the provisions of the Convention concerning work in the fishing sector.” This provision was essential to provide minimum objective guarantees for flag States.

**962.** The Government member of Denmark seconded the subamendment.

**963.** The Worker and Employer Vice-Chairpersons supported the subamendment.

**964.** The Government member of Norway, speaking on behalf of the Government group, opposed the amendment and invited individual Governments to comment on the subamendment.

**965.** The Government member of Norway proposed a further subamendment to add the word “found” before “in compliance” as the proposed wording seemed to indicate that the vessel had been in compliance but no longer was.

**966.** The representative of the Secretary-General informed the Committee this was most likely a translation issue.

**967.** The Government member of Greece recalled that Article 39 referred to “documents” and made specifications as to their use. The subamendment implied that all fishing vessels, irrespective of distance from flag State or of size, should have certificates or other valid inspection documents while fishing in the exclusive economic zone of another State. Since Article 39 made provisions for these documents, he could not support the amendment.

**968.** The Government members of Egypt, Japan and the United Kingdom agreed with the Government member of Greece.

**969.** The Government member of Ireland found the amendment too legalistic for a Recommendation. It contained implications regarding inspection and verification that his country found unacceptable.

**970.** The Chairperson concluded that a sufficient majority of the Committee members supported the amendment, which was adopted as subamended.

**971.** The new Paragraph following Paragraph 51 was adopted.

**972.** The Committee adopted the Recommendation as amended.

---

## Adoption of the report

**973.** The Reporter congratulated the Committee on the spirit of cooperation and collaboration that it had demonstrated throughout its discussions. The Committee's goal had been to develop a Convention and a Recommendation that would reflect the changes in the fishing sector over the past 40 years, to achieve widespread ratification, to reach the greater portion of the world's fishers and to address such issues as safety and health, social security, compliance and enforcement. In doing so, the Committee had had to resolve some complex and sensitive technical issues, and the outcome had been a practical, comprehensive and ratifiable Convention and a Recommendation. Not a single vote had been necessary during the crucial second discussion. This fact demonstrated the Committee's commitment, its willingness to consult, its desire for consensus, its concern for the world's fishers and the clarity of the Office text. He wished to thank the Office for its unstinting efforts, and in particular Loic Picard, Norman Jennings, Joachim Grimsmann, Brandt Wagner, Dani Appave, Antoinette Juvet-Mir, Ann Herbert, Anamaria Vere, Martin Hahn, as well as Cleopatra Doumbia-Henry who had been as involved and committed behind the scenes as always. He also congratulated the Drafting Committee on its excellent work. He concluded by recommending the draft report (C.S.P./D.228) for adoption by the Committee.

**974.** The report was adopted with minor amendments.

## Adoption of the proposed Convention and the proposed Recommendation

**975.** The Reporter thanked the Drafting Committee members for the excellent work done on behalf of the Committee under the able chairpersonship of the Legal Adviser. The text which had emerged from the Committee's deliberations, with 46 Articles in the proposed Convention, three annexes and an accompanying Recommendation, was probably the longest instrument ever discussed during an International Labour Conference. For this reason, the Committee's Drafting Committee had met on a daily basis to keep up with the text as developed by the Committee and to respond interactively to requests from the Committee by making suggestions and returning proposals to the Committee for consideration and adoption. The Drafting Committee had served in fact as a drafter of text referred to it by the Committee, when consensus had been reached on substance and intent, but the precise wording had yet to be worked out. This new method of working had proved effective and worthwhile. In closing, the speaker urged the Committee to adopt the proposed Convention and proposed Recommendation concerning work in the fishing sector.

**976.** The Government member of Japan expressed his gratitude to all those involved in the Committee's deliberations. He thanked, in particular, the members of the Working Party on accommodation and food, who through their hard work over a three-day period, had drafted provisions with a certain flexibility, by adding new paragraph 2 to Article 28. Despite this, however, the Convention did not offer sufficient flexibility for the purposes of widespread ratification. First, several paragraphs of Annex III, which prescribed new rules on accommodation and food, contained even stricter and more prescriptive provisions than the Accommodation of Crews (Fishermen) Convention, 1966 (No. 126). Second, the Committee had failed to select appropriate gross tonnage figures equivalent to the fishing vessel lengths of 15, 24 and 45 metres. For instance, the figure of 175 gross tonnes, which was adopted as equivalent to 24 metres in length, was much smaller than the figure proposed by Japan. As a result, major problems would arise in terms of ensuring equal and fair application of the Convention. Third, the Committee had failed to adopt appropriate conditions for the entry into force of the Convention. The required number of ten

---

ratifications of which eight should be from coastal member States was too small when compared with other international instruments and thus inappropriate. All in all, the flexibility introduced in the proposed Convention did not accommodate the concerns expressed by the Government member of Japan. The speaker expressed concern as to whether or not the Convention could achieve widespread ratification and thus become a genuine international instrument. For these reasons, the Government of Japan could not support the adoption of the draft Convention and its annexes. This position should not, however, be interpreted as lack of care about decent work in the fishing sector. Japan would continue to make every effort to improve working conditions in the fishing sector, taking into account the results of the Committee.

**977.** The Employer Vice-Chairperson supported the adoption of the proposed instruments as a true reflection of the Committee's work. This should not be interpreted, however, as an indication of the Employers' group's position on the adoption of the Convention or the Recommendation at the Conference level.

**978.** The Chairperson declared the proposed Convention with its annexes and the proposed Recommendation to be adopted.

### **Consideration of draft resolutions**

**979.** The Employer Vice-Chairperson noted that, due to time constraints, the Employers' group had not been able to examine the draft resolutions and could therefore not take part in a discussion on this subject.

**980.** The Worker Vice-Chairperson and the Government member of Norway, speaking on behalf of the Government group, stated that their groups were in a position to discuss the draft resolutions.

**981.** Following consultations, the Chairperson stated that, in light of the situation, the draft resolutions would be introduced and Committee members could express their views, but the Committee would not take a decision as to whether or not the resolutions should be adopted.

**982.** The Worker Vice-Chairperson introduced a draft resolution concerning the impact of the earthquake and tsunami disaster in the Indian Ocean, which he immediately subamended to read:

The General Conference of the International Labour Organization,

Having adopted the Convention concerning work in the fishing sector,

Mindful of the core mandate of the Organization which is to promote decent conditions of work,

Notes with grave concern the loss of life and the adverse impact the tsunami caused in the fishing sector in certain countries,

Welcomes the prompt action taken by the Organization, in cooperation with other international organizations, to respond to the impact of the disaster, and

Invites the Governing Body of the International Labour Office to request the Director-General to give due priority, in the use of resources, to ensuring that the Organization uses its special expertise to respond, through the promotion of social dialogue, to the labour market, employment and social protection needs of the affected countries, especially in the fishing sector and thereby contribute to the rehabilitation programmes.

---

**983.** The resolution aimed to lessen the negative impact on the Asian region of the earthquake and tsunami disaster.

**984.** The Government member of Norway noted that a clear majority of Government members had supported this resolution.

**985.** The Worker Vice-Chairperson introduced the following draft resolution concerning social security protection in the fishing sector:

The General Conference of the International Labour Organization,

Having adopted the Convention concerning work in the fishing sector,

Taking into consideration that the Seafarers' Pensions Convention, 1946 (No. 71), and the Social Security (Seafarers) Convention (Revised), 1987 (No. 165), have received only a small number of ratification,

Noting that Article 77 of the Social Security (Minimum Standards) Convention, 1952 (No. 102), expressly excludes sea fishers from the application of the Convention,

Considers that, given the fact that sea fishing is considered by the Organization as a hazardous occupation when compared to other occupations, social security protection needs to be provided,

Invites the Governing Body of the International Labour Office to request the Director-General to give due priority, in the use of resources, to promoting social security protection for sea fishers and, to facilitate the process, to have the Office prepare a global report on the provision of social security protection for sea fishers.

**986.** The resolution aimed to give effect to the decisions taken in regard to social security, by asking the Office to promote social security for fishers.

**987.** The Government member of Norway noted that a clear majority of Government members had supported the intent of this resolution.

**988.** The Worker Vice-Chairperson introduced a draft resolution concerning the impact on the globalization of the fishing sector, which aimed to ensure that the Office would continue making contributions to the international work in the sector. The draft resolution read:

The General Conference of the International Labour Organization,

Having adopted the Convention concerning work in the fishing sector,

Noting the growth in world trade in fisheries products and the contribution fishing makes to the food security of many communities,

Mindful of the core mandate of the Organization which is to promote decent conditions of work,

Invites the Governing Body of the International Labour Office to request the Director-General to give due priority, in the use of resources, to examining the impact of globalization on the fishing sector, including the increasing employment or engagement on non-domiciled fishers.

**989.** The Government member of Norway stated that a clear majority of Government members had supported the intent of this draft resolution. The Government group would have preferred, however, to focus on fishers' living and working conditions.

**990.** The Government member of Japan stated that, during the discussion in the Government group, his delegation had suggested to amend the draft resolution by inserting "the effects of the growth in world trade in fisheries products on the fishing industry and" after

---

“including” in the final paragraph. This addition reflected the adverse effects on the Japanese fishing industry of the growth in the world trade in fisheries products.

- 991.** The Worker Vice-Chairperson introduced the following draft resolution concerning occupational diseases and injuries in the fishing sector:

The General Conference of the International Labour Organization,  
Having adopted the Convention concerning work in the fishing sector,  
Notes that sea fishing is considered by the Organization as a hazardous occupation when compared to other occupations,  
Invites the Governing Body of the International Labour Office to request the Director-General to give due priority, in the use of resources, to examining, in cooperation with the World Health Organization, the occupational diseases and injuries affecting fishers and to examine their impact on both the fishing industry and on fishers and their dependants.

- 992.** Given the hazardous nature of the fishing sector, the resolution aimed to improve the life of fishers worldwide by asking the Office to conduct additional work on occupational diseases and injuries.

- 993.** The Government member of Norway stated that a clear majority of Government members had supported the draft resolution.

- 994.** The Worker Vice-Chairperson introduced the following draft resolution concerning technical cooperation relating to work in the fishing sector, in order to help ratification of the instrument:

The General Conference of the International Labour Organization,  
Having adopted the Convention concerning work in the fishing sector,  
Noting that the success of the Convention will depend upon the availability of the necessary expertise and material resources in the ratifying member States,  
Urges Members to agree among themselves on measures of cooperation which would enable them to share expertise and resources, where appropriate,  
Invites the Governing Body of the International Labour Office to request the Director-General to give due priority, in the use of resources allocated to the Organization’s technical cooperation programme, to assisting countries in the sharing of their expertise.

- 995.** The Government member of Norway stated that a clear majority of the Government group supported the draft resolution.

## Closing remarks

- 996.** The Secretary-General of the Conference stated that the adoption of a new instrument to protect the world’s fishers represented the first fruits of the ILO’s important programme to revise and consolidate old ILO standards. The Committee had managed to find the delicate balance between protecting the vast majority of small-scale fishers and not diluting the existing protection afforded to fishers on large ocean-going vessels or vessels at sea for long periods of time. Despite differing positions, the Committee had been able to find compromises, thanks to a spirit of tripartism and social dialogue. He concluded by noting that that much work remained; the Convention would need to be promoted, ratified and, once it entered into force, implemented. The ILO would do its best to assist in this process of making the new Convention a reality for the global fishing sector.

- 
- 997.** The Government member of Norway, speaking on behalf of the Government group, thanked all those on the Committee and in the secretariat for their tireless efforts to achieve positive results. He reserved particular thanks for the members of the Government group for their efforts to reach common positions on many issues. Their willingness to do so had made a crucial contribution to the Committee's work. He congratulated the Committee for having opted for a "positive spiral" in order to achieve the best possible living and working conditions for fishers, and urged all parties to maintain momentum on these issues.
- 998.** The Employer Vice-Chairperson expressed her gratitude to the Committee's officers, members and the secretariat. Particularly warm thanks were conveyed to the Legal Adviser for the innovative role he and the Drafting Committee had played. Without his assistance, the Committee could not have successfully completed its work. She closed by reminding the Committee of her group's concerns with regard to the instrument, noting that posterity would judge their work.
- 999.** The Worker Vice-Chairperson thanked the Chairperson and all members of the Committee, whose work was reflected in the new consolidated labour standards for the fishing sector, which improved upon existing standards and provided flexibility. He congratulated the Office on the excellent quality of the texts it had produced and thanked the secretariat for their long hours of work.
- 1000.** The representative of the Secretary-General thanked the speakers for their kind words regarding the secretariat's hard work. It was good to see that the results of this work had proved to be satisfactory.
- 1001.** The Chairperson also thanked the secretariat for their dedication and competence and for the excellence of the documents that had formed the basis of the discussion. The Committee reports were comprehensive and complex documents, which had been produced under very tight time constraints. The technical expertise that the members had demonstrated in the plenary as well as in the Drafting Committee and Working Party was highly appreciated. He noted the capacity of Committee members to listen to each other's concerns and to find common positions on some of the most important parts of the new instruments. The Employer and Worker Vice-Chairpersons had been excellent advocates for their groups' positions. The work of the Working Party and the Drafting Committee had been invaluable. Finally, the Chairperson thanked the interpreters, who had made it possible for him to speak in his mother tongue, Portuguese.
- 1002.** The report of the Committee, and the texts of the proposed Convention and the proposed Recommendation are submitted to the Conference for consideration.

Geneva, 15 June 2005.

*(Signed)* F. Ribeiro Lopes,  
Chairperson.

## A. Proposed Convention concerning work in the fishing sector

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its 93rd Session on 31 May 2005, and

Recognizing that globalization has a profound impact on the fishing sector, and

Noting the ILO Declaration on Fundamental Principles and Rights at Work, 1998, and

Taking into consideration the fundamental rights to be found in the following international labour Conventions: the Forced Labour Convention, 1930, the Freedom of Association and Protection of the Right to Organise Convention, 1948, the Right to Organise and Collective Bargaining Convention, 1949, the Equal Remuneration Convention, 1951, the Abolition of Forced Labour Convention, 1957, the Discrimination (Employment and Occupation) Convention, 1958, the Minimum Age Convention, 1973, and the Worst Forms of Child Labour Convention, 1999, and

Noting the relevant instruments of the International Labour Organization, in particular the Occupational Safety and Health Convention and Recommendation, 1981, and the Occupational Health Services Convention and Recommendation, 1985, and

Noting, in addition, the Social Security (Minimum Standards) Convention, 1952, and considering that the provisions of Article 77 of that Convention should not be an obstacle to protection extended by Members to fishers under social security schemes, and

Recognizing that the International Labour Organization considers fishing as a hazardous occupation when compared to other occupations, and

Noting also Article 1, paragraph 3 of the Seafarers' Identity Documents Convention (Revised), 2003, and

Mindful of the core mandate of the Organization, which is to promote decent conditions of work, and

Mindful of the need to protect and promote the rights of fishers in this regard, and

Recalling the United Nations Convention on the Law of the Sea, 1982, and

Taking into account the need to revise the following international instruments adopted by the International Labour Conference specifically concerning the fishing sector, namely the Hours of Work (Fishing) Recommendation, 1920, the Minimum Age (Fishermen) Convention, 1959, the Medical Examination (Fishermen) Convention, 1959, the Fishermen's Articles of Agreement Convention, 1959, and the Accommodation of Crews (Fishermen) Convention, 1966, to bring them up to date and to reach a greater number of the world's fishers, particularly those working on board smaller vessels, and

---

Noting that the objective of this Convention is to ensure that fishers have decent conditions of work on board fishing vessels with regard to minimum requirements for work on board; conditions of service; accommodation and food; occupational safety and health protection; medical care and social security, and

Having decided upon the adoption of certain proposals with regard to work in the fishing sector, which is the fifth item on the agenda of the session, and

Having determined that these proposals shall take the form of an international Convention;

adopts this                      day of June of the year two thousand and five the following Convention, which may be cited as the Work in Fishing Convention, 2005.

## PART I. DEFINITIONS AND SCOPE

### DEFINITIONS

#### *Article 1*

For the purposes of the Convention:

- (a) “commercial fishing” means all fishing operations, including fishing operations on rivers, lakes and canals, with the exception of subsistence fishing and recreational fishing;
- (b) “competent authority” means the minister, government department or other authority having power to issue and enforce regulations, orders or other instructions having the force of law in respect of the subject matter of the provision concerned;
- (c) “consultation” means consultation by the competent authority with the representative organizations of employers and workers concerned, and in particular the representative organizations of fishing vessel owners and fishers, where they exist, on the measures to be taken to give effect to the provisions of the Convention and with respect to any derogation, exemption or other flexible application as allowed under the Convention;
- (d) “fishing vessel owner” means the owner of the fishing vessel or any other organization or person who has assumed the responsibility for the operation of the vessel from the owner or other organization or person and who, on assuming such responsibility, has agreed to take over the duties and responsibilities imposed on fishing vessel owners in accordance with the Convention;
- (e) “fisher” means every person employed or engaged in any capacity or carrying out an occupation on board any fishing vessel, including persons working on board who are paid on the basis of a share of the catch but excluding pilots, naval personnel, other persons in the permanent service of a government, shore-based persons carrying out work aboard a fishing vessel and fisheries observers;
- (f) “fisher’s work agreement” means a contract of employment, articles of agreement or other similar arrangements or any other contract governing a fisher’s living and working conditions on board a vessel;

- 
- (g) “fishing vessel” or “vessel” means any ship or boat, of any nature whatsoever, irrespective of the form of ownership, used or intended to be used for the purpose of commercial fishing;
- (h) “new fishing vessel” means a vessel for which:
- (i) the building or major conversion contract is placed on or after the date of the entry into force of the Convention for the Member concerned; or
  - (ii) the building or major conversion contract has been placed before the date of the entry into force of the Convention for the Member concerned, and which is delivered three years or more after that date; or
  - (iii) in the absence of a building contract, on or after the date of the entry into force of the Convention for the Member concerned:
    - the keel is laid, or
    - construction identifiable with a specific vessel begins, or
    - assembly has commenced comprising at least 50 tonnes or 1 per cent of the estimated mass of all structural material, whichever is less;
- (i) “existing vessel” means a vessel that is not a new fishing vessel;
- (j) “gross tonnage” means the gross tonnage calculated in accordance with the tonnage measurement regulations contained in Annex I to the International Convention on Tonnage Measurement of Ships, 1969, or any instrument amending or replacing it;
- (k) “length” (L) shall be taken as 96 per cent of the total length on a waterline at 85 per cent of the least moulded depth measured from the keel line, or as the length from the foreside of the stem to the axis of the rudder stock on that waterline, if that be greater. In vessels designed with rake of keel, the waterline on which this length is measured shall be parallel to the designed waterline;
- (l) “length overall” (LOA) shall be taken as the distance in a straight line parallel to the designed waterline between the foremost point of the bow and the aftermost point of the stern;
- (m) “recruitment and placement service” means any person, company, institution, agency or other organization, in the public or the private sector, which is engaged in recruiting fishers on behalf of, or placing fishers with, fishing vessel owners;
- (n) “skipper” means the person having command of a fishing vessel.

## SCOPE

### *Article 2*

1. Except as otherwise provided herein, this Convention applies to all fishers and all fishing vessels engaged in commercial fishing operations.

2. In the event of doubt as to whether a vessel is engaged in commercial fishing, the question shall be determined by the competent authority after consultation.

---

3. Any Member, after consultation, may extend, in whole or in part, to fishers working on smaller vessels the protection provided in this Convention for fishers working on vessels 24 metres in length and over.

### *Article 3*

1. The competent authority, after consultation, may exclude from the requirements of this Convention, or certain provisions thereof, where their application raises special and substantial problems in the light of the particular conditions of service of the fishers or the fishing vessels' operations:

- (a) fishing vessels engaged in fishing operations in rivers, lakes and canals; and
- (b) limited categories of fishers or fishing vessels.

2. In the case of exclusions under the preceding paragraph and, where practicable, this competent authority shall take measures, as appropriate, to extend progressively the requirements under the Convention to those categories of fishers and fishing vessels concerned.

### *Article 4*

1. Each Member which ratifies the Convention shall, in the first report on the application of the Convention submitted under article 22 of the Constitution of the International Labour Organisation:

- (a) list any categories of fishers or fishing vessels excluded under Article 3, paragraph 1;
- (b) give the reasons for such exclusion, stating the respective positions of the representative organizations of employers and workers concerned, in particular the representative organizations of fishing vessel owners and fishers, where they exist; and
- (c) describe any measures taken to provide equivalent protection to the excluded categories.

2. Each Member shall describe in subsequent reports submitted under article 22 of the Constitution the measures taken with a view to extending progressively the provisions of the Convention to the excluded fishers and fishing vessels.

### *Article 5*

1. For the purpose of this Convention, the competent authority, after consultation, may decide to use length overall (LOA) in place of length (L) as the basis for measurement, in accordance with the equivalence set out in Annex I. In addition, for the purpose of the paragraphs specified in Annex III of this Convention, the competent authority, after consultation, may decide to use gross tonnage in place of length (L) or length overall (LOA) as the basis for measurement in accordance with the equivalence set out in Annex III.

2. In the reports submitted under article 22 of the Constitution, the Member shall communicate the reasons for the decision taken under this Article and any comments arising from the consultation.

---

## PART II. GENERAL PRINCIPLES

### IMPLEMENTATION

#### *Article 6*

1. Each Member shall implement and enforce laws, regulations or other measures that it has adopted to fulfil its commitments under this Convention with respect to fishers and fishing vessels under its jurisdiction. Other measures may include collective agreements, court decisions, arbitration awards, or other means consistent with national law and practice.

2. Nothing in this Convention shall affect any law, award or custom, or any agreement between fishing vessel owners and fishers, which ensures more favourable conditions than those provided for in the Convention.

### COMPETENT AUTHORITY AND COORDINATION

#### *Article 7*

Each Member shall:

- (a) designate the competent authority or authorities; and
- (b) establish mechanisms for coordination among relevant authorities for the fishing sector at the national and local levels, as appropriate, and define their functions and responsibilities, taking into account their complementarities and national conditions and practice.

### RESPONSIBILITIES OF FISHING VESSEL OWNERS, SKIPPERS AND FISHERS

#### *Article 8*

1. The fishing vessel owner has the overall responsibility to ensure that the skipper is provided with the necessary resources and facilities to comply with the obligations of this Convention.

2. The skipper has the responsibility for the safety of the fishers on board and the safe operation of the vessel, including but not limited to the following areas:

- (a) providing such supervision as will ensure that, as far as possible, fishers perform their work in the best conditions of safety and health;
- (b) managing the fishers in a manner which respects safety and health, including prevention of fatigue;
- (c) facilitating on-board occupational safety and health awareness training; and
- (d) ensuring compliance with safety of navigation, watchkeeping and associated good seamanship standards.

---

3. The skipper shall not be constrained by the fishing vessel owner from taking any decision which, in the professional judgement of the skipper, is necessary for the safety of the vessel and its safe navigation and safe operation, or the safety of the fishers on board.

4. Fishers shall comply with the lawful orders of the skipper and applicable safety and health measures.

### PART III. MINIMUM REQUIREMENTS FOR WORK ON BOARD FISHING VESSELS

#### MINIMUM AGE

##### *Article 9*

1. The minimum age for work on board a fishing vessel shall be 16 years. However, the competent authority may authorize a minimum age of 15 for persons who are no longer subject to compulsory schooling as provided by national legislation, and who are engaged in vocational training in fishing.

2. The competent authority, in accordance with national laws and practice, may authorize persons of the age of 15 to perform light work during school holidays. In such cases, it shall determine, after consultation, the kinds of work permitted and shall prescribe the conditions in which such work shall be undertaken and the periods of rest required.

3. The minimum age for assignment to activities on board fishing vessels, which by their nature or the circumstances in which they are carried out are likely to jeopardize the health, safety or morals of young persons, shall not be less than 18 years.

4. The types of activities to which paragraph 3 of this Article applies shall be determined by national laws or regulations, or by the competent authority, after consultation, taking into account the risks concerned and the applicable international standards.

5. The performance of the activities referred to in paragraph 3 of this Article as from the age of 16 may be authorized by national laws or regulations, or by decision of the competent authority, after consultation, on condition that the health, safety or morals of the young persons concerned are fully protected and that the young persons concerned have received adequate specific instruction or vocational training and have completed basic pre-sea safety training.

6. The engagement of fishers under the age of 18 for work at night shall be prohibited. For the purpose of this Article, “night” shall be defined in accordance with national law and practice. It shall cover a period of at least nine hours starting no later than midnight and ending no earlier than 5 a.m. An exception to strict compliance with the night work restriction may be made by the competent authority when:

- (a) the effective training of the fishers concerned, in accordance with established programmes and schedules, would be impaired; or
- (b) the specific nature of the duty or a recognized training programme requires that fishers covered by the exception perform duties at night and the authority determines, after consultation, that the work will not have a detrimental impact on their health or well-being.

---

7. None of the provisions in this Article shall affect any obligations assumed by the Member arising from the ratification of any other international labour Convention.

## MEDICAL EXAMINATION

### *Article 10*

1. No fishers shall work on board a fishing vessel without a valid medical certificate attesting to fitness to perform their duties.

2. The competent authority, after consultation, may grant exemptions from the application of paragraph 1 of this Article, taking into account the health and safety of fishers, size of the vessel, availability of medical assistance and evacuation, duration of the voyage, area of operation, and type of fishing operation.

3. The exemptions in paragraph 2 of this Article shall not apply to a fisher working on a fishing vessel of 24 metres in length and over or which normally remains at sea for more than three days. In urgent cases, the competent authority may permit a fisher to work on such a vessel for a period of a limited and specified duration until a medical certificate can be obtained, provided that the fisher is in possession of an expired medical certificate of a recent date.

### *Article 11*

Each Member shall adopt laws, regulations or other measures providing for:

- (a) the nature of medical examinations;
- (b) the form and content of medical certificates;
- (c) the issue of a medical certificate by a duly qualified medical practitioner or, in the case of a certificate solely concerning eyesight, by a person recognized by the competent authority as qualified to issue such a certificate; these persons shall enjoy full independence in exercising their professional judgement;
- (d) the frequency of medical examinations and the period of validity of medical certificates;
- (e) the right to a further examination by a second independent medical practitioner in the event that a person has been refused a certificate or has had limitations imposed on the work he or she may perform; and
- (f) other relevant requirements.

### *Article 12*

On a fishing vessel of 24 metres in length and over, or on a vessel which normally remains at sea for more than three days:

- (1) The medical certificate of a fisher shall state, at a minimum, that:
  - (a) the hearing and sight of the fisher concerned are satisfactory for the fisher's duties on the vessel; and

- 
- (b) the fisher is not suffering from any medical condition likely to be aggravated by service at sea or to render the fisher unfit for such service or to endanger the health of other persons on board.
  - (2) The medical certificate shall be valid for a maximum period of two years unless the fisher is under the age of 18, in which case the maximum period of validity shall be one year.
  - (3) If the period of validity of a certificate expires in the course of a voyage, the certificate shall remain in force until the end of that voyage.

#### PART IV. CONDITIONS OF SERVICE

##### MANNING AND HOURS OF REST

###### *Article 13*

Each Member shall adopt laws, regulations or other measures requiring that owners of fishing vessels flying its flag ensure that:

- (a) their vessels are sufficiently and safely manned with a crew necessary for the safe navigation and operation of the vessel and under the control of a competent skipper; and
- (b) fishers are given regular periods of rest of sufficient length to ensure health and safety.

###### *Article 14*

1. In addition to the requirements set out in Article 13, the competent authority shall:

- (a) for vessels of 24 metres in length and over, establish a minimum level of manning for the safe navigation of the vessel, specifying the number and the qualifications of the fishers required;
- (b) for fishing vessels regardless of size remaining at sea for more than three days, after consultation and for the purpose of limiting fatigue, establish the minimum hours of rest to be provided to fishers. Minimum hours of rest shall not be less than ten hours in any 24-hour period, and 77 hours in any seven-day period.

2. The competent authority may permit, for limited and specified reasons, temporary exceptions to the limits established in paragraph 1(b) of this Article. However, in such circumstances, it shall require that fishers shall receive compensatory periods of rest as soon as practicable.

3. The competent authority, after consultation, may establish alternative requirements to those in paragraphs 1 and 2 of this Article. However, such alternative requirements shall provide at least the same level of protection.

---

## CREW LIST

### *Article 15*

Every fishing vessel shall carry a crew list, a copy of which shall be provided to authorized persons ashore prior to departure of the vessel, or communicated ashore immediately after departure of the vessel. The competent authority shall determine to whom and when such information shall be provided and for what purpose or purposes.

## FISHER'S WORK AGREEMENT

### *Article 16*

Each Member shall adopt laws, regulations or other measures:

- (a) requiring that fishers working on vessels flying its flag have the protection of a fisher's work agreement that is comprehensible to them and is consistent with the provisions of this Convention;
- (b) specifying the minimum particulars to be included in fishers' work agreements in accordance with the provisions contained in Annex II.

### *Article 17*

Each Member shall adopt laws, regulations or other measures regarding:

- (a) procedures for ensuring that a fisher has an opportunity to review and seek advice on the terms of the fisher's work agreement before it is concluded;
- (b) where applicable, the maintenance of records concerning the fisher's work under such an agreement; and
- (c) the means of settling disputes in connection with a fisher's work agreement.

### *Article 18*

The fisher's work agreement, a copy of which shall be provided to the fisher, shall be carried on board and be available to the fisher and, in accordance with national law and practice, to other concerned parties on request.

### *Article 19*

Articles 16 to 18 and Annex II do not apply to a fishing vessel owner who is also single-handedly operating the vessel.

### *Article 20*

It shall be the responsibility of the fishing vessel owner to ensure that each fisher has a written work agreement signed by both the fisher and the fishing vessel owner or an authorized representative of the fishing vessel owner.

---

## REPATRIATION

### *Article 21*

1. Members shall ensure that fishers on a fishing vessel that flies their flag and that enters a foreign port are entitled to repatriation in the event that the fisher's work agreement has expired or has been terminated for justified reasons by the fisher or by the fishing vessel owner, or the fisher is no longer able to carry out the duties required under the work agreement or cannot be expected to carry them out in the specific circumstances. This also applies to fishers from that vessel who are transferred for the same reasons from the vessel to the foreign port.

2. The cost of the repatriation referred to in paragraph 1 of this Article shall be borne by the fishing vessel owner, except where the fisher has been found, in accordance with national laws, regulations or other measures, to be in serious default of his or her work agreement obligations.

3. Members shall prescribe, by means of laws, regulations or other measures, the precise circumstances entitling a fisher covered by paragraph 1 of this Article to repatriation, the maximum duration of service periods on board following which a fisher is entitled to repatriation, and the destinations to which fishers may be repatriated.

4. If a fishing vessel owner fails to provide for the repatriation referred to in this Article, the Member whose flag the vessel flies shall arrange for the repatriation of the fisher concerned and shall be entitled to recover the cost from the fishing vessel owner.

## RECRUITMENT AND PLACEMENT

### *Article 22*

1. Each Member that operates a public service providing recruitment and placement for fishers shall ensure that the service forms part of, or is coordinated with, a public employment service for all workers and employers.

2. Any private service providing recruitment and placement for fishers which operates in the territory of a Member shall do so in conformity with a standardized system of licensing or certification or other form of regulation, which shall be established, maintained or modified only after consultation.

3. Each Member shall, by means of laws, regulations or other measures:

- (a) prohibit recruitment and placement services from using means, mechanisms or lists intended to prevent or deter fishers from engaging for work;
- (b) require that no fees or other charges for recruitment and placement of fishers be borne directly or indirectly, in whole or in part, by the fisher; and
- (c) determine the conditions under which any licence, certificate or similar authorization of a private recruitment or placement service may be suspended or withdrawn in case of violation of relevant laws or regulations; and specify the conditions under which private recruitment and placement services can operate.

---

## PAYMENT OF FISHERS

### *Article 23*

Each Member, after consultation, shall adopt laws, regulations or other measures providing that fishers who are paid a wage are ensured a monthly or regular payment.

### *Article 24*

Each Member shall require that all fishers working on board fishing vessels shall be given a means to transmit all or part of their payments received, including advances, to their families at no cost.

## PART V. ACCOMMODATION AND FOOD

### *Article 25*

Each Member shall adopt laws, regulations or other measures for fishing vessels that fly its flag with respect to accommodation, food and potable water on board.

### *Article 26*

1. Each Member shall adopt laws, regulations or other measures requiring that accommodation on board fishing vessels that fly its flag shall be of sufficient size and quality and appropriately equipped for the service of the vessel and the length of time fishers live on board. In particular, such measures shall address, as appropriate, the following issues:

- (a) approval of plans for the construction or modification of fishing vessels in respect of accommodation;
- (b) maintenance of accommodation and galley spaces with due regard to hygiene and overall safe, healthy and comfortable conditions;
- (c) ventilation, heating, cooling and lighting;
- (d) mitigation of excessive noise and vibration;
- (e) location, size, construction materials, furnishing and equipping of sleeping rooms, mess-rooms and other accommodation spaces;
- (f) sanitary facilities, including toilets and washing facilities, and supply of sufficient hot and cold water; and
- (g) procedures for responding to complaints concerning accommodation that does not meet the requirements of this Convention.

### *Article 27*

Each Member shall adopt laws, regulations or other measures requiring that:

- (a) the food carried and served on board be of a sufficient nutritional value, quality and quantity;

- 
- (b) potable water be of sufficient quality and quantity; and
  - (c) the food and water shall be provided by the fishing vessel owner at no cost to the fisher. However, the cost can be recovered as an operational cost if the collective agreement governing a share system or a fisher's work agreement so provides.

#### *Article 28*

1. The laws, regulations or other measures to be adopted by the Member in accordance with Articles 25 to 27 shall give full effect to Annex III concerning fishing vessel accommodation. Annex III may be amended in the manner provided for in Article 45.

2. A Member which is not in a position to implement the provisions of Annex III may, after consultation, adopt provisions in its laws and regulations or other measures which are substantially equivalent to the provisions set out in Annex III, with the exception of provisions related to Article 27.

### PART VI. MEDICAL CARE, HEALTH PROTECTION, AND SOCIAL SECURITY

#### MEDICAL CARE

#### *Article 29*

Each Member shall adopt laws, regulations or other measures requiring that:

- (a) fishing vessels carry appropriate medical equipment and medical supplies for the service of the vessel, taking into account the number of fishers on board, the area of operation and the length of the voyage;
- (b) fishing vessels have at least one person on board who is qualified or trained in first aid and other forms of medical care and who has the necessary knowledge to use the medical equipment and supplies for the vessel concerned, taking into account the number of fishers on board, the area of operation and the length of the voyage;
- (c) medical equipment and supplies carried on board be accompanied by instructions or other information in a language and format understood by the person or persons referred to in subparagraph (b);
- (d) fishing vessels be equipped for radio or satellite communication with persons or services ashore that can provide medical advice, taking into account the area of operation and the length of the voyage; and
- (e) fishers have the right to medical treatment ashore and the right to be taken ashore in a timely manner for treatment in the event of serious injury or illness.

#### *Article 30*

For fishing vessels of 24 metres in length and over, taking into account the number of fishers on board, the area of operation and the duration of the voyage, each Member shall adopt laws, regulations or other measures requiring that:

- 
- (a) the competent authority prescribe the medical equipment and medical supplies to be carried on board;
  - (b) the medical equipment and medical supplies carried on board be properly maintained and inspected at regular intervals established by the competent authority by responsible persons designated or approved by the competent authority;
  - (c) the vessels carry a medical guide adopted or approved by the competent authority, or the (ILO/IMO/WHO) *International Medical Guide for Ships*;
  - (d) the vessels have access to a prearranged system of medical advice to vessels at sea by radio or satellite communication, including specialist advice, which shall be available at all times;
  - (e) the vessels carry on board a list of radio or satellite stations through which medical advice can be obtained; and
  - (f) to the extent consistent with the Member's national law and practice, medical care while the fisher is on board or landed in a foreign port be provided free of charge to the fisher.

#### OCCUPATIONAL SAFETY AND HEALTH AND ACCIDENT PREVENTION

##### *Article 31*

Each Member shall adopt laws, regulations or other measures concerning:

- (a) the prevention of occupational accidents, occupational diseases and work-related risks on board fishing vessels, including risk evaluation and management, training and on-board instruction of fishers;
- (b) training for fishers in the handling of types of fishing gear they will use and in the knowledge of the fishing operations in which they will be engaged;
- (c) the obligations of fishing vessel owners, fishers and others concerned, due account being taken of the safety and health of fishers under the age of 18;
- (d) the reporting and investigation of accidents on board fishing vessels flying its flag; and
- (e) the setting up of joint committees on occupational safety and health or, after consultation, of other appropriate bodies.

##### *Article 32*

1. The requirements of this Article shall apply to fishing vessels of 24 metres in length and over normally remaining at sea for more than three days and, after consultation, to other vessels, taking into account the number of fishers on board, the area of operation, and the duration of the voyage.

2. The competent authority shall:

- (a) after consultation, require that the fishing vessel owner, in accordance with national laws, regulations, collective bargaining agreements and practice, establish on-board

---

procedures for the prevention of occupational accidents, injuries and diseases, taking into account the specific hazards and risks on the fishing vessel concerned;

- (b) require that fishing vessel owners, skippers, fishers and other relevant persons be provided with sufficient and suitable guidance, training material, or other appropriate information on how to assess and manage risks to safety and health on board fishing vessels.

3. Fishing vessel owners shall:

- (a) ensure that every fisher on board is provided with appropriate personal protective clothing and equipment;
- (b) ensure that every fisher on board has received basic safety training approved by the competent authority; the competent authority may grant written exemptions from this requirement for fishers who have demonstrated equivalent knowledge and experience;
- (c) ensure that fishers are sufficiently and reasonably familiarized with equipment and its methods of operation, including relevant safety measures, prior to using the equipment or participating in the operations concerned.

### *Article 33*

Risk evaluation in relation to fishing shall be conducted, as appropriate, with the participation of fishers or their representatives.

## SOCIAL SECURITY

### *Article 34*

Each Member shall ensure that fishers ordinarily resident in its territory, and their dependants to the extent provided in national law, are entitled to benefit from social security protection under conditions no less favourable than those applicable to other workers, including employed and self-employed persons, ordinarily resident in its territory.

### *Article 35*

Each Member shall undertake to take steps, according to national circumstances, to achieve progressively comprehensive social security protection for all fishers who are ordinarily resident in its territory.

### *Article 36*

Members shall cooperate through bilateral or multilateral agreements or other arrangements, in accordance with national laws, regulations or practice:

- (a) to achieve progressively comprehensive social security protection for fishers, taking into account the principle of equality of treatment irrespective of nationality; and
- (b) to ensure the maintenance of social security rights which have been acquired or are in the course of acquisition by all fishers regardless of residence.

---

*Article 37*

Notwithstanding the attribution of responsibilities in Articles 34, 35 and 36, Members may determine, through bilateral and multilateral agreements and through provisions adopted in the framework of regional economic integration organizations, other rules concerning the social security legislation to which fishers are subject.

PROTECTION IN THE CASE OF WORK-RELATED SICKNESS, INJURY OR DEATH

*Article 38*

1. Each Member shall take measures to provide fishers with protection, in accordance with national laws, regulations or practice, for work-related sickness, injury or death.

2. In the event of injury due to occupational accident or disease, the fisher shall have access to:

- (a) appropriate medical care; and
- (b) the corresponding compensation in accordance with national laws and regulations.

3. Taking into account the characteristics within the fishing sector, the protection referred to in paragraph 1 of this Article may be ensured through:

- (a) a system for fishing vessel owners' liability; or
- (b) compulsory insurance, workers' compensation or other schemes.

*Article 39*

1. In the absence of national provisions for fishers, each Member shall adopt laws, regulations or other measures to ensure that fishing vessel owners are responsible for the provision to fishers on vessels flying its flag, of health protection and medical care while employed or engaged or working on a vessel at sea or in a foreign port. Such laws, regulations or other measures shall ensure that fishing vessel owners are responsible for defraying the expenses of medical care, including related material assistance and support, during medical treatment in a foreign country, until the fisher has been repatriated.

2. National laws or regulations may permit the exclusion of the liability of the fishing vessel owner if the injury occurred otherwise than on the service of the vessel or the sickness or infirmity was concealed during engagement, or the injury or sickness was due to a wilful act, default or misbehaviour.

PART VII. COMPLIANCE AND ENFORCEMENT

*Article 40*

Each Member shall exercise effective jurisdiction and control over vessels that fly its flag by establishing a system for ensuring compliance with the standards of this Convention including, as appropriate, inspections, reporting, monitoring, complaints procedures, appropriate penalties and corrective measures, in accordance with national laws or regulations.

---

### *Article 41*

Members shall require that fishing vessels remaining at sea for more than three days, whether 24 metres in length and over or normally on voyages 200 nautical miles beyond the coastline of the flag State or the outer edge of its continental shelf, whichever is greater, carry a valid document issued by the competent authority stating that the vessel has been inspected by the competent authority or on its behalf, for compliance with the provisions of this Convention concerning living and working conditions. Such a document shall be valid for a period of five years or, if issued on the same date as the International Fishing Vessel Safety Certificate, for the period of validity of that certificate.

### *Article 42*

1. The competent authority shall appoint a sufficient number of qualified inspectors to fulfil its responsibilities under Article 41.

2. In establishing an effective system for the inspection of living and working conditions on board fishing vessels, a Member, where appropriate, may authorize public institutions or other organizations that it recognizes as competent and independent to carry out inspections and issue documents. In all cases, the Member shall remain fully responsible for the inspection and issuance of the related documents concerning the living and working conditions of the fishers on fishing vessels that fly its flag.

### *Article 43*

1. A Member which receives a complaint or obtains evidence that a fishing vessel that flies its flag does not conform to the requirements of this Convention shall take the steps necessary to investigate the matter and ensure that action is taken to remedy any deficiencies found.

2. If a Member, in whose port a fishing vessel calls in the normal course of its business or for operational reasons, receives a complaint or obtains evidence that such vessel does not conform to the standards of this Convention, it may prepare a report addressed to the government of the flag State of the vessel, with a copy to the Director-General of the International Labour Office, and may take measures necessary to rectify any conditions on board which are clearly hazardous to safety or health.

3. In taking the measures referred to in paragraph 2 of this Article, the Member shall notify forthwith the nearest representative of the flag State and, if possible, shall have such representative present. The Member shall not unreasonably detain or delay the vessel.

4. For the purpose of this Article, the complaint may be submitted by a fisher, a professional body, an association, a trade union or, generally, any person with an interest in the safety of the vessel, including an interest in safety or health hazards to the fishers on board.

5. This Article does not apply to complaints which a Member considers to be manifestly unfounded.

### *Article 44*

Each Member shall apply the Convention in such a way as to ensure that the fishing vessels flying the flag of States that have not ratified the Convention do not receive more favourable treatment than fishing vessels that fly the flag of Members that have ratified it.

---

PART VIII. AMENDMENT OF ANNEXES I, II AND III

*Article 45*

1. Subject to the relevant provisions of this Convention, the International Labour Conference may amend Annexes I, II and III. The Governing Body of the International Labour Office may place an item on the agenda of the Conference regarding proposals for such amendments established by a tripartite meeting of experts. The decision to adopt the proposals shall require a majority of two-thirds of the votes cast by the delegates present at the Conference, including at least half the Members that have ratified this Convention.

2. Any amendment adopted in accordance with paragraph 1 of this Article shall enter into force, six months after the date of its adoption, for any Member that has ratified this Convention, unless such Member has given written notice to the Director-General that it shall not enter into force for that Member, or shall only enter into force at a later date upon subsequent written notification.

*Article 46*

This Convention revises the Minimum Age (Fisherman) Convention, 1959, the Medical Examination (Fishermen) Convention, 1959, the Fishermen's Articles of Agreement Convention, 1959, and the Accommodation of Crews (Fishermen's Convention), 1966.

---

## ANNEX I

### EQUIVALENCE IN MEASUREMENT

For the purpose of this Convention, where the competent authority, after consultation, decides to use length overall (LOA) rather than length (L) as the basis of measurement:

- (a) a length overall (LOA) of 16.5 metres shall be considered equivalent to a length (L) of 15 metres;
- (b) a length overall (LOA) of 26.5 metres shall be considered equivalent to a length (L) of 24 metres;
- (c) a length overall (LOA) of 50 metres shall be considered equivalent to a length (L) of 45 metres.

---

## ANNEX II

### FISHER'S WORK AGREEMENT

The fisher's work agreement shall contain the following particulars, except in so far as the inclusion of one or more of them is rendered unnecessary by the fact that the matter is regulated in another manner by national laws or regulations, or a collective bargaining agreement where applicable:

- (a) the fisher's family name and other names, date of birth or age, and birthplace;
- (b) the place at which and date on which the agreement was concluded;
- (c) the name of the fishing vessel or vessels and the registration number of the vessel or vessels on board which the fisher undertakes to work;
- (d) the name of the employer, or fishing vessel owner, or other party to the agreement with the fisher;
- (e) the voyage or voyages to be undertaken, if this can be determined at the time of making the agreement;
- (f) the capacity in which the fisher is to be employed or engaged;
- (g) if possible, the place at which and date on which the fisher is required to report on board for service;
- (h) the provisions to be supplied to the fisher, unless some alternative system is provided for by national law or regulation;
- (i) the amount of wages, or the amount of the share and the method of calculating such share if remuneration is to be on a share basis, or the amount of the wage and share and the method of calculating the latter if remuneration is to be on a combined basis, and any agreed minimum wage;
- (j) the termination of the agreement and the conditions thereof, namely:
  - (i) if the agreement has been made for a definite period, the date fixed for its expiry;
  - (ii) if the agreement has been made for a voyage, the port of destination and the time which has to expire after arrival before the fisher shall be discharged;
  - (iii) if the agreement has been made for an indefinite period, the conditions which shall entitle either party to rescind it, as well as the required period of notice for rescission, provided that such period shall not be less for the employer, or fishing vessel owner or other party to the agreement with the fisher;
- (k) the protection that will cover the fisher in the event of sickness, injury or death in connection with service;
- (l) the amount of paid annual leave or the formula used for calculating leave, where applicable;
- (m) the health and social security coverage and benefits to be provided to the fisher by the employer, fishing vessel owner, or other party or parties to the fisher's work agreement, as applicable;
- (n) the fisher's entitlement to repatriation;
- (o) a reference to the collective bargaining agreement, where applicable;
- (p) the minimum periods of rest, in accordance with national laws, regulations or other measures; and
- (q) any other particulars which national law or regulation may require.

---

## ANNEX III

### FISHING VESSEL ACCOMMODATION

#### *General provisions*

1. The following shall apply to all new, decked fishing vessels, subject to any exclusions provided for in accordance with Article 3 of this Convention. The competent authority may, after consultation, also apply the requirements of this Annex to existing vessels, when and in so far as it determines that this is reasonable and practicable.

2. The competent authority, after consultation, may permit variations to the provisions of this Annex for fishing vessels normally remaining at sea for less than 24 hours where the fishers do not live on board the vessel in port. In the case of such vessels, the competent authority shall ensure that the fishers concerned have adequate facilities for resting, eating and sanitation purposes.

3. Any variations made by a Member under paragraph 2 of this Annex shall be reported to the International Labour Office under article 22 of the Constitution of the International Labour Organisation.

4. The requirements for vessels of 24 metres in length and over may be applied to vessels between 15 and 24 metres in length where the competent authority determines, after consultation, that this is reasonable and practicable.

5. Fishers working on board feeder vessels which do not have appropriate accommodation and sanitary facilities shall be provided with such accommodation and facilities on board the mother vessel.

6. Members may extend the requirements of this Annex regarding noise and vibration, ventilation, heating and air conditioning, and lighting to enclosed working spaces and spaces used for storage if, after consultation, such application is considered appropriate and will not have a negative influence on the function of the process or working conditions or the quality of the catches.

7. The use of gross tonnage as referred to in Article 5 of this Convention is limited to the following specified paragraphs of this annex: 12, 34, 35, 37, 39, 42, 56 and 61. For these purposes, where the competent authority, after consultation, decides to use gross tonnage (gt) as the basis of measurement:

- (a) a gross tonnage of 55 gt shall be considered equivalent to a length (L) of 15 metres or a length overall (LOA) of 16.5 metres;
- (b) a gross tonnage of 175 gt shall be considered equivalent to a length (L) of 24 metres or a length overall (LOA) of 26.5 metres;
- (c) a gross tonnage of 700 gt shall be considered equivalent to a length (L) of 45 metres or a length overall (LOA) of 50 metres.

#### *Planning and control*

8. The competent authority shall satisfy itself that, on every occasion when a vessel is newly constructed or the crew accommodation of a vessel has been reconstructed, such vessel complies with the requirements of this annex. The competent authority shall, to the extent practicable, require compliance with this annex for a vessel that changes the flag it flies to the flag of the Member, or when the crew accommodation of a vessel is substantially altered.

9. For the occasions noted in paragraph 8 of this annex, for vessels of 24 metres in length and over, detailed plans and information concerning accommodation shall be required to be submitted for approval to the competent authority, or an entity authorized by it.

10. For vessels of 24 metres in length and over, on every occasion when the vessel changes the flag it flies to the flag of the Member or the crew accommodation of the fishing vessel has been reconstructed or substantially altered, the competent authority shall inspect the accommodation for

---

compliance with this Convention. The competent authority may carry out additional inspections of crew accommodation at its discretion.

### *Design and construction*

#### *Headroom*

11. There shall be adequate headroom in all accommodation spaces. For spaces where fishers are expected to stand for prolonged periods, the minimum headroom shall be prescribed by the competent authority.

12. For vessels of 24 metres in length and over, the minimum permitted headroom in all accommodation where full and free movement is necessary shall not be less than 200 centimetres. The competent authority may permit some limited reduction in headroom in any space, or part of any space, in such accommodation where it is satisfied that such reduction is reasonable, and will not result in discomfort to the fishers.

#### *Openings into and between accommodation spaces*

13. There shall be no direct openings into sleeping rooms from fish rooms and machinery spaces, except for the purpose of emergency escape. Where reasonable and practicable, direct openings from galleys, storerooms, drying rooms or communal sanitary areas shall be avoided unless expressly provided otherwise.

14. For vessels of 24 metres in length and over, there shall be no direct openings, except for the purpose of emergency escape, into sleeping rooms from fish rooms and machinery spaces or from galleys, storerooms, drying rooms or communal sanitary areas; that part of the bulkhead separating such places from sleeping rooms and external bulkheads shall be efficiently constructed of steel or another approved material and shall be watertight and gas-tight. This provision does not exclude the possibility of sanitary areas being shared between two cabins.

#### *Insulation*

15. Accommodation spaces shall be adequately insulated; the materials used to construct internal bulkheads, panelling and sheeting, and floors and joinings shall be suitable for the purpose and shall be conducive to ensuring a healthy environment. Sufficient drainage shall be provided in all accommodation spaces.

#### *Other*

16. All practicable measures shall be taken to protect fishing vessels' crew accommodation against flies and other insects, particularly when vessels are operating in mosquito-infested areas.

17. Emergency escapes from all crew accommodation spaces shall be provided as necessary.

### *Noise and vibration*

18. The competent authority shall take measures to limit excessive noise and vibration in accommodation spaces and, as far as practicable, in accordance with relevant international standards.

19. For vessels of 24 metres in length and over, the competent authority shall adopt standards for noise and vibration in accommodation spaces which shall ensure adequate protection to fishers from the effects of such noise and vibration, including the effects of noise- and vibration-induced fatigue.

---

## *Ventilation*

20. Accommodation spaces shall be ventilated, taking into account climatic conditions. The system of ventilation shall supply air in a satisfactory condition whenever fishers are on board.

21. Ventilation arrangements or other measures shall be such as to protect non-smokers from tobacco smoke.

22. Vessels of 24 metres in length and over shall be equipped with a system of ventilation for accommodation, which shall be controlled so as to maintain the air in a satisfactory condition and to ensure sufficiency of air movement in all weather conditions and climates. Ventilation systems shall be in operation at all times when fishers are on board.

## *Heating and air conditioning*

23. Accommodation spaces shall be adequately heated, taking into account climatic conditions.

24. For vessels of 24 metres in length and over, adequate heat shall be provided, through an appropriate heating system, except in fishing vessels operating exclusively in tropical climates. The system of heating shall provide heat in all conditions, as necessary, and shall be in operation when fishers are living or working on board, and when conditions so require.

25. For vessels of 24 metres in length and over, with the exception of those regularly engaged in areas where temperate climatic conditions do not require it, air conditioning shall be provided in accommodation spaces, the bridge, the radio room and any centralized machinery control room.

## *Lighting*

26. All accommodation spaces shall be provided with adequate light.

27. Wherever practicable, accommodation spaces shall be lit with natural light in addition to artificial light. Where sleeping spaces have natural light, a means of blocking the light shall be provided.

28. Adequate reading light shall be provided for every berth in addition to the normal lighting of the sleeping room.

29. Emergency lighting shall be provided in sleeping rooms.

30. Where a vessel is not fitted with emergency lighting in mess rooms, passageways, and any spaces that are or may be used for emergency escape, permanent night lighting shall be provided in such spaces.

31. For vessels of 24 metres in length and over, lighting in accommodation spaces shall meet a standard established by the competent authority. In any part of the accommodation space available for free movement, the minimum standard for such lighting shall be such as to permit a person with normal vision to read an ordinary newspaper on a clear day.

## *Sleeping rooms*

### *General*

32. Where the design, dimensions or purpose of the vessel allow, the sleeping accommodation shall be located so as to minimize the effects of motion and acceleration but shall in no case be located forward of the collision bulkhead.

---

### *Floor area*

33. The number of persons per sleeping room and the floor area per person, excluding space occupied by berths and lockers, shall be such as to provide adequate space and comfort for the fishers on board, taking into account the service of the vessel.

34. For vessels of 24 metres in length and over but which are less than 45 metres in length, the floor area per person of sleeping rooms, excluding space occupied by berths and lockers, shall not be less than 1.5 square metres.

35. For vessels of 45 metres in length and over, the floor area per person of sleeping rooms, excluding space occupied by berths and lockers, shall not be less than 2 square metres.

### *Persons per sleeping room*

36. To the extent not expressly provided otherwise, the number of persons allowed to occupy each sleeping room shall not be more than six.

37. For vessels of 24 metres in length and over, the number of persons allowed to occupy each sleeping room shall not be more than four. The competent authority may permit exceptions to this requirement in particular cases if the size, type or intended service of the vessel makes the requirement unreasonable or impracticable.

38. To the extent not expressly provided otherwise, a separate sleeping room or sleeping rooms shall be provided for officers, wherever practicable.

39. For vessels of 24 metres in length and over, sleeping rooms for officers shall be for one person wherever possible and in no case shall the sleeping room contain more than two berths. The competent authority may permit exceptions to the requirements of this paragraph in particular cases if the size, type or intended service of the vessel makes the requirements unreasonable or impracticable.

### *Other*

40. The maximum number of persons to be accommodated in any sleeping room shall be legibly and indelibly marked in a place in the room where it can be conveniently seen.

41. The members of the crew shall be provided with individual berths of appropriate dimensions. Mattresses shall be of a suitable material.

42. For vessels of 24 metres in length and over, the minimum inside dimensions of the berths shall not be less than 198 by 80 centimetres.

43. Sleeping rooms shall be so planned and equipped as to ensure reasonable comfort for the occupants and to facilitate tidiness. Equipment provided shall include berths, individual lockers sufficient for clothing and other personal effects, and a suitable writing surface.

44. For vessels of 24 metres in length and over, a desk suitable for writing, with a chair, shall be provided.

45. Sleeping accommodation shall be situated or equipped, as practicable, so as to provide appropriate levels of privacy for men and for women.

### *Mess rooms*

46. Mess rooms shall be as close as possible to the galley, but in no case shall be located forward of the collision bulkhead.

47. Vessels shall be provided with mess room accommodation suitable for their service. To the extent not expressly provided otherwise, mess room accommodation shall be separate from sleeping quarters, where practicable.

48. For vessels of 24 metres in length and over, mess room accommodation shall be separate from sleeping quarters.

---

49. The dimensions and equipment of each mess room shall be sufficient for the number of persons likely to use it at any one time.

50. For vessels of 24 metres in length and over, a refrigerator of sufficient capacity and facilities for making hot and cold drinks shall be available and accessible to fishers at all times.

### *Sanitary accommodation*

51. Sanitary facilities, which include toilets, washbasins, and tubs or showers, shall be provided for all persons on board, as appropriate for the service of the vessel. These facilities shall meet at least minimum standards of health and hygiene and reasonable standards of quality.

52. The sanitary accommodation shall be such as to eliminate contamination of other spaces as far as practicable. The sanitary facilities used by women fishers shall allow for reasonable privacy.

53. Cold fresh water and hot fresh water shall be available to all fishers and other persons on board, in sufficient quantities to allow for proper hygiene. The competent authority may establish, after consultation, the minimum amount of water to be provided.

54. Where sanitary facilities are provided, they shall be fitted with ventilation to the open air, independent of any other part of the accommodation.

55. All surfaces in sanitary accommodation shall be such as to facilitate easy and effective cleaning. Floors shall have a non-slip deck covering.

56. On vessels of 24 metres in length and over, for all fishers who do not occupy rooms to which sanitary facilities are attached, there shall be provided at least one tub or shower or both, one toilet, and one washbasin for every four persons or fewer.

### *Laundry facilities*

57. Amenities for washing and drying clothes shall be provided as necessary, taking into account the service of the vessel, to the extent not expressly provided otherwise.

58. For vessels of 24 metres in length and over, adequate facilities for washing, drying and ironing clothes shall be provided.

59. For vessels of 45 metres in length and over, adequate facilities for washing, drying and ironing clothes shall be provided in a compartment separate from sleeping rooms, mess rooms and toilets, and shall be adequately ventilated, heated and equipped with lines or other means for drying clothes.

### *Facilities for sick and injured fishers*

60. Whenever necessary, a cabin shall be made available for a fisher who suffers illness or injury.

61. For vessels of 45 metres in length and over, there shall be a separate sick bay. The space shall be properly equipped and shall be maintained in a hygienic state.

### *Other facilities*

62. A place for hanging foul-weather gear and other personal protective equipment shall be provided outside of, but convenient to, sleeping rooms.

### *Bedding, mess utensils and miscellaneous provisions*

63. Appropriate eating utensils, and bedding and other linen shall be provided to all fishers on board. However, the cost of the linen can be recovered as an operational cost if the collective agreement or the fisher's work agreement so provides.

---

### *Recreational facilities*

64. For vessels of 24 metres in length and over, appropriate recreational facilities, amenities and services shall be provided for all fishers on board. Where appropriate, mess rooms may be used for recreational activities.

### *Communication facilities*

65. All fishers on board shall be given reasonable access to communication facilities, to the extent practicable, at a reasonable cost and not exceeding the full cost to the fishing vessel owner.

### *Galley and food storage facilities*

66. Cooking equipment shall be provided on board. To the extent not expressly provided otherwise, this equipment shall be fitted, where practicable, in a separate galley.

67. The galley, or cooking area where a separate galley is not provided, shall be of adequate size for the purpose, well lit and ventilated, and properly equipped and maintained.

68. For vessels of 24 metres in length and over, there shall be a separate galley.

69. The containers of butane or propane gas used for cooking purposes in a galley shall be kept on the open deck and in a shelter which is designed to protect them from external heat sources and external impact.

70. A suitable place for provisions of adequate capacity shall be provided which can be kept dry, cool and well-ventilated in order to avoid deterioration of the stores and, to the extent not expressly provided otherwise, refrigerators or other low-temperature storage shall be used, where possible.

71. For vessels of 24 metres in length and over, a provisions storeroom and refrigerator and other low-temperature storage shall be used.

### *Food and potable water*

72. Food and potable water shall be sufficient, having regard to the number of fishers, and the duration and nature of the voyage. In addition, they shall be suitable in respect of nutritional value, quality, quantity and variety, having regard as well to the fishers' religious requirements and cultural practices in relation to food.

73. The competent authority may establish requirements for the minimum standards and quantity of food and water to be carried on board.

### *Clean and habitable conditions*

74. Accommodation shall be maintained in a clean and habitable condition and shall be kept free of goods and stores which are not the personal property of the occupants.

75. Galley and food storage facilities shall be maintained in a hygienic condition.

76. Waste shall be kept in closed, well-sealed containers and removed from food-handling areas whenever necessary.

### *Inspections by the skipper or under the authority of the skipper*

77. For vessels of 24 metres in length and over, the competent authority shall require frequent inspections to be carried out, by or under the authority of the skipper, to ensure that:

- (a) accommodation is clean, decently habitable and safe, and is maintained in a good state of repair;

- 
- (b) food and water supplies are sufficient; and
  - (c) galley and food storage spaces and equipment are hygienic and in a proper state of repair.

The results of such inspections, and the actions taken to address any deficiencies found, shall be recorded and available for review.

### *Variations*

78. The competent authority, after consultation, may permit derogations from the provisions in this annex to take into account, without discrimination, the interests of fishers having differing and distinctive religious and social practices, on condition that such derogations do not result in overall conditions less favourable than those which would result from the application of this annex.

---

## B. Proposed Recommendation concerning work in the fishing sector

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its 93rd Session on 31 May 2005, and

Taking into account the need to revise the Hours of Work (Fishing) Recommendation, 1920, and

Having decided upon the adoption of certain proposals with regard to work in the fishing sector, which is the fifth item on the agenda of the session, and

Having determined that these proposals shall take the form of a Recommendation supplementing the Work in Fishing Convention, 2005 (hereinafter referred to as “the Convention”);

adopts this                      day of June of the year two thousand and five the following Recommendation, which may be cited as the Work in Fishing Recommendation, 2005.

### PART I. CONDITIONS FOR WORK ON BOARD FISHING VESSELS

#### *Protection of young persons*

1. Members should establish the requirements for the pre-sea training of persons between the ages of 16 and 18 working on board fishing vessels, taking into account international instruments concerning training for work on board fishing vessels, including occupational safety and health issues such as night work, hazardous tasks, work with dangerous machinery, manual handling and transport of heavy loads, work in high latitudes, work for excessive periods of time and other relevant issues identified after an assessment of the risks concerned.

2. The training of persons between the ages of 16 and 18 might be provided through participation in an apprenticeship or approved training programme, which should operate under established rules and be monitored by the competent authority, and should not interfere with the person’s general education.

3. Members should take measures to ensure that the safety, lifesaving and survival equipment carried on board fishing vessels carrying persons under the age of 18 is appropriate for the size of such persons.

4. The working hours of fishers under the age of 18 should not exceed eight hours per day and 40 hours per week, and they should not work overtime except where unavoidable for safety reasons.

5. Fishers under the age of 18 should be assured sufficient time for all meals and a break of at least one hour for the main meal of the day.

#### *Medical examination*

6. When prescribing the nature of the examination, Members should pay due regard to the age of the person to be examined and the nature of the duties to be performed.

---

7. The medical certificate should be signed by a medical practitioner approved by the competent authority.

8. Arrangements should be made to enable a person who, after examination, is determined to be unfit for work on board fishing vessels or certain types of fishing vessels, or for certain types of work on board, to apply for a further examination by a medical referee or referees who should be independent of any fishing vessel owner or of any organization of fishing vessel owners or fishers.

9. The competent authority should take into account international guidance on medical examination and certification of persons working at sea, such as the (ILO/WHO) *Guidelines for Conducting Pre-sea and Periodic Medical Fitness Examinations for Seafarers*.

10. For fishers exempted from the application of the provisions concerning medical examination in the Convention, the competent authority should take adequate measures to provide health surveillance for the purpose of occupational safety and health.

### *Competency and training*

11. Members should:

- (a) take into account generally accepted international standards concerning training and competencies of fishers in determining the competencies required for skippers, mates, engineers and other persons working on board fishing vessels;
- (b) address the following issues, with regard to the vocational training of fishers: national planning and administration, including coordination; financing and training standards; training programmes, including pre-vocational training and also short courses for working fishers; methods of training; and international cooperation;
- (c) ensure that there is no discrimination with regard to access to training.

## PART II. CONDITIONS OF SERVICE

### *Record of service*

12. At the end of each contract, a record of service in regard to that contract should be made available to the fisher concerned, or entered in the fisher's service book.

### *Special measures*

13. For fishers excluded from the scope of the Convention, the competent authority should take measures to provide them with adequate protection with respect to their conditions of work and means of dispute settlement.

### *Payment of fishers*

14. Fishers should have the right to advances against earnings under prescribed conditions.

15. For vessels of 24 metres in length and over, all fishers should be entitled to minimum payment in accordance with national laws, regulations or collective agreements.

---

### PART III. ACCOMMODATION

16. When establishing requirements or guidance, the competent authority should take into account relevant international guidance on accommodation, food, and health and hygiene relating to persons working or living on board vessels, including the most recent editions of the (FAO/ILO/IMO) *Code of Safety for Fishermen and Fishing Vessels* and the (FAO/ILO/IMO) *Voluntary Guidelines for the Design, Construction and Equipment of Small Fishing Vessels*.

17. The competent authority should work with relevant organizations and agencies to develop and disseminate educational material and on-board information and guidance concerning safe and healthy accommodation and food on board fishing vessels.

18. Inspections of crew accommodation required by the competent authority should be carried out together with initial or periodic surveys or inspections for other purposes.

#### *Design and construction*

19. Adequate insulation should be provided for exposed decks over crew accommodation spaces, external bulkheads of sleeping rooms and mess rooms, machinery casings and boundary bulkheads of galleys and other spaces in which heat is produced, and, as necessary, to prevent condensation or overheating in sleeping rooms, mess rooms, recreation rooms and passageways.

20. Protection should be provided from the heat effects of any steam or hot water service pipes. Main steam and exhaust pipes should not pass through crew accommodation or through passageways leading to crew accommodation. Where this cannot be avoided, pipes should be adequately insulated and encased.

21. Materials and furnishings used in accommodation spaces should be impervious to dampness, easy to keep clean and not likely to harbour vermin.

#### *Noise and vibration*

22. Noise levels for working and living spaces, which are established by the competent authority, should be in conformity with the guidelines of the International Labour Organization on exposure levels to ambient factors in the workplace and, where applicable, the specific protection recommended by the International Maritime Organization, together with any subsequent amending and supplementary instruments for acceptable noise levels on board ships.

23. The competent authority, in conjunction with the competent international bodies and with representatives of organizations of fishing vessel owners and fishers and taking into account, as appropriate, relevant international standards, should review on an ongoing basis the problem of vibration on board fishing vessels with the objective of improving the protection of fishers, as far as practicable, from the adverse effects of vibration.

(1) Such review should cover the effect of exposure to excessive vibration on the health and comfort of fishers and the measures to be prescribed or recommended to reduce vibration on fishing vessels to protect fishers.

(2) Measures to reduce vibration, or its effects, to be considered should include:

(a) instruction of fishers in the dangers to their health of prolonged exposure to vibration; and

- 
- (b) provision of approved personal protective equipment to fishers where necessary;
  - (c) assessment of risks and reduction of exposure in sleeping rooms, mess rooms, recreational accommodation and catering facilities and other fishers' accommodation by adopting measures in accordance with the guidance provided by the (ILO) *Code of Practice on Ambient factors in the workplace* and any subsequent revisions, taking into account the difference between exposure in the workplace and in the living space.

### *Heating*

24. The heating system should be capable of maintaining the temperature in crew accommodation at a satisfactory level, as established by the competent authority, under normal conditions of weather and climate likely to be met with on service, and should be designed so as not to endanger the health or safety of the fishers or the safety of the vessel.

### *Lighting*

25. Methods of lighting should not endanger the health and safety of the fishers or the safety of the vessel.

### *Sleeping rooms*

26. Each berth should be fitted with a comfortable mattress with a cushioned bottom or a combined mattress, including a spring bottom, or a spring mattress. The cushioning material used should be made of approved material. Berths should not be placed side by side in such a way that access to one berth can be obtained only over another. The lower berth in a double tier should not be less than 0.3 metres above the floor, and the upper berth should be fitted with a dust-proof bottom and placed approximately midway between the bottom of the lower berth and the lower side of the deck head beams. Berths should not be arranged in tiers of more than two. In the case of berths placed along the vessel's side, there should be only a single tier when a sidelight is situated above a berth.

27. Sleeping rooms should be fitted with curtains for the sidelights, as well as a mirror, small cabinets for toilet requisites, a book rack and a sufficient number of coat hooks.

28. As far as practicable, berthing of crew members should be so arranged that watches are separated and that no day worker shares a room with a watch keeper.

29. On vessels of 24 metres in length and over, separate sleeping rooms for men and women should be provided.

### *Sanitary accommodation*

30. Sanitary accommodation spaces should have:

- (a) floors of approved durable material which can be easily cleaned, and which are impervious to dampness and properly drained;
- (b) bulkheads of steel or other approved material which should be watertight up to at least 0.23 metres above the level of the deck;
- (c) sufficient lighting, heating and ventilation; and

- 
- (d) soil pipes and waste pipes of adequate dimensions which are constructed so as to minimize the risk of obstruction and to facilitate cleaning; such pipes should not pass through fresh water or drinking-water tanks, nor should they, if practicable, pass overhead in mess rooms or sleeping accommodation.

31. Toilets should be of an approved type and provided with an ample flush of water, available at all times and independently controllable. Where practicable, they should be situated convenient to, but separate from, sleeping rooms and washrooms. Where there is more than one toilet in a compartment, the toilets should be sufficiently screened to ensure privacy.

32. Separate sanitary facilities should be provided for women fishers.

### *Recreational facilities*

33. Where recreational facilities are required, furnishings should include, as a minimum, a bookcase and facilities for reading, writing and, where practicable, games. Recreational facilities and services should be reviewed frequently to ensure that they are appropriate in the light of changes in the needs of fishers resulting from technical, operational and other developments. Consideration should also be given to including the following facilities at no cost to the fishers, where practicable:

- (a) a smoking room;
- (b) television viewing and the reception of radio broadcasts;
- (c) projection of films or video films, the stock of which should be adequate for the duration of the voyage and, where necessary, changed at reasonable intervals;
- (d) sports equipment including exercise equipment, table games, and deck games;
- (e) a library containing vocational and other books, the stock of which should be adequate for the duration of the voyage and changed at reasonable intervals;
- (f) facilities for recreational handicrafts; and
- (g) electronic equipment such as radio, TV, video recorder, DVD/CD player, personal computer and software, and cassette recorder/player.

### *Food*

34. Fishers employed as cooks should be trained and qualified for their position on board.

## PART IV. MEDICAL CARE, HEALTH PROTECTION AND SOCIAL SECURITY

### *Medical care on board*

35. The competent authority should establish a list of medical supplies and equipment appropriate to the risks concerned that should be carried on fishing vessels; such list should include women's sanitary protection supplies together with discreet, environmentally friendly disposal units.

---

36. Fishing vessels carrying 100 or more fishers should have a qualified medical doctor on board.

37. Fishers should receive training in basic first aid in accordance with national laws and regulations, taking into account applicable international instruments.

38. A standard medical report form should be specially designed to facilitate the confidential exchange of medical and related information concerning individual fishers between the fishing vessel and the shore in cases of illness or injury.

39. For vessels of 24 metres in length and over, in addition to the provisions of Article 32 of the Convention, the following elements should be taken into account:

- (a) when prescribing the medical equipment and supplies to be carried on board, the competent authority should take into account international recommendations in this field, such as those contained in the most recent editions of the (ILO/IMO/WHO) *International Medical Guide for Ships* and the (WHO) *Model List of Essential Medicines*, as well as advances in medical knowledge and approved methods of treatment;
- (b) inspections of medical equipment and supplies should take place at intervals of no more than 12 months; the inspector should ensure that expiry dates and conditions of storage of all medicines are checked, the contents of the medicine chest are listed and conform to the medical guide used nationally, and medical supplies are labelled with generic names in addition to any brand names used, and with expiry dates and conditions of storage;
- (c) the medical guide should explain how the contents of the medical equipment and supplies are to be used, and should be designed to enable persons other than a medical doctor to care for the sick or injured on board, both with and without medical advice by radio or satellite communication; the guide should be prepared taking into account international recommendations in this field, including those contained in the most recent editions of the (ILO/IMO/WHO) *International Medical Guide for Ships* and the (IMO) *Medical First Aid Guide for Use in Accidents Involving Dangerous Goods*; and
- (d) medical advice provided by radio or satellite communication should be available free of charge to all vessels irrespective of the flag they fly.

### *Occupational safety and health*

#### *Research, dissemination of information and consultation*

40. In order to contribute to the continuous improvement of safety and health of fishers, Members should have in place policies and programmes for the prevention of accidents on board fishing vessels which should provide for the gathering and dissemination of occupational health and safety materials, research and analysis, taking into consideration technological progress and knowledge in the field of occupational safety and health as well as of relevant international instruments.

41. The competent authority should take measures to ensure regular consultations on safety and health matters with the aim of ensuring that all concerned are kept reasonably informed of national, international and other developments in the field and on their possible application to fishing vessels flying the flag of the Member.

---

42. When ensuring that fishing vessel owners, skippers, fishers and other relevant persons receive sufficient and suitable guidance, training material, or other appropriate information, the competent authority should take into account relevant international standards, codes, guidance and other information. In so doing, the competent authority should keep abreast of and utilize international research and guidance concerning safety and health in the fishing sector, including relevant research in occupational safety and health in general which may be applicable to work on board fishing vessels.

43. Information concerning particular hazards should be brought to the attention of all fishers and other persons on board through official notices containing instructions or guidance, or other appropriate means.

44. Joint committees on occupational safety and health should be established:

- (a) ashore; or
- (b) on fishing vessels, where determined by the competent authority, after consultation, to be practicable in light of the number of fishers on board the vessel.

#### *Occupational safety and health management systems*

45. When establishing methods and programmes concerning safety and health in the fishing sector, the competent authority should take into account any relevant international guidance concerning occupational safety and health management systems, including the *Guidelines on occupational safety and health management systems, ILO-OSH 2001*.

#### *Risk evaluation*

46. (1) Risk evaluation in relation to fishing should be conducted, as appropriate, with the participation of fishers or their representatives and should include:

- (a) risk assessment and management;
- (b) training, taking into consideration the relevant provisions of Chapter III of the International Convention on Standards of Training, Certification and Watchkeeping for Fishing Vessel Personnel, 1995 (STCW-F Convention) adopted by the IMO; and
- (c) on-board instruction of fishers.

(2) To give effect to subparagraph (1)(a), Members, after consultation, should adopt laws, regulations or other measures requiring:

- (a) the regular and active involvement of all fishers in improving safety and health by continually identifying hazards, assessing risks and taking action to address risks through safety management;
- (b) an occupational safety and health management system that may include an occupational safety and health policy, provisions for fisher participation and provisions concerning organizing, planning, implementing and evaluating the system and taking action to improve the system; and
- (c) a system for the purpose of assisting in the implementation of a safety and health policy and programme and providing fishers with a forum to influence safety and health matters; on-board prevention procedures should be designed so as to involve

---

fishers in the identification of hazards and potential hazards and in the implementation of measures to reduce or eliminate such hazards.

(3) When developing the provisions referred to in subparagraph (1)(a), Members should take into account the relevant international instruments on risk assessment and management.

#### *Technical specifications*

47. Members should address the following, to the extent practicable and as appropriate to the conditions in the fishing sector:

- (a) seaworthiness and stability of fishing vessels;
- (b) radio communications;
- (c) temperature, ventilation and lighting of working areas;
- (d) mitigation of the slipperiness of deck surfaces;
- (e) machinery safety, including guarding of machinery;
- (f) vessel familiarization for fishers and fisheries observers new to the vessel;
- (g) personal protective equipment;
- (h) fire-fighting and lifesaving;
- (i) loading and unloading of the vessel;
- (j) lifting gear;
- (k) anchoring and mooring equipment;
- (l) safety and health in living quarters;
- (m) noise and vibration in work areas;
- (n) ergonomics, including in relation to the layout of workstations and manual lifting and handling;
- (o) equipment and procedures for the catching, handling, storage and processing of fish and other marine resources;
- (p) vessel design, construction and modification relevant to occupational safety and health;
- (q) navigation and vessel handling;
- (r) hazardous materials used on board the vessel;
- (s) safe means of access to and exit from fishing vessels in port;
- (t) special safety and health requirements for young persons;
- (u) prevention of fatigue; and

- 
- (v) other issues related to safety and health.

48. When developing laws, regulations or other measures concerning technical standards relating to safety and health on board fishing vessels, the competent authority should take into account the most recent edition of the (FAO/ILO/IMO) *Code of Safety for Fishermen and Fishing Vessels, Part A*.

*Establishment of a list of occupational diseases*

49. Members should establish a list of diseases known to arise out of exposure to dangerous substances or conditions in the fishing sector.

*Social security*

50. For the purpose of extending social security protection progressively to all fishers, Members should maintain up-to-date information on the following:

- (a) the percentage of fishers covered;
- (b) the range of contingencies covered; and
- (c) the level of benefits.

51. Every person protected under Article 34 of the Convention should have a right of appeal in the case of a refusal of the benefit or of an adverse determination as to the quality or quantity of the benefit.

52. The protections referred to in Articles 38 and 39 of the Convention should be granted throughout the contingency covered.

PART V. OTHER PROVISIONS

53. A Member, in its capacity as a coastal State, when granting licences for fishing in its exclusive economic zone, may require that fishing vessels comply with the standards of the Convention. If such licences are issued by coastal States, these States should take into account certificates or other valid documents stating that the vessel concerned has been inspected by the competent authority or on its behalf and has been found to be in compliance with the provisions of the Convention concerning work in the fishing sector.

## **TEXT OF THE CONVENTION CONCERNING WORK IN THE FISHING SECTOR**

The General Conference of the International Labour Organization,  
Having been convened at Geneva by the Governing Body of the  
International Labour Office, and having met in its 93rd Session on  
31 May 2005, and

Recognizing that globalization has a profound impact on the fishing  
sector, and

Noting the ILO Declaration on Fundamental Principles and Rights at  
Work, 1998, and

Taking into consideration the fundamental rights to be found in the  
following international labour Conventions: the Forced Labour  
Convention, 1930, the Freedom of Association and Protection of  
the Right to Organise Convention, 1948, the Right to Organise  
and Collective Bargaining Convention, 1949, the Equal  
Remuneration Convention, 1951, the Abolition of Forced Labour  
Convention, 1957, the Discrimination (Employment and  
Occupation) Convention, 1958, the Minimum Age Convention,  
1973, and the Worst Forms of Child Labour Convention, 1999, and

Noting the relevant instruments of the International Labour  
Organization, in particular the Occupational Safety and Health  
Convention and Recommendation, 1981, and the Occupational  
Health Services Convention and Recommendation, 1985, and

Noting, in addition, the Social Security (Minimum Standards)  
Convention, 1952, and considering that the provisions of Article  
77 of that Convention should not be an obstacle to protection  
extended by Members to fishers under social security schemes,  
and

Recognizing that the International Labour Organization considers  
fishing as a hazardous occupation when compared to other  
occupations, and

Noting also Article 1, paragraph 3 of the Seafarers' Identity Documents  
Convention (Revised), 2003, and

Mindful of the core mandate of the Organization, which is to promote  
decent conditions of work, and

Mindful of the need to protect and promote the rights of fishers in this  
regard, and

Recalling the United Nations Convention on the Law of the Sea, 1982,  
and

Taking into account the need to revise the following international  
instruments adopted by the International Labour Conference  
specifically concerning the fishing sector, namely the Hours of  
Work (Fishing) Recommendation, 1920, the Minimum Age

---

## **TEXTE DE LA CONVENTION CONCERNANT LE TRAVAIL DANS LE SECTEUR DE LA PÊCHE**

- La Conférence générale de l'Organisation internationale du Travail,  
Convoquée à Genève par le Conseil d'administration du Bureau  
international du Travail, et s'y étant réunie le 31 mai 2005, en sa  
quatre-vingt-treizième session;
- Reconnaissant que la mondialisation a un impact profond sur le secteur  
de la pêche;
- Notant la Déclaration de l'OIT relative aux principes et droits  
fondamentaux au travail, 1998;
- Tenant compte des droits fondamentaux énoncés dans les conventions  
internationales du travail suivantes: la convention sur le travail  
forcé, 1930, la convention sur la liberté syndicale et la protection  
du droit syndical, 1948, la convention sur le droit d'organisation et  
de négociation collective, 1949, la convention sur l'égalité de  
rémunération, 1951, la convention sur l'abolition du travail forcé,  
1957, la convention concernant la discrimination (emploi et  
profession), 1958, la convention sur l'âge minimum, 1973, et la  
convention sur les pires formes de travail des enfants, 1999;
- Notant les instruments pertinents de l'Organisation internationale du  
Travail, en particulier la convention et la recommandation sur la  
sécurité et la santé des travailleurs, 1981, ainsi que la convention et  
la recommandation sur les services de santé au travail, 1985;
- Notant en outre la convention concernant la sécurité sociale (norme  
minimum), 1952, et considérant que les dispositions de l'article 77  
de ladite convention ne devraient pas faire obstacle à la protection  
offerte aux pêcheurs par les Membres dans le cadre des systèmes  
de sécurité sociale;
- Reconnaissant que l'Organisation internationale du Travail considère  
la pêche comme une activité dangereuse par rapport à d'autres;
- Notant également le paragraphe 3 de l'article 1 de la convention sur les  
pièces d'identité des gens de mer (révisée), 2003;
- Consciente que l'Organisation a pour mandat fondamental de  
promouvoir des conditions de travail décentes;
- Consciente de la nécessité de protéger et de promouvoir les droits des  
pêcheurs en la matière;
- Rappelant la Convention des Nations Unies sur le droit de la mer, 1982;
- Tenant compte de la nécessité de réviser les instruments internationaux  
suivants adoptés par la Conférence internationale du Travail  
concernant spécifiquement le secteur de la pêche, à savoir la  
recommandation sur la durée du travail (pêche), 1920, la

---

(Fishermen) Convention, 1959, the Medical Examination (Fishermen) Convention, 1959, the Fishermen's Articles of Agreement Convention, 1959, and the Accommodation of Crews (Fishermen) Convention, 1966, to bring them up to date and to reach a greater number of the world's fishers, particularly those working on board smaller vessels, and

Noting that the objective of this Convention is to ensure that fishers have decent conditions of work on board fishing vessels with regard to minimum requirements for work on board; conditions of service; accommodation and food; occupational safety and health protection; medical care and social security, and

Having decided upon the adoption of certain proposals with regard to work in the fishing sector, which is the fifth item on the agenda of the session, and

Having determined that these proposals shall take the form of an international Convention;

adopts this            day of June of the year two thousand and five the following Convention, which may be cited as the Work in Fishing Convention, 2005.

## PART I. DEFINITIONS AND SCOPE

### DEFINITIONS

#### *Article 1*

For the purposes of the Convention:

- (a) "commercial fishing" means all fishing operations, including fishing operations on rivers, lakes and canals, with the exception of subsistence fishing and recreational fishing;
- (b) "competent authority" means the minister, government department or other authority having power to issue and enforce regulations, orders or other instructions having the force of law in respect of the subject matter of the provision concerned;
- (c) "consultation" means consultation by the competent authority with the representative organizations of employers and workers concerned, and in particular the representative organizations of fishing vessel owners and fishers, where they exist, on the measures to be taken to give effect to the provisions of the Convention and with respect to any derogation, exemption or other flexible application as allowed under the Convention;

---

convention sur l'âge minimum (pêcheurs), 1959, la convention sur l'examen médical des pêcheurs, 1959, la convention sur le contrat d'engagement des pêcheurs, 1959, et la convention sur le logement à bord des bateaux de pêche, 1966, afin de mettre à jour ces instruments et d'atteindre un plus grand nombre de pêcheurs dans le monde, en particulier ceux travaillant à bord de navires plus petits;

Notant que l'objectif de la présente convention est d'assurer que les pêcheurs bénéficient de conditions décentes pour travailler à bord des navires de pêche en ce qui concerne les conditions minimales requises pour le travail à bord, les conditions de service, le logement et l'alimentation, la protection de la santé et de la sécurité au travail, les soins médicaux et la sécurité sociale;

Après avoir décidé d'adopter diverses propositions relatives au travail dans le secteur de la pêche, question qui constitue le cinquième point à l'ordre du jour de la session;

Après avoir décidé que ces propositions prendraient la forme d'une convention internationale,

adopte, ce jour de juin deux mille cinq, la convention ci-après, qui sera dénommée Convention sur le travail dans la pêche, 2005.

## PARTIE I. DÉFINITIONS ET CHAMP D'APPLICATION

### DÉFINITIONS

#### *Article 1*

Aux fins de la présente convention:

- a) les termes «pêche commerciale» désignent toutes les opérations de pêche, y compris les opérations de pêche dans les cours d'eau, les lacs et les canaux, à l'exception de la pêche de subsistance et de la pêche de loisir;
- b) les termes «autorité compétente» désignent le ministre, le service gouvernemental ou toute autre autorité habilités à édicter et à faire respecter les règlements, arrêtés ou autres instructions ayant force obligatoire dans le domaine visé par la disposition de la convention;
- c) le terme «consultation» désigne la consultation par l'autorité compétente des organisations représentatives d'employeurs et de travailleurs intéressées, et en particulier les organisations représentatives d'armateurs à la pêche et de pêcheurs, lorsqu'elles existent, sur les mesures à prendre pour donner effet aux dispositions de la convention et en ce qui concerne toute dérogation, exemption ou autre forme d'application souple qui est permise par la convention;

- 
- (d) “fishing vessel owner” means the owner of the fishing vessel or any other organization or person who has assumed the responsibility for the operation of the vessel from the owner or other organization or person and who, on assuming such responsibility, has agreed to take over the duties and responsibilities imposed on fishing vessel owners in accordance with the Convention;
- (e) “fisher” means every person employed or engaged in any capacity or carrying out an occupation on board any fishing vessel, including persons working on board who are paid on the basis of a share of the catch but excluding pilots, naval personnel, other persons in the permanent service of a government, shore-based persons carrying out work aboard a fishing vessel and fisheries observers;
- (f) “fisher’s work agreement” means a contract of employment, articles of agreement or other similar arrangements or any other contract governing a fisher’s living and working conditions on board a vessel;
- (g) “fishing vessel” or “vessel” means any ship or boat, of any nature whatsoever, irrespective of the form of ownership, used or intended to be used for the purpose of commercial fishing;
- (h) “new fishing vessel” means a vessel for which:
- (i) the building or major conversion contract is placed on or after the date of the entry into force of the Convention for the Member concerned; or
  - (ii) the building or major conversion contract has been placed before the date of the entry into force of the Convention for the Member concerned, and which is delivered three years or more after that date; or
  - (iii) in the absence of a building contract, on or after the date of the entry into force of the Convention for the Member concerned:
    - the keel is laid, or
    - construction identifiable with a specific vessel begins, or
    - assembly has commenced comprising at least 50 tonnes or 1 per cent of the estimated mass of all structural material, whichever is less;
- (i) “existing vessel” means a vessel that is not a new fishing vessel;
- (j) “gross tonnage” means the gross tonnage calculated in accordance with the tonnage measurement regulations contained in Annex I to the International Convention on Tonnage Measurement of Ships, 1969, or any instrument amending or replacing it;
- (k) “length” (L) shall be taken as 96 per cent of the total length on a waterline at 85 per cent of the least moulded depth measured from the

- 
- d) les termes «armateur à la pêche» désignent le propriétaire du navire ou toute autre entité ou personne à laquelle la responsabilité de l'exploitation du navire a été confiée et qui, en assumant cette responsabilité, a accepté de s'acquitter des tâches et obligations qui incombent aux armateurs à la pêche aux termes de la convention;
- e) le terme «pêcheur» désigne toute personne employée ou engagée à quelque titre que ce soit ou exerçant une activité professionnelle à bord d'un navire de pêche, y compris les personnes travaillant à bord qui sont rémunérées à la part, mais à l'exclusion des pilotes, des équipages de la flotte de guerre, des autres personnes au service permanent du gouvernement, des personnes basées à terre chargées d'effectuer des travaux à bord d'un navire de pêche et des observateurs des pêches;
- f) les termes «accord d'engagement du pêcheur» désignent le contrat d'emploi, le contrat d'engagement ou autre accord similaire ainsi que tout autre contrat régissant les conditions de vie et de travail du pêcheur à bord du navire;
- g) les termes «navire de pêche» ou «navire» désignent tout bateau ou embarcation, quelles qu'en soient la nature et la forme de propriété, affecté ou destiné à être affecté à la pêche commerciale;
- h) les termes «navire de pêche neuf» désignent un navire pour lequel:
- i) le contrat de construction ou de transformation importante est passé à la date d'entrée en vigueur de la convention pour le Membre concerné ou après cette date; ou
  - ii) le contrat de construction ou de transformation importante a été passé avant la date d'entrée en vigueur de la convention pour le Membre concerné, et qui est livré trois ans ou plus après cette date; ou
  - iii) en l'absence d'un contrat de construction à la date d'entrée en vigueur de la convention pour le Membre concerné ou après cette date:
    - la quille est posée; ou
    - une construction permettant d'identifier un navire particulier a commencé; ou
    - le montage a commencé, employant au moins 50 tonnes ou 1 pour cent de la masse estimée de tous les matériaux de structure, si cette dernière valeur est inférieure;
- i) les termes «navire existant» désignent un navire qui n'est pas un navire de pêche neuf;
- j) les termes «jauge brute» désignent le tonnage brut d'un navire évalué conformément aux dispositions de l'annexe I à la Convention internationale de 1969 sur le jaugeage des navires ou de tout instrument l'amendant ou la remplaçant;
- k) le terme «longueur» (L) désigne 96 pour cent de la longueur totale à la flottaison située à une distance de la ligne de quille égale à 85 pour cent

---

keel line, or as the length from the foreside of the stem to the axis of the rudder stock on that waterline, if that be greater. In vessels designed with rake of keel, the waterline on which this length is measured shall be parallel to the designed waterline;

- (l) “length overall” (LOA) shall be taken as the distance in a straight line parallel to the designed waterline between the foremost point of the bow and the aftermost point of the stern;
- (m) “recruitment and placement service” means any person, company, institution, agency or other organization, in the public or the private sector, which is engaged in recruiting fishers on behalf of, or placing fishers with, fishing vessel owners;
- (n) “skipper” means the person having command of a fishing vessel.

## SCOPE

### *Article 2*

1. Except as otherwise provided herein, this Convention applies to all fishers and all fishing vessels engaged in commercial fishing operations.

2. In the event of doubt as to whether a vessel is engaged in commercial fishing, the question shall be determined by the competent authority after consultation.

3. Any Member, after consultation, may extend, in whole or in part, to fishers working on smaller vessels the protection provided in this Convention for fishers working on vessels of 24 metres in length and over.

### *Article 3*

1. The competent authority, after consultation, may exclude from the requirements of this Convention, or certain provisions thereof, where their application raises special and substantial problems in the light of the particular conditions of service of the fishers or the fishing vessels' operations:

- (a) fishing vessels engaged in fishing operations in rivers, lakes and canals; and
- (b) limited categories of fishers or fishing vessels.

2. In the case of exclusions under the preceding paragraph and, where practicable, the competent authority shall take measures, as appropriate, to extend progressively the requirements under this Convention to those categories of fishers and fishing vessels concerned.

- 
- du creux minimal sur quille, ou encore à la distance entre la face avant de l'étrave et l'axe de la mèche du gouvernail à cette flottaison, si cette valeur est supérieure. Pour les navires conçus pour naviguer avec une quille inclinée, la flottaison servant à mesurer cette longueur doit être parallèle à la flottaison en charge prévue;
- l)* les termes «longueur hors tout» (LHT) désignent la distance mesurée en ligne droite parallèlement à la flottaison en charge prévue de l'extrémité avant de la proue à l'extrémité arrière de la poupe;
  - m)* les termes «service de recrutement et de placement» désignent toute personne, société, institution, agence ou autre organisation du secteur public ou privé exerçant des activités relatives au recrutement de pêcheurs pour le compte de, ou au placement de pêcheurs auprès d'armateurs à la pêche;
  - n)* le terme «patron» désigne la personne chargée du commandement d'un navire de pêche;

## CHAMP D'APPLICATION

### *Article 2*

1. Sauf disposition contraire de la présente convention, celle-ci s'applique à tous les pêcheurs et à tous les navires de pêche engagés dans des opérations de pêche commerciale.

2. En cas de doute sur l'affectation d'un navire à la pêche commerciale, il appartient à l'autorité compétente de déterminer son type d'affectation après consultation.

3. Tout Membre peut, après consultation, étendre totalement ou en partie la protection prévue par la convention pour les pêcheurs travaillant sur des navires d'une longueur égale ou supérieure à 24 mètres à ceux travaillant sur des navires plus petits.

### *Article 3*

1. L'autorité compétente peut, après consultation, exclure des prescriptions de la présente convention, ou de certaines de ses dispositions, lorsque leur application soulèverait des difficultés particulières et importantes compte tenu des conditions spécifiques de service des pêcheurs ou des opérations des navires de pêche considérés:

- a)* les navires de pêche engagés dans des opérations de pêche sur les cours d'eau, les lacs et les canaux;
- b)* des catégories limitées de pêcheurs ou de navires de pêche.

2. En cas d'exclusion visée au paragraphe précédent, et lorsque cela est réalisable, l'autorité compétente prend, si besoin est, des mesures pour étendre progressivement les prescriptions prévues par la présente convention à ces catégories de pêcheurs ou de navires de pêche.

---

*Article 4*

1. Each Member which ratifies the Convention shall, in the first report on the application of the Convention submitted under article 22 of the Constitution of the International Labour Organisation:

- (a) list any categories of fishers or fishing vessels excluded under Article 3, paragraph 1;
- (b) give the reasons for such exclusion, stating the respective positions of the representative organizations of employers and workers concerned, in particular the representative organizations of fishing vessel owners and fishers, where they exist; and
- (c) describe any measures taken to provide equivalent protection to the excluded categories.

2. Each Member shall describe in subsequent reports submitted under article 22 of the Constitution the measures taken with a view to extending progressively the provisions of the Convention to the excluded fishers and fishing vessels.

*Article 5*

1. For the purpose of this Convention, the competent authority, after consultation, may decide to use length overall (LOA) in place of length (L) as the basis for measurement, in accordance with the equivalence set out in Annex I. In addition, for the purpose of the paragraphs specified in Annex III of this Convention, the competent authority, after consultation, may decide to use gross tonnage in place of length (L) or length overall (LOA) as the basis for measurement in accordance with the equivalence set out in Annex III.

2. In the reports submitted under article 22 of the Constitution, the Member shall communicate the reasons for the decision taken under this Article and any comments arising from the consultation.

PART II. GENERAL PRINCIPLES

IMPLEMENTATION

*Article 6*

1. Each Member shall implement and enforce laws, regulations or other measures that it has adopted to fulfil its commitments under this Convention with respect to fishers and fishing vessels under its jurisdiction. Other measures may include collective agreements, court decisions, arbitration awards, or other means consistent with national law and practice.

---

#### *Article 4*

1. Tout Membre qui ratifie la convention doit, dans le premier rapport sur l'application de celle-ci qu'il est tenu de présenter en vertu de l'article 22 de la Constitution de l'Organisation internationale du Travail:

- a) indiquer les catégories de pêcheurs ou de navires de pêche qui sont exclues en application du premier paragraphe de l'article 3;
- b) donner les motifs de ces exclusions en exposant les positions respectives des organisations représentatives d'employeurs et de travailleurs intéressées, en particulier des organisations représentatives d'armateurs à la pêche et de pêcheurs, s'il en existe;
- c) décrire toute mesure prise pour octroyer une protection équivalente aux catégories exclues.

2. Tout Membre décrira, dans ses rapports ultérieurs présentés en vertu de l'article 22 de la Constitution, les mesures prises en vue d'étendre progressivement les dispositions de la convention aux catégories de pêcheurs et de navires exclues.

#### *Article 5*

1. Aux fins de la présente convention, l'autorité compétente peut, après consultation, décider d'utiliser la longueur hors tout (LHT) à la place de la longueur (L) comme critère de mesure, conformément à l'équivalence établie à l'annexe I. En outre, aux fins des paragraphes spécifiés à l'annexe III de la présente convention, l'autorité compétente peut, après consultation, décider d'utiliser la jauge brute à la place de la longueur (L) comme critère de mesure, conformément à l'équivalence établie à l'annexe III.

2. Dans les rapports présentés en vertu de l'article 22 de la Constitution, le Membre communiquera les raisons de la décision prise en vertu du présent article et les observations faites lors de la consultation.

## PARTIE II. PRINCIPES GÉNÉRAUX

### MISE EN ŒUVRE

#### *Article 6*

1. Tout Membre doit mettre en œuvre et faire respecter les lois, règlements ou autres mesures qu'il a adoptés afin de s'acquitter de ses obligations aux termes de la présente convention en ce qui concerne les pêcheurs et les navires de pêche relevant de sa compétence; les autres mesures peuvent comprendre des conventions collectives, des décisions judiciaires, des sentences arbitrales et autres moyens conformes à la législation et à la pratique nationales.

---

2. Nothing in this Convention shall affect any law, award or custom, or any agreement between fishing vessel owners and fishers, which ensures more favourable conditions than those provided for in the Convention.

## COMPETENT AUTHORITY AND COORDINATION

### *Article 7*

Each Member shall:

- (a) designate the competent authority or authorities; and
- (b) establish mechanisms for coordination among relevant authorities for the fishing sector at the national and local levels, as appropriate, and define their functions and responsibilities, taking into account their complementarities and national conditions and practice.

## RESPONSIBILITIES OF FISHING VESSEL OWNERS, SKIPPER AND FISHERS

### *Article 8*

1. The fishing vessel owner has the overall responsibility to ensure that the skipper is provided with the necessary resources and facilities to comply with the obligations of this Convention.

2. The skipper has the responsibility for the safety of the fishers on board and the safe operation of the vessel, including but not limited to the following areas:

- (a) providing such supervision as will ensure that, as far as possible, fishers perform their work in the best conditions of safety and health;
- (b) managing the fishers in a manner which respects safety and health, including prevention of fatigue;
- (c) facilitating on-board occupational safety and health awareness training; and
- (d) ensuring compliance with safety of navigation, watch-keeping and associated good seamanship standards.

3. The skipper shall not be constrained by the fishing vessel owner from taking any decision which, in the professional judgement of the skipper, is necessary for the safety of the vessel and its safe navigation and safe operation, or the safety of the fishers on board.

4. Fishers shall comply with the lawful orders of the skipper and applicable safety and health measures.

---

2. Aucune des dispositions de la présente convention n'aura d'incidence sur les lois, décisions, coutumes ou sur les accords entre armateurs à la pêche et pêcheurs qui garantissent des conditions plus favorables que celles prévues par la convention.

## AUTORITÉ COMPÉTENTE ET COORDINATION

### *Article 7*

Tout Membre doit:

- a) désigner l'autorité compétente ou les autorités compétentes;
- b) établir des mécanismes de coordination entre les autorités concernées pour le secteur de la pêche aux niveaux national et local, selon le cas, et définir leurs fonctions et responsabilités en tenant compte de leur complémentarité ainsi que des conditions et de la pratique nationales.

## RESPONSABILITÉS DES ARMATEURS À LA PÊCHE, DES PATRONS ET DES PÊCHEURS

### *Article 8*

1. L'armateur à la pêche a la responsabilité globale de veiller à ce que le patron dispose des ressources et moyens nécessaires pour s'acquitter des obligations de la présente convention.

2. La responsabilité de la sécurité des pêcheurs à bord et du fonctionnement sûr du navire incombe au patron, notamment, mais non exclusivement, dans les domaines suivants:

- a) la supervision, qui doit être réalisée de façon à ce que les pêcheurs puissent, dans la mesure du possible, exécuter leur travail dans les meilleures conditions de sécurité et de santé;
- b) l'organisation du travail des pêcheurs, qui doit se faire en respectant la sécurité et la santé, y compris la prévention de la fatigue;
- c) la mise à disposition à bord d'une formation de sensibilisation à la sécurité et à la santé au travail;
- d) le respect des normes de sécurité de la navigation, de veille et de bonnes pratiques maritimes.

3. L'armateur à la pêche n'entravera pas la liberté du patron de prendre toute décision qui, de l'avis professionnel de ce dernier, est nécessaire pour la sécurité du navire, de sa navigation et de son exploitation, ou pour la sécurité des pêcheurs qui sont à bord.

4. Les pêcheurs doivent respecter les ordres légaux du patron et les mesures de sécurité et de santé applicables.

---

PART III. MINIMUM REQUIREMENTS FOR WORK ON BOARD  
FISHING VESSELS

MINIMUM AGE

*Article 9*

1. The minimum age for work on board a fishing vessel shall be 16 years. However, the competent authority may authorize a minimum age of 15 for persons who are no longer subject to compulsory schooling as provided by national legislation, and who are engaged in vocational training in fishing.

2. The competent authority, in accordance with national laws and practice, may authorize persons of the age of 15 to perform light work during school holidays. In such cases, it shall determine, after consultation, the kinds of work permitted and shall prescribe the conditions in which such work shall be undertaken and the periods of rest required.

3. The minimum age for assignment to activities on board fishing vessels, which by their nature or the circumstances in which they are carried out are likely to jeopardize the health, safety or morals of young persons, shall not be less than 18 years.

4. The types of activities to which paragraph 3 of this Article applies shall be determined by national laws or regulations, or by the competent authority, after consultation, taking into account the risks concerned and the applicable international standards.

5. The performance of the activities referred to in paragraph 3 of this Article as from the age of 16 may be authorized by national laws or regulations, or by decision of the competent authority, after consultation, on condition that the health, safety or morals of the young persons concerned are fully protected and that the young persons concerned have received adequate specific instruction or vocational training and have completed basic pre-sea safety training.

6. The engagement of fishers under the age of 18 for work at night shall be prohibited. For the purpose of this Article, "night" shall be defined in accordance with national law and practice. It shall cover a period of at least nine hours starting no later than midnight and ending no earlier than 5 a.m. An exception to strict compliance with the night work restriction may be made by the competent authority when:

- (a) the effective training of the fishers concerned, in accordance with established programmes and schedules, would be impaired; or
- (b) the specific nature of the duty or a recognized training programme requires that fishers covered by the exception perform duties at night and the authority determines, after consultation, that the work will not have a detrimental impact on their health or well-being.

---

PARTIE III. CONDITIONS MINIMALES REQUISES  
POUR LE TRAVAIL À BORD DES NAVIRES DE PÊCHE

ÂGE MINIMUM

*Article 9*

1. L'âge minimum pour le travail à bord d'un navire de pêche est de 16 ans. Toutefois, l'autorité compétente peut autoriser un âge minimum de 15 ans pour les personnes qui ne sont plus soumises à l'obligation de scolarité imposée par la législation nationale et suivent une formation professionnelle en matière de pêche.

2. L'autorité compétente peut, conformément à la législation et à la pratique nationales, autoriser des personnes âgées de 15 ans à exécuter des travaux légers lors des vacances scolaires. Dans ces cas, elle déterminera, après consultation, les types de travail autorisés et prescrira les conditions dans lesquelles ce travail sera entrepris et les périodes de repos requises.

3. L'âge minimum d'affectation à des activités à bord d'un navire de pêche qui, par leur nature ou les conditions dans lesquelles elles s'exercent, sont susceptibles de compromettre la santé, la sécurité ou la moralité des jeunes travailleurs ne doit pas être inférieur à 18 ans.

4. Les types d'activités visés au paragraphe 3 du présent article sont déterminés par la législation nationale ou l'autorité compétente, après consultation, en tenant compte des risques qu'ils comportent et des normes internationales applicables.

5. L'exécution des activités visées au paragraphe 3 du présent article dès l'âge de 16 ans peut être autorisée par la législation nationale ou par une décision de l'autorité compétente, après consultation, à condition que la santé, la sécurité ou la moralité des jeunes travailleurs soient pleinement garanties, qu'ils aient reçu une instruction spécifique et adéquate ou une formation professionnelle et qu'ils aient suivi intégralement une formation de base aux questions de sécurité préalable à l'embarquement.

6. Il est interdit d'engager un pêcheur de moins de 18 ans pour un travail de nuit. Aux fins du présent article, le terme «nuit» est défini conformément à la législation et à la pratique nationales. Il couvre une période de neuf heures consécutives au moins, commençant au plus tard à minuit et se terminant au plus tôt à 5 heures du matin. Une dérogation à la stricte observation de la restriction concernant le travail de nuit peut être décidée par l'autorité compétente quand:

- a) la formation effective des pêcheurs concernés dans le cadre de programmes et plans d'études établis pourrait en être compromise; ou
- b) la nature particulière de la tâche ou un programme de formation agréé exige que les pêcheurs visés par la dérogation travaillent la nuit et l'autorité décide, après consultation, que ce travail ne portera pas préjudice à leur santé ou à leur bien-être.

---

7. None of the provisions in this Article shall affect any obligations assumed by the Member arising from the ratification of any other international labour Convention.

## MEDICAL EXAMINATION

### *Article 10*

1. No fishers shall work on board a fishing vessel without a valid medical certificate attesting to fitness to perform their duties.

2. The competent authority, after consultation, may grant exemptions from the application of paragraph 1 of this Article, taking into account the health and safety of fishers, size of the vessel, availability of medical assistance and evacuation, duration of the voyage, area of operation, and type of fishing operation.

3. The exemptions in paragraph 2 of this Article shall not apply to a fisher working on a fishing vessel of 24 metres in length and over or which normally remains at sea for more than three days. In urgent cases, the competent authority may permit a fisher to work on such a vessel for a period of a limited and specified duration until a medical certificate can be obtained, provided that the fisher is in possession of an expired medical certificate of a recent date.

### *Article 11*

Each Member shall adopt laws, regulations or other measures providing for:

- (a) the nature of medical examinations;
- (b) the form and content of medical certificates;
- (c) the issue of a medical certificate by a duly qualified medical practitioner or, in the case of a certificate solely concerning eyesight, by a person recognized by the competent authority as qualified to issue such a certificate; these persons shall enjoy full independence in exercising their professional judgement;
- (d) the frequency of medical examinations and the period of validity of medical certificates;
- (e) the right to a further examination by a second independent medical practitioner in the event that a person has been refused a certificate or has had limitations imposed on the work he or she may perform; and
- (f) other relevant requirements.

### *Article 12*

On a fishing vessel of 24 metres in length and over, or on a vessel which normally remains at sea for more than three days:

---

7. Aucune des dispositions de cet article n'a d'incidence sur les obligations souscrites par le Membre en vertu de la ratification d'autres conventions internationales du travail.

## EXAMEN MÉDICAL

### *Article 10*

1. Aucun pêcheur ne doit travailler à bord d'un navire de pêche sans disposer d'un certificat médical valide attestant de son aptitude à exécuter ses tâches.

2. L'autorité compétente peut, après consultation, octroyer des dérogations à l'application du paragraphe 1 du présent article, compte tenu de la santé et de la sécurité des pêcheurs, de la taille du navire, de la disponibilité de l'assistance médicale et des moyens d'évacuation, de la durée du voyage, de la zone d'opération et du type d'activité de pêche.

3. Les dérogations visées au paragraphe 2 du présent article ne s'appliqueront pas à un pêcheur travaillant sur un navire de pêche d'une longueur égale ou supérieure à 24 mètres ou qui passe normalement plus de trois jours en mer. Dans les cas urgents, l'autorité compétente peut autoriser un pêcheur à travailler sur un tel navire pour une période d'une durée limitée et spécifiée en attendant qu'il puisse obtenir un certificat médical, sous réserve que ce pêcheur soit en possession d'un certificat médical expiré depuis peu.

### *Article 11*

Tout Membre doit adopter des lois, règlements ou autres mesures concernant:

- a) la nature des examens médicaux;
- b) la forme et le contenu des certificats médicaux;
- c) la délivrance du certificat médical par du personnel médical dûment qualifié ou, dans le cas d'un certificat concernant seulement la vue, par une personne habilitée par l'autorité compétente à délivrer un tel certificat; ces personnes doivent jouir d'une totale indépendance lorsqu'elles exercent leur jugement professionnel;
- d) la fréquence des examens médicaux et la durée de validité des certificats médicaux;
- e) le droit pour une personne d'être réexaminée par du personnel médical indépendant différent au cas où elle se verrait refuser un certificat ou imposer des limitations au travail qu'elle peut effectuer;
- f) les autres conditions requises.

### *Article 12*

Sur un navire de pêche d'une longueur égale ou supérieure à 24 mètres ou passant normalement plus de trois jours en mer:

- 
1. The medical certificate of a fisher shall state, at a minimum, that:
    - (a) the hearing and sight of the fisher concerned are satisfactory for the fisher's duties on the vessel; and
    - (b) the fisher is not suffering from any medical condition likely to be aggravated by service at sea or to render the fisher unfit for such service or to endanger the health of other persons on board.
  2. The medical certificate shall be valid for a maximum period of two years unless the fisher is under the age of 18, in which case the maximum period of validity shall be one year.
  3. If the period of validity of a certificate expires in the course of a voyage, the certificate shall remain in force until the end of that voyage.

#### PART IV. CONDITIONS OF SERVICE

##### MANNING AND HOURS OF REST

###### *Article 13*

Each Member shall adopt laws, regulations or other measures requiring that owners of fishing vessels flying its flag ensure that:

- (a) their vessels are sufficiently and safely manned with a crew necessary for the safe navigation and operation of the vessel and under the control of a competent skipper; and
- (b) fishers are given regular periods of rest of sufficient length to ensure health and safety.

###### *Article 14*

1. In addition to the requirements set out in Article 13, the competent authority shall:

- (a) for vessels of 24 metres in length and over, establish a minimum level of manning for the safe navigation of the vessel, specifying the number and the qualifications of the fishers required;
- (b) for fishing vessels regardless of size remaining at sea for more than three days, after consultation and for the purpose of limiting fatigue, establish the minimum hours of rest to be provided to fishers. Minimum hours of rest shall not be less than ten hours in any 24-hour period, and 77 hours in any seven-day period.

2. The competent authority may permit, for limited and specified reasons, temporary exceptions to the limits established in paragraph 1(b) of

- 
1. Le certificat médical du pêcheur doit au minimum indiquer:
    - a) que l'ouïe et la vue de l'intéressé sont satisfaisantes compte tenu de ses tâches sur le navire; et
    - b) que l'intéressé n'a aucun problème médical de nature à être aggravé par le service en mer ou qui le rend inapte à ce service ou qui comporterait des risques pour la santé d'autres personnes à bord.
  2. Le certificat médical est valide pendant deux ans au maximum à moins que le pêcheur soit âgé de moins de 18 ans, auquel cas la durée maximale de validité sera d'un an.
  3. Si la période de validité du certificat expire au cours d'un voyage, le certificat reste valide jusqu'à la fin du voyage.

## PARTIE IV. CONDITIONS DE SERVICE

### ÉQUIPAGE ET DURÉE DU REPOS

#### *Article 13*

Tout Membre doit adopter des lois, règlements ou autres mesures prévoyant que les armateurs de navires de pêche battant son pavillon veillent à ce que:

- a) leurs navires soient dotés d'un équipage suffisant en nombre et en qualité pour assurer une navigation et un fonctionnement dans des conditions sûres et sous le contrôle d'un patron compétent;
- b) des périodes de repos régulières d'une fréquence et d'une durée suffisantes pour préserver leur santé et leur sécurité soient octroyées aux pêcheurs.

#### *Article 14*

1. Outre les prescriptions énoncées à l'article 13, l'autorité compétente doit:

- a) pour les navires d'une longueur égale ou supérieure à 24 mètres, fixer l'effectif minimal propre à garantir la sécurité de navigation du navire et préciser le nombre de pêcheurs requis et les qualifications qu'ils doivent posséder;
- b) pour les navires de pêche restant en mer plus de trois jours, quelle que soit leur taille, fixer, après consultation et en vue de limiter la fatigue, une durée minimum de repos pour les pêcheurs. Cette durée ne doit pas être inférieure à dix heures par période de 24 heures, ni à 77 heures par période de sept jours.

2. L'autorité compétente peut, pour des raisons limitées et précises, autoriser qu'il soit dérogé temporairement aux durées de repos fixées à

---

this Article. However, in such circumstances, it shall require that fishers shall receive compensatory periods of rest as soon as practicable.

3. The competent authority, after consultation, may establish alternative requirements to those in paragraphs 1 and 2 of this Article. However, such alternative requirements shall provide at least the same level of protection.

## CREW LIST

### *Article 15*

Every fishing vessel shall carry a crew list, a copy of which shall be provided to authorized persons ashore prior to departure of the vessel, or communicated ashore immediately after departure of the vessel. The competent authority shall determine to whom and when such information shall be provided and for what purpose or purposes.

## FISHER'S WORK AGREEMENT

### *Article 16*

Each Member shall adopt laws, regulations or other measures:

- (a) requiring that fishers working on vessels flying its flag have the protection of a fisher's work agreement that is comprehensible to them and is consistent with the provisions of this Convention; and
- (b) specifying the minimum particulars to be included in fishers' work agreements in accordance with the provisions contained in Annex II.

### *Article 17*

Each Member shall adopt laws, regulations or other measures regarding:

- (a) procedures for ensuring that a fisher has an opportunity to review and seek advice on the terms of the fisher's work agreement before it is concluded;
- (b) where applicable, the maintenance of records concerning the fisher's work under such an agreement; and
- (c) the means of settling disputes in connection with a fisher's work agreement.

---

l'alinéa *b*) du paragraphe 1 du présent article. Dans ces cas, elle doit toutefois exiger que des périodes de repos compensatoires soient accordées aux pêcheurs dès que possible.

3. L'autorité compétente peut, après consultation, établir des prescriptions remplaçant celles fixées aux paragraphes 1 et 2 du présent article. Toutefois, le niveau de protection prévu par lesdites prescriptions ne doit pas être moindre.

## LISTE D'ÉQUIPAGE

### *Article 15*

Tout navire de pêche doit avoir à bord une liste d'équipage, dont un exemplaire est fourni aux personnes autorisées à terre avant le départ du navire ou communiqué à terre immédiatement après. L'autorité compétente doit déterminer à qui, à quel moment et à quelles fins cette information doit être fournie.

## ACCORD D'ENGAGEMENT DU PÊCHEUR

### *Article 16*

Tout Membre doit adopter des lois, règlements ou autres mesures:

- a*) prévoyant que les pêcheurs travaillant à bord des navires battant son pavillon soient protégés par un accord d'engagement qui soit conforme aux dispositions de la présente convention et qui leur soit compréhensible;
- b*) indiquant les mentions minimales à inclure dans les accords d'engagement des pêcheurs, conformément aux dispositions de l'annexe II.

### *Article 17*

Tout Membre doit adopter des lois, règlements ou autres mesures concernant:

- a*) les procédures garantissant que le pêcheur a la possibilité d'examiner les clauses de son accord d'engagement et de demander conseil à ce sujet avant de le conclure;
- b*) s'il y a lieu, la tenue des états de service du pêcheur dans le cadre de cet accord;
- c*) les moyens de régler les différends relatifs à l'accord d'engagement du pêcheur.

---

*Article 18*

The fisher's work agreement, a copy of which shall be provided to the fisher, shall be carried on board and be available to the fisher and, in accordance with national law and practice, to other concerned parties on request.

*Article 19*

Articles 16 to 18 and Annex II do not apply to a fishing vessel owner who is also single-handedly operating the vessel.

*Article 20*

It shall be the responsibility of the fishing vessel owner to ensure that each fisher has a written work agreement signed by both the fisher and the fishing vessel owner or an authorized representative of the fishing vessel owner.

REPATRIATION

*Article 21*

1. Members shall ensure that fishers on a fishing vessel that flies their flag and that enters a foreign port are entitled to repatriation in the event that the fisher's work agreement has expired or has been terminated for justified reasons by the fisher or by the fishing vessel owner, or the fisher is no longer able to carry out the duties required under the work agreement or cannot be expected to carry them out in the specific circumstances. This also applies to fishers from that vessel who are transferred for the same reasons from the vessel to the foreign port.

2. The cost of the repatriation referred to in paragraph 1 of this Article shall be borne by the fishing vessel owner, except where the fisher has been found, in accordance with national laws, regulations or other measures, to be in serious default of his or her work agreement obligations.

3. Members shall prescribe, by means of laws, regulations or other measures, the precise circumstances entitling a fisher covered by paragraph 1 of this Article to repatriation, the maximum duration of service periods on board following which a fisher is entitled to repatriation, and the destinations to which fishers may be repatriated.

4. If a fishing vessel owner fails to provide for the repatriation referred to in this Article, the Member whose flag the vessel flies shall arrange for the repatriation of the fisher concerned and shall be entitled to recover the cost from the fishing vessel owner.

---

### *Article 18*

L'accord d'engagement du pêcheur, dont un exemplaire lui est remis, est disponible à bord, à la disposition du pêcheur et, conformément à la législation et à la pratique nationales, de toute autre partie concernée qui en fait la demande.

### *Article 19*

Les articles 16 à 18 et l'annexe II ne s'appliquent pas au propriétaire de navire qui exploite celui-ci seul.

### *Article 20*

Il incombe à l'armateur à la pêche de veiller à ce que chaque pêcheur soit en possession d'un accord d'engagement écrit, signé à la fois par le pêcheur et l'armateur à la pêche, ou par un représentant autorisé de celui-ci.

## RAPATRIEMENT

### *Article 21*

1. Les Membres doivent veiller à ce que les pêcheurs à bord d'un navire de pêche battant leur pavillon et qui entre dans un port étranger aient le droit d'être rapatriés lorsque l'accord d'engagement du pêcheur a expiré, ou lorsque le pêcheur ou l'armateur à la pêche y a mis fin pour des raisons justifiées, ou lorsque le pêcheur n'est plus en mesure de s'acquitter des tâches qui lui incombent en vertu de l'accord d'engagement ou qu'on ne peut attendre de lui qu'il les exécute compte tenu des circonstances. La présente disposition s'applique également aux pêcheurs de ce navire qui sont transférés pour les mêmes raisons du navire vers un port étranger.

2. Les frais du rapatriement visé au paragraphe 1 du présent article doivent être pris en charge par l'armateur à la pêche, sauf si le pêcheur a été reconnu, conformément à la législation nationale ou à d'autres dispositions applicables, coupable d'un manquement grave aux obligations de son accord d'engagement.

3. Les Membres doivent déterminer, par voie de législation ou autre, les circonstances précises donnant droit à un rapatriement, la durée maximale des périodes d'embarquement au terme desquelles les pêcheurs visés au paragraphe 1 du présent article ont droit au rapatriement, et les destinations vers lesquelles ils peuvent être rapatriés.

4. Si l'armateur à la pêche omet de pourvoir au rapatriement visé au présent article, le Membre dont le navire bat pavillon doit organiser le rapatriement du pêcheur concerné et a le droit de recouvrer les frais auprès de l'armateur à la pêche.

---

## RECRUITMENT AND PLACEMENT

### *Article 22*

1. Each Member that operates a public service providing recruitment and placement for fishers shall ensure that the service forms part of, or is coordinated with, a public employment service for all workers and employers.

2. Any private service providing recruitment and placement for fishers which operates in the territory of a Member shall do so in conformity with a standardized system of licensing or certification or other form of regulation, which shall be established, maintained or modified only after consultation.

3. Each Member shall, by means of laws, regulations or other measures:

- (a) prohibit recruitment and placement services from using means, mechanisms or lists intended to prevent or deter fishers from engaging for work;
- (b) require that no fees or other charges for recruitment and placement of fishers be borne directly or indirectly, in whole or in part, by the fisher; and
- (c) determine the conditions under which any licence, certificate or similar authorization of a private recruitment or placement service may be suspended or withdrawn in case of violation of relevant laws or regulations; and specify the conditions under which private recruitment and placement services can operate.

## PAYMENT OF FISHERS

### *Article 23*

Each Member, after consultation, shall adopt laws, regulations or other measures providing that fishers who are paid a wage are ensured a monthly or regular payment.

### *Article 24*

Each Member shall require that all fishers working on board fishing vessels shall be given a means to transmit all or part of their payments received, including advances, to their families at no cost.

## PART V. ACCOMMODATION AND FOOD

### *Article 25*

Each Member shall adopt laws, regulations or other measures for fishing vessels that fly its flag with respect to accommodation, food and potable water on board.

---

## RECRUTEMENT ET PLACEMENT

### *Article 22*

1. Tout Membre qui a mis en place un service public de recrutement et de placement de pêcheurs doit s'assurer que ce service fait partie du service public de l'emploi ouvert à l'ensemble des travailleurs et des employeurs ou qu'il agit en coordination avec celui-ci.

2. Les services privés de recrutement et de placement de pêcheurs qui sont établis sur le territoire d'un Membre doivent exercer leur activité en vertu d'un système de licence ou d'agrément normalisé ou d'une autre forme de réglementation, lesquels ne seront établis, maintenus ou modifiés qu'après consultation.

3. Tout Membre doit, par voie de législation ou autres mesures:

- a) interdire aux services de recrutement et de placement d'avoir recours à des moyens, mécanismes ou listes visant à empêcher ou à dissuader les pêcheurs d'obtenir un engagement;
- b) interdire que des honoraires ou autres frais soient supportés par les pêcheurs, directement ou indirectement, en tout ou en partie, pour le recrutement et le placement;
- c) fixer les conditions dans lesquelles une licence, un agrément ou toute autre autorisation d'un service privé de recrutement et de placement peuvent être suspendus ou retirés en cas d'infraction à la législation pertinente et préciser les conditions dans lesquelles lesdits services privés peuvent exercer leurs activités.

## PAIEMENTS DES PÊCHEURS

### *Article 23*

Tout Membre adopte, après consultation, une législation ou d'autres mesures prescrivant que les pêcheurs qui perçoivent un salaire seront payés mensuellement ou à intervalles réguliers.

### *Article 24*

Tout Membre doit exiger que tous les pêcheurs travaillant à bord de navires de pêche aient les moyens de faire parvenir à leur famille et sans frais tout ou partie des paiements reçus, y compris les avances.

## PARTIE V. LOGEMENT ET ALIMENTATION

### *Article 25*

Tout Membre doit adopter une législation ou d'autres mesures relatives au logement, à la nourriture et à l'eau potable à bord des navires de pêche battant son pavillon.

---

### *Article 26*

Each Member shall adopt laws, regulations or other measures requiring that accommodation on board fishing vessels that fly its flag shall be of sufficient size and quality and appropriately equipped for the service of the vessel and the length of time fishers live on board. In particular, such measures shall address, as appropriate, the following issues:

- (a) approval of plans for the construction or modification of fishing vessels in respect of accommodation;
- (b) maintenance of accommodation and galley spaces with due regard to hygiene and overall safe, healthy and comfortable conditions;
- (c) ventilation, heating, cooling and lighting;
- (d) mitigation of excessive noise and vibration;
- (e) location, size, construction materials, furnishing and equipping of sleeping rooms, mess rooms and other accommodation spaces;
- (f) sanitary facilities, including toilets and washing facilities, and supply of sufficient hot and cold water; and
- (g) procedures for responding to complaints concerning accommodation that does not meet the requirements of this Convention.

### *Article 27*

Each Member shall adopt laws, regulations or other measures requiring that:

- (a) the food carried and served on board be of a sufficient nutritional value, quality and quantity;
- (b) potable water be of sufficient quality and quantity; and
- (c) the food and water shall be provided by the fishing vessel owner at no cost to the fisher. However, the cost can be recovered as an operational cost if the collective agreement governing a share system or a fisher's work agreement so provides.

### *Article 28*

1. The laws, regulations or other measures to be adopted by the Member in accordance with Articles 25 to 27 shall give full effect to Annex III concerning fishing vessel accommodation. Annex III may be amended in the manner provided for in Article 45.

2. A Member which is not in a position to implement the provisions of Annex III may, after consultation, adopt provisions in its laws and regulations or other measures which are substantially equivalent to the provisions set out in Annex III, with the exception of provisions related to Article 27.

---

### *Article 26*

Tout Membre doit adopter une législation ou d'autres mesures prévoyant que le logement à bord des navires de pêche battant son pavillon sera d'une qualité et d'une taille suffisantes et qu'il sera équipé de façon adaptée au service du navire et à la durée du séjour des pêcheurs à bord. En particulier, ces mesures régleront, selon le cas, les questions suivantes:

- a) approbation des plans de construction ou de modification des navires de pêche en ce qui concerne le logement;
- b) maintien du logement et de la cuisine dans des conditions générales d'hygiène, de sécurité, de santé et de confort;
- c) ventilation, chauffage, refroidissement et éclairage;
- d) réduction des bruits et vibrations excessifs;
- e) emplacement, taille, matériaux de construction, fournitures et équipement des cabines, réfectoires et autres espaces de logement;
- f) installations sanitaires, comprenant des toilettes et des moyens de lavage, et fourniture d'eau chaude et froide en quantité suffisante;
- g) procédures d'examen des plaintes concernant des conditions de logement qui ne satisfont pas aux prescriptions de la présente convention.

### *Article 27*

Tout Membre doit adopter une législation ou d'autres mesures prévoyant que:

- a) la nourriture transportée et servie à bord doit être d'une valeur nutritionnelle, d'une qualité et d'une quantité suffisantes;
- b) l'eau potable doit être d'une qualité et d'une quantité suffisantes;
- c) la nourriture et l'eau potable doivent être fournies par l'armateur à la pêche sans frais pour le pêcheur. Toutefois, les frais peuvent être recouverts sous forme de coûts d'exploitation pour autant qu'une convention collective régissant un système de rémunération à la part ou que l'accord d'engagement du pêcheur le prévoie.

### *Article 28*

1. La législation ou les autres mesures adoptées par le Membre conformément aux articles 25 à 27 doivent donner pleinement effet à l'annexe III concernant le logement à bord des navires de pêche. L'annexe III peut être amendée de la façon prévue à l'article 45.

2. Un Membre qui n'est pas en mesure d'appliquer les dispositions de l'annexe III peut, après consultation, adopter dans sa législation des dispositions ou d'autres mesures équivalentes dans l'ensemble aux dispositions énoncées à l'annexe III, à l'exception des dispositions se rapportant à l'article 27.

---

PART VI. MEDICAL CARE, HEALTH PROTECTION,  
AND SOCIAL SECURITY

MEDICAL CARE

*Article 29*

Each Member shall adopt laws, regulations or other measures requiring that:

- (a) fishing vessels carry appropriate medical equipment and medical supplies for the service of the vessel, taking into account the number of fishers on board, the area of operation and the length of the voyage;
- (b) fishing vessels have at least one person on board who is qualified or trained in first aid and other forms of medical care and who has the necessary knowledge to use the medical equipment and supplies for the vessel concerned, taking into account the number of fishers on board, the area of operation and the length of the voyage;
- (c) medical equipment and supplies carried on board be accompanied by instructions or other information in a language and format understood by the person or persons referred to in subparagraph (b);
- (d) fishing vessels be equipped for radio or satellite communication with persons or services ashore that can provide medical advice, taking into account the area of operation and the length of the voyage; and
- (e) fishers have the right to medical treatment ashore and the right to be taken ashore in a timely manner for treatment in the event of serious injury or illness.

*Article 30*

For fishing vessels of 24 metres in length and over, taking into account the number of fishers on board, the area of operation and the duration of the voyage, each Member shall adopt laws, regulations or other measures requiring that:

- (a) the competent authority prescribe the medical equipment and medical supplies to be carried on board;
- (b) the medical equipment and medical supplies carried on board be properly maintained and inspected at regular intervals established by the competent authority by responsible persons designated or approved by the competent authority;
- (c) the vessels carry a medical guide adopted or approved by the competent authority, or the (ILO/IMO/WHO) *International Medical Guide for Ships*;

---

PARTIE VI. SOINS MÉDICAUX, PROTECTION DE LA SANTÉ  
ET SÉCURITÉ SOCIALE

SOINS MÉDICAUX

*Article 29*

Tout Membre doit adopter une législation ou d'autres mesures prévoyant que:

- a) les navires de pêche soient dotés de fournitures et d'un matériel médicaux adaptés au service du navire, compte tenu du nombre de pêcheurs à bord, de la zone d'opération et de la durée du voyage;
- b) les navires de pêche aient à leur bord au moins une personne qualifiée ou formée pour donner les premiers secours et autres formes de soins médicaux, qui sache utiliser les fournitures et le matériel médicaux dont est doté le navire, compte tenu du nombre de pêcheurs à bord, de la zone d'opération et de la durée du voyage;
- c) les fournitures et le matériel médicaux présents à bord soient accompagnés d'instructions ou d'autres informations dans une langue et une présentation compréhensibles à la personne ou aux personnes mentionnées à l'alinéa b);
- d) les navires de pêche soient équipés d'un système de communication par radio ou par satellite avec des personnes ou services à terre pouvant fournir des consultations médicales, compte tenu de la zone d'opération et de la durée du voyage;
- e) les pêcheurs aient le droit de bénéficier d'un traitement médical à terre et d'être débarqués à cet effet en temps voulu en cas de lésion ou de maladie grave.

*Article 30*

Pour les navires de pêche d'une longueur égale ou supérieure à 24 mètres, compte tenu du nombre de pêcheurs à bord, de la zone d'opération et de la durée du voyage, tout Membre doit adopter une législation ou d'autres mesures prévoyant que:

- a) l'autorité compétente prescrive le matériel médical et les fournitures médicales à avoir à disposition à bord;
- b) le matériel médical et les fournitures médicales disponibles à bord soient entretenus de façon adéquate et inspectés à des intervalles réguliers, fixés par l'autorité compétente, par des responsables désignés ou agréés par celle-ci;
- c) les navires soient pourvus d'un guide médical de bord adopté ou approuvé par l'autorité compétente ou du *Guide médical international de bord* (OIT/OMI/OMS);

- 
- (d) the vessels have access to a prearranged system of medical advice to vessels at sea by radio or satellite communication, including specialist advice, which shall be available at all times;
  - (e) the vessels carry on board a list of radio or satellite stations through which medical advice can be obtained; and
  - (f) to the extent consistent with the Member's national law and practice, medical care while the fisher is on board or landed in a foreign port be provided free of charge to the fisher.

## OCCUPATIONAL SAFETY AND HEALTH AND ACCIDENT PREVENTION

### *Article 31*

Each Member shall adopt laws, regulations or other measures concerning:

- (a) the prevention of occupational accidents, occupational diseases and work-related risks on board fishing vessels, including risk evaluation and management, training and on-board instruction of fishers;
- (b) training for fishers in the handling of types of fishing gear they will use and in the knowledge of the fishing operations in which they will be engaged;
- (c) the obligations of fishing vessel owners, fishers and others concerned, due account being taken of the safety and health of fishers under the age of 18;
- (d) the reporting and investigation of accidents on board fishing vessels flying its flag; and
- (e) the setting up of joint committees on occupational safety and health or, after consultation, of other appropriate bodies.

### *Article 32*

1. The requirements of this Article shall apply to fishing vessels of 24 metres in length and over normally remaining at sea for more than three days and, after consultation, to other vessels, taking into account the number of fishers on board, the area of operation, and the duration of the voyage.

2. The competent authority shall:

- (a) after consultation, require that the fishing vessel owner, in accordance with national laws, regulations, collective bargaining agreements and practice, establish on-board procedures for the prevention of occupational accidents, injuries and diseases, taking into account the specific hazards and risks on the fishing vessel concerned; and

- 
- d) les navires en mer aient accès, au moyen d'arrangements préalables, à des consultations médicales par radio ou par satellite, y compris à des conseils de spécialistes, à toute heure du jour ou de la nuit;
  - e) les navires conservent à bord une liste de stations de radio ou de satellite par l'intermédiaire desquelles des consultations médicales peuvent être obtenues;
  - f) dans une mesure conforme à la législation et à la pratique du Membre, les soins médicaux dispensés au pêcheur lorsqu'il est à bord ou débarqué dans un port étranger lui soient fournis gratuitement.

SANTÉ ET SÉCURITÉ AU TRAVAIL ET PRÉVENTION  
DES ACCIDENTS DU TRAVAIL

*Article 31*

Tout Membre doit adopter une législation ou d'autres mesures concernant:

- a) la prévention des accidents du travail, des maladies professionnelles et des risques liés au travail à bord des navires, notamment l'évaluation et la gestion des risques, la formation des pêcheurs et l'instruction à bord;
- b) la formation des pêcheurs à l'utilisation des engins de pêche dont ils se serviront et à la connaissance des opérations de pêche qu'ils auront à effectuer;
- c) les obligations des armateurs à la pêche, des pêcheurs et autres personnes intéressées, compte dûment tenu de la santé et de la sécurité des pêcheurs âgés de moins de 18 ans;
- d) la déclaration des accidents survenant à bord des navires de pêche battant son pavillon et la réalisation d'enquêtes sur ces accidents;
- e) la constitution de comités paritaires de santé et de sécurité au travail ou, après consultation, d'autres organismes qualifiés.

*Article 32*

1. Les prescriptions de cet article s'appliquent aux navires d'une longueur égale ou supérieure à 24 mètres qui restent habituellement en mer pour plus de trois jours et, après consultation, à d'autres navires, compte tenu du nombre de pêcheurs à bord, de la zone d'opération et de la durée du voyage.

2. L'autorité compétente doit:

- a) après consultation, faire obligation à l'armateur à la pêche d'établir, conformément à la législation, aux conventions collectives et à la pratique nationales, des procédures à bord visant à prévenir les accidents du travail et les lésions et maladies professionnelles, compte tenu des dangers et risques spécifiques du navire de pêche concerné;

- 
- (b) require that fishing vessel owners, skippers, fishers and other relevant persons be provided with sufficient and suitable guidance, training material, or other appropriate information on how to assess and manage risks to safety and health on board fishing vessels.

3. Fishing vessel owners shall:

- (a) ensure that every fisher on board is provided with appropriate personal protective clothing and equipment;
- (b) ensure that every fisher on board has received basic safety training approved by the competent authority; the competent authority may grant written exemptions from this requirement for fishers who have demonstrated equivalent knowledge and experience; and
- (c) ensure that fishers are sufficiently and reasonably familiarized with equipment and its methods of operation, including relevant safety measures, prior to using the equipment or participating in the operations concerned.

*Article 33*

Risk evaluation in relation to fishing shall be conducted, as appropriate, with the participation of fishers or their representatives.

SOCIAL SECURITY

*Article 34*

Each Member shall ensure that fishers ordinarily resident in its territory, and their dependants to the extent provided in national law, are entitled to benefit from social security protection under conditions no less favourable than those applicable to other workers, including employed and self-employed persons, ordinarily resident in its territory.

*Article 35*

Each Member shall undertake to take steps, according to national circumstances, to achieve progressively comprehensive social security protection for all fishers who are ordinarily resident in its territory.

*Article 36*

Members shall cooperate through bilateral or multilateral agreements or other arrangements, in accordance with national laws, regulations or practice:

- 
- b) exiger que les armateurs à la pêche, les patrons, les pêcheurs et les autres personnes concernées reçoivent suffisamment de directives et de matériel de formation appropriés ainsi que toute autre information pertinente sur la manière d'évaluer et de gérer les risques en matière de santé et de sécurité à bord des navires de pêche.

3. Les armateurs à la pêche doivent:

- a) veiller à ce que tous les pêcheurs à bord reçoivent des vêtements et équipements de protection individuelle appropriés;
- b) veiller à ce que tous les pêcheurs à bord aient reçu une formation de base en matière de sécurité, approuvée par l'autorité compétente; cette dernière peut cependant accorder une dérogation écrite dans le cas des pêcheurs qui démontrent qu'ils possèdent des connaissances et une expérience équivalentes;
- c) veiller à ce que les pêcheurs soient suffisamment et convenablement familiarisés avec l'équipement et les opérations de pêche, y compris avec les mesures de sécurité s'y rapportant, avant d'utiliser cet équipement ou de participer auxdites opérations.

### *Article 33*

L'évaluation des risques concernant la pêche est effectuée, selon le cas, avec la participation de pêcheurs ou de leurs représentants.

## SÉCURITÉ SOCIALE

### *Article 34*

Tout Membre veillera à ce que les pêcheurs résidant habituellement sur son territoire et, dans la mesure prévue par la législation nationale, les personnes à leur charge bénéficient de la sécurité sociale à des conditions non moins favorables que celles qui s'appliquent aux autres travailleurs, y compris les personnes salariées ou indépendantes, résidant habituellement sur son territoire.

### *Article 35*

Tout Membre s'engage à prendre des mesures, en fonction de la situation nationale, pour assurer progressivement une protection complète de sécurité sociale à tous les pêcheurs résidant habituellement sur son territoire.

### *Article 36*

Les Membres doivent coopérer, dans le cadre d'accords bilatéraux ou multilatéraux ou d'autres arrangements, en conformité avec la législation ou la pratique nationales, en vue:

- 
- (a) to achieve progressively comprehensive social security protection for fishers, taking into account the principle of equality of treatment irrespective of nationality; and
  - (b) to ensure the maintenance of social security rights which have been acquired or are in the course of acquisition by all fishers regardless of residence.

*Article 37*

Notwithstanding the attribution of responsibilities in Articles 34, 35 and 36, Members may determine, through bilateral and multilateral agreements and through provisions adopted in the framework of regional economic integration organizations, other rules concerning the social security legislation to which fishers are subject.

PROTECTION IN THE CASE OF WORK-RELATED SICKNESS,  
INJURY OR DEATH

*Article 38*

1. Each Member shall take measures to provide fishers with protection, in accordance with national laws, regulations or practice, for work-related sickness, injury or death.

2. In the event of injury due to occupational accident or disease, the fisher shall have access to:

- (a) appropriate medical care; and
- (b) the corresponding compensation in accordance with national laws and regulations.

3. Taking into account the characteristics within the fishing sector, the protection referred to in paragraph 1 of this Article may be ensured through:

- (a) a system for fishing vessel owners' liability; or
- (b) compulsory insurance, workers' compensation or other schemes.

*Article 39*

1. In the absence of national provisions for fishers, each Member shall adopt laws, regulations or other measures to ensure that fishing vessel owners are responsible for the provision to fishers on vessels flying its flag, of health protection and medical care while employed or engaged or working on a vessel at sea or in a foreign port. Such laws, regulations or other measures shall ensure that fishing vessel owners are responsible for defraying the expenses of medical care, including related material assistance and support, during medical treatment in a foreign country, until the fisher has been repatriated.

- 
- a) d'assurer progressivement une protection complète de sécurité sociale aux pêcheurs, sans considération de la nationalité, en tenant compte du principe d'égalité de traitement;
  - b) de garantir le maintien des droits en matière de sécurité sociale acquis ou en cours d'acquisition par tous les pêcheurs, indépendamment de leur lieu de résidence.

#### *Article 37*

Nonobstant l'attribution des responsabilités prévues aux articles 34, 35 et 36, les Membres peuvent déterminer, par des accords bilatéraux ou multilatéraux et par des dispositions adoptées dans le cadre d'organisations régionales d'intégration économique, d'autres règlements touchant à la législation en matière de sécurité sociale applicable aux pêcheurs.

#### PROTECTION EN CAS DE MALADIE, LÉSIONS OU DÉCÈS LIÉS AU TRAVAIL

#### *Article 38*

1. Tout Membre prend des mesures en vue d'assurer aux pêcheurs une protection, conformément à la législation et à la pratique nationales, en cas de maladie, de lésion ou de décès liés au travail.

2. En cas de lésion provoquée par un accident du travail ou une maladie professionnelle, le pêcheur doit:

- a) avoir accès à des soins médicaux appropriés;
- b) bénéficier d'une indemnisation correspondante conformément à la législation nationale.

3. Compte tenu des caractéristiques du secteur de la pêche, la protection visée au paragraphe 1 du présent article pourra être assurée:

- a) soit par un régime reposant sur la responsabilité de l'armateur à la pêche;
- b) soit par un régime d'assurance obligatoire d'indemnisation des travailleurs ou d'autres régimes.

#### *Article 39*

1. En l'absence de dispositions nationales applicables aux pêcheurs, tout Membre adopte une législation ou d'autres mesures visant à garantir que les armateurs à la pêche assurent la protection de la santé et les soins médicaux des pêcheurs lorsque ces derniers sont employés ou engagés ou travaillent à bord d'un navire battant son pavillon, en mer ou dans un port étranger. Ladite législation ou les autres mesures doivent garantir que les armateurs à la pêche acquittent les frais des soins médicaux, y compris l'aide et le soutien matériels correspondants pendant la durée des traitements médicaux dispensés à l'étranger jusqu'au rapatriement du pêcheur.

---

2. National laws or regulations may permit the exclusion of the liability of the fishing vessel owner if the injury occurred otherwise than on the service of the vessel or the sickness or infirmity was concealed during engagement, or the injury or sickness was due to a wilful act, default or misbehaviour.

## PART VII. COMPLIANCE AND ENFORCEMENT

### *Article 40*

Each Member shall exercise effective jurisdiction and control over vessels that fly its flag by establishing a system for ensuring compliance with the standards of this Convention including, as appropriate, inspections, reporting, monitoring, complaints procedures, appropriate penalties and corrective measures, in accordance with national laws or regulations.

### *Article 41*

Members shall require that fishing vessels remaining at sea for more than three days, whether 24 metres in length and over or normally on voyages 200 nautical miles beyond the coastline of the flag State or the outer edge of its continental shelf, whichever is greater, carry a valid document issued by the competent authority stating that the vessel has been inspected by the competent authority or on its behalf, for compliance with the provisions of this Convention concerning living and working conditions. Such a document shall be valid for a period of five years or, if issued on the same date as the International Fishing Vessel Safety Certificate, for the period of validity of that certificate.

### *Article 42*

1. The competent authority shall appoint a sufficient number of qualified inspectors to fulfil its responsibilities under Article 41.

2. In establishing an effective system for the inspection of living and working conditions on board fishing vessels, a Member, where appropriate, may authorize public institutions or other organizations that it recognizes as competent and independent to carry out inspections and issue documents. In all cases, the Member shall remain fully responsible for the inspection and issuance of the related documents concerning the living and working conditions of the fishers on fishing vessels that fly its flag.

### *Article 43*

1. A Member which receives a complaint or obtains evidence that a fishing vessel that flies its flag does not conform to the requirements of this

---

2. La législation nationale peut prévoir de décharger l'armateur à la pêche de sa responsabilité dans le cas où l'accident n'est pas survenu en service à bord du navire de pêche ou si la maladie ou l'infirmité a été dissimulée lors de l'engagement ou si l'accident ou la maladie est imputable à un acte intentionnel, une faute intentionnelle ou un écart de conduite du pêcheur.

## PARTIE VII. RESPECT ET APPLICATION

### *Article 40*

Tout Membre exerce une compétence et un contrôle effectifs sur les navires battant son pavillon en se dotant d'un système propre à garantir le respect des normes de la présente convention, notamment en prévoyant, s'il y a lieu, la conduite d'inspections, l'établissement de rapports, une procédure de règlement des plaintes, un suivi et la mise en œuvre de sanctions et mesures correctives appropriées conformément à la législation nationale.

### *Article 41*

Les Membres doivent exiger que les navires de pêche qui restent en mer pour plus de trois jours et qui, soit ont une longueur égale ou supérieure à 24 mètres, soit naviguent habituellement à plus de 200 milles nautiques de la côte de l'Etat du pavillon ou du rebord externe du plateau continental, si celui-ci est plus éloigné, aient à bord un document valide délivré par l'autorité compétente, indiquant qu'ils ont été inspectés par l'autorité compétente ou en son nom, en vue de déterminer leur conformité aux dispositions de la convention concernant les conditions de vie et de travail. La durée de validité de ce document est de cinq ans ou identique à la durée de validité du certificat international de sécurité des navires de pêche s'il a été délivré à la même date.

### *Article 42*

1. L'autorité compétente désignera un nombre suffisant d'inspecteurs qualifiés afin d'assumer les responsabilités qui lui incombent en vertu de l'article 41.

2. Aux fins de l'instauration d'un système efficace d'inspection des conditions de vie et de travail à bord des navires de pêche, un Membre peut, s'il y a lieu, autoriser des institutions publiques ou d'autres organismes dont il reconnaît la compétence et l'indépendance à réaliser des inspections et à délivrer des certificats. Dans tous les cas, le Membre demeurera entièrement responsable de l'inspection et de la délivrance des certificats correspondants relatifs aux conditions de vie et de travail des pêcheurs à bord des navires battant son pavillon.

### *Article 43*

1. Un Membre qui reçoit une plainte ou qui acquiert la preuve qu'un navire battant son pavillon ne se conforme pas aux prescriptions de la

---

Convention shall take the steps necessary to investigate the matter and ensure that action is taken to remedy any deficiencies found.

2. If a Member, in whose port a fishing vessel calls in the normal course of its business or for operational reasons, receives a complaint or obtains evidence that such vessel does not conform to the standards of this Convention, it may prepare a report addressed to the government of the flag State of the vessel, with a copy to the Director-General of the International Labour Office, and may take measures necessary to rectify any conditions on board which are clearly hazardous to safety or health.

3. In taking the measures referred to in paragraph 2 of this Article, the Member shall notify forthwith the nearest representative of the flag State and, if possible, shall have such representative present. The Member shall not unreasonably detain or delay the vessel.

4. For the purpose of this Article, the complaint may be submitted by a fisher, a professional body, an association, a trade union or, generally, any person with an interest in the safety of the vessel, including an interest in safety or health hazards to the fishers on board.

5. This Article does not apply to complaints which a Member considers to be manifestly unfounded.

#### *Article 44*

Each Member shall apply the Convention in such a way as to ensure that the fishing vessels flying the flag of States that have not ratified the Convention do not receive more favourable treatment than fishing vessels that fly the flag of Members that have ratified it.

### PART VIII. AMENDMENT OF ANNEXES I, II AND III

#### *Article 45*

1. Subject to the relevant provisions of this Convention, the International Labour Conference may amend Annexes I, II and III. The Governing Body of the International Labour Office may place an item on the agenda of the Conference regarding proposals for such amendments established by a tripartite meeting of experts. The decision to adopt the proposals shall require a majority of two-thirds of the votes cast by the delegates present at the Conference, including at least half the Members that have ratified this Convention.

2. Any amendment adopted in accordance with paragraph 1 of this Article shall enter into force six months after the date of its adoption for any Member that has ratified this Convention, unless such Member has given written notice to the Director-General that it shall not enter into force for that Member, or shall only enter into force at a later date upon subsequent written notification.

---

convention prend les dispositions nécessaires aux fins d'enquête et s'assure que des mesures sont prises pour remédier aux défaillances constatées.

2. Si un Membre dans le port duquel un navire de pêche fait escale dans le cours normal de son activité ou pour une raison inhérente à son exploitation reçoit une plainte ou acquiert la preuve que ce navire de pêche n'est pas conforme aux normes de la présente convention, il peut adresser un rapport au gouvernement de l'Etat du pavillon, avec copie au Directeur général du Bureau international du Travail, et prendre les mesures nécessaires pour redresser toute situation à bord qui constitue manifestement un danger pour la sécurité ou la santé.

3. S'il prend les mesures mentionnées au paragraphe 2 du présent article, le Membre doit en informer immédiatement le plus proche représentant de l'Etat du pavillon et demander à celui-ci d'être présent si possible. Il ne doit pas retenir ou retarder indûment le navire.

4. Aux fins du présent article, une plainte peut être soumise par un pêcheur, un organisme professionnel, une association, un syndicat ou, de manière générale, toute personne ayant un intérêt à la sécurité du navire, y compris un intérêt à la sécurité ou à la santé des pêcheurs à bord.

5. Cet article ne s'applique pas aux plaintes qu'un Membre considère manifestement infondées.

#### *Article 44*

Tout Membre appliquera la convention de manière à garantir que les navires de pêche battant pavillon d'Etats qui n'ont pas ratifié la convention ne bénéficient pas d'un traitement plus favorable que celui accordé aux navires battant pavillon des Membres qui l'ont ratifiée.

### PARTIE VIII. AMENDEMENTS DES ANNEXES I, II ET III

#### *Article 45*

1. Sous réserve des dispositions pertinentes de la présente convention, la Conférence internationale du Travail peut amender les annexes I, II et III. Le Conseil d'administration du Bureau international du Travail peut inscrire à l'ordre du jour de la Conférence des propositions d'amendements établies par une réunion tripartite d'experts. La majorité des deux tiers des voix des délégués présents à la Conférence, comprenant au moins la moitié des Membres ayant ratifié cette convention, est requise pour l'adoption d'amendements.

2. Tout amendement adopté conformément au paragraphe 1 du présent article entre en vigueur six mois après la date de son adoption pour tout Membre ayant ratifié la présente convention, à moins que le Membre en question n'ait adressé au Directeur général une notification écrite précisant que cet amendement n'entrera pas en vigueur à son égard ou n'entrera en vigueur qu'ultérieurement à la suite d'une nouvelle notification.

---

PART IX. FINAL PROVISIONS

*Article 46*

This Convention revises the Minimum Age (Fishermen) Convention, 1959, the Medical Examination (Fishermen) Convention, 1959, the Fishermen's Articles of Agreement Convention, 1959, and the Accommodation of Crews (Fishermen) Convention, 1966.

*Article 47*

The formal ratifications of this Convention shall be communicated to the Director-General of the International Labour Office for registration.

*Article 48*

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Director-General.

2. It shall come into force twelve months after the date on which the ratifications of ten Members, eight of which are coastal States, have been registered with the Director-General.

3. Thereafter, this Convention shall come into force for any Member twelve months after the date on which its ratification is registered.

*Article 49*

1. A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention first comes into force, by an act communicated to the Director-General of the International Labour Office for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of ten years and, thereafter, may denounce this Convention within the first year of each new period of ten years under the terms provided for in this Article.

*Article 50*

1. The Director-General of the International Labour Office shall notify all Members of the International Labour Organization of the registration of all ratifications and denunciations that have been communicated by the Members of the Organization.

---

## PARTIE IX. DISPOSITIONS FINALES

### *Article 46*

La présente convention révisé la convention sur l'âge minimum (pêcheurs), 1959, la convention sur l'examen médical des pêcheurs, 1959, la convention sur le contrat d'engagement des pêcheurs, 1959, et la convention sur le logement à bord des bateaux de pêche, 1966.

### *Article 47*

Les ratifications formelles de la présente convention sont communiquées au Directeur général du Bureau international du Travail aux fins d'enregistrement.

### *Article 48*

1. La présente convention ne lie que les Membres de l'Organisation internationale du Travail dont la ratification a été enregistrée par le Directeur général du Bureau international du Travail.

2. Elle entre en vigueur douze mois après que les ratifications de dix Membres comprenant huit États côtiers ont été enregistrées par le Directeur général.

3. Par la suite, cette convention entre en vigueur pour chaque Membre douze mois après la date de l'enregistrement de sa ratification.

### *Article 49*

1. Tout Membre ayant ratifié la présente convention peut la dénoncer à l'expiration d'une période de dix années après la date de la mise en vigueur initiale de la convention, par un acte communiqué au Directeur général du Bureau international du Travail aux fins d'enregistrement. La dénonciation ne prend effet qu'une année après avoir été enregistrée.

2. Tout Membre ayant ratifié la présente convention qui, dans l'année après l'expiration de la période de dix années mentionnée au paragraphe précédent, ne se prévaut pas de la faculté de dénonciation prévue par le présent article sera lié pour une nouvelle période de dix années et, par la suite, pourra dénoncer la présente convention dans la première année de chaque nouvelle période de dix années dans les conditions prévues au présent article.

### *Article 50*

1. Le Directeur général du Bureau international du Travail notifie à tous les Membres de l'Organisation internationale du Travail l'enregistrement de toutes ratifications et de tous actes de dénonciation qui lui seront communiqués par les Membres de l'Organisation.

---

2. When notifying the Members of the Organization of the registration of the last of the ratifications required to bring this Convention into force, the Director-General shall draw the attention of the Members of the Organization to the date upon which the Convention will come into force.

*Article 51*

The Director-General of the International Labour Office shall communicate to the Secretary-General of the United Nations for registration in accordance with Article 102 of the Charter of the United Nations full particulars of all ratifications and denunciations that have been registered.

*Article 52*

At such times as it may consider necessary, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall examine the desirability of placing on the agenda of the Conference the question of its revision.

*Article 53*

1. Should the Conference adopt a new Convention revising this Convention, then, unless the new Convention otherwise provides:

- (a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 49 above, if and when the new revising Convention shall have come into force; and
- (b) as from the date when the new revising Convention comes into force, this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

*Article 54*

The English and French versions of the text of this Convention are equally authoritative.

---

2. En notifiant aux Membres de l'Organisation l'enregistrement de la dernière ratification nécessaire à l'entrée en vigueur de la convention, le Directeur général appelle l'attention des Membres de l'Organisation sur la date à laquelle la présente convention entre en vigueur.

*Article 51*

Le Directeur général du Bureau international du Travail communique au Secrétaire général des Nations Unies, aux fins d'enregistrement, conformément à l'article 102 de la Charte des Nations Unies, des renseignements complets au sujet de toutes ratifications et dénonciations enregistrées.

*Article 52*

Chaque fois qu'il le jugera nécessaire, le Conseil d'administration du Bureau international du Travail présentera à la Conférence générale un rapport sur l'application de la présente convention et examinera s'il y a lieu d'inscrire à l'ordre du jour de la Conférence la question de sa révision.

*Article 53*

1. Au cas où la Conférence adopte une nouvelle convention portant révision de la présente convention, et à moins que la nouvelle convention ne dispose autrement:

- a) la ratification par un Membre de la nouvelle convention portant révision entraîne de plein droit, nonobstant l'article 49 ci-dessus, la dénonciation immédiate de la présente convention, sous réserve que la nouvelle convention portant révision soit entrée en vigueur ;
- b) à partir de la date de l'entrée en vigueur de la nouvelle convention portant révision, la présente convention cesse d'être ouverte à la ratification des Membres.

2. La présente convention demeure en tout cas en vigueur dans sa forme et teneur pour les Membres qui l'auraient ratifiée et qui ne ratifieraient pas la convention portant révision.

*Article 54*

Les versions française et anglaise de la présente convention font également foi.

---

## ANNEX I

### EQUIVALENCE IN MEASUREMENT

For the purpose of this Convention, where the competent authority, after consultation, decides to use length overall (LOA) rather than length (L) as the basis of measurement:

- (a) a length overall (LOA) of 16.5 metres shall be considered equivalent to a length (L) of 15 metres;
- (b) a length overall (LOA) of 26.5 metres shall be considered equivalent to a length (L) of 24 metres;
- (c) a length overall (LOA) of 50 metres shall be considered equivalent to a length (L) of 45 metres.

---

## ANNEXE I

### EQUIVALENCE POUR LE MESURAGE

Aux fins de la présente convention, lorsque l'autorité compétente, après consultation, décide d'utiliser la longueur hors tout (LHT) comme critère de mesure plutôt que la longueur (L):

- a)* une longueur hors tout (LHT) de 16,5 mètres sera considérée comme équivalente à une longueur (L) de 15 mètres;
- b)* une longueur hors tout (LHT) de 26,5 mètres sera considérée comme équivalente à une longueur (L) de 24 mètres;
- c)* une longueur hors tout (LHT) de 50 mètres sera considérée comme équivalente à une longueur (L) de 45 mètres.

---

## ANNEX II

### FISHER'S WORK AGREEMENT

The fisher's work agreement shall contain the following particulars, except in so far as the inclusion of one or more of them is rendered unnecessary by the fact that the matter is regulated in another manner by national laws or regulations, or a collective bargaining agreement where applicable:

- (a) the fisher's family name and other names, date of birth or age, and birthplace;
- (b) the place at which and date on which the agreement was concluded;
- (c) the name of the fishing vessel or vessels and the registration number of the vessel or vessels on board which the fisher undertakes to work;
- (d) the name of the employer, or fishing vessel owner, or other party to the agreement with the fisher;
- (e) the voyage or voyages to be undertaken, if this can be determined at the time of making the agreement;
- (f) the capacity in which the fisher is to be employed or engaged;
- (g) if possible, the place at which and date on which the fisher is required to report on board for service;
- (h) the provisions to be supplied to the fisher, unless some alternative system is provided for by national law or regulation;
- (i) the amount of wages, or the amount of the share and the method of calculating such share if remuneration is to be on a share basis, or the amount of the wage and share and the method of calculating the latter if remuneration is to be on a combined basis, and any agreed minimum wage;
- (j) the termination of the agreement and the conditions thereof, namely:
  - (i) if the agreement has been made for a definite period, the date fixed for its expiry;
  - (ii) if the agreement has been made for a voyage, the port of destination and the time which has to expire after arrival before the fisher shall be discharged;
  - (iii) if the agreement has been made for an indefinite period, the conditions which shall entitle either party to rescind it, as well as the required period of notice for rescission, provided that such period shall not be less for the employer, or fishing vessel owner or other party to the agreement with the fisher;
- (k) the protection that will cover the fisher in the event of sickness, injury or death in connection with service;

---

## ANNEXE II

### ACCORD D'ENGAGEMENT DU PÊCHEUR

L'accord d'engagement du pêcheur devra comporter les mentions suivantes, sauf dans les cas où l'inclusion de l'une de ces mentions ou de certaines d'entre elles est inutile, la question étant déjà réglée d'une autre manière par la législation nationale ou, le cas échéant, par une convention collective:

- a) les nom et prénoms du pêcheur, la date de naissance ou l'âge, ainsi que le lieu de naissance;
- b) le lieu et la date de la conclusion du contrat;
- c) la désignation du ou des navires de pêche et le numéro d'immatriculation du ou des navires de pêche à bord duquel ou desquels le pêcheur s'engage à travailler;
- d) le nom de l'employeur ou de l'armateur à la pêche ou autre partie à l'accord;
- e) le voyage ou les voyages à entreprendre, s'ils peuvent être déterminés au moment de l'engagement;
- f) la fonction pour laquelle le pêcheur doit être employé ou engagé;
- g) si possible, la date à laquelle et le lieu où le pêcheur sera tenu de se présenter à bord pour le commencement de son service;
- h) les vivres à allouer au pêcheur, sauf si la législation nationale prévoit un système différent;
- i) le montant du salaire du pêcheur ou, s'il est rémunéré à la part, le pourcentage de sa part et le mode de calcul de celle-ci, ou encore, si un système mixte de rémunération est appliqué, le montant du salaire, le pourcentage de sa part et le mode de calcul de celle-ci, ainsi que tout salaire minimum convenu;
- j) l'échéance de l'accord et les conditions y relatives, soit:
  - i) si l'accord a été conclu pour une durée déterminée, la date fixée pour son expiration;
  - ii) si l'accord a été conclu au voyage, le port de destination convenu pour la fin de l'accord et l'indication du délai à l'expiration duquel le pêcheur sera libéré après l'arrivée à cette destination;
  - iii) si l'accord a été conclu pour une durée indéterminée, les conditions dans lesquelles chaque partie pourra dénoncer l'accord ainsi que le délai de préavis requis, lequel n'est pas plus court pour l'employeur, l'armateur à la pêche ou autre partie que pour le pêcheur;
- k) la protection en cas de maladie, de lésion ou de décès du pêcheur lié à son service;

- 
- (l) the amount of paid annual leave or the formula used for calculating leave, where applicable;
  - (m) the health and social security coverage and benefits to be provided to the fisher by the employer, fishing vessel owner, or other party or parties to the fisher's work agreement, as applicable;
  - (n) the fisher's entitlement to repatriation;
  - (o) a reference to the collective bargaining agreement, where applicable;
  - (p) the minimum periods of rest, in accordance with national laws, regulations or other measures; and
  - (q) any other particulars which national law or regulation may require.

- 
- l)* le congé payé annuel ou la formule utilisée pour le calculer, le cas échéant;
  - m)* les prestations en matière de protection de la santé et de sécurité sociale qui doivent être assurées au pêcheur par l'employeur, l'armateur à la pêche ou autre partie à l'accord d'engagement du pêcheur, selon le cas;
  - n)* le droit du pêcheur à un rapatriement;
  - o)* la référence à la convention collective, le cas échéant;
  - p)* les périodes minimales de repos conformément à la législation nationale ou autres mesures;
  - q)* toutes autres mentions que la législation nationale peut exiger.

---

## ANNEX III

### FISHING VESSEL ACCOMMODATION

#### *General provisions*

1. The following shall apply to all new, decked fishing vessels, subject to any exclusions provided for in accordance with Article 3 of this Convention. The competent authority may, after consultation, also apply the requirements of this Annex to existing vessels, when and in so far as it determines that this is reasonable and practicable.

2. The competent authority, after consultation, may permit variations to the provisions of this Annex for fishing vessels normally remaining at sea for less than 24 hours where the fishers do not live on board the vessel in port. In the case of such vessels, the competent authority shall ensure that the fishers concerned have adequate facilities for resting, eating and sanitation purposes.

3. Any variations made by a Member under paragraph 2 of this Annex shall be reported to the International Labour Office under article 22 of the Constitution of the International Labour Organisation.

4. The requirements for vessels of 24 metres in length and over may be applied to vessels between 15 and 24 metres in length where the competent authority determines, after consultation, that this is reasonable and practicable.

5. Fishers working on board feeder vessels which do not have appropriate accommodation and sanitary facilities shall be provided with such accommodation and facilities on board the mother vessel.

6. Members may extend the requirements of this Annex regarding noise and vibration, ventilation, heating and air conditioning, and lighting to enclosed working spaces and spaces used for storage if, after consultation, such application is considered appropriate and will not have a negative influence on the function of the process or working conditions or the quality of the catches.

7. The use of gross tonnage as referred to in Article 5 of this Convention is limited to the following specified paragraphs of this Annex: 12, 34, 35, 37, 39, 42, 56 and 61. For these purposes, where the competent authority, after consultation, decides to use gross tonnage (gt) as the basis of measurement:

- (a) a gross tonnage of 55 gt shall be considered equivalent to a length (L) of 15 metres or a length overall (LOA) of 16.5 metres;
- (b) a gross tonnage of 175 gt shall be considered equivalent to a length (L) of 24 metres or a length overall (LOA) of 26.5 metres;

---

## ANNEXE III

### LOGEMENT À BORD DES NAVIRES DE PÊCHE

#### *Dispositions générales*

1. Les dispositions suivantes s'appliquent à tous les nouveaux navires de pêche pontés, sauf exclusions autorisées aux termes de l'article 3 de la présente convention. L'autorité compétente peut également, après consultation, appliquer les prescriptions de la présente annexe aux navires existants, dès lors que et dans la mesure où elle décide que cela est raisonnable et réalisable.

2. L'autorité compétente peut, après consultation, autoriser des dérogations aux dispositions de la présente annexe pour des navires de pêche ne restant normalement en mer que pour des durées inférieures à 24 heures si les pêcheurs ne vivent pas à bord du navire lorsqu'il est au port. Dans le cas de tels navires, l'autorité compétente doit veiller à ce que les pêcheurs concernés aient à leur disposition des installations adéquates pour leurs repos, alimentation et hygiène.

3. Toute dérogation faite par un Membre en vertu du paragraphe 2 de la présente annexe doit être communiquée au Bureau international du Travail conformément à l'article 22 de la Constitution de l'Organisation internationale du Travail.

4. Les prescriptions valables pour les navires d'une longueur égale ou supérieure à 24 mètres peuvent s'appliquer aux navires d'une longueur comprise entre 15 et 24 mètres si l'autorité compétente décide, après consultation, que cela est raisonnable et réalisable.

5. Les pêcheurs travaillant à bord de navires nourrices dépourvus de logements et d'installations sanitaires appropriés pourront utiliser ceux du navire mère.

6. Les Membres peuvent étendre les dispositions de la présente annexe relatives au bruit et aux vibrations, à la ventilation, au chauffage et à la climatisation, à l'éclairage aux lieux de travail clos et aux espaces servant à l'entreposage si, après consultation, cette extension est considérée appropriée et n'influe pas négativement sur les conditions de travail ou sur le traitement ou la qualité des captures.

7. L'utilisation de la jauge brute visée à l'article 5 de la présente convention est limitée aux paragraphes de la présente annexe spécifiés ci-après: 12, 34, 35, 37, 39, 42, 56 et 61. A ces fins, lorsque l'autorité compétente, après consultation, décide d'utiliser la jauge brute comme critère de mesure:

- a) une jauge brute de 55 sera considérée comme équivalente à une longueur (L) de 15 mètres, ou à une longueur hors tout (LHT) de 16,5 mètres;
- b) une jauge brute de 175 sera considérée comme équivalente à une longueur (L) de 24 mètres, ou à une longueur hors tout (LHT) de 26,5 mètres;

- 
- (c) a gross tonnage of 700 gt shall be considered equivalent to a length (L) of 45 metres or a length overall (LOA) of 50 metres.

### *Planning and control*

8. The competent authority shall satisfy itself that, on every occasion when a vessel is newly constructed or the crew accommodation of a vessel has been reconstructed, such vessel complies with the requirements of this Annex. The competent authority shall, to the extent practicable, require compliance with this Annex for a vessel that changes the flag it flies to the flag of the Member, or when the crew accommodation of a vessel is substantially altered.

9. For the occasions noted in paragraph 8 of this Annex, for vessels of 24 metres in length and over, detailed plans and information concerning accommodation shall be required to be submitted for approval to the competent authority, or an entity authorized by it.

10. For vessels of 24 metres in length and over, on every occasion when the vessel changes the flag it flies to the flag of the Member, or the crew accommodation of the fishing vessel has been reconstructed or substantially altered, the competent authority shall inspect the accommodation for compliance with this Convention. The competent authority may carry out additional inspections of crew accommodation at its discretion.

### *Design and construction*

#### *Headroom*

11. There shall be adequate headroom in all accommodation spaces. For spaces where fishers are expected to stand for prolonged periods, the minimum headroom shall be prescribed by the competent authority.

12. For vessels of 24 metres in length and over, the minimum permitted headroom in all accommodation where full and free movement is necessary shall not be less than 200 centimetres. The competent authority may permit some limited reduction in headroom in any space, or part of any space, in such accommodation where it is satisfied that such reduction is reasonable, and will not result in discomfort to the fishers.

#### *Openings into and between accommodation spaces*

13. There shall be no direct openings into sleeping rooms from fish rooms and machinery spaces, except for the purpose of emergency escape. Where reasonable and practicable, direct openings from galleys, storerooms,

- 
- c) une jauge brute de 700 sera considérée comme équivalente à une longueur (L) de 45 mètres, ou à une longueur hors tout (LHT) de 50 mètres.

### *Planification et contrôle*

8. L'autorité compétente doit vérifier que, chaque fois qu'un navire vient d'être construit, ou que le logement de l'équipage à bord du navire a été refait à neuf, ledit navire est conforme aux prescriptions de la présente annexe. L'autorité compétente doit, dans la mesure du possible, exiger qu'un navire qui remplace son pavillon par le pavillon du Membre ou qu'un navire dont le logement de l'équipage a été substantiellement modifié se conforme aux prescriptions de la présente annexe.

9. Dans les situations visées au paragraphe 8 de la présente annexe, pour les navires d'une longueur égale ou supérieure à 24 mètres, l'autorité compétente doit demander que les plans détaillés du logement de l'équipage et des informations à son sujet soient soumis pour approbation à l'autorité compétente ou à une entité qu'elle a habilitée à cette fin.

10. Pour les navires d'une longueur égale ou supérieure à 24 mètres, l'autorité compétente doit contrôler, chaque fois que le navire remplace son pavillon par le pavillon du Membre ou que le logement de l'équipage a été refait à neuf ou substantiellement modifié, que celui-ci est conforme aux prescriptions de la présente convention. L'autorité compétente peut réaliser, lorsqu'elle le juge opportun, des inspections complémentaires du logement de l'équipage.

### *Conception et construction*

#### *Hauteur sous plafond*

11. Tous les logements doivent avoir une hauteur sous plafond adéquate. L'autorité compétente doit prescrire la hauteur sous plafond minimale des locaux où les pêcheurs doivent se tenir debout pendant de longues périodes.

12. Sur les navires d'une longueur égale ou supérieure à 24 mètres, la hauteur sous plafond minimale autorisée dans tous les logements où les pêcheurs doivent pouvoir jouir d'une entière liberté de mouvement ne doit pas être inférieure à 200 centimètres. L'autorité compétente peut autoriser une hauteur sous plafond légèrement inférieure dans tout logement ou partie de logement où elle s'est assurée qu'une telle diminution est raisonnable et ne causera pas d'inconfort aux pêcheurs.

#### *Ouvertures donnant sur les locaux d'habitation et entre eux*

13. Les ouvertures directes entre les postes de couchage et les cales à poissons et salles des machines doivent être proscrites, sauf lorsqu'il s'agit d'issues de secours. Dans la mesure où cela est raisonnable et réalisable, les

---

drying rooms or communal sanitary areas shall be avoided unless expressly provided otherwise.

14. For vessels of 24 metres in length and over, there shall be no direct openings, except for the purpose of emergency escape, into sleeping rooms from fish rooms and machinery spaces or from galleys, storerooms, drying rooms or communal sanitary areas; that part of the bulkhead separating such places from sleeping rooms and external bulkheads shall be efficiently constructed of steel or another approved material and shall be watertight and gas-tight. This provision does not exclude the possibility of sanitary areas being shared between two cabins.

### *Insulation*

15. Accommodation spaces shall be adequately insulated; the materials used to construct internal bulkheads, panelling and sheeting, and floors and joinings shall be suitable for the purpose and shall be conducive to ensuring a healthy environment. Sufficient drainage shall be provided in all accommodation spaces.

### *Other*

16. All practicable measures shall be taken to protect fishing vessels' crew accommodation against flies and other insects, particularly when vessels are operating in mosquito-infested areas.

17. Emergency escapes from all crew accommodation spaces shall be provided as necessary.

### *Noise and vibration*

18. The competent authority shall take measures to limit excessive noise and vibration in accommodation spaces and, as far as practicable, in accordance with relevant international standards.

19. For vessels of 24 metres in length and over, the competent authority shall adopt standards for noise and vibration in accommodation spaces which shall ensure adequate protection to fishers from the effects of such noise and vibration, including the effects of noise- and vibration-induced fatigue.

### *Ventilation*

20. Accommodation spaces shall be ventilated, taking into account climatic conditions. The system of ventilation shall supply air in a satisfactory condition whenever fishers are on board.

---

ouvertures directes entre les postes de couchage et les cuisines, cambuses, séchoirs ou installations sanitaires communes doivent être évitées, à moins qu'il n'en soit expressément disposé autrement.

14. Sur les navires d'une longueur égale ou supérieure à 24 mètres, il ne doit y avoir aucune ouverture reliant directement les postes de couchage aux cales à poissons, salles des machines, cuisines, cambuses, séchoirs ou installations sanitaires communes, sauf lorsqu'il s'agit d'issues de secours; la partie de la cloison séparant ces locaux des postes de couchage et des cloisons externes doit être convenablement construite en acier ou autre matériau homologué et être étanche à l'eau et aux gaz. La présente disposition n'exclut pas la possibilité d'un partage d'installations sanitaires entre deux cabines.

### *Isolation*

15. L'isolation du logement de l'équipage doit être adéquate; les matériaux employés pour construire les cloisons, les panneaux et les vaigrages intérieurs, ainsi que les revêtements de sol et les joints doivent être adaptés à leur emploi et de nature à garantir un environnement sain. Des dispositifs d'écoulement des eaux suffisants doivent être prévus dans tous les logements.

### *Autres*

16. Tous les moyens possibles doivent être mis en œuvre pour empêcher que les mouches et autres insectes ne pénètrent dans les locaux d'habitation de l'équipage des navires de pêche, en particulier lorsque ceux-ci opèrent dans des zones infestées de moustiques.

17. Tous les logements d'équipage doivent être dotés des issues de secours nécessaires.

### *Bruits et vibrations*

18. L'autorité compétente doit prendre des mesures pour réduire les bruits et vibrations excessifs dans les locaux d'habitation, si possible en conformité avec les normes internationales pertinentes.

19. Sur les navires d'une longueur égale ou supérieure à 24 mètres, l'autorité compétente doit adopter des normes réglementant les niveaux de bruit et de vibrations dans les locaux d'habitation de manière à protéger adéquatement les pêcheurs des effets nocifs de ces bruits et vibrations, notamment de la fatigue qu'ils induisent.

### *Ventilation*

20. Les locaux d'habitation doivent être ventilés en fonction des conditions climatiques. Le système de ventilation doit permettre une aération satisfaisante des locaux lorsque les pêcheurs sont à bord.

---

21. Ventilation arrangements or other measures shall be such as to protect non-smokers from tobacco smoke.

22. Vessels of 24 metres in length and over shall be equipped with a system of ventilation for accommodation, which shall be controlled so as to maintain the air in a satisfactory condition and to ensure sufficiency of air movement in all weather conditions and climates. Ventilation systems shall be in operation at all times when fishers are on board.

### *Heating and air conditioning*

23. Accommodation spaces shall be adequately heated, taking into account climatic conditions.

24. For vessels of 24 metres in length and over, adequate heat shall be provided, through an appropriate heating system, except in fishing vessels operating exclusively in tropical climates. The system of heating shall provide heat in all conditions, as necessary, and shall be in operation when fishers are living or working on board, and when conditions so require.

25. For vessels of 24 metres in length and over, with the exception of those regularly engaged in areas where temperate climatic conditions do not require it, air conditioning shall be provided in accommodation spaces, the bridge, the radio room and any centralized machinery control room.

### *Lighting*

26. All accommodation spaces shall be provided with adequate light.

27. Wherever practicable, accommodation spaces shall be lit with natural light in addition to artificial light. Where sleeping spaces have natural light, a means of blocking the light shall be provided.

28. Adequate reading light shall be provided for every berth in addition to the normal lighting of the sleeping room.

29. Emergency lighting shall be provided in sleeping rooms.

30. Where a vessel is not fitted with emergency lighting in mess rooms, passageways, and any spaces that are or may be used for emergency escape, permanent night lighting shall be provided in such spaces.

31. For vessels of 24 metres in length and over, lighting in accommodation spaces shall meet a standard established by the competent authority. In any part of the accommodation space available for free movement, the minimum standard for such lighting shall be such as to permit a person with normal vision to read an ordinary newspaper on a clear day.

---

21. Le système de ventilation doit être conçu ou d'autres mesures doivent être prises de manière à protéger les non-fumeurs de la fumée de tabac.

22. Les navires d'une longueur égale ou supérieure à 24 mètres doivent être équipés d'un système de ventilation réglable des emménagements, de façon à maintenir l'air dans des conditions satisfaisantes et à en assurer une circulation suffisante par tous les temps et sous tous les climats. Les systèmes de ventilation doivent fonctionner en permanence lorsque les pêcheurs sont à bord.

### *Chauffage et climatisation*

23. Les locaux d'habitation doivent être chauffés de manière adéquate en fonction des conditions climatiques.

24. Sur les navires d'une longueur égale ou supérieure à 24 mètres, un chauffage adéquat fourni par un système de chauffage approprié doit être prévu sauf sur les navires de pêche opérant exclusivement en zone tropicale. Le système de chauffage doit fournir de la chaleur dans toutes les conditions, suivant les besoins, et fonctionner lorsque les pêcheurs séjournent ou travaillent à bord et que les conditions l'exigent.

25. Sur les navires d'une longueur égale ou supérieure à 24 mètres, à l'exception de ceux opérant dans des zones où les conditions climatiques tempérées ne l'exigent pas, les locaux d'habitation, la passerelle, les salles de radio et toute salle de contrôle des machines centralisée doivent être équipés d'un système de climatisation.

### *Eclairage*

26. Tous les locaux d'habitation doivent bénéficier d'un éclairage adéquat.

27. Dans la mesure du possible, les locaux d'habitation doivent, outre un éclairage artificiel, être éclairés par la lumière naturelle. Lorsque les postes de couchage sont éclairés par la lumière naturelle, un moyen de l'occulter doit être prévu.

28. Chaque couchette doit être dotée d'un éclairage de chevet en complément de l'éclairage normal du poste de couchage.

29. Les postes de couchage doivent être équipés d'un éclairage de secours.

30. Si à bord d'un navire les réfectoires, les coursives et les locaux qui sont ou peuvent être traversés comme issues de secours ne sont pas équipés d'un éclairage de secours, un éclairage permanent doit y être prévu pendant la nuit.

31. Sur les navires d'une longueur égale ou supérieure à 24 mètres, les locaux d'habitation doivent être éclairés conformément à une norme établie par l'autorité compétente. En tous points du local d'habitation où l'on peut circuler librement, la norme minimale de cet éclairage doit être telle qu'une personne dotée d'une acuité visuelle normale puisse lire, par temps clair, un journal imprimé ordinaire.

---

## *Sleeping rooms*

### *General*

32. Where the design, dimensions or purpose of the vessel allow, the sleeping accommodation shall be located so as to minimize the effects of motion and acceleration but shall in no case be located forward of the collision bulkhead.

### *Floor area*

33. The number of persons per sleeping room and the floor area per person, excluding space occupied by berths and lockers, shall be such as to provide adequate space and comfort for the fishers on board, taking into account the service of the vessel.

34. For vessels of 24 metres in length and over but which are less than 45 metres in length, the floor area per person of sleeping rooms, excluding space occupied by berths and lockers, shall not be less than 1.5 square metres.

35. For vessels of 45 metres in length and over, the floor area per person of sleeping rooms, excluding space occupied by berths and lockers, shall not be less than 2 square metres.

### *Persons per sleeping room*

36. To the extent not expressly provided otherwise, the number of persons allowed to occupy each sleeping room shall not be more than six.

37. For vessels of 24 metres in length and over, the number of persons allowed to occupy each sleeping room shall not be more than four. The competent authority may permit exceptions to this requirement in particular cases if the size, type or intended service of the vessel makes the requirement unreasonable or impracticable.

38. To the extent not expressly provided otherwise, a separate sleeping room or sleeping rooms shall be provided for officers, wherever practicable.

39. For vessels of 24 metres in length and over, sleeping rooms for officers shall be for one person wherever possible and in no case shall the sleeping room contain more than two berths. The competent authority may permit exceptions to the requirements of this paragraph in particular cases if the size, type or intended service of the vessel makes the requirements unreasonable or impracticable.

---

## *Postes de couchage*

### *Dispositions générales*

32. Lorsque la conception, les dimensions ou l'usage même du navire le permet, les postes de couchage doivent être situés de telle manière que les mouvements et l'accélération du navire soient ressentis le moins possible mais ils ne doivent être situés en aucun cas en avant de la cloison d'abordage.

### *Superficie au sol*

33. Le nombre de personnes par poste de couchage ainsi que la superficie au sol par personne, déduction faite de la superficie occupée par les couchettes et les armoires, doivent permettre aux pêcheurs de disposer de suffisamment d'espace et de confort à bord, compte tenu de l'utilisation du navire.

34. Sur les navires d'une longueur égale ou supérieure à 24 mètres, mais d'une longueur inférieure à 45 mètres, la superficie au sol par occupant d'un poste de couchage, déduction faite de la superficie occupée par les couchettes et les armoires, ne doit pas être inférieure à 1,5 mètre carré.

35. Sur les navires d'une longueur égale ou supérieure à 45 mètres, la superficie au sol par occupant d'un poste de couchage, déduction faite de la superficie occupée par les couchettes et les armoires, ne doit pas être inférieure à 2 mètres carrés.

### *Nombre de personnes par poste de couchage*

36. Dans la mesure où il n'en est pas expressément disposé autrement, le nombre de personnes autorisées à occuper un poste de couchage ne doit pas être supérieur à six.

37. Sur les navires d'une longueur égale ou supérieure à 24 mètres, le nombre de personnes autorisées à occuper un poste de couchage ne doit pas être supérieur à quatre. L'autorité compétente peut accorder des dérogations à cette prescription dans certains cas si la taille et le type du navire ou son utilisation la rendent déraisonnable ou irréalisable.

38. Dans la mesure où il n'en est pas expressément disposé autrement, une ou plusieurs cabines séparées doivent être réservées aux officiers, lorsque cela est possible.

39. Sur les navires d'une longueur égale ou supérieure à 24 mètres, les postes de couchage réservés aux officiers doivent accueillir une seule personne dans la mesure du possible et ne doivent en aucun cas contenir plus de deux couchettes. L'autorité compétente peut accorder des dérogations aux prescriptions de ce paragraphe dans certains cas si la taille et le type du navire ou son utilisation les rendent déraisonnables ou irréalisables.

---

*Other*

40. The maximum number of persons to be accommodated in any sleeping room shall be legibly and indelibly marked in a place in the room where it can be conveniently seen.

41. The members of the crew shall be provided with individual berths of appropriate dimensions. Mattresses shall be of a suitable material.

42. For vessels of 24 metres in length and over, the minimum inside dimensions of the berths shall not be less than 198 by 80 centimetres.

43. Sleeping rooms shall be so planned and equipped as to ensure reasonable comfort for the occupants and to facilitate tidiness. Equipment provided shall include berths, individual lockers sufficient for clothing and other personal effects, and a suitable writing surface.

44. For vessels of 24 metres in length and over, a desk suitable for writing, with a chair, shall be provided.

45. Sleeping accommodation shall be situated or equipped, as practicable, so as to provide appropriate levels of privacy for men and for women.

*Mess rooms*

46. Mess rooms shall be as close as possible to the galley, but in no case shall be located forward of the collision bulkhead.

47. Vessels shall be provided with mess-room accommodation suitable for their service. To the extent not expressly provided otherwise, mess-room accommodation shall be separate from sleeping quarters, where practicable.

48. For vessels of 24 metres in length and over, mess-room accommodation shall be separate from sleeping quarters.

49. The dimensions and equipment of each mess room shall be sufficient for the number of persons likely to use it at any one time.

50. For vessels of 24 metres in length and over, a refrigerator of sufficient capacity and facilities for making hot and cold drinks shall be available and accessible to fishers at all times.

*Sanitary accommodation*

51. Sanitary facilities, which include toilets, washbasins, and tubs or showers, shall be provided for all persons on board, as appropriate for the

---

### *Autres*

40. Le nombre maximal de personnes autorisées à occuper un poste de couchage doit être inscrit de manière lisible et indélébile à un endroit où il peut se lire facilement.

41. Les membres d'équipage doivent disposer d'une couchette individuelle de dimensions suffisantes. Les matelas doivent être d'un matériau adéquat.

42. Sur les navires d'une longueur égale ou supérieure à 24 mètres, les dimensions internes minimales des couchettes ne doivent pas être inférieures à 198 centimètres sur 80 centimètres.

43. Les postes de couchage doivent être conçus et équipés de manière à garantir aux occupants un confort raisonnable et à faciliter leur maintien en ordre. Les équipements fournis doivent comprendre des couchettes, des armoires individuelles suffisamment grandes pour contenir des vêtements et autres effets personnels et une surface plane adéquate où il est possible d'écrire.

44. Sur les navires d'une longueur égale ou supérieure à 24 mètres, un bureau pour écrire et une chaise adaptés doivent être fournis.

45. Les postes de couchage doivent, dans la mesure du possible, être situés ou équipés de telle manière que tant les hommes que les femmes puissent convenablement préserver leur intimité.

### *Réfectoires*

46. Les réfectoires doivent être aussi proches que possible de la cuisine, mais en aucun cas en avant de la cloison d'abordage.

47. Les navires doivent posséder un réfectoire adapté à leur utilisation. Le local du réfectoire doit être si possible à l'écart des postes de couchage, dans la mesure où il n'en est pas expressément disposé autrement.

48. Sur les navires d'une longueur égale ou supérieure à 24 mètres, le réfectoire doit être séparé des postes de couchage.

49. Les dimensions et l'aménagement de chaque réfectoire doivent être suffisants pour qu'il puisse accueillir le nombre de personnes susceptibles de l'utiliser en même temps.

50. Sur les navires d'une longueur égale ou supérieure à 24 mètres, les pêcheurs doivent à tout moment avoir accès à un réfrigérateur d'un volume suffisant et avoir la possibilité de se préparer des boissons chaudes ou froides.

### *Installations sanitaires*

51. Des installations sanitaires appropriées à l'utilisation du navire, qui comprennent des toilettes, lavabos, baignoires ou douches, doivent être

---

service of the vessel. These facilities shall meet at least minimum standards of health and hygiene and reasonable standards of quality.

52. The sanitary accommodation shall be such as to eliminate contamination of other spaces as far as practicable. The sanitary facilities used by women fishers shall allow for reasonable privacy.

53. Cold fresh water and hot fresh water shall be available to all fishers and other persons on board, in sufficient quantities to allow for proper hygiene. The competent authority may establish, after consultation, the minimum amount of water to be provided.

54. Where sanitary facilities are provided, they shall be fitted with ventilation to the open air, independent of any other part of the accommodation.

55. All surfaces in sanitary accommodation shall be such as to facilitate easy and effective cleaning. Floors shall have a non-slip deck covering.

56. On vessels of 24 metres in length and over, for all fishers who do not occupy rooms to which sanitary facilities are attached, there shall be provided at least one tub or shower or both, one toilet, and one washbasin for every four persons or fewer.

#### *Laundry facilities*

57. Amenities for washing and drying clothes shall be provided as necessary, taking into account the service of the vessel, to the extent not expressly provided otherwise.

58. For vessels of 24 metres in length and over, adequate facilities for washing, drying and ironing clothes shall be provided.

59. For vessels of 45 metres in length and over, adequate facilities for washing, drying and ironing clothes shall be provided in a compartment separate from sleeping rooms, mess rooms and toilets, and shall be adequately ventilated, heated and equipped with lines or other means for drying clothes.

#### *Facilities for sick and injured fishers*

60. Whenever necessary, a cabin shall be made available for a fisher who suffers illness or injury.

61. For vessels of 45 metres in length and over, there shall be a separate sick bay. The space shall be properly equipped and shall be maintained in a hygienic state.

---

prévues pour toutes les personnes à bord. Ces installations doivent correspondre aux normes minimales en matière de santé et d'hygiène et offrir un niveau de qualité raisonnable.

52. Les installations sanitaires doivent être conçues de manière à éliminer dans la mesure où cela est réalisable la contamination d'autres locaux. Les installations sanitaires utilisées par les pêcheuses doivent leur préserver un degré d'intimité raisonnable.

53. Tous les pêcheurs et toute autre personne à bord doivent avoir accès à de l'eau douce froide et chaude en quantité suffisante pour assurer une hygiène convenable. L'autorité compétente peut déterminer, après consultation, le volume d'eau minimal nécessaire.

54. Lorsque des installations sanitaires sont prévues, elles doivent être ventilées vers l'extérieur et situées à l'écart de tout local d'habitation.

55. Toutes les surfaces des installations sanitaires doivent être faciles à nettoyer correctement. Les sols doivent être recouverts d'un revêtement antidérapant.

56. Sur les navires d'une longueur égale ou supérieure à 24 mètres, tous les pêcheurs n'occupant pas un poste doté d'installations sanitaires doivent avoir accès au moins à une baignoire ou une douche, ou les deux, une toilette et un lavabo pour quatre personnes ou moins.

### *Buanderies*

57. Dans la mesure où il n'en est pas expressément disposé autrement, des installations appropriées pour le lavage et le séchage des vêtements doivent être prévues selon les besoins, en tenant compte des conditions d'utilisation du navire.

58. Sur les navires d'une longueur égale ou supérieure à 24 mètres, des installations adéquates pour le lavage, le séchage et le repassage des vêtements doivent être prévues.

59. Sur les navires d'une longueur égale ou supérieure à 45 mètres, ces installations doivent être adéquates et situées dans des locaux séparés des postes de couchage, des réfectoires et des toilettes qui soient suffisamment ventilés, chauffés et pourvus de cordes à linge ou autres moyens de séchage.

### *Installations pour les pêcheurs malades ou blessés*

60. Chaque fois que nécessaire, une cabine doit être mise à la disposition d'un pêcheur blessé ou malade.

61. Sur les navires d'une longueur égale ou supérieure à 45 mètres, une infirmerie séparée doit être prévue. Ce local doit être correctement équipé et maintenu dans un état hygiénique.

---

### *Other facilities*

62. A place for hanging foul-weather gear and other personal protective equipment shall be provided outside of, but convenient to, sleeping rooms.

### *Bedding, mess utensils and miscellaneous provisions*

63. Appropriate eating utensils, and bedding and other linen shall be provided to all fishers on board. However, the cost of the linen can be recovered as an operational cost if the collective agreement or the fisher's work agreement so provides.

### *Recreational facilities*

64. For vessels of 24 metres in length and over, appropriate recreational facilities, amenities and services shall be provided for all fishers on board. Where appropriate, mess rooms may be used for recreational activities.

### *Communication facilities*

65. All fishers on board shall be given reasonable access to communication facilities, to the extent practicable, at a reasonable cost and not exceeding the full cost to the fishing vessel owner.

### *Galley and food storage facilities*

66. Cooking equipment shall be provided on board. To the extent not expressly provided otherwise, this equipment shall be fitted, where practicable, in a separate galley.

67. The galley, or cooking area where a separate galley is not provided, shall be of adequate size for the purpose, well lit and ventilated, and properly equipped and maintained.

68. For vessels of 24 metres in length and over, there shall be a separate galley.

69. The containers of butane or propane gas used for cooking purposes in a galley shall be kept on the open deck and in a shelter which is designed to protect them from external heat sources and external impact.

70. A suitable place for provisions of adequate capacity shall be provided which can be kept dry, cool and well ventilated in order to avoid deterioration of the stores and, to the extent not expressly provided otherwise, refrigerators or other low-temperature storage shall be used, where possible.

71. For vessels of 24 metres in length and over, a provisions storeroom and refrigerator and other low-temperature storage shall be used.

---

### *Autres installations*

62. Un endroit approprié à l'extérieur des postes de couchage et aisément accessible à partir de ces derniers doit être prévu pour pendre les vêtements de gros temps et autre équipement de protection personnel.

### *Literie, vaisselle et couverts et fournitures diverses*

63. Tous les pêcheurs à bord doivent avoir à leur disposition de la vaisselle, du linge de lit et autres linges appropriés. Toutefois, les frais de linge peuvent être recouverts sous forme de coûts d'exploitation pour autant qu'une convention collective ou que l'accord d'engagement du pêcheur le prévoie.

### *Installations de loisirs*

64. A bord des navires d'une longueur égale ou supérieure à 24 mètres, tous les pêcheurs doivent avoir accès à des installations, des équipements et des services de loisirs. Le cas échéant, les réfectoires peuvent être utilisés comme installations de loisirs.

### *Installations de communications*

65. Dans la mesure du possible, tous les pêcheurs à bord du navire doivent avoir raisonnablement accès à des équipements pour effectuer leurs communications à un coût raisonnable n'excédant pas le coût total facturé à l'armateur à la pêche.

### *Cuisine et cambuse*

66. Des équipements doivent être prévus pour la préparation des aliments. Dans la mesure où il n'en est pas expressément disposé autrement, ces équipements sont installés, si possible, dans une cuisine séparée.

67. La cuisine, ou coin cuisine lorsqu'il n'existe pas de cuisine séparée, doit être d'une dimension adéquate, être bien éclairée et ventilée et être correctement équipée et entretenue.

68. Les navires d'une longueur égale ou supérieure à 24 mètres doivent être équipés d'une cuisine séparée.

69. Les bouteilles de gaz butane ou propane utilisé à des fins de cuisine doivent être placées sur le pont découvert, dans un lieu abrité conçu pour les protéger contre les sources extérieures de chaleur et les chocs.

70. Un emplacement adéquat pour les provisions, d'un volume suffisant, doit être prévu et pouvoir être maintenu sec, frais et bien aéré pour éviter que les provisions ne se gâtent. Dans la mesure où il n'en est pas expressément disposé autrement, des réfrigérateurs ou autres moyens de stockage à basse température sont si possible utilisés.

71. Pour les navires d'une longueur égale ou supérieure à 24 mètres, une cambuse et un réfrigérateur ou autre local d'entreposage à basse température doivent être utilisés.

---

### *Food and potable water*

72. Food and potable water shall be sufficient, having regard to the number of fishers, and the duration and nature of the voyage. In addition, they shall be suitable in respect of nutritional value, quality, quantity and variety, having regard as well to the fishers' religious requirements and cultural practices in relation to food.

73. The competent authority may establish requirements for the minimum standards and quantity of food and water to be carried on board.

### *Clean and habitable conditions*

74. Accommodation shall be maintained in a clean and habitable condition and shall be kept free of goods and stores which are not the personal property of the occupants.

75. Galley and food storage facilities shall be maintained in a hygienic condition.

76. Waste shall be kept in closed, well-sealed containers and removed from food-handling areas whenever necessary.

### *Inspections by the skipper or under the authority of the skipper*

77. For vessels of 24 metres in length and over, the competent authority shall require frequent inspections to be carried out, by or under the authority of the skipper, to ensure that:

- (a) accommodation is clean, decently habitable and safe, and is maintained in a good state of repair;
- (b) food and water supplies are sufficient; and
- (c) galley and food storage spaces and equipment are hygienic and in a proper state of repair.

The results of such inspections, and the actions taken to address any deficiencies found, shall be recorded and available for review.

### *Variations*

78. The competent authority, after consultation, may permit derogations from the provisions in this Annex to take into account, without discrimination, the interests of fishers having differing and distinctive religious and social practices, on condition that such derogations do not result in overall conditions less favourable than those which would result from the application of this Annex.

---

### *Nourriture et eau potable*

72. L'avitaillement doit être suffisant compte tenu du nombre de pêcheurs à bord ainsi que de la durée et de la nature du voyage. Il doit être en outre d'une valeur nutritionnelle, d'une qualité, d'une quantité et d'une variété satisfaisantes eu égard également aux exigences de la religion des pêcheurs et à leurs habitudes culturelles en matière alimentaire.

73. L'autorité compétente peut établir des prescriptions concernant les normes minimales et la quantité de nourriture et d'eau devant être disponible à bord.

### *Conditions de salubrité et de propreté*

74. Le logement des pêcheurs doit être maintenu dans un état de propreté et de salubrité et ne doit contenir ni bien ni marchandise qui ne soit pas la propriété personnelle des occupants.

75. La cuisine et les installations d'entreposage des aliments doivent être maintenues dans des conditions hygiéniques.

76. Les déchets doivent être gardés dans des conteneurs fermés et hermétiques qui sont retirés, quand il y a lieu, des espaces de manutention des vivres.

### *Inspections effectuées par le patron ou sous son autorité*

77. Sur les navires d'une longueur égale ou supérieure à 24 mètres, l'autorité compétente doit exiger que des inspections fréquentes soient conduites par le patron ou sous son autorité pour assurer que:

- a) les logements sont propres, décentement habitables, sûrs et maintenus en bon état;
- b) les provisions d'eau et de nourriture sont suffisantes;
- c) la cuisine, la cambuse et les équipements servant à l'entreposage de la nourriture sont hygiéniques et bien entretenus.

Les résultats de ces inspections ainsi que les mesures prises pour remédier à toute défaillance sont consignés et sont disponibles pour consultation.

### *Déroations*

78. L'autorité compétente peut, après consultation, permettre des dérogations aux dispositions de la présente annexe pour tenir compte, sans discrimination, des intérêts des pêcheurs ayant des pratiques religieuses et sociales différentes et particulières, sous réserve qu'il n'en résulte pas des conditions qui, dans l'ensemble, seraient moins favorables que celles qui auraient découlé de l'application de l'annexe.

TEXT OF THE RECOMMENDATION CONCERNING  
WORK IN THE FISHING SECTOR  
SUBMITTED BY THE DRAFTING COMMITTEE

TEXTE DE LA RECOMMANDATION CONCERNANT  
LE TRAVAIL DANS LE SECTEUR DE LA PÊCHE  
PRÉSENTÉ PAR LE COMITÉ DE RÉDACTION

---

## **TEXT OF THE RECOMMENDATION CONCERNING WORK IN THE FISHING SECTOR**

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its 93rd Session on 31 May 2005, and

Taking into account the need to revise the Hours of Work (Fishing) Recommendation, 1920, and

Having decided upon the adoption of certain proposals with regard to work in the fishing sector, which is the fifth item on the agenda of the session, and

Having determined that these proposals shall take the form of a Recommendation supplementing the Work in Fishing Convention, 2005 (hereinafter referred to as “the Convention”);

adopts this        day of June of the year two thousand and five the following Recommendation, which may be cited as the Work in Fishing Recommendation, 2005.

### **PART I. CONDITIONS FOR WORK ON BOARD FISHING VESSELS**

#### *Protection of young persons*

1. Members should establish the requirements for the pre-sea training of persons between the ages of 16 and 18 working on board fishing vessels, taking into account international instruments concerning training for work on board fishing vessels, including occupational safety and health issues such as night work, hazardous tasks, work with dangerous machinery, manual handling and transport of heavy loads, work in high latitudes, work for excessive periods of time and other relevant issues identified after an assessment of the risks concerned.

2. The training of persons between the ages of 16 and 18 might be provided through participation in an apprenticeship or approved training programme, which should operate under established rules and be monitored by the competent authority, and should not interfere with the person’s general education.

3. Members should take measures to ensure that the safety, lifesaving and survival equipment carried on board fishing vessels carrying persons under the age of 18 is appropriate for the size of such persons.

---

## TEXTE DE LA RECOMMANDATION CONCERNANT LE TRAVAIL DANS LE SECTEUR DE LA PÊCHE

La Conférence générale de l'Organisation internationale du Travail,  
Convoquée à Genève par le Conseil d'administration du Bureau  
international du Travail, et s'y étant réunie le 31 mai 2005, en sa  
quatre-vingt-treizième session;

Tenant compte de la nécessité de réviser la recommandation sur la  
durée du travail (pêche), 1920;

Après avoir décidé d'adopter diverses propositions relatives au travail  
dans le secteur de la pêche, question qui constitue le cinquième  
point à l'ordre du jour de la session;

Après avoir décidé que ces propositions prendraient la forme d'une  
recommandation complétant la convention sur le travail dans la  
pêche, 2005 (ci-après dénommée «la convention»),

adopte, ce            jour de juin deux mille cinq, la recommandation ci-après, qui  
sera dénommée Recommandation sur le travail dans la pêche, 2005.

### PARTIE I.    CONDITIONS DE TRAVAIL À BORD DES NAVIRES DE PÊCHE

#### *Protection des adolescents*

1. Les Membres devraient fixer les conditions requises en matière de  
formation préalable à l'embarquement des personnes âgées de 16 à 18 ans  
appelées à travailler à bord des navires de pêche, en prenant en  
considération les instruments internationaux relatifs à la formation au  
travail à bord de ces navires, notamment pour ce qui a trait aux questions de  
sécurité et de santé au travail telles que le travail de nuit, les tâches  
dangereuses, l'utilisation de machines dangereuses, la manutention et le  
transport de lourdes charges, le travail effectué sous des latitudes élevées, la  
durée excessive du travail et autres questions pertinentes recensées après  
évaluation des risques encourus.

2. La formation des personnes âgées de 16 à 18 ans pourrait être  
assurée par le biais de l'apprentissage ou de la participation à des  
programmes de formation approuvés, qui devraient être menés selon des  
règles établies sous la supervision des autorités compétentes et ne devraient  
pas nuire à la possibilité pour les personnes concernées de suivre les  
programmes de l'enseignement général.

3. Les Membres devraient prendre des mesures visant à garantir  
qu'à bord des navires de pêche qui embarquent des jeunes âgés de moins  
de 18 ans les équipements de sécurité, de sauvetage et de survie soient  
adaptés à leur taille.

---

4. The working hours of fishers under the age of 18 should not exceed eight hours per day and 40 hours per week, and they should not work overtime except where unavoidable for safety reasons.

5. Fishers under the age of 18 should be assured sufficient time for all meals and a break of at least one hour for the main meal of the day.

#### *Medical examination*

6. When prescribing the nature of the examination, Members should pay due regard to the age of the person to be examined and the nature of the duties to be performed.

7. The medical certificate should be signed by a medical practitioner approved by the competent authority.

8. Arrangements should be made to enable a person who, after examination, is determined to be unfit for work on board fishing vessels or certain types of fishing vessels, or for certain types of work on board, to apply for a further examination by a medical referee or referees who should be independent of any fishing vessel owner or of any organization of fishing vessel owners or fishers.

9. The competent authority should take into account international guidance on medical examination and certification of persons working at sea, such as the (ILO/WHO) *Guidelines for Conducting Pre-sea and Periodic Medical Fitness Examinations for Seafarers*.

10. For fishers exempted from the application of the provisions concerning medical examination in the Convention, the competent authority should take adequate measures to provide health surveillance for the purpose of occupational safety and health.

#### *Competency and training*

11. Members should:

- (a) take into account generally accepted international standards concerning training and competencies of fishers in determining the competencies required for skippers, mates, engineers and other persons working on board fishing vessels;
- (b) address the following issues, with regard to the vocational training of fishers: national planning and administration, including coordination; financing and training standards; training programmes, including pre-vocational training and also short courses for working fishers; methods of training; and international cooperation; and
- (c) ensure that there is no discrimination with regard to access to training.

---

4. Les pêcheurs âgés de moins de 18 ans ne devraient pas travailler plus de huit heures par jour ni plus de quarante heures par semaine, et ne devraient pas effectuer d'heures supplémentaires à moins que cela ne soit inévitable pour des raisons de sécurité.

5. Les pêcheurs âgés de moins de 18 ans devraient être assurés qu'une pause suffisante leur soit accordée pour chacun des repas et bénéficier d'une pause d'au moins une heure pour prendre leur repas principal.

### *Examen médical*

6. Aux fins de la détermination de la nature de l'examen, les Membres devraient tenir compte de l'âge de l'intéressé ainsi que de la nature du travail à effectuer.

7. Le certificat médical devrait être signé par du personnel médical agréé par l'autorité compétente.

8. Des dispositions devraient être prises pour permettre à toute personne qui, après avoir été examinée, est considérée comme inapte à travailler à bord d'un navire de pêche ou de certains types de navires de pêche, ou à effectuer certains types de tâches à bord, de demander à être examinée par un ou plusieurs arbitres médicaux indépendants de tout armateur à la pêche ou de toute organisation d'armateurs à la pêche ou de pêcheurs.

9. L'autorité compétente devrait tenir compte des directives internationales relatives à l'examen médical et au brevet d'aptitude physique des personnes travaillant en mer, telles que les *Directives relatives à la conduite des examens médicaux d'aptitude précédant l'embarquement et des examens médicaux périodiques des gens de mer* (OIT/OMS).

10. L'autorité compétente devrait prendre des mesures adéquates pour que les pêcheurs auxquels ne s'appliquent pas les dispositions relatives à l'examen médical prescrites dans la convention soient médicalement suivis aux fins de la santé et sécurité au travail.

### *Compétence et formation*

11. Les Membres devraient:

- a) prendre en compte les normes internationales généralement admises en matière de formation et de qualifications des pêcheurs en définissant les compétences requises pour exercer les fonctions de patron, d'officier de pont, de mécanicien et autres fonctions à bord d'un navire de pêche;
- b) examiner les questions suivantes relatives à la formation professionnelle des pêcheurs: organisation et administration nationales, y compris la coordination; financement et normes de formation; programmes de formation, y compris la formation pré-professionnelle ainsi que les cours de courte durée destinés aux pêcheurs en activité; méthodes de formation; et coopération internationale;
- c) s'assurer qu'il n'existe pas de discrimination en matière d'accès à la formation.

---

## PART II. CONDITIONS OF SERVICE

### *Record of service*

12. At the end of each contract, a record of service in regard to that contract should be made available to the fisher concerned, or entered in the fisher's service book.

### *Special measures*

13. For fishers excluded from the scope of the Convention, the competent authority should take measures to provide them with adequate protection with respect to their conditions of work and means of dispute settlement.

### *Payment of fishers*

14. Fishers should have the right to advances against earnings under prescribed conditions.

15. For vessels of 24 metres in length and over, all fishers should be entitled to minimum payment in accordance with national laws, regulations or collective agreements.

## PART III. ACCOMODATION

16. When establishing requirements or guidance, the competent authority should take into account relevant international guidance on accommodation, food, and health and hygiene relating to persons working or living on board vessels, including the most recent editions of the (FAO/ILO/IMO) *Code of Safety for Fishermen and Fishing Vessels* and the (FAO/ILO/IMO) *Voluntary Guidelines for the Design, Construction and Equipment of Small Fishing Vessels*.

17. The competent authority should work with relevant organizations and agencies to develop and disseminate educational material and on-board information and guidance concerning safe and healthy accommodation and food on board fishing vessels.

18. Inspections of crew accommodation required by the competent authority should be carried out together with initial or periodic surveys or inspections for other purposes.

### *Design and construction*

19. Adequate insulation should be provided for exposed decks over crew accommodation spaces, external bulkheads of sleeping rooms and mess rooms, machinery casings and boundary bulkheads of galleys and other

---

## PARTIE II. CONDITIONS DE SERVICE

### *Relevé des états de service*

12. A la fin de chaque contrat, un relevé des états de service concernant ce contrat devrait être mis à la disposition de chaque pêcheur concerné ou noté dans son livret de travail.

### *Mesures spéciales*

13. Pour les pêcheurs exclus du champ d'application de la convention, l'autorité compétente devrait prendre des mesures prévoyant une protection adéquate en ce qui concerne leurs conditions de travail et des mécanismes de règlement des différends.

### *Paiement des pêcheurs*

14. Les pêcheurs devraient avoir le droit au versement d'avances à valoir sur leurs gains dans des conditions déterminées.

15. Pour les navires d'une longueur égale ou supérieure à 24 mètres, tous les pêcheurs devraient avoir droit à un paiement minimal, conformément à la législation nationale ou aux conventions collectives.

## PARTIE III. LOGEMENT

16. Lors de l'élaboration de prescriptions ou directives, l'autorité compétente devrait tenir compte des directives internationales applicables en matière de logement, d'alimentation, et de santé et d'hygiène concernant les personnes qui travaillent ou qui vivent à bord de navires, y compris l'édition la plus récente du *Recueil de règles de sécurité pour les pêcheurs et les navires de pêche* (FAO/OIT/OMI) ainsi que des *Directives facultatives pour la conception, la construction et l'équipement des navires de pêche de faibles dimensions* (FAO/OIT/OMI).

17. L'autorité compétente devrait travailler avec les organisations et agences pertinentes pour élaborer et diffuser des documents pédagogiques et des informations disponibles à bord du navire ainsi que des instructions sur ce qui constitue une alimentation et un logement sûrs et sains à bord des navires de pêche.

18. Les inspections du logement de l'équipage prescrites par l'autorité compétente devraient être entreprises conjointement aux enquêtes ou inspections initiales ou périodiques menées à d'autres fins.

### *Conception et construction*

19. Une isolation adéquate devrait être fournie pour les ponts extérieurs recouvrant le logement de l'équipage, les parois extérieures des postes de couchage et réfectoires, les encaissements de machines et les

---

spaces in which heat is produced, and, as necessary, to prevent condensation or overheating in sleeping rooms, mess rooms, recreation rooms and passageways.

20. Protection should be provided from the heat effects of any steam or hot water service pipes. Main steam and exhaust pipes should not pass through crew accommodation or through passageways leading to crew accommodation. Where this cannot be avoided, pipes should be adequately insulated and encased.

21. Materials and furnishings used in accommodation spaces should be impervious to dampness, easy to keep clean and not likely to harbour vermin.

### *Noise and vibration*

22. Noise levels for working and living spaces, which are established by the competent authority, should be in conformity with the guidelines of the International Labour Organization on exposure levels to ambient factors in the workplace and, where applicable, the specific protection recommended by the International Maritime Organization, together with any subsequent amending and supplementary instruments for acceptable noise levels on board ships.

23. The competent authority, in conjunction with the competent international bodies and with representatives of organizations of fishing vessel owners and fishers and taking into account, as appropriate, relevant international standards, should review on an ongoing basis the problem of vibration on board fishing vessels with the objective of improving the protection of fishers, as far as practicable, from the adverse effects of vibration.

(1) Such review should cover the effect of exposure to excessive vibration on the health and comfort of fishers and the measures to be prescribed or recommended to reduce vibration on fishing vessels to protect fishers.

(2) Measures to reduce vibration, or its effects, to be considered should include:

- (a) instruction of fishers in the dangers to their health of prolonged exposure to vibration;
- (b) provision of approved personal protective equipment to fishers where necessary; and
- (c) assessment of risks and reduction of exposure in sleeping rooms, mess rooms, recreational accommodation and catering facilities and other fishers' accommodation by adopting measures in accordance with the guidance provided by the (ILO) *Code of practice on ambient factors in the workplace* and any subsequent revisions, taking into account the difference between exposure in the workplace and in the living space.

---

cloisons qui limitent les cuisines et les autres locaux dégageant de la chaleur et pour éviter, au besoin, toute condensation ou chaleur excessive, pour les postes de couchage, les réfectoires, les installations de loisirs et les coursives.

20. Une protection devrait être prévue pour calorifuger les canalisations de vapeur et d'eau chaude. Les tuyauteries principales de vapeur et d'échappement ne devraient pas passer par les logements de l'équipage ni par les coursives y conduisant. Lorsque cela ne peut être évité, les tuyauteries devraient être convenablement isolées et placées dans une gaine.

21. Les matériaux et fournitures utilisés dans le logement de l'équipage devraient être imperméables, faciles à nettoyer et ne pas être susceptibles d'abriter de la vermine.

### *Bruits et vibrations*

22. Les niveaux de bruit établis par l'autorité compétente pour les postes de travail et les locaux d'habitation devraient être conformes aux directives de l'Organisation internationale du Travail relatives aux niveaux d'exposition aux facteurs ambiants sur le lieu de travail ainsi que, le cas échéant, aux normes de protection particulières recommandées par l'Organisation maritime internationale, et à tout instrument relatif aux niveaux de bruit acceptables à bord des navires adopté ultérieurement.

23. L'autorité compétente, conjointement avec les organismes internationaux compétents et les représentants des organisations d'armateurs à la pêche et de pêcheurs et compte tenu, selon le cas, des normes internationales pertinentes, devrait examiner de manière continue le problème des vibrations à bord des navires de pêche en vue d'améliorer, autant que possible, la protection des pêcheurs contre les effets néfastes de telles vibrations.

(1) Cet examen devrait porter sur les effets de l'exposition aux vibrations excessives sur la santé et le confort des pêcheurs et les mesures à prescrire ou à recommander pour réduire les vibrations sur les navires de pêche afin de protéger les pêcheurs.

(2) Les mesures à étudier pour réduire les vibrations ou leurs effets devraient comprendre:

- a) la formation des pêcheurs aux risques que l'exposition prolongée aux vibrations présente pour leur santé;
- b) la fourniture aux pêcheurs d'un équipement de protection individuelle agréé lorsque cela est nécessaire;
- c) l'évaluation des risques et la réduction de l'exposition aux vibrations dans les postes de couchage, les salles à manger, les installations de loisirs et de restauration et autres locaux d'habitation pour les pêcheurs par des mesures conformes aux orientations données dans le *Recueil de directives pratiques sur les facteurs ambiants sur le lieu de travail* (OIT) et ses versions révisées ultérieures, en tenant compte des écarts entre l'exposition sur les lieux de travail et dans les locaux d'habitation.

---

### *Heating*

24. The heating system should be capable of maintaining the temperature in crew accommodation at a satisfactory level, as established by the competent authority, under normal conditions of weather and climate likely to be met with on service, and should be designed so as not to endanger the health or safety of the fishers or the safety of the vessel.

### *Lighting*

25. Methods of lighting should not endanger the health and safety of the fishers or the safety of the vessel.

### *Sleeping rooms*

26. Each berth should be fitted with a comfortable mattress with a cushioned bottom or a combined mattress, including a spring bottom, or a spring mattress. The cushioning material used should be made of approved material. Berths should not be placed side by side in such a way that access to one berth can be obtained only over another. The lower berth in a double tier should not be less than 0.3 metres above the floor, and the upper berth should be fitted with a dust-proof bottom and placed approximately midway between the bottom of the lower berth and the lower side of the deck head beams. Berths should not be arranged in tiers of more than two. In the case of berths placed along the vessel's side, there should be only a single tier when a sidelight is situated above a berth.

27. Sleeping rooms should be fitted with curtains for the sidelights, as well as a mirror, small cabinets for toilet requisites, a book rack and a sufficient number of coat hooks.

28. As far as practicable, berthing of crew members should be so arranged that watches are separated and that no day worker shares a room with a watch-keeper.

29. On vessels of 24 metres in length and over, separate sleeping rooms for men and women should be provided.

### *Sanitary accommodation*

30. Sanitary accommodation spaces should have:

- (a) floors of approved durable material which can be easily cleaned, and which are impervious to dampness and properly drained;

---

### *Chauffage*

24. Le système de chauffage devrait permettre de maintenir la température dans le logement de l'équipage à un niveau satisfaisant, établi par l'autorité compétente, dans les conditions normales de temps et de climat que le navire est susceptible de rencontrer en cours de navigation. Le système devrait être conçu de manière à ne pas constituer un risque pour la santé ou la sécurité de l'équipage, ni pour la sécurité du navire.

### *Eclairage*

25. Les systèmes d'éclairage ne doivent pas mettre en péril la santé ou la sécurité des pêcheurs ni la sécurité du navire.

### *Postes de couchage*

26. Toute couchette devrait être pourvue d'un matelas confortable muni d'un fond rembourré ou d'un matelas combiné, posé sur support élastique, ou d'un matelas à ressorts. Le rembourrage utilisé doit être d'un matériau approuvé. Les couchettes ne devraient pas être placées côte à côte d'une façon telle que l'on ne puisse accéder à l'une d'elles qu'en passant au-dessus d'une autre. Lorsque des couchettes sont superposées, la couchette inférieure ne devrait pas être placée à moins de 0,3 mètre au-dessus du plancher et la couchette supérieure devrait être équipée d'un fond imperméable à la poussière et disposée approximativement à mi-hauteur entre le fond de la couchette inférieure et le dessous des barrots du plafond. La superposition de plus de deux couchettes devrait être interdite. Dans le cas où des couchettes sont placées le long de la muraille du navire, il devrait être interdit de superposer des couchettes à l'endroit où un hublot est situé au-dessus d'une couchette.

27. Les postes de couchage devraient être équipés de rideaux aux hublots, d'un miroir, de petits placards pour les articles de toilette, d'une étagère à livres et d'un nombre suffisant de patères.

28. Dans la mesure du possible, les couchettes des membres de l'équipage devraient être réparties de façon à séparer les quarts et à éviter qu'un pêcheur de jour ne partage le même poste qu'un pêcheur prenant le quart.

29. Les navires d'une longueur égale ou supérieure à 24 mètres devraient être pourvus de postes de couchage séparés pour les hommes et pour les femmes.

### *Installations sanitaires*

30. Les espaces destinés aux installations sanitaires devraient avoir:

- a) des sols revêtus d'un matériau durable approuvé, facile à nettoyer et imperméable, et être pourvus d'un système efficace d'écoulement des eaux;

- 
- (b) bulkheads of steel or other approved material which should be watertight up to at least 0.23 metres above the level of the deck;
  - (c) sufficient lighting, heating and ventilation; and
  - (d) soil pipes and waste pipes of adequate dimensions which are constructed so as to minimize the risk of obstruction and to facilitate cleaning; such pipes should not pass through fresh water or drinking-water tanks, nor should they, if practicable, pass overhead in mess rooms or sleeping accommodation.

31. Toilets should be of an approved type and provided with an ample flush of water, available at all times and independently controllable. Where practicable, they should be situated convenient to, but separate from, sleeping rooms and washrooms. Where there is more than one toilet in a compartment, the toilets should be sufficiently screened to ensure privacy.

32. Separate sanitary facilities should be provided for women fishers.

#### *Recreational facilities*

33. Where recreational facilities are required, furnishings should include, as a minimum, a bookcase and facilities for reading, writing and, where practicable, games. Recreational facilities and services should be reviewed frequently to ensure that they are appropriate in the light of changes in the needs of fishers resulting from technical, operational and other developments. Consideration should also be given to including the following facilities at no cost to the fishers, where practicable:

- (a) a smoking room;
- (b) television viewing and the reception of radio broadcasts;
- (c) projection of films or video films, the stock of which should be adequate for the duration of the voyage and, where necessary, changed at reasonable intervals;
- (d) sports equipment including exercise equipment, table games, and deck games;
- (e) a library containing vocational and other books, the stock of which should be adequate for the duration of the voyage and changed at reasonable intervals;
- (f) facilities for recreational handicrafts; and
- (g) electronic equipment such as radio, television, video recorder, DVD/CD player, personal computer and software, and cassette recorder/player.

- 
- b) des cloisons en acier ou en tout autre matériau approuvé qui soient étanches sur une hauteur d'au moins 0,23 mètre à partir du pont;
  - c) une ventilation, un éclairage et un chauffage suffisants;
  - d) des conduites d'évacuation des eaux des toilettes et des eaux usées de dimensions adéquates et installées de manière à réduire au minimum les risques d'obstruction et à en faciliter le nettoyage, et qui ne devraient pas traverser les réservoirs d'eau douce ou d'eau potable ni, si possible, passer sous les plafonds des réfectoires ou des postes de couchage.

31. Les toilettes devraient être d'un modèle approuvé et pourvues d'une chasse d'eau puissante, en état de fonctionner à tout moment et qui puisse être actionnée individuellement. Là où cela est possible, les toilettes devraient être situées en un endroit aisément accessible à partir des postes de couchage et des locaux affectés aux soins de propreté, mais devraient en être séparées. Si plusieurs toilettes sont installées dans un même local, elles devraient être suffisamment encloses pour préserver l'intimité.

32. Des installations sanitaires séparées devraient être prévues pour les pêcheuses.

### *Installations de loisirs*

33. Là où des installations de loisirs sont prescrites, les équipements devraient au minimum inclure un meuble bibliothèque et des moyens nécessaires pour lire, écrire et, si possible, jouer. Les installations et services de loisirs devraient faire l'objet de réexamens fréquents afin qu'ils soient adaptés aux besoins des pêcheurs, compte tenu de l'évolution des techniques, des conditions d'exploitation ainsi que de tout autre développement. Lorsque cela est réalisable, il faudrait aussi envisager de fournir gratuitement aux pêcheurs:

- a) un fumoir;
- b) la possibilité de regarder la télévision et d'écouter la radio;
- c) la possibilité de regarder des films ou des vidéos, dont le stock devrait être suffisant pour la durée du voyage et, si nécessaire, être renouvelé à des intervalles raisonnables;
- d) des articles de sport, y compris du matériel de culture physique, des jeux de table et des jeux de pont;
- e) une bibliothèque contenant des ouvrages de caractère professionnel ou autre, en quantité suffisante pour la durée du voyage, et dont le stock devrait être renouvelé à des intervalles raisonnables;
- f) des moyens de réaliser des travaux d'artisanat pour se détendre;
- g) des appareils électroniques tels que radios, télévisions, magnétoscopes, lecteurs de CD/DVD, ordinateurs, logiciels et magnétophones à cassettes.

---

*Food*

34. Fishers employed as cooks should be trained and qualified for their position on board.

PART IV. MEDICAL CARE, HEALTH PROTECTION  
AND SOCIAL SECURITY

*Medical care on board*

35. The competent authority should establish a list of medical supplies and equipment appropriate to the risks concerned that should be carried on fishing vessels; such list should include women's sanitary protection supplies together with discreet, environmentally friendly disposal units.

36. Fishing vessels carrying 100 or more fishers should have a qualified medical doctor on board.

37. Fishers should receive training in basic first aid in accordance with national laws and regulations, taking into account applicable international instruments.

38. A standard medical report form should be specially designed to facilitate the confidential exchange of medical and related information concerning individual fishers between the fishing vessel and the shore in cases of illness or injury.

39. For vessels of 24 metres in length and over, in addition to the provisions of Article 32 of the Convention, the following elements should be taken into account:

- (a) when prescribing the medical equipment and supplies to be carried on board, the competent authority should take into account international recommendations in this field, such as those contained in the most recent editions of the (ILO/IMO/WHO) *International Medical Guide for Ships* and the (WHO) *Model List of Essential Medicines*, as well as advances in medical knowledge and approved methods of treatment;
- (b) inspections of medical equipment and supplies should take place at intervals of no more than 12 months; the inspector should ensure that expiry dates and conditions of storage of all medicines are checked, the contents of the medicine chest are listed and conform to the medical guide used nationally, and medical supplies are labelled with generic names in addition to any brand names used, and with expiry dates and conditions of storage;
- (c) the medical guide should explain how the contents of the medical equipment and supplies are to be used, and should be designed to enable persons other than a medical doctor to care for the sick or injured on board, both with and without medical advice by radio or

---

## *Nourriture*

34. Les pêcheurs faisant office de cuisinier devraient être formés et compétents pour occuper ce poste à bord.

### PARTIE IV. SOINS MÉDICAUX, PROTECTION DE LA SANTÉ ET SÉCURITÉ SOCIALE

#### *Soins médicaux à bord*

35. L'autorité compétente devrait établir une liste des fournitures médicales et du matériel médical qui devrait se trouver à bord des navires de pêche, compte tenu des risques encourus. Cette liste devrait inclure des produits de protection hygiénique pour les femmes et des récipients discrets non nuisibles pour l'environnement.

36. Un médecin qualifié devrait se trouver à bord des navires de pêche qui embarquent 100 pêcheurs ou plus.

37. Les pêcheurs devraient recevoir une formation de base aux premiers secours, conformément à la législation nationale et compte tenu des instruments internationaux pertinents.

38. Un formulaire de rapport médical type devrait être spécialement conçu pour faciliter l'échange confidentiel d'informations médicales et autres informations connexes concernant les pêcheurs entre le navire de pêche et la terre en cas de maladie ou d'accident.

39. Pour les navires d'une longueur égale ou supérieure à 24 mètres, en sus des dispositions de l'article 32 de la convention, les éléments suivants devraient être pris en compte:

- a) en prescrivant le matériel médical et les fournitures médicales à conserver à bord, l'autorité compétente devrait tenir compte des recommandations internationales en la matière, telles que celles prévues dans l'édition la plus récente du *Guide médical international de bord* (OIT/OMI/OMS) et la *Liste modèle des médicaments essentiels* (OMS), ainsi que des progrès réalisés dans les connaissances médicales et les méthodes de traitement approuvées;
- b) le matériel médical et les fournitures médicales devraient faire l'objet d'une inspection tous les douze mois au moins; l'inspecteur devrait s'assurer que les dates de péremption et les conditions de conservation de tous les médicaments sont vérifiées, que le contenu de la pharmacie de bord fait l'objet d'une liste et qu'il correspond au guide médical employé sur le plan national, que les fournitures médicales portent des étiquettes indiquant le nom générique outre le nom de marque, la date de péremption et les conditions de conservation;
- c) le guide médical devrait expliquer le mode d'utilisation du matériel médical et des fournitures médicales et être conçu de façon à permettre à des personnes autres que des médecins de donner des soins aux malades et aux blessés à bord, avec ou sans consultation médicale par

---

satellite communication; the guide should be prepared taking into account international recommendations in this field, including those contained in the most recent editions of the (ILO/IMO/WHO) *International Medical Guide for Ships* and the (IMO) *Medical First Aid Guide for Use in Accidents Involving Dangerous Goods*; and

- (d) medical advice provided by radio or satellite communication should be available free of charge to all vessels irrespective of the flag they fly.

### *Occupational safety and health*

#### *Research, dissemination of information and consultation*

40. In order to contribute to the continuous improvement of safety and health of fishers, Members should have in place policies and programmes for the prevention of accidents on board fishing vessels which should provide for the gathering and dissemination of occupational health and safety materials, research and analysis, taking into consideration technological progress and knowledge in the field of occupational safety and health as well as of relevant international instruments.

41. The competent authority should take measures to ensure regular consultations on safety and health matters with the aim of ensuring that all concerned are kept reasonably informed of national, international and other developments in the field and on their possible application to fishing vessels flying the flag of the Member.

42. When ensuring that fishing vessel owners, skippers, fishers and other relevant persons receive sufficient and suitable guidance, training material, or other appropriate information, the competent authority should take into account relevant international standards, codes, guidance and other information. In so doing, the competent authority should keep abreast of and utilize international research and guidance concerning safety and health in the fishing sector, including relevant research in occupational safety and health in general which may be applicable to work on board fishing vessels.

43. Information concerning particular hazards should be brought to the attention of all fishers and other persons on board through official notices containing instructions or guidance, or other appropriate means.

44. Joint committees on occupational safety and health should be established:

- (a) ashore; or
- (b) on fishing vessels, where determined by the competent authority, after consultation, to be practicable in light of the number of fishers on board the vessel.

---

radio ou par satellite; le guide devrait être préparé en tenant compte des recommandations internationales en la matière, y compris celles figurant dans l'édition la plus récente du *Guide médical international de bord* (OIT/OMI/OMS) et du *Guide des soins médicaux d'urgence à donner en cas d'accidents dus à des marchandises dangereuses* (OMI);

- d) les consultations médicales par radio ou par satellite devraient être assurées gratuitement à tous les navires quel que soit leur pavillon.

### *Sécurité et santé au travail*

#### *Recherche, diffusion d'informations et consultation*

40. Afin de contribuer à l'amélioration continue de la sécurité et de la santé des pêcheurs, les Membres devraient mettre en place des politiques et des programmes de prévention des accidents à bord des navires de pêche prévoyant la collecte et la diffusion d'informations, de recherches et d'analyses sur la sécurité et la santé au travail, en tenant compte du progrès des techniques et des connaissances dans le domaine de la sécurité et de la santé au travail et des instruments internationaux pertinents.

41. L'autorité compétente devrait prendre des mesures propres à assurer la tenue de consultations régulières sur les questions de santé et de sécurité au travail, en vue de garantir que toutes les personnes concernées sont tenues convenablement informées des évolutions nationales et internationales ainsi que des autres progrès réalisés dans ce domaine, et de leur application possible aux navires de pêche battant le pavillon du Membre.

42. En veillant à ce que les armateurs à la pêche, les patrons, les pêcheurs et les autres personnes concernées reçoivent suffisamment de directives et de matériel de formation appropriés ainsi que toute autre information pertinente, l'autorité compétente devrait tenir compte des normes internationales, des recueils de directives, des orientations et de toutes autres informations utiles disponibles. Ce faisant, l'autorité compétente devrait se tenir au courant et faire usage des recherches et des orientations internationales en matière de santé et de sécurité dans le secteur de la pêche, y compris des recherches pertinentes dans le domaine de la santé et de la sécurité au travail en général qui pourraient être applicables au travail à bord des navires de pêche.

43. Les informations concernant les dangers particuliers devraient être portées à l'attention de tous les pêcheurs et d'autres personnes à bord au moyen de notices officielles contenant des instructions ou des directives ou d'autres moyens appropriés.

44. Des comités paritaires de santé et de sécurité au travail devraient être établis:

- a) à terre; ou
- b) sur les navires de pêche, si l'autorité compétente, après consultation, décide que cela est réalisable compte tenu du nombre de pêcheurs à bord.

---

### *Occupational safety and health management systems*

45. When establishing methods and programmes concerning safety and health in the fishing sector, the competent authority should take into account any relevant international guidance concerning occupational safety and health management systems, including the *Guidelines on occupational safety and health management systems, ILO-OSH 2001*.

### *Risk evaluation*

46. (1) Risk evaluation in relation to fishing should be conducted, as appropriate, with the participation of fishers or their representatives and should include:

- (a) risk assessment and management;
- (b) training, taking into consideration the relevant provisions of Chapter III of the International Convention on Standards of Training, Certification and Watchkeeping for Fishing Vessel Personnel, 1995 (STCW-F Convention) adopted by the IMO; and
- (c) on-board instruction of fishers.

(2) To give effect to subparagraph (1)(a), Members, after consultation, should adopt laws, regulations or other measures requiring:

- (a) the regular and active involvement of all fishers in improving safety and health by continually identifying hazards, assessing risks and taking action to address risks through safety management;
- (b) an occupational safety and health management system that may include an occupational safety and health policy, provisions for fisher participation and provisions concerning organizing, planning, implementing and evaluating the system and taking action to improve the system; and
- (c) a system for the purpose of assisting in the implementation of a safety and health policy and programme and providing fishers with a forum to influence safety and health matters; on-board prevention procedures should be designed so as to involve fishers in the identification of hazards and potential hazards and in the implementation of measures to reduce or eliminate such hazards.

(3) When developing the provisions referred to in subparagraph (1)(a), Members should take into account the relevant international instruments on risk assessment and management.

### *Technical specifications*

47. Members should address the following, to the extent practicable and as appropriate to the conditions in the fishing sector:

---

## *Systèmes de gestion de la santé et de la sécurité au travail*

45. Lors de l'élaboration de méthodes et de programmes relatifs à la santé et à la sécurité dans le secteur de la pêche, l'autorité compétente devrait prendre en considération toutes les directives internationales pertinentes concernant les systèmes de gestion de la santé et de la sécurité au travail, y compris les *Principes directeurs concernant les systèmes de gestion de la sécurité et de la santé au travail, ILO-OSH 2001*.

### *Evaluation des risques*

46. (1) Des évaluations des risques concernant la pêche devraient être conduites, lorsque cela est approprié, avec la participation de pêcheurs ou de leurs représentants et devraient inclure:

- a) l'évaluation et la gestion des risques;
- b) la formation, en prenant en considération les dispositions pertinentes du chapitre III de la Convention internationale sur les normes de formation du personnel des navires de pêche, de délivrance des brevets et de veille, 1995, adoptée par l'OMI (convention STCW-F);
- c) l'instruction des pêcheurs à bord.

(2) Pour donner effet aux dispositions de l'alinéa a) du sous-paragraphe (1), les Membres devraient adopter, après consultation, une législation ou d'autres mesures exigeant que:

- a) tous les pêcheurs participent régulièrement et activement à l'amélioration de la santé et de la sécurité en répertoriant de façon permanente les dangers, en évaluant les risques et en prenant des mesures visant à les réduire grâce à la gestion de la sécurité;
- b) un système de gestion de la santé et de la sécurité au travail soit mis en place, qui peut inclure une politique relative à la santé et à la sécurité au travail, des dispositions prévoyant la participation des pêcheurs et concernant l'organisation, la planification, l'application et l'évaluation de ce système ainsi que les mesures à prendre pour l'améliorer;
- c) un système soit mis en place pour faciliter la mise en œuvre de la politique et du programme relatifs à la santé et à la sécurité au travail et donner aux pêcheurs un moyen d'expression publique leur permettant d'influer sur les questions de santé et de sécurité; les procédures de prévention à bord devraient être conçues de manière à associer les pêcheurs au repérage des dangers existants et potentiels et à la mise en œuvre de mesures propres à les atténuer ou à les éliminer.

(3) Lors de l'élaboration des dispositions mentionnées à l'alinéa a) du sous-paragraphe (1), les Membres devraient tenir compte des instruments internationaux pertinents se rapportant à l'évaluation et à la gestion des risques.

### *Spécifications techniques*

47. Les Membres devraient, dans la mesure du possible et selon qu'il convient au secteur de la pêche, examiner les questions suivantes:

- 
- (a) seaworthiness and stability of fishing vessels;
  - (b) radio communications;
  - (c) temperature, ventilation and lighting of working areas;
  - (d) mitigation of the slipperiness of deck surfaces;
  - (e) machinery safety, including guarding of machinery;
  
  - (f) vessel familiarization for fishers and fisheries observers new to the vessel;
  - (g) personal protective equipment;
  - (h) fire-fighting and lifesaving;
  - (i) loading and unloading of the vessel;
  - (j) lifting gear;
  - (k) anchoring and mooring equipment;
  - (l) safety and health in living quarters;
  - (m) noise and vibration in work areas;
  - (n) ergonomics, including in relation to the layout of workstations and manual lifting and handling;
  - (o) equipment and procedures for the catching, handling, storage and processing of fish and other marine resources;
  - (p) vessel design, construction and modification relevant to occupational safety and health;
  - (q) navigation and vessel handling;
  - (r) hazardous materials used on board the vessel;
  - (s) safe means of access to and exit from fishing vessels in port;
  - (t) special safety and health requirements for young persons;
  
  - (u) prevention of fatigue; and
  - (v) other issues related to safety and health.

48. When developing laws, regulations or other measures concerning technical standards relating to safety and health on board fishing vessels, the competent authority should take into account the most recent edition of the (FAO/ILO/IMO) *Code of Safety for Fishermen and Fishing Vessels, Part A*.

#### *Establishment of a list of occupational diseases*

49. Members should establish a list of diseases known to arise out of exposure to dangerous substances or conditions in the fishing sector.

- 
- a) navigabilité et stabilité des navires de pêche;
  - b) communications par radio;
  - c) température, ventilation et éclairage des postes de travail;
  - d) atténuation du risque présenté par les ponts glissants;
  - e) sécurité d'utilisation des machines, y compris les dispositifs de protection;
  - f) familiarisation avec le navire des pêcheurs ou observateurs des pêches nouvellement embarqués;
  - g) équipement de protection individuelle;
  - h) sauvetage et lutte contre les incendies;
  - i) chargement et déchargement du navire;
  - j) appareils de levage;
  - k) équipements de mouillage et d'amarrage;
  - l) santé et sécurité dans les locaux d'habitation;
  - m) bruits et vibrations dans les postes de travail;
  - n) ergonomie, y compris en ce qui concerne l'aménagement des postes de travail et la manutention et la manipulation des charges;
  - o) équipement et procédures pour la prise, la manipulation, le stockage et le traitement du poisson et des autres ressources marines;
  - p) conception et construction du navire et modifications touchant à la santé et à la sécurité au travail;
  - q) navigation et manœuvre du navire;
  - r) matériaux dangereux utilisés à bord;
  - s) sécurité des moyens d'accéder aux navires et d'en sortir dans les ports;
  - t) prescriptions spéciales en matière de santé et de sécurité applicables aux adolescents;
  - u) prévention de la fatigue;
  - v) autres questions liées à la santé et à la sécurité.

48. Lors de l'élaboration d'une législation ou d'autres mesures relatives aux normes techniques concernant la santé et la sécurité à bord des navires de pêche, l'autorité compétente devrait tenir compte de l'édition la plus récente du *Recueil de règles de sécurité pour les pêcheurs et les navires de pêche, Partie A* (FAO/OIT/OMI).

#### *Etablissement d'une liste de maladies professionnelles*

49. Les Membres devraient dresser la liste des maladies dont il est connu qu'elles résultent de l'exposition à des substances ou à des conditions dangereuses dans le secteur de la pêche.

---

*Social security*

50. For the purpose of extending social security protection progressively to all fishers, Members should maintain up-to-date information on the following:

- (a) the percentage of fishers covered;
- (b) the range of contingencies covered; and
- (c) the level of benefits.

51. Every person protected under Article 34 of the Convention should have a right of appeal in the case of a refusal of the benefit or of an adverse determination as to the quality or quantity of the benefit.

52. The protections referred to in Articles 38 and 39 of the Convention should be granted throughout the contingency covered.

PART V. OTHER PROVISIONS

53. A Member, in its capacity as a coastal State, when granting licences for fishing in its exclusive economic zone, may require that fishing vessels comply with the standards of the Convention. If such licences are issued by coastal States, these States should take into account certificates or other valid documents stating that the vessel concerned has been inspected by the competent authority or on its behalf and has been found to be in compliance with the provisions of the Convention concerning work in the fishing sector.

---

### *Sécurité sociale*

50. Aux fins d'étendre progressivement la sécurité sociale à tous les pêcheurs, les Membres devraient établir et tenir à jour des informations sur les points suivants:

- a) le pourcentage de pêcheurs couverts;
- b) l'éventail des éventualités couvertes;
- c) le niveau des prestations.

51. Toute personne protégée en vertu de l'article 34 de la convention devrait avoir le droit de faire recours en cas de refus de la prestation ou d'une décision défavorable sur la qualité ou la quantité de celle-ci.

52. Les prestations visées aux articles 38 et 39 de la convention devraient être accordées pendant toute la durée de l'éventualité couverte.

### PARTIE V. AUTRES DISPOSITIONS

53. Un Membre, en sa qualité d'Etat côtier, pourrait exiger que les navires de pêche respectent les normes énoncées dans la convention avant d'accorder l'autorisation de pêcher dans sa zone économique exclusive. Dans le cas où ces autorisations sont délivrées par les Etats côtiers, lesdits Etats devraient prendre en considération les certificats ou autres documents valides indiquant que le navire a été inspecté par l'autorité compétente ou en son nom et qu'il est conforme aux dispositions de la convention sur le travail dans le secteur de la pêche.

## Introduction

---

In accordance with a decision taken by the Governing Body of the ILO at its 283rd Session (March 2002),<sup>1</sup> the 92nd Session of the International Labour Conference had on its agenda an item concerning a comprehensive standard (a Convention supplemented by a Recommendation) on work in the fishing sector.<sup>2</sup> The Conference Committee on the Fishing Sector considered these reports and adopted its own report,<sup>3</sup> which in turn was submitted to, and adopted by, the Conference plenary at its 18th sitting. During this sitting the Conference also adopted a resolution to place on the agenda of the next ordinary session of the Conference an item entitled “Work in the fishing sector”.<sup>4</sup>

The second discussion by the Conference of an item concerning a comprehensive standard (a Convention supplemented by a Recommendation) on work in the fishing sector took place at its 93rd Session (2005). The Conference Committee on the Fishing Sector established to discuss this item had before it Reports V(2A)<sup>5</sup> and V(2B),<sup>6</sup> as prepared by the Office on the basis of the replies to Report V(1)<sup>7</sup> and views expressed by a Tripartite Meeting of Experts on the Fishing Sector held from 13 to 17 December 2004.<sup>8</sup> The Committee held 16 sittings. Its report, including a proposed Convention concerning work in the fishing sector and a proposed Recommendation concerning work in the fishing sector, is contained in *Provisional Record* No. 19 of the Conference.<sup>9</sup>

---

<sup>1</sup> GB.283/2/1, para. 21(b).

<sup>2</sup> In preparation for this discussion, the Office produced two reports: Report V(1), *Conditions of work in the fishing sector*, International Labour Conference, 92nd Session, Geneva, 2004 (a “law and practice” report), and Report V(2), *Conditions of work in the fishing sector: The constituents’ views*, International Labour Conference, 92nd Session, Geneva, 2004.

<sup>3</sup> ILO: *Provisional Record* No. 21, International Labour Conference, 92nd Session, Geneva, 2004.

<sup>4</sup> ILO: *Provisional Record* No. 26, International Labour Conference, 92nd Session, Geneva, 2004, pp. 26/1-26/7.

<sup>5</sup> ILO: *Work in the fishing sector*, Report V(2A), International Labour Conference, 93rd Session, Geneva, 2005.

<sup>6</sup> ILO: *Work in the fishing sector*, Report V(2B), International Labour Conference, 93rd Session, Geneva, 2005.

<sup>7</sup> This report, prepared by the Office on the basis of the first discussion, contained the texts of the proposed Convention and Recommendation. It was sent to governments with a request for governments to reply, after consulting the most representative organizations of employers and workers, and to state whether they had any amendments to suggest or comments. See ILO: *Work in the fishing sector*, Report V(1), International Labour Conference, 93rd Session, Geneva, 2005.

<sup>8</sup> The report of this meeting may be found in ILO: *Work in the fishing sector*, Report V(2A), International Labour Conference, 93rd Session, Geneva, 2005, appendix.

<sup>9</sup> ILO: *Provisional Record* No. 19, International Labour Conference, 93rd Session, Geneva, 2005.

The Committee's report was submitted to the plenary of the Conference for discussion and approval. The plenary discussion is contained in *Provisional Record* No. 24 of the Conference.<sup>10</sup>

Subsequently, the texts of the Convention and Recommendation concerning work in the fishing sector were submitted to record votes, in accordance with article 19 of the Constitution of the International Labour Organization.<sup>11</sup> The result of the vote on the Convention was: 288 in favour, 8 against, with 139 abstentions. As the quorum was 297,<sup>12</sup> and the required two-thirds majority was 290 (435 votes cast), the Convention was not adopted. The result of the vote on the Recommendation was: 292 in favour, 8 against, with 135 abstentions. As the quorum was 297, and the required two-thirds majority was 290 (435 votes cast), the Recommendation was adopted.

Following the result of the vote, the Conference adopted the following motion: "[T]he International Labour Conference requests the Governing Body to place on the agenda of the 96th Session of the Conference in 2007 an item concerning work in the fishing sector based on the report of the Committee on the Fishing Sector of the 93rd Session". The Legal Adviser, in providing an opinion to the Conference, noted that the motion referred to the report of the Committee on the Fishing Sector that had proposed both a Convention and a Recommendation. He concluded that when the matter was being reviewed, it would be necessary to review the Recommendation and probably to adopt a new Recommendation that would replace the Recommendation adopted.<sup>13</sup>

## Discussion at the 294th (November 2005) and 295th (March 2006) Sessions of the Governing Body

At its 294th Session (November 2005), the Governing Body included on the agenda of the 96th Session (2007) of the International Labour Conference, with a view to the adoption of a Convention supplemented by a Recommendation, an item concerning work in the fishing sector. It also decided that the Conference should use as the basis for its discussion the report of the Committee on the Fishing Sector of the 93rd Session as well as the outcome of further tripartite consultations.<sup>14</sup>

At its 295th Session (March 2006), the Governing Body considered a document prepared by the Office concerning procedural aspects relating to the preparation of the discussion of the item concerning work in the fishing sector on the agenda of the

---

<sup>10</sup> ILO: *Provisional Record* No. 24, International Labour Conference, 93rd Session, Geneva, 2005, pp. 24/1-24/11.

<sup>11</sup> See ILO: *Provisional Record* No. 25, International Labour Conference, 93rd Session, Geneva, 2005, pp. 25/3-25/5. The texts of the proposed Convention and Recommendation put to the vote were the "Text of the Convention concerning work in the fishing sector submitted by the drafting committee" (*Provisional Record* No. 19A) and the "Text of the Recommendation concerning work in the fishing sector submitted by the drafting committee" (*Provisional Record* No. 19B), the "drafting committee" being the Drafting Committee of the Conference. The text of the Convention in *Provisional Record* No. 19A contained PART IX. FINAL PROVISIONS, Articles 46 to 54, which were not in the version of the proposed Convention contained in *Provisional Record* No. 19 (Report of the Committee on the Fishing Sector). The final provisions are the standard final provisions of ILO Conventions, with the exception of Article 48, paragraph 2, which specifies the following for entry into force: "It shall come into force twelve months after the date on which the ratifications of ten Members, eight of which are coastal States, have been registered with the Director-General".

<sup>12</sup> The votes for (288) and against (8) came to a total of 296, one short of the quorum.

<sup>13</sup> See *Provisional Record* No. 25, p. 25/5.

<sup>14</sup> GB.294/2/1, para. 7(a).

96th Session (2007) of the International Labour Conference.<sup>15</sup> In that document, the Office had drawn attention to the outcome of the 93rd Session (June 2005) of the Conference, and had noted the need to determine the applicable procedure and the related timetable for the preparation for the discussion of an item concerning work in the fishing sector at the 96th Session (2007).

On the basis of the document prepared by the Office, the Governing Body agreed that the question should be governed by a single-discussion procedure, pursuant to article 34, paragraphs 4 and 5, of the Standing Orders of the Conference. It also agreed on a programme of reduced intervals for reports to be submitted to governments, given that this item was included on the agenda of the 96th Session (2007) of the Conference less than 26 months before the opening of the session. Taking into account the above, it also agreed that the proposed programme would entail two reports to be prepared by the Office and sent to governments, with a reduced interval between these reports. The first report, to be dispatched in May 2006 at the latest, would include the report of the Committee on the Fishing Sector of the 93rd Session of the Conference. This would take the place of the summary report normally prepared for single discussion, and it would be accompanied by a short questionnaire. Governments would be requested to consult the most representative organizations of employers and workers before finalizing their replies, which should reach the Office no later than September 2006. On the basis of the replies received, the Office would then draw up a final report proposed to serve as the basis for the Conference discussion; this report should reach governments by February 2007. The Governing Body recalled its earlier decision, taken at its 294th Session (November 2005), that further tripartite consultations would be held.

What follows is a questionnaire prepared in accordance with article 38, paragraph 3, of the Standing Orders of the Conference and the decision of the Governing Body referred to above.

<sup>15</sup> See GB.295/16/3.

# Questionnaire concerning the proposed Convention and Recommendation on work in the fishing sector

---

## I. Rationale of the questionnaire

Bearing in mind the outcome of the 93rd Session (June 2005) of the Conference, and the discussions and decisions of the Governing Body at its 294th (November 2005) and 295th (March 2006) Sessions, the Office initiated consultations on the matters to be addressed in the questionnaire. On the basis of these consultations, the Office has prepared a short questionnaire that focuses on those provisions of the proposed Convention that seemed to pose particularly difficult problems during the discussions in the Committee on the Fishing Sector and that takes account of statements made at the 17th and 19th sittings<sup>1</sup> of the 93rd Session of the Conference.

Governments are asked to reply to these questions and to provide any other views on the content of the proposed Convention and Recommendation on work in the fishing sector, as soon as possible and by 1 September 2006 at the latest, after consulting the most representative organizations of employers and workers.

Governments are requested to indicate which organizations of employers and workers they consulted before they finalized their replies pursuant to article 39, paragraph 6, of the Standing Orders of the Conference. Such consultation is also required by Article 5(1)(a) of the Tripartite Consultation (International Labour Standards) Convention, 1976 (No. 144), for countries that have ratified this Convention. The results of the consultation should be reflected in governments' replies.

### *Provisional Records* of the 93rd Session of the International Labour Conference

A set of *Provisional Records* Nos. 19, 24 and 25 of the 93rd Session of the International Labour Conference is being provided, in the language of correspondence (English, French, Spanish) of the government concerned, with this report. These *Provisional Records* may also be found on the ILO's web site, in pdf format, at: <http://www.ilo.org/public/english/standards/reIm/ilc/ilc93/records.htm>.

### Electronic version of the questionnaire

An electronic version of this questionnaire will be made available on the ILO's website at: <http://www.ilo.org/public/english/standards/reIm/ilc/ilc96/reports.htm>.

Respondents may wish to send a copy of their completed questionnaire by email to [fishstandard@ilo.org](mailto:fishstandard@ilo.org) or by fax to +41 (22) 799 7050.

---

<sup>1</sup> The proceedings of the 17th sitting and of the 19th sitting are contained respectively in *Provisional Record* No. 24 and *Provisional Record* No. 25, International Labour Conference, 93rd Session, Geneva, 2005.

## II. Questions

Member States are requested to reply to the following questions relating to the item concerning work in the fishing sector on the agenda of the 96th Session (2007) of the International Labour Conference. Member States may in addition comment on provisions other than those referred to below.<sup>2</sup>

When answering each question, it is essential to:

- explain the reasons for the answers given; and
- provide suggestions for alternative text when indicating that changes are needed to specific provisions.

**Question 1** – The proposed Convention concerning work in the fishing sector<sup>3</sup> provides, in Part I (Definitions and scope), the possibility for the competent authority, under certain conditions, to exempt certain fishing vessels or fishers from some or all of the provisions of the Convention. Should any additional flexibility be introduced as regards scope?<sup>4</sup> If so, please indicate in respect of *which provisions* and under which conditions.

---

---

---

---

---

---

---

**Question 2** – Articles 10, 11 and 12 of the proposed Convention concern the medical examination of fishers. Should additional flexibility be introduced into these Articles? If so, in respect of *which specific provisions* and under which conditions?

---

---

---

---

---

---

---

---

<sup>2</sup> The Governing Body placed this item on the agenda of the 96th Session of the Conference with a view to the adoption of a Convention supplemented by a Recommendation. The Conference may choose to revise the Recommendation concerning work in the fishing sector, adopted at its 93rd Session.

<sup>3</sup> This text is contained in ILO: *Provisional Record* No. 19, International Labour Conference, 93rd Session, Geneva, 2005.

<sup>4</sup> It has been suggested that the proposed Convention should contain additional flexibility for developing countries.

**Question 3** – Article 14 of the proposed Convention concerns level of manning and minimum hours of rest for certain categories of vessels. Should changes be made to this Article? If so, please indicate the changes proposed and specify the reasons.

---

---

---

---

---

---

---

**Question 4** – Article 28 and Annex III of the proposed Convention concern fishing vessel accommodation.

- (a) Should changes be made to these provisions? If so, in respect of which provisions and why?
- (b) In particular, should the gross tonnage equivalency figures contained in paragraph 7 of Annex III be changed? If so, how and why?
- (c) Should the provisions concerning specific dimensions of accommodation spaces and their furnishings be changed? If so, how and why?

---

---

---

---

---

---

---

**Question 5** – Please indicate any other issues which should be addressed in relation to this agenda item.

---

## INTRODUCTION

The agenda of the 96th Session of the International Labour Conference in 2007 includes an item on “work in the fishing sector”. The background to this may be traced back to 2002.

In that year, the Governing Body of the ILO, at its 283rd Session (March 2002),<sup>1</sup> decided to place on the agenda of the 92nd Session of the International Labour Conference in 2004 an item concerning a comprehensive standard (a Convention supplemented by a Recommendation) on work in the fishing sector. In preparation for this discussion, the Office produced two reports: Report V(1),<sup>2</sup> and Report V(2).<sup>3</sup> The Conference Committee on the Fishing Sector considered these reports and adopted its own report,<sup>4</sup> which in turn was submitted to, and adopted by, the Conference plenary at its 18th sitting. During this sitting the Conference also adopted a resolution to place on the agenda of the next ordinary session of the Conference an item entitled “Work in the fishing sector”.<sup>5</sup>

The second discussion by the Conference of an item concerning a comprehensive standard (a Convention supplemented by a Recommendation) on work in the fishing sector took place at its 93rd Session (2005). The Conference Committee on the Fishing Sector established to discuss this item had before it two reports, Report V(2A)<sup>6</sup> and Report V(2B),<sup>7</sup> prepared by the Office on the basis of the replies to Report V(1)<sup>8</sup> as well as views expressed by the Tripartite Meeting of Experts on the Fishing Sector held from 13 to 17 December 2004.<sup>9</sup> The report of the Committee on the Fishing Sector included a proposed Convention and a proposed Recommendation concerning work in the fishing sector, as contained in *Provisional Record* No. 19 of the Conference.<sup>10</sup>

---

<sup>1</sup> GB.283/2/1, para. 21(b).

<sup>2</sup> ILO: *Conditions of work in the fishing sector* (a “law and practice” report), Report V(1), International Labour Conference, 92nd Session, Geneva, 2004.

<sup>3</sup> ILO: *Conditions of work in the fishing sector: The constituents’ views*, Report V(2), International Labour Conference, 92nd Session, Geneva, 2004.

<sup>4</sup> ILO: *Provisional Record* No. 21, International Labour Conference, 92nd Session, Geneva, 2004.

<sup>5</sup> ILO: *Provisional Record* No. 26, International Labour Conference, 92nd Session, Geneva, 2004, pp. 26/1–26/7.

<sup>6</sup> ILO: *Work in the fishing sector*, Report V(2A), International Labour Conference, 93rd Session, Geneva, 2005.

<sup>7</sup> ILO: *Work in the fishing sector*, Report V(2B), International Labour Conference, 93rd Session, Geneva, 2005.

<sup>8</sup> This report, prepared by the Office on the basis of the first discussion, contained the texts of the proposed Convention and Recommendation. It was sent to governments with the request that they reply, after consulting the most representative organizations of employers and workers, sending any amendments or comments they might wish to make. See ILO: *Work in the fishing sector*, Report V(1), International Labour Conference, 93rd Session, Geneva, 2005.

<sup>9</sup> The report of this meeting may be found in ILO: *Work in the fishing sector*, Report V(2A), International Labour Conference, 93rd Session, Geneva, 2005, appendix.

<sup>10</sup> ILO: *Provisional Record* No. 19, International Labour Conference, 93rd Session, Geneva, 2005.

The Committee's report was submitted to the plenary of the Conference for discussion and adoption. The discussion is contained in *Provisional Record* No. 24 of the Conference.<sup>11</sup>

When put to the vote, the proposed Convention concerning work in the fishing sector was not adopted owing to lack of a quorum.<sup>12</sup> The proposed Recommendation concerning work in the fishing sector was adopted.<sup>13</sup> Following these votes, the Conference adopted a motion to request the Governing Body to place on the agenda of the 96th Session of the Conference in 2007 an item concerning work in the fishing sector based on the report of the Committee on the Fishing Sector at the 93rd Session. In response to a request for clarification, the Legal Adviser said that it would be necessary to review the Recommendation and probably adopt a new Recommendation to replace it.<sup>14</sup>

At its 294th Session (November 2005), the Governing Body decided to include on the agenda of the 96th Session (2007) of the International Labour Conference, with a view to the adoption of a Convention supplemented by a Recommendation, an item concerning work in the fishing sector. It also decided that the Conference should use as the basis for its discussion the report of the Committee on the Fishing Sector of the 93rd Session as well as the outcome of further tripartite consultations.<sup>15</sup>

At its 295th Session (March 2006), the Governing Body decided that the preparation of the discussion of the item concerning work in the fishing sector would be governed by a single-discussion procedure adapted to the special circumstances in which the discussion would take place. Accordingly, it approved a programme of reduced intervals for reports.<sup>16</sup>

In accordance with this programme of reduced intervals and after informal consultations held on 3 May 2006, the Office prepared and sent to governments a first report<sup>17</sup> along with a short questionnaire and a copy of the report of the Committee on the Fishing Sector of the 93rd Session.<sup>18</sup> This was done in fulfilment of the Office's mandate under the ILO Constitution and the Standing Orders of the Conference. Accordingly, and in keeping with article 38, paragraph 1, of the Standing Orders of the Conference, governments were asked to reply to the questionnaire and send any other views on the content of the proposed Convention and Recommendation on work in the fishing sector by 1 September 2006, after consulting the most representative organizations of employers and workers.

---

<sup>11</sup> ILO: *Provisional Record* No. 24, International Labour Conference, 93rd Session, Geneva, 2005, pp. 24/1–24/11.

<sup>12</sup> The result of the vote was as follows: 288 in favour, 8 against, with 139 abstentions. As the quorum was 297, and the required two-thirds majority was 290 (of 435 votes cast), the Convention was not adopted because the quorum (total votes for and against) was not reached.

<sup>13</sup> The result of the vote was as follows: 292 in favour, 8 against, with 135 abstentions. As the quorum (votes for and against) was 297, and the required two-thirds majority was 290 (of 435 votes cast), the Recommendation was adopted.

<sup>17</sup> ILO: *Work in the fishing sector*, Report IV(1), International Labour Conference, 96th Session, Geneva, 2007.

<sup>18</sup> ILO: Report of the Committee on the Fishing Sector, *Provisional Record* No. 19, International Labour Conference, 93rd Session, Geneva, 2005.

At the time of drawing up this report, the Office had received replies from the governments of the following 60 member States: Algeria, Argentina, Australia, Austria, Azerbaijan, Belgium, Benin, Brazil, Burkina Faso, Canada, China, Colombia, Costa Rica, Croatia, Cuba, Czech Republic, Denmark, Egypt, Finland, France, Germany, Ghana, Greece, Hungary, Iceland, Iraq, Italy, Japan, Republic of Korea, Latvia, Lebanon, Lithuania, Mauritius, Mexico, Netherlands, New Zealand, Norway, Panama, Papua New Guinea, Philippines, Poland, Portugal, Qatar, Romania, Saudi Arabia, Seychelles, Slovenia, South Africa, Spain, Sri Lanka, Suriname, Sweden, Switzerland, Syrian Arab Republic, Thailand, Trinidad and Tobago, Ukraine, United Kingdom, Uruguay and the Bolivarian Republic of Venezuela.

The governments of the following 31 member States indicated that their replies had been drawn up after consultation with employers' or workers' organizations or both, and some included in their replies the opinions expressed on certain points by these organizations: Argentina, Belgium, Brazil, Canada, Colombia, Costa Rica, Croatia, Cuba, Czech Republic, Denmark, Finland, Iceland, Italy, Japan, Republic of Korea, Mauritius, Mexico, Netherlands, New Zealand, Panama, Papua New Guinea, Poland, Romania, Seychelles, Spain, Sri Lanka, Sweden, Switzerland, Syrian Arab Republic, Thailand and the United Kingdom. Several other governments indicated that they had sent the questionnaire to the most representative organizations of employers and workers but had not, at the time of sending their replies to the questionnaire, received comments from those organizations.

The governments of some member States sent separately the replies received from employers', workers' or other organizations; in some cases, replies were received directly by the Office.

The Office notes that, in answering the questionnaire, several governments (for example, Czech Republic, Hungary and Switzerland) had no substantive comments.

In October 2006 the Officers of the Governing Body agreed to the convening of the Interregional Tripartite Round Table on Labour Standards for the Fishing Sector, with the purpose of pursuing consultations on the proposed Convention and Recommendation concerning work in the fishing sector in advance of the 96th Session (June 2007) of the Conference.<sup>19</sup> This Round Table, held in Geneva from 11 to 13 December 2006, was composed of the following members: eight representatives of governments of ILO member States (appointed on a regional basis after consultation with the ILO Government group regional coordinators), eight Employer representatives and eight Worker representatives (all appointed by their respective groups). Regional coordinators of the Government group, or their representatives, participated as observers with the right to take the floor on behalf of any country of their respective group. An observer from the Food and Agriculture Organization of the United Nations also participated. The Chairperson was not from among the eight Government representatives.

The Office provided participants at the Round Table with an advance version of the summary of replies received to the questionnaire contained in Report IV(1) of the 96th Session of the Conference. The report of the Round Table can be found in the appendix. It includes an appendix containing the substantive text of a presentation to the Round Table by the Employers and an appendix containing additional information from the Government of Japan regarding fishing vessel accommodation.

---

<sup>19</sup> GB.297/Inf.2.

## **Texts of the proposed Convention and Recommendation concerning work in the fishing sector**

In accordance with article 10, paragraph 2(a), of the Constitution of the International Labour Organisation and article 38, paragraph 2, of the Standing Orders of the International Labour Conference, the Office has responsibility for drawing up the final report, including the proposed instruments. In preparing the report, the Office has been bound by the following specifications:

- (a) pursuant to article 38, paragraph 2, of the Standing Orders, the report containing the proposed instruments must be drawn up “on the basis of the replies received [to the questionnaire]”; and
- (b) in accordance with the directions given by the Governing Body in this unique case, “the Conference should use as a basis for its discussion the report of the Committee on the Fishing Sector of the 93rd Session as well as the outcome of further tripartite consultations”.

Normally, the Office would, pursuant to article 38, paragraph 2, of the Standing Orders, make changes to the proposed instruments where suggested by a majority of replies received to the questionnaire. In light of the Governing Body’s instructions in this case, the Office has made no substantive changes to the instruments as they were appended to the report of the Committee on the Fishing Sector of the 93rd Session of the Conference. In order to benefit from the additional review of the texts carried out by the Conference Drafting Committee at the 93rd Session of the Conference, the texts of the proposed Convention and Recommendation are submitted in the form of the English and French versions of the instruments submitted for adoption to the 93rd Session of the Conference.

### **Contents of Report IV(2A)**

The present volume, Report IV(2A), therefore contains the following:

- a summary of the replies received by the Office to each of the five questions posed by the Office in Report IV(1), followed by: an overview of the replies; a brief account of the related discussion at the Interregional Tripartite Round Table on Labour Standards for the Fishing Sector; and the Office commentary based on the replies and the Round Table discussions (in the commentary relating to Question 1, the Office has also set out ideas for possible alternative text for certain provisions concerning the scope of application of the Convention);
- additional commentary by the Office with indicative proposals regarding instances in which the Committee or the Committee Drafting Committee may wish to address alignment of the English and French texts, or to correct any manifest errors or ambiguities that remain – functions that would normally have been carried out by the Office prior to the Conference;
- an appendix containing the report of the Round Table with appendices containing submissions to the Round Table by the Employers and the Government of Japan.

To ensure that the English and French texts of the proposed Convention and the proposed Recommendation concerning work in the fishing sector are in the hands of the governments within the time limit laid down in article 38, paragraph 2, of the Standing Orders of the Conference, these texts have been published in a separate volume, Report IV(2B).

## REPLIES RECEIVED

Several States provided general observations in addition to their replies to the five specific questions asked by the Office in Report IV(1). The Office further notes that many respondents included comments of a general nature in their replies to the specific questions, in particular to Question 5.

### General observations

#### *Replies*

*Australia.* ILO Conventions need to be widely ratified if they are to command respect from the global community and continue to meet the basic objectives of the ILO. Many Conventions are overly prescriptive or technical, inhibiting ratification by member States that may well comply with the goals of the Conventions. To remedy this, the Office should focus on more flexible and principles-based articles when drafting new instruments. The proposed new Convention on work in the fishing sector should specify broad principles, focused on appropriate goals and protections, and be flexible enough to accommodate different national circumstances and levels of social and economic development, as well as allowing scope for future development. The Convention as it stands is too prescriptive and sets a standard that is too high for many developing nations. As the objective of this Convention is to reach a greater proportion of the world's fishers, adjustments are necessary in order to promote more widespread ratification. Drafting of new instruments should focus on setting appropriate minimum standards, and not be overly inspirational or set standards that are clearly much greater than those required to ensure the basic safety and well-being of fishers. The Office, when preparing draft text, should minimize the level of detail. If more clarity or detail is considered necessary, delegates should be left to develop the necessary language and, where appropriate, this detail should be incorporated into a Recommendation or guidelines. Adopting this approach would make the rejection of proposed new instruments less likely in the future.

*Belgium.* The proposed Convention concerning work in the fishing sector, presented by the Committee on the Fishing Sector to the International Labour Conference during the course of its 93rd Session (2005), received the unanimous support of the Belgian delegation present at the time. The Belgian delegation felt that this proposed text was a balanced instrument, which provided an acceptable level of protection, while taking into account certain aspirations harboured by countries that had difficulty in applying certain standards.

*Canada.* It is important not to lose sight of the objective noted in the preamble to the proposed Convention: to ensure that fishers have decent conditions of work on board fishing vessels with regard to minimum requirements for work on board, conditions of service, accommodation and food, occupational safety and health protection, medical care and social security. The aim has been to adopt a credible standard that provides

appropriate protection for fishers. The Convention and Recommendation need to be meaningful and practicable to accommodate a diverse industry and should avoid prescriptive provisions that will impede widespread ratification and implementation. While acknowledging the work undertaken by the Committee during two experts' meetings and two discussions at the International Labour Conference, tinkering with the wording of the proposed instruments will not address Canada's concerns that the Convention is too prescriptive as presently drafted. The explanatory note to the Regulations and Code of the recently adopted Maritime Labour Convention provides useful guidance for developing a new instrument based on previously adopted standards. A firm set of rights and principles is stated, Members have a considerable degree of flexibility in the implementation of those rights and principles, and rights and principles are to be complied with and enforced. Members can give effect to the detailed requirements of Part A of the Code through substantial equivalence, a principle that was used to good effect in the 2005 discussions of the proposed fishing instrument. In the drafting of the new Convention concerning work in the fishing sector, consideration should also be given to using the other area of flexibility used in the Maritime Labour Convention whereby the mandatory requirements of many provisions in Part A of the Code are formulated in a more general way, leaving wider scope for discretion as to the precise action to be provided for at the national level.

*Greece.* Every possible effort must be made so that a new proposed Convention can be prepared that would constitute an acceptable working text for the negotiations on this issue during the 96th Session of the Conference and which will lead to the final adoption of the Convention.

*Lebanon.* The proposed Convention relates to fishing operations involving large fishing vessels or a large number of fishers. In Lebanon, however, the fishing sector currently consists of small fishing boats owned by fishers themselves. These boats cannot meet the proposed Convention's requirements and obligations. Consequently, there is no possibility for the time being of implementing the Convention's provisions in Lebanon. The provisions of the proposed Convention, even though they seem to be flexible in some aspects, cannot be implemented on small vessels of less than 13 metres in length. Fishers in Lebanon are not subject to the provisions of the National Social Security Fund.

*Netherlands.* The failure during the 93rd Session of the International Labour Conference to adopt a Convention concerning work in the fishing sector is more than just an "accident at work". None of the Asian governments (which represent about 80 per cent of the fishers) voted in favour of the Convention. Without the support of these countries (and the other countries which did not give their support to the Convention) the goal to adopt an instrument that universally covers fishers will not be achieved. Thus, most fishers will not get a sufficient level of protection. Moreover, a low level of ratification in terms of gross tonnage would not contribute to a level playing field in the fishing sector. From this point of view, the rejection of the Convention [in 2005] can be considered a "blessing in disguise": it creates a new chance to acquire broad support from the world's fishing community. In this respect, the Government of the Netherlands wholeheartedly welcomes the consultation currently undertaken by the Office through the questionnaire as drafted. The current draft text of the Convention could be characterized as overly prescriptive and lacking flexibility. On the one hand, it formulates standards that might be too high for the developing countries. On the other hand, it constitutes a barrier for those countries that use different standards for measurement and weight.

*New Zealand.* Business New Zealand: The inability to agree on a Convention covering work in the fishing sector in 2005 was due in no small measure to uncertainty as to the outcome of the then forthcoming discussions on the Maritime Labour Convention, which covers the parallel issues for seafarers. The Maritime Labour Convention was overwhelmingly endorsed by all present in 2006. Business New Zealand believes that account should therefore be taken of the content and structure of that Convention in formulating the documents for discussion in 2007. There are obvious synergies between the two, and it makes no sense to conduct the discussion independently now that a viable model exists.

*Norway.* No amendments are proposed at this time. The text of the Convention already contains much flexibility. Norway reserves its position until the Conference.

### *Commentary*

The Office notes that several of the replies to this and subsequent questions refer to the Maritime Labour Convention, 2006 (MLC), which was adopted at the 94th (Maritime) Session of the International Labour Conference in 2006. The Office, while recognizing the considerable differences between the shipping and fishing sectors, has also occasionally referred to certain provisions of the MLC in its own commentary. Those interested in consulting the text of this instrument can consult the full text, as well as other information, in Arabic, Chinese, English, French, German, Russian and Spanish on the ILO's web site.<sup>1</sup>

However, in the absence of a majority of replies calling for a new approach inspired by the Maritime Labour Convention, the Office has not put forward a comprehensive alternative text.

## **Question 1**

**Qu. 1** *The proposed Convention concerning work in the fishing sector<sup>2</sup> provides, in Part I (Definitions and scope), the possibility for the competent authority, under certain conditions, to exempt certain fishing vessels or fishers from some or all of the provisions of the Convention. Should any additional flexibility be introduced as regards scope?<sup>3</sup> If so, please indicate in respect of which provisions and under which conditions.*

### *Replies*

*Algeria.* It would not be helpful to exclude certain fishing vessels or fishers from the scope of the Convention. Algerian law and regulations cover all the categories of fishing vessel and fisher covered by the proposed Convention.

*Argentina.* Members should not be given discretion to grant exemptions. Introducing such a clause would effectively allow individual member States to determine the scope of the Convention. This could lead to a wide variety of diverse forms of protection, thus generating inequalities and discrimination in terms of employment access that would favour some groups of workers, while penalizing others. With regard

<sup>1</sup> <http://www.ilo.org/public/english/standards/norm/mlc2006/index.htm>.

<sup>2</sup> This text is contained in ILO: *Provisional Record* No. 19, International Labour Conference, 93rd Session, Geneva, 2005.

<sup>3</sup> It has been suggested that the proposed Convention should contain additional flexibility for developing countries.

to the possibility of exempting certain fishing vessels – for example, by vessel size – technically speaking, it would not be appropriate to include such exemptions in the general definitions. On the contrary, these should be included in the Parts or provisions. However, such exemptions must not affect the fundamental rights of the workers in question. The occupational hazard supervisory authority indicates that the exemption would cover only subsistence and recreational fishing; all commercial fishing activities would still be included.

*CATT:* There is no need to establish additional general exemptions. If it is decided that additional flexibility is required, this should be addressed in the specific Part or Article concerned.

*CAPeCA/CALaPA/CAPA:* The competent authority of each member State should exempt certain vessels or fishers from some of the Convention's provisions, particularly artisanal fishers and vessels of less than 12 metres in length. This stance is in keeping with the views expressed by the Employers' group at the 92nd and 93rd Sessions of the Conference, when it stressed the need to establish an inclusive Convention which strikes a balance between developed States which have regulations and developing countries which lack regulations in this area. The group had also stated that the Convention should seek to establish minimum standards, not maximum standards, since individual member States could always increase protection if practicable in their national contexts. Unfortunately, the work of the Committee on the Fishing Sector did not move in that direction. For this reason, there is now a question as to whether exceptions should be granted, whereas it would have been more appropriate to ask if the protection established as a minimum should be increased for certain activities or vessels. Fishing is the same in all fishing areas or zones. Exemptions might be established only for artisanal or subsistence fishing, for example, in respect of the minimum age, medical examination, recruitment and accommodation.

*Australia.* Does not oppose the text relating to the scope of the Convention as set out in Article 2. There is no need to establish additional general exemptions. If it is decided that additional flexibility is required, this should be addressed in the specific Article or Articles concerned.

*Austria.* In Austria, there is commercial fishing on inland waters on boats of less than 10 metres in length and without living quarters (barges). At most, these boats might have covered wheelhouses, but no cabins, etc. About 150 people are involved in fishing on inland waters, generally as a secondary occupation. In only a few cases (such as federal foresters) are these people employed; most carry on this occupation under the terms of their own fishing rights or leases. The possibility of exempting fishing on rivers and inland waters under the terms of Article 3(1)(a) should be retained.

*Azerbaijan.* Yes. The Convention must be flexible with regard to certain particular categories of fishing vessel, taking into account the length of the vessel, displacement, time spent at sea and gross tonnage.

*Belgium.* It is difficult to see how the Convention could be any more flexible, given that the various provisions already allow for a significant level of exclusion and adaptation: Article 1(c) already refers to the various possibilities for flexibility contained in the proposed Convention: "... any derogation, exemption or other flexible application ..."; Article 2 envisages a system of extensions for vessels of less than 24 metres (corresponding to a threshold requested by certain countries); Article 3 envisages the possibility of exclusion; Article 4 goes a long way towards illustrating the progressive (or promotional) aspect of this instrument. Annex III provides a certain amount of freedom with regard to the application of the provisions, in the form of

general provisions set out in extremely broad terms: “The competent authority may, after consultation, also apply the requirements of this Annex to existing vessels, when and in so far as it determines that this is reasonable and practicable.” These examples demonstrate that all specific situations, particular concerns and fears have, to a large extent, been taken into account. Moreover, it is a long-standing practice for international labour standards to be drafted in such a way as to allow for universal application, without granting specific regimes to specifically mentioned countries or categories of country. Furthermore, it is impossible to objectively define “developing countries” without intrinsically denying the very notion of development. Underdevelopment cannot be used to justify the exaction of a high human cost from this sector when it is precisely the developing countries that are supposedly unable to compensate for these dramatic circumstances. It would also be unfair on countries that are making considerable efforts to protect their fishers. Finally, it has been established that lesser guarantees regarding the protection of workers do not in any way contribute to the development of countries or societies. Our reply is therefore a categorical “no”. The internal flexibility set out here in such a skilful and balanced manner remains the only solution.

*Benin.* There is already sufficient flexibility in the text concerning the scope, and more flexibility is not required.

*Brazil.* It is important to achieve a balance between the existing standards and possible improvements to these standards, on the one hand, and, on the other hand, the flexibility required for widespread ratification, especially in developing countries, where the fishing industry is least regulated. In order to increase the number of ratifications, given the varying traditions regarding fishing in different countries, as well as differences relating to coastlines and maritime currents, there is a need to support the possibility envisaged under Article 3 of allowing the competent authority to exclude certain fishing vessels or fishers from some or all of the provisions of the Convention. Although all of the provisions are important in improving living and working conditions on board fishing vessels, the Convention must put forward minimum standards, in order to allow those countries which have not ratified the existing Conventions to make progress regarding the protection of fishers, ratifying the new Convention in the knowledge that, fortunately, many other countries have already attained levels far beyond these provisions and that they will continue to improve conditions. It is understood that the competent authority, after consultation, may exclude – in particular from provisions relating to accommodation contained in Annex III and provisions in subparagraphs (b) and (d) of Article 29 concerning medical care – fishing vessels engaged in fishing operations in rivers, lakes and canals and in the contiguous zone in archipelagic waters. It is therefore proposed that paragraph 1(a) of Article 3 be amended to read: “fishing vessels engaged in fishing operations in rivers, lakes and canals and in the contiguous zone in archipelagic waters, and”. The aim is to facilitate ratification by countries made up of archipelagos. Exclusion is justified by the fact that, in the case of such countries, fishing vessels can more easily reach the coast if there is a problem.

*CNC and CNT:* Fishing vessels operating on rivers, lakes and canals. Reasoning: The various conditions covering ocean-going fishing vessels should be sufficiently flexible to be able to take into account the differing situations existing in the fishing sector.

*Burkina Faso.* A degree of flexibility is desirable for certain vessels and fishers.

*Canada.* A provision in the Convention providing for the possibility of the competent authority to exempt certain fishing vessels or fishers from some or all of the provisions of the Convention is necessary due to the considerable differences between

different types of fisheries and related economic viability. Additional flexibility could be introduced to this clause by deleting the words “special or substantial” in Article 3(1). There also needs to be flexibility in the specific provisions of the Convention to distinguish between safety, health and comfort factors, as well as consideration of time at sea and benefits relative to costs when setting standards. In Article 3(1)(b) delete the word “limited” and replace it with the word “certain”. A lack of flexibility in the wording in this provision would create a barrier to ratification.

*CLC*: There is no need for any additional flexibility to be provided for the entire Convention and any additional flexibility should be provided for under the specific sections.

*China*. No need for additional flexibility to be introduced. Reasoning: The scope as defined by the proposed Convention can basically be used for operationalization.

*Colombia*. *ANDI*: Member States should be enabled, through their national legislation and regulations, to exempt from the Convention or specific provisions thereof vessels of less than 24 metres in length or 175 gt, in the light of the specific conditions of service of fishers or of fishing vessel operations, and depending on the duration of the voyage and the particular fishing zone concerned.

*Costa Rica*. Ninety-nine per cent of fishing vessels in Costa Rica are under 24 metres in length. For developing countries such as Costa Rica, certain provisions, such as those contained in Part IV and those on exemptions and/or requirements for “vessels” contained in this proposed Convention should be reconsidered.

*Croatia*. The proposed flexibility seems adequate.

*Cuba*. As regards scope, it must be left to the competent authority to decide whether or not to exempt vessels of less than 24 metres in length operating in inland or coastal waters.

*Denmark*. There is no need for further flexibility in “the scope”.

3F: Agrees.

*Egypt*. Tonnage should be used as a basis to determine the scope of application of the Convention, so as to exclude fishing vessels whose tonnage is less than 20 tons from the scope of application. The provisions of the Convention should not apply to existing fishing vessels but should apply to vessels for which the building authorization would be obtained within at least three years from the date of entry into force in order to enable fishing vessel owners to comply.

*GTUWA*: Fishing vessels working in inland waters, such as rivers and lakes, not exceeding 100 metres in length and 2 metres deep, should be exempted. These vessels and fishermen should also be exempted in terms of fishermen’s age, so as to exclude subsistence fishing (family fishing).

*Finland*. Accepts that the present exemption will do. Additional flexibility is not necessary, as Article 3 of the proposed Convention provides that certain fishing vessels can be excluded from its scope.

*SAK*: Agrees, pointing out that additional flexibility should be provided for under specific sections.

*SAKL*: Vessels less than 12 metres in length and entrepreneurs should be entirely excluded from the scope.

*France.* Article 3 of the proposed Convention permits the exclusion from all or some of the provisions of the Convention of “fishing vessels engaged in fishing operations in rivers, lakes and canals”, as well as “limited categories of fishers or fishing vessels”. Exclusion is dependent on the existence of “special and substantial problems” regarding application “in the light of the particular conditions of service of the fishers or the fishing vessels’ operations”. This Article may be interpreted both in a wide and a restrictive manner. For example, estuary fishing activities could be classified, according to the defining criteria in the proposed Convention, as either freshwater or maritime fishing. The conditions governing exclusion contained in Article 3 could of course be set out in a detailed fashion. However, this is not necessary, as the current text contributes to making the Convention ratifiable on a wide scale. Other provisions that render the text flexible allow the diverse range of national situations to be taken into account. This is the case in particular with regard to the adaptability of the scope of Annex III, which ensues from the introduction of the principle of equivalence during the 93rd Session of the International Labour Conference. The provisions of the proposed Convention are, however, intended to be applied to all fishers and fishing vessels engaged in commercial fishing operations. These choices are appropriate because, although the Convention can prescribe only minimum standards in order to ensure ratification by States where fishing is mainly artisanal or carried out by families, it must provide for additional specific standards for larger vessels. In general, the proposed text seems to be balanced and sufficiently flexible to constitute a reference, in terms of a global standard covering all the working and employment conditions of fishers, for a sector characterized by extremely hard working conditions and often precarious employment. For these reasons, there is no need to introduce any additional flexibility with regard to Article 3 of the proposed Convention.

*Germany.* The flexibility of the wording of the scope of application in Article 3 is sufficient. Self-employed individuals on board fishing vessels should not be included.

*Ghana.* The Convention should provide strong protection for fishers and yet be flexible enough to accommodate diverse operations, conditions and employment relationships prevailing in the industry. It should provide for the needs of artisanal fishing, aquaculture and recreational fishing.

*Greece.* The existing proposed Convention, in particular in Article 2(3) and Article 3(1), provides that the competent authority has the ability to exclude some fishing vessels from the scope of application of all or of certain provisions of the Convention. Considering that the Convention aims, inter alia, to formulate the basic principle relating to the safeguarding of competitiveness (level playing field), it would be likely to achieve the wider possible acceptance if the full implementation of its provisions concerned fishing vessels of 24 metres length or more that sail in international waters.

*Honduras.* COHEP: The text appears very restrictive for a country like Honduras in the current conditions of globalization, and especially for smaller economies like those of Central America, of which Honduras is typical. In Honduras, small-scale fishers number around 25,000 and, while they may be classified as small-scale fishers, the catches allowed are so limited that it would be more appropriate to refer to them as subsistence fishers. Most fishing boats are less than 25 metres in length and are limited in terms of space, and for this reason normally remain within the coastal exclusion area when at sea.

*Iceland.* The Convention should be broad, with general provisions, to enable the majority of countries to ratify it. The goal should be to achieve widespread ratification in

order that the provisions of the Convention apply to the largest possible proportion of the world's fishers, particularly those on smaller vessels. Some nations have, according to national law and practice, set higher standards for their fishing fleets than those put forward in the proposed Convention but that does not affect the need to set minimum standards that could cover all fishers, even those on the smallest fishing boats.

*India.* HMS: No additional flexibility is needed, as the matter was thoroughly discussed in 2004 and 2005. Sufficient safeguards have been provided through the flexibility provided in the provisions concerning definitions and scope.

*Iraq.* Supports the possibility for the competent authority to exempt certain fishing vessels and fishers from some provisions of the Convention, in particular for developing countries.

*Italy.* No.

FEDERPESCA and FAI-CISL: There is no need for further flexibility with respect to the provisions of Part I (Definitions and scope).

*Latvia.* No additional flexibility is necessary.

*Lebanon.* No observations.

*Lithuania.* No additional flexibility should be introduced.

*Mauritius.* No additional flexibility is proposed as regards the scope (Article 2). However, the definition of skipper in Article 1(n) should be amended as follows: "skipper" means an appropriately qualified person having command of a fishing vessel".

*Mexico.* In Article 1, in the second line of (a) concerning the definition of "commercial fishing", activities involved in developmental/conservation fishing (*pesca de fomento*) and in fishing for training purposes, as well as vessels used for this purpose, should be excluded from the scope of application. The term "developmental/conservation fishing" means fishing with the purpose of study, scientific research, experimentation, exploration, prospecting, development, repopulation or conservation of aquatic flora and fauna resources and their habitat, and for testing equipment and procedures needed for that activity; collection of live specimens in federal waters for the purpose of maintaining and replacing scientific and cultural collections; and collection undertaken for the purpose of decoration or display in public entertainments, aquaria and zoos.

*Netherlands.* Supports the extension of the scope of Article 3 in the sense that it gives developing countries the opportunity to "grow" into the obligations of the Convention. Proposes new text that allows countries whose economies and institutions are not yet sufficiently developed to make temporary exceptions of specified provisions of the Convention. The following matters might be considered for such a temporary exception: medical examination; manning and hours of rest; work agreement, in particular Annex II; and medical care.

DFPB: Certain provisions regarding accommodation should at least be part of the development approach as well, although the Netherlands social partners prefer the solution proposed by the Government under Question 4.

*New Zealand.* New Zealand does not believe that any additional flexibility to exempt certain fishing vessels or fishers from the provisions of the proposed Convention is needed.

NZCTU: Agrees.

*Panama.* Include exceptions for sport and/or recreational fishing and small-scale fishing, with a subsequent requirement for the necessary standards regulating both these activities to be established under national legislation, on the basis of habits and customs.

*CMP:* Whenever a vessel, even one of less than 24 metres in length, is operating in open waters, the fishers on board must be borne in mind by the authorities under this type of Convention.

*Papua New Guinea.* Agrees with the current proposed provisions of the Convention on the condition that any exemption is universally accepted by member countries.

*Philippines.* The definition of “fishers” should be broadened to include fishers not necessarily on board vessels. The health-care provisions as well as the social security coverage could be expanded.

*Poland.* No need to introduce any additional flexibility. Notes that the definition of a fishing vessel for the purpose of the Convention differs from the definition contained in Council Directive 93/103/EC of 23 November 1993 concerning the minimum safety and health requirements for work on board fishing vessels, as well as in the Medical Examination (Fishermen) Convention, 1959 (No. 113) (which only applies to maritime fishing).

*Portugal.* No. Article 3 and Article 2(3) of the proposed Convention already provide the necessary flexibility.

*Qatar.* Yes. Additional flexibility should be introduced as regards scope of application, since requirements concerning accommodation and food cannot be met by some developing States suffering from lack of necessary fishing and maritime navigation equipment. Furthermore, these requirements (e.g. to adapt sleeping accommodation) would increase the production costs for fishermen, who already suffer from reduced economic return of fishing vessels due to reduced productivity in the most important fisheries.

*Romania.* The flexibility allowed by Articles 3 and 4 of the Convention is sufficient. It allows exceptions to the provisions of the Convention for a limited period without imposing a limit. It is beneficial not to apply the provisions of the Convention to subsistence or recreational fishing, and to ensure that the instrument has flexibility for dealing with vessels and fishers on inland rivers, lakes and canals. Developing countries need to understand an elementary fact: in order not to be stifled by the big players in the market, they must adopt sound practices. Poverty is not an argument for exposing fishers to serious hazards or allowing precarious employment arrangements. Local or regional forms of association can offer ways of allowing adoption of ILO standards.

*Saudi Arabia.* No need to add additional flexibility to the provisions relating to scope.

*Seychelles.* Agrees with Article 2(3) because it feels that the protection provided by the Convention should definitely apply to all fishers working on fishing vessels above 24 metres in length. If a State is able to extend this protection to fishers working on smaller vessels, it should definitely do so.

*Slovenia.* No need to exempt certain fishing vessels or fishers from some or all provisions of the Convention.

*South Africa.* No. There is sufficient scope for the competent authority to apply its mind and issue an exemption under the terms of Article 3(1)(b).

*Spain.* The scope should be as broad as possible. However, in order to obtain a Convention that can be ratified by the greatest number of member States possible, the competent authority could be allowed to exclude certain groups of vessels or fishers from some of the provisions. The criteria for setting certain exemptions should consist of the size of the vessel and the length of time spent at sea. In the case of small fishing boats, quite often the vessel is owned by a family. In some countries the entire crew of one boat may be self-employed. In such cases, it would be difficult to ensure compliance with the contents of Articles 16–20 concerning fishers’ work agreements. In no case should authorization be granted for the exclusion from the measures adopted concerning safety, health and accident prevention of any group of fishers based on the size of the vessel or the type of navigation. Shore-based persons carrying out work on board, and other persons not covered by the definition of “fisher” contained in the Convention should also be covered by the measures concerning safety, health and accident prevention. They could, however, be excluded from other provisions, such as those referring to accommodation, food or repatriation.

*FEOPE:* Not in favour of any kind of exemption. Both the Convention and the Recommendation are basic in nature and far behind the legislation of most of the member States. These exemptions would therefore only serve to worsen competitive conditions for the fishing sector in those States with more advanced social legislation, such as Spain.

*Sri Lanka.* No.

*UFL and NFSM:* There are millions of fishers – more than 50,000 fishers in Sri Lanka alone – working on board vessels below 24 metres in length for more than three days at a time. There should be a provision to cover all these fishers.

*CWC:* No need for any additional flexibility to be provided for the entire Convention and any additional flexibility should be provided for under the specific sections.

*Suriname.* Some flexibility should be introduced in respect of the provisions regarding one-man businesses and newly built vessels (built by the owner).

*Sweden.* Swedish fishing is mainly run as “share fishing”, whereby one or two families or family members jointly own or man a vessel and the crew on board is remunerated in relation to the proceeds of the catch. Each member of the crew, regardless of whether they are partners in the fishing vessel or not, can primarily be characterized as self-employed. As a rule, the fishers participate in most on-board tasks, including watches on the bridges. The Swedish fishing sector consists mainly of small units that work in day or week tours with small crews. There are no fishing vessels with on-board fish processing. True employment relationships are more or less non-existent within the Swedish fishing sector. As a consequence, the requirements stipulated in Part IV of the proposed Convention – regarding monthly or regular payment, working hours, contracts of service, etc. – can hardly be applied fully. Some of the other proposed rules, for example, the requirement for a public employment service for fishers, transmission of payments to the fishers’ families, etc., seem to be more directed towards and relevant to working conditions in a large-scale fishing sector, with factory trawlers that fish for long periods and process the catch on board. The same goes for the detailed regulation on accommodation on board fishing vessels as proposed in Part V of the proposed Convention. One possible alternative might be to give a clearer definition of the types of fishing and the fishing vessels to which the regulations are to apply in order for them to be relevant and have practical significance. The size of crew and length of

fishing tour are parameters that could be used as definitions. Another alternative would be to exclude self-employed fishers from the scope of the Convention.

*MMOA:* Flexibility regarding the scope drains the whole purpose of the Convention and sends out the wrong signals, both with regard to the Convention itself and also in general when a member State may ratify a Convention with little or no content. The scope should be as wide as possible in order to protect as many fishers as possible.

*SFR:* Practical professional fishing is a special business activity and not comparable to any other. This is even more true in view of the extremely diverging special circumstances prevailing in the various types of fishing that take place (everything from small-scale lake fishing to large-scale sea-based fishing) and, this being so, to try to regulate working conditions in the fishing sector through an international Convention is not a suitable approach. The special circumstances that apply to each individual type of fishing must be specially studied and thereafter separately regulated if this is deemed necessary. Regarding what has been said from an international perspective, it seems that the approach chosen by the ILO has not been well thought through. The purpose which the proposed Convention should probably try to achieve, as far as can be understood, refers to employees on board fishing vessels. In view of what has been said and in view of other circumstances as well, there is reason to exclude self-employed fishers fully from the scope of the Convention, which should thus only cover employees.

*Syrian Arab Republic.* More flexibility should be introduced as regards developing countries, especially for small vessels (less than 16 metres) engaged in limited areas of operation.

*Thailand.* There is no objection to the provision concerning definitions and scope.

*Trinidad and Tobago.* Fisheries observers should be included in Article 1(e) concerning the definition of “fishers”. Notwithstanding that observers may be employed under a different arrangement (including a different insurance scheme), they are under the supervision of the skipper. In that regard, certain provisions in the Convention are very much applicable, such as: Minimum age (Article 9, paragraphs 3–5); Medical examination (Article 10(1) and (3) and Article 12); Manning and hours of rest (Articles 13(b) and 14(1)(b)); Accommodation and food (Article 27(c)); and Medical care (Article 29(e)). With regard to Article 1(e) concerning the definition of “fishers”, it was pointed out by the ECA that the words “in any capacity” in “every person employed or engaged in any capacity or carrying out” make the definition of fishers too broad and that its scope needs to be narrowed. It was recommended that the definition be rephrased to read “every person employed or engaged in such capacity or carrying out an occupation on board any fishing vessel”. In Article 3, it is recommended that another category, “fisheries observers”, be included.

*Ukraine.* Since almost 50 per cent of the 27 million people working in the fishing sector today are engaged in small-scale or collective fishing and working conditions, medical provision and living conditions differ greatly from those in the heavy fishing sector, it is necessary to provide a separate set of regulations in the Convention. With every new generation of fishing vessels, more efficient vessels appear which are designed to operate safely with smaller crews and a smaller number of people earning a living on board. It should also be borne in mind that differing vessel-construction techniques influence the living conditions of fishers and their working conditions on board. Technological innovations in modern conditions are becoming ever more widespread and this has an immediate effect on the safety and efficiency with which fish

can be caught, which are constantly increasing. Since fishers spend long periods of time on the open sea (not just days, but several months on end), particularly on vessels in ocean-going fishing flotillas, such vessels serve not only as their workplace but also as their home for quite significant periods of time. Naturally, the living conditions of fishers working on very primitive vessels (small scale) are very different from those experienced on large fishing vessels, or even from the conditions for fishers working in small fishing enterprises using cargo vessels. Though legislation exists in most countries of the world to regulate the construction of vessels and crew quarters for more or less large vessels, there is in practice no comparable legislative base for smaller craft, which creates certain difficulties in ensuring reliable health, hygiene and living conditions on a permanent basis in crews' living environment. From this, it can be seen that each fishing sector has its own characteristics and problems, and the living conditions of fishers carrying out small-scale and cooperative fishing are significantly different from the living conditions of fishers on large, industrial vessels. In addition, the various provisions of the Convention must be taken into account when vessels are registered, since the flag State might exclude vessels from its register on the grounds of their small size, and thus an unregistered vessel might not come under the protection of the proposed Convention. The provisions concerning the scope of the Convention are sufficiently flexible, since they provide the possibility for the competent authority (Article 3) to exclude certain categories of fishers or fishing vessels from the provisions of the Convention, after consultation.

*United Kingdom.* The text of Article 3 as drafted is acceptable and provides a reasonable degree of flexibility. But in view of difficulties for some ILO Members, it may be appropriate to widen the wording of Article 3(1)(b) to refer to the possibility of excluding "specified" rather than "limited" categories of fishers, i.e. it is suggested to amend Article 3(1)(b) to read "specified categories of fishers or fishing vessels". This approach would also provide flexibility for developing countries.

*Uruguay.* No exceptions.

*Venezuela, Bolivarian Republic of.* Recalling the 93rd Session of the International Labour Conference, the Employer Vice-Chairperson requested the Office to provide an interpretation of the above paragraph. The representative of the Secretary-General stated in this regard that the purpose of this paragraph was to cover such cases as those of "persons" referred to in Article 11(e), who, for example, had applied for and been refused fishing licences or had failed to obtain medical certificates and thus were not, and perhaps would never become, fishers. If a fisher admitted to employment on a vessel was unaware of the applicable standard, would the failure of a captain or master to ensure that crew had valid medical certificates mean that the crew was not covered by the Convention? Replace Article 3 with: "The competent authority, after consultation, may exclude from the requirements of this Convention, or of the provisions thereof, where their application raises special and substantial problems in the light of the particular conditions of service of the fishers or the fishing vessels' operations: ..."

#### *Overview of the replies to Question 1*

The governments that replied indicated by a ratio of approximately two to one that additional flexibility was not necessary. There were, however, several replies that were not categorical as to whether or not more flexibility was desired. One government indicated that no change was needed but, in its reply to a subsequent question, stated that the Convention should take the form of a non-binding code.

Many governments indicated why they did not want changes to the existing text. It was noted that too much flexibility would lead to diverse forms and varying levels of

protection. The importance of improving protection for fishers on small vessels and in developing countries was stressed. Several governments replied that there was sufficient flexibility in the provisions on scope and definitions and that specific problems could be dealt with in the specific Parts or Articles concerned. A few indicated that the Convention should be less flexible as regards scope, or that certain persons who were not covered, for example shore workers or fisheries observers, should be included, at least as regards certain provisions.

Some governments pointed out that sufficient flexibility was important but did not comment further. In a few cases, they indicated that there was sufficient flexibility for their own fishers and fishing vessels, but that they were open to increasing flexibility if it would lead to wider ratification.

Several governments that sought additional flexibility provided suggestions on how to achieve this, but there was no overwhelming support for any specific approach. Some indicated that the Convention should be flexible with regard to certain categories of fishing vessel, taking into account such issues as vessel length or displacement, time at sea, and tonnage, but were not more specific. Others made specific suggestions, such as excluding, either from the terms of the Convention or from specific provisions, “self-employed” fishers, those on vessels where the crew were family members, those on vessels fishing in archipelagic waters, those on vessels below a certain specified size, or those in developing countries. There were also suggestions related to the status of Annex III (see replies to Question 4).

A few governments indicated that, while flexibility might be called for in relation to some vessels, there should be full implementation for others, such as vessels of 24 metres or more in length that sail in international waters or remain at sea for more than a few days.

The workers’ organizations generally replied that additional flexibility was not necessary, as Article 3 of the proposed Convention provided that certain fishing vessels could be excluded from the scope of the instrument, and indicated that any additional flexibility that was needed should be provided under the specific sections of the Convention.

The employers’ organizations generally wanted the Convention to be more flexible and less prescriptive. Several indicated that they wanted vessels of a certain size to be excluded, or for the competent authority to be enabled to exempt such vessels, from national legislation or regulations. Specific suggestions were provided. Some wanted specific categories of fishers to be excluded, such as “self-employed” fishers. Some expressed support for the possibility of exclusions, perhaps on a temporary basis, for developing countries as concerns certain provisions (for example, the provisions concerning medical examinations, manning and hours of rest, work agreements, medical care and accommodation).

#### *Discussion at the Tripartite Round Table*

When the Interregional Tripartite Round Table on Labour Standards for the Fishing Sector considered this question, it discussed the possibility of incorporating into the proposed Convention a “progressive implementation approach”. This approach, which had been suggested by the Employers, would allow States, under specified conditions, to implement progressively certain provisions of the Convention over a fixed period of time. It was suggested that this would encourage early and widespread ratification while allowing Members the time needed to put in place or improve necessary infrastructure. The participants sought clarification on various aspects of the proposal, in particular with

regard to the basic level of protection provided to fishers and the possible impact on the exercise of port State control. There was a general willingness to examine further the “progressive implementation approach” and to explore the possibility of incorporating this approach in the Convention. Towards the end of the Round Table, the social partners had found common ground on certain elements of a possible progressive implementation clause:

- such a provision should not have repercussions on member States’ obligations resulting from ratifications of other Conventions: any effects should be clearly limited to the Convention itself;
- all provisions of the Convention subject to progressive implementation would remain mandatory; the only question was the time allowed to achieve full implementation;
- member States should only invoke the progressive implementation clause if a clear and objective justification, linked principally to infrastructural shortcomings, existed;
- this clause should not be applicable to all vessels; it was not, however, possible to find common ground on the vessels to which it could not be applied, although consideration was being given to, for example, vessels subject to port State control, those engaged in high-sea fisheries or those of a certain size.

It was agreed that further consultations were needed in relation, inter alia, to limits on how much time could be allowed for progressive implementation, and most importantly the Articles to which such a provision could be applied. As examples of how this approach would and would not be used, the Employers and Workers had identified Article 23 as a provision that should not be subject to the clause, and Article 10, paragraph 1, as a provision that could be subject to progressive implementation.

Although open to consideration of the progressive implementation approach, governments had a number of concerns. These included the need for the Convention to contain a clear set of non-alienable standards applicable to all fishers, and the need to bear in mind the potential impact on port State control and the concept of “no more favourable treatment”. They indicated that these concerns should be taken into account during any informal consultations leading up to the Conference or during the Conference itself.

#### *Office commentary*

The Office notes that the idea of “progressive implementation” is not new to ILO instruments. In fact, it appears in several recently adopted ILO Conventions. The Night Work Convention, 1990 (No. 171), provides, in Article 3, that:

1. Specific measures required by the nature of night work, which shall include, as a minimum, those referred to in Articles 4 to 10, shall be taken for night workers in order to protect their health, assist them to meet their family and social responsibilities, provide opportunities for occupational advancement, and compensate them appropriately. Such measures shall also be taken in the fields of safety and maternity protection for all workers performing night work.

2. The measures referred to in paragraph 1 above **may be applied progressively**. [emphasis added]

The Maternity Protection Convention, 2000 (No. 183), provides, in Article 7, that:

1. A Member whose economy and social security system are insufficiently developed shall be deemed to be in compliance with Article 6, paragraphs 3 and 4, if cash benefits are

provided at a rate no lower than a rate payable for sickness or temporary disability in accordance with national laws and regulations.

2. A Member which avails itself of the possibility afforded in the preceding paragraph shall, in its first report on the application of this Convention under article 22 of the Constitution of the International Labour Organization, explain the reasons therefor and indicate the rate at which cash benefits are provided. In its subsequent reports, the Member shall describe the measures taken **with a view to progressively raising the rate of benefits**. [emphasis added]

The Prevention of Major Industrial Accidents Convention, 1993 (No. 174), provides, in Article 2, that:

Where special problems of a substantial nature arise so that it is not immediately possible to implement all the preventive and protective measures provided for in this Convention, a Member shall draw up plans, in consultation with the most representative organizations of employers and workers and with other interested parties who may be affected, for the **progressive implementation** of the said measures within a fixed time-frame. [emphasis added]

The latter, with its reference to measures “within a fixed time-frame” is perhaps closest to the proposals discussed at the Tripartite Round Table.

The Office wishes to draw attention to certain matters that should be taken into account should such a progressive implementation approach be considered at the Conference.

First, it is noted that Article 3 of the proposed Convention already offers considerable flexibility as regards the definition of the scope of the Convention, whilst making it an obligation to take measures, as appropriate, to progressively extend that scope. It would need to be clarified whether and, if so, how this Article would be affected by the suggested approach.

Further, the relationship between this approach and the flexible provisions already included under the specific headings in the proposed Convention (e.g. Articles 9(6), 10(2), 14(2) and (3)) would have to be determined. The Office also draws the Committee’s attention to the proposed Articles 35 and 36, which already provide for progressive implementation of certain aspects of social security protection, but without indicating that this should be done within a fixed period of time.

Furthermore, when considering the issue of flexibility provisions, whether in Articles concerning scope and definitions or elsewhere, the Office draws attention to the comprehensive discussion of this matter in the *Manual for drafting ILO instruments* prepared by the Office of the Legal Adviser.<sup>4</sup>

The Office provides below an example of possible text that would implement the idea of a progressive implementation approach, based on the discussions at the Tripartite Round Table. In doing so, it has also proposed a redrafting and merging of Articles 3 and 4 to improve the clarity of those Articles without changing their substance.

*Proposed new Article 3 (Articles 3 and 4 merged)*

1. Where the application of the Convention raises special problems of a substantial nature in the light of the particular conditions of service of the fishers or fishing vessels’ operations concerned, a Member may, after consultation, exclude from the requirements of this Convention, or from certain of its provisions:

- (a) fishing vessels engaged in fishing operations in rivers, lakes and canals;
- (b) limited categories of fishers or fishing vessels.

<sup>4</sup> Available in English, French and Spanish at <http://www.ilo.org/public/english/bureau/leg/manual.htm>.

2. In the case of exclusions under the preceding paragraph, and where practicable, the competent authority shall take measures, as appropriate, to extend progressively the requirements under this Convention to the categories of fishers and fishing vessels concerned.

3. Each Member which ratifies the Convention shall:

- (a) in its first report on the application of the Convention submitted under article 22 of the Constitution of the International Labour Organisation:
  - (i) list any categories of fishers or fishing vessels excluded under paragraph 1;
  - (ii) give the reasons for any such exclusions, stating the respective positions of the representative organizations of employers and workers concerned, in particular the representative organizations of fishing vessel owners and fishers, where they exist; and
  - (iii) describe any measures taken to provide equivalent protection to the excluded categories; and
- (b) in subsequent reports on the application of the Convention, describe any measures taken in accordance with paragraph 2.

*New Article 4*

1. Where it is not immediately possible for a Member to implement all of the measures provided for in this Convention owing to special problems of a substantial nature in the light of insufficiently developed infrastructure or institutions, the Member may, in accordance with a plan drawn up after consultation, progressively implement all or some of the following provisions within a period not exceeding [...] years following the date of entry into force of the Convention for that Member:

- (a) [... *particular provision of the Convention to be specified*]; [*etc.*].

2. Paragraph 1 does not apply to [... *categories of fishing vessels or fishers to be specified*].

3. Each Member which avails itself of the possibility afforded in paragraph 1 shall:

- (a) in its first report on the application of the Convention submitted under article 22 of the Constitution of the International Labour Organisation:
  - (i) indicate the provisions of the Convention to be progressively implemented;
  - (ii) explain the reasons and state the respective positions of the representative organizations of employers and workers concerned, and in particular the representative organizations of fishing vessel owners and fishers, where they exist; and
  - (iii) describe the plan for progressive implementation; and
- (b) in subsequent reports on the application of the Convention, describe the measures taken with a view to giving effect to all of the provisions of the Convention within the period set out in paragraph 1.

In the alternative versions of Articles 3 and 4 proposed above, the Office has, in place of the wording “special and substantial problems”, used the wording “special problems of a substantial nature in the light of”, as this wording has been used in a number of existing ILO Conventions.<sup>5</sup> The Office further notes that the wording in the proposed new Article 4, “special problems of a substantial nature in the light of insufficiently developed infrastructure or institutions”, does not refer to a country’s

---

<sup>5</sup> Including: the Working Environment (Air Pollution, Noise and Vibration) Convention, 1977 (No. 148), Art. 1, para. 2; the Safety and Health in Construction Convention, 1988 (No. 167), Art. 1, para. 2; the Night Work Convention, 1990 (No. 171), Art. 2, para. 2; the Maternity Protection Convention, 2000 (No. 183), Art. 2, para. 2; and the Safety and Health in Agriculture Convention, 2001 (No. 184), Art. 3, para. 1(a).

overall level of development but only to problems related to infrastructure or institutions. This is intended to address some of the concerns raised at the Round Table.

The existing Article 3, paragraph 2, of the proposed Convention reads:

In the case of exclusions under the preceding paragraph, and, where practicable, the competent authority shall take measures, as appropriate, to extend progressively the requirements under this Convention to the categories of fishers and fishing vessels concerned.

The Office has also used this wording in its proposed new Article 3 (merging Articles 3 and 4) as shown above. However, it draws the Committee's attention to the use in this paragraph of the words "where practicable" and "measures, as appropriate", which appear to be redundant. The Committee might wish to consider whether the intent of this paragraph would be better indicated by replacing the words "measures as appropriate" with "appropriate measures", although this might also result in a change to the substance of the text.

Furthermore, the Office notes that, under Article 4, paragraph 1, of the proposed Convention (and proposed new Article 3, paragraph 3(a)(iii) of the above text proposed by the Office), each Member, in its first report on the application of the Convention submitted under article 22 of the Constitution of the International Labour Organisation is required, inter alia, to "describe any measures taken to provide equivalent protection to the excluded categories". Although this refers to the categories of fishers or fishing vessels that may be excluded from the requirements of the Convention or certain provisions thereof, as set out in Article 3 of the proposed Convention (or Article 3, paragraph 3(a), of the above text proposed by the Office), the Office observes that this provision does not mirror any substantive obligation in Article 3 of the proposed Convention (or in Article 3, paragraph 3(a), of the text proposed by the Office).

In the proposed new text in Article 4, the Office has provided, in paragraph 1(a), for the possibility of listing those provisions of the Convention which a Member "may, in accordance with a plan drawn up after consultation, progressively implement". The provisions listed could include entire Articles or parts of Articles (for example, Article 10, paragraph 1, or Article 14). In paragraph 2 of the proposed new Article 4, the Office has included text that provides that paragraph 1 does not apply to certain categories of fishing vessels or fishers. It has left these categories in square brackets, as this is a substantive issue which the Committee may wish to consider. However, bearing in mind the replies to Question 1 and the comments made, in particular by government participants at the Round Table, indicating that certain fishing vessels or fishers should not be subject to such a provision, consideration might be given, for example, to including here a reference to "fishing vessels or fishers subject to the requirements of Article 41 of the Convention". In this regard, the Office also draws attention to its proposed redrafting of Article 41, as noted in the section of this report entitled "Additional Office commentary".

The Committee may also wish to consider whether the reference in Article 3 to "fishing vessels engaged in fishing operations in rivers, lakes and canals" should instead read "fishing vessels engaged in fishing operations in rivers, lakes **or** canals" [emphasis added].

The Office also notes that one of the replies to Question 1 suggests including a reference to "archipelagic waters" in Article 3, paragraph 1(a). Although the Office is not proposing specific text on this matter, it notes that the United Nations Convention on the Law of the Sea (UNCLOS), Part IV (Archipelagic States), Article 46, provides that:

For the purposes of this Convention:

- (a) “archipelagic State” means a State constituted wholly by one or more archipelagos and may include other islands;
- (b) “archipelago” means a group of islands, including parts of islands, interconnecting waters and other natural features which are so closely interrelated that such islands, waters and other natural features form an intrinsic geographical, economic and political entity, or which historically have been regarded as such.

The Office further notes the suggestion in the replies to exempt “artisanal fisher” from some or all of the Convention’s provisions. In this regard, it observes that this term is defined differently in different countries. However, the FAO *Fisheries Glossary*<sup>6</sup> has defined artisanal fisheries as:

Traditional fisheries involving fishing households (as opposed to commercial companies), using relatively small amount of capital and energy, relatively small fishing vessels (if any), making short fishing trips, close to shore, mainly for local consumption. In practice, definition varies between countries, e.g. from gleaning or a one-man canoe in poor developing countries, to more than 20 m. trawlers, seiners, or long-liners in developed ones. Artisanal fisheries can be subsistence or commercial fisheries, providing for local consumption or export. Sometimes referred to as small-scale fisheries.

## Question 2

**Qu. 2** *Articles 10, 11 and 12 of the proposed Convention concern the medical examination of fishers. Should additional flexibility be introduced into these Articles? If so, in respect of which specific provisions and under which conditions?*

### Replies

*Algeria.* The provisions are fully compatible with national laws and regulations, according to which all persons working as fishers are required to undergo periodic medical examinations to verify their physical fitness for seafaring work.

*Argentina.* The authority to grant general exemptions contained in Article 3 is not compatible with that provided for in paragraph 2 of Article 10. Not only does this affect the consistency of the text, but the parameters or reasons for exemptions, as listed in paragraph 2 referred to above, are worded differently to the list contained in Article 3, which in principle would be shorter. It would be more appropriate to maintain the wording of Article 3 and delete paragraph 2 from Article 10, which, according to the Government’s proposed amendment, would consist of a single paragraph. The Argentine Maritime Authority: It would not be appropriate to authorize exemptions allowing fishers to work on board fishing vessels without a valid medical certificate attesting to their fitness (Article 10(2)). Although the general principle states that valid medical certificates are compulsory (paragraph 1), the scope given for the competent authority to grant exemptions (paragraph 2) means that this is not an absolute requirement, thus making it difficult to monitor compliance and sanctions. With regard to Article 12, which determines the validity and minimum content of medical certificates of fishers on vessels of 24 metres in length and over, paragraph 1 is a minimum requirement that must not be further reduced or implemented at the discretion of individual Members, which could use any regulation that makes the limited requirement of this Article even more flexible. The Occupational Hazard Supervisory Authority: Additional flexibility is not

---

<sup>6</sup> <http://www.fao.org/fi/glossary/default.asp>.

appropriate given that the Occupational Hazard Act incorporates the provisions of the proposed Convention.

*CATT:* Flexibility has already been created in Article 10(2). However, an additional provision could be introduced specifically for fishers on board artisanal or small-scale fishing vessels operating in countries where existing development or infrastructure levels could make such requirements unreasonable or impractical. This flexibility should in no way be extended to cover workers on board vessels of 24 metres in length and over, or who remain at sea for more than three days.

*CAPeCA/CALaPA/CAPA:* It is unnecessary to make the medical examination provisions more flexible. All fishers should have a medical certificate duly authorizing them to board the vessel and carry out their duties. Furthermore, medical examinations are necessary to prevent subsequent claims relating to prior ailments or injuries not related to fishing. As regards requirements and validity, an exemption could be envisaged for artisanal fishers and subsistence fishing.

*Australia.* There is sufficient flexibility in Articles 10–12 relating to the medical examination of fishers. The text as proposed is supported.

*Austria.* The flexibility provided by Article 10, paragraphs 1 and 2, appears to be sufficient. However, with regard to paragraph 3, in order to make the proposed Convention more widely acceptable, the wishes of other Members regarding possible exemptions should be discussed again.

*Azerbaijan.* No.

*Belgium.* No. Flexibility is envisaged under paragraph 2 of Article 10 and, to a certain extent, under paragraph 3. Article 11 leaves the authority with plenty of room for manoeuvre. The search for additional flexibility would give rise to new difficulties and would render minimum provisions for the protection of fishers meaningless, in a sector already famous for the risks involved.

*Benin.* The provisions set out in Articles 10, 11 and 12 are adequate.

*Brazil.* No. The provisions on medical examination should be maintained and the existing Articles are already sufficiently flexible, subject to the authorization of the competent authority of each country, following prior consultation.

*CNC and CNT:* There is a need for additional flexibility. Reasoning: A standard should be introduced that does not oblige owners of fishing vessels and boats to adopt less rigorous standards in order to remain competitive. The competent authority should adopt the relevant international guidelines concerning medical examinations or certificates of physical aptitude for persons working at sea.

*Burkina Faso.* In general, flexibility is needed, especially with regard to medical aspects but without compromising the very purposes of the Convention. For example, owing to the lack of doctors in areas where fishing communities live and are active, it may not be possible for fishers to undergo regular medical examinations even if they wish to do so.

*Canada.* Competent authorities should be responsible for determining appropriate medical certification standards for fishers, including whether having a medical certificate is a bona fide occupational requirement. Mandating medical certificates for fishers, unless it was determined to be a bona fide occupational requirement, could be in contravention of Canadian human rights legislation. Articles 11 and 12 address important issues, such as proof of sufficient eyesight and hearing, and provide useful

guidance but are overly prescriptive as drafted (i.e. by stipulating the maximum period of validity of a medical certificate). In Canada, some jurisdictions do not regulate medical certificates for fishers working on smaller vessels.

CLC: Flexibility is already provided for in Article 10(2). However, an additional provision could be added to cover smaller vessels where the level of development or infrastructure of the country renders it unreasonable or unpractical for all the fishers on smaller vessels to have a valid medical certificate. This flexibility should not extend to vessels of 24 metres in length and over or to vessels that normally remain at sea for more than three days.

*China.* Article 11(c) should be modified as follows: "... the medical certificate to be issued by a duly qualified medical practitioner or hospital or, in the case of a certificate solely concerning eyesight, by a medical practitioner or hospital recognized by the competent authority as qualified to issue such a medical certificate, and the medical practitioner or hospital shall enjoy full professional independence in exercising their medical judgement in terms of the medical examination procedures;". Article 11(e) should be modified as follows: "... the right to a further examination by another independent medical practitioner or hospital in the event that a person has been refused a certificate or has had limitations imposed on the work he or she may perform;". Reasoning: Medical examinations in some countries are not conducted by an individual medical practitioner independently, rather, the relevant certificate is issued by hospitals.

*Colombia.* No. In view of the conditions in which fishing is carried out, the time spent at sea, and the distance of vessels from medical centres, it is important that fishers undergo a full medical examination.

ANDI: There should be provision for the competent authority to allow exemptions depending on the size of the vessel, the time spent at sea and the fishing zone involved, but such exemptions would not apply to vessels of 24 metres or more in length or more than 175 gt, and would depend on the length of the voyage and the fishing zone involved.

*Costa Rica.* A vessel that remains at sea for more than three days cannot be excluded from the requirement that fishers on board that vessel hold a medical certificate. Article 12(2) should be reconsidered. The Occupational Health Council feels that Article 12(1) should contain a statement to the effect that fishers are physically and psychologically fit to perform their duties and that checks have been carried out to ensure that fishers are not predisposed to consume drugs or substances (legal or illegal) that will prevent them from carrying out their duties.

*Croatia.* Medical certification, as stipulated in the proposed text, is left to the definition and determination of individual Members. This provides enough flexibility.

*Cuba.* Subparagraph (e) of Article 11 should be deleted. Fishers must be examined by qualified and recognized medical practitioners. This should be stipulated clearly in subparagraph (c) of the same Article.

*Denmark.* Article 10(2) provides the necessary flexibility.

3F: Supports this opinion. But consideration should be given to including a regulation in the provisions on medical examination of fishermen that would apply to smaller vessels in countries where the development and infrastructure make it unpractical or unreasonable that fishermen on such vessels should hold a medical certificate. Such exemptions should not apply to a fisherman working on a fishing vessel

of 24 metres in length and over or which normally remains at sea for more than three days.

*Egypt.* Agrees that persons working on board fishing vessels should be subject to initial medical examination as well as to subsequent periodic examinations. They should have medical certificates attesting to their fitness to work and their healthy status. Fishing vessels should be equipped with appropriate medical supplies and there should be a person on board qualified to carry out the necessary first aid. The persons who issue the medical certificate should be approved by the competent authority in order to avoid falsification and fraud of medical certificates and to ensure the validity of the medical certificates.

*GTUWA:* The competent authority in the State of the fisher's nationality or residence and the State of migration where the fisher works should reach an agreement on the criteria of, and who will sign, the medical certificate and determine the fisher's health and physical ability to work.

*Finland.* The present text provides the needed flexibility. In Finland, the Decree on Medical Examinations of Seafarers (476/1980) does not apply to fishers unless the work is carried out on a vessel provided with a deck and designed for deep-sea fishing.

*SAK:* Article 10(2) provides the needed flexibility. However, depending on the level of the development and infrastructure of the country, an additional provision might be needed to provide exemption from the requirement of medical examination for fishers on vessels less than 24 metres in length and vessels which normally remain at sea for no more than three days.

*France.* Article 10 of the proposed Convention guarantees that any fisher working on a fishing vessel of 24 metres or more in length or which normally remains at sea for more than three days, shall be examined to ensure that he or she is not suffering from any medical condition likely to be aggravated by service at sea or to render the fisher unfit for such service or to endanger the health of other persons on board. Hearing and sight must also be checked. It is understandable that certain States which lack the appropriate medical structures could have difficulty in applying Article 10 of the proposed Convention. However, increasing the possibilities for exemption would substantially reduce the scope of the new text. For France, medical coverage and follow-up care are a general principle. In the light of this, it would seem inappropriate to extend the exemption to categories of fishers other than those included under Article 10 of the proposed Convention.

*Germany.* The medical examination of fishers should be conducted as for every other seafarer, which means that there should be no flexibility.

*Ghana.* Additional flexibility should be introduced in Article 10(1) to include artisanal fishers, aquaculture and recreational fishing.

*Greece.* Article 10(2) already provides the competent authority with flexibility concerning fishermen's medical examinations. The standards of the flexibility could probably be improved by adapting the scope of application of the Convention (see answer to Question 1).

*Honduras.* COHEP: Yes. The provisions must be flexible. In Honduras, the Atlantic zone includes areas of different and sometimes non-existent health services, so flexible provisions would not lead to sanctions against Honduran fishers in future. There should be a degree of flexibility in these provisions in the case of small-scale fishing or

subsistence economies. Without such flexibility, Honduran fishers and their families would be at risk.

*India.* HMS: Flexibility for small vessels should be added to Article 10(2). Ninety per cent of the fishers in Indian and Asian countries belong to small-scale enterprises or are self-employed. There may not be a developed infrastructure, and therefore the requirement may be impractical. However, there need not be any flexibility for vessels above 24 metres in length.

*Iraq.* More flexibility should be introduced.

*Italy.* No.

FEDERPESCA and FAI-CISL: Italian legislation makes provision for medical examinations and their frequency. No further flexibility other than that already provided appears necessary.

*Japan.* There are several items which should be examined in order to improve working conditions, including: (1) accommodation; (2) minimum requirements for minimum age and medical examination; and (3) conditions of service, such as manning and minimum hours of rest. To give due consideration to fishers' health, items (2) and (3) are more essential than accommodation and they should be the first to be addressed.

JSU: Agrees.

*Latvia.* No additional flexibility is necessary.

*Lebanon.* Article 10, paragraph 2, concerning exemptions from medical certification, allows sufficient flexibility: more flexibility may weaken the content of paragraph 1. The requirements for medical examination of seafarers on merchant vessels could be applied to fishers, given the difficulty of work on fishing vessels. It may be necessary for some facilities to charge a fee to obtain the certificate. Article 12, paragraph 1(a), provides that, for a fishing vessel of 24 metres in length, "The medical certificate of a fisher shall state, at a minimum, that: the hearing and sight of the fisher concerned are satisfactory for the fisher's duties on the vessel." This should also be a requirement for work on vessels under 24 metres in length. Article 12, paragraph (3), provides that "If the period of validity of a certificate expires in the course of a voyage, the certificate shall remain in force until the end of that voyage." In this regard, the medical certificate should be renewed at least one or two months before its expiration, in order to avoid the expiration of the certificate in the course of a voyage, taking into account exceptional circumstances.

*Lithuania.* No additional flexibility should be introduced.

*Mauritius.* No additional flexibility is necessary.

*Mexico.* It is not necessary to introduce greater flexibility into these Articles, given that Article 12, paragraphs (2) and (3), of the proposed Convention is very clear with regard to the duration of validity of medical certificates.

*Netherlands.* See answer to Question 1.

*New Zealand.* No additional flexibility should be introduced into these Articles. The requirement to be medically fit is important for a hazardous industry such as fishing. Paragraph 2 of Article 10 provides adequate flexibility.

NZCTU: Agrees that no additional flexibility need be introduced. Any attempt to introduce flexibility in respect of vessels 24 metres in length or longer should be strongly resisted.

*Panama.* The Maritime Authority of Panama considers that, given the importance of the question of “fitness to perform duties” and the broad support shown for the Maritime Labour Convention, 2006, the parameters should be the same.

CMP: Articles 11 and 12: In the case of fishers on board vessels smaller than 24 metres in length, the provisions of these Articles should be observed.

*Papua New Guinea.* Agrees with the proposed Convention regarding the examination of the fishers on shore before they board the fishing vessels. However, given the small scale of the fishing industry and the prevailing economic conditions, medical facilities (centres) either offshore or in the fishing vessels may not be affordable.

*Philippines.* As fishing is a very taxing and often hazardous occupation, it would help fishers if the exemption in Article 10, paragraph 2, were removed. In addition, Article 11 could specify the importance of preventative programmes on sexually transmitted diseases, HIV/AIDS, drug abuse and tuberculosis in view of the vulnerability of fishers to such health problems. Subparagraph (e) of Article 11 should be deleted. While the medical examination of fishers should be a requirement for all fishers, there should be the possibility for the competent authority to grant exemptions for fishers not working on board vessels. The period of validity for the medical certificate should be for a maximum of one year regardless of age.

*Poland.* There is no need to change the abovementioned provisions, as Polish legislation is in conformity.

*Portugal.* No. The provisions are already sufficiently flexible.

*Qatar.* Fishing vessels in the State of Qatar do not exceed 24 metres in length, and do not stay at sea for more than three days. Although these vessels can be exempted from the requirement for fishermen to have a medical certificate, legislation in the State of Qatar provides for the need to have a medical certificate to work on fishing vessels. The provisions of the Articles are in full conformity with the law in force in Qatar.

*Romania.* The Articles in question are already flexible. The worker’s health is very important.

*Saudi Arabia.* The Articles mentioned in Question 2 are clear, and do not require additional flexibility.

*Seychelles.* Seychelles agrees with the aforementioned Articles but also feels that they are somewhat too flexible and thus should be taken only as minimum requirements.

*Slovenia.* There is no need for additional flexibility to be introduced in Articles 10, 11 and 12 of the proposed Convention.

*South Africa.* As concerns Article 10, no. There is sufficient latitude in the Article allowing length of time and the length of the vessel to be considered. As concerns Article 11, no. Article 11 sets the framework for Article 10 to be effective. It also allows a “medical practitioner” who may be a community or occupational health nurse to undertake the examination where access to a doctor may be problematic. As concerns Article 12, no. As with the previous two Articles, it reflects South African legislative requirements, although these require an annual medical examination. Fishing is known to be an occupation that is physically demanding often in poor weather conditions, and medical fitness standards are of the utmost importance.

*Spain.* No. The wording of Article 10(2) already introduces a great deal of flexibility, in that it authorizes persons to carry out one of the world's most dangerous occupations without a medical certificate attesting to fitness to perform their duties.

The ILO/WHO *Guidelines for Conducting Pre-sea and Periodic Medical Fitness Examinations for Seafarers*, of 1997, which only allow exemptions for single voyages, should be applied. Given the culture of occupational risk prevention that we are attempting to establish here, it makes no sense, either in this Convention or in the Maritime Labour Convention, 2006, to exclude certain seafarers because they are at sea for three days or less.

FEOPE: This flexibility is neither appropriate nor fitting. However, it would be useful to include some kind of clause guaranteeing that the medical examinations carried out and recorded in some of the signatory countries to the future Convention are also valid in the territory of the other States signatories. This would assist the fishers in their work and enterprises in the management of their human resources. Restrictions would, however, need to be put in place with regard to possible types of discrimination, based on nationality or other factors, which could be practised, in certain territories, under the cover of the application of standards concerning medical examination.

*Sri Lanka.* Provision of a valid medical certificate should be a responsibility of the vessel owner.

UFL and NFSM: The medical examination requirement should be strictly enforced, especially when young fishers engage in fishing, as they should be qualified for fishing operations involving more than three days at sea. All multi-day fishing vessels that operate for more than three days at sea should also be covered by these Articles. There are millions of fishers all over the world, while more than 50,000 fishers in Sri Lanka alone work on fishing vessels less than 24 metres in length for more than three days at a time. There should be a provision to cover all these fishers.

CWC: Flexibility is already provided for in Article 10(2). However, an additional provision could be added to cover smaller vessels where the level of development or infrastructure of the country renders it unreasonable or unpractical for all the fishers on smaller vessels to have a valid medical certificate. This flexibility should not extend to vessels of 24 metres in length and over or to vessels which normally remain at sea for more than three days.

*Suriname.* Flexibility should be introduced regarding the issuance of medical certificates for fishers (owners) working on small vessels (see answer to Question 5).

*Sweden.* For the Swedish fishing sector, medical examinations of fishers are already regulated in existing crewing regulations. The Swedish rules on social security are of a general nature and include fishermen.

MMOA: The Convention has more than enough flexibility in the Articles referred to. Considering the high risks fishermen are exposed to, it is of great importance that they are in good health in order to maintain a safe working environment. More flexibility regarding the medical examination is unnecessary and may increase the risk for fishermen as well as the ship and the environment in general.

SFR: Self-employed persons should be entirely excluded from the scope of the proposed Convention. In Sweden, rules already exist concerning health aspects of fishing and these are applied. To stipulate in the Convention that no fisherman should practise his occupation unless a medical certificate states that the person in question is capable of doing so appears well-meaning, but in reality would entail yet another burden

for the individual fisherman who must be regarded as capable and competent to decide for himself if he can carry on his fishing activities or not. Fishing may be a special occupation, but it cannot be regarded as being of such a nature, and associated with such risk, that it is necessary for all professional fishers to have undergone medical examination and thereby be regarded as fit to practise their own occupation. The ideas, albeit well-meaning, are, in this regard, a very clear example of a completely unnecessary and superfluous set of rules. It is quite another matter that, in certain types of fishing, of a special nature, a requirement for certificates of health, etc., could be justified, but this is a matter of fishing carried on by a fraction of the addressees of the proposed Convention.

*Syrian Arab Republic.* The provisions of the proposed Convention, especially Articles 10, 11 and 12, have sufficient flexibility and are balanced as they stand, to the extent that these requirements are limited to those who work on fishing vessels of 24 metres in length and over. Such provisions are not required for fishers on small-scale fishing vessels.

*Thailand.* There is no objection to Articles 10, 11 and 12 of the proposed Convention.

*Trinidad and Tobago.* As concerns Article 11(c), it is recommended that the sentence "... in the case of a certificate solely concerning eyesight ..." should be deleted. There are other medical conditions that pose a danger to fishers and should be declared by virtue of a medical certificate. As concerns Article 12(1)(b), safety should be included. There are effects other than the health of other persons on board that could be affected. The sentence should be rephrased to read: "... the fisher is not suffering from ... to endanger the health and safety of other persons on board ...". With regard to Article 12(3), the competent authority should be accorded the right to determine the period of validity of the medical certificate.

ECA: With regard to Article 11(e), the use of the word "person" instead of "fisher" needs to be clarified. The definition of "fisher" forms the basis of the whole document and the word "person" does not distinguish between members of the general public and fishers. Consequently, the use of the word "person" as opposed to "fisher" can cause confusion.

*Ukraine.* As regards the Medical Examination (Fishermen) Convention, 1959 (No. 113), it should be noted that, in a number of countries, the relevant legal provisions in legislation on medical services cover all merchant vessels or seafarers, including fishing vessels or fishers as appropriate. Since Convention No. 113 applies to the industrial fishing fleet sector, then it follows that the category of small or cooperative fishing vessels is not protected by this Convention and, consequently, it is impossible to say with certainty that the Convention has a significant effect in improving the health and increasing the occupational safety of the majority of such fishers worldwide. It is therefore necessary that steps be taken to bring this unprotected group of fishers within the scope of the Convention, as either a compulsory or recommended measure.

*United Kingdom.* While the United Kingdom Government can support the text of Articles 10, 11 and 12 as currently drafted, it is recognized that the provisions for medical examination of fishers were a significant concern for some parties. Accordingly, it suggests more flexible text as follows:

*Article 10*

1. No person shall work on board a fishing vessel unless they have a valid medical certificate attesting that they are medically fit to perform their duties.
2. The competent authority may, after consultation, exclude from the application of the preceding paragraph fishers or categories of fishers, taking into account the health and safety of fishers, size of the vessel, availability of medical assistance and evacuation, duration of the voyage, area of operation, type of fishing operation, national traditions and level of development or infrastructure in the member State.
3. The exemptions in paragraph 2 of this Article shall not apply to a certificated officer or person with safety critical responsibilities working on a fishing vessel of 24 metres in length and over or which normally remains at sea for more than three days. In urgent cases, the competent authority may permit a fisher to work on such a vessel for a period of a limited and specified duration until a medical certificate can be obtained, provided that the fisher is in possession of an expired medical certificate of a recent date.

In addition to providing more flexibility, the text as outlined would broadly align with the medical fitness requirements of the STCW-F Convention.

*Uruguay.* No changes are necessary.

*Venezuela, Bolivarian Republic of.* Although the medical certificate is a necessary instrument, given the circumstances of each country, it should not be limiting with regard to period of validity, as it could also be used as a means of labour discrimination within the context of the development of labour relations in the fishing sector. Given the tasks involved in fishing work, the environmental conditions, the period of duration of fishing operations and the high level of risk on board a fishing vessel or boat, it is vital that fishers be in good physical and mental health, especially with regard to sight and hearing, so that they may carry out their activities on board properly and efficiently, avoiding the risks linked to persons with health issues. Considers that Articles 10, 11 and 12 should be applied as set out in the proposed Convention. However, in Article 12(2) the period of validity could be reduced to one year for all fishers, including those under the age of 18. This is due to the high risk of contagious diseases on board, sexually transmitted diseases and other diseases present in the surrounding environment, which may spread in a short time, and even more rapidly in the reduced space in which fishing operations are undertaken. Finally, there is concern about suggestions for additional flexibility, all the more when developing countries are used as a basis for these suggestions. This would be contrary to the development of countries, assuming that this development is not only measured in terms of economics.

*Overview of the replies to Question 2*

Governments replied, in a ratio of four to one, that additional flexibility was not necessary in these Articles. Another six appeared to want less flexibility, and several did not answer categorically whether or not additional flexibility was sought.

Of those governments that did not want changes to the text, some indicated that their national laws and regulations were already fully compatible with the provisions of the Convention. Several said medical examination and certificates were needed due to the importance of fishers' health and the hazardous nature of fishing. It was said by one that the requirements for fishers should be comparable with those in the Maritime Labour Convention.

Some governments indicated that the provisions were too flexible, for example, because they did not require all fishers to hold certificates or did not require certificates for fishers on vessels at sea for more than three days. It was also suggested that

Article 10, paragraph 2, should be deleted because it was incompatible with Article 3, which already provided sufficient flexibility.

As to governments that wanted more flexibility, particularly in Article 10, paragraph 2, one of the main reasons given was lack of medical doctors or affordable medical services in some fishing communities, particularly in developing countries. A few governments cited the need for exemptions for artisanal fishers or owner–operators. One said that the requirement for a medical certificate was the responsibility of the vessel owner. Another said that the question of whether or not a certificate should be required should be left to the competent authority. It was suggested that additional flexibility could be introduced for fishers on small vessels or artisanal vessels. It was also suggested that the limitation on exemptions proposed in Article 10(3) should apply only to certified officers or persons with safety critical responsibilities working on a fishing vessel of 24 metres in length and over or which normally remains at sea for more than three days (with special exemptions possible in urgent cases and for a period of limited and specified duration).

As concerns possible changes to Article 11, one government said that the medical examinations should be used to promote prevention of HIV/AIDS, drug abuse and tuberculosis. Another proposed allowing hospitals as well as medical practitioners to issue medical certificates, while yet another was in favour of limiting the conduct of such examinations to qualified medical practitioners. Some wanted the deletion of Article 11(c) and, in one case, paragraph (e). It was suggested that, in (c), the words “in the case of a certificate solely concerning eyesight” be deleted, which would have the effect of allowing someone other than a qualified medical examiner to issue the medical certificate as long as that person issuing the certificate was recognized by the competent authority as qualified to do so.

With regard to Article 12, one government questioned why the eyesight and hearing requirements in Article 12(1)(a) should not apply to fishers on vessels under 24 metres. Another said that Article 12, paragraph 1, must not be further reduced. As to the validity of certificates, some wanted a limitation of one year for fishers of all ages while others suggested leaving the period of validity to the competent authority.

A few employers’ organizations referred to the development approach that they had described in their answers to Question 1 (i.e. it should be possible to exempt fishers on board artisanal or small-scale fishing vessels in countries where the existing development or infrastructure levels make such requirements unreasonable or impractical). A few said that self-employed fishers should be excluded. One indicated that it would be useful to put in place measures to ensure that medical examinations were valid and recorded by signatory States. There was a suggestion (from ANDI) that the competent authority should be able to allow exemptions for certain vessels but that such exemptions would not apply, for example, to vessels of 24 metres or more in length or of more than 175 gt.

Several workers’ organizations said that sufficient flexibility was already provided in Article 10(2), but that an additional provision could be added to cover smaller vessels where the level of development or infrastructure of the country rendered it unreasonable or impractical for all fishers on small vessels to have a valid medical certificate. Such flexibility should not extend to vessels of 24 metres in length and over or to vessels that normally remained at sea for more than three days. One seemed to indicate that the medical fitness criteria for fishers, and who should sign the certificate, should be left to the competent authority.

### *Discussion at the Tripartite Round Table*

As noted in the appendix, the Round Table discussed the issues addressed in Question 2, in particular the possibility of exemptions for certain fishers or fishing vessels where the infrastructure needed to conduct medical examinations and issue medical certificates was lacking. The Employer and Worker representatives suggested that the progressive implementation approach noted above might be the means of providing the necessary flexibility. While the matter was not settled, there appeared to be progress towards a possible solution at the Conference.

### *Office commentary*

Regarding the reply by the Government of the United Kingdom suggesting that Article 10 be aligned with the requirements of the STCW–F Convention, the Office points out that the STCW–F Convention sets out in the Annex, Chapter II, Regulations 1–6, the requirements for certification of skippers and officers in charge of a navigational watch on fishing vessels of 24 metres in length and over, in both limited and unlimited waters, for chief engineer officers and second engineer officers of fishing vessels powered by main propulsion machinery of 750 kW propulsion power or more, and for GMDSS radio personnel. These provide that all candidates for such certification shall “... satisfy the Party as to medical fitness, particularly regarding eyesight and hearing;” and that radio operators, skippers, officers, engineer officers and radio officers, when candidates for certification, shall “... satisfy the Party as to medical fitness, particularly regarding eyesight and hearing”. They also provide, in Regulation 7, that “Every skipper or officer holding a certificate who is serving at sea or intends to return to sea after a period ashore shall, in order to continue to qualify for seagoing service, be required, at regular intervals not exceeding five years, to satisfy the Administration as to: ... medical fitness, particularly eyesight and hearing;”. Regulation 8 provides that “Every GMDSS radio personnel holding a certificate or certificates issued by the Party shall, in order to continue to qualify for seagoing service, be required to satisfy the Party as to the following: ... medical fitness, particularly regarding eyesight and hearing, at regular intervals not exceeding five years;”. However, Chapter III, Basic safety training for all fishing vessel personnel, makes no mention of medical fitness requirements.

The replies also include references to the ILO/WHO *Guidelines for Conducting Pre-Sea and Periodic Medical Fitness Examinations for Seafarers*. The Office points out that these Guidelines can be viewed, in English, French and Spanish, on the ILO web site.<sup>7</sup>

The replies also include the suggestion that the requirements concerning medical examination and certification of fishers should be aligned with those in the Maritime Labour Convention, 2006. The Office observes that while Articles 10–12 of the proposed Convention are generally consistent with those of the MLC (i.e. the period of validity of the medical certificates is the same), the MLC, in Standard A1.2, does differ in certain details (for example, it limits, in paragraph 9, the period during which a medical certificate, which expires during the course of a voyage will remain valid).

### Question 3

**Qu. 3** *Article 14 of the proposed Convention concerns level of manning and minimum hours of rest for certain categories of vessels. Should changes be made to this Article? If so, please indicate the changes proposed and specify the reasons.*

#### *Replies*

*Algeria.* Article 14 should not be changed, since it sets out the principle of having a minimum crew on board vessels that are 24 or more metres in length and a minimum rest period for fishers working on board fishing vessels engaged in voyages of more than three days. It also allows the competent authority to permit temporary exceptions to the normal rest periods.

*Argentina.* In Argentina, the Argentine Maritime Authority is responsible for ensuring the safe manning of fishing vessels, in order to guarantee the provisions of Article 14(1)(a), with a crew capable of sailing or operating the vessel safely, that is, meeting a minimum requirement for handling the vessel and operating its safety and rescue systems for a determined period, in accordance with the ratified provisions of international Conventions on the safety of life at sea. With regard to suitability or competency, these depend on the abilities of individual crew members, which are taken into account when ensuring the safe manning of the vessel. Before setting sail, all fishing vessels must have a safe manning certificate, which is issued by the Argentine Maritime Authority, under Maritime Ordinance No. 05/89. The operating crew, which ensures that the vessel operates in a normal and efficient manner in the activity and trade chosen by the vessel owner, in this case fishing, is not determined by the Argentine Maritime Authority, but is the responsibility of the vessel owner and the organizations to which the various workers are affiliated, which must adhere to international standards on hours of work and rest. We consider the restrictions established in paragraph 1(b) to be minimum parameters. Furthermore, paragraph 2 is flexible enough to recognize the need to grant exceptions to these minimum legal requirements in specific cases. In addition, paragraph 3 provides even greater flexibility in respect of how these requirements are envisaged. However, alternative requirements must provide at least the same level of protection. For the reasons given above, the Article should not be changed. The Occupational Hazard Supervisory Authority adds that all of the partners involved should be consulted, particularly to determine if the daily and weekly rest periods are sufficient for workers to recuperate both physically and mentally.

*CAPeCA/CALaPA/CAPA:* Article 14 should be deleted in its entirety, and only the general provision of Article 13 should be retained to the effect that periods of rest must be adequate or appropriate. If Article 14 is maintained, it should clearly state that the maritime authority is responsible for ensuring that vessels are safely manned, and the vessel owner is responsible for determining the crew members required for conducting fishing operations. Labour legislation in a majority of countries incorporates the principle that employers are responsible for managing and organizing their enterprise or production unit. In this case, the production unit is a vessel, which must therefore meet certain requirements or conditions imposed by the maritime authority. A safe crew with the appropriate nautical and navigational skills is therefore necessary. However, the number of workers recruited for commercial operations is the sole responsibility of the employer, just as it is for the employer to determine the number of operators, technicians and engineers involved in production and maintenance at shore-based fish processing plants. On the other hand, it should be possible to adjust rest periods according to the type of fishing or area of operation or the shifts worked on board, for example, on-board jiggers, which operate at night to catch and process squid.

*Australia.* The provisions of particular concern are Article 14(1)(a) and 14(1)(b), which establish specific provisions for manning and hours of rest. As provisions exist for consultation in relation to this Article, if agreement is reached between the parties on a suitable balance of work and rest, then there should be no need to mandate specific requirements.

In response to this, Australia proposes the following alternative wording for Article 14(1)(b):

[In addition to the requirements set out in Article 13, the competent authority shall:]  
(b) for fishing vessels regardless of size remaining at sea for more than three days, after consultation and for the purpose of limiting fatigue, establish a reasonable level of rest to be provided to fishers.

The next sentence, specifying the necessary minimum hours of rest, should be moved to the Recommendation. Whilst the intent of Article 14 is sound from a health and safety perspective, it may not reflect the reality of some fisheries where earnings are based on a share of the catch. The suggested flexibility measure may serve to address this concern.

*Austria.* Given that exhaustion is a frequent cause of accidents, these provisions should not be made even more flexible.

*Azerbaijan.* No.

*Belgium.* Although it gave rise to a great deal of discussion, Article 14 was adopted by very broad consensus based on the undeniable logic inherent in the solution put forward. It is a key provision in the Convention and a fundamental one with regard to safe navigation at sea. There is no question of reducing the hours of rest set out under paragraph 1(b) of this provision, given that these correspond to the standard set by the Maritime Labour Convention, 2006. The reply is therefore no.

*Benin.* This Article can be retained in its current form, as it allows the competent authority to introduce changes following consultations with organizations of shipowners and workers in the fishing sector.

*Brazil.* No. The proposed text offers adequate protection to fishers from excessive fatigue and it can be accepted by developing countries. It allows the competent authority, always following prior consultations, to permit temporary exceptions to the limits on any 24-hour period or alternative requirements – and thus encourages more ratifications.

CNC and CNT: The competent authority should adopt measures aimed at providing adequate protection with regard to working conditions, as well as a dispute resolution mechanism.

*Canada.* The intent of this requirement is sound from a safety and health perspective but may not reflect the reality of some fisheries or where earnings are based on a share of the catch after expenses. The issue could be addressed by including a provision in this Article of the Convention that the competent authority should determine appropriate standards for fishing operations after consultation. This approach would also address the issue of monitoring and enforcement of these provisions. The second sentence in Article 14(1)(b) is overly prescriptive and should be moved to the Recommendation. Not all Canadian jurisdictions regulate manning and hours of rest in the manner outlined in Articles 13 and 14. These issues are usually addressed in collective bargaining agreements. Including prescriptive wording in this section will create barriers to ratification.

CLC: The minimum hours of rest requirements could be relaxed to reflect the intensity of fishing operations. However, it is essential, for the purposes of limiting

fatigue and given the high number of accidents in the sector and the dangerous nature of the work, that fishers have regular rest periods and are able to have adequate periods of sleep. As the differences in fishing operations make it difficult to establish a realistic international standard, any flexibility should be provided in the collective bargaining agreement.

*China.* In principle, agrees to the provisions of this Article, but appropriate changes should be made. Proposes that States be allowed to make provisions in principle governing the minimum level of manning for vessels of their own countries. If these provisions guarantee in principle a level of manning suitable for the safe navigation and operations of the vessel and for fishers to get minimum rest, then no compulsory provisions should be made on the minimum number of fishers. Minimum hours of continuous rest should be no less than four hours per fisher per day, and 12 hours in any two-day period. Reasoning: As the design of fishing vessels, areas of operations, and practices in different countries and areas are different, the number of fishers is often difficult to fix. Also, because one of the characteristics of fishing on the sea is the frequent need for continuous operations – excluding the case where some owners or masters of vessels neglect the health of fishers for economic gains – there still arise some situations where some fishers take very few hours of continuous rest per day due to the requirements of the operations. Minimum hours of continuous rest for fishers should be provided to ensure, to the extent possible, that all fishers get enough rest to recover their physical strength.

*Colombia.* The level of manning for each activity must be such as to ensure minimum conditions of safety and to comply with the safety and health standards required for any global market.

ANDI: Each State should adopt relevant laws and regulations to ensure that vessels under its flag have a crew that is sufficiently large and competent to ensure that its operations can be carried out safely. In the case of vessels of at least 24 metres or 175 gt, the competent authority should establish the minimum manning level required for the safe operation of the vessel.

*Costa Rica.* Occupational Health Council: The Convention should not exclude vessels shorter than 24 metres in length from the requirements contained in Article 14. Such an exemption would weaken the competent authority's ability to regulate. So-called "self-employed workers" do not, in general, enjoy protection against hazards at work, because, in accordance with the Labour Code, insurance against these risks is only compulsory for wage workers. In the absence of an obligation to be insured, most self-employed workers opt to work without insurance, seeing this as being a more profitable option. As to the working day, an examination of the practice and reality in this sector shows that there are artisanal fishers who work for periods of one day on different vessels or boats. In the same way, the competent authority is limited in its ability to monitor and apply provisions concerning occupational safety and health and working conditions in general in the sector in question. This is why it is so important that the loopholes related to Article 14 of this vital instrument be filled.

INCOPECA: In Costa Rica, fishing activities carried out aboard boats and vessels must be considered to be atypical in terms of work activities, given that working days in this sector do not fit into the categories of day work, night work or mixed work, which are suitable or reasonable with regard to normal work or work performed on land or in offices, enterprises, factories, etc., given that any fishing trip that lasts up to three months may be considered to be normal. During such trips, the workers might not call in at port or set foot on land. Moreover, work tasks on vessels and tasks related to fishing

are discontinuous or temporary and therefore there are, necessarily, differences with regard to rest periods. Despite this, it is important to recognize periods of rest appropriate to fishing tasks. Therefore, taking into account the favourable conditions required for making a catch, such as the weather, finding a shoal of fish and other elements important to the activity, the workday could be agreed on by the parties, respecting, as far as possible, periods of rest for sleep and eating, all in accordance with the limits set under the Labour Code. The employer undertakes to ensure, especially during times when no fishing activity is being undertaken, that all the workers shall rest and eat accordingly, in order fully to recuperate.

*Croatia.* The proposed Article is acceptable.

Croatian Chamber of Economy: The requirements of subparagraph (b) should perhaps be lessened, because the detailed requirements might in the long run have negative impacts on the costs of operations.

*Cuba.* Add a phrase to the end of Article 14(1)(b) to the effect that other situations requiring different treatment may be addressed in a collective bargaining agreement, depending on national conditions.

*Denmark.* There is no need for further changes in Article 14.

3F: A relaxation of the requirements for hours of rest should be considered to reflect the intensity with which fishing is often carried out. It will often be difficult to establish such general standards due to the diversity in fishing around the world and, therefore, divergences should only be allowed through collective bargaining. The general regulation on hours of rest in the draft proposal for Article 13(b) should therefore still apply in order to limit fatigue, etc.

*Egypt.* Agrees on the content of this text concerning rights and guarantees established for those working on fishing vessels, so as to ensure security and stability and to safeguard the workers' right to determined hours of work and guaranteed hours of rest which should not be less than those established in the laws of the flag State. Exclude small fishing vessels operating in inland waters from the provisions and conditions of this Article.

GTUWA: Consultation as regards this Article should be tripartite, involving the competent authority, the employers and workers, both on a general level in each State and at a private level of each vessel or area.

*Finland.* Taking into account Article 3 of the proposed Convention, no changes are needed. However, it might be advisable to include a provision regarding daily minimum hours of rest.

SAK: Agrees, emphasizing the dangerous nature of the work. However, given the differences in fishing operations, the required flexibility should be provided by collective bargaining agreements instead of an international standard.

SAKL: Because of the nature of fishing, especially deep-sea fishing, and the sometimes extreme weather conditions, flexibility with regard to rest periods is necessary. Under certain conditions, rest at a given time might not be possible because of the safety of the vessel.

*France.* The issue of minimum manning levels must be looked at from a global perspective. If safe navigation is to be ensured, then so must the use of the vessel in safe conditions, especially given the nature of fishing operations. In this regard, several complementary definitions of minimum manning levels coexist within the international

texts in force. The Maritime Labour Convention, 2006, defines minimum manning levels as those which “ensure that ships are operated safely, efficiently and with due regard to security”; the Seafarers’ Hours of Work and the Manning of Ships Convention, 1996 (No. 180), stipulates in a more general manner that any commercial vessel shall be “... sufficiently, safely and efficiently manned”. As to the texts originating from the International Maritime Organization, crews of commercial vessels must be certified by the flag States which issue, most often themselves, “safe manning certificates”, establishing the number of officers and crew members and stipulating that the provisions concerning “the watch” shall be at the discretion of the owner and/or the skipper, but that they shall at least be in accordance with the standards established by the Standards of Training, Certification and Watchkeeping (STCW) Convention, the Convention on the International Regulations for Preventing Collisions at Sea (COLREGs), the International Convention for the Safety of Life at Sea (SOLAS) and the International Convention for the Prevention of Pollution from Ships (MARPOL). Fishing remains a very particular type of maritime labour because, as well as navigating, the crew also operates the vessel when it is at sea. It is thus vital not to limit the notion of minimum manning to that of “minimum level of manning for the safe navigation”; rather an addition should be made in the form of “minimum level of manning for the safe operation”. Article 13 of the proposed Convention, in referring to both the safe navigation and safe operation of the vessel, explicitly focuses on the “operation” of the vessel, in particular fishing operations. This Article, which has been drafted in a satisfactory manner, should be maintained.

Article 14 complements the stipulations of Article 13 by strengthening obligations concerning minimum manning levels. There is no need for additional flexibility. The regulation of the working conditions of fishers by requirements regarding minimum hours of rest is relevant because the duration of hours of rest seems to be the only criterion applicable in practice in this regard. Therefore, in the case of France, the decision to regulate the duration of seafarers’ hours of rest was taken in agreement with the social partners. The provisions of Article 14 of the proposed Convention regarding minimum hours of rest should not be amended.

*Germany.* Article 14(1)(b) corresponds to the minimum hours of rest as foreseen in Article 21 of Directive 2003/88/EC concerning certain aspects of the organization of working time, which has been transposed into German law (the Seafarers Act). There are no objections to this provision. However, if the exceptions provided for in Article 14(2) and (3), might only be possible in specific cases, this provision would not be acceptable, as the provision is contrary to Article 21 of the Directive. In the Directive, exceptions are possible only if based on law, administrative acts or collective bargaining agreements. The exception criteria in Article 14 should be in line with those in Article 21 of the Directive.

*Ghana.* Article 14 should be retained.

*Greece.* No special comments, given that the limits provided thereof already exist as requirements of the Community legislation and Greece is in compliance.

*Honduras.* COHEP: Within the terms of Article 14(3), it is possible to establish alternative provisions after consultations between fishers, shipowners and governments – obviously ensuring at least the same level of protection. In Honduras, fishing at sea is limited to eight months in the year because of bans (closed seasons). As regards scaly fish, there is no closed season or other restriction and the boats involved are small and have limited space for ice and crew.

*Iceland.* The second sentence of Article 14(1)(b) should be moved from the Convention to the Recommendation and the wording of paragraphs 2 and 3 adjusted accordingly. The very nature of fishing operations makes it difficult to control working time. Fishers cannot control where and when the resource will appear and thus tend to fish as long as fish are being caught and capacity remains in the hold. There is no connection between the time actually worked on board and the fisher's income, as the fisher's pay is based on a share of the catch.

ASI: Opposes moving Article 14(1)(b) to the Recommendation and is in favour of keeping the paragraph as it is in the text of the proposed Convention.

*India.* HMS. According to circumstances prevalent in any country, the rest period can be included in collective bargaining agreements. A mandatory provision for the level of manning and minimum hours of rest is required, considering the accidents and dangerous nature of fishing work.

*Iraq.* Fishing operations in Iraq are very limited and there are no large fishing vessels. Consequently, there is no need to determine hours of work or the numbers of fishers on board.

*Italy.* No.

FEDERPESCA and FAI-CISL: The issue dealt with in Article 14 of the Convention is regulated by national collective labour agreements, as referred to in Legislative Decree 271/99.

*Japan.* Same answer as for Question 2.

JSU: Agrees.

*Korea, Republic of.* The Government, with the representatives of employers and workers, decided not to submit any amendments on Article 14 of the proposed Convention, since tripartite consensus was not reached. The workers' representative organization, the FKSU, supported the proposed Convention. The employers, represented by KODEFA and the NFFC, said that Article 14(1)(b) should be deleted, taking into account that the (excessively) specified rest time may impact on the cost of operations as well as on the livelihoods of those who are paid by the share of the catch.

*Latvia.* No changes should be made.

*Lebanon.* Seeks clarification as to whether sleeping hours and mealtimes are included in the hours of rest (ten hours).

*Lithuania.* No changes should be introduced.

*Mauritius.* No change is proposed to Article 14.

*Mexico.* It is not necessary to change Article 14.

*Netherlands.* See answer to Question 1.

DFPB: The fishing sector requires more flexibility than Article 14 offers. Derogation, through collective bargaining agreements (or similar arrangements where self-employed fishers are concerned) or appropriate legislation, is considered necessary even if the international community is willing to accept the development approach as proposed in the reply of the Netherlands to Question 1.

*New Zealand.* Inclusion of a "fatigue management plan" should be required to enable flexible work arrangements to take into account the intensity and fluctuations of fishing operations, in order to balance the need for flexibility with the need for regular

rest periods, and how this is managed on board. New Zealand supports this Article overall.

*NZCTU*: Agrees, but adds that recognition of the need for regular rest periods should be specified and details on how this is managed included in collective bargaining agreements.

*Panama*. This Article should conform to the provisions of the STCW-F.

*CMP*: Even when vessels operating in open waters are less than 24 metres in length, the provisions of the Articles must be observed.

*Papua New Guinea*. Supports the proposed provisions regarding minimum hours of rest for certain categories of vessels but suggests that they provide for fishers also to be ashore during rest periods.

*Philippines*. The minimum period of rest should be flexible, but be no less than eight hours in any 24-hour period.

*Poland*. No. The Law of 23 May on work on board seagoing merchant vessels, which applies also to fishing vessels, regulates this issue and is not more restrictive.

*Portugal*. No amendments to this Article are considered necessary.

*Qatar*. No need for additions or changes to be made to this Article, as its provisions are in conformity with what is in force in the State of Qatar concerning periods of rest granted to those working on board fishing vessels. The system of contracting with fishermen is based essentially on the share system, which is similar to self-employment, i.e. the fisherman is usually the one who has the right of disposal of his periods of rest.

*Romania*. If the vessel is 24 metres or more in length, it must conform to the conditions set out in Article 14. There is no possibility of a time-limited exception. The Article does not need to be changed.

*Saudi Arabia*. Yes. An amendment is required to this Article, especially paragraph 1(a), so that it would read: "For vessels of 12 metres and more in length, a minimum level shall be set for the vessel's crew so as to ensure the safety of navigation and to fix the number and qualifications required of fishers." The reason is that fishing vessels in the Kingdom of Saudi Arabia operate on an inboard engine, their voyages last between three and seven days, and the length of vessels varies between 12 metres and 20 metres. The number and qualifications of the crew of such vessels are therefore required to ensure the safety of navigation whilst vessels which are of a lesser length do not require specific qualifications for the crew because they do not need extensive experience to operate them.

*Seychelles*. The Article is flexible enough as it is. Seychelles is signatory to the STCW Convention, and will incorporate it as a regulation in the Shipping Act, which itself is in the final stage of government approval.

*Slovenia*. There is no need to change Article 14.

*South Africa*. No. Minimum manning levels linked with fatigue are recognized by the IMO as the largest contributing factor to maritime accidents. The hours of rest stated in the Article reflect the provisions of the STCW and the STCW-F. Agreements reached in South Africa through collective bargaining have been set at this level even after objections from employers.

*Spain.* For vessels of 24 metres in length and over, Article 14 sets out regulations which are basically the same as those in Standard A2.3 of the Maritime Labour Convention, 2006. Spain therefore has no objections. What would have a significant impact on safety aboard fishing boats and maritime navigability and safety, whilst guaranteeing compliance with the standard on rest, would be an obligation to post, at least in the case of fishing vessels of 45 metres in length and over, in an easily accessible place, a table with the shipboard working arrangements and containing the schedule of service at sea and service in port and the maximum hours of work or the minimum hours of rest required by the national legislation or collective bargaining agreements in force. Records should be maintained of fishers' daily hours of work or daily hours of rest to allow monitoring of compliance. This table should set out the precise procedure to be followed by each worker in case of an emergency. The minimum hours of rest in Article 14(1)(b) differ greatly from those established in Council Directive 1999/63/EC of 21 June 1999 concerning the Agreement on the organization of working time of seafarers concluded by the European Community Shipowners' Association (ECSA) and the Federation of Transport Workers' Unions in the European Union (FST). Moreover, Article 14(2) only envisages "temporary exceptions to the limits" established in Article 14(1)(b), which would render the Convention unacceptable to Spain, whose rest regime is that envisaged under the Community legal regime.

*FEOPE:* In Article 14(1)(a), the term "fishers" should be replaced with "seafarers" or, even better, "crew members responsible for the navigation and tendering of the engine". The aim here is to distinguish the above crew members from crew members responsible for the extraction activity of the vessel (crew members carrying out fishing, processing, packing and preserving activities), who have nothing to do with the "safe navigation of the vessel".

*Sri Lanka.* Provide at least six hours of rest every 24 hours.

*UFL and NFSM:* Article 14 of the proposed Convention concerns the manning and minimum hours of rest for certain categories of vessel. There should be a provision for hours of rest between two consecutive fishing trips. There should be a minimum of three days of rest after a ten-day fishing trip. Most of the time, the fishers tend to go to sea as early as possible for economic reasons and owing to pressure from the boat owner. This causes fatigue and other physical problems. This should be avoided through the provisions for rest in the Convention.

*CWC:* The minimum hours of rest requirements could be relaxed to reflect the intensity of fishing operations. However, it is essential for the purposes of limiting fatigue, and given the high number of accidents in the sector and the dangerous nature of the work, that fishers should have regular rest periods and adequate periods of sleep. As the differences in fishing operations make it difficult to establish a realistic international standard, flexibility should be provided through the collective bargaining agreement.

*Suriname.* No. Regular periods of rest are necessary in order to ensure safety and health.

*Sweden.* General regulations regarding manning and working hours on board fishing vessels are not to be recommended, as the operation of an individual fishing vessel is largely dependent on the weather, quota regulations, and so on. There is a risk that the proposed working hours provisions may be in conflict with rational fishing and processing of the catch. It is common to have fishing tours of a few days which at times may involve intensive fishing and which, when time for satisfactory handling of the catch is included, cannot comply with the time frame proposed. Consequently, as long as

maritime safety is not disregarded, there is no reason to limit or regulate working hours in the fishing sector in Sweden.

*MMOA:* There should be no possibility of allowing exemptions of any kind regarding hours of rest. A person suffering from fatigue acts in the same way as a person who is intoxicated by alcohol. The only time it is relevant to disregard minimum hours of rest is when performing work which is necessary for the immediate safety of the ship, persons on board or cargo or for the purpose of giving assistance to other ships or persons in distress at sea.

*SFR:* As regards maritime safety aspects, without entering into a deeper analysis of the matter, it seems questionable that the ILO – through the proposed Convention – is entering this area, which rightly belongs with the IMO. In the opinion of the SFR, these aspects should rightfully be regulated by the IMO and not the ILO. The SFR considers that self-employed persons should be entirely excluded from the scope of the proposed Convention. To specify in such an instrument that a self-employed person, such as a professional fisherman, in the light of the particular and special circumstances governing the occupation, should rest for a specified number of minutes at certain specific times, is nothing other than absurd. Knowledge of how fishing is carried on in practice seems to be entirely lacking. These statements also apply to employees. The proposed regulation is overzealous in its approach.

*Syrian Arab Republic.* In Article 14(2), the words “during the same voyage” should be added to the sentence.

*Thailand.* There is no objection to the minimum hours of rest in Article 14.

*Trinidad and Tobago.* The proposed Convention acknowledges the fact that fatigue is a major safety concern. Instituting minimum hours of rest is vital in this Convention. This Article offers sufficient flexibility and no change is suggested.

*United Kingdom.* There would be difficulty in applying the hours of work provisions of Article 14(1)(b) to fishing vessels on which the fishers are self-employed, although a member State could no doubt use the derogation in Article 3 to disapply the hours of rest provisions to the self-employed. The existing text also provides flexibility in Article 14(3), which allows the competent authority, after consultation, to establish alternative requirements provided that the same level of protection is assured. Further flexibility could also be provided by introducing scope for exceptions to be approved by the competent authority. Suggested text is as follows:

In accordance with the general principles of the protection of the health and safety of workers, and for objective or technical reasons or reasons concerning the organization of work, member States may allow exceptions, including the establishment of reference periods, to the limits laid down in this Article. Such exceptions shall, as far as possible, comply with the standards laid down but may take account of more frequent or longer leave periods or the granting of compensatory leave for the workers. These exceptions may be laid down by means of :

- (a) laws, regulations or administrative provisions provided there is consultation, where possible, with the representatives of the employers and workers concerned and efforts are made to encourage all relevant forms of social dialogue; or
- (b) collective agreements or agreements between the two sides of industry where appropriate.

This text is derived from Article 21, paragraph 5, of Directive 2003/88/EC concerning certain aspects of the organization of working time.

*Uruguay.* Shares the aims of Article 14, but account also needs to be taken of the fact that there may be national standards in place which establish a different regime concerning hours of work or rest for 24-hour periods or 77 hours for seven-day periods.

*Venezuela, Bolivarian Republic of.* Agrees with Article 14 as it stands, since the competent authority should establish a minimum level of manning for the safe navigation of the vessel, specifying the requisite number and qualifications of the fishers, in accordance with their role on board.

### *Overview of the replies to Question 3*

Governments replied by a ratio of about three to one that there was no need to change this Article. A few did not answer categorically whether or not changes were being sought.

Of those that did not want change or wanted the provisions to be more stringent, a few indicated that Article 14 should be made consistent with European regional requirements concerning working time on board fishing vessels, pointing out that the relevant EU Directive allows exceptions only if they are based on law, administrative acts or collective bargaining agreements. One provided a specific suggestion for wording for the scope of possible exceptions which would make the text consistent with the relevant EU legislation. Another suggested additional requirements for vessels of 45 metres or more in length, including the posting of a table with shipboard working arrangements containing the schedule of service at sea and in port, maximum hours of work and minimum periods of rest, and the recording of hours of work or rest. Another wanted the higher requirements under Article 14(1) to apply to vessels of 12 metres and over in length as opposed to those of 24 metres and over. Another indicated that self-employed fishers and those working on small vessels needed the protection of Article 14.

Of those that wanted changes to make the provisions more flexible or less stringent, several pointed to the difficulty of regulating hours of rest owing to the nature of fishing operations. Some indicated in general that the changes were needed in order to make the requirements less stringent or prescriptive. Some indicated that they wanted such flexibility in order to be able to take into account national standards or the nature of fishing work in their countries. Some wanted Article 14(1)(b), or at least its second sentence, moved from the Convention to the Recommendation. One drew attention to possible inconsistency with national standards. Some wanted specific exclusions, for example for small fishing vessels operating in inland waters. There were specific suggestions for changing the hours of rest figures, with one reply indicating that the minimum period of rest requirements should be flexible but not less than eight hours in any 24-hour period, and another suggesting that there should be six hours of rest every 24 hours. It was also suggested that it should be left to the State to enact provisions on the minimum level of manning for vessels of their own countries.

It was also observed that Article 14 should be consistent with the requirements of IMO instruments, notably the STCW-F, the STCW, or both.

Alternative methods, which the Office was unable to assess as being more or less flexible, were proposed, such as a requirement for a “fatigue management plan” for fishing vessels.

Clarification was also sought as to whether sleeping hours and mealtimes would be included in the hours of rest figures in Article 14(1)(b).

The employers' organizations that responded for the most part wanted Article 14(1)(b) moved to the Recommendation or wanted the entire Article deleted, citing the nature of fishing operations.

The workers' organizations generally indicated that differences in fishing operations make it difficult to establish a realistic international standard, and that any flexibility should be provided through collective bargaining agreements or through tripartite consultations. There were also suggestions for specific changes to the hours of rest provided for in the Article. Some expressed opposition to any proposal to delete or change Article 14 or to move it to the Recommendation.

#### *Discussion at the Tripartite Round Table*

Question 3 was discussed at the Round Table. By the end of that meeting, a common understanding was emerging on how the issue could be resolved. It was suggested that the agreement could draw upon relevant provisions in the Maritime Labour Convention, 2006 (in particular paragraph 14 of Standard A2.3), adjusted as necessary, and might to some extent mirror the Seafarers' Hours of Work and the Manning of Ships Convention, 1996 (No. 180).

#### *Office commentary*

The Office points out that paragraph 14 of Standard A2.3 of the Maritime Labour Convention, which was alluded to during the Round Table, reads as follows:

Nothing in this Standard shall be deemed to impair the right of the master of a ship to require a seafarer to perform any hours of work necessary for the immediate safety of the ship, persons on board or cargo, or for the purpose of giving assistance to other ships or persons in distress at sea. Accordingly, the master may suspend the schedule of hours of work or hours of rest and require a seafarer to perform any hours of work necessary until the normal situation has been restored. As soon as practicable after the normal situation has been restored, the master shall ensure that any seafarers who have performed work in a scheduled rest period are provided with an adequate period of rest.

While drawing attention to the above provision, the Office observes that the second sentence ("Accordingly, the master may suspend the schedule of hours of work or hours of rest and require a seafarer to perform any hours of work necessary until the normal situation has been restored.") is related to a requirement elsewhere in the MLC, in Standard A2.3, paragraph 10, for the posting of a table with shipboard working arrangements which contains, inter alia, such a "schedule" of service. There is no such provision in the proposed Convention concerning work in the fishing sector.

The Office also draws attention to Article 8, paragraph 3, of the proposed Convention, which addresses in general the issue of the flexibility given to the skipper to take action in the light of safety concerns, by providing that:

The skipper shall not be constrained by the fishing vessel owner from taking any decision which, in the professional judgement of the skipper, is necessary for the safety of the vessel and its safe navigation and safe operation, or the safety of the fishers on board.

The Office notes the reference to a "fatigue management plan" in the reply of New Zealand. Such a plan involves: setting out owner expectations; identifying hazards; managing hazards deemed to be significant (or as not significant); assigning responsibilities; training; and monitoring, reviewing and revising the plan. This includes discussions among the skipper, the crew and others, and documentation of the process.<sup>8</sup>

<sup>8</sup> Personal communication with Sharyn Forsyth, Manager, Safety Research and Analysis, Maritime New Zealand, 14 Dec. 2006.

As concerns the references in several replies to certain requirements of the STCW-F, the Office observes that Chapter IV, Watchkeeping, of the Annex to that Convention sets out, in Regulation 1, “Basic principles to be observed in keeping a navigational watch on board fishing vessels”. This regulation includes requirements for skippers to ensure that watchkeeping arrangements are adequate for maintaining a safe navigational watch. In paragraph 4.2, Fitness for duty, it provides that:

The watch system shall be such that the efficiency of watchkeeping personnel is not impaired by fatigue. Duties shall be so organized that the first watch at the commencement of the voyage and the subsequent relieving watches are sufficiently rested and otherwise fit for duty.

This STCW-F provision does not set out specific requirements as to the number of hours of rest to which a watchkeeper, or for that matter any fisher, is entitled for any given period.

Some replies also include references to the hours of rest requirements of the STCW, 1978, as amended in 1995. This Convention, which does not apply to fishing vessels, provides, inter alia, in section A-VIII/1, Fitness for duty, that:

- 1 All persons who are assigned duty as officer in charge of a watch or as a rating forming part of a watch shall be provided a minimum of 10 hours of rest in any 24-hour period.
- 2 The hours of rest may be divided into no more than two periods, one of which shall be at least 6 hours in length.
- 3 The requirements for rest periods laid down in paragraphs 1 and 2 need not be maintained in the case of an emergency or drill or in other overriding operational conditions.
- 4 Notwithstanding the provisions of paragraphs 1 and 2, the minimum period of ten hours may be reduced to not less than 6 consecutive hours provided that any such reduction shall not extend beyond two days and not less than 70 hours of rest are provided each seven day period.
- 5 Administrations shall require that watch schedules be posted where they are easily accessible.

As concerns the request in one of the replies seeking clarification as to whether sleeping hours and mealtimes are included in the minimum hours of rest set out in Article 14(1)(b), the Office observes that neither the proposed Convention nor the proposed Recommendation includes a definition of “hours of rest” or provides additional guidance on this matter. However, the Seafarers’ Hours of Work and the Manning of Ships Convention, 1996 (No. 180), provides, in Article 2(b), that:

the term ‘hours of work’ means time during which a seafarer is required to do work on account of the ship;

and in Article 2(c) that:

the term ‘hours of rest’ means time outside hours of work; this term does not include short breaks;

These definitions are reproduced in the Maritime Labour Convention, 2006, in Standard A2.3.

### Question 4

**Qu. 4** *Article 28 and Annex III of the proposed Convention concern fishing vessel accommodation.*

- (a) *Should changes be made to these provisions? If so, in respect of which provisions and why?*
- (b) *In particular, should the gt equivalency figures contained in paragraph 7 of Annex III be changed? If so, how and why?*
- (c) *Should the provisions concerning specific dimensions of accommodation spaces and their furnishings be changed? If so, how and why?*

#### *Replies*

*Algeria.* As concerns (b), the gross tonnage referred to in the Convention do not correspond to the lengths of fishing vessels. There is thus a need to revise the gt equivalency figures in relation to vessel length as proposed in Annex III of the Convention.

*Argentina.* With regard to the provisions contained in Annex III concerning the design of new, decked vessels, the Government of Argentina sees no impediment to maintaining Annex III in the Convention in its current wording. The Government would have preferred that these requirements also apply to smaller vessels (15 metres in length). However, under the agreements reached between the social partners, the proposed restrictions and equivalencies were accepted. There would be nothing to prevent individual authorities from providing legislative measures extending the requirements of Annex III to vessels of 15–24 metres in length, after consultation and when such measures were practical and appropriate. In any case, the principle of substantial equivalence creates additional flexibility for implementing the Convention.

*CATT:* (a): No changes. (b): Should not be changed. Not only were these figures changed substantially in respect of the International Labour Office's original proposal, but they were the result of an agreement between Employers and Workers, and were supported by a majority of governments. In any case, there are no technical or design constraints on fishing vessels preventing the construction of fishing vessels with improved fishers' accommodation, unless they are merely a means by which some countries can avoid implementing the majority of accommodation requirements on board fishing vessels. Under no circumstances should the gt of 200 be exceeded. (c): During their probable prolonged period of service, fishing vessels may operate in various countries and be manned by crew members of various nationalities. Therefore, any changes to the figures indicated should guarantee global standards, rather than reflecting regional conditions. The provisions contained in Annex III apply only to new vessels. Any changes should have valid grounds, based on adequate and comprehensive data.

*CAPeCA/CALaPA/CAPA:* Annex III to the proposed Convention should be moved to the Recommendation because it establishes additional requirements concerning accommodation on board fishing vessels of 24 metres in length and over or with a gt of 175, which is too prescriptive, and because it is provided for in other international instruments. If it is kept in the Convention, the wording in Article 28, "shall give full effect to", should be replaced by "shall, where possible and according to the situation of the member State, give effect to".

*Australia.* (a): Prefers that all the technical and prescriptive detail contained in Annex III be moved to the Recommendation. This approach would introduce greater

flexibility in the Convention and alleviate the concerns of many Members regarding the overly prescriptive nature of the text. Guidance could be found in the recently adopted Maritime Labour Convention, 2006 (MLC) regarding the level of detail appropriate to the Convention, as opposed to provisions that would be more appropriate to include in the proposed Recommendation. The MLC contains mandatory requirements in Part A of the Code, while the provisions of Part B of the Code are not mandatory and act as guidelines for implementation. Australia seeks clarification as to whether Annex III, paragraph 44, refers to the provision of a desk per sleeping room or per person. (b): We are concerned about the conversion between length and the gt outlined in paragraph 7 of Annex III, as there is no single fixed relationship between the length of a vessel and its gt. If the inclusion of a conversion factor in Annex III is considered necessary, it should include a range of equivalent values according to the design of the vessel. Alternatively, the conversion factors in paragraph 7 could be deleted altogether to avoid the risk of mandating rigid, inappropriate equivalencies. (c): We note the introduction of the term “substantially equivalent” in the new paragraph in Article 28. Despite the inclusion of this phrase, the provisions in several paragraphs (including the prescriptive text in paragraphs 12, 34–38 and 40, 42 and 44 of Annex III relating to headroom height, floor area and sleeping accommodation) are quite detailed and may not take into account the particular national conditions of some countries; and consideration could be given to their modification. Australia supports the insertion of the words “appropriate to national circumstances” in Article 28, paragraph 2, as a flexibility device to encourage different member States, operating in the context of different social, economic and cultural systems, to ratify the Convention. Consequently, the paragraph in question would read:

A Member which is not in a position to implement the provisions of Annex III may, after consultation, adopt provisions in its laws and regulations or other measures which are substantially equivalent to the provisions set out in Annex III and appropriate to national circumstances, with the exception of provisions related to Article 27.

*Austria.* These provisions do not concern Austria, but there should be further discussion about the wishes of other Members concerning possible exemptions, in the interests of making the Convention more widely acceptable.

*Azerbaijan.* The gt of the vessel should be taken into account when crew accommodation is planned, in accordance with Convention No. 126.

*Belgium.* (a): No. There is no need to make changes to these provisions, some of which were already concessions to the requirements of certain Asian countries. (b): No. (c): No. There is no need to change the provisions concerning accommodation spaces and their furnishings.

*Benin.* No to points (a)–(c).

*Brazil.* (a): Yes. Article 28 should be maintained as proposed in the text, but Annex III should be adapted to include the metric figures and the numbers of persons in sleeping rooms contained in Article 10 of Convention No. 126, the quantity and proportions of sanitary facilities contained in Article 12 of that Convention and the provisions on sickbays contained in that Convention. It would appear that Convention No. 126 was only ratified by 22 member States, many less than the expected number for a consolidated Convention on work in the fishing sector, and it is necessary to take into account that, despite the fact that the measures concerning furnishings and accommodation are not ideal for Anglo-Saxon and North European fishers, who are taller, they are adequate for most Asian countries and developing countries where people are of a different build. As concerns part (b) of the question, the issue should be discussed again prior to the next International Labour Conference, perhaps at a regional

meeting, with the representatives of the Asian countries, which have a different fishing vessel design tradition, and with some naval construction experts. The outcome could be put forward as the basis for eventual amendments to the text during the 96th Session of the Conference. In order for the new Convention to be widely ratified, efforts must be made to increase the protection of a greater number of fishers, putting forward minimum standards in order to get a greater number of countries to ratify the Convention, while trusting that the more developed countries will have on board living and working conditions vastly superior to the minimum standards of any Convention, and to encourage these developments.

CNC and CNT: Remove the condition “as practicable” from paragraph 45 of Annex III. Completely remove paragraph 78, “Variations”. The competent authorities should take into account international guidelines regarding accommodation, food, health and hygiene relating to those persons working or living on board vessels.

*Canada.* (a): Article 28 allows for the implementation of Annex III by the adoption of laws, regulations or other measures, after consultation, that are substantially equivalent to those contained in Annex III, with the exception of provisions related to Article 27. One jurisdiction in Canada has advised that the type of cost recovery provided for in Article 27(c) is contrary to their employment standards legislation. Annex III is based on a 40-year old Convention that has not been widely ratified. It would be more appropriate to find guidance in the recently adopted MLC regarding the level of detail appropriate to include in the proposed Convention and clauses that would be more appropriate to include in the proposed Recommendation. For example, the MLC provides for appropriately situated and furnished laundry facilities. Additional provisions related to laundry facilities are contained in the guidelines. This approach could also be used in considering appropriate provisions for inclusion in the Convention and the Recommendation regarding mess rooms. Canada continues to support the position expressed by the Government group at the 2004 meeting of experts regarding both of these issues. With respect to lighting, there is too much detail in the provision as drafted. Again, guidance could be sought from the wording of the MLC. The specific berth dimensions prescribed in the Convention should be moved to the Recommendation, as paragraph 41 under “Other” adequately addresses this issue by indicating that “The members of the crew shall be provided with individual berths of appropriate dimensions.” (b): Canada could support the gt equivalency figures listed in paragraph 7 of Annex III as they were the result of a compromise reached by the Conference Committee at the 2005 session of the Conference. However, if this issue is revisited it would look to reinstate the gt equivalency figures proposed by the working party at the 2005 session of the Conference. In Canada, a large fishing vessel is 24.4 metres or more in length and is considered equivalent to 150 tons.

CLC: (a): Article 28 already permits some flexibility through substantial equivalence and Annex III only applies to new, decked vessels. It should be recalled that the detailed provisions are derived from an existing Convention. (b): The gt equivalence was the result of an agreement by the Employers and the Workers, which found favour with a majority of governments. Any change should be based on the provision of detailed information which would clearly show that the figure of 175 gt does not reflect equivalency throughout the world fishing fleet and is not merely a way for some countries to exclude the majority of their fleet from the fishing vessel accommodation provisions. It should, in any event, not exceed 200 gt. (c): Fishing vessels may, during their long period of service, fish in different countries and be crewed by different nationalities. Therefore, any amendment to the existing figures should provide a global standard and not reflect regional differences. It should also be recalled that the

provisions in Annex III only apply to new vessels. Changes should only be made on the basis of a compelling reason supported by the provision of comprehensive data.

*China.* No modifications needed. Reasoning: Specific exemptions to some vessels are provided for in paragraph 1 of Annex III.

*Colombia.* ANDI: Consideration should be given to moving Annex III of the Convention to the Recommendation because it sets out additional requirements concerning accommodation on board vessels of 24 metres or more in length or 175 gt. It is too prescriptive.

*Costa Rica.* Article 28 and Annex III of the Convention do not require any changes, except for paragraph 7 of Annex III.

*Croatia.* Article 28 and Annex III are acceptable.

Croatian Chamber of Economy: In some parts, Annex III stipulates rather strict accommodation requirements. These should be less stringent and allow for more flexibility, regardless of the flexibility provided in Article 3. The gt equivalency figures seem to be inappropriate and should perhaps be increased.

*Cuba.* We do not consider any changes to these three clauses to be necessary.

*Denmark.* There is no need for further changes in the regulations concerning accommodation in Article 28 and in Annex III.

3F: Generally agrees.

*Egypt.* The provisions of this Article should be applied to vessels whose construction begins after a period determined by the competent authority from the date of entry into force of the provisions of this Convention. The competent authority shall determine accommodation, facilities and ventilation conditions, in accordance with the State and in conformity with what is decided by the competent authority (fishing vessel length, area of operation, medical equipment, length of the voyage).

GTUWA: Accepts existing text.

*Finland.* (a): Yes. The provisions are far too detailed, for example “the furniture should be smooth, hard material not liable to warp or corrode or to harbour vermin”. (b): No. (c): No. However, it might be advisable to give the minimum dimensions of accommodation.

SAK: (a): Article 28 provides flexibility through substantial equivalency and Annex III only applies to new, decked vessels. (b): The gt equivalency was the result of an agreement by the Employers and the Workers. Any change should be based on the provision of detailed information which clearly shows that the figure of 175 gt does not reflect equivalency throughout the world fishing fleet and is not merely a way for some countries to exclude the majority of their fleet from the fishing vessel accommodation provisions. It should in any event not exceed 200 gt. (c): Fishing vessels may, during their long period of service, fish in different countries and be crewed by different nationalities. Therefore, any amendment to the existing figures should provide a global standard and not reflect regional differences. It should also be recalled that the provisions in Annex III only apply to new vessels. Changes should only be made on the basis of a compelling reason, supported by the provision of comprehensive data.

SAKL: More stringent standards might prove too costly, as structural changes to old boats are usually very expensive.

*France.* (a): The provisions of Article 28 were substantially amended during the 93rd Session of the Conference. In the version of the text proposed by the Committee on the Fishing Sector, Article 28 of the proposed Convention initially consisted of a single paragraph that read as follows: “The laws, regulations or other measures to be adopted by the Member in accordance with Articles 25–27 shall give full effect to Annex III concerning fishing vessel accommodation. This Annex may be amended in the manner provided for in Article 43.” Certain provisions of Annex III of the proposed text were considered to be too prescriptive, and consequently a second paragraph was added to Article 28 with the aim of introducing the principle of substantial equivalence: “A Member which is not in a position to implement the provisions of Annex III may, after consultation, adopt provisions in its laws and regulations or other measures which are substantially equivalent to the provisions set out in Annex III, with the exception of provisions related to Article 27.” Alongside this element of flexibility concerning the application of Annex III, two other elements of a similar nature can be found in the proposed Convention. First of all, in order to take into account “the interests of fishers having differing and distinctive religious and social practices” under paragraph 78 of Annex III, derogations from the latter may be permitted “on condition that such derogations do not result in overall conditions less favourable than those which would result from the application of this Annex.” Member States may also decide to use gt as the basis for measurement in place of length with regard to the application of certain provisions of Annex III. In this regard, although it would have been desirable to maintain a single basis of measurement in the interests of a more coherent text, the gt–length equivalency makes it possible to take into account regional specificities regarding the design and construction of vessels. In general, there is therefore no need to introduce additional flexibility in respect of Article 28 and Annex III of the proposed Convention. The application of the principle of equivalence introduces sufficient flexibility to permit the application in practice of the provisions of Annex III.

(b): The method of determining the gt of vessels does not under any circumstances produce mathematical equivalence (an automatic relationship between length and gt). Regardless of the figures maintained, the use of gt as the basis for measurement should not in any case allow a member State to exclude its entire fishing fleet from the scope of the Convention. If the new text is to be a success, there needs to be agreement on gt equivalency. For all that, the equivalency figures currently contained in paragraph 7 of Annex III are not realistic. In order to arrive at a compromise on this widely debated question, it is vital to agree on the implications of the use of any given set of equivalency figures.

(c): The flexibility already contained in the body of the Convention makes it possible to shape the application of the provisions of Annex III according to the particular conditions existing in each State. The provisions regarding the specific dimensions of accommodation spaces and their furnishings should therefore be maintained.

*Germany.* The national provisions partly exceed ILO requirements. There is no need for amendments.

*Ghana.* (a): Should be retained. (b): The gt equivalency figures contained in paragraph 7 of Annex III should not be changed. (c): Proposed provisions concerning specific dimensions of accommodation spaces should be retained.

*Greece.* Has ratified Convention No. 126 and is bound by its respective requirements concerning the conditions of crew accommodation.

*Honduras.* COHEP: (a): The Honduran fishing fleet is old in terms of years of service, and it would not be easy to make changes to comply with the provisions of Annex III, nor would it be possible to enact legislation to that effect. This might be possible, not for the current fleet but for any new vessels entering the national fishing fleet. However, this could apply to vessels sailing outside the economic exclusion zone, to which these provisions should be applicable. (c): In the tropics, where Honduras is situated, air conditioning is difficult because it means that the areas concerned must be closed. Furnishings for reading and writing in crew quarters are relatively unimportant because of the high rates of illiteracy among our fishers. These comments apply to small-scale and subsistence fishers; larger vessels must obviously be fitted out in this way. Therefore, the general provisions should be made more flexible.

*Iceland.* With respect to Annex III, it is proposed that the statement of objective within the Convention be maintained but the more specific standards be moved to a Recommendation.

The gt compared to the length of the vessel should be adjusted to the shipbuilding tradition in different regions of the world.

*India.* HMS: (c): Annex III is only applicable to new vessels and therefore can be effective only as and when new vessels are constructed.

*Iraq.* Fishing operations in Iraq are not so large as to need working time regulation or training. No suggestions.

*Italy.* No.

FEDERPESCA and FAI-CISL: The general system provided for in Annex III does not appear to reflect the situation on the majority of Italian fishing vessels. As concerns (a), the text should be changed to identify the fishing vessels subject to the obligation. At present it is unclear.

The principle underlying the standard should be that the provisions contained in Annex III regarding “accommodation” do not apply to fishing vessels involved in coastal fishing (or those whose fishing range is not greater than 36 hours), without prejudice to a pragmatic position being adopted in the event of force majeure.

*Japan.* (a): As the number of States that have ratified Convention No. 126 remains small, it is difficult to say that it is working well as an international standard to improve the working conditions for fishers. Therefore, the said Convention should be modified so that more States can accept it more easily and actual improvement of the working conditions for fishers will be realized universally. To this end, it is indispensable to: (1) give due consideration to the differences among States in regulations for fishing operations and vessels; and (2) enable progressive improvement in the conditions of work in accordance with the degree of development of the fishing industry and for improvement of the business environment of the fishing operations in the respective State. In the case of Japan, it is essential to introduce the following modifications in (b) and (c) below.

(b): Setting different standards on crew accommodation by vessel size would be more influenced by vessel capacity (i.e. (gt)) rather than by length. As a result, it would obviously be more rational to define the vessel size categories by gt rather than by length. Japan, therefore, defines the vessel size by tonnage for regulations. In the meantime, we understand that most European countries define the vessel size by length. Consequently, Japan has developed more streamlined-shape vessels for faster speed by reducing water resistance (other Asian countries are likely to follow the same idea) while

the design of the European vessels is more chunky in shape. It is thus impossible to define the vessel size using one unit in order to achieve fair application of the Convention. It is therefore essential to introduce a conversion between length and gt, based on relevant data and taking due account of the fair application of the Convention. For fair application of the standards, it is necessary to establish a vessel length which corresponds to each gt-based formula. According to the graph showing the length–gt ratio of European and Japanese vessels (see Appendix II of the Round Table document in the appendix to this report), the conversions have to be defined as follows:

15 m = 75 gt; 24 m = 300 gt; and 45 m = 1,150 gt.

The conversion between gt and length is currently applied to limited provisions in Annex III, namely, those on headroom, floor area per person of sleeping rooms, number of persons per sleeping room, size of berths, numbers of tubs/showers, toilets and washbasins, and sickbays. However, the Convention has to be applied to all the provisions stipulated in Annex III because, as mentioned above, vessel size categories are more appropriately defined by gt rather than by length of the vessel. In any case, it is extremely unfair if a fishing vessel of 23 metres and 300 gt is not subject to the standards while a vessel of 25 metres and 200 gt is. The Government of Japan is not in a position to accept such an unfair Convention, taking our accountability to the fishing operators into consideration. The length–gt conversion mentioned above needs to cover Annex III as a whole, and is an essential prerequisite for Japan to support and adopt the Convention.

(c): As for the proposed Convention, it would be necessary to work out standards for respective subjects that would be flexible enough for member States to accept. The following figures are Japan's acceptable limits for the specific standards. Standards exceeding our acceptable limits have to be "recommendations" instead of mandatory requirements.

Number of persons per sleeping room: Six, or four for vessels of 24 metres in length and over.

Headroom: Average height of nations, plus 15 cm for vessels of 24 metres in length and over.

Floor area per person of sleeping rooms: 1 square metres for vessels of 24 metres in length and over (can be smaller after consultation for those of 45 metres in length or less).

Berth size: Average height of individuals for the country in question plus 15 cm x average breadth of shoulders plus 15 cm (for vessels of 24 metres in length and over).

Tubs or showers: One tub or shower for every eight persons for vessels of 24 metres in length and over.

Toilets: One toilet for every eight persons for vessels of 24 metres in length and over.

Washbasins: One washbasin for every six persons for vessels of 24 metres in length and over.

Japan is reviewing the other standards with a view to accommodating them, provided that our above proposal is accepted.

JSU: Agrees.

*Korea, Republic of.* (b): The Korean Government will not submit any amendments to paragraph 7 of Annex III of the proposed Convention owing to the failure to reach an agreement on this question between the representatives of workers and employers. The FKSU, however, insists on 24 m = 175 gt (the same as the proposed Convention), while the employers' representative organization, the NFCC, calls for

24 m = 280 gt. (c): Paragraph 56 of Annex III “... for every four persons or fewer” should be changed as follows: “56. On vessels of 24 metres in length and over, for all ... for every six persons or fewer” because the MLC provides for six persons in a room even though merchant vessels have better accommodation compared with fishing vessels.

*Latvia.* (a), (b) and (c): No changes should be made.

*Lebanon.* No observations.

*Lithuania.* (a), (b) and (c): Provisions of the proposed Convention are satisfactory.

*Mauritius.* (a), (b) and (c): No changes are proposed.

*Mexico.* (a): Section 204 (Parts I and II) of the Federal Labour Act stipulates that the employer is required to provide comfortable and clean crew quarters on board and that food must be wholesome, plentiful and nutritious. It is not necessary to change Article 28 or Annex III.

*Netherlands.* Urges reconsideration of the status of Annex III. The mandatory and comprehensive character of this Annex, which forms an integral part of the Convention, has prevented a considerable number of countries from voting in favour of the Convention. Because of that, the Netherlands pleads for a more concise and less coercive set of requirements regarding fishing vessel accommodation. Supports the transfer of Annex III to the Recommendation.

*New Zealand.* The fact that Annex III applies only to new, decked fishing vessels is a practical approach which New Zealand supports. The fact that a competent authority has the discretion to apply these restrictions more broadly is also supported by New Zealand. (a): Article 28 gives sufficient flexibility. (b): No changes should be made to the gt equivalency figures contained in paragraph 7 of Annex III as they are based on an agreement by the workers and employers which found favour with most governments at the previous discussions on this subject in 2005. (c): Paragraph 39 (which refers to the number of persons per sleeping room) is not necessary, as paragraph 38 states that a separate sleeping room or sleeping rooms must be provided for officers, wherever practicable. As a general comment, the provisions for accommodation should not be overly prescriptive, particularly as the perception that the proposed Convention was too prescriptive was one reason for the Employers’ abstention in 2005.

NZCTU: (a) and (b): Agrees, and observes that changes to standards should only be made in response to improved global standard, and not for minor regional differences.

*Panama.* No.

CMP: Article 28, Annex III: Agrees.

*Papua New Guinea.* (a): No changes to be made. (b): Agrees to the specified gt equivalency figures as contained in paragraph 7 of Annex III.

(c): Agrees with the current provisions regarding the specific dimensions of accommodation spaces and furnishings as this will allow for convenient and reasonable conditions for fishers on board the vessels.

*Philippines.* In relation to Article 26, add a new subparagraph (h) to read “safety procedures in handling fuel in running the fishing vessel, as well as adequate waste management”. Further changes may need to be made in the Annex to take into account vessels under 24 metres in length.

*Poland.* There is no need to modify the provisions.

*Portugal.* None of these provisions should be amended, since the current text is the result of agreements reached with difficulty by a majority of governments and social partners at previous sessions of the International Labour Conference.

*Qatar.* (a): Suggests introducing changes to the provisions of Article 27(c) linked to Article 28, to read as follows: “The vessel owner provides the fisher with food and drinking water according to what is agreed upon between the two parties to the fisher’s work agreement.” (b): Suggests not changing the gt equivalency figures, and considers that using the total length of vessels as a basis is the best solution. (c): Yes. The provisions concerning specific dimensions of accommodation spaces and their furnishings should be changed, as some developing States cannot provide some of these requirements and equipment (room insulation).

*Romania.* (a): The provisions provide for a general guideline. The provisions of paragraph 7 of Annex III, taken together with those of paragraph 2, allow conformity with specific situations. (b): Yes. Where the vessels in question are generally less than 24 metres in length. However, in that case, they must conform to Article 28 of the Convention. (c): The only possible change of this type would be with regard to the dimension of accommodation spaces. For Europeans, with an average height of 1.7 metres, a room should have a certain height and dimensions. For Asians, on the other hand, with an average height of 1.5 metres, the dimensions might be reduced. All this can be done through consultations between the regulatory authorities and organizations of employers and workers.

*Saudi Arabia.* No changes needed.

*Seychelles.* (a): No changes should be made because these provisions are reasonably flexible. (b): The gt equivalency figures contained in paragraph 7 of Annex III are acceptable for the time being and thus should not be changed. (c): These provisions need not be changed.

*Slovenia.* No changes needed.

*South Africa.* (a): No. Article 28 gives the competent authority sufficient latitude to adopt provisions that are substantially equivalent and this should allow Asian countries the necessary flexibility to ratify the Convention. (b): While the majority of non-Asian governments accept the length determination as the criteria, Asian governments would have to accept the equivalents and any motivation should be considered. The length–gt equivalents seem reasonable from a ship design perspective and also accommodate the long, narrow-beamed vessels typical of Asia. (c): Guidance can be taken from Part B of the FAO/ILO/IMO Code of Safety for Fishermen and Fishing Vessels. The headroom requirement is identical to the Code. The floor area of sleeping rooms in the Code for vessels of 24 m but < 45 m is 1 m<sup>2</sup>, however the proposed Convention requires 1.5 m<sup>2</sup>. For vessels of > 45 m, the Code requires 1.5 m<sup>2</sup> and the proposed Convention 2 m<sup>2</sup>. If this is an issue for certain governments, the requirements of the Convention could be reduced to those of the Code. The furnishings required in both sleeping and recreational facilities are an absolute basic minimum and no further reduction should be permitted.

*Spain.* (a): No changes should be made to the provisions contained in the proposed Convention concerning accommodation. (b): Articles 25–28 and Annex III were discussed by a working party set up precisely for this purpose. The result of its deliberations was a recommended text that was treated as a global amendment. Paragraph 7 of Annex III was adopted by the Committee on the Fishing Sector, in June 2005, in the form agreed on by the working party. (c): The entirety of the provisions

referred to and those contained in Annex III concerning accommodation (sleeping rooms, floor area, persons per sleeping room) were discussed in depth by the Committee and adopted by a large majority.

FEOPE: (a): There is no need to make changes to these provisions. (b): It is not necessary to change the figures concerning the specific parameters regarding length and gt, in order that they may be submitted for approval by the authorities. In Spain, as in most States in our region, all fishing vessels, regardless of their dimensions and displacement, are subject to official inspections, with regard to both construction and structural modifications. The purpose of these inspections is to ensure that the vessels comply with strict safety regulations for maritime traffic, in order to protect both the environment and the health of the crew members. There also exists a series of measures of a social nature which require that crew accommodation be maintained in an appropriate condition. Both types of measure interact to such an extent that the latter are taken into account when inspections concerning the former are carried out. Any loophole in the Convention that establishes “softer measures” will give our fishing competitors an advantage over us in terms of the development of their activities. Because of the nature of fishing activities, the work is especially arduous, resulting in a high rate of occupational accidents. Improved accommodation leads to better rest and consequently renders the work less arduous. A lower accident rate means lower production costs. (c): No.

*Sri Lanka.* (a), (b) and (c): No.

UFL and NFSM: (a): Annex III, paragraph 4, the provisions should be applied to fishing vessels below 24 metres in length, which stay at sea more than three days, irrespective of length and gt. The text “the requirements for vessels of 24 metres in length and over may be applied to vessels between 15 and 24 metres in length where the competent authority determines, after consultation, that this is reasonable and practicable” should be changed to read “Any fishing vessel operating more than three days at sea should be subject to the same requirements as vessels of 24 metres in length and over.” (b): In Annex III, paragraph 7, takes into account the gt of the fishing vessel but does not take into account the duration of fishing. A new provision should be added as follows: “Irrespective of the gross tonnage of the fishing vessel, accommodation should be provided for on any fishing vessel operating more than three days at sea or in any other body of water.” There are millions of fishers, more than 50,000 fishers in Sri Lanka alone work on board fishing vessels below 24 metres in length for more than three days. There should be a provision to cover all these fishers for their welfare in the developing countries.

CWC: (a): Article 28 already permits some flexibility through substantial equivalence and Annex III only applies to new, decked vessels. It should also be recalled that the detailed provisions are derived from an existing Convention.

(b): The gt equivalency was the result of an agreement between the Employers and the Workers, which found favour with a majority of governments. Any change should be based on the provision of detailed information which would clearly show that the figure of 175 gt does not reflect equivalency throughout the world fishing fleet and is not merely a way for some countries to exclude the majority of their fleet from the fishing vessel accommodation provisions. It should, in any event, not exceed 200 gt. (c): Fishing vessels may, during their long period of service, fish in different countries and be crewed by different nationalities. Therefore, any amendment to the existing figures should provide a global standard and not reflect regional differences. It should also be recalled

that the provisions in Annex III only apply to new vessels. Changes should only be made on the basis of a compelling reason supported by the provision of comprehensive data.

*Suriname.* The provisions in Article 26 (hot and cold water, sleeping rooms, etc.) are not applicable to the many small fishing vessels operating in the country.

*Sweden.* Today there are no provisions covering Swedish fishing vessel accommodation. Should any provisions be introduced, they can be developed on the basis of the provisions applicable to the merchant fleet.

*MMOA:* The Convention should have as wide a scope as possible in order to create decent working and living conditions for as many fishers as possible. The provisions of the Convention should be clear and leave as little discretion as possible to a member State to decide.

*SFR:* The regulatory zeal is marked in the proposed Convention, as illustrated in the proposed type of rules specified in Articles 25–27. For example, what Article 27 states “that national rules must be introduced stipulating that food served on board a fishing vessel must be sufficient from the perspective of nutrition as well as of quantity” is nothing more than arrant nonsense. Such regulatory zeal creates fictitious legal problems, the solution of which will in no way benefit the professional fishing sector. Problems exist and solutions should be found in the best interests of the fishing sector, but creating further problems, which will be the case if the proposed Convention text is adopted, is completely unnecessary. The professional fishing sector already suffers from a burdensome and unfortunately, in many respects, unnecessary, even contradictory, regulatory code. Nationally it seems that insight has been gained and that the mass of rules that govern the fishing sector has reached its critical point, and that what should be done from now on, instead of introducing unnecessary regulations, is to simplify, clarify and eliminate contradictory and unnecessary rules. The proposed Convention text seems, unfortunately, to be very much of this ilk. SFR hopes – after composed consideration – that the proposed Convention text will again be rejected.

*Syrian Arab Republic.* There is no reason for modifications or other changes to provisions concerning ventilation, heating, air conditioning, lighting, noise and hygiene. More flexibility should be added in respect of smaller vessels less than 16 metres in length.

*Trinidad and Tobago.* (a): Article 28(1) should be rephrased to read as follows: “The laws ... in accordance with Articles 25 to 27 shall give effect to Annex III ...”. It was suggested that the rephrasing of the sentence would allow for flexibility for Asian countries that are unable to conform with the specific requirements. (b): No changes are suggested to paragraph 7 of Annex III. (c): Consideration has been given to the fishers’ health, safety and comfort in this section and no change is suggested. Observation on Annex III, paragraph 16: rodents should be included in this section.

*Ukraine.* The length of a fishing vessel’s voyage may vary from a few hours to several months. For fishers, who must eat and sleep at sea, the issue is one not only of comfort, but also of health. Despite the progress made in providing accommodation which is reasonably spacious, clean, properly ventilated, and insulated from loud noises and vibrations, there are still a huge number of vessels with uncomfortable and unhealthy working and living conditions. The Accommodation of Crews (Fishermen) Convention, 1966 (No. 126), sets standards for planning accommodation and overseeing its construction, requirements concerning crew accommodation, and also procedures for applying these requirements to existing and new, large fishing vessels. However, national legislation and international legal and regulatory acts on crew accommodation

do not apply to small fishing vessels. On the one hand, small vessels can spend far less time at sea in comparison with large vessels, which makes requirements concerning crew accommodation less important than for large vessels; on the other hand, small vessels often need to spend more time at sea and fish at greater distances from the shore, for various economic reasons. There is therefore a need to include compulsory or recommended standards in international instruments in the form of guiding principles for these vessels. In many countries, such principles already apply to vessels of 15 metres or more in length.

*United Kingdom.* (a): It has to be recognized that the provisions of Annex III were seen as a significant obstacle to ratification for a number of member States. Accordingly, it is suggested that Article 28 be deleted and the provisions of Annex III transferred to a revised Recommendation. If this suggestion is adopted, there would be consequential amendments, for example in Article 45. (b): The problem of gt equivalency figures would be resolved if Annex III were to be made part of the Recommendation, since this would allow member States to regard the figures as a guideline only. (c): As above, the difficulty with specific dimensions of accommodation spaces and furnishings would be resolved by making Annex III part of the Recommendation.

*Uruguay.* No changes are necessary.

*Venezuela, Bolivarian Republic of.* (a): None. Paragraphs on noise and vibration should be raised to the level of an Article, given the nature of the economic activity and existing risks, and in view of the impact of noise and vibration on occupational health. (b): No, given that the above limits and equivalency figures were set with a view to improving the applicability of the Convention and covering the greatest possible number of fishing vessels. In addition, these equivalency figures were the result of considerable work on the part of the committees and the working party to obtain a majority consensus.

#### *Overview of the replies to Question 4*

##### *Part (a) of the question*

Governments replied, as concerns part (a) of the question, by a ratio of about two to one that no changes were needed either to Article 28 or to Annex III. Several replies were not categorical as to whether or not the Article or the Annex should be changed.

Of the governments that wanted no change to the text, some pointed to the importance of accommodation to fishers, bearing in mind the nature of fishing operations. One indicated that its national requirements already exceeded those in the Convention. Another said that requirements were reasonably flexible. Another pointed to the provision in Article 28 concerning substantial equivalence, which should allow the necessary flexibility. One suggested that no changes were needed owing to the provisions of paragraph 1 of Annex III. Some noted that concessions had already been made at the 93rd Session of the Conference or noted the agreement between the Employers and the Workers on the accommodation issue in the Committee on the Fishing Sector at the 93rd Session of the Conference.

A few governments wanted more stringent accommodation provisions. One noted in general the importance of relating crew accommodation to the time the vessel is at sea rather than to vessel size. Another pointed to the importance of provisions on accommodation for all sizes of vessels. One said it would have preferred the proposed provisions for vessels of 24 metres and length or more to apply to vessels of 15 metres in length, noting that this was the approach taken in some countries. One indicated that the Paragraphs on noise and vibration in the Recommendation should be raised to level of an Article.

A few governments indicated that while they did not specifically seek changes to the accommodation provisions, they were open to consideration of how those provisions could be changed to encourage wider ratification of the Convention.

Of those governments that wanted changes to the text, many noted that there was a need for more flexibility or less detail. Many pointed to the need to take into account the differences among fishing vessels in different regions and States, as well as the needs of developing countries. Some made specific suggestions for changes, such as amendment of the language in Article 28 that linked Annex III to the Convention. There were also calls to move Annex III to the Recommendation, or more generally to amend the text so that the accommodation details were left to the competent authority after tripartite consultations. There was a suggestion that the Convention should follow the approach taken in the accommodation provisions of the MLC, where certain details that had been included in earlier Conventions were found, not in the mandatory Standards, but in the non-mandatory guidelines of that instrument. There was a suggestion that, while Article 28 should not be changed, Annex III should be adapted to reflect the figures and numbers concerning accommodation found in Convention No. 126. One government also called for changes to Article 27.

The workers' representative organizations generally indicated that Article 28 already permitted flexibility through substantial equivalence and Annex III was applicable only to new, decked vessels. They pointed out that the detailed provisions were derived from an existing Convention.

Some employers replied that Annex III was too prescriptive and that it should be moved to the Recommendation. If it was to be kept in the Convention, they wanted the wording in Article 28 to be changed to provide greater flexibility regarding the implementation of the provisions in the Annex.

*Part (b) of the question*

One in three governments replied that they wanted change to the gt equivalency figures contained in paragraph 7 of Annex III. Several replies were not categorical.

Of those that did not want change, a few governments said that no changes were needed because the provisions in paragraph 7 of Annex III were based on the agreement by the Workers and the Employers which "found favour with" most governments at the previous discussions in 2005. Some governments simply agreed with the figures or said they were reasonable.

Of those that expressed the need for change, the difficulty of establishing direct equivalency figures was noted, and a few governments offered specific suggestions as to what the changes should be, including the possibility of providing a range of figures. It was noted that vessel capacity, rather than length, might better govern the size of accommodation that could be provided. Changes that were suggested were aimed to reflect regional differences in fishing vessel design and construction. The importance of regional consultations before the Conference was raised. It was suggested that paragraph 7 of Annex III might be moved to the Recommendation either on its own or with the entire Annex.

In some cases, governments did not themselves seek changes but were willing to consider making the Convention more flexible in the interest of achieving wide ratification.

The workers' organizations generally noted that the gt equivalence figures were the result of an agreement by the Employers and the Workers at the 93rd Session of the

Conference, and that these figures had found favour with a majority of governments. They said that any change should be based on the provision of detailed information showing clearly that the figure of 175 gt did not reflect the equivalency throughout the world fishing fleet and was a way for some countries to exclude the majority of their fleet from the fishing vessel accommodation provisions. Several said no changes should be made. Others felt that if changes were made, the current 175 gt should not be increased to over 200 gt.

Employers' organizations for the most part expressed general concern over the figures. It was suggested that specific length–tonnage equivalency figures should take into account regional differences.

*Part (c) of the question*

Governments replied in a ratio of about two to one that there should be no changes to the specific dimensions of accommodation spaces and their furnishings. Several replies were not categorical.

Where governments wanted no change, the reasons, where given, were often the same as those given in the replies to part (a) of the question: the importance of accommodation to fishers; national requirements already exceed those in the proposed Convention; flexibility is already provided by virtue of the substantial equivalence provision in Article 28 or through paragraph 1 of Annex III. Also, some referred to the agreement reached at one point between the Employers and the Workers at the 93rd Session of the Conference.

Of those governments that did want change, several expressed a general need for more flexibility or less detail, in some cases noting that developing countries might not be able to reach the standard envisaged. Several indicated that the provisions of Annex III should be moved to the Recommendation. Further flexibility could also be provided following tripartite consultations at the national level. Some indicated that guidance might be taken from the accommodation provisions in the Maritime Labour Convention, 2006. Some provided very specific suggestions for changes to the provisions of the annex. There were calls for more flexibility for smaller vessels (for example, less than 15 metres in length). There were suggestions that certain provisions of Annex III (those involving specific dimensions for spaces or berths or numbers of toilets, showers and tubs to be provided) should be made consistent with Convention No. 126. It was also suggested that the annex could be made consistent with the provisions of the FAO/ILO/IMO Code of Safety for Fishermen and Fishing Vessels.

Several workers' organizations replied that fishing vessels might, during their long period of service, fish in different countries and be crewed by different nationalities, and that any amendment to the existing figures should therefore provide a global standard and not reflect regional differences. They also recalled that the provisions in Annex III would only apply to new vessels. They indicated that changes should only be made on the basis of compelling reasons supported by the provision of comprehensive data. It was pointed out that Annex III would only apply to new, decked vessels, and that the provisions were based on those in Convention No. 126.

Employers' organizations generally indicated that the accommodation provisions should be more flexible and take into account regional differences and the level of development in certain countries. They found Annex III to be too prescriptive. Concerns were expressed over the burden such standards would impose on fishing vessel owners.

---

*Discussion at the tripartite Round Table*

The Round Table discussed whether changes were needed to Article 28 or Annex III, or both, of the proposed Convention, in particular the length–gt equivalency figures in paragraph 7 of Annex III. To help others to understand its position, the Government of Japan provided additional technical information, which is set out in Appendix II of the Round Table document contained in the appendix to this report. Participants discussed whether the provision on “substantial equivalence” currently included in Article 28, or perhaps other possible provisions, could be used to address this issue to the satisfaction of all parties. Informal consultations on this point were deemed to have been positive.

*Office commentary*

As concerns the issue of substantial equivalence, the Office draws attention to the statement at the Round Table by the Deputy Legal Adviser as set out in paragraphs 44 and 45 of the Summary of the discussion contained in the appendix.

The Office notes that a few replies referred to specific figures or dimensions concerning accommodation contained in Annex III and how these compare to figures and dimensions in the Accommodation of Crews (Fishermen) Convention, 1966 (No. 126), the FAO/ILO/IMO Code of Safety for Fishermen and Fishing Vessels, Part B, and the Safety and Health Requirements for the Construction and Equipment of Fishing Vessels. To assist in the discussion of this matter at the Conference, the Office has provided a comparison of these figures in the table at the end of this section.

Several replies have referred to the accommodation provisions in the MLC commenting on the balance achieved between the mandatory requirements set out in the Standards of that Convention and the non-mandatory guidance set out in its guidelines.

In this regard, the Office observes that standard A3.1, Accommodation and recreational facilities, of the MLC sets out specific figures for: headroom (paragraph 6(a)); the dimensions of berths (paragraph 9(e)); floor area (paragraph 9(f)–(l)); and the number of toilets, washbasins and tubs or showers for merchant ships, although a certain degree of flexibility is provided for under certain circumstances. The proposed Convention concerning work in the fishing sector sets out such dimensions and figures in its binding provisions (Annex III). However, there are a few other provisions in the MLC that are arguably less detailed than those of Annex III of the proposed Convention. For example, in the MLC the provision concerning refrigerators, facilities for hot beverages and cold water facilities are found in a non-binding guideline, while in the proposed Convention these provisions are found in the binding Annex III, paragraph 50. The accommodation provisions both of the MLC and of the proposed Convention are subject to substantial equivalence.

Bearing in mind that the issue of the requirements for accommodation on board fishing vessels continues to be the subject of informal consultations, and that there is no clear indication of the direction to be taken in resolving this issue, the Office has elected not to propose any alternative text.

The Office also draws attention to non-substantive drafting issues related to Articles 25–28, and to Annex III, which are set out below in the section of this report entitled “Additional Office commentary”.

**Comparison of selected accommodation dimensions in the: proposed Convention concerning work in the fishing sector; Accommodation of Crews (Fishermen) Convention, 1966 (No. 126); and FAO/ILO/IMO Code of Safety for Fishermen and Fishing Vessels, Part B, Safety and Health Requirements for the Construction and Equipment of Fishing Vessels, 2005**

Dimension	Proposed Convention, Annex III	Convention No. 126	FAO/ILO/IMO Code, Part B, Chapter 11
Headroom	<p><b>12.</b> For vessels of 24 m in length and over, the minimum permitted headroom in all accommodation where full and free movement is necessary shall not be less than 2 m. The competent authority may permit some limited reduction in headroom in any space, or part of any space, in such accommodation where it is satisfied that such reduction is reasonable, and will not result in discomfort to the fishers.</p>	<p><b>Article 10, paragraph 4:</b> The clear head room in the crew sleeping room shall, wherever possible, be not less than 6 ft. 3 ins (1.90 m).</p>	<p><b>From paragraph 11.3.1:</b> The clear headroom should, wherever possible, be not less than 2 m.</p>
Sleeping rooms, floor area	<p><b>33.</b> The number of persons per sleeping room and the floor area per person, excluding space occupied by berths and lockers, shall be such as to provide adequate space and comfort for the fishers on board, taking into account the service of the vessel.</p> <p><b>34.</b> For vessels of 24 m in length and over but which are less than 45 m in length, the floor area per person of sleeping rooms, excluding space occupied by berths and lockers, shall not be less than 1.5 m<sup>2</sup>.</p> <p><b>35.</b> For vessels of 45 m in length and over, the floor area per person of sleeping rooms, excluding space occupied by berths and lockers, shall not be less than 2 m<sup>2</sup>.</p>	<p><b>From Article 10.1, paragraph 3 :</b> [ ] floor area per person of sleeping rooms, excluding space occupied by berths and lockers, shall not be less than ...</p> <p>(a) in vessels of 45 ft. (13.7 m) but below 65 ft. (19.8 m) in length: 5.4 sq. ft. (0.5 m<sup>2</sup>)</p> <p>(b) in vessels of 65 ft. (19.8 m) but below 88 ft. (26.8 m) in length: 8.1 sq. ft. (0.75 m<sup>2</sup>)</p> <p>(c) in vessels of 88 ft. (26.8 m) but below 115 ft. (35.1 m) in length: 9.7 sq. ft. (0.9 m<sup>2</sup>)</p> <p>(d) in vessels of 115 ft. (35.1 m) in length or over: 10.8 sq. ft. (1 m<sup>2</sup>)</p>	<p><b>From paragraph 11.3.2:</b> The floor area per person of sleeping rooms, excluding space occupied by berths and lockers, should not be less than:</p> <p>1. 1 m<sup>2</sup> in vessels of 24 m but below 45 m in length; and</p> <p>2. 1.5 m<sup>2</sup> in vessels of 45 m in length or over.</p>
Persons per sleeping room	<p><b>36.</b> To the extent not expressly provided otherwise, the number of persons allowed to occupy each sleeping room shall not be more than six.</p> <p><b>37.</b> For vessels of 24 m in length and over, the number of persons allowed to occupy each sleeping room shall not be more than four. The competent authority may permit exceptions to this requirement in particular cases if the size, type or intended service of the vessel makes the requirement unreasonable or impracticable.</p> <p><b>38.</b> To the extent not expressly provided otherwise, a</p>	<p><b>From Article 10, paragraphs 6 and 7:</b></p> <p><b>6.</b> The number of persons allowed to occupy sleeping rooms shall not exceed the following maxima:</p> <p>(a) officers: one person per room wherever possible, and in no case more than two;</p> <p>(b) ratings: two or three persons per room wherever possible, and in no case more than the following:</p> <p>(i) in vessels of 250 tons and over, four persons;</p> <p>(ii) in vessels under 250 tons, six persons.</p> <p><b>7.</b> [ ] the number of ratings allowed to occupy sleeping rooms shall in no case be more than the following:</p>	<p><b>From paragraph 11.3.3:</b> Wherever reasonable and practicable with respect to the size, type or intended service of a vessel, the number of persons allowed to occupy each sleeping room should not be more than four persons in vessels of 37 m in length and over and six persons in vessels of less than 37 m in length. Sleeping rooms for officers should be for one person wherever possible and in no case should</p>

Dimension	Proposed Convention, Annex III	Convention No. 126	FAO/ILO/IMO Code, Part B, Chapter 11
Sanitary accommodation	<p>separate sleeping room or sleeping rooms shall be provided for officers, wherever practicable.</p> <p>39. For vessels of 24 m in length and over, sleeping rooms for officers shall be for one person wherever possible and in no case shall the sleeping room contain more than two berths. The competent authority may permit exceptions to the requirements of this paragraph in particular cases if the size, type or intended service of the vessel makes the requirements unreasonable or impracticable.</p>	<p>(a) in vessels of 115 ft. (35.1 m) in length and over, four persons;</p> <p>(b) in vessels under 115 ft. (35.1 m) in length, six persons.</p> <p>8. The competent authority may permit exceptions to the requirements of paragraphs 6 and 7 of this Article in particular cases if the size, type or intended service of the vessel make these requirements unreasonable or impracticable.</p>	<p>the sleeping room contain more than two berths.</p>
	<p>51. Sanitary facilities, which include toilets, washbasins, and tubs or showers, shall be provided for all persons on board, as appropriate for the service of the vessel. These facilities shall meet at least minimum standards of health and hygiene and reasonable standards of quality.</p> <p>56. On vessels of 24 m in length and over, for all fishers who do not occupy rooms to which sanitary facilities are attached, there shall be provided at least one tub or shower or both, one toilet, and one washbasin for every four persons or fewer.</p>	<p><b>Article 12</b></p> <p>1. Sufficient sanitary accommodation, including washbasins and tub and/or shower baths, shall be provided in all vessels.</p> <p>2. Sanitary facilities for all members of the crew who do not occupy rooms to which private facilities are attached shall, wherever practicable, be provided for each department of the crew on the following scale:</p> <p>(a) one tub and/or shower bath for every eight persons or less;</p> <p>(b) one water closet for every eight persons or less;</p> <p>(c) one washbasin for every six persons or less;</p> <p>Provided that when the number of persons in a department exceeds an even multiple of the specified number by less than one-half of the specified number, this surplus may be ignored for the purpose of this paragraph.</p>	<p><b>From paragraph 11.5.1:</b></p> <p>Sufficient sanitary facilities including washbasins and tubs and/or shower-baths and water closets should be provided on a scale approved by the competent authority. Wherever practicable, such facilities should be provided as follows:</p> <ol style="list-style-type: none"> <li>1. one tub and/or shower-bath for every eight persons;</li> <li>2. one water closet for every eight persons or less; and</li> <li>3. one washbasin for every six persons or less.</li> </ol> <p>Provided that when the number of persons exceeds an even multiple of the specified number by less than one half of the specified number, this surplus may be ignored for the purpose of this paragraph.</p>

## Question 5

**Qu. 5** Please indicate any other issues which should be addressed in relation to this agenda item.

### Replies

*Argentina.* The competency and training referred to in Paragraph 11 of the proposed Recommendation should be the subject of a binding provision. This provision states that international standards concerning the training and competencies of fishers should be taken into account, but the STCW-F has been ratified by only four countries and is not in force. There should therefore be an additional provision in Paragraph 11 requiring that, if the relevant international standards have not entered into force, existing national standards should be taken into account.

Does not favour a reduction in the minimum age for work in the fishing sector. For this activity, which could be considered hazardous per se, it would be inappropriate to accept less rigorous parameters allowing the employment of persons under 18 years of age. Paragraphs 3 and 6 should be deleted from the proposed Recommendation. Favours an amendment to incorporate a comprehensive reference to the provisions of the Minimum Age Convention, 1973 (No. 138).

CATT: Given that the proposed Convention has been discussed at length at two sessions of the International Labour Conference, changes should be kept to a minimum. Nevertheless, on the whole, it is clear that the ILO should be much more active in the fishing sector and do its utmost to promote decent work for all fishers.

CAPeCA/CALaPA/CAPA: (1) The stricter requirements established in the Convention for vessels of over 45 metres in length should be removed, leaving only the vessel length of 24 metres. (2) The document attesting to compliance with the provisions of the Convention (Articles 41 and 42) concerning living and working conditions should be moved to the Recommendation, and be valid for five years. (3) The complaint procedure provided for in Article 43 could lead to serious diplomatic disputes, and also encroaches on agreements on port State control and United Nations Convention on the Law of the Sea (UNCLOS), both of which should undoubtedly take precedence over labour agreements. (4) It should be specified that this instrument is specifically for the fishing sector, so as to prevent the Conventions and Recommendations concerning seafarers being extended or indirectly implemented in this sector, given in particular the recent adoption of the Maritime Labour Convention, 2006, which contains new provisions.

*Belgium.* Following the opinion issued by the Central Economic Council (CCE) in 2004, a provision could be added to Annex III to the effect that men and women should be provided with separate sleeping rooms and sanitation facilities. Furthermore, we should aim to limit the number of persons per sleeping room to a maximum of four, rather than six.

*Brazil.* CNC and CNT: The FAO/ILO/IMO Code of Safety for Fishermen and Fishing Vessels should be taken into consideration, along with the FAO/ILO/IMO Voluntary Guidelines for the Design, Construction and Equipment of Small Fishing Vessels.

*Burkina Faso.* Consideration should be given to the specific case of continental fishing that is done under conditions quite different from those of marine fishing.

*Canada.* With respect to the minimum age of employment, ILO Convention No. 138 sets the international labour standard for the minimum age for employment. The proposed Convention should be consistent with its provisions.

CLC: As the Convention has been the subject of considerable debate at two previous sessions of the International Labour Conference, there should be as few changes as possible to the text. However, on a general point, it is clear that the ILO should be much more active in the fisheries sector and should actively strive to promote decent work for fishers.

*China.* (1) Article 1 provides that “(a) ‘commercial fishing’ means all fishing operations, including fishing operations on rivers, lakes and canals, with the exception of subsistence fishing and recreational fishing;”. This should be modified to read: “(a) ‘commercial fishing’ means all fishing operations, including fishing operations on rivers, lakes and canals, with the exception of subsistence fishing, recreational fishing and fishing for the purpose of research and teaching;”. Reasoning: There is some research and teaching on fishing resources conducted each year in many countries; a certain quantity of fishing operations at sea are needed; it would be inappropriate for this type of fishing to be treated as “commercial fishing” and incorporated into the binding categories of an international Convention.

(2) Article 6(1) provides that “Each Member shall implement and enforce laws, regulations or other measures that it has adopted to fulfil its commitments under the Convention with respect to fishers and fishing vessels under its jurisdiction. Other measures may include collective agreements, court decisions, arbitration awards, or other means consistent with national law and practice.” This should be modified to read: “1. Each Member shall implement and enforce laws, regulations or other measures that it has adopted to fulfil its commitments under the Convention with respect to fishers and fishing vessels under its jurisdiction, these types of laws and regulations are made in consideration of national conditions to facilitate implementation of the Convention. Other measures may include collective agreements, court decisions, arbitration awards, or other means consistent with national law and practice.” Reasoning: A Convention falls under the category of an international law with general binding force and influence. However, for it to have a real effect, complementary laws or regulations have to be made in consideration of national conditions by each State to make it a reality. Stressing the point that each State makes corresponding laws and regulations in consideration of national conditions, misunderstandings and contradictions can be avoided between developed countries and developing countries in situations of disagreement regarding the enforcement of standards.

(3) Delete the last phrase of paragraph 2 of Article 43 “and may take measures necessary to rectify any conditions on board which are clearly hazardous to safety or health” and the whole of paragraph 3 of this Article. Reasoning: If we add this type of compulsory provision to this international Convention, contradictions or disputes among many countries with different safety and health standards will arise, so normal production and trade activities will be affected.

(4) At this stage, the Convention should take the form of a Code. Conditions of work in the fishing sector should not to be treated as provisions with legal binding force; rather, States shall be required to take active measures in accordance with the suggestions of the Code to progressively realize conditions of labour security for fishermen. Reasoning: At present, due to the fact that there is a considerable gap between the current situation regarding conditions of work in the various aspects of the fishing sector and the achievement of all the requirements of the standards contained in

the proposed Convention, although some “specific exemptions” are provided for in the proposed Convention, many countries still need to make efforts during a very long period of time before it is possible for them to realize it. Therefore, we suggest that reference be made to the Code of Conduct for Responsible Fisheries, making appropriate adjustments to the form of realization of the content of the Convention, allowing each State to make complementary laws or regulations in consideration of national conditions, in order to promote progress regarding conditions of work in the fishing sector, and to ensure labour security for the fishermen of their own countries.

*Colombia.* Hiring of fishers should be directly linked to production during each fishing operation, and the rights and obligations under the comprehensive social security system should be maintained throughout the operation. A contract should not be of indefinite duration but should be for the duration of the fishing operation, remuneration being in proportion to the size of the catch and including social security coverage on agreed points.

*Egypt.* The Convention should take into account the following: (1) The setting of the minimum age for work at 18 years. (2) Prohibition of work on board fishing vessels for those under 18 years of age. (3) A person working on board a fishing vessel should have a written contract of employment approved by the competent authority. (4) During periods of berth in ports, exempt temporary and seasonal workers from the provisions of the Convention concerning the need for a written contract of employment or regarding the established conditions of employment. (5) The competent authority should take measures aimed at ensuring that an efficient crew is on board so as to ensure safe navigation according to international standards, with the exception of small fishing vessels operating in inland waters. (6) The need to guarantee the rights established in social security and social insurance for those working on board fishing vessels, such as sickness, old age, work injury, maternity, unemployment, family and survivors’ benefits, taking into account hard working conditions. (7) The need to ensure equal rights among workers on board fishing vessels in the waters of a State other than the flag State or during fishing operations on the high seas. The need also to have life insurance for those working on board fishing vessels. (8) The need to provide that States should adopt measures with a view to verifying compliance with the provisions of the Convention, both for flag State and for port State, and to carry out inspection for verification. Port State control should be provided for, and control operations should be confined to ships belonging to countries that are parties to the Convention. (9) The inclusion of provisions on the promotion of tripartism in concluding contracts, implementation and monitoring. The Recommendation should provide for: (1) Guidelines on types of work (such as night work or work in hazardous conditions) or on types of fishing vessels that should be prohibited to persons under 18 years of age. (2) Dealing with issues concerning occupational safety and health within the framework of an integrated national policy that guarantees the determination of the rights and obligations of shipowners and workers on their ships as regards occupational safety and health, as well as the investigation of occupational and personal accidents among crew members. (3) The keeping by the competent authority of a record of persons working on board fishing vessels. (4) Guidelines concerning conditions of work of fisheries’ observers on board fishing vessels and the provision of any facilities needed to perform their duties. (5) The need for compliance with the provisions of the Convention by vessels operating in the exclusive economic zone.

GTUWA: The Convention should provide and guarantee that family fishing is not subject to its provisions other than those concerning safety and prevention on fishing vessels operating in inland waters, in conformity with the reply to Question 1.

*Finland.* Many accidents on fishing vessels are related to instability due to structural alterations of the deck area made at a later stage. This might perhaps be taken into account in the proposed Convention.

SAK: Taking into account that the Convention has already been discussed at two previous sessions of the Conference, there should be as few changes as possible and the ILO should be more active in promoting decent work for fishers.

*France.* In its present form, the proposed Convention would appear to be sufficiently balanced to be an appropriate candidate for status as a comprehensive standard regarding employment and working conditions in the fishing sector. While the flexible nature of the text allows it to take into account the diverse range of national situations, the scope covers all small enterprises, be they artisanal or family, which form the majority in some countries, as well as industrial or semi-industrial fishing enterprises. For this reason, a certain number of fundamental and emblematic points within the new text should only be amended with regard to form, if at all. This is the case with regard to the following points in particular:

*Minimum age.* Article 9, minimum age, of the proposed Convention allows young people to learn about a career as a fisher. Young people aged between 15 and 16 years are permitted to perform a certain number of tasks on board fishing vessels during school holidays. The current version of Article 9 of the proposed Convention addresses France's concerns regarding the protection of young people in the workplace. From the point of view of both fisher apprenticeships and the attractiveness of the profession, it is vital to maintain the current wording of this Article. Firstly, enabling young people to learn about the occupation in a strictly regulated environment from the age of 15 can lead to their gaining experience regarding occupational safety, whereas keeping schooling and work experience separate can lead to an increase in situations of risk. Allowing young people over the age of 15 who are receiving vocational training to perform light work on board contributes to their training in the use of the fishing gear they will use and the knowledge of the fishing operations in which they will be engaged, a point underlined in Article 31, occupational safety and health and accident prevention of the proposed Convention. Moreover, the opportunity to find out about the occupation from the age of 15 helps to ensure that the occupation remains attractive, a problem experienced by many States. Finally, the opportunity to perform light work from the age of 15 is not in conflict with the provisions of the ILO Minimum Age Convention, 1973 (No. 138). For all of these reasons, it is vital to maintain the present wording of Article 9.

*Risk evaluation in fishing enterprises.* Under Article 31, each Member shall adopt laws, regulations or other measures concerning "the prevention of occupational accidents, occupational diseases and work-related risks on board fishing vessels, including risk evaluation and management [...]". From the point of view of the promotion of the occupational safety and health of fishers, it is vital that this provision be maintained. Occupational risk prevention should be considered as an overall approach, characterized by the participation and acceptance of responsibility on the part of the actors and the sector as a whole. This approach can, as is demonstrated by the French experience and in particular the implementation of the Fishing Safety Plan, be adapted to take into account small vessel owners. In taking into account certain fundamental principles regarding occupational risk prevention, the proposed Convention addresses this issue in an appropriate manner. Examples of this approach include the introduction into the proposed Convention of the concept of risk evaluation and management, personal protective equipment, as well as the definition of the respective responsibilities of the fishing vessel owner, skipper and fisher.

*Fishers' social security.* Articles 34 to 37 of the proposed Convention constitute a significant innovation in that, for the first time, the issue of minimum standards of social security for fishers is addressed. It should be recalled that the old Conventions on fishers have not been widely ratified and contain many gaps. The objectives of coverage (equal to that afforded other workers) for all fishers, be they waged or self-employed, and of progressive cover for non-resident fishers must be maintained within the body of the Convention. With the emphasis on the principle of progressiveness, the means for achieving these objectives seem appropriate and realistic. With regard to social security, the proposed Convention fulfils its objective as a comprehensive standard which is destined to become a reference for all States, including those not in a position to ratify it.

*Germany.* There are no objections to Annex II, as long as the term “fisher’s work agreement” includes collective bargaining agreements. Under German law, the social partners are allowed to agree to exemptions for fishing vessels from the German Seafarers Act.

*Ghana.* Artisanal, aquaculture and recreational fishing issues should be addressed by the proposed Convention. The Fisheries Act, 2002 (Act 625) reflects some of the provisions in the proposed Convention.

*Honduras.* COHEP. Not all countries and enterprises are the same, and standards need to be more flexible and adaptable, less general, and of greater practical value, to allow them to be adapted to the conditions of each country. Failure to do this would mean that few countries would be able to ratify the proposed Convention and Recommendation.

*India.* HMS. The ILO should be more active in the fisheries sector as the people engaged in this type of work are open to accidents and danger. Moreover, since they are working at sea, problems of violation of international law become difficult and the fishermen are subjected to ill-treatment, detention, imprisonment, etc. They are also vulnerable sections of society trained in the traditional manner and who are not familiar with modern technologies. These people need protection.

*Japan.* Requirements for entry into force (Article 48(2)) should read as follows: “Ratification of 15 or more coastal States which own a number of fishing vessels equivalent to 50 per cent of the vessels throughout the world.” Reasoning: To make the proposed Convention a truly international Convention, it is necessary to encourage States owning a larger number of fishing vessels to ratify the proposed Convention. The Torremolinos International Convention for the Safety of Fishing Vessels (IMO) enters into effect when 15 States with at least 50 per cent of the world’s fishing vessels of 24 metres in length and over ratify the said Convention. However, as the proposed Convention allows exemption of vessels engaged in fishing operations in rivers, lakes and canals from the requirements above, it is necessary to have ratifications of 15 and more *coastal* States for entry into force. Furthermore, to cover as many fishers, in other words, fishing vessels, as possible throughout the world, there should be a requirement for ratifications by States with at least 50 per cent of the world’s fishing vessels. The following are requirements for the entry into force of other Conventions, namely:

- The Torremolinos International Convention for the Safety of Fishing Vessels (IMO): 15 States with at least 50 per cent of the world’s fishing vessels of 24 metres in length and over;
- The Maritime Labour Convention, 2006 (ILO): 30 States with 33 per cent of the world’s vessel tonnage;

- International Convention on Standards of Training, Certification and Watchkeeping for Fishing Vessel Personnel (STCW-F) (pending): 15 States;
- ILO Convention No. 126: two States.

JSU: Agrees.

*Korea, Republic of.* The entry into force requirements should be at least the same as the Maritime Labour Convention, 2006, i.e. 12 months after the date on which there have been registered ratifications by at least 30 Members with a total share in the world fleet of commercial fishing vessels of at least 33 per cent.

*Lebanon.* With regard to Article 3 of the proposed Convention, the question arises whether there are specific rules that regulate the selection of the specific provisions from whose application the fishing vessels and categories mentioned in subparagraphs (a) and (b) of Article 3(1) can be excluded, or whether it is left to the discretion of the ratifying State. This could lead to an imbalance in the application standards of the Convention. With respect to paragraph 1(b), are there clear standards for the limited categories of fishers or fishing vessels that may be excluded from the requirements of the Convention, or are these to be left to the ratifying State? Is it possible to provide for exceptions from its provisions for small fishing boats owned by fishers and their families? In all cases, occupational safety and health standards should be applied on all fishing vessels.

With respect to Article 13 concerning manning and hours of rest, it would be preferable to define manning and hours of rest through reference to Conventions such as the STCW, because the sentence “sufficiently and safely” is not clear and will be interpreted differently by different States.

With respect to Article 15 concerning the crew list: the last part of the first sentence should be amended to read as follows: “a copy of which shall be provided to authorized persons ashore in emergency cases immediately after the departure of the vessel”.

With respect to Article 20, the text of this Article should be placed before the text of Article 18 to ensure the correct sequence.

With respect to Article 21, paragraph 2, add at the end: “such that his or her fault does not allow him or her to be kept on board”. Clarification is needed as to who is liable to assess the seriousness of what the fisher has done, and, in the event that it proves to be serious, where the fisher should be left and what the mechanism of repatriation should be.

With respect to Article 29, subparagraph (e), on medical care, who is responsible for paying for the medical treatment?

With respect to Article 30, the appropriate personal protective clothing and equipment should be provided on all fishing vessels regardless of voyage duration, in view of the protection they provide to fishers.

With respect to Article 31, subparagraph (a), the wording “the avoidance to the greatest extent possible” is preferable to “the prevention”.

With respect to Article 32, paragraph 2(a), use the following wording: “to avoid to the greatest extent possible occupational accidents and diseases”, instead of “for the prevention of ...”.

Articles 38 and 39 do not contain specific provisions related to death and corresponding compensation, although the heading for these two Articles refers to work-related death.

With respect to Article 45 concerning the procedure for amending Annexes I, II and III, since Annex III deals with Articles 25 to 27 of the Convention, its amendment means the amendment of the provisions of the Convention itself. How would the Conference amend Annex III?

With respect to Paragraph 29 of the proposed Recommendation, should vessels of less than 24 metres in length have separate sleeping rooms for women and men?

With respect to Paragraph 31, it is preferable that each toilet compartment should have a closed door.

With respect to Paragraph 40, the sentence should read: “to avoid to the greatest extent possible accidents on board fishing vessels”, instead of “for the prevention of accidents on board fishing vessels”.

*Netherlands.* DFPB. The social partners in the Netherlands fishing industry recognize that in fact a considerable number of fishers work on board fishing vessels as posted workers while the proposed Convention denies this by prescribing that the fishing vessel owner sign the fisher’s work agreement (see Article 20 of the proposed Convention). This will create unclear legal positions for the fishers, fishing vessel owners and private employment agencies concerned. On the one hand, the Convention should therefore *not* prescribe who the contracting party of the fisher must be; on the other hand, in order to protect the fishers’ rights, the Convention should place clear ultimate responsibility on the fishing vessel owner (in the broad meaning of this term, given in Article 1(d) of the proposed Convention).

*New Zealand.* The New Zealand Government has been working with the fishing industry in New Zealand to address concerns with working and living conditions for crew on foreign charter vessels. The proposed Convention would be a useful instrument for providing a framework of minimum protection as regards fishing crews’ employment and working conditions. However, an overly prescriptive proposed Convention, as noted above, may discourage employer support.

NZCTU: Supports ongoing tripartite work with the aim of promoting decent work standards in the fishing sector.

*Panama.* CMP. As stated in Annex III, paragraph 4, application should also be extended to or made obligatory for vessels below 24 metres in length if they spend long periods at sea and outside territorial waters.

*Papua New Guinea.* Agrees with the current proposed provisions of the Convention. However, consideration should be given to other maritime Pacific island countries, which may find the requirements to be unaffordable.

*Qatar.* The Convention should contain fisher’s obligations and duties towards vessel owners in order to ensure the rights of both contracting parties and to urge vessel owners, as well as associations and organizations representing them, to respond in a spontaneous and positive manner to the provisions of this Convention.

*Sri Lanka.* UFL and NFSM. It is important for developing countries that the Convention address the conditions of work of fishermen on vessels under 24 metres in length.

CWC: As the Convention has been the subject of considerable debate at two previous sessions of the International Labour Conference, there should be as few changes as possible to the text. However, on a general point, it is clear that the ILO

should be much more active in the fisheries sector and should actively strive to promote decent work for fishers.

*Spain.* FEOPE. Reject paragraphs 2 (basically the last phrase) and 3 of Article 43 and the slightest possibility that the State in whose waters or port the vessel finds itself can carry out inspections and take measures concerning the possible lack of compliance with labour standards. Firstly, such a standard would be contrary to the principle of the nationality of vessels based on their flag State and on the principle of territoriality. Secondly, it would seem to be a violation of the principle of “good faith” that runs through international law. It would be unthinkable for a State signatory to an international instrument not to comply with that instrument and not to display the will to require of its nationals that they fulfil their obligations, thus such a standard would constitute an infringement of national sovereignty. Although it is true that, strictly in the context of fishing, under certain circumstances and with certain guarantees, some monitoring of fishing on the part of the port authorities is permitted, this is justified by certain characteristics of fishing activities: the abuse of quotas and fishing licences; the homogeneous and detailed nature of the fishing standards applicable in the fishing zone for all countries carrying out extraction activities therein; and the fact that there is no room for differing interpretations or regulation. On the other hand, it is clear that fisheries Conventions (whether multilateral or bilateral) contain an important legal bargaining element, as a result of the mutual transfer of goods, interests or financial responsibilities, these being true considerations. None of this has any bearing on the implementation of the Convention for fishers and the content of the paragraphs referred to above cannot be justified. Thus, if they were to be granted, the extraordinary powers contained in the paragraphs in question would be a powerful weapon that coastal countries could use to upset the balance of fisheries Conventions, allowing one party the means to prevent the other from enjoying the benefits corresponding to its consideration. It should be noted that, under article 8.3.2 of the Code of Conduct for Responsible Fisheries, the port State should provide assistance only when requested to do so by the flag State.

*Suriname.* People living in the interior and the districts (of developing countries) often use vessels for transportation and fishing. These people often, or in most cases, do not have a medical certificate attesting to their fitness to perform certain duties. Often, there are not even any medical centres in the vicinity. The implementation or enforcement of laws in these areas is nearly impossible. Flexibility regarding most of the provisions in the Convention is in order for developing countries.

*Syrian Arab Republic.* The issue of not employing young people in hazardous work, such as processing on board vessels and handling hazardous materials, should be taken into account.

*Thailand.* In Article 25, delete the word “potable” and insert the word “drinking” before the word “water” to make this provision consistent with the wording in the Maritime Labour Convention, 2006. Likewise, in Article 27(b), delete “potable” and insert “drinking”. In Article 28(1), replace the words “shall give full effect” by the words “shall give effect, as far as possible according to the condition of the Member”, as the provisions of Annex III are too prescriptive and create obstacles to ratification. Note that Convention No. 126 has few ratifications due to over-detailed and prescriptive requirements, and the provisions of Annex III of the proposed Convention would be even stricter.

*Trinidad and Tobago.* (1) The ECA pointed out the problems Japan has expressed concerning the length-gross tonnage equivalency figures, observing that this would pose

serious concerns for Asian countries. (2) In Annex II, fisher's work agreement, the particulars of items (k) to (m) might be difficult to implement given the transient nature of workers on fishing vessels less than 24 metres in overall length. In addition, given the definition of "commercial fishing", the particulars of items (k) to (m) would also apply to inshore artisanal fishing activity where the crew may change on a day-to-day basis. Notwithstanding their usefulness in terms of protecting the interest of fishers, these particulars in items (k) to (m) may be difficult to implement. (3) In Article 30(f) – which concerns medical care – the provision of free medical care to fishers who land in a foreign port may present a financial as well as a social burden to the port State. This is especially true in cases of developing countries where the port State supports transshipment operations and where large numbers of foreign fishing vessels utilize the port. It is recommended that item (f) should be amended to reflect the cost of medical services to be borne by the vessel owner. (4) Article 20: With respect to the written work agreement, it is suggested that a third party should sign as a witness to the signatures of both the fisher and fishing vessel owner. It is also suggested that the provision should include companies and transfers of crew between fleets. (5) With regard to Article 32(3)(b), it is suggested that the sentence should be rephrased to read as follows: "... ensure that every fisher on board has received basic safety training and drills for emergency response approved by the competent authority; ...".

*Ukraine.* With regard to the recruitment and placement of fishers, the Recruitment and Placement of Seafarers Convention, 1996 (No. 179) and the associated Recommendation, No. 186, can both be applied to the international commercial fishing industry.

*United Kingdom.* The Convention has been the subject of considerable debate at two previous sessions of the International Labour Conference, so changes to the existing mature text should be the minimum necessary to ensure a widely ratifiable instrument.

#### *Commentary on replies to Question 5*

The Office notes that quite a number of issues have been addressed in the replies to this question. It will focus its comments on the issues of minimum age, use of private employment agencies, and enforcement provisions.

#### *Minimum age*

Some replies expressed concern that the minimum age provisions of the proposed Convention might not be consistent with the provisions of the Minimum Age Convention, 1973 (No. 138) or the Worst Forms of Child Labour Convention, 1999 (No. 182). This issue also arose at the Tripartite Round Table.

The Office has reviewed the text of the two existing instruments and the proposed Convention and has found no inconsistency. It notes that, according to Article 3 of Convention No. 138, it is for national laws or regulations or the competent authority, after consultation with the organizations of employers and workers concerned, to determine the types of employment or work which by its nature or the circumstances in which it is carried out is likely to jeopardize the health, safety or morals of young persons. The Office also wishes to draw attention to paragraph 7 of Article 9 of the proposed Convention which provides that:

None of the provisions in this Article shall affect any obligations assumed by the Member arising from the ratification of any other international labour Convention.

The Office also draws attention to its commentary on this issue in Report V(2A) of the 93rd Session of the Conference.<sup>1</sup>

*Use of private employment agencies*

The issue of the use of private employment agencies was raised both in the replies and at the Tripartite Round Table. Concern was expressed about how to reflect in the Convention the situation – apparently increasingly common in some countries – in which a fisher has a contract not with a fishing vessel owner but with a third party, usually a private employment agency. At the Round Table, the participants discussed the possible relevance of the Private Employment Agencies Convention, 1997 (No. 181), as to how this situation might be addressed. Clarification was sought regarding the difference between recruitment and placement services (which are addressed in Article 22 of the proposed Convention) and the kinds of service provided by private employment services as set out in Article 1, paragraph 1(b), of Convention No. 181. The participants described their national experiences with private employment services, and sought clarification on certain issues.

The Office notes that Article 1, paragraph 1 of Convention No. 181, provides that:

1. For the purpose of this Convention the term “private employment agency” means any natural or legal person, independent of the public authorities, which provides one or more of the following labour market services:

- (a) services for matching offers of and applications for employment, without the private employment agency becoming a party to the employment relationships which may arise therefrom;
- (b) services consisting of employing workers with a view to making them available to a third party, who may be a natural or legal person (referred to below as a “user enterprise”) which assigns their tasks and supervises the execution of these tasks;
- (c) other services relating to jobseeking, determined by the competent authority after consulting the most representative employers and workers organizations, such as the provision of information, that do not set out to match specific offers of and applications for employment.

Article 22 of the proposed Convention addresses the types of services described in Convention No. 181, Article 1, paragraph 1(a). However, as the Employers noted at the Round Table, the proposed Convention does not reflect the services provided in Article 1, paragraph 1(b).

The Office draws attention to Article 20, concerning the fisher’s work agreement, of the proposed Convention, which reads:

It shall be the responsibility of the fishing vessel owner to ensure that each fisher has a written work agreement signed by both the fisher and the fishing vessel owner or an authorized representative of the fishing vessel owner.

One possible solution would be to amend this Article to reflect situations where the work agreement is between the fisher and either an employer or a party other than the fishing vessel owner.

A similar though perhaps not identical issue arose during the development of the Maritime Labour Convention, 2006. This was addressed, in Standard A2.1, Seafarers’ employment agreements, paragraph 1(a), by means of the following text:

<sup>1</sup> ILO: *Work in the fishing sector*, Report V(2A), International Labour Conference, 93rd Session, Geneva, 2005, p. 81.

1. Each Member shall adopt laws or regulations requiring that ships that fly its flag comply with the following requirements:

- (a) seafarers working on ships that fly its flag shall have a seafarers' employment agreement signed by both the seafarer and the shipowner or a representative of the shipowner **(or, where they are not employees, evidence of contractual or similar arrangements) providing them with decent working and living conditions on board the ship as required by this Convention;** [emphasis added]

However, the Office also notes that the definition of “fishing vessel owner” in the proposed Convention and that of “shipowner” in the Maritime Labour Convention, 2006, differ. In the former, the definition in Article 1(d), is:

“fishing vessel owner” means the owner of the fishing vessel or any other organization or person who has assumed the responsibility for the operation of the vessel from the owner or other organization or person and who, on assuming such responsibility, has agreed to take over the duties and responsibilities imposed on fishing vessel owners in accordance with the Convention;

In the Maritime Labour Convention, the definition, in Article II(j), is:

“shipowner” means the owner of the ship or another organization or person, such as the manager, agent or bareboat charterer, who has assumed the responsibility for the operation of the ship from the owner and who, on assuming such responsibility, has agreed to take over the duties and responsibilities imposed on shipowners in accordance with this Convention, **regardless of whether any other organization or persons fulfil certain of the duties or responsibilities on behalf of the shipowner.** [emphasis added]

The Committee may also wish to take into account the fact that the Employment Relationship Recommendation, 2006 (No. 198), provides in Paragraph 4, inter alia, that:

4. National policy should at least include measures to:

...

- (c) ensure standards applicable to all forms of contractual arrangements, including those involving multiple parties, so that employed workers have the protection they are due;
- (d) ensure that standards applicable to all forms of contractual arrangements establish who is responsible for the protection contained therein;

### *Enforcement*

The Office notes that some replies have referred to port State control provisions in the FAO's non-binding Code of Conduct for Responsible Fisheries. These provisions, which appear in Article 8.3, Port State duties, of the Code, are as follows:

8.3.1 Port States should take, through procedures established in their national legislation, in accordance with international law, including applicable international agreements or arrangements, such measures as are necessary to achieve and to assist other States in achieving the objectives of this Code, and should make known to other States details of regulations and measures they have established for this purpose. When taking such measures a port State should not discriminate in form or in fact against the vessels of any other State.

8.3.2 Port States should provide such assistance to flag States as is appropriate, in accordance with the national laws of the port State and international law, when a fishing vessel is voluntarily in a port or at an offshore terminal of the port State and the flag State of the vessel requests the port State for assistance in respect of non-compliance with subregional, regional or global conservation and management measures or with internationally agreed minimum standards for the prevention of pollution and for safety, health and conditions of work on board fishing vessels.

## **ADDITIONAL OFFICE COMMENTARY**

In reviewing the text of the proposed Convention and Recommendation as set out in the Report IV(2B), several other drafting issues have come to light.

### **Text of the proposed Convention concerning work in the fishing sector**

#### **PREAMBLE**

The Committee may wish to consider the possible relevance of Conventions and Recommendations adopted by the International Labour Conference since its 93rd Session.<sup>1</sup>

#### **PART I. DEFINITIONS AND SCOPE**

##### **DEFINITIONS**

##### *Article 1(c)*

The Committee may wish to consider deleting the remaining part of the definition after “exist” (i.e. “on the measures to be taken to give effect to the provisions of the Convention and with respect to any derogation, exemption or other flexible application as allowed under the Convention”), as the substantive provisions of proposed Convention indicate where such consultation is called for.

##### *Article 1(d)*

The Office draws the Committee’s attention to its commentary following the replies to Question 5 under the heading “Use of private employment agencies”.

##### *Article 1(f)*

The Office suggests that, in order to improve the clarity of the text, a comma should be included after the word “arrangements”. This would resolve ambiguity in the English text resulting from an amendment adopted at the 92nd Session of the Conference in 2004.

---

<sup>1</sup> These are: the Maritime Labour Convention, 2006; the Promotional Framework for Occupational Safety and Health Convention, 2006 (No. 187); the Promotional Framework for Occupational Safety and Health Recommendation, 2006 (No. 197); and the Employment Relationship Recommendation, 2006 (No. 198).

*Article 1(h) and (i)*

The definitions of “new fishing vessel” in subparagraph (h) and of “existing vessel” in subparagraph (i) are used only in Annex III. They could be moved to Annex III.

SCOPE

*Articles 3 and 4*

The Office draws the Committee’s attention to its commentary following the replies to Question 1.

MINIMUM AGE

See Office commentary following replies to Question 5, under the heading “Minimum Age”.

MEDICAL EXAMINATION

The Office draws the Committee’s attention to its commentary following the replies to Question 2.

Furthermore, the Office notes that the link between Articles 11 and 12 could be made more evident by adding, in Article 12, at the beginning of the first sentence, the words “In addition to the requirements set out in Article 11”.

**PART IV CONDITIONS OF SERVICE**

MANNING AND HOURS OF REST

The Office draws the Committee’s attention to its commentary following the replies to Question 3.

FISHER’S WORK AGREEMENT

See Office commentary following replies to question 5, under the heading “Use of private employment agencies”.

REPATRIATION

The Office notes that, subject to the outcome of the discussions concerning the “Use of private employment agencies”, it may be necessary to revisit the provisions concerning repatriation.

PAYMENT OF FISHERS

*Article 23*

The Committee may wish to insert the word “other” between the words “or” and “regular” so that the end of the sentence reads “are ensured a monthly or other regular payment”.

**PART V. ACCOMMODATION AND FOOD**

The Office draws the Committee’s attention to its commentary following the replies to Question 4.

The Office observes that, in the light of the content of Articles 26 and 27, Article 25 appears to be redundant.

The Office notes that in Article 27(c), the word “shall” may not be necessary as it is already included in the introductory phrase.

## **PART VI. MEDICAL CARE, HEALTH PROTECTION AND SOCIAL SECURITY**

### **MEDICAL CARE**

In Article 30(c), the Committee Drafting Committee may wish to look at the proper citation of the (ILO/IMO/WHO) *International Medical Guide for Ships*.

### **OCCUPATIONAL SAFETY AND HEALTH AND ACCIDENT PREVENTION**

The Office notes that consideration of an alignment of the English and French texts, with use of the term “risk assessment” in English instead of “risk evaluation” could be referred to the Committee Drafting Committee.

### **SOCIAL SECURITY**

#### *Articles 35 and 36*

The Articles refer to progressive implementation of social security provisions but without setting out a time frame for achieving full implementation. The Committee may wish to revisit these Articles, should the scope provisions of the proposed Convention be amended to incorporate a “progressive implementation” approach.

### **PROTECTION IN THE CASE OF WORK-RELATED SICKNESS, INJURY OR DEATH**

#### *Article 39*

The Office notes that it might improve the clarity of the text if there were some specific text linking Article 39 to Article 38. It also notes that the words “wilful act, default or misbehaviour” might be replaced with the words “wilful misconduct” in the interest of consistency with Standard A4.2, Shipowners’ liability, paragraph 5(b), of the Maritime Labour Convention.<sup>2</sup>

## **PART VII. COMPLIANCE AND ENFORCEMENT**

### *Article 41*

The Office notes that the text of Article 41 is, in part, unclear and confusing. The first sentence of the proposed Article 41 currently reads as follows:

Members shall require that fishing vessels remaining at sea for more than three days, whether 24 metres in length and over or normally on voyages 200 nautical miles beyond the coastline of the flag State or the outer edge of its continental shelf, whichever is greater, carry a valid document issued by the competent authority stating that the vessel has been inspected by the competent authority or on its behalf, for compliance with the provisions of this Convention concerning living and working conditions.

Bearing this in mind, the Office proposes that consideration be given to rewording the text along the following lines:

<sup>2</sup> For an explanation of the reasons for this change, see the clarification by the representative of the Secretary-General set out in paragraph 771 of *Provisional Record No. 7, Part I, Report of the Committee of the Whole*, International Labour Conference, 94th (Maritime) Session, 2006.

Members shall require that fishing vessels remaining at sea for more than three days, which are:

- (a) 24 metres in length and over or
- (b) normally navigating at a distance exceeding 200 nautical miles from the coastline of the flag State or navigating beyond the outer edge of its continental shelf, whichever distance from the coastline is greater

carry a valid document issued by the competent authority stating that the vessel has been inspected by the competent authority or on its behalf, for compliance with the provisions of this Convention concerning living and working conditions.

#### *Article 43*

The Committee Drafting Committee may wish to replace the word “standards” in paragraph 2 with the word “requirements”. This would help to make this paragraph consistent with paragraph 1 of the same Article, and would also be consistent with the use of the word “requirements” in the Maritime Labour Convention, 2006.<sup>3</sup>

The Office also draws the Committee’s attention to its commentary following the replies to Question 5, under the heading “Enforcement”.

### **PART IX. FINAL PROVISIONS**

Since the text approved by the Conference Committee in 2005 ended with Article 46 (the instruments being revised), the proposed final Articles added by the Conference Drafting Committee (Articles 47–54) have not been reproduced in the proposed text appearing in Report IV(2B). At the 96th Session of the Conference, the Conference Drafting Committee would, in accordance with its mandate under article 6 of the Standing Orders of the International Labour Conference, insert the standard final provisions, taking into account any relevant decisions of the Committee at this session. If the Committee provides no such instructions, the Conference Drafting Committee could include the provisions on entry into force submitted to the Conference at its June 2005 session (i.e. 12 months after the date on which ratifications of ten Members, eight of which are coastal States, have been registered with the Director-General of the International Labour Office).

### **ANNEX II. FISHER’S WORK AGREEMENT**

#### *Clause (q)*

The Office notes that consideration of an alignment of the phrase “national law or regulation” in the English and French texts could be referred to the Committee Drafting Committee.

### **ANNEX III. FISHING VESSEL ACCOMMODATION**

#### *Paragraph 78*

The Office notes that the alignment of the English and French texts could be referred to the Committee Drafting Committee.

---

<sup>3</sup> See MLC, Regulation 5.2.1, Inspections in port, paras 1 and 2.

**Text of the proposed Recommendation  
concerning work in the fishing sector**

**PREAMBLE**

Since Paragraph 11 refers to training, the Committee may wish to include in the Preamble a reference to the Vocational Training (Fishermen) Recommendation, 1966 (No. 126), which is not referred to as one of the instruments being revised.

**PART I. CONDITIONS FOR WORK ON BOARD FISHING VESSELS**

PROTECTION OF YOUNG PERSONS

MEDICAL EXAMINATION

*Paragraph 8*

Consideration might be given to whether or not Paragraph 8 is necessary, as the issue appears to be addressed in Article 11(e) of the proposed Convention.

**PART V. OTHER PROVISIONS**

A new Paragraph has been added to reflect the fact that the proposed Recommendation, if adopted, would replace the Work in the Fishing Sector Recommendation, 2005.

## APPENDIX

TRLSFS/2006/5

### **Report of the Interregional Tripartite Round Table on Labour Standards for the Fishing Sector**

(Geneva, 11–13 December 2006)

---

## **Executive summary**

An Interregional Tripartite Round Table on Labour Standards for the Fishing Sector was held from 11 to 13 December 2006 at ILO headquarters in Geneva. Attached is a Summary of the discussion that provides an overview of the main issues that arose during this informal tripartite consultation.

## **Background**

The proposed Convention concerning work in the fishing sector was not adopted at the 93rd Session of the International Labour Conference due to lack of a quorum. Following the result of the vote, the Conference adopted a motion to request the Governing Body to place on the agenda of the 96th Session of the Conference in 2007 an item concerning work in the fishing sector based on the report of the Committee on the Fishing Sector of the 93rd Session.

At its 294th Session (November 2005), the Governing Body included on the agenda of the 96th Session of the International Labour Conference, which will be held in June 2007, an item concerning work in the fishing sector, with a view to the adoption of a Convention supplemented by a Recommendation. It also decided that the Conference should use as the basis for its discussion the report of the Committee on the Fishing Sector of the 93rd Session as well as the outcome of further tripartite consultations.

In May 2006, the Office held informal consultations with the Employers, the Workers and the regional coordinators of the Government group to discuss how these consultations might be carried out in an effective and timely manner.

In keeping with the abovementioned decisions and consultations, in October 2006 the Officers of the Governing Body agreed to the convening of the Interregional Tripartite Round Table on Labour Standards for the Fishing Sector.

The purpose of the Round Table was to pursue consultations in relation to the proposed Convention and Recommendation concerning work in the fishing sector in advance of the 96th Session (June 2007) of the Conference. This meeting was composed of the following members: eight representatives of governments of ILO member States – nominated on a regional basis after

consultation with the ILO Government group regional coordinators; eight Employer representatives and eight Worker representatives – nominated by their respective groups. Regional coordinators of the Government group, or their representatives, participated as observers with the right to take the floor on behalf of any country of their respective group. An observer from the Food and Agriculture Organization of the United Nations also participated. The Chairperson, who came from outside the eight Government representatives, was Captain Nigel Campbell of South Africa.

Some of the main issues discussed are highlighted below. This text should be read together with the Summary of the discussion.

## **Main issues discussed**

The atmosphere of the Round Table was very positive and constructive. Participants sought to identify the way forward towards achieving the adoption of a Convention and Recommendation in 2007 that could be widely ratified and would contribute to ensuring that the rights and interests of all fishers are protected. The Office provided participants with a summary of replies received to a questionnaire on the proposed Convention that had been sent to ILO member States in June 2006. The questions had focused on issues that had presented difficulties at the Conference in 2005.

Throughout the Round Table the participants expressed the importance of continuing informal consultations and exchange of information until the Conference meets in June 2007.

### ***Progressive implementation approach***

The Round Table discussed the possibility of incorporating into the proposed Convention what became known over the course of the debate as the “progressive implementation approach”. The Employers stressed that this approach would allow States, under specified conditions, to implement progressively certain provisions of the Convention over a period of time, and that this would lead to more widespread ratification. The Employers’ presentation on this approach is set out in Appendix I to the Summary. The participants sought clarification on various aspects of the proposal, in particular as concerns the basic level of protection provided to fishers and the possible impact on the exercise of port State control. There was a general willingness to examine further the “progressive implementation approach” and to explore the possibility of incorporating this approach in the Convention.

### ***Medical examination and certification***

The Round Table discussed the conditions under which flexibility could be provided as regards the requirement for fishers to hold a medical certificate. The debate focused on the possibility of exemptions for certain fishers or fishing vessels where there was lack of infrastructure necessary for conducting medical examinations and issuing medical certificates. The discussion also led to the suggestion by the Employers’ and Workers’ representatives that the progressive implementation approach noted above might provide such flexibility.

### ***Manning and hours of rest***

**The Round Table discussed the possibility of revising Article 14 of the proposed Convention.** This included an exploration of how to take into account the need to deviate, for certain safety and operational reasons, from strict application of the existing text. Consideration was given to drawing upon, as appropriate, certain provisions of Standard A2.3, Hours of work and rest, in particular paragraph 14, of the Maritime Labour Convention, 2006. Generally, there was a sense that progress was being made, and would continue to be made, on this issue through informal consultations.

**Accommodation**

The Round Table discussed whether changes were needed to Article 28 or Annex III, or both, of the proposed Convention, in particular the length/gross tonnage equivalency figures in paragraph 7 of Annex III. To help others to understand its position, the Government of Japan provided additional technical information to the Round Table, which is set out in Appendix II of the Summary of the discussion. Participants discussed whether the provision on “substantial equivalence” currently included in Article 28, or perhaps other possible provisions, could be used to address this issue to the satisfaction of all parties. Informal consultations on this point were deemed positive.

**Other issues**

The Round Table discussed how private employment agencies, which were being increasingly used in the fishing sector in some countries, might be taken into account in the Convention. The participants discussed the possible relationship of other ILO standards, such as the Private Employment Agencies Convention, 1997 (No. 181) and the proposed Convention and clarification was sought regarding the difference between recruitment and placement services and private employment services, as defined in Article 1, paragraph 1(b), of Convention No. 181. The participants described their national experiences with private employment services, and sought clarification on certain issues.

Other issues raised concerned the provisions relating to training and minimum age. These are set out in the Summary of the discussion.

**Continued consultations**

The importance of continued informal consultations among the employers’ and workers’ organizations and their representatives was stressed and encouraged. It also was suggested that the Government regional coordinators could play a role in facilitating communication among governments. To facilitate the exchange of information, the Office has included the list of participants from the Round Table in an appendix to the Summary of the discussion. The importance of setting aside sufficient time at the Conference for bilateral discussions and group meetings was emphasized.

## Summary of the discussion

### Introductory remarks

1. The Deputy Secretary-General of the meeting welcomed participants to the Interregional Tripartite Round Table on Labour Standards for the Fishing Sector. She recalled the events that had led to the convening of the Round Table, stressing the opportunity offered by these informal consultations to reflect on what had been accomplished so far, to consider in some depth a number of points where consensus had not yet been achieved and to explore possible ways forward which would enable the tripartite constituents to meet their objectives. The aim of the meeting was to facilitate the work of the Committee in June 2007. The speaker concluded by introducing the Chairperson of the Round Table, Captain Nigel Campbell of South Africa.
2. The Chairperson welcomed the participants and reminded them of the need to focus on the questions relevant to each session in order to make ideal use of the short time given to the Round Table.
3. The Executive Secretary introduced the documents for the Round Table. These included the following: the *Report of the Committee on the Fishing Sector, Provisional Record No. 19*, International Labour Conference, 93rd Session, 2005; *Work in the fishing sector*, Report IV(1), International Labour Conference, 96th Session, 2007, which contained the questionnaire sent to ILO member States in 2006; and the “Advance summary of replies”, which reflected the replies received by 20 October 2006 from almost 50 member States as well as 20 employers’ and workers’ organizations. Since then, the Office has received replies from more than a dozen other countries. These would be included in the report prepared for the Conference.
4. The Employers pointed out that the 2005 text had failed, because several countries, which together represented a majority of the world’s fishers, could not accept the text adopted by the Committee. The Employers had abstained, since they deemed widespread ratification impossible. The objectives of the Convention were (and continued to be) to address a number of issues regarding the labour protection of fishers and to be effective for the majority of the world’s fishers. The conditions of success were that the Convention: be sufficiently broad and flexible; take account of the differences in fishing fleets and types of fishing; be based on principles which could be implemented in a manner which would accommodate the diversity of the economic and social conditions of countries; and not be overly prescriptive. The 2005 draft had been overly ambitious and had not met these conditions. Therefore, a new approach was needed. The Employers made the following suggestions: that the discussions in 2007 be based on the 2005 text; that certain provisions be subject to a “development clause” (e.g. those on minimum age and on certain aspects of medical fitness, manning and hours of rest, fishers’ work agreements, accommodation and food, medical care, occupational safety and health and accident prevention, social security, and work-related sickness, injury and death); that alternative wording be used to address specific national and regional requirements; that certain provisions be made more flexible (e.g. those on medical examination, manning and hours of rest and fishers’ work agreements); and that Annex III be placed in whole or in part in a Recommendation. The Employers’ presentation appears in Appendix I.
5. The Workers’ group welcomed the meeting, which would look at the replies to the questionnaire, and noted that it did not have the mandate to adopt any decisions or conclusions. The Workers considered that appropriate as many of the Governments that had actively participated in the Conference were not present. They hoped that it would allow a frank exchange of views. The group noted that the current situation had arisen because the Convention had failed to meet the quorum by a single vote. Otherwise, it would have been adopted. The Workers also noted that around 50 per cent of the replies had indicated that those replying were satisfied with the text or favoured as few changes as possible. While the Workers agreed with that position, they were willing to explore ways to resolve some of the difficulties. However, that should not be done by fundamentally weakening the provisions. The speaker noted that since the last meeting, the ILO had adopted the Maritime Labour Convention, 2006,

which aimed to be the fourth pillar of the global regulatory regime for maritime transport. Fishing was a hazardous occupation and fishers were also entitled to decent work. The Workers expected the fishing Convention to reflect that situation and to provide a tool which could go some way to combat the fundamental problems in the industry. They recognized that the Convention sought to cover very different fishing operations and that small-scale fisheries were different from the larger industrial fisheries, where the fishers lived and worked on the vessel, often for considerable periods of time. Therefore, the Convention must provide the necessary protections. It was the Workers' hope that the meeting could play an important role in ensuring that the June Conference would be easier than it might otherwise be, and that it would produce a successful outcome.

6. A number of Government representatives made introductory statements welcoming the opportunity to discuss the issues. One Government that had great difficulties with the draft adopted by the Committee in 2005, pointed out that it would pursue a new approach and start working towards ratification, if its delegation's proposals could be incorporated in the draft. A Government that had supported the 2005 draft, pointed out that every possible effort needed to be made so that the draft instrument would constitute an acceptable working text for the Committee's negotiations and lead to the adoption of a Convention. There were differences between economic and social conditions of countries and in fishing fleets and types of fishing operations, but the products of the sector were distributed around the world. The link between working conditions and the global distribution of the fishing industry should not be overlooked. In order to safeguard fishers' rights, the delegation supported a new Convention that would be flexible in the application of its provisions, easily ratifiable, implemented in a uniform manner and enforced. For vessels subject to port State control, flag States and port States required uniform provisions that would ensure the required certainty. At the same time, the concept of "substantial equivalence" used in Convention No. 147 and flexibility clauses found in the Maritime Labour Convention, 2006, could be included to provide flexibility.
7. The observer from the United Nations Food and Agriculture Organization reminded participants of the joint work of FAO, ILO and IMO on the *Code of Safety for Fishermen and Fishing Vessels, 2005*, as well as the *FAO/ILO/IMO Voluntary Guidelines for the Design, Construction and Equipment of Small Fishing Vessels, 2005*. Since certain elements found in these documents were also dealt with by the draft Convention, it was important to ensure coherence. The speaker also drew the attention of participants to a new draft safety standard, entitled "Safety recommendations for decked fishing vessels of less than 12 metres in length and undecked fishing vessels" that was currently being developed by FAO, ILO and IMO with the target completion date of 2009 (see: [www.sigling.is/fvs-iscg](http://www.sigling.is/fvs-iscg)). It might be necessary to revisit certain parts of these draft safety recommendations as a follow-up to the International Labour Conference in 2007, in order to ensure consistency with the proposed fishing Convention and Recommendation.

**Question 1: The proposed Convention concerning work in the fishing sector provides, in Part I (Definitions and scope) the possibility for the competent authority, under certain conditions, to exempt certain fishing vessels or fishers from some or all of the provisions of the Convention. Should any additional flexibility be introduced as regards scope? If so, please indicate in respect of which provisions and under which conditions**

8. The Executive Secretary provided an overview of the replies received.

9. The Employers and Workers were in agreement that the question related to how to articulate the notion of a “development clause”.<sup>1</sup>
10. The Employers, when asked to provide more details on the main elements of possible provisions that would introduce progressive implementation into the Convention, said that these might, for example, provide that a country could initially ratify the Convention and then, after consultation, progressively implement certain provisions in the Convention to the extent that certain factors, such as of economy, educational system, health services, technological capabilities, and administrative, educational and technical facilities were sufficiently developed or organized to enable the implementation of the provision concerned. The Convention might further provide that the first report to the ILO should list what had not been implemented and explain the reasons. Subsequent reports would list not only what had been implemented but also the steps taken to progressively implement the provisions that had not been fully implemented. The reports would also have to reflect the respective positions of representative organizations of fishers and fishing vessel owners. The Employers indicated that these provisions implied that their position as explained above was in addition to the existing Article 3.
11. A Government representative noted that no one at the Round Table had challenged the concept of port State control, and the “no more favourable treatment” clause, as concerned fishing vessels. There seemed to be acceptance of the principle of progressive implementation. However, it was necessary to indicate clearly which vessels would be subject to such control. Using the example of his own country’s practice, he stated that all fishing vessels, no matter what flag they flew, were treated in the same manner as those flying the national flag. Any other approach would create confusion. All other Governments that spoke confirmed this principle.
12. The Worker spokesperson agreed with these views.
13. A number of Governments raised the question of the possibility of different inspection standards for national versus foreign-flagged vessels.
14. One Government representative observed that since 1996 the more serious accidents involving fishing vessels with lengths of over 24 metres in his country’s waters involved foreign-flagged vessels. Without prejudice to the recognition that some countries would require flexibility for economic and social reasons, it was important that in the area of safety and health, equal treatment between national and foreign vessels was ensured. Another Government representative pointed to the possible complexity faced by port State inspectors if different provisions of the Convention were applicable to different fleets, i.e., should some flag States exempt their fleets from certain provisions. A Government regional coordinator emphasized the need for a fair inspection regime for both national and foreign vessels. She drew attention to the ILO inspection guidelines for Convention No. 147 as a basis for such fairness.
15. The Chairperson observed that the situation referred to was far from unique, but emphasized that there should not be different inspection standards. He requested the Office to clarify which provision of the draft Convention would address this issue.
16. The Executive Secretary noted that the applicable provision would be Article 44, which stipulated that “Each Member shall apply the Convention in such a way as to ensure that the fishing vessels flying the flag of States that have not ratified the Convention do not receive more favourable treatment than fishing vessels that fly the flag of Members that have ratified it.” It was therefore clear that the draft Convention did not provide for more lenient treatment for foreign fishing vessels than national vessels of ratifying Members.
17. A Government representative understood the concerns raised by the previous Government speakers, but believed clarification of which vessels would be subject to port State control

---

<sup>1</sup> Henceforward, in order to avoid possible confusion, the term “progressive implementation” has replaced the term “development clause”.

- might be the answer. He also suggested that once the Convention and the Recommendation were adopted, a Conference resolution could call on the ILO to develop inspection guidelines.
18. The Employers stressed that a country with the necessary means to implement the Convention must do so in its entirety; it did not matter whether such a country was a developed or a developing country. The Employers, reacting to the previous speakers, suggested that there might not be flexibility as concerns those vessels visiting foreign ports. A question remained as to what type of inspection regime would cover foreign vessels that did not actually enter port.
  19. Another Government regional coordinator hoped that the discussions could be extended to the diverse situations related to fishing, not only on oceans, but also on lakes, rivers and other inland waters.
  20. The Chairperson shared his country's own approach to inspection which could be summarized as "no more favourable treatment than that applicable to national flag fishing vessels". If foreign vessels wished to fish in the waters of his country then they had to comply with his country's standards.
  21. A Government representative clarified that his country did not apply any flexibility as regards fishing vessel inspections, noting that only national flag fishing vessels were permitted to fish in his country's waters and they were required to have a minimum percentage of nationals on board.
  22. Another major question raised by a number of Governments involved "self-employed fishers" and whether they were covered or excluded in accordance with Article 3 of the draft Convention. This was the only area on which flexibility might be required and, in fact, two Government replies appeared to propose the exclusion, or possible exclusion, of the self-employed.
  23. The Employer spokesperson noted that the text of the 2005 draft Convention had very clearly included the self-employed, even though it was recognized that, in some cases, they might not be able to comply with its provisions. The Worker spokesperson agreed with the Employer spokesperson that the 2005 draft Convention had included the self-employed, except those exempted under Article 19.

**Question 2: Articles 10, 11 and 12 of the proposed Convention concern the medical examination of fishers. Should additional flexibility be introduced into these Articles? If so, in respect of which specific provisions and under which conditions?**

24. The Executive Secretary provided an overview of the replies received on Articles 10, 11 and 12.
25. The Employers had, when discussing the draft text, asked themselves whether it was likely that the new Convention would provide protection for more than 50 per cent of fishers. Based on this principle, they had concluded that the significant issue was the availability of the necessary infrastructure for medical examinations and the issuance of medical certificates. In its reply to the questionnaire, the Government of the United Kingdom had suggested amending paragraphs 2 and 3 of Article 10. The Employers supported amending paragraph 2, as suggested in that proposal, but did not think that the reference to boat length or the duration of the voyage in paragraph 3 was necessary. Only the existence (or non-existence) of sufficient infrastructure mattered.
26. The Workers believed that the draft text provided sufficient flexibility, a view supported by the majority of replies. However, they were prepared to discuss the issue in the context of possible progressive implementation as the Employers proposed.
27. The Employers pointed out that they had suggested progressive implementation for certain provisions, so that countries whose infrastructure and institutions were not sufficiently

developed to implement certain provisions or requirements immediately could nonetheless ratify the Convention. Such clauses would give those States the opportunity to “grow into” these provisions and requirements within a certain period of time: their progress should be monitored through social dialogue and reporting to the ILO.

28. In response to a request for clarification, the representative of the Legal Adviser provided an overview of the different types of flexibility clauses used in ILO standards. These were based on paragraph 3 of article 19 of the Constitution. Typical examples of flexibility provisions were exclusions in scope (either initial by declaration or after ratification). Exclusions at the time of ratification had the advantage of making public the limited scope, since exclusions would be communicated to all member States, informing them of the level of commitment of the ratifying State. Exclusions after ratification did not grant the same level of public notice, but almost always established an obligation on member States to fully inform the Office in article 22 reports, and were thus subject to examination by the ILO supervisory machinery. While there were precedents for obligations which may be implemented progressively, precedents were not explicit as regards the definition of progress or implementation stages, as envisaged by the Employers.
29. When asked about the proposal of the Government of the United Kingdom, the Employers affirmed that it did not simply waive the need to issue a certificate, but referred to both examination and certification. There were countries that faced difficulties in providing the required infrastructure, and too stringent a regulation could make it hard for them to ratify the Convention. In the event that no machinery existed to determine the existence of a country’s medical infrastructure, the Conference might decide to create such machinery. Alternatively, grace periods of five or ten years could be considered.
30. The Office was asked to clarify its understanding of the proposal of the Government of the United Kingdom. A representative of the Office stated that a certificate was the outcome of an examination; the proposal to waive the certificate would thus also encompass the examination itself.
31. The Workers did not support the wording of the proposal of the Government of the United Kingdom. They were generally open to introducing progressive implementation, but proposed several criteria that should be met. Such a clause should refer to the country’s level of development and infrastructure, be limited in time, be objectively justified, and be limited in relation to the size of the vessel and the area and type of operation. In any case, exceptions should only be granted in consultation with the social partners.
32. A Government representative expressed concern that any distinction between developing and developed countries would appear arbitrary in this context. In response, the Employers stated that the provision would not specifically refer to developing countries; instead it would refer to countries that did not have the appropriate infrastructure.

**Question 3: Article 14 of the proposed Convention concerns level of manning and minimum hours of rest for certain categories of vessels. Should changes be made to this Article? If so, please indicate the changes proposed and specify the reasons**

33. The Executive Secretary provided an overview of the replies received on Article 14.
34. The Employers reminded the participants of the nature of fishing and concluded that the minimum hours of rest included in the draft Convention were problematic. The industry had changed dramatically in the last decade, and labour costs were of utmost importance. Fishing vessel owners could not afford to have surplus crew members on board. The provision needed to be adjusted to reflect this. The reply of the Government of the United Kingdom had underlined the importance of derogation and was clearer than the existing language, which used

- the ill-defined phrase “alternative requirements”. It was important that employers and workers and their representatives had the right to waive these requirements.
35. The Workers agreed with the Chairperson, when he reminded participants that fatigue had been identified as the main cause of maritime accidents. Since they also understood the Employers’ concerns, they were open for debate and discussion. The proposal contained in the reply from the Government of China seemed interesting, as well as the suggestion contained in the reply of the Government of New Zealand that “fatigue management plans” be established. In both cases, however, additional explanations would be helpful.
  36. In response to a request for clarification, the representative of the Legal Adviser pointed to the definition of “competent authority” under Article 1(b) of the draft Convention and stated that this definition would not conflict with the more stringent requirements made in the EU Directive concerning certain aspects of the organization of working time (2003/88/EC) as far as it required that exceptions be made by means of laws, regulations or administrative provisions.
  37. The Employers noted that the proposal contained in the reply of the Government of the United Kingdom sought to ensure that the Convention and the Directive were compatible. That proposal was deemed to be sufficiently broad by one Government representative, while another pointed out that compatibility with the Directive was also ensured by Article 6, paragraph 2, of the draft Convention.
  38. One Government representative supported the Employers’ position and pointed out that it was difficult to determine what “alternative requirements” could be established in view of the fact that paragraph 2 set out an absolute number of hours of rest.

#### **Question 4: Article 28 and Annex III of the proposed Convention concern fishing vessel accommodation**

##### **(a) *Should changes be made to these provisions? If so, in respect of which provisions and why?***

39. The Executive Secretary provided an overview of the replies received regarding Article 28 and Annex III.
40. The Employers stated that they had problems with certain aspects of the accommodation provisions. They looked to the Asian governments, especially the Government of Japan, for possible solutions in this regard.
41. The Workers informed the meeting that they had had discussions with the Government of Japan and were making progress in the development of an overall package.
42. A Government representative was encouraged by the progress of discussions between the Workers and the Government of Japan and hoped any solutions proposed would be acceptable to the Employers as well. A “substantial equivalence” provision was included in Convention No. 147 and its Protocol of 1996 and was applied to Conventions Nos. 92 and 133 on accommodation of crews, included in their appendices. He asked how the Committee of Experts applied “substantial equivalence” to the numerical values contained in these Conventions and asked why a “substantial equivalence” provision would not provide enough flexibility in the application of the accommodation requirements. He also noted that it would be preferable if fishing vessels built in one country or one region could be sold openly on the international second-hand market.
43. A Government representative said that the main problem with the draft instrument lay in certain specific numerical figures in the accommodation provisions. His Government would, nonetheless, prefer realistic figures which could be enforced strictly rather than the substantial equivalence provision in Article 28(2).

44. The Deputy Legal Adviser, in response to a question raised concerning the application of substantial equivalence as regards numerical parameters in the jurisprudence of the Committee of Experts on the Application of Conventions and Recommendations, quoted the General Survey on labour standards on merchant ships (1990). In particular, he referred to paragraph 77 of the General Survey, which says "... some standards in the Appendix Conventions have explicit quantifiable elements in respect of which it may be possible to determine that substantial equivalence involves a commitment to less than 100 per cent: this might apply as regards, for example, the length of a benefits period, or the rate of benefits, in Conventions Nos. 55, 56 and 130; or some of the details of dimensions of sleeping rooms in Article 10 of Convention No. 92; it may even apply to the periodicity of medical examinations under Convention No. 73". He added that, needless to say, the Committee of Experts would only accept possible reductions based on sound grounds.
45. Answering a subsequent query from the Employer members, he stressed that the jurisprudence of the Committee of Experts on substantial equivalence is in general quite strict, in the sense that the concerned State has, on the one hand, to accept appropriately the general goal of the relevant Convention and, on the other hand, ensure that in all material respects the subordinate goals of the Convention are achieved. However, this refers in particular to non-quantifiable elements, as the Committee of Experts says in the same paragraph of the General Survey: "However, in respect of non-quantifiable elements such determination would be difficult, and, especially where questions of safety are involved, it might be impossible to make. In such cases, to be faithful to the wording and spirit of Article 2(a), the Committee's view of what is required is bound to prefer more strict adherence to the provisions of the Appendix Conventions."
46. The Employers, referring to the planning and control paragraphs (8-10) in Annex III, remarked that there should not be any requirement for existing vessels to be retrofitted, as this would result in additional costs to a buyer of second-hand tonnage. A vessel which complied with the Convention in one country should also be deemed to comply in another at a later date.
47. An observer suggested that the formulation "should preferably be at least [numerical figure], but in any case not less than [numerical figure]" could be used to provide flexibility, noting this had been used in other international fishing safety instruments concerning vessel construction.

**(b) *In particular, should the gross tonnage equivalency figures contained in paragraph 7 of Annex III be changed? If so, how and why?***

48. The Executive Secretary provided an overview of the replies received.
49. The Employers announced that they were prepared to show flexibility on this issue.
50. The Workers felt that progress was possible and announced that, provided a package deal could be reached, they were ready to meet the key concerns of the Government of Japan.
51. The representative of the Government of Japan appreciated the sympathy shown for his document. He insisted that regulating two parameters (i.e. length and gross tonnage) was a difficult exercise, not supported by his country, which used gross tonnage. Conversion between gross tonnage and length would be applied to all relevant parts of Annex III. He introduced diagrams and illustrations which, with the agreement of the Round Table, are reproduced in English in Appendix II.
52. Several Government regional coordinators indicated that there had not been time to consult on the document provided by the Government of Japan and indicated that they would bring it to the attention of their group members.

**(c) Should the provisions concerning specific dimensions of accommodation spaces and their furnishings be changed? If so, how and why?**

53. The Executive Secretary provided an overview of the replies received.
54. The Employers recalled their remarks concerning question (a) and looked forward to the possible solutions which would hopefully come out of the discussions between the Workers and the Government of Japan.
55. The Workers said that their group would study the Japanese proposal.
56. The representative of the Government of Japan explained that its proposals were based on Convention No. 126, but were stricter. He could agree to the earlier proposal to use the formulation “should preferably be at least [numerical figure], but in any case not less than [numerical figure]” as it involved the use of specific numerical figures which could be enforced.

**Question 5: Please indicate any other issues which should be addressed in relation to this agenda item**

57. The Executive Secretary explained that this question offered the opportunity to comment on any other issues of concern. Topics raised by participants at the Round Table included private employment agencies, training and minimum age, and other changes.

***Private employment agencies***

58. The Employers indicated that the use of private employment agencies was a growing phenomenon in the fishing sector. These agencies were private companies that hired fishers and issued contracts, or private companies that worked under contract with vessel owners. They were not simply recruiting or placement agencies, but were themselves the actual employer. The Convention should recognize the existence of these agencies. In response to an intervention by a Government representative seeking assurance that any provisions would not interfere with existing public employment agencies, the Employers noted that these agencies differed from public employment agencies in that they were employers and not merely involved in recruitment and placement. They also clarified that they were not referring to recruitment centres, jointly operated by employers and workers.
59. One solution proposed by the Employers was to draw on the wording of the Private Employment Agencies Convention, 1997 (No. 181), which listed ten areas as a foundation which could be built upon. The provisions set out in Article 12 addressed such issues as: collective bargaining; minimum wages; working time and other working conditions; statutory social security benefits; access to training; protection in the field of occupational safety and health; compensation in case of occupational accidents or diseases; compensation in case of insolvency and protection of workers’ claims; maternity protection and benefits; and parental protection and benefits.
60. The Workers said that they recognized the problem had to be faced, would be prepared to consider the proposals by the Employers and would provide their own draft clause.
61. The Employers were also prepared to address a concern of the Workers, in that the recognition of private employment agencies would not impinge upon their capacity to place a lien on a vessel, or diminish the rights of workers.

***Training and minimum age***

62. The Workers agreed with the reply submitted by the Government of Argentina, i.e. that competency and training should be the subject of a binding provision and that because work in the fishing sector was hazardous, the minimum age should be maintained.

63. On the subject of minimum age, one Government representative noted that the draft Convention as it now stood had been carefully worded to be consistent with the provisions of existing ILO Conventions concerning minimum age and therefore should not be altered.
64. The Employers, without suggesting change, felt that minimum age might be a subject for progressive implementation, without diminishing existing obligations under existing Conventions.
65. The Workers, however, believed that the current wording was already the result of compromise and should not be the subject of further debate.
66. One Government representative favoured 18 as the minimum age, another referred to “national traditions”, while others referred to the need to be consistent with Convention No. 138 as well as Convention No. 182 and Recommendation No. 190. One referred to the existing text as a “delicately balanced compromise”. Another said that given the compromise character of Article 9, paragraph 1, the minimum age should not be part of the progressive implementation approach. The first paragraph would allow a minimum age even lower than 16.

### ***Other issues under question 5***

67. It was pointed out that replies to question 5 had drawn attention to a number of important matters that the Convention should address.
68. The Workers noted that the Canadian Labour Congress (CLC) had expressed the views shared by a number of other workers’ representative organizations in stating that the ILO should be more active in the fisheries sector and should actively promote decent work for fishers.

### ***Results of joint Employer-Worker meetings***

69. The Employer spokesperson, summarizing the substance of the meeting with the Workers, explained that the two groups had not discussed Annex III, nor looked at wording, but rather examined some of the draft non-papers prepared by the social partners. On manning and hours of rest, the Employers’ non-paper was discussed. The Workers were considering making some amendments and recognized the merit of deviating from the strict application of the existing text in some instances such as for safety reasons or during stowage of the catch. As regards private employment agencies, there were two relevant non-papers, and there was an agreement in principle to incorporate recognition of such private agencies in the Convention. This raised the questions of whether there should be any link with Convention No. 181 or whether the main elements of that Convention should be set out in the fishing Convention. The third area of discussion concerned the “progressive implementation” approach. There was some degree of agreement that this could facilitate ratification. The objective was not to exempt countries from applying parts of the Convention, but to encourage them to commit themselves to its full application. By June 2007 it would be necessary to identify the provisions which would have to be applied immediately and those which could be progressively implemented. The Employers looked to the Governments to indicate which parts of the Convention were potential obstacles to immediate ratification and should therefore be subject to progressive implementation.
70. The Worker spokesperson generally agreed with the Employers’ statement. He indicated that an agreement was within reach on manning and hours of rest. He said that certain paragraphs of Regulation 2.3 of the Maritime Labour Convention, 2006, could be drawn upon to make some adjustments to the provisions of the fishing Convention. As for employment agencies, further discussions were needed to formulate a text, taking account of Convention No. 181. As for the issue of progressive implementation, it was necessary to look at the areas and Articles to which this would apply. The social partners might need to continue discussions until the International Labour Conference in June 2007.
71. The Governments remarked that it was encouraging that the bilateral discussions between the Employers and Workers were progressing, but at the end of the day it was the Governments that had to ratify the Convention, enforce its provisions and report to the ILO on implementation. They had a number of specific questions, as follows: (1) To which provisions

would progressive implementation apply? Surely, fundamental rights and the core Conventions could not be the object of progressive implementation, nor could the minimum age which was already set. Certain thresholds should be established. (2) When would the further discussions take place and when would they be concluded? (3) Rather than circulate individual non-papers, could the social partners not put more concrete proposals on the table in the form of bullet points for all Governments to see? (4) It was not clear to some Governments what the Employers were seeking by including the concept of “private employment agencies” in the Convention. Some Governments wondered whether this was not a means for Employers to avoid their responsibilities. Who would be liable if wages and social security deductions were not paid? A clear delineation was needed of the responsibilities that would remain with the vessel owners. Many Governments did not yet have “private employment agencies” within their jurisdictions, so perhaps such agencies should be dealt with in the Recommendation.

72. When asked about the legal feasibility of the proposed “progressive implementation”, the representative of the Legal Adviser observed that the proposal seemed to be in line with flexibility provisions contained in existing ILO Conventions or a combination thereof. However, some questions needed further consideration. First, flexibility provisions were exceptions to the rule established by the Convention and this was usually reflected in the drafting. One would also need to know how the proposed clause would relate to the flexible provisions that were already included in the draft Convention, for example, as contained in Article 10, and, in particular, whether it would work as a blanket clause covering all those provisions. Furthermore, given that the Convention would allow for numerous exceptions, should the Convention not provide for publicity when a Member decided to rely on those exceptions? In this connection, Article II(7) of the Maritime Labour Convention, 2006, provided an alternative to the traditional declaration at the time of ratification. Finally, for the purpose of supervision by the ILO, the justification for relying on exceptions and the criteria for measuring progressive implementation would need to be specified in the text.
73. A representative of the Office observed that the term “progressive implementation” which was already included in Article 3 of the draft Convention, had been used in recent instruments such as the Night Work Convention, 1990 (No. 171) or the Maternity Protection Convention, 2000 (No. 183), and had been introduced more than 50 years ago in the Social Security (Minimum Standards) Convention, 1952 (No. 102). The application of the proposed progressive implementation formula was not expected to affect in any particular manner the reporting cycle for member States ratifying the new Convention. From a substantive point of view, the real issue was the extent of the list of provisions to which progressive implementation would apply. The more extensively the concept was used, the greater the risk of reducing the normative content of the Convention, although the proposed ten-year deadline for the full application of the provisions of the Convention offered a safeguard. More generally, while the quest for flexibility was traditionally linked to ratifiability concerns, the question of the real impact of flexibility clauses in terms of the number of ratifications they ultimately generated remained open.
74. The Employers felt that the correct term was “progressive implementation”, not flexibility, as there would be no exemptions. Within ten years, there would have to be full application of all the provisions of the Convention. The existing Conventions on fishing had an abysmal ratification record. Now was an opportunity to improve the situation. The Employers added that private employment agencies were as defined in Convention No. 181. The employment agencies, rather than the shipowners, employed the fishers directly. They were not mere recruitment or placement agencies.

## Final discussions

75. Following consultations, the Employers informed the other participants that the social partners had found common ground on a number of issues, including the possibility of introducing a progressive implementation clause. It was understood that such a provision should not have repercussions on member States’ obligations resulting from ratifications of other Conventions: any effects should be clearly limited to the Convention itself. All provisions of the Convention

subject to progressive implementation would be mandatory; the only question was the time allowed to achieve full implementation. It was also understood that member States should only invoke the progressive implementation clause if a clear and objective justification, linked to infrastructural shortcomings, existed. The parties also recognized that this clause should not be applicable to all vessels. Common ground had not been found, however, on the vessels to which this clause could not be applied, though consideration was being given to, for example, vessels subject to port State control, those engaged in high-sea fisheries or those of a certain size. Further consultations were also needed in relation to limits on how much time could be given with regard to progressive implementation, and to which Articles the clause could be applied. However, as examples, the Employers and Workers had identified Article 23 as a provision that should not be subject to the clause and Article 10, paragraph 1, as a provision that could be subject to progressive implementation.

76. Turning to hours of work and rest, the Workers pointed out that a common understanding was emerging on how the issue could be resolved. The solution could draw upon relevant provisions in the Maritime Labour Convention, 2006 (in particular, paragraph 14 of Standard A2.3), adjusted as necessary, and might mirror Convention No. 180 to some extent.
77. The Employers explained that their group's primary concerns had been the focus of their deliberations during the Round Table. Additional Employer concerns could be addressed in discussions with the Workers prior to the Conference, and, ideally, could be the subject of jointly supported amendments.
78. A Government representative noted that the provisions on port State control contained in the draft were different from those found in the Maritime Labour Convention, 2006, and wondered whether additional elements would not need to be added for the sake of greater coherency.
79. The Executive Secretary explained that the draft provision drew upon the main elements of port State control provided for in Convention No. 147. The draft provisions were not as detailed as those included in the Maritime Labour Convention, 2006, nor were they as far-reaching.
80. The Government representative suggested that this issue should be further discussed at the Conference.
81. As regards Annex III, the Workers reported that the discussions had been encouraging. In principle, a way had been found to take into account the core issues of concern to the Government of Japan. The bilateral discussions would continue and a fair chance existed for a joint resolution to be found that could be presented to the Workers' group at the Conference for discussion and possible endorsement.
82. The Government representative of Japan confirmed this view and explained that possible solutions could include the setting of numerical ranges, instead of absolute figures.
83. In response to a request for clarification, the representative of the Legal Adviser recalled the opinion given by the Legal Adviser to the International Labour Conference in 2005 which was mentioned in the introduction of Report IV(1). It had clarified that when the Committee took up the matter in June 2007, it would need to review the Recommendation adopted in 2005 and probably adopt a new Recommendation to replace it.

## Closing comments

84. Employers, Workers and Governments thanked the Chairperson for his skilful chairmanship and the Office for organizing the Round Table. The informal atmosphere had fostered an open and fruitful debate that had facilitated consensus.
85. The Employers stressed that when determining the draft timetable for the Committee at the Conference, the Office should provide sufficient opportunities for bilateral discussions, since these were often the most productive way forward. The emerging consensus on a number of issues (e.g. employment agencies, progressive implementation and hours of rest) had led the Employers to believe that an instrument could be created that would provide protection to the majority of the world's fishers.

86. The Workers reminded the participants of their disappointment when the Convention was not adopted. The group continued to believe that the 2005 draft set a good minimum standard for the industry, but recognized that others had encountered problems with the text. This Round Table followed by further consultations should lead to proposals that could be agreed to by the Conference Committee and could thus ultimately contribute to a successful outcome of the 2007 Conference.
87. A Government representative supported the Employers' suggestion to allocate more time at the Conference to bilateral or tripartite discussions. The process leading to the adoption of the Maritime Labour Convention, 2006, had shown how extensive consultations outside of the formal standard-setting framework could be quite helpful.
88. In her closing remarks, a Government representative pointed out that all workers, irrespective of their home, residence or flag State vessel had the same right to protection at work and, therefore, a progressive implementation clause needed to be transitory and to safeguard fundamental rights. The principle of "no-more-favourable" treatment in the Convention and a clear set of minimum, non-alienable standards would encourage wide application and would provide a real starting point for continuing improvement and desirable tripartite dialogue.
89. Given the importance of the fishing industry for her nation, a Government representative pointed out that it was important to have a Convention for the sector. The 2005 text would serve as a good basis on which to work and should be modified as little as possible. With regard to flexibility, it was necessary to achieve an appropriate balance which would ensure both substantive protection and the flexibility needed for wide ratification. One way of providing flexibility was to include periods of transition, a suggestion that her delegation was willing to consider, in the context of revisiting flexibility provisions throughout the draft, in order to achieve a substantive result in June 2007.
90. Another Government representative recalled that large sections of the draft were mature text. While the progressive implementation approach should be explored, it was important to bear in mind its potential impact on port State control and certification provisions. He was convinced that the spirit of tripartism and consensus would prevail in the Committee and make the adoption of a Convention a reality.
91. A Government representative reiterated that it was important to establish a Convention that would be widely ratifiable. Good progress had been made during the Round Table and consensus on principles had been found. He was confident that in further consultations, agreement could also be found on the specific details.
92. Another Government representative acknowledged the tremendous work undertaken by the Office to assist the social partners in achieving a balance of interests and recalled similar ILO efforts. It was to be hoped that the outcome of the Round Table would contribute to creating an instrument that would provide the protection fishers deserved.
93. A Government regional coordinator reiterated her delegation's aim of an instrument with appropriate protection for fishers that was flexible, not overly prescriptive and widely ratifiable.
94. Another Government regional coordinator pointed out that some concerns (e.g. the application to small-scale fishing) continued to exist, but that most of the draft was mature text and no longer needed to be debated. Her group supported the creation of a Convention that would protect fishers and encourage widespread ratification.
95. Another Government regional coordinator deemed that the Round Table had bridged the gaps that had been apparent in June 2005. Discussions to create an instrument, which would be beneficial to all, would be ongoing. Further consideration needed to be given, inter alia, to Article 9 and its relationship to the principles of Convention No. 182 and Recommendation No. 190, monitoring arrangements similar to those included in the Declaration on Fundamental Principles and Rights at Work, 1998, and the introduction of a progressive implementation clause.

- 96.** A Government regional coordinator confirmed the strong commitment to make all efforts towards a Convention at the next International Labour Conference, which would focus on the requirements of the sector and conform to core labour standards, while at the same time making use of the helpful ideas and concepts introduced in the Round Table to encourage ratifiability of the Convention and its applicability in practice.
- 97.** Another Government regional coordinator reminded the participants of the importance of the sector for his region. An easily ratifiable and applicable Convention would make a great difference. In order to find consensus in June and achieve a satisfactory outcome, every effort should be made to address and resolve the concerns of the constituents. He invited the Office to contribute to informal discussions by his group during the Governing Body in March 2007.
- 98.** An observer was very encouraged by the outcome and was looking forward to the Conference and the successful adoption of a Convention.
- 99.** In closing the meeting, the Chairperson thanked all participants for the dignified manner in which they had undertaken their work, their expertise, and the progress they achieved, and looked forward to the further progress they would make in June 2007.

## Appendix I

### Employers' presentation at the Interregional Tripartite Round Table on Labour Standards for the Fishing Sector (Geneva, 11–13 December 2006)

#### Slide 1. Work in Fishing Convention

##### *Real protection or paper tiger?*

International Organisation of Employers

#### Slide 2. Work in Fishing Convention

##### *The employers still aim at real protection for the majority of the world's fishers*

#### Slide 3. Work in Fishing Convention

##### *Why did the 2005 text fail?*

- The 2005 failure was more than just “an accident at work”
- Several countries, representing a majority of the world's fishers, could not accept the text presented by the Committee on the Fishing Sector because it had lost track of the conditions for success the Governing Body had set out
  - 71 per cent of the Asian countries did not support the text
  - Roughly 83 per cent of fishers and 85 per cent of decked vessels are from Asia

#### Slide 4. Work in Fishing Convention

##### *Why did the 2005 text fail?*

- The employers abstained en masse because
  - Due to its shortcomings, we feared the Convention would never be rewarded with widespread ratification
  - The group had great doubts about the effectiveness of the proposed text, especially for developing countries, and feared it would thus overreach itself just as existing Conventions on fishing had done
    - The Committee had deviated considerably from its guideline (conditions for success)
    - The past had shown that the existing instruments on fishing had only been relatively successful in Europe

## Slide 5. Work in Fishing Convention

### *Why did the 2005 text fail?*

- Past ratifications by countries present at ILC 93
  - 73 per cent ratified none of the present Conventions
  - 11 per cent ratified one
  - 7 per cent two
  - 6 per cent ratified three
  - 7 per cent ratified four
  - None ratified all five
- Significantly in Asia, where 82 percent of fishers live, only one of 120 possible ratifications has occurred

## Slide 6. Work in Fishing Convention

### *Why did the 2005 text fail?*

- The objectives were (and are) that the instrument should:
  - Address a number of issues regarding the labour protection of fishers
  - Be effective for the majority of the world's fishers

## Slide 7. Work in Fishing Convention

### *Why did the 2005 text fail?*

- The conditions for success were (and are) that the instrument should:
  - Be sufficiently broad (in the meaning of general)
  - Be sufficiently flexible
  - Take account of the differences in fishing fleets and types of fishing
  - Be based on principles which could be implemented in a manner which could accommodate the diversity of economic and social conditions of countries
  - Not be overly prescriptive

## Slide 8. Work in Fishing Convention

### *Why did the 2005 text fail?*

- High ambitions may threaten the effectiveness of the instrument
- For example, can an instrument that addresses a number of issues ever be effective for the majority of the world's fishers?
- Yes, but only if provisions or requirements for one or more issues do not hamper the application of provisions or requirements for other issues – this may require a development approach

## Slide 9. Work in Fishing Convention

### *Why did the 2005 text fail?*

- If only one provision is unacceptable for a country, it might have to refrain from ratification altogether
- This implies a high probability that none of the instrument's provisions and requirements will be implemented by that country under ILO supervision
- The fishers of that country will not have the protection we intended to give them: this hurts most where protection is most needed

## Slide 10. Work in Fishing Convention

### *Why did the 2005 text fail?*

- Was the text sufficiently broad?
  - For example, provisions on medical examination are too specific
  - For example, provisions on manning and hours of rest are too specific
  - Certain requirements of Appendix III are too specific
  - The answer is “almost yes, but significant flaws must be addressed”

## Slide 11. Work in Fishing Convention

### *Why did the 2005 text fail?*

- Was the text sufficiently flexible?
  - For example, it does not recognize the (increasing) use of private employment agencies
  - For example, the owner–operator has to make a work agreement with himself if he does not operate the vessel on his own
  - For example, the conversion ratios of Appendix III might be acceptable for Europe; they are not for Asia

## Slide 12. Work in Fishing Convention

### *Why did the 2005 text fail?*

- Was the text sufficiently flexible? (continued)
  - For example, medical examination: if a country does not have an infrastructure to facilitate medical examinations of fishers it is not exempted (and might, due to this inflexibility, have to refrain from ratification altogether)
  - The answer is “almost yes, but significant flaws must be addressed”

## Slide 13. Work in Fishing Convention

### *Why did the 2005 text fail?*

- Did the text take account of the differences in fishing fleets and types of fishing?
  - Both China and Japan have repeatedly warned that the text did not, to the extent that it would block ratification
  - Due to the great diversity of fishing operations, the manning and hours of rest provisions may not be compatible with several types of fishing

## Slide 14. Work in Fishing Convention

### *Why did the 2005 text fail?*

- Was the text based on principles which could be implemented in a manner which could accommodate the diversity of economic and social conditions of countries?
  - If the text doesn't take sufficient account of the differences in fishing fleets and types of fishing, it implies that it could not comply with this condition either, because the development is very much depending on economic and social conditions

## Slide 15. Work in Fishing Convention

### *Why did the 2005 text fail?*

- Was the text overly prescriptive?
  - For example, prescriptive hours of rest
  - For example, prescriptive period of validity of medical certificates
  - For example, prescriptive measurements regarding accommodation
  - The answer is “almost no, but significant flaws must be addressed”

## Slide 16. Work in fishing Convention

### *What is our solution?*

- If the objective is to protect the majority of fishers, would it be reasonable to establish a threshold for the Convention to come into force, e.g. ratification by member States representing more than 50 per cent of the world's fishers?
- At a minimum we should challenge ourselves to meet that target when considering the support for the provisions under examination in June 2007

## Slide 17. Work in Fishing Convention

### *What is our solution?*

- The 2007 ILC should base its discussions on the 2005 text
- Certain provisions should be subject to a development clause
- The Convention might specify alternative wording to address specific national-regional requirements
- Certain provisions should be made more flexible

- Appendix III on crew's accommodation should in whole or in part become a Recommendation

## **Slide 18. Work in Fishing Convention**

### ***What is our solution?***

- The 2007 ILC should base its discussions on the 2005 text
  - The ILO should not propose in its report any change of text unless and to the extent there is consensus among the three constituent parties present
  - However, the three constituent parties should seek to discuss potential draft text on an informal basis between December 2006 and the ILC of June 2007, leading to commonly acceptable amendments, if possible

## **Slide 19. Work in Fishing Convention**

### ***What is our solution?***

- Certain provisions should be subject to a development clause
- Ratifying countries, whose infrastructure and institutions are not sufficiently developed for implementation of certain provisions or requirements should get the opportunity to “grow” into these provisions and requirements within a certain period of time
- The development should be monitored through social dialogue and ILO reporting provisions

## **Slide 20. Work in Fishing Convention**

### ***What is our solution?***

- Issues that could be subject to a development clause are
  - Issues already covered by general Conventions
    - For example, minimum age
  - Certain aspects of medical fitness
  - Certain aspects of manning and hours of rest
  - Certain aspects of the fisher's work agreement
  - Certain aspects of accommodation and food
    - For example, the entire Appendix III in so far as it has not been moved to the Recommendation

## **Slide 21. Work in Fishing Convention**

### ***What is our solution?***

- Issues that could be subject to a development clause (continued)
  - Certain aspects of medical care
  - Certain aspects of occupational safety and health and accident prevention

- Certain aspects of social security
- Certain aspects of the protection in case of work-related sickness, injury or death

## **Slide 22. Work in Fishing Convention**

### ***What is our solution?***

- The Convention might specify alternative wording to address specific national or regional requirements
  - There are situations where, because of important national tradition or jurisdictional processes, countries may have no alternative but to refrain from ratification entirely, simply because one or two requirements cannot be met, e.g. medical certification. Such countries should be able to negotiate an “escape”
  - The present text has a good example: The social security coordination clause of Article 37 negotiated by European Union Member States

## **Slide 23. Work in Fishing Convention**

### ***What are our solutions?***

- Certain provisions should be made more flexible, for example
  - Medical examination
    - Competent authorities or social partners should have the right to adjust provisions to suit local circumstances
  - Manning and hours of rest
    - competent authorities or social partners should have the right to adjust provisions to suit local circumstances
  - Fishers' work agreement and related provisions
    - Recognition of the role of private employment agencies in a way that does not diminish protection of fishers

## **Slide 24. Work in Fishing Convention**

### ***What are our solutions?***

- Appendix III on crew's accommodation should in whole or in part become a Recommendation
  - The length–gross tonnage conversion table apparently is unacceptable to many Asian governments who collectively have jurisdiction over 80 per cent of the world's fishers – a solution is required
  - Several provisions are so prescriptive that they are a barrier to widespread ratification
    - 200 cm headroom
    - 1.5 square metres floor area per person in sleeping rooms
    - 198 x 80 cm minimum inside berth dimensions
    - Maximum of four persons per shower, toilet and washbasin

**Slide 25. Work in fishing Convention*****What are our solutions?***

- Appendix III (continued)
  - Requiring competent authorities to extend the compliance to existing vessels that change flag should be deleted because it inflates cost structure and it impairs fisheries development in developing countries – existing vessels should be recognized as such, no matter re-flagging or not

**Slide 26. Work in Fishing Convention**

**There's a deal to be made here**

**Let's not blow it!**

## **Appendix II**

### **Additional information from the Japanese Government regarding fishing vessel accommodation**

DECEMBER 2006

JAPAN

1. Equivalence between length (L) and gross tonnage (gt)

15 m 75 gt

24 m 300 gt

45 m 1,150 gt

(The above conversion is applied to entire Annex III rather than specified paragraphs.)

Ref1 : Length and Gross Tonnage (European and Japanese Fishing Vessels)

Ref2 : Minimum Gross Tonnage  
 necessary to satisfy the accommodation requirement  
 (Based on Japan-suggested standard)

## Main items

Minimum headroom: 190cm

Minimum floor area in sleeping room: 1.0m<sup>2</sup>

Minimum inside dimension of berth: 190cm x 68cm

One tub or shower and one toilet for eight persons

One washbasin for six persons

## Tonnage calculation

## Under Upper Deck : —

Under 2nd. Deck	$25.00 \times 8.30 \times 3.90 \times 0.656 =$		530.87 m <sup>3</sup>
2nd. Deck ~ Upper Deck	$27.50 \times 8.30 \times 2.20 \times 0.84 =$		421.81 m <sup>3</sup>
	Total (Under Upper Deck) =		952.68 m <sup>3</sup>

## On Upper Deck : —

Forecastle Deck	$5.80 \times 8.15 \times 1.70 \times 0.70 =$		56.25 m <sup>3</sup>
Deck House	$8.50 \times 6.50 \times 2.20 =$	121.55	
	-) $1.00 \times 0.80 \times 2.20 =$	-) 1.76	
	-) $1.00 \times 0.20 \times 2.20 =$	-) 0.44	
	-) $2.00 \times 2.40 \times 2.20 =$	-) 10.56	
		108.79	108.79 m <sup>3</sup>
Wheel House	$4.00 \times 4.00 \times 2.20 =$	35.20	
	$1/2 \times 0.40 \times 4.40 \times 1.10 =$	0.97	
	-) $2 \times 1/2 \times 0.50 \times 0.80 \times 2.20 =$	-) 0.88	
		35.29	35.29 m <sup>3</sup>
	Total (On Upper Deck) =		200.33 m <sup>3</sup>
	Total of Gross Volume =		1153.01 m <sup>3</sup>

$$K = 0.20 + 0.02 \times \log 1153.01$$

$$= 0.2612$$

International Gross Tonnage

$$t = 1153.01 \times 0.2612$$

$$= 301 \text{ tons.}$$

## Work in the fishing sector

## INTRODUCTION

The agenda of the 96th Session of the International Labour Conference in 2007 includes an item on “Work in the fishing sector”. The background to this may be traced back to 2002.

In that year, the Governing Body of the ILO, at its 283rd Session (March 2002),<sup>1</sup> decided to place on the agenda of the 92nd Session of the International Labour Conference in 2004 an item concerning a comprehensive standard (a Convention supplemented by a Recommendation) on work in the fishing sector. In preparation for this discussion, the Office produced two reports: Report V(1)<sup>2</sup> and Report V(2).<sup>3</sup> The Conference Committee on the Fishing Sector considered these reports and adopted its own report,<sup>4</sup> which in turn was submitted to, and adopted by, the Conference plenary at its 18th sitting. During this sitting the Conference also adopted a resolution to place on the agenda of the next ordinary session of the Conference an item entitled “Work in the fishing sector”.<sup>5</sup>

The second discussion by the Conference of an item concerning a comprehensive standard (a Convention supplemented by a Recommendation) on work in the fishing sector took place at its 93rd Session (2005). The Conference Committee on the Fishing Sector established to discuss this item had before it two reports, Reports V(2A)<sup>6</sup> and V(2B),<sup>7</sup> prepared by the Office on the basis of the replies to Report V(1)<sup>8</sup> and the views expressed by a Tripartite Meeting of Experts on the Fishing Sector held from 13 to 17 December 2004.<sup>9</sup> The report of the Committee on the Fishing Sector included a

## INTRODUCTION

L'ordre du jour de la 96<sup>e</sup> session (2007) de la Conférence internationale du Travail comprend une question concernant «le travail dans le secteur de la pêche». Il faut, pour en retracer l'origine, remonter à 2002.

Cette année-là, le Conseil d'administration du BIT a décidé, à sa 283<sup>e</sup> session (mars 2002)<sup>1</sup>, d'inscrire à l'ordre du jour de la 92<sup>e</sup> session de la Conférence internationale du Travail en 2004 une question relative à une norme d'ensemble (une convention complétée par une recommandation) sur le travail dans le secteur de la pêche. En vue de cette discussion, le Bureau a établi deux rapports: le rapport V(1)<sup>2</sup> et le rapport V(2)<sup>3</sup>. La Commission du secteur de la pêche de la Conférence a examiné ces rapports et a adopté son propre rapport<sup>4</sup>, lequel a été soumis à la Conférence qui l'a adopté à sa 18<sup>e</sup> séance plénière. Pendant cette séance, la Conférence a aussi adopté une résolution concernant l'inscription à l'ordre du jour de la prochaine session ordinaire de la Conférence de la question intitulée «Travail dans le secteur de la pêche»<sup>5</sup>.

La deuxième discussion par la Conférence de la question relative à une norme d'ensemble (une convention complétée par une recommandation) concernant le travail dans le secteur de la pêche a eu lieu à la 93<sup>e</sup> session (2005) de la Conférence. La Commission du secteur de la pêche de la Conférence, chargée d'examiner cette question, était saisie des deux rapports, V(2A)<sup>6</sup> et V(2B)<sup>7</sup>, établis par le Bureau sur la base des réponses au rapport V(1)<sup>8</sup>, ainsi que des vues exprimées par la Réunion tripartite d'experts sur le secteur de la pêche qui avait eu lieu du 13 au 17 décembre 2004<sup>9</sup>. Le rapport de la Commission du secteur de la pêche de la 93<sup>e</sup> session inclut un projet de convention concernant le travail dans le secteur de la pêche et un projet de recommandation concernant le travail

<sup>7</sup> BIT: *Le travail dans le secteur de la pêche*, rapport V(2B), Conférence internationale du Travail, 93<sup>e</sup> session, Genève, 2005.

<sup>8</sup> Ce rapport, préparé par le Bureau sur la base de la première discussion, contenait les textes du projet de convention et du projet de recommandation. Il a été adressé aux gouvernements afin qu'ils y répondent après avoir consulté les organisations d'employeurs et de travailleurs les plus représentatives et qu'ils fassent connaître les propositions d'amendements ou les observations qu'ils auraient à présenter. Voir BIT: *Le travail dans le secteur de la pêche*, rapport V(1), Conférence internationale du Travail, 93<sup>e</sup> session, Genève, 2005.

proposed Convention and a proposed Recommendation concerning work in the fishing sector, as contained in *Provisional Record* No. 19 of that session of the Conference.<sup>10</sup>

The Committee's report was submitted to the plenary of the Conference for discussion and adoption. The discussion is contained in *Provisional Record* No. 24 of that session of the Conference.<sup>11</sup>

When put to the vote, the proposed Convention concerning work in the fishing sector was not adopted owing to lack of a quorum.<sup>12</sup> The proposed Recommendation concerning work in the fishing sector was, however, adopted.<sup>13</sup> Following these votes, the Conference adopted a motion to request the Governing Body to place on the agenda of the 96th Session of the Conference in 2007 an item concerning work in the fishing sector based on the report of the Committee on the Fishing Sector at the 93rd Session. In response to a request for clarification, the Legal Adviser said that it would be necessary to review the Recommendation and probably to adopt a new Recommendation to replace it.<sup>14</sup>

At its 294th Session (November 2005), the Governing Body decided to include on the agenda of the 96th Session (2007) of the International Labour Conference, with a view to the adoption of a Convention supplemented by a Recommendation, an item concerning work in the fishing sector. It also decided that the Conference should use as the basis for its discussion the report of the Committee on the Fishing Sector of the 93rd Session as well as the outcome of further tripartite consultations.<sup>15</sup>

At its 295th Session (March 2006), the Governing Body decided that the preparation of the discussion of the item concerning work in the fishing sector would be governed by a single-discussion procedure adapted to the special circumstances in which the discussion would take place. Accordingly, it approved a programme of reduced intervals for reports.<sup>16</sup>

In accordance with this programme of reduced intervals, and after informal consultations held on 3 May 2006, the Office prepared and sent to governments a first report<sup>17</sup> along with a short questionnaire and a copy of the report of the Committee on the Fishing Sector of the 93rd Session.<sup>18</sup> This was done in fulfilment of the Office's mandate under the ILO Constitution and the Standing Orders of the Conference. Accordingly, and in keeping with article 38, paragraph 1, of the Standing Orders of the Conference, governments were asked to reply to the questionnaire and send any other

<sup>11</sup> ILO: *Provisional Record* No. 24, International Labour Conference, 93rd Session, Geneva, 2005, pp. 24/1–24/11.

<sup>12</sup> The result of the vote was as follows: 288 in favour, 8 against, with 139 abstentions. As the quorum was 297, and the required two-thirds majority was 290 (of 435 votes cast), the Convention was not adopted because the quorum (total votes for and against) was not reached.

<sup>13</sup> The result of the vote was as follows: 292 in favour, 8 against, with 135 abstentions. As the quorum (votes for and against) was 297, and the required two-thirds majority was 290 (of 435 votes cast), the Recommendation was adopted.

dans le secteur de la pêche, qui figurent dans le *Compte rendu provisoire* n° 19 de la Conférence<sup>10</sup>.

Le rapport de la commission a été présenté à la plénière de la Conférence pour discussion et approbation. La discussion est relatée dans le *Compte rendu provisoire* n° 24<sup>11</sup>.

Lors du vote final, le projet de convention n'a pas été adopté, le quorum n'ayant pas été atteint<sup>12</sup>. Le projet de recommandation a néanmoins été adopté<sup>13</sup>. A la suite du vote, la Conférence a adopté une motion visant à prier le Conseil d'administration d'inscrire à l'ordre du jour de la 96<sup>e</sup> session de la Conférence en 2007 une question relative au travail dans le secteur de la pêche, sur la base du rapport de la Commission du secteur de la pêche à la 93<sup>e</sup> session de la Conférence. En réponse à une demande d'éclaircissement, le Conseiller juridique a déclaré qu'il faudrait revoir la recommandation et probablement adopter une nouvelle recommandation qui la remplacerait<sup>14</sup>.

A sa 294<sup>e</sup> session (novembre 2005), le Conseil d'administration a décidé d'inscrire à l'ordre du jour de la 96<sup>e</sup> session (2007) de la Conférence internationale du Travail, en vue de l'adoption d'une convention complétée par une recommandation, une question concernant le travail dans le secteur de la pêche. Il a également décidé que la Conférence devrait utiliser comme base de discussion le rapport de la Commission du secteur de la pêche de la 93<sup>e</sup> session, ainsi que les conclusions des consultations tripartites qui se tiendraient entre-temps<sup>15</sup>.

A sa 295<sup>e</sup> session (mars 2006), le Conseil administration a décidé que la préparation de la discussion de la question concernant le travail dans le secteur de la pêche serait régie par une procédure de simple discussion adaptée aux circonstances particulières dans lesquelles la discussion allait avoir lieu. En conséquence, il a approuvé un programme comportant des délais réduits pour les rapports<sup>16</sup>.

Conformément à ce programme à délais réduits et après des consultations informelles tenues le 3 mai 2006, le Bureau, pour s'acquitter du mandat que lui confèrent la Constitution de l'OIT et le Règlement de la Conférence, a établi et envoyé aux gouvernements un premier rapport<sup>17</sup> contenant un bref questionnaire, auquel était joint un exemplaire du rapport de la Commission du secteur de la pêche de la 93<sup>e</sup> session<sup>18</sup>. Comme le prévoit l'article 38, paragraphe 1, du Règlement de la Conférence, les gouvernements étaient invités à répondre au questionnaire (en formulant toutes autres observations sur le contenu

<sup>11</sup> BIT: *Compte rendu provisoire* n° 24, Conférence internationale du Travail, 93<sup>e</sup> session, Genève, 2005, pp. 24/1-24/11.

<sup>12</sup> Le résultat du vote a été le suivant: 288 voix pour, huit voix contre, avec 139 abstentions. Le quorum étant de 297 et la majorité des deux tiers requise, de 290 (435 suffrages exprimés), la convention n'a pas été adoptée, étant donné que le quorum (total des voix pour et des voix contre) n'avait pas été atteint.

<sup>13</sup> Le résultat du vote a été le suivant: 292 voix pour, 8 voix contre, avec 135 abstentions. Le quorum étant de 297 et la majorité des deux tiers requise, de 290 (sur 435 suffrages exprimés), la recommandation a été adoptée.

views on the content of the proposed Convention and Recommendation on work in the fishing sector by 1 September 2006, after consulting the most representative organizations of employers and workers.

At the time of drawing up this report, the Office had received replies from the governments of the following 60 member States: Algeria, Argentina, Australia, Austria, Azerbaijan, Belgium, Benin, Brazil, Burkina Faso, Canada, China, Colombia, Costa Rica, Croatia, Cuba, Czech Republic, Denmark, Egypt, Finland, France, Germany, Ghana, Greece, Hungary, Iceland, Iraq, Italy, Japan, Republic of Korea, Latvia, Lebanon, Lithuania, Mauritius, Mexico, Netherlands, New Zealand, Norway, Panama, Papua New Guinea, Philippines, Poland, Portugal, Qatar, Romania, Saudi Arabia, Seychelles, Slovenia, South Africa, Spain, Sri Lanka, Suriname, Sweden, Switzerland, Syrian Arab Republic, Thailand, Trinidad and Tobago, Ukraine, United Kingdom, Uruguay and Bolivarian Republic of Venezuela.

The governments of the following 31 member States indicated that their replies had been drawn up after consultation with employers' or workers' organizations or both, and some included in their replies the opinions expressed on certain points by these organizations: Argentina, Belgium, Brazil, Canada, Colombia, Costa Rica, Croatia, Cuba, Czech Republic, Denmark, Finland, Iceland, Italy, Japan, Republic of Korea, Mauritius, Mexico, Netherlands, New Zealand, Panama, Papua New Guinea, Poland, Romania, Seychelles, Spain, Sri Lanka, Sweden, Switzerland, Syrian Arab Republic, Thailand and United Kingdom. Several other governments indicated that they had sent the questionnaire to the most representative organizations of employers and workers but had not, at the time of sending their replies to the questionnaire, received comments from those organizations.

The governments of some member States sent separately the replies received from employers', workers' or other organizations; in some cases, replies were received directly by the Office.

The Office notes that, in answering the questionnaire, several governments (for example, Czech Republic, Hungary and Switzerland) had no substantive comments.

In October 2006 the Officers of the Governing Body agreed to the convening of an Interregional Tripartite Round Table on Labour Standards for the Fishing Sector, with the purpose of pursuing consultations on the proposed Convention and Recommendation concerning work in the fishing sector in advance of the 96th Session (June 2007) of the Conference.<sup>19</sup> This Round Table, held in Geneva from 11 to 13 December 2006, was composed of the following members: eight representatives of governments of ILO member States (appointed on a regional basis after consultation with the ILO Government group regional coordinators), eight Employer representatives and eight Worker representatives (all appointed by their respective groups). Regional coordinators of the Government group, or their representatives, participated as observers with the right to take the floor on behalf of any country of their respective group. An observer from the Food and Agriculture Organization of the United Nations also participated. The Chairperson was not from among the eight Government representatives.

The Office provided participants at the Round Table with an advance version of the summary of replies received to the questionnaire contained in Report IV(1) of the 96th Session of the Conference. The report of the Round Table can be found in the

---

<sup>19</sup> GB.297/Inf.2.

du projet de convention et du projet de recommandation concernant le travail dans le secteur de la pêche) pour le 1<sup>er</sup> septembre 2006 au plus tard, après avoir consulté les organisations d'employeurs et de travailleurs les plus représentatives.

Au moment où le présent rapport a été établi, le Bureau avait reçu des réponses des gouvernements des soixante Etats Membres suivants: Afrique du Sud, Algérie, Allemagne, Arabie saoudite, Argentine, Australie, Autriche, Azerbaïdjan, Belgique, Bénin, Brésil, Burkina Faso, Canada, Chine, Colombie, République de Corée, Costa Rica, Croatie, Cuba, Danemark, Egypte, Espagne, Finlande, France, Ghana, Grèce, Hongrie, Iraq, Islande, Italie, Japon, Lettonie, Liban, Lituanie, Maurice, Mexique, Norvège, Nouvelle-Zélande, Panama, Papouasie-Nouvelle-Guinée, Pays-Bas, Philippines, Pologne, Portugal, Qatar, Roumanie, Royaume-Uni, Seychelles, Slovénie, Sri Lanka, Suède, Suisse, Suriname, République arabe syrienne, République tchèque, Thaïlande, Trinité-et-Tobago, Ukraine, Uruguay et République bolivarienne du Venezuela.

Les gouvernements des trente et un Etats Membres ci-après ont indiqué que leurs réponses avaient été élaborées après avoir consulté les organisations d'employeurs ou de travailleurs, ou les deux, et certains ont inclus dans leurs réponses les opinions exprimées sur différents points par ces organisations: Argentine, Belgique, Brésil, Canada, Colombie, République de Corée, Costa Rica, Croatie, Cuba, Danemark, Espagne, Finlande, Islande, Italie, Japon, Maurice, Mexique, Nouvelle-Zélande, Panama, Papouasie-Nouvelle-Guinée, Pays-Bas, Pologne, Roumanie, Royaume-Uni, Seychelles, Sri Lanka, Suède, Suisse, République arabe syrienne, République tchèque et Thaïlande. Les gouvernements de plusieurs autres pays ont indiqué qu'ils avaient communiqué le questionnaire aux organisations d'employeurs et de travailleurs les plus représentatives, mais qu'au moment d'envoyer leurs réponses ils n'avaient pas reçu d'observations de ces organisations.

Les gouvernements de certains Etats Membres ont envoyé séparément les réponses des organisations d'employeurs et de travailleurs ou d'autres organisations; dans certains cas, les réponses ont été reçues directement par le Bureau.

Le Bureau relève que plusieurs gouvernements (par exemple la Hongrie, la Suisse et la République tchèque) ont répondu au questionnaire en indiquant qu'ils n'avaient pas d'observations à formuler.

En octobre 2006, le bureau du Conseil d'administration est convenu de convoquer une Table ronde tripartite interrégionale sur les normes du travail dans le secteur de la pêche, en vue de poursuivre les consultations sur le projet de convention et le projet de recommandation concernant le travail dans le secteur de la pêche avant la 96<sup>e</sup> session (juin 2007) de la Conférence<sup>19</sup>. Cette table ronde, qui a eu lieu à Genève du 11 au 13 décembre 2006, était composée de huit représentants de gouvernements d'Etats Membres de l'OIT – désignés sur une base régionale après consultation des coordonnateurs régionaux du groupe gouvernemental de l'OIT – ainsi que de huit représentants des employeurs et huit représentants des travailleurs désignés par leurs groupes respectifs. Les coordonnateurs régionaux du groupe gouvernemental, ou leurs représentants, ont participé à la table ronde en qualité d'observateurs, en ayant la faculté de s'exprimer au nom d'un pays quelconque de leurs groupes respectifs. Un observateur de l'Organisation des Nations Unies pour l'alimentation et l'agriculture y a également pris part. Le président n'était pas issu du groupe des huit représentants gouvernementaux.

Le Bureau a fourni aux participants à la table ronde un résumé préliminaire des réponses au questionnaire figurant dans le rapport IV(1) de la 96<sup>e</sup> session de la Conférence. Le rapport de la table ronde est reproduit en annexe au rapport IV(2A). Il comporte deux

<sup>19</sup> Document GB.297/Inf.2.

appendix to Report IV(2A). It includes an appendix containing the substantive text of a presentation to the Round Table by the Employers and an appendix containing additional information from the Government of Japan regarding fishing vessel accommodation.

*Texts of the proposed Convention and Recommendation concerning work in the fishing sector contained in this report*

In accordance with article 10, paragraph 2(a), of the Constitution of the ILO, and article 38, paragraph 2, of the Standing Orders of the International Labour Conference, the Office has responsibility for drawing up the final report, including the proposed instruments. In preparing this report, the Office has been bound by the following specifications:

- (a) pursuant to article 38, paragraph 2, of the Standing Orders, the report containing the proposed instruments must be drawn up “on the basis of the replies received [to the questionnaire]”; and
- (b) in accordance with the directions given by the Governing Body in this unique case, “the Conference should use as a basis for its discussion the report of the Committee on the Fishing Sector of the 93rd Session as well as the outcome of further tripartite consultations”.

Normally, the Office would, pursuant to article 38, paragraph 2, of the Standing Orders, make changes to the proposed instruments where suggested by a majority of the replies received to the questionnaire. In the light of the Governing Body’s specific instruction in this case, the Office has made no substantive changes to the instruments as they were appended to the report of the Committee on the Fishing Sector of the 93rd Session.

In Report IV(2A), which accompanies this report, the Office has therefore included, *inter alia*:

- (a) commentary based on the replies to each of the five questions set out in Report IV(1) and the discussions at the Interregional Tripartite Round Table on Labour Standards for the Fishing Sector (the Office, taking account, *inter alia*, of the replies and Round Table discussions, has also set out ideas for possible alternative text for certain provisions concerning the scope of application of the Convention);
- (b) indicative proposals regarding instances in which the Committee, or the Committee Drafting Committee, may wish to address alignment of the English and French texts, or to correct any remaining manifest errors or ambiguities – functions which, in the absence of the special circumstances referred to above, would have been carried out by the Office prior to the Conference.

To ensure that the English and French texts of the proposed Convention and the proposed Recommendation concerning work in the fishing sector are in the hands of the governments within the time limit laid down in article 38, paragraph 2, of the Standing Orders of the Conference, these texts have been published in the present volume, Report IV(2B).

The Office notes that, as the 93rd Session of the Conference adopted the Recommendation concerning Work in the Fishing Sector, the proposed Recommendation set out below (subject to any amendments and if adopted by the 96th Session of the Conference) would replace that Recommendation.

appendices (en anglais), dont l'un contient le texte d'un exposé présenté à la table ronde par les employeurs et l'autre, des informations supplémentaires communiquées par le gouvernement du Japon concernant le logement à bord des navires de pêche.

*Textes du projet de convention et du projet de recommandation concernant le travail dans le secteur de la pêche reproduits dans le présent rapport*

Aux termes de l'article 10, paragraphe 2 a), de la Constitution de l'OIT et de l'article 38 (2) du Règlement de la Conférence internationale du Travail, il incombe au Bureau de rédiger le rapport définitif contenant les projets d'instruments. Pour préparer le présent rapport, le Bureau a dû respecter les conditions suivantes:

- a) en application de l'article 38(2) du Règlement, le rapport contenant les projets d'instruments devait être élaboré «sur la base des réponses reçues» au questionnaire;
- b) Les instructions données par le Conseil d'administration dans ce cas sans précédent précisait que «la Conférence devrait utiliser comme base de discussion le rapport de la Commission du secteur de la pêche de la 93<sup>e</sup> session, ainsi que les résultats des consultations tripartites à venir».

Conformément à l'article 38(2) du Règlement, le Bureau apporte normalement aux projets d'instruments les changements qui sont proposés par une majorité de réponses reçues au questionnaire. En l'occurrence, compte tenu des instructions précises données par le Conseil d'administration, le Bureau n'a apporté aucune modification de fond aux instruments tels qu'ils étaient annexés au rapport de la Commission du secteur de la pêche de la 93<sup>e</sup> session.

C'est pourquoi le Bureau a inclus dans le rapport IV(2A) qui accompagne le présent rapport:

- a) des commentaires fondés sur les réponses à chacune des cinq questions énoncées dans le rapport IV(1) et sur les discussions qui ont eu lieu lors de la Table ronde tripartite interrégionale sur les normes du travail dans le secteur de la pêche (compte tenu notamment des réponses et des discussions à la table ronde, le Bureau suggère aussi des variantes possibles pour certaines dispositions concernant le champ d'application de la convention);
- b) des propositions indiquant les cas dans lesquels la commission ou son comité de rédaction voudront sans doute assurer la concordance des versions française et anglaise ou corriger les erreurs manifestes ou les ambiguïtés pouvant subsister dans le texte – tâche dont le Bureau se serait acquitté avant la Conférence, n'eussent été les circonstances particulières mentionnées plus haut.

Afin que les versions française et anglaise du projet de convention et du projet de recommandation concernant le travail dans le secteur de la pêche puissent parvenir aux gouvernements dans les délais prescrits au paragraphe 2 de l'article 38 du Règlement de la Conférence, ces textes sont publiés dans le présent rapport IV(2B).

Le Bureau signale que, comme la recommandation sur le travail dans la pêche a été adoptée à la 93<sup>e</sup> session de la Conférence, le projet de recommandation figurant ci-après (sous réserve des amendements qui pourraient y être apportés et s'il est adopté par la Conférence à sa 96<sup>e</sup> session) remplacerait cette recommandation.

## **PROPOSED TEXTS**

*(English version)*

### **Proposed Convention**

The following is the English version of (A), the proposed Convention concerning work in the fishing sector, which is submitted as a basis for the discussion of the fourth item on the agenda of the 96th Session of the Conference.

In accordance with the decisions<sup>20</sup> of the Conference at its 93rd Session and of the Governing Body at its 295th Session (March 2006),<sup>21</sup> and taking into account subsequent consultations, the text below is that of the proposed Convention which was contained in the report of the Committee on the Fishing Sector, in the form submitted in the English and French versions of the instrument by the Conference Drafting Committee for adoption by the 93rd Session of the Conference. The Office has revised only the draft Preamble so that it reflects the fact that the instrument is now being submitted for consideration under the fourth item on the agenda of the 96th Session of the Conference in 2007.

The Office commentary in Report IV(2A) includes indications of instances in which the Committee Drafting Committee may wish to examine any remaining manifest errors or ambiguities or to ensure improved alignment of the English and French texts.

#### **A. Proposed Convention concerning work in the fishing sector**

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its ninety-sixth Session on 30 May 2007, and

Recognizing that globalization has a profound impact on the fishing sector, and

Noting the ILO Declaration on Fundamental Principles and Rights at Work, 1998, and

Taking into consideration the fundamental rights to be found in the following international labour Conventions: the Forced Labour Convention, 1930, the Freedom of Association and Protection of the Right to Organise Convention, 1948, the Right to Organise and Collective Bargaining Convention, 1949, the Equal Remuneration Convention, 1951, the Abolition of Forced Labour

<sup>20</sup> ILO: *Provisional Record*, Nos. 19A and 25, International Labour Conference, 93rd Session, Geneva, 2005, pp.25/3–25/5.

<sup>21</sup> GB.295/16/3 and GB.295/PV, para. 246.

## **TEXTES PROPOSÉS**

*(Version française)*

### **Projet de convention**

On trouvera ci-après la version française du projet de convention concernant le travail dans le secteur de la pêche qui est soumis à la Conférence pour servir de base, lors de la 96<sup>e</sup> session, à la discussion de la quatrième question à l'ordre du jour.

Conformément aux décisions<sup>20</sup> de la Conférence à sa 93<sup>e</sup> session (2005) et du Conseil administration à sa 295<sup>e</sup> session (mars 2006)<sup>21</sup>, et compte tenu des consultations tenues ultérieurement, le texte ci-après est celui du projet de convention qui figurait dans le rapport de la Commission du secteur de la pêche, sous la forme où il a été présenté, en versions française et anglaise, par le Comité de rédaction de la Conférence pour adoption à la 93<sup>e</sup> session de la Conférence. Le Bureau n'a révisé que le préambule pour tenir compte du fait que l'instrument proposé est maintenant soumis pour examen au titre de la quatrième question à l'ordre du jour de la 96<sup>e</sup> session de la Conférence en 2007.

Les commentaires du Bureau figurant dans le rapport IV(2A) indiquent les cas où le comité de rédaction de la commission voudra sans doute examiner les erreurs manifestes ou les ambiguïtés qui peuvent subsister dans le texte ou assurer une meilleure concordance des versions française et anglaise.

#### **A. Projet de convention concernant le travail dans le secteur de la pêche**

La Conférence générale de l'Organisation internationale du Travail,

Convoquée à Genève par le Conseil d'administration du Bureau international du Travail, et s'y étant réunie le 30 mai 2007, en sa quatre-vingt-seizième session;

Reconnaissant que la mondialisation a un impact profond sur le secteur de la pêche;

Notant la Déclaration de l'OIT relative aux principes et droits fondamentaux au travail, 1998;

Tenant compte des droits fondamentaux énoncés dans les conventions internationales du travail suivantes: la convention sur le travail forcé, 1930, la convention sur la liberté syndicale et la protection du droit syndical, 1948, la convention sur le droit d'organisation et de négociation collective, 1949, la convention sur l'égalité de rémunération, 1951, la convention sur l'abolition

---

<sup>20</sup> BIT: *Compte rendu provisoire* n° 19A et n° 25, pp. 25/3-25/6, Conférence internationale du Travail, 93<sup>e</sup> session, Genève, 2005.

<sup>21</sup> Documents GB.295/16/3 et GB.295/PV, paragr. 246.

Convention, 1957, the Discrimination (Employment and Occupation) Convention, 1958, the Minimum Age Convention, 1973, and the Worst Forms of Child Labour Convention, 1999, and

Noting the relevant instruments of the International Labour Organization, in particular the Occupational Safety and Health Convention and Recommendation, 1981, and the Occupational Health Services Convention and Recommendation, 1985, and

Noting, in addition, the Social Security (Minimum Standards) Convention, 1952, and considering that the provisions of Article 77 of that Convention should not be an obstacle to protection extended by Members to fishers under social security schemes, and

Recognizing that the International Labour Organization considers fishing as a hazardous occupation when compared to other occupations, and

Noting also Article 1, paragraph 3, of the Seafarers' Identity Documents Convention (Revised), 2003, and

Mindful of the core mandate of the Organization, which is to promote decent conditions of work, and

Mindful of the need to protect and promote the rights of fishers in this regard, and

Recalling the United Nations Convention on the Law of the Sea, 1982, and

Taking into account the need to revise the following international instruments adopted by the International Labour Conference specifically concerning the fishing sector, namely the Hours of Work (Fishing) Recommendation, 1920, the Minimum Age (Fishermen) Convention, 1959, the Medical Examination (Fishermen) Convention, 1959, the Fishermen's Articles of Agreement Convention, 1959, and the Accommodation of Crews (Fishermen) Convention, 1966, to bring them up to date and to reach a greater number of the world's fishers, particularly those working on board smaller vessels, and

Noting that the objective of this Convention is to ensure that fishers have decent conditions of work on board fishing vessels with regard to minimum requirements for work on board; conditions of service; accommodation and food; occupational safety and health protection; medical care and social security, and

Having decided upon the adoption of certain proposals with regard to work in the fishing sector, which is the fourth item on the agenda of the session, and

Having determined that these proposals shall take the form of an international Convention;

adopts this ... day of June of the year two thousand and seven the following Convention, which may be cited as the Work in Fishing Convention, 2007.

du travail forcé, 1957, la convention concernant la discrimination (emploi et profession), 1958, la convention sur l'âge minimum, 1973, et la convention sur les pires formes de travail des enfants, 1999;

Notant les instruments pertinents de l'Organisation internationale du Travail, en particulier la convention et la recommandation sur la sécurité et la santé des travailleurs, 1981, ainsi que la convention et la recommandation sur les services de santé au travail, 1985;

Notant en outre la convention concernant la sécurité sociale (norme minimum), 1952, et considérant que les dispositions de l'article 77 de ladite convention ne devraient pas faire obstacle à la protection offerte aux pêcheurs par les Membres dans le cadre des systèmes de sécurité sociale;

Reconnaissant que l'Organisation internationale du Travail considère la pêche comme une activité dangereuse par rapport à d'autres;

Notant également le paragraphe 3 de l'article 1 de la convention sur les pièces d'identité des gens de mer (révisée), 2003;

Consciente que l'Organisation a pour mandat fondamental de promouvoir des conditions de travail décentes;

Consciente de la nécessité de protéger et de promouvoir les droits des pêcheurs en la matière;

Rappelant la Convention des Nations Unies sur le droit de la mer, 1982;

Tenant compte de la nécessité de réviser les instruments internationaux suivants adoptés par la Conférence internationale du Travail concernant spécifiquement le secteur de la pêche, à savoir la recommandation sur la durée du travail (pêche), 1920, la convention sur l'âge minimum (pêcheurs), 1959, la convention sur l'examen médical des pêcheurs, 1959, la convention sur le contrat d'engagement des pêcheurs, 1959, et la convention sur le logement à bord des bateaux de pêche, 1966, afin de mettre à jour ces instruments et d'atteindre un plus grand nombre de pêcheurs dans le monde, en particulier ceux travaillant à bord de navires plus petits;

Notant que l'objectif de la présente convention est d'assurer que les pêcheurs bénéficient de conditions décentes pour travailler à bord des navires de pêche en ce qui concerne les conditions minimales requises pour le travail à bord, les conditions de service, le logement et l'alimentation, la protection de la santé et de la sécurité au travail, les soins médicaux et la sécurité sociale;

Après avoir décidé d'adopter diverses propositions relatives au travail dans le secteur de la pêche, question qui constitue le quatrième point à l'ordre du jour de la session;

Après avoir décidé que ces propositions prendraient la forme d'une convention internationale,

adopte, ce ... jour de juin deux mille sept, la convention ci-après, qui sera dénommée Convention sur le travail dans la pêche, 2007.

## PART I. DEFINITIONS AND SCOPE

### DEFINITIONS

#### *Article 1*

For the purposes of the Convention:

- (a) “commercial fishing” means all fishing operations, including fishing operations on rivers, lakes and canals, with the exception of subsistence fishing and recreational fishing;
- (b) “competent authority” means the minister, government department or other authority having power to issue and enforce regulations, orders or other instructions having the force of law in respect of the subject matter of the provision concerned;
- (c) “consultation” means consultation by the competent authority with the representative organizations of employers and workers concerned, and in particular the representative organizations of fishing vessel owners and fishers, where they exist, on the measures to be taken to give effect to the provisions of the Convention and with respect to any derogation, exemption or other flexible application as allowed under the Convention;
- (d) “fishing vessel owner” means the owner of the fishing vessel or any other organization or person who has assumed the responsibility for the operation of the vessel from the owner or other organization or person and who, on assuming such responsibility, has agreed to take over the duties and responsibilities imposed on fishing vessel owners in accordance with the Convention;
- (e) “fisher” means every person employed or engaged in any capacity or carrying out an occupation on board any fishing vessel, including persons working on board who are paid on the basis of a share of the catch but excluding pilots, naval personnel, other persons in the permanent service of a government, shore-based persons carrying out work aboard a fishing vessel and fisheries observers;
- (f) “fisher’s work agreement” means a contract of employment, articles of agreement or other similar arrangements or any other contract governing a fisher’s living and working conditions on board a vessel;
- (g) “fishing vessel” or “vessel” means any ship or boat, of any nature whatsoever, irrespective of the form of ownership, used or intended to be used for the purpose of commercial fishing;
- (h) “new fishing vessel” means a vessel for which:
  - (i) the building or major conversion contract is placed on or after the date of the entry into force of the Convention for the Member concerned; or
  - (ii) the building or major conversion contract has been placed before the date of the entry into force of the Convention for the Member concerned, and which is delivered three years or more after that date; or
  - (iii) in the absence of a building contract, on or after the date of the entry into force of the Convention for the Member concerned:
    - the keel is laid, or

## PARTIE I. DÉFINITIONS ET CHAMP D'APPLICATION

### DÉFINITIONS

#### *Article 1*

Aux fins de la présente convention:

- a) les termes «pêche commerciale» désignent toutes les opérations de pêche, y compris les opérations de pêche dans les cours d'eau, les lacs et les canaux, à l'exception de la pêche de subsistance et de la pêche de loisir;
- b) les termes «autorité compétente» désignent le ministre, le service gouvernemental ou toute autre autorité habilités à édicter et à faire respecter les règlements, arrêtés ou autres instructions ayant force obligatoire dans le domaine visé par la disposition de la convention;
- c) le terme «consultation» désigne la consultation par l'autorité compétente des organisations représentatives d'employeurs et de travailleurs intéressées, et en particulier les organisations représentatives d'armateurs à la pêche et de pêcheurs, lorsqu'elles existent, sur les mesures à prendre pour donner effet aux dispositions de la convention et en ce qui concerne toute dérogation, exemption ou autre forme d'application souple qui est permise par la convention;
- d) les termes «armateur à la pêche» désignent le propriétaire du navire ou toute autre entité ou personne à laquelle la responsabilité de l'exploitation du navire a été confiée et qui, en assumant cette responsabilité, a accepté de s'acquitter des tâches et obligations qui incombent aux armateurs à la pêche aux termes de la convention;
- e) le terme «pêcheur» désigne toute personne employée ou engagée à quelque titre que ce soit ou exerçant une activité professionnelle à bord d'un navire de pêche, y compris les personnes travaillant à bord qui sont rémunérées à la part, mais à l'exclusion des pilotes, des équipages de la flotte de guerre, des autres personnes au service permanent du gouvernement, des personnes basées à terre chargées d'effectuer des travaux à bord d'un navire de pêche et des observateurs des pêches;
- f) les termes «accord d'engagement du pêcheur» désignent le contrat d'emploi, le contrat d'engagement ou autre accord similaire ainsi que tout autre contrat régissant les conditions de vie et de travail du pêcheur à bord du navire;
- g) les termes «navire de pêche» ou «navire» désignent tout bateau ou embarcation, quelles qu'en soient la nature et la forme de propriété, affecté ou destiné à être affecté à la pêche commerciale;
- h) les termes «navire de pêche neuf» désignent un navire pour lequel:
  - i) le contrat de construction ou de transformation importante est passé à la date d'entrée en vigueur de la convention pour le Membre concerné ou après cette date; ou
  - ii) le contrat de construction ou de transformation importante a été passé avant la date d'entrée en vigueur de la convention pour le Membre concerné, et qui est livré trois ans ou plus après cette date; ou
  - iii) en l'absence d'un contrat de construction à la date d'entrée en vigueur de la convention pour le Membre concerné ou après cette date:
    - la quille est posée; ou

- construction identifiable with a specific vessel begins, or
  - assembly has commenced comprising at least 50 tonnes or 1 per cent of the estimated mass of all structural material, whichever is less;
- (i) “existing vessel” means a vessel that is not a new fishing vessel;
- (j) “gross tonnage” means the gross tonnage calculated in accordance with the tonnage measurement regulations contained in Annex I to the International Convention on Tonnage Measurement of Ships, 1969, or any instrument amending or replacing it;
- (k) “length” (L) shall be taken as 96 per cent of the total length on a waterline at 85 per cent of the least moulded depth measured from the keel line, or as the length from the foreside of the stem to the axis of the rudder stock on that waterline, if that be greater. In vessels designed with rake of keel, the waterline on which this length is measured shall be parallel to the designed waterline;
- (l) “length overall” (LOA) shall be taken as the distance in a straight line parallel to the designed waterline between the foremost point of the bow and the aftermost point of the stern;
- (m) “recruitment and placement service” means any person, company, institution, agency or other organization, in the public or the private sector, which is engaged in recruiting fishers on behalf of, or placing fishers with, fishing vessel owners;
- (n) “skipper” means the person having command of a fishing vessel.

## SCOPE

### *Article 2*

1. Except as otherwise provided herein, this Convention applies to all fishers and all fishing vessels engaged in commercial fishing operations.

2. In the event of doubt as to whether a vessel is engaged in commercial fishing, the question shall be determined by the competent authority after consultation.

3. Any Member, after consultation, may extend, in whole or in part, to fishers working on smaller vessels the protection provided in this Convention for fishers working on vessels of 24 metres in length and over.

### *Article 3*

1. The competent authority, after consultation, may exclude from the requirements of this Convention, or certain provisions thereof, where their application raises special and substantial problems in the light of the particular conditions of service of the fishers or the fishing vessels' operations:

- (a) fishing vessels engaged in fishing operations in rivers, lakes and canals; and

- une construction permettant d'identifier un navire particulier a commencé;  
ou
  - le montage a commencé, employant au moins 50 tonnes ou 1 pour cent de la masse estimée de tous les matériaux de structure, si cette dernière valeur est inférieure;
- i) les termes «navire existant» désignent un navire qui n'est pas un navire de pêche neuf;
  - j) les termes «jauge brute» désignent le tonnage brut d'un navire évalué conformément aux dispositions de l'annexe I à la Convention internationale de 1969 sur le jaugeage des navires ou de tout instrument l'amendant ou la remplaçant;
  - k) le terme «longueur» (L) désigne 96 pour cent de la longueur totale à la flottaison située à une distance de la ligne de quille égale à 85 pour cent du creux minimal sur quille, ou encore à la distance entre la face avant de l'étrave et l'axe de la mèche du gouvernail à cette flottaison, si cette valeur est supérieure. Pour les navires conçus pour naviguer avec une quille inclinée, la flottaison servant à mesurer cette longueur doit être parallèle à la flottaison en charge prévue;
  - l) les termes «longueur hors tout» (LHT) désignent la distance mesurée en ligne droite parallèlement à la flottaison en charge prévue de l'extrémité avant de la proue à l'extrémité arrière de la poupe;
  - m) les termes «service de recrutement et de placement» désignent toute personne, société, institution, agence ou autre organisation du secteur public ou privé exerçant des activités relatives au recrutement de pêcheurs pour le compte de, ou au placement de pêcheurs auprès d'armateurs à la pêche;
  - n) le terme «patron» désigne la personne chargée du commandement d'un navire de pêche.

## CHAMP D'APPLICATION

### *Article 2*

1. Sauf disposition contraire de la présente convention, celle-ci s'applique à tous les pêcheurs et à tous les navires de pêche engagés dans des opérations de pêche commerciale.

2. En cas de doute sur l'affectation d'un navire à la pêche commerciale, il appartient à l'autorité compétente de déterminer son type d'affectation après consultation.

3. Tout Membre peut, après consultation, étendre totalement ou en partie la protection prévue par la convention pour les pêcheurs travaillant sur des navires d'une longueur égale ou supérieure à 24 mètres à ceux travaillant sur des navires plus petits.

### *Article 3*

1. L'autorité compétente peut, après consultation, exclure des prescriptions de la présente convention, ou de certaines de ses dispositions, lorsque leur application soulèverait des difficultés particulières et importantes compte tenu des conditions spécifiques de service des pêcheurs ou des opérations des navires de pêche considérés:

- a) les navires de pêche engagés dans des opérations de pêche sur les cours d'eau, les lacs et les canaux;

(b) limited categories of fishers or fishing vessels.

2. In the case of exclusions under the preceding paragraph and, where practicable, the competent authority shall take measures, as appropriate, to extend progressively the requirements under this Convention to those categories of fishers and fishing vessels concerned.

#### *Article 4*

1. Each Member which ratifies the Convention shall, in the first report on the application of the Convention submitted under article 22 of the Constitution of the International Labour Organisation:

- (a) list any categories of fishers or fishing vessels excluded under Article 3, paragraph 1;
- (b) give the reasons for such exclusion, stating the respective positions of the representative organizations of employers and workers concerned, in particular the representative organizations of fishing vessel owners and fishers, where they exist; and
- (c) describe any measures taken to provide equivalent protection to the excluded categories.

2. Each Member shall describe in subsequent reports submitted under article 22 of the Constitution the measures taken with a view to extending progressively the provisions of the Convention to the excluded fishers and fishing vessels.

#### *Article 5*

1. For the purpose of this Convention, the competent authority, after consultation, may decide to use length overall (LOA) in place of length (L) as the basis for measurement, in accordance with the equivalence set out in Annex I. In addition, for the purpose of the paragraphs specified in Annex III of this Convention, the competent authority, after consultation, may decide to use gross tonnage in place of length (L) or length overall (LOA) as the basis for measurement in accordance with the equivalence set out in Annex III.

2. In the reports submitted under article 22 of the Constitution, the Member shall communicate the reasons for the decision taken under this Article and any comments arising from the consultation.

## PART II. GENERAL PRINCIPLES

### IMPLEMENTATION

#### *Article 6*

1. Each Member shall implement and enforce laws, regulations or other measures that it has adopted to fulfil its commitments under this Convention with respect to fishers and fishing vessels under its jurisdiction. Other measures may include collective agreements, court decisions, arbitration awards, or other means consistent with national law and practice.

b) des catégories limitées de pêcheurs ou de navires de pêche.

2. En cas d'exclusion visée au paragraphe précédent, et lorsque cela est réalisable, l'autorité compétente prend, si besoin est, des mesures pour étendre progressivement les prescriptions prévues par la présente convention à ces catégories de pêcheurs ou de navires de pêche.

#### *Article 4*

1. Tout Membre qui ratifie la convention doit, dans le premier rapport sur l'application de celle-ci qu'il est tenu de présenter en vertu de l'article 22 de la Constitution de l'Organisation internationale du Travail:

- a) indiquer les catégories de pêcheurs ou de navires de pêche qui sont exclues en application du premier paragraphe de l'article 3;
- b) donner les motifs de ces exclusions en exposant les positions respectives des organisations représentatives d'employeurs et de travailleurs intéressés, en particulier des organisations représentatives d'armateurs à la pêche et de pêcheurs, s'il en existe;
- c) décrire toute mesure prise pour octroyer une protection équivalente aux catégories exclues.

2. Tout Membre décrira, dans ses rapports ultérieurs présentés en vertu de l'article 22 de la Constitution, les mesures prises en vue d'étendre progressivement les dispositions de la convention aux catégories de pêcheurs et de navires exclues.

#### *Article 5*

1. Aux fins de la présente convention, l'autorité compétente peut, après consultation, décider d'utiliser la longueur hors tout (LHT) à la place de la longueur (L) comme critère de mesure, conformément à l'équivalence établie à l'annexe I. En outre, aux fins des paragraphes spécifiés à l'annexe III de la présente convention, l'autorité compétente peut, après consultation, décider d'utiliser la jauge brute à la place de la longueur (L) comme critère de mesure, conformément à l'équivalence établie à l'annexe III.

2. Dans les rapports présentés en vertu de l'article 22 de la Constitution, le Membre communiquera les raisons de la décision prise en vertu du présent article et les observations faites lors de la consultation.

## PARTIE II. PRINCIPES GÉNÉRAUX

### MISE EN ŒUVRE

#### *Article 6*

1. Tout Membre doit mettre en œuvre et faire respecter les lois, règlements ou autres mesures qu'il a adoptés afin de s'acquitter de ses obligations aux termes de la présente convention en ce qui concerne les pêcheurs et les navires de pêche relevant de sa compétence; les autres mesures peuvent comprendre des conventions collectives, des décisions judiciaires, des sentences arbitrales et autres moyens conformes à la législation et à la pratique nationales.

2. Nothing in this Convention shall affect any law, award or custom, or any agreement between fishing vessel owners and fishers, which ensures more favourable conditions than those provided for in the Convention.

## COMPETENT AUTHORITY AND COORDINATION

### *Article 7*

Each Member shall:

- (a) designate the competent authority or authorities; and
- (b) establish mechanisms for coordination among relevant authorities for the fishing sector at the national and local levels, as appropriate, and define their functions and responsibilities, taking into account their complementarities and national conditions and practice.

## RESPONSIBILITIES OF FISHING VESSEL OWNERS, SKIPPER AND FISHERS

### *Article 8*

1. The fishing vessel owner has the overall responsibility to ensure that the skipper is provided with the necessary resources and facilities to comply with the obligations of this Convention.

2. The skipper has the responsibility for the safety of the fishers on board and the safe operation of the vessel, including but not limited to the following areas:

- (a) providing such supervision as will ensure that, as far as possible, fishers perform their work in the best conditions of safety and health;
- (b) managing the fishers in a manner which respects safety and health, including prevention of fatigue;
- (c) facilitating on-board occupational safety and health awareness training; and
- (d) ensuring compliance with safety of navigation, watchkeeping and associated good seamanship standards.

3. The skipper shall not be constrained by the fishing vessel owner from taking any decision which, in the professional judgement of the skipper, is necessary for the safety of the vessel and its safe navigation and safe operation, or the safety of the fishers on board.

4. Fishers shall comply with the lawful orders of the skipper and applicable safety and health measures.

2. Aucune des dispositions de la présente convention n'aura d'incidence sur les lois, décisions, coutumes ou sur les accords entre armateurs à la pêche et pêcheurs qui garantissent des conditions plus favorables que celles prévues par la convention.

## AUTORITÉ COMPÉTENTE ET COORDINATION

### *Article 7*

Tout Membre doit:

- a) désigner l'autorité compétente ou les autorités compétentes;
- b) établir des mécanismes de coordination entre les autorités concernées pour le secteur de la pêche aux niveaux national et local, selon le cas, et définir leurs fonctions et responsabilités en tenant compte de leur complémentarité ainsi que des conditions et de la pratique nationales.

## RESPONSABILITÉS DES ARMATEURS À LA PÊCHE, DES PATRONS ET DES PÊCHEURS

### *Article 8*

1. L'armateur à la pêche a la responsabilité globale de veiller à ce que le patron dispose des ressources et moyens nécessaires pour s'acquitter des obligations de la présente convention.

2. La responsabilité de la sécurité des pêcheurs à bord et du fonctionnement sûr du navire incombe au patron, notamment, mais non exclusivement, dans les domaines suivants:

- a) la supervision, qui doit être réalisée de façon à ce que les pêcheurs puissent, dans la mesure du possible, exécuter leur travail dans les meilleures conditions de sécurité et de santé;
- b) l'organisation du travail des pêcheurs, qui doit se faire en respectant la sécurité et la santé, y compris la prévention de la fatigue;
- c) la mise à disposition à bord d'une formation de sensibilisation à la sécurité et à la santé au travail;
- d) le respect des normes de sécurité de la navigation, de veille et de bonnes pratiques maritimes.

3. L'armateur à la pêche n'entravera pas la liberté du patron de prendre toute décision qui, de l'avis professionnel de ce dernier, est nécessaire pour la sécurité du navire, de sa navigation et de son exploitation, ou pour la sécurité des pêcheurs qui sont à bord.

4. Les pêcheurs doivent respecter les ordres légaux du patron et les mesures de sécurité et de santé applicables.

PART III. MINIMUM REQUIREMENTS  
FOR WORK  
ON BOARD FISHING VESSELS

MINIMUM AGE

*Article 9*

1. The minimum age for work on board a fishing vessel shall be 16 years. However, the competent authority may authorize a minimum age of 15 for persons who are no longer subject to compulsory schooling as provided by national legislation, and who are engaged in vocational training in fishing.

2. The competent authority, in accordance with national laws and practice, may authorize persons of the age of 15 to perform light work during school holidays. In such cases, it shall determine, after consultation, the kinds of work permitted and shall prescribe the conditions in which such work shall be undertaken and the periods of rest required.

3. The minimum age for assignment to activities on board fishing vessels, which by their nature or the circumstances in which they are carried out are likely to jeopardize the health, safety or morals of young persons, shall not be less than 18 years.

4. The types of activities to which paragraph 3 of this Article applies shall be determined by national laws or regulations, or by the competent authority, after consultation, taking into account the risks concerned and the applicable international standards.

5. The performance of the activities referred to in paragraph 3 of this Article as from the age of 16 may be authorized by national laws or regulations, or by decision of the competent authority, after consultation, on condition that the health, safety or morals of the young persons concerned are fully protected and that the young persons concerned have received adequate specific instruction or vocational training and have completed basic pre-sea safety training.

6. The engagement of fishers under the age of 18 for work at night shall be prohibited. For the purpose of this Article, "night" shall be defined in accordance with national law and practice. It shall cover a period of at least nine hours starting no later than midnight and ending no earlier than 5 a.m. An exception to strict compliance with the night work restriction may be made by the competent authority when:

- (a) the effective training of the fishers concerned, in accordance with established programmes and schedules, would be impaired; or
- (b) the specific nature of the duty or a recognized training programme requires that fishers covered by the exception perform duties at night and the authority determines, after consultation, that the work will not have a detrimental impact on their health or well-being.

7. None of the provisions in this Article shall affect any obligations assumed by the Member arising from the ratification of any other international labour Convention.

PARTIE III. CONDITIONS MINIMALES REQUISES  
POUR LE TRAVAIL  
À BORD DES NAVIRES DE PÊCHE

AGE MINIMUM

*Article 9*

1. L'âge minimum pour le travail à bord d'un navire de pêche est de 16 ans. Toutefois, l'autorité compétente peut autoriser un âge minimum de 15 ans pour les personnes qui ne sont plus soumises à l'obligation de scolarité imposée par la législation nationale et suivent une formation professionnelle en matière de pêche.

2. L'autorité compétente peut, conformément à la législation et à la pratique nationales, autoriser des personnes âgées de 15 ans à exécuter des travaux légers lors des vacances scolaires. Dans ces cas, elle déterminera, après consultation, les types de travail autorisés et prescrira les conditions dans lesquelles ce travail sera entrepris et les périodes de repos requises.

3. L'âge minimum d'affectation à des activités à bord d'un navire de pêche qui, par leur nature ou les conditions dans lesquelles elles s'exercent, sont susceptibles de compromettre la santé, la sécurité ou la moralité des jeunes travailleurs ne doit pas être inférieur à 18 ans.

4. Les types d'activités visés au paragraphe 3 du présent article sont déterminés par la législation nationale ou l'autorité compétente, après consultation, en tenant compte des risques qu'ils comportent et des normes internationales applicables.

5. L'exécution des activités visées au paragraphe 3 du présent article dès l'âge de 16 ans peut être autorisée par la législation nationale ou par une décision de l'autorité compétente, après consultation, à condition que la santé, la sécurité ou la moralité des jeunes travailleurs soient pleinement garanties, qu'ils aient reçu une instruction spécifique et adéquate ou une formation professionnelle et qu'ils aient suivi intégralement une formation de base aux questions de sécurité préalable à l'embarquement.

6. Il est interdit d'engager un pêcheur de moins de 18 ans pour un travail de nuit. Aux fins du présent article, le terme «nuit» est défini conformément à la législation et à la pratique nationales. Il couvre une période de neuf heures consécutives au moins, commençant au plus tard à minuit et se terminant au plus tôt à 5 heures du matin. Une dérogation à la stricte observation de la restriction concernant le travail de nuit peut être décidée par l'autorité compétente quand:

- a) la formation effective des pêcheurs concernés dans le cadre de programmes et plans d'études établis pourrait en être compromise; ou
- b) la nature particulière de la tâche ou un programme de formation agréé exige que les pêcheurs visés par la dérogation travaillent la nuit et l'autorité décide, après consultation, que ce travail ne portera pas préjudice à leur santé ou à leur bien-être.

7. Aucune des dispositions de cet article n'a d'incidence sur les obligations souscrites par le Membre en vertu de la ratification d'autres conventions internationales du travail.

## MEDICAL EXAMINATION

### *Article 10*

1. No fishers shall work on board a fishing vessel without a valid medical certificate attesting to fitness to perform their duties.

2. The competent authority, after consultation, may grant exemptions from the application of paragraph 1 of this Article, taking into account the health and safety of fishers, size of the vessel, availability of medical assistance and evacuation, duration of the voyage, area of operation, and type of fishing operation.

3. The exemptions in paragraph 2 of this Article shall not apply to a fisher working on a fishing vessel of 24 metres in length and over or which normally remains at sea for more than three days. In urgent cases, the competent authority may permit a fisher to work on such a vessel for a period of a limited and specified duration until a medical certificate can be obtained, provided that the fisher is in possession of an expired medical certificate of a recent date.

### *Article 11*

Each Member shall adopt laws, regulations or other measures providing for:

- (a) the nature of medical examinations;
- (b) the form and content of medical certificates;
- (c) the issue of a medical certificate by a duly qualified medical practitioner or, in the case of a certificate solely concerning eyesight, by a person recognized by the competent authority as qualified to issue such a certificate; these persons shall enjoy full independence in exercising their professional judgement;
- (d) the frequency of medical examinations and the period of validity of medical certificates;
- (e) the right to a further examination by a second independent medical practitioner in the event that a person has been refused a certificate or has had limitations imposed on the work he or she may perform; and
- (f) other relevant requirements.

### *Article 12*

On a fishing vessel of 24 metres in length and over, or on a vessel which normally remains at sea for more than three days:

1. The medical certificate of a fisher shall state, at a minimum, that:

- (a) the hearing and sight of the fisher concerned are satisfactory for the fisher's duties on the vessel; and
- (b) the fisher is not suffering from any medical condition likely to be aggravated by service at sea or to render the fisher unfit for such service or to endanger the health of other persons on board.

2. The medical certificate shall be valid for a maximum period of two years unless the fisher is under the age of 18, in which case the maximum period of validity shall be one year.

## EXAMEN MÉDICAL

### *Article 10*

1. Aucun pêcheur ne doit travailler à bord d'un navire de pêche sans disposer d'un certificat médical valide attestant de son aptitude à exécuter ses tâches.

2. L'autorité compétente peut, après consultation, octroyer des dérogations à l'application du paragraphe 1 du présent article, compte tenu de la santé et de la sécurité des pêcheurs, de la taille du navire, de la disponibilité de l'assistance médicale et des moyens d'évacuation, de la durée du voyage, de la zone d'opération et du type d'activité de pêche.

3. Les dérogations visées au paragraphe 2 du présent article ne s'appliqueront pas à un pêcheur travaillant sur un navire de pêche d'une longueur égale ou supérieure à 24 mètres ou qui passe normalement plus de trois jours en mer. Dans les cas urgents, l'autorité compétente peut autoriser un pêcheur à travailler sur un tel navire pour une période d'une durée limitée et spécifiée en attendant qu'il puisse obtenir un certificat médical, sous réserve que ce pêcheur soit en possession d'un certificat médical expiré depuis peu.

### *Article 11*

Tout Membre doit adopter des lois, règlements ou autres mesures concernant:

- a) la nature des examens médicaux;
- b) la forme et le contenu des certificats médicaux;
- c) la délivrance du certificat médical par du personnel médical dûment qualifié ou, dans le cas d'un certificat concernant seulement la vue, par une personne habilitée par l'autorité compétente à délivrer un tel certificat; ces personnes doivent jouir d'une totale indépendance lorsqu'elles exercent leur jugement professionnel;
- d) la fréquence des examens médicaux et la durée de validité des certificats médicaux;
- e) le droit pour une personne d'être réexaminée par du personnel médical indépendant différent au cas où elle se verrait refuser un certificat ou imposer des limitations au travail qu'elle peut effectuer;
- f) les autres conditions requises.

### *Article 12*

Sur un navire de pêche d'une longueur égale ou supérieure à 24 mètres ou passant normalement plus de trois jours en mer:

1. Le certificat médical du pêcheur doit au minimum indiquer:

- a) que l'ouïe et la vue de l'intéressé sont satisfaisantes compte tenu de ses tâches sur le navire; et
- b) que l'intéressé n'a aucun problème médical de nature à être aggravé par le service en mer ou qui le rend inapte à ce service ou qui comporterait des risques pour la santé d'autres personnes à bord.

2. Le certificat médical est valide pendant deux ans au maximum à moins que le pêcheur soit âgé de moins de 18 ans, auquel cas la durée maximale de validité sera d'un an.

3. If the period of validity of a certificate expires in the course of a voyage, the certificate shall remain in force until the end of that voyage.

## PART IV. CONDITIONS OF SERVICE

### MANNING AND HOURS OF REST

#### *Article 13*

Each Member shall adopt laws, regulations or other measures requiring that owners of fishing vessels flying its flag ensure that:

- (a) their vessels are sufficiently and safely manned with a crew necessary for the safe navigation and operation of the vessel and under the control of a competent skipper; and
- (b) fishers are given regular periods of rest of sufficient length to ensure health and safety.

#### *Article 14*

1. In addition to the requirements set out in Article 13, the competent authority shall:

- (a) for vessels of 24 metres in length and over, establish a minimum level of manning for the safe navigation of the vessel, specifying the number and the qualifications of the fishers required;
- (b) for fishing vessels regardless of size remaining at sea for more than three days, after consultation and for the purpose of limiting fatigue, establish the minimum hours of rest to be provided to fishers. Minimum hours of rest shall not be less than ten hours in any 24-hour period, and 77 hours in any seven-day period.

2. The competent authority may permit, for limited and specified reasons, temporary exceptions to the limits established in paragraph 1(b) of this Article. However, in such circumstances, it shall require that fishers shall receive compensatory periods of rest as soon as practicable.

3. The competent authority, after consultation, may establish alternative requirements to those in paragraphs 1 and 2 of this Article. However, such alternative requirements shall provide at least the same level of protection.

### CREW LIST

#### *Article 15*

Every fishing vessel shall carry a crew list, a copy of which shall be provided to authorized persons ashore prior to departure of the vessel, or communicated ashore immediately after departure of the vessel. The competent authority shall determine to whom and when such information shall be provided and for what purpose or purposes.

3. Si la période de validité du certificat expire au cours d'un voyage, le certificat reste valide jusqu'à la fin du voyage.

## PARTIE IV. CONDITIONS DE SERVICE

### ÉQUIPAGE ET DURÉE DU REPOS

#### *Article 13*

Tout Membre doit adopter des lois, règlements ou autres mesures prévoyant que les armateurs de navires de pêche battant son pavillon veillent à ce que:

- a) leurs navires soient dotés d'un équipage suffisant en nombre et en qualité pour assurer une navigation et un fonctionnement dans des conditions sûres et sous le contrôle d'un patron compétent;
- b) des périodes de repos régulières d'une fréquence et d'une durée suffisantes pour préserver leur santé et leur sécurité soient octroyées aux pêcheurs.

#### *Article 14*

1. Outre les prescriptions énoncées à l'article 13, l'autorité compétente doit:

- a) pour les navires d'une longueur égale ou supérieure à 24 mètres, fixer l'effectif minimal propre à garantir la sécurité de navigation du navire et préciser le nombre de pêcheurs requis et les qualifications qu'ils doivent posséder;
- b) pour les navires de pêche restant en mer plus de trois jours, quelle que soit leur taille, fixer, après consultation et en vue de limiter la fatigue, une durée minimum de repos pour les pêcheurs. Cette durée ne doit pas être inférieure à dix heures par période de 24 heures, ni à 77 heures par période de sept jours.

2. L'autorité compétente peut, pour des raisons limitées et précises, autoriser qu'il soit dérogé temporairement aux durées de repos fixées à l'alinéa b) du paragraphe 1 du présent article. Dans ces cas, elle doit toutefois exiger que des périodes de repos compensatoires soient accordées aux pêcheurs dès que possible.

3. L'autorité compétente peut, après consultation, établir des prescriptions remplaçant celles fixées aux paragraphes 1 et 2 du présent article. Toutefois, le niveau de protection prévu par lesdites prescriptions ne doit pas être moindre.

### LISTE D'ÉQUIPAGE

#### *Article 15*

Tout navire de pêche doit avoir à bord une liste d'équipage, dont un exemplaire est fourni aux personnes autorisées à terre avant le départ du navire ou communiqué à terre immédiatement après. L'autorité compétente doit déterminer à qui, à quel moment et à quelles fins cette information doit être fournie.

## FISHER'S WORK AGREEMENT

*Article 16*

Each Member shall adopt laws, regulations or other measures:

- (a) requiring that fishers working on vessels flying its flag have the protection of a fisher's work agreement that is comprehensible to them and is consistent with the provisions of this Convention; and
- (b) specifying the minimum particulars to be included in fishers' work agreements in accordance with the provisions contained in Annex II.

*Article 17*

Each Member shall adopt laws, regulations or other measures regarding:

- (a) procedures for ensuring that a fisher has an opportunity to review and seek advice on the terms of the fisher's work agreement before it is concluded;
- (b) where applicable, the maintenance of records concerning the fisher's work under such an agreement; and
- (c) the means of settling disputes in connection with a fisher's work agreement.

*Article 18*

The fisher's work agreement, a copy of which shall be provided to the fisher, shall be carried on board and be available to the fisher and, in accordance with national law and practice, to other concerned parties on request.

*Article 19*

Articles 16 to 18 and Annex II do not apply to a fishing vessel owner who is also single-handedly operating the vessel.

*Article 20*

It shall be the responsibility of the fishing vessel owner to ensure that each fisher has a written work agreement signed by both the fisher and the fishing vessel owner or an authorized representative of the fishing vessel owner.

## REPATRIATION

*Article 21*

1. Members shall ensure that fishers on a fishing vessel that flies their flag and that enters a foreign port are entitled to repatriation in the event that the fisher's work agreement has expired or has been terminated for justified reasons by the fisher or by the fishing vessel owner, or the fisher is no longer able to carry out the duties required under the work agreement or cannot be expected to carry them out in the specific circumstances. This also applies to fishers from that vessel who are transferred for the same reasons from the vessel to the foreign port.

## ACCORD D'ENGAGEMENT DU PÊCHEUR

### *Article 16*

Tout Membre doit adopter des lois, règlements ou autres mesures:

- a) prévoyant que les pêcheurs travaillant à bord des navires battant son pavillon soient protégés par un accord d'engagement qui soit conforme aux dispositions de la présente convention et qui leur soit compréhensible;
- b) indiquant les mentions minimales à inclure dans les accords d'engagement des pêcheurs, conformément aux dispositions de l'annexe II.

### *Article 17*

Tout Membre doit adopter des lois, règlements ou autres mesures concernant:

- a) les procédures garantissant que le pêcheur a la possibilité d'examiner les clauses de son accord d'engagement et de demander conseil à ce sujet avant de le conclure;
- b) s'il y a lieu, la tenue des états de service du pêcheur dans le cadre de cet accord;
- c) les moyens de régler les différends relatifs à l'accord d'engagement du pêcheur.

### *Article 18*

L'accord d'engagement du pêcheur, dont un exemplaire lui est remis, est disponible à bord, à la disposition du pêcheur et, conformément à la législation et à la pratique nationales, de toute autre partie concernée qui en fait la demande.

### *Article 19*

Les articles 16 à 18 et l'annexe II ne s'appliquent pas au propriétaire de navire qui exploite celui-ci seul.

### *Article 20*

Il incombe à l'armateur à la pêche de veiller à ce que chaque pêcheur soit en possession d'un accord d'engagement écrit, signé à la fois par le pêcheur et l'armateur à la pêche, ou par un représentant autorisé de celui-ci.

## RAPATRIEMENT

### *Article 21*

1. Les Membres doivent veiller à ce que les pêcheurs à bord d'un navire de pêche battant leur pavillon et qui entre dans un port étranger aient le droit d'être rapatriés lorsque l'accord d'engagement du pêcheur a expiré, ou lorsque le pêcheur ou l'armateur à la pêche y a mis fin pour des raisons justifiées, ou lorsque le pêcheur n'est plus en mesure de s'acquitter des tâches qui lui incombent en vertu de l'accord d'engagement ou qu'on ne peut attendre de lui qu'il les exécute compte tenu des circonstances. La présente disposition s'applique également aux pêcheurs de ce navire qui sont transférés pour les mêmes raisons du navire vers un port étranger.

2. The cost of the repatriation referred to in paragraph 1 of this Article shall be borne by the fishing vessel owner, except where the fisher has been found, in accordance with national laws, regulations or other measures, to be in serious default of his or her work agreement obligations.

3. Members shall prescribe, by means of laws, regulations or other measures, the precise circumstances entitling a fisher covered by paragraph 1 of this Article to repatriation, the maximum duration of service periods on board following which a fisher is entitled to repatriation, and the destinations to which fishers may be repatriated.

4. If a fishing vessel owner fails to provide for the repatriation referred to in this Article, the Member whose flag the vessel flies shall arrange for the repatriation of the fisher concerned and shall be entitled to recover the cost from the fishing vessel owner.

## RECRUITMENT AND PLACEMENT

### *Article 22*

1. Each Member that operates a public service providing recruitment and placement for fishers shall ensure that the service forms part of, or is coordinated with, a public employment service for all workers and employers.

2. Any private service providing recruitment and placement for fishers which operates in the territory of a Member shall do so in conformity with a standardized system of licensing or certification or other form of regulation, which shall be established, maintained or modified only after consultation.

3. Each Member shall, by means of laws, regulations or other measures:

- (a) prohibit recruitment and placement services from using means, mechanisms or lists intended to prevent or deter fishers from engaging for work;
- (b) require that no fees or other charges for recruitment and placement of fishers be borne directly or indirectly, in whole or in part, by the fisher; and
- (c) determine the conditions under which any licence, certificate or similar authorization of a private recruitment or placement service may be suspended or withdrawn in case of violation of relevant laws or regulations; and specify the conditions under which private recruitment and placement services can operate.

## PAYMENT OF FISHERS

### *Article 23*

Each Member, after consultation, shall adopt laws, regulations or other measures providing that fishers who are paid a wage are ensured a monthly or regular payment.

### *Article 24*

Each Member shall require that all fishers working on board fishing vessels shall be given a means to transmit all or part of their payments received, including advances, to their families at no cost.

2. Les frais du rapatriement visé au paragraphe 1 du présent article doivent être pris en charge par l'armateur à la pêche, sauf si le pêcheur a été reconnu, conformément à la législation nationale ou à d'autres dispositions applicables, coupable d'un manquement grave aux obligations de son accord d'engagement.

3. Les Membres doivent déterminer, par voie de législation ou autre, les circonstances précises donnant droit à un rapatriement, la durée maximale des périodes d'embarquement au terme desquelles les pêcheurs visés au paragraphe 1 du présent article ont droit au rapatriement, et les destinations vers lesquelles ils peuvent être rapatriés.

4. Si l'armateur à la pêche omet de pourvoir au rapatriement visé au présent article, le Membre dont le navire bat pavillon doit organiser le rapatriement du pêcheur concerné et a le droit de recouvrer les frais auprès de l'armateur à la pêche.

## RECRUTEMENT ET PLACEMENT

### *Article 22*

1. Tout Membre qui a mis en place un service public de recrutement et de placement de pêcheurs doit s'assurer que ce service fait partie du service public de l'emploi ouvert à l'ensemble des travailleurs et des employeurs ou qu'il agit en coordination avec celui-ci.

2. Les services privés de recrutement et de placement de pêcheurs qui sont établis sur le territoire d'un Membre doivent exercer leur activité en vertu d'un système de licence ou d'agrément normalisé ou d'une autre forme de réglementation, lesquels ne seront établis, maintenus ou modifiés qu'après consultation.

3. Tout Membre doit, par voie de législation ou autres mesures:

- a) interdire aux services de recrutement et de placement d'avoir recours à des moyens, mécanismes ou listes visant à empêcher ou à dissuader les pêcheurs d'obtenir un engagement;
- b) interdire que des honoraires ou autres frais soient supportés par les pêcheurs, directement ou indirectement, en tout ou en partie, pour le recrutement et le placement;
- c) fixer les conditions dans lesquelles une licence, un agrément ou toute autre autorisation d'un service privé de recrutement et de placement peuvent être suspendus ou retirés en cas d'infraction à la législation pertinente et préciser les conditions dans lesquelles lesdits services privés peuvent exercer leurs activités.

## PAIEMENTS DES PÊCHEURS

### *Article 23*

Tout Membre adopte, après consultation, une législation ou d'autres mesures prescrivantes que les pêcheurs qui perçoivent un salaire seront payés mensuellement ou à intervalles réguliers.

### *Article 24*

Tout Membre doit exiger que tous les pêcheurs travaillant à bord de navires de pêche aient les moyens de faire parvenir à leur famille et sans frais tout ou partie des paiements reçus, y compris les avances.

## PART V. ACCOMMODATION AND FOOD

### *Article 25*

Each Member shall adopt laws, regulations or other measures for fishing vessels that fly its flag with respect to accommodation, food and potable water on board.

### *Article 26*

Each Member shall adopt laws, regulations or other measures requiring that accommodation on board fishing vessels that fly its flag shall be of sufficient size and quality and appropriately equipped for the service of the vessel and the length of time fishers live on board. In particular, such measures shall address, as appropriate, the following issues:

- (a) approval of plans for the construction or modification of fishing vessels in respect of accommodation;
- (b) maintenance of accommodation and galley spaces with due regard to hygiene and overall safe, healthy and comfortable conditions;
- (c) ventilation, heating, cooling and lighting;
- (d) mitigation of excessive noise and vibration;
- (e) location, size, construction materials, furnishing and equipping of sleeping rooms, mess rooms and other accommodation spaces;
- (f) sanitary facilities, including toilets and washing facilities, and supply of sufficient hot and cold water; and
- (g) procedures for responding to complaints concerning accommodation that does not meet the requirements of this Convention.

### *Article 27*

Each Member shall adopt laws, regulations or other measures requiring that:

- (a) the food carried and served on board be of a sufficient nutritional value, quality and quantity;
- (b) potable water be of sufficient quality and quantity; and
- (c) the food and water shall be provided by the fishing vessel owner at no cost to the fisher. However, the cost can be recovered as an operational cost if the collective agreement governing a share system or a fisher's work agreement so provides.

### *Article 28*

1. The laws, regulations or other measures to be adopted by the Member in accordance with Articles 25 to 27 shall give full effect to Annex III concerning fishing vessel accommodation. Annex III may be amended in the manner provided for in Article 45.

2. A Member which is not in a position to implement the provisions of Annex III may, after consultation, adopt provisions in its laws and regulations or other measures which are substantially equivalent to the provisions set out in Annex III, with the exception of provisions related to Article 27.

## PARTIE V. LOGEMENT ET ALIMENTATION

### *Article 25*

Tout Membre doit adopter une législation ou d'autres mesures relatives au logement, à la nourriture et à l'eau potable à bord des navires de pêche battant son pavillon.

### *Article 26*

Tout Membre doit adopter une législation ou d'autres mesures prévoyant que le logement à bord des navires de pêche battant son pavillon sera d'une qualité et d'une taille suffisantes et qu'il sera équipé de façon adaptée au service du navire et à la durée du séjour des pêcheurs à bord. En particulier, ces mesures régleront, selon le cas, les questions suivantes:

- a) approbation des plans de construction ou de modification des navires de pêche en ce qui concerne le logement;
- b) maintien du logement et de la cuisine dans des conditions générales d'hygiène, de sécurité, de santé et de confort;
- c) ventilation, chauffage, refroidissement et éclairage;
- d) réduction des bruits et vibrations excessifs;
- e) emplacement, taille, matériaux de construction, fournitures et équipement des cabines, réfectoires et autres espaces de logement;
- f) installations sanitaires, comprenant des toilettes et des moyens de lavage, et fourniture d'eau chaude et froide en quantité suffisante;
- g) procédures d'examen des plaintes concernant des conditions de logement qui ne satisfont pas aux prescriptions de la présente convention.

### *Article 27*

Tout Membre doit adopter une législation ou d'autres mesures prévoyant que:

- a) la nourriture transportée et servie à bord doit être d'une valeur nutritionnelle, d'une qualité et d'une quantité suffisantes;
- b) l'eau potable doit être d'une qualité et d'une quantité suffisantes;
- c) la nourriture et l'eau potable doivent être fournies par l'armateur à la pêche sans frais pour le pêcheur. Toutefois, les frais peuvent être recouverts sous forme de coûts d'exploitation pour autant qu'une convention collective régissant un système de rémunération à la part ou que l'accord d'engagement du pêcheur le prévoit.

### *Article 28*

1. La législation ou les autres mesures adoptées par le Membre conformément aux articles 25 à 27 doivent donner pleinement effet à l'annexe III concernant le logement à bord des navires de pêche. L'annexe III peut être amendée de la façon prévue à l'article 45.

2. Un Membre qui n'est pas en mesure d'appliquer les dispositions de l'annexe III peut, après consultation, adopter dans sa législation des dispositions ou d'autres mesures équivalentes dans l'ensemble aux dispositions énoncées à l'annexe III, à l'exception des dispositions se rapportant à l'article 27.

PART VI. MEDICAL CARE, HEALTH PROTECTION  
AND SOCIAL SECURITY

MEDICAL CARE

*Article 29*

Each Member shall adopt laws, regulations or other measures requiring that:

- (a) fishing vessels carry appropriate medical equipment and medical supplies for the service of the vessel, taking into account the number of fishers on board, the area of operation and the length of the voyage;
- (b) fishing vessels have at least one person on board who is qualified or trained in first aid and other forms of medical care and who has the necessary knowledge to use the medical equipment and supplies for the vessel concerned, taking into account the number of fishers on board, the area of operation and the length of the voyage;
- (c) medical equipment and supplies carried on board be accompanied by instructions or other information in a language and format understood by the person or persons referred to in subparagraph (b);
- (d) fishing vessels be equipped for radio or satellite communication with persons or services ashore that can provide medical advice, taking into account the area of operation and the length of the voyage; and
- (e) fishers have the right to medical treatment ashore and the right to be taken ashore in a timely manner for treatment in the event of serious injury or illness.

*Article 30*

For fishing vessels of 24 metres in length and over, taking into account the number of fishers on board, the area of operation and the duration of the voyage, each Member shall adopt laws, regulations or other measures requiring that:

- (a) the competent authority prescribe the medical equipment and medical supplies to be carried on board;
- (b) the medical equipment and medical supplies carried on board be properly maintained and inspected at regular intervals established by the competent authority by responsible persons designated or approved by the competent authority;
- (c) the vessels carry a medical guide adopted or approved by the competent authority, or the (ILO/IMO/WHO) *International Medical Guide for Ships*;
- (d) the vessels have access to a prearranged system of medical advice to vessels at sea by radio or satellite communication, including specialist advice, which shall be available at all times;
- (e) the vessels carry on board a list of radio or satellite stations through which medical advice can be obtained; and
- (f) to the extent consistent with the Member's national law and practice, medical care while the fisher is on board or landed in a foreign port be provided free of charge to the fisher.

PARTIE VI. SOINS MÉDICAUX, PROTECTION DE LA SANTÉ  
ET SÉCURITÉ SOCIALE

SOINS MÉDICAUX

*Article 29*

Tout Membre doit adopter une législation ou d'autres mesures prévoyant que:

- a) les navires de pêche soient dotés de fournitures et d'un matériel médicaux adaptés au service du navire, compte tenu du nombre de pêcheurs à bord, de la zone d'opération et de la durée du voyage;
- b) les navires de pêche aient à leur bord au moins une personne qualifiée ou formée pour donner les premiers secours et autres formes de soins médicaux, qui sache utiliser les fournitures et le matériel médicaux dont est doté le navire, compte tenu du nombre de pêcheurs à bord, de la zone d'opération et de la durée du voyage;
- c) les fournitures et le matériel médicaux présents à bord soient accompagnés d'instructions ou d'autres informations dans une langue et une présentation compréhensibles à la personne ou aux personnes mentionnées à l'alinéa b);
- d) les navires de pêche soient équipés d'un système de communication par radio ou par satellite avec des personnes ou services à terre pouvant fournir des consultations médicales, compte tenu de la zone d'opération et de la durée du voyage;
- e) les pêcheurs aient le droit de bénéficier d'un traitement médical à terre et d'être débarqués à cet effet en temps voulu en cas de lésion ou de maladie grave.

*Article 30*

Pour les navires de pêche d'une longueur égale ou supérieure à 24 mètres, compte tenu du nombre de pêcheurs à bord, de la zone d'opération et de la durée du voyage, tout Membre doit adopter une législation ou d'autres mesures prévoyant que:

- a) l'autorité compétente prescrive le matériel médical et les fournitures médicales à avoir à disposition à bord;
- b) le matériel médical et les fournitures médicales disponibles à bord soient entretenus de façon adéquate et inspectés à des intervalles réguliers, fixés par l'autorité compétente, par des responsables désignés ou agréés par celle-ci;
- c) les navires soient pourvus d'un guide médical de bord adopté ou approuvé par l'autorité compétente ou du *Guide médical international de bord* (OIT/OMI/OMS);
- d) les navires en mer aient accès, au moyen d'arrangements préalables, à des consultations médicales par radio ou par satellite, y compris à des conseils de spécialistes, à toute heure du jour ou de la nuit;
- e) les navires conservent à bord une liste de stations de radio ou de satellite par l'intermédiaire desquelles des consultations médicales peuvent être obtenues;
- f) dans une mesure conforme à la législation et à la pratique du Membre, les soins médicaux dispensés au pêcheur lorsqu'il est à bord ou débarqué dans un port étranger lui soient fournis gratuitement.

## OCCUPATIONAL SAFETY AND HEALTH AND ACCIDENT PREVENTION

*Article 31*

Each Member shall adopt laws, regulations or other measures concerning:

- (a) the prevention of occupational accidents, occupational diseases and work-related risks on board fishing vessels, including risk evaluation and management, training and on-board instruction of fishers;
- (b) training for fishers in the handling of types of fishing gear they will use and in the knowledge of the fishing operations in which they will be engaged;
- (c) the obligations of fishing vessel owners, fishers and others concerned, due account being taken of the safety and health of fishers under the age of 18;
- (d) the reporting and investigation of accidents on board fishing vessels flying its flag; and
- (e) the setting up of joint committees on occupational safety and health or, after consultation, of other appropriate bodies.

*Article 32*

1. The requirements of this Article shall apply to fishing vessels of 24 metres in length and over normally remaining at sea for more than three days and, after consultation, to other vessels, taking into account the number of fishers on board, the area of operation, and the duration of the voyage.

2. The competent authority shall:

- (a) after consultation, require that the fishing vessel owner, in accordance with national laws, regulations, collective bargaining agreements and practice, establish on-board procedures for the prevention of occupational accidents, injuries and diseases, taking into account the specific hazards and risks on the fishing vessel concerned; and
- (b) require that fishing vessel owners, skippers, fishers and other relevant persons be provided with sufficient and suitable guidance, training material, or other appropriate information on how to assess and manage risks to safety and health on board fishing vessels.

3. Fishing vessel owners shall:

- (a) ensure that every fisher on board is provided with appropriate personal protective clothing and equipment;
- (b) ensure that every fisher on board has received basic safety training approved by the competent authority; the competent authority may grant written exemptions from this requirement for fishers who have demonstrated equivalent knowledge and experience; and
- (c) ensure that fishers are sufficiently and reasonably familiarized with equipment and its methods of operation, including relevant safety measures, prior to using the equipment or participating in the operations concerned.

*Article 33*

Risk evaluation in relation to fishing shall be conducted, as appropriate, with the participation of fishers or their representatives.

## SANTÉ ET SÉCURITÉ AU TRAVAIL ET PRÉVENTION DES ACCIDENTS DU TRAVAIL

### Article 31

Tout Membre doit adopter une législation ou d'autres mesures concernant:

- a) la prévention des accidents du travail, des maladies professionnelles et des risques liés au travail à bord des navires, notamment l'évaluation et la gestion des risques, la formation des pêcheurs et l'instruction à bord;
- b) la formation des pêcheurs à l'utilisation des engins de pêche dont ils se serviront et à la connaissance des opérations de pêche qu'ils auront à effectuer;
- c) les obligations des armateurs à la pêche, des pêcheurs et autres personnes intéressées, compte dûment tenu de la santé et de la sécurité des pêcheurs âgés de moins de 18 ans;
- d) la déclaration des accidents survenant à bord des navires de pêche battant son pavillon et la réalisation d'enquêtes sur ces accidents;
- e) la constitution de comités paritaires de santé et de sécurité au travail ou, après consultation, d'autres organismes qualifiés.

### Article 32

1. Les prescriptions de cet article s'appliquent aux navires d'une longueur égale ou supérieure à 24 mètres qui restent habituellement en mer pour plus de trois jours et, après consultation, à d'autres navires, compte tenu du nombre de pêcheurs à bord, de la zone d'opération et de la durée du voyage.

2. L'autorité compétente doit:

- a) après consultation, faire obligation à l'armateur à la pêche d'établir, conformément à la législation, aux conventions collectives et à la pratique nationales, des procédures à bord visant à prévenir les accidents du travail et les lésions et maladies professionnelles, compte tenu des dangers et risques spécifiques du navire de pêche concerné;
- b) exiger que les armateurs à la pêche, les patrons, les pêcheurs et les autres personnes concernées reçoivent suffisamment de directives et de matériel de formation appropriés ainsi que toute autre information pertinente sur la manière d'évaluer et de gérer les risques en matière de santé et de sécurité à bord des navires de pêche.

3. Les armateurs à la pêche doivent:

- a) veiller à ce que tous les pêcheurs à bord reçoivent des vêtements et équipements de protection individuelle appropriés;
- b) veiller à ce que tous les pêcheurs à bord aient reçu une formation de base en matière de sécurité, approuvée par l'autorité compétente; cette dernière peut cependant accorder une dérogation écrite dans le cas des pêcheurs qui démontrent qu'ils possèdent des connaissances et une expérience équivalentes;
- c) veiller à ce que les pêcheurs soient suffisamment et convenablement familiarisés avec l'équipement et les opérations de pêche, y compris avec les mesures de sécurité s'y rapportant, avant d'utiliser cet équipement ou de participer auxdites opérations.

### Article 33

L'évaluation des risques concernant la pêche est effectuée, selon le cas, avec la participation de pêcheurs ou de leurs représentants.

## SOCIAL SECURITY

*Article 34*

Each Member shall ensure that fishers ordinarily resident in its territory, and their dependants to the extent provided in national law, are entitled to benefit from social security protection under conditions no less favourable than those applicable to other workers, including employed and self-employed persons, ordinarily resident in its territory.

*Article 35*

Each Member shall undertake to take steps, according to national circumstances, to achieve progressively comprehensive social security protection for all fishers who are ordinarily resident in its territory.

*Article 36*

Members shall cooperate through bilateral or multilateral agreements or other arrangements, in accordance with national laws, regulations or practice:

- (a) to achieve progressively comprehensive social security protection for fishers, taking into account the principle of equality of treatment irrespective of nationality; and
- (b) to ensure the maintenance of social security rights which have been acquired or are in the course of acquisition by all fishers regardless of residence.

*Article 37*

Notwithstanding the attribution of responsibilities in Articles 34, 35 and 36, Members may determine, through bilateral and multilateral agreements and through provisions adopted in the framework of regional economic integration organizations, other rules concerning the social security legislation to which fishers are subject.

PROTECTION IN THE CASE OF WORK-RELATED SICKNESS,  
INJURY OR DEATH*Article 38*

1. Each Member shall take measures to provide fishers with protection, in accordance with national laws, regulations or practice, for work-related sickness, injury or death.

2. In the event of injury due to occupational accident or disease, the fisher shall have access to:

- (a) appropriate medical care; and
- (b) the corresponding compensation in accordance with national laws and regulations.

## SÉCURITÉ SOCIALE

### *Article 34*

Tout Membre veillera à ce que les pêcheurs résidant habituellement sur son territoire et, dans la mesure prévue par la législation nationale, les personnes à leur charge bénéficient de la sécurité sociale à des conditions non moins favorables que celles qui s'appliquent aux autres travailleurs, y compris les personnes salariées ou indépendantes, résidant habituellement sur son territoire.

### *Article 35*

Tout Membre s'engage à prendre des mesures, en fonction de la situation nationale, pour assurer progressivement une protection complète de sécurité sociale à tous les pêcheurs résidant habituellement sur son territoire.

### *Article 36*

Les Membres doivent coopérer, dans le cadre d'accords bilatéraux ou multilatéraux ou d'autres arrangements, en conformité avec la législation ou la pratique nationales, en vue:

- a) d'assurer progressivement une protection complète de sécurité sociale aux pêcheurs, sans considération de la nationalité, en tenant compte du principe d'égalité de traitement;
- b) de garantir le maintien des droits en matière de sécurité sociale acquis ou en cours d'acquisition par tous les pêcheurs, indépendamment de leur lieu de résidence.

### *Article 37*

Nonobstant l'attribution des responsabilités prévues aux articles 34, 35 et 36, les Membres peuvent déterminer, par des accords bilatéraux ou multilatéraux et par des dispositions adoptées dans le cadre d'organisations régionales d'intégration économique, d'autres règlements touchant à la législation en matière de sécurité sociale applicable aux pêcheurs.

## PROTECTION EN CAS DE MALADIE, LÉSIONS OU DÉCÈS LIÉS AU TRAVAIL

### *Article 38*

1. Tout Membre prend des mesures en vue d'assurer aux pêcheurs une protection, conformément à la législation et à la pratique nationales, en cas de maladie, de lésion ou de décès liés au travail.

2. En cas de lésion provoquée par un accident du travail ou une maladie professionnelle, le pêcheur doit:

- a) avoir accès à des soins médicaux appropriés;
- b) bénéficier d'une indemnisation correspondante conformément à la législation nationale.

3. Taking into account the characteristics within the fishing sector, the protection referred to in paragraph 1 of this Article may be ensured through:

- (a) a system for fishing vessel owners' liability; or
- (b) compulsory insurance, workers' compensation or other schemes.

#### *Article 39*

1. In the absence of national provisions for fishers, each Member shall adopt laws, regulations or other measures to ensure that fishing vessel owners are responsible for the provision to fishers on vessels flying its flag, of health protection and medical care while employed or engaged or working on a vessel at sea or in a foreign port. Such laws, regulations or other measures shall ensure that fishing vessel owners are responsible for defraying the expenses of medical care, including related material assistance and support, during medical treatment in a foreign country, until the fisher has been repatriated.

2. National laws or regulations may permit the exclusion of the liability of the fishing vessel owner if the injury occurred otherwise than on the service of the vessel or the sickness or infirmity was concealed during engagement, or the injury or sickness was due to a wilful act, default or misbehaviour.

### PART VII. COMPLIANCE AND ENFORCEMENT

#### *Article 40*

Each Member shall exercise effective jurisdiction and control over vessels that fly its flag by establishing a system for ensuring compliance with the standards of this Convention including, as appropriate, inspections, reporting, monitoring, complaints procedures, appropriate penalties and corrective measures, in accordance with national laws or regulations.

#### *Article 41*

Members shall require that fishing vessels remaining at sea for more than three days, whether 24 metres in length and over or normally on voyages 200 nautical miles beyond the coastline of the flag State or the outer edge of its continental shelf, whichever is greater, carry a valid document issued by the competent authority stating that the vessel has been inspected by the competent authority or on its behalf, for compliance with the provisions of this Convention concerning living and working conditions. Such a document shall be valid for a period of five years or, if issued on the same date as the International Fishing Vessel Safety Certificate, for the period of validity of that certificate.

#### *Article 42*

1. The competent authority shall appoint a sufficient number of qualified inspectors to fulfil its responsibilities under Article 41.

3. Compte tenu des caractéristiques du secteur de la pêche, la protection visée au paragraphe 1 du présent article pourra être assurée:

- a) soit par un régime reposant sur la responsabilité de l'armateur à la pêche;
- b) soit par un régime d'assurance obligatoire d'indemnisation des travailleurs ou d'autres régimes.

#### *Article 39*

1. En l'absence de dispositions nationales applicables aux pêcheurs, tout Membre adopte une législation ou d'autres mesures visant à garantir que les armateurs à la pêche assurent la protection de la santé et les soins médicaux des pêcheurs lorsque ces derniers sont employés ou engagés ou travaillent à bord d'un navire battant son pavillon, en mer ou dans un port étranger. Ladite législation ou les autres mesures doivent garantir que les armateurs à la pêche acquittent les frais des soins médicaux, y compris l'aide et le soutien matériels correspondants pendant la durée des traitements médicaux dispensés à l'étranger jusqu'au rapatriement du pêcheur.

2. La législation nationale peut prévoir de décharger l'armateur à la pêche de sa responsabilité dans le cas où l'accident n'est pas survenu en service à bord du navire de pêche ou si la maladie ou l'infirmité a été dissimulée lors de l'engagement ou si l'accident ou la maladie est imputable à un acte intentionnel, une faute intentionnelle ou un écart de conduite du pêcheur.

### PARTIE VII. RESPECT ET APPLICATION

#### *Article 40*

Tout Membre exerce une compétence et un contrôle effectifs sur les navires battant son pavillon en se dotant d'un système propre à garantir le respect des normes de la présente convention, notamment en prévoyant, s'il y a lieu, la conduite d'inspections, l'établissement de rapports, une procédure de règlement des plaintes, un suivi et la mise en œuvre de sanctions et mesures correctives appropriées conformément à la législation nationale.

#### *Article 41*

Les Membres doivent exiger que les navires de pêche qui restent en mer pour plus de trois jours et qui, soit ont une longueur égale ou supérieure à 24 mètres, soit naviguent habituellement à plus de 200 milles nautiques de la côte de l'Etat du pavillon ou du rebord externe du plateau continental, si celui-ci est plus éloigné, aient à bord un document valide délivré par l'autorité compétente, indiquant qu'ils ont été inspectés par l'autorité compétente ou en son nom, en vue de déterminer leur conformité aux dispositions de la convention concernant les conditions de vie et de travail. La durée de validité de ce document est de cinq ans ou identique à la durée de validité du certificat international de sécurité des navires de pêche s'il a été délivré à la même date.

#### *Article 42*

1. L'autorité compétente désignera un nombre suffisant d'inspecteurs qualifiés afin d'assumer les responsabilités qui lui incombent en vertu de l'article 41.

2. In establishing an effective system for the inspection of living and working conditions on board fishing vessels, a Member, where appropriate, may authorize public institutions or other organizations that it recognizes as competent and independent to carry out inspections and issue documents. In all cases, the Member shall remain fully responsible for the inspection and issuance of the related documents concerning the living and working conditions of the fishers on fishing vessels that fly its flag.

#### *Article 43*

1. A Member which receives a complaint or obtains evidence that a fishing vessel that flies its flag does not conform to the requirements of this Convention shall take the steps necessary to investigate the matter and ensure that action is taken to remedy any deficiencies found.

2. If a Member, in whose port a fishing vessel calls in the normal course of its business or for operational reasons, receives a complaint or obtains evidence that such vessel does not conform to the standards of this Convention, it may prepare a report addressed to the government of the flag State of the vessel, with a copy to the Director-General of the International Labour Office, and may take measures necessary to rectify any conditions on board which are clearly hazardous to safety or health.

3. In taking the measures referred to in paragraph 2 of this Article, the Member shall notify forthwith the nearest representative of the flag State and, if possible, shall have such representative present. The Member shall not unreasonably detain or delay the vessel.

4. For the purpose of this Article, the complaint may be submitted by a fisher, a professional body, an association, a trade union or, generally, any person with an interest in the safety of the vessel, including an interest in safety or health hazards to the fishers on board.

5. This Article does not apply to complaints which a Member considers to be manifestly unfounded.

#### *Article 44*

Each Member shall apply the Convention in such a way as to ensure that the fishing vessels flying the flag of States that have not ratified the Convention do not receive more favourable treatment than fishing vessels that fly the flag of Members that have ratified it.

### PART VIII. AMENDMENT OF ANNEXES I, II AND III

#### *Article 45*

1. Subject to the relevant provisions of this Convention, the International Labour Conference may amend Annexes I, II and III. The Governing Body of the International Labour Office may place an item on the agenda of the Conference regarding proposals for such amendments established by a tripartite meeting of experts. The decision to adopt the proposals shall require a majority of two-thirds of the votes cast by

2. Aux fins de l'instauration d'un système efficace d'inspection des conditions de vie et de travail à bord des navires de pêche, un Membre peut, s'il y a lieu, autoriser des institutions publiques ou d'autres organismes dont il reconnaît la compétence et l'indépendance à réaliser des inspections et à délivrer des certificats. Dans tous les cas, le Membre demeurera entièrement responsable de l'inspection et de la délivrance des certificats correspondants relatifs aux conditions de vie et de travail des pêcheurs à bord des navires battant son pavillon.

#### *Article 43*

1. Un Membre qui reçoit une plainte ou qui acquiert la preuve qu'un navire battant son pavillon ne se conforme pas aux prescriptions de la convention prend les dispositions nécessaires aux fins d'enquête et s'assure que des mesures sont prises pour remédier aux défaillances constatées.

2. Si un Membre dans le port duquel un navire de pêche fait escale dans le cours normal de son activité ou pour une raison inhérente à son exploitation reçoit une plainte ou acquiert la preuve que ce navire de pêche n'est pas conforme aux normes de la présente convention, il peut adresser un rapport au gouvernement de l'Etat du pavillon, avec copie au Directeur général du Bureau international du Travail, et prendre les mesures nécessaires pour redresser toute situation à bord qui constitue manifestement un danger pour la sécurité ou la santé.

3. S'il prend les mesures mentionnées au paragraphe 2 du présent article, le Membre doit en informer immédiatement le plus proche représentant de l'Etat du pavillon et demander à celui-ci d'être présent si possible. Il ne doit pas retenir ou retarder indûment le navire.

4. Aux fins du présent article, une plainte peut être soumise par un pêcheur, un organisme professionnel, une association, un syndicat ou, de manière générale, toute personne ayant un intérêt à la sécurité du navire, y compris un intérêt à la sécurité ou à la santé des pêcheurs à bord.

5. Cet article ne s'applique pas aux plaintes qu'un Membre considère manifestement infondées.

#### *Article 44*

Tout Membre appliquera la convention de manière à garantir que les navires de pêche battant pavillon d'Etats qui n'ont pas ratifié la convention ne bénéficient pas d'un traitement plus favorable que celui accordé aux navires battant pavillon des Membres qui l'ont ratifiée.

### PARTIE VIII. AMENDEMENTS DES ANNEXES I, II ET III

#### *Article 45*

1. Sous réserve des dispositions pertinentes de la présente convention, la Conférence internationale du Travail peut amender les annexes I, II et III. Le Conseil d'administration du Bureau international du Travail peut inscrire à l'ordre du jour de la Conférence des propositions d'amendements établies par une réunion tripartite d'experts. La majorité des deux tiers des voix des délégués présents à la Conférence, comprenant au

the delegates present at the Conference, including at least half the Members that have ratified this Convention.

2. Any amendment adopted in accordance with paragraph 1 of this Article shall enter into force six months after the date of its adoption for any Member that has ratified this Convention, unless such Member has given written notice to the Director-General that it shall not enter into force for that Member, or shall only enter into force at a later date upon subsequent written notification.

## PART IX. FINAL PROVISIONS

### *Article 46*

This Convention revises the Minimum Age (Fishermen) Convention, 1959, the Medical Examination (Fishermen) Convention, 1959, the Fishermen's Articles of Agreement Convention, 1959, and the Accommodation of Crews (Fishermen) Convention, 1966.

*Note: The Conference Drafting Committee will, in accordance with its mandate under article 6, paragraph 3, of the Standing Orders of the International Labour Conference, insert the standard final articles, taking into account relevant decisions of the Conference Committee.*

moins la moitié des Membres ayant ratifié cette convention, est requise pour l'adoption d'amendements.

2. Tout amendement adopté conformément au paragraphe 1 du présent article entre en vigueur six mois après la date de son adoption pour tout Membre ayant ratifié la présente convention, à moins que le Membre en question n'ait adressé au Directeur général une notification écrite précisant que cet amendement n'entrera pas en vigueur à son égard ou n'entrera en vigueur qu'ultérieurement à la suite d'une nouvelle notification.

## PARTIE IX. DISPOSITIONS FINALES

### *Article 46*

La présente convention révisé la convention sur l'âge minimum (pêcheurs), 1959, la convention sur l'examen médical des pêcheurs, 1959, la convention sur le contrat d'engagement des pêcheurs, 1959, et la convention sur le logement à bord des bateaux de pêche, 1966.

*N.B. Conformément au mandat qui lui est donné à l'article 6, paragraphe 3, du Règlement de la Conférence internationale du Travail, le Comité de rédaction de la Conférence insérera ici les articles finals types, en tenant compte de toute décision pertinente de la Commission de la Conférence.*

## ANNEX I

### EQUIVALENCE IN MEASUREMENT

For the purpose of this Convention, where the competent authority, after consultation, decides to use length overall (LOA) rather than length (L) as the basis of measurement:

- (a) a length overall (LOA) of 16.5 metres shall be considered equivalent to a length (L) of 15 metres;
- (b) a length overall (LOA) of 26.5 metres shall be considered equivalent to a length (L) of 24 metres;
- (c) a length overall (LOA) of 50 metres shall be considered equivalent to a length (L) of 45 metres.

## ANNEXE I

### ÉQUIVALENCE POUR LE MESURAGE

Aux fins de la présente convention, lorsque l'autorité compétente, après consultation, décide d'utiliser la longueur hors tout (LHT) comme critère de mesure plutôt que la longueur (L):

- a) une longueur hors tout (LHT) de 16,5 mètres sera considérée comme équivalente à une longueur (L) de 15 mètres;
- b) une longueur hors tout (LHT) de 26,5 mètres sera considérée comme équivalente à une longueur (L) de 24 mètres;
- c) une longueur hors tout (LHT) de 50 mètres sera considérée comme équivalente à une longueur (L) de 45 mètres.

## ANNEX II

## FISHER'S WORK AGREEMENT

The fisher's work agreement shall contain the following particulars, except in so far as the inclusion of one or more of them is rendered unnecessary by the fact that the matter is regulated in another manner by national laws or regulations, or a collective bargaining agreement where applicable:

- (a) the fisher's family name and other names, date of birth or age, and birthplace;
- (b) the place at which and date on which the agreement was concluded;
- (c) the name of the fishing vessel or vessels and the registration number of the vessel or vessels on board which the fisher undertakes to work;
- (d) the name of the employer, or fishing vessel owner, or other party to the agreement with the fisher;
- (e) the voyage or voyages to be undertaken, if this can be determined at the time of making the agreement;
- (f) the capacity in which the fisher is to be employed or engaged;
- (g) if possible, the place at which and date on which the fisher is required to report on board for service;
- (h) the provisions to be supplied to the fisher, unless some alternative system is provided for by national law or regulation;
- (i) the amount of wages, or the amount of the share and the method of calculating such share if remuneration is to be on a share basis, or the amount of the wage and share and the method of calculating the latter if remuneration is to be on a combined basis, and any agreed minimum wage;
- (j) the termination of the agreement and the conditions thereof, namely:
  - (i) if the agreement has been made for a definite period, the date fixed for its expiry;
  - (ii) if the agreement has been made for a voyage, the port of destination and the time which has to expire after arrival before the fisher shall be discharged;
  - (iii) if the agreement has been made for an indefinite period, the conditions which shall entitle either party to rescind it, as well as the required period of notice for rescission, provided that such period shall not be less for the employer, or fishing vessel owner or other party to the agreement with the fisher;
- (k) the protection that will cover the fisher in the event of sickness, injury or death in connection with service;
- (l) the amount of paid annual leave or the formula used for calculating leave, where applicable;
- (m) the health and social security coverage and benefits to be provided to the fisher by the employer, fishing vessel owner, or other party or parties to the fisher's work agreement, as applicable;
- (n) the fisher's entitlement to repatriation;
- (o) a reference to the collective bargaining agreement, where applicable;
- (p) the minimum periods of rest, in accordance with national laws, regulations or other measures; and
- (q) any other particulars which national law or regulation may require.

## ANNEXE II

## ACCORD D'ENGAGEMENT DU PÊCHEUR

L'accord d'engagement du pêcheur devra comporter les mentions suivantes, sauf dans les cas où l'inclusion de l'une de ces mentions ou de certaines d'entre elles est inutile, la question étant déjà réglée d'une autre manière par la législation nationale ou, le cas échéant, par une convention collective:

- a) les nom et prénoms du pêcheur, la date de naissance ou l'âge, ainsi que le lieu de naissance;
- b) le lieu et la date de la conclusion du contrat;
- c) la désignation du ou des navires de pêche et le numéro d'immatriculation du ou des navires de pêche à bord duquel ou desquels le pêcheur s'engage à travailler;
- d) le nom de l'employeur ou de l'armateur à la pêche ou autre partie à l'accord;
- e) le voyage ou les voyages à entreprendre, s'ils peuvent être déterminés au moment de l'engagement;
- f) la fonction pour laquelle le pêcheur doit être employé ou engagé;
- g) si possible, la date à laquelle et le lieu où le pêcheur sera tenu de se présenter à bord pour le commencement de son service;
- h) les vivres à allouer au pêcheur, sauf si la législation nationale prévoit un système différent;
- i) le montant du salaire du pêcheur ou, s'il est rémunéré à la part, le pourcentage de sa part et le mode de calcul de celle-ci, ou encore, si un système mixte de rémunération est appliqué, le montant du salaire, le pourcentage de sa part et le mode de calcul de celle-ci, ainsi que tout salaire minimum convenu;
- j) l'échéance de l'accord et les conditions y relatives, soit:
  - i) si l'accord a été conclu pour une durée déterminée, la date fixée pour son expiration;
  - ii) si l'accord a été conclu au voyage, le port de destination convenu pour la fin de l'accord et l'indication du délai à l'expiration duquel le pêcheur sera libéré après l'arrivée à cette destination;
  - iii) si l'accord a été conclu pour une durée indéterminée, les conditions dans lesquelles chaque partie pourra dénoncer l'accord ainsi que le délai de préavis requis, lequel n'est pas plus court pour l'employeur, l'armateur à la pêche ou autre partie que pour le pêcheur;
- k) la protection en cas de maladie, de lésion ou de décès du pêcheur lié à son service;
- l) le congé payé annuel ou la formule utilisée pour le calculer, le cas échéant;
- m) les prestations en matière de protection de la santé et de sécurité sociale qui doivent être assurées au pêcheur par l'employeur, l'armateur à la pêche ou autre partie à l'accord d'engagement du pêcheur, selon le cas;
- n) le droit du pêcheur à un rapatriement;
- o) la référence à la convention collective, le cas échéant;
- p) les périodes minimales de repos conformément à la législation nationale ou autres mesures;
- q) toutes autres mentions que la législation nationale peut exiger.

## ANNEX III

### FISHING VESSEL ACCOMMODATION

#### *General provisions*

1. The following shall apply to all new, decked fishing vessels, subject to any exclusions provided for in accordance with Article 3 of this Convention. The competent authority may, after consultation, also apply the requirements of this Annex to existing vessels, when and in so far as it determines that this is reasonable and practicable.

2. The competent authority, after consultation, may permit variations to the provisions of this Annex for fishing vessels normally remaining at sea for less than 24 hours where the fishers do not live on board the vessel in port. In the case of such vessels, the competent authority shall ensure that the fishers concerned have adequate facilities for resting, eating and sanitation purposes.

3. Any variations made by a Member under paragraph 2 of this Annex shall be reported to the International Labour Office under article 22 of the Constitution of the International Labour Organisation.

4. The requirements for vessels of 24 metres in length and over may be applied to vessels between 15 and 24 metres in length where the competent authority determines, after consultation, that this is reasonable and practicable.

5. Fishers working on board feeder vessels which do not have appropriate accommodation and sanitary facilities shall be provided with such accommodation and facilities on board the mother vessel.

6. Members may extend the requirements of this Annex regarding noise and vibration, ventilation, heating and air conditioning, and lighting to enclosed working spaces and spaces used for storage if, after consultation, such application is considered appropriate and will not have a negative influence on the function of the process or working conditions or the quality of the catches.

7. The use of gross tonnage as referred to in Article 5 of this Convention is limited to the following specified paragraphs of this Annex: 12, 34, 35, 37, 39, 42, 56 and 61. For these purposes, where the competent authority, after consultation, decides to use gross tonnage (gt) as the basis of measurement:

- (a) a gross tonnage of 55 gt shall be considered equivalent to a length (L) of 15 metres or a length overall (LOA) of 16.5 metres;
- (b) a gross tonnage of 175 gt shall be considered equivalent to a length (L) of 24 metres or a length overall (LOA) of 26.5 metres;
- (c) a gross tonnage of 700 gt shall be considered equivalent to a length (L) of 45 metres or a length overall (LOA) of 50 metres.

#### *Planning and control*

8. The competent authority shall satisfy itself that, on every occasion when a vessel is newly constructed or the crew accommodation of a vessel has been reconstructed,

## ANNEXE III

### LOGEMENT À BORD DES NAVIRES DE PÊCHE

#### *Dispositions générales*

1. Les dispositions suivantes s'appliquent à tous les nouveaux navires de pêche pontés, sauf exclusions autorisées aux termes de l'article 3 de la présente convention. L'autorité compétente peut également, après consultation, appliquer les prescriptions de la présente annexe aux navires existants, dès lors que et dans la mesure où elle décide que cela est raisonnable et réalisable.

2. L'autorité compétente peut, après consultation, autoriser des dérogations aux dispositions de la présente annexe pour des navires de pêche ne restant normalement en mer que pour des durées inférieures à 24 heures si les pêcheurs ne vivent pas à bord du navire lorsqu'il est au port. Dans le cas de tels navires, l'autorité compétente doit veiller à ce que les pêcheurs concernés aient à leur disposition des installations adéquates pour leurs repos, alimentation et hygiène.

3. Toute dérogation faite par un Membre en vertu du paragraphe 2 de la présente annexe doit être communiquée au Bureau international du Travail conformément à l'article 22 de la Constitution de l'Organisation internationale du Travail.

4. Les prescriptions valables pour les navires d'une longueur égale ou supérieure à 24 mètres peuvent s'appliquer aux navires d'une longueur comprise entre 15 et 24 mètres si l'autorité compétente décide, après consultation, que cela est raisonnable et réalisable.

5. Les pêcheurs travaillant à bord de navires nourrices dépourvus de logements et d'installations sanitaires appropriés pourront utiliser ceux du navire mère.

6. Les Membres peuvent étendre les dispositions de la présente annexe relatives au bruit et aux vibrations, à la ventilation, au chauffage et à la climatisation, à l'éclairage aux lieux de travail clos et aux espaces servant à l'entreposage si, après consultation, cette extension est considérée appropriée et n'influe pas négativement sur les conditions de travail ou sur le traitement ou la qualité des captures.

7. L'utilisation de la jauge brute visée à l'article 5 de la présente convention est limitée aux paragraphes de la présente annexe spécifiés ci-après: 12, 34, 35, 37, 39, 42, 56 et 61. A ces fins, lorsque l'autorité compétente, après consultation, décide d'utiliser la jauge brute comme critère de mesure:

- a) une jauge brute de 55 sera considérée comme équivalente à une longueur (L) de 15 mètres, ou à une longueur hors tout (LHT) de 16,5 mètres;
- b) une jauge brute de 175 sera considérée comme équivalente à une longueur (L) de 24 mètres, ou à une longueur hors tout (LHT) de 26,5 mètres;
- c) une jauge brute de 700 sera considérée comme équivalente à une longueur (L) de 45 mètres, ou à une longueur hors tout (LHT) de 50 mètres.

#### *Planification et contrôle*

8. L'autorité compétente doit vérifier que, chaque fois qu'un navire vient d'être construit, ou que le logement de l'équipage à bord du navire a été refait à neuf, ledit

such vessel complies with the requirements of this Annex. The competent authority shall, to the extent practicable, require compliance with this Annex for a vessel that changes the flag it flies to the flag of the Member, or when the crew accommodation of a vessel is substantially altered.

9. For the occasions noted in paragraph 8 of this Annex, for vessels of 24 metres in length and over, detailed plans and information concerning accommodation shall be required to be submitted for approval to the competent authority, or an entity authorized by it.

10. For vessels of 24 metres in length and over, on every occasion when the vessel changes the flag it flies to the flag of the Member, or the crew accommodation of the fishing vessel has been reconstructed or substantially altered, the competent authority shall inspect the accommodation for compliance with this Convention. The competent authority may carry out additional inspections of crew accommodation at its discretion.

### *Design and construction*

#### *Headroom*

11. There shall be adequate headroom in all accommodation spaces. For spaces where fishers are expected to stand for prolonged periods, the minimum headroom shall be prescribed by the competent authority.

12. For vessels of 24 metres in length and over, the minimum permitted headroom in all accommodation where full and free movement is necessary shall not be less than 200 centimetres. The competent authority may permit some limited reduction in headroom in any space, or part of any space, in such accommodation where it is satisfied that such reduction is reasonable, and will not result in discomfort to the fishers.

#### *Openings into and between accommodation spaces*

13. There shall be no direct openings into sleeping rooms from fish rooms and machinery spaces, except for the purpose of emergency escape. Where reasonable and practicable, direct openings from galleys, storerooms, drying rooms or communal sanitary areas shall be avoided unless expressly provided otherwise.

14. For vessels of 24 metres in length and over, there shall be no direct openings, except for the purpose of emergency escape, into sleeping rooms from fish rooms and machinery spaces or from galleys, storerooms, drying rooms or communal sanitary areas; that part of the bulkhead separating such places from sleeping rooms and external bulkheads shall be efficiently constructed of steel or another approved material and shall be watertight and gas-tight. This provision does not exclude the possibility of sanitary areas being shared between two cabins.

#### *Insulation*

15. Accommodation spaces shall be adequately insulated; the materials used to construct internal bulkheads, panelling and sheeting, and floors and joinings shall be

navire est conforme aux prescriptions de la présente annexe. L'autorité compétente doit, dans la mesure du possible, exiger qu'un navire qui remplace son pavillon par le pavillon du Membre ou qu'un navire dont le logement de l'équipage a été substantiellement modifié se conforme aux prescriptions de la présente annexe.

9. Dans les situations visées au paragraphe 8 de la présente annexe, pour les navires d'une longueur égale ou supérieure à 24 mètres, l'autorité compétente doit demander que les plans détaillés du logement de l'équipage et des informations à son sujet soient soumis pour approbation à l'autorité compétente ou à une entité qu'elle a habilitée à cette fin.

10. Pour les navires d'une longueur égale ou supérieure à 24 mètres, l'autorité compétente doit contrôler, chaque fois que le navire remplace son pavillon par le pavillon du Membre ou que le logement de l'équipage a été refait à neuf ou substantiellement modifié, que celui-ci est conforme aux prescriptions de la présente convention. L'autorité compétente peut réaliser, lorsqu'elle le juge opportun, des inspections complémentaires du logement de l'équipage.

### *Conception et construction*

#### *Hauteur sous plafond*

11. Tous les logements doivent avoir une hauteur sous plafond adéquate. L'autorité compétente doit prescrire la hauteur sous plafond minimale des locaux où les pêcheurs doivent se tenir debout pendant de longues périodes.

12. Sur les navires d'une longueur égale ou supérieure à 24 mètres, la hauteur sous plafond minimale autorisée dans tous les logements où les pêcheurs doivent pouvoir jouir d'une entière liberté de mouvement ne doit pas être inférieure à 200 centimètres. L'autorité compétente peut autoriser une hauteur sous plafond légèrement inférieure dans tout logement ou partie de logement où elle s'est assurée qu'une telle diminution est raisonnable et ne causera pas d'inconfort aux pêcheurs.

#### *Ouvertures donnant sur les locaux d'habitation et entre eux*

13. Les ouvertures directes entre les postes de couchage et les cales à poissons et salles des machines doivent être proscrites, sauf lorsqu'il s'agit d'issues de secours. Dans la mesure où cela est raisonnable et réalisable, les ouvertures directes entre les postes de couchage et les cuisines, cambuses, séchoirs ou installations sanitaires communes doivent être évitées, à moins qu'il n'en soit expressément disposé autrement.

14. Sur les navires d'une longueur égale ou supérieure à 24 mètres, il ne doit y avoir aucune ouverture reliant directement les postes de couchage aux cales à poissons, salles des machines, cuisines, cambuses, séchoirs ou installations sanitaires communes, sauf lorsqu'il s'agit d'issues de secours; la partie de la cloison séparant ces locaux des postes de couchage et des cloisons externes doit être convenablement construite en acier ou autre matériau homologué et être étanche à l'eau et aux gaz. La présente disposition n'exclut pas la possibilité d'un partage d'installations sanitaires entre deux cabines.

#### *Isolation*

15. L'isolation du logement de l'équipage doit être adéquate; les matériaux employés pour construire les cloisons, les panneaux et les vaigrages intérieurs, ainsi que

suitable for the purpose and shall be conducive to ensuring a healthy environment. Sufficient drainage shall be provided in all accommodation spaces.

#### *Other*

16. All practicable measures shall be taken to protect fishing vessels' crew accommodation against flies and other insects, particularly when vessels are operating in mosquito-infested areas.

17. Emergency escapes from all crew accommodation spaces shall be provided as necessary.

#### *Noise and vibration*

18. The competent authority shall take measures to limit excessive noise and vibration in accommodation spaces and, as far as practicable, in accordance with relevant international standards.

19. For vessels of 24 metres in length and over, the competent authority shall adopt standards for noise and vibration in accommodation spaces which shall ensure adequate protection to fishers from the effects of such noise and vibration, including the effects of noise- and vibration-induced fatigue.

#### *Ventilation*

20. Accommodation spaces shall be ventilated, taking into account climatic conditions. The system of ventilation shall supply air in a satisfactory condition whenever fishers are on board.

21. Ventilation arrangements or other measures shall be such as to protect non-smokers from tobacco smoke.

22. Vessels of 24 metres in length and over shall be equipped with a system of ventilation for accommodation, which shall be controlled so as to maintain the air in a satisfactory condition and to ensure sufficiency of air movement in all weather conditions and climates. Ventilation systems shall be in operation at all times when fishers are on board.

#### *Heating and air conditioning*

23. Accommodation spaces shall be adequately heated, taking into account climatic conditions.

24. For vessels of 24 metres in length and over, adequate heat shall be provided, through an appropriate heating system, except in fishing vessels operating exclusively in tropical climates. The system of heating shall provide heat in all conditions, as necessary, and shall be in operation when fishers are living or working on board, and when conditions so require.

25. For vessels of 24 metres in length and over, with the exception of those regularly engaged in areas where temperate climatic conditions do not require it, air conditioning shall be provided in accommodation spaces, the bridge, the radio room and any centralized machinery control room.

les revêtements de sol et les joints doivent être adaptés à leur emploi et de nature à garantir un environnement sain. Des dispositifs d'écoulement des eaux suffisants doivent être prévus dans tous les logements.

#### *Autres*

16. Tous les moyens possibles doivent être mis en œuvre pour empêcher que les mouches et autres insectes ne pénètrent dans les locaux d'habitation de l'équipage des navires de pêche, en particulier lorsque ceux-ci opèrent dans des zones infestées de moustiques.

17. Tous les logements d'équipage doivent être dotés des issues de secours nécessaires.

#### *Bruits et vibrations*

18. L'autorité compétente doit prendre des mesures pour réduire les bruits et vibrations excessifs dans les locaux d'habitation, si possible en conformité avec les normes internationales pertinentes.

19. Sur les navires d'une longueur égale ou supérieure à 24 mètres, l'autorité compétente doit adopter des normes réglementant les niveaux de bruit et de vibrations dans les locaux d'habitation de manière à protéger adéquatement les pêcheurs des effets nocifs de ces bruits et vibrations, notamment de la fatigue qu'ils induisent.

#### *Ventilation*

20. Les locaux d'habitation doivent être ventilés en fonction des conditions climatiques. Le système de ventilation doit permettre une aération satisfaisante des locaux lorsque les pêcheurs sont à bord.

21. Le système de ventilation doit être conçu ou d'autres mesures doivent être prises de manière à protéger les non-fumeurs de la fumée de tabac.

22. Les navires d'une longueur égale ou supérieure à 24 mètres doivent être équipés d'un système de ventilation réglable des emménagements, de façon à maintenir l'air dans des conditions satisfaisantes et à en assurer une circulation suffisante par tous les temps et sous tous les climats. Les systèmes de ventilation doivent fonctionner en permanence lorsque les pêcheurs sont à bord.

#### *Chauffage et climatisation*

23. Les locaux d'habitation doivent être chauffés de manière adéquate en fonction des conditions climatiques.

24. Sur les navires d'une longueur égale ou supérieure à 24 mètres, un chauffage adéquat fourni par un système de chauffage approprié doit être prévu sauf sur les navires de pêche opérant exclusivement en zone tropicale. Le système de chauffage doit fournir de la chaleur dans toutes les conditions, suivant les besoins, et fonctionner lorsque les pêcheurs séjournent ou travaillent à bord et que les conditions l'exigent.

25. Sur les navires d'une longueur égale ou supérieure à 24 mètres, à l'exception de ceux opérant dans des zones où les conditions climatiques tempérées ne l'exigent pas, les locaux d'habitation, la passerelle, les salles de radio et toute salle de contrôle des machines centralisée doivent être équipés d'un système de climatisation.

### *Lighting*

26. All accommodation spaces shall be provided with adequate light.
27. Wherever practicable, accommodation spaces shall be lit with natural light in addition to artificial light. Where sleeping spaces have natural light, a means of blocking the light shall be provided.
28. Adequate reading light shall be provided for every berth in addition to the normal lighting of the sleeping room.
29. Emergency lighting shall be provided in sleeping rooms.
30. Where a vessel is not fitted with emergency lighting in mess rooms, passageways, and any spaces that are or may be used for emergency escape, permanent night lighting shall be provided in such spaces.
31. For vessels of 24 metres in length and over, lighting in accommodation spaces shall meet a standard established by the competent authority. In any part of the accommodation space available for free movement, the minimum standard for such lighting shall be such as to permit a person with normal vision to read an ordinary newspaper on a clear day.

### *Sleeping rooms*

#### *General*

32. Where the design, dimensions or purpose of the vessel allow, the sleeping accommodation shall be located so as to minimize the effects of motion and acceleration but shall in no case be located forward of the collision bulkhead.

#### *Floor area*

33. The number of persons per sleeping room and the floor area per person, excluding space occupied by berths and lockers, shall be such as to provide adequate space and comfort for the fishers on board, taking into account the service of the vessel.
34. For vessels of 24 metres in length and over but which are less than 45 metres in length, the floor area per person of sleeping rooms, excluding space occupied by berths and lockers, shall not be less than 1.5 square metres.
35. For vessels of 45 metres in length and over, the floor area per person of sleeping rooms, excluding space occupied by berths and lockers, shall not be less than 2 square metres.

#### *Persons per sleeping room*

36. To the extent not expressly provided otherwise, the number of persons allowed to occupy each sleeping room shall not be more than six.
37. For vessels of 24 metres in length and over, the number of persons allowed to occupy each sleeping room shall not be more than four. The competent authority may permit exceptions to this requirement in particular cases if the size, type or intended service of the vessel makes the requirement unreasonable or impracticable.

### *Eclairage*

26. Tous les locaux d'habitation doivent bénéficier d'un éclairage adéquat.

27. Dans la mesure du possible, les locaux d'habitation doivent, outre un éclairage artificiel, être éclairés par la lumière naturelle. Lorsque les postes de couchage sont éclairés par la lumière naturelle, un moyen de l'occulter doit être prévu.

28. Chaque couchette doit être dotée d'un éclairage de chevet en complément de l'éclairage normal du poste de couchage.

29. Les postes de couchage doivent être équipés d'un éclairage de secours.

30. Si à bord d'un navire les réfectoires, les coursives et les locaux qui sont ou peuvent être traversés comme issues de secours ne sont pas équipés d'un éclairage de secours, un éclairage permanent doit y être prévu pendant la nuit.

31. Sur les navires d'une longueur égale ou supérieure à 24 mètres, les locaux d'habitation doivent être éclairés conformément à une norme établie par l'autorité compétente. En tous points du local d'habitation où l'on peut circuler librement, la norme minimale de cet éclairage doit être telle qu'une personne dotée d'une acuité visuelle normale puisse lire, par temps clair, un journal imprimé ordinaire.

### *Postes de couchage*

#### *Dispositions générales*

32. Lorsque la conception, les dimensions ou l'usage même du navire le permet, les postes de couchage doivent être situés de telle manière que les mouvements et l'accélération du navire soient ressentis le moins possible mais ils ne doivent être situés en aucun cas en avant de la cloison d'abordage.

#### *Superficie au sol*

33. Le nombre de personnes par poste de couchage ainsi que la superficie au sol par personne, déduction faite de la superficie occupée par les couchettes et les armoires, doivent permettre aux pêcheurs de disposer de suffisamment d'espace et de confort à bord, compte tenu de l'utilisation du navire.

34. Sur les navires d'une longueur égale ou supérieure à 24 mètres, mais d'une longueur inférieure à 45 mètres, la superficie au sol par occupant d'un poste de couchage, déduction faite de la superficie occupée par les couchettes et les armoires, ne doit pas être inférieure à 1,5 mètre carré.

35. Sur les navires d'une longueur égale ou supérieure à 45 mètres, la superficie au sol par occupant d'un poste de couchage, déduction faite de la superficie occupée par les couchettes et les armoires, ne doit pas être inférieure à 2 mètres carrés.

#### *Nombre de personnes par poste de couchage*

36. Dans la mesure où il n'en est pas expressément disposé autrement, le nombre de personnes autorisées à occuper un poste de couchage ne doit pas être supérieur à six.

37. Sur les navires d'une longueur égale ou supérieure à 24 mètres, le nombre de personnes autorisées à occuper un poste de couchage ne doit pas être supérieur à quatre. L'autorité compétente peut accorder des dérogations à cette prescription dans certains cas si la taille et le type du navire ou son utilisation la rendent déraisonnable ou irréalisable.

38. To the extent not expressly provided otherwise, a separate sleeping room or sleeping rooms shall be provided for officers, wherever practicable.

39. For vessels of 24 metres in length and over, sleeping rooms for officers shall be for one person wherever possible and in no case shall the sleeping room contain more than two berths. The competent authority may permit exceptions to the requirements of this paragraph in particular cases if the size, type or intended service of the vessel makes the requirements unreasonable or impracticable.

#### *Other*

40. The maximum number of persons to be accommodated in any sleeping room shall be legibly and indelibly marked in a place in the room where it can be conveniently seen.

41. The members of the crew shall be provided with individual berths of appropriate dimensions. Mattresses shall be of a suitable material.

42. For vessels of 24 metres in length and over, the minimum inside dimensions of the berths shall not be less than 198 by 80 centimetres.

43. Sleeping rooms shall be so planned and equipped as to ensure reasonable comfort for the occupants and to facilitate tidiness. Equipment provided shall include berths, individual lockers sufficient for clothing and other personal effects, and a suitable writing surface.

44. For vessels of 24 metres in length and over, a desk suitable for writing, with a chair, shall be provided.

45. Sleeping accommodation shall be situated or equipped, as practicable, so as to provide appropriate levels of privacy for men and for women.

#### *Mess rooms*

46. Mess rooms shall be as close as possible to the galley, but in no case shall be located forward of the collision bulkhead.

47. Vessels shall be provided with mess-room accommodation suitable for their service. To the extent not expressly provided otherwise, mess-room accommodation shall be separate from sleeping quarters, where practicable.

48. For vessels of 24 metres in length and over, mess-room accommodation shall be separate from sleeping quarters.

49. The dimensions and equipment of each mess room shall be sufficient for the number of persons likely to use it at any one time.

50. For vessels of 24 metres in length and over, a refrigerator of sufficient capacity and facilities for making hot and cold drinks shall be available and accessible to fishers at all times.

#### *Sanitary accommodation*

51. Sanitary facilities, which include toilets, washbasins, and tubs or showers, shall be provided for all persons on board, as appropriate for the service of the vessel.

38. Dans la mesure où il n'en est pas expressément disposé autrement, une ou plusieurs cabines séparées doivent être réservées aux officiers, lorsque cela est possible.

39. Sur les navires d'une longueur égale ou supérieure à 24 mètres, les postes de couchage réservés aux officiers doivent accueillir une seule personne dans la mesure du possible et ne doivent en aucun cas contenir plus de deux couchettes. L'autorité compétente peut accorder des dérogations aux prescriptions de ce paragraphe dans certains cas si la taille et le type du navire ou son utilisation les rendent déraisonnables ou irréalisables.

#### *Autres*

40. Le nombre maximal de personnes autorisées à occuper un poste de couchage doit être inscrit de manière lisible et indélébile à un endroit où il peut se lire facilement.

41. Les membres d'équipage doivent disposer d'une couchette individuelle de dimensions suffisantes. Les matelas doivent être d'un matériau adéquat.

42. Sur les navires d'une longueur égale ou supérieure à 24 mètres, les dimensions internes minimales des couchettes ne doivent pas être inférieures à 198 centimètres sur 80 centimètres.

43. Les postes de couchage doivent être conçus et équipés de manière à garantir aux occupants un confort raisonnable et à faciliter leur maintien en ordre. Les équipements fournis doivent comprendre des couchettes, des armoires individuelles suffisamment grandes pour contenir des vêtements et autres effets personnels et une surface plane adéquate où il est possible d'écrire.

44. Sur les navires d'une longueur égale ou supérieure à 24 mètres, un bureau pour écrire et une chaise adaptés doivent être fournis.

45. Les postes de couchage doivent, dans la mesure du possible, être situés ou équipés de telle manière que tant les hommes que les femmes puissent convenablement préserver leur intimité.

#### *Réfectoires*

46. Les réfectoires doivent être aussi proches que possible de la cuisine, mais en aucun cas en avant de la cloison d'abordage.

47. Les navires doivent posséder un réfectoire adapté à leur utilisation. Le local du réfectoire doit être si possible à l'écart des postes de couchage, dans la mesure où il n'en est pas expressément disposé autrement.

48. Sur les navires d'une longueur égale ou supérieure à 24 mètres, le réfectoire doit être séparé des postes de couchage.

49. Les dimensions et l'aménagement de chaque réfectoire doivent être suffisants pour qu'il puisse accueillir le nombre de personnes susceptibles de l'utiliser en même temps.

50. Sur les navires d'une longueur égale ou supérieure à 24 mètres, les pêcheurs doivent à tout moment avoir accès à un réfrigérateur d'un volume suffisant et avoir la possibilité de se préparer des boissons chaudes ou froides.

#### *Installations sanitaires*

51. Des installations sanitaires appropriées à l'utilisation du navire, qui comprennent des toilettes, lavabos, baignoires ou douches, doivent être prévues pour toutes les

These facilities shall meet at least minimum standards of health and hygiene and reasonable standards of quality.

52. The sanitary accommodation shall be such as to eliminate contamination of other spaces as far as practicable. The sanitary facilities used by women fishers shall allow for reasonable privacy.

53. Cold fresh water and hot fresh water shall be available to all fishers and other persons on board, in sufficient quantities to allow for proper hygiene. The competent authority may establish, after consultation, the minimum amount of water to be provided.

54. Where sanitary facilities are provided, they shall be fitted with ventilation to the open air, independent of any other part of the accommodation.

55. All surfaces in sanitary accommodation shall be such as to facilitate easy and effective cleaning. Floors shall have a non-slip deck covering.

56. On vessels of 24 metres in length and over, for all fishers who do not occupy rooms to which sanitary facilities are attached, there shall be provided at least one tub or shower or both, one toilet, and one washbasin for every four persons or fewer.

#### *Laundry facilities*

57. Amenities for washing and drying clothes shall be provided as necessary, taking into account the service of the vessel, to the extent not expressly provided otherwise.

58. For vessels of 24 metres in length and over, adequate facilities for washing, drying and ironing clothes shall be provided.

59. For vessels of 45 metres in length and over, adequate facilities for washing, drying and ironing clothes shall be provided in a compartment separate from sleeping rooms, mess rooms and toilets, and shall be adequately ventilated, heated and equipped with lines or other means for drying clothes.

#### *Facilities for sick and injured fishers*

60. Whenever necessary, a cabin shall be made available for a fisher who suffers illness or injury.

61. For vessels of 45 metres in length and over, there shall be a separate sick bay. The space shall be properly equipped and shall be maintained in a hygienic state.

#### *Other facilities*

62. A place for hanging foul-weather gear and other personal protective equipment shall be provided outside of, but convenient to, sleeping rooms.

#### *Bedding, mess utensils and miscellaneous provisions*

63. Appropriate eating utensils, and bedding and other linen shall be provided to all fishers on board. However, the cost of the linen can be recovered as an operational cost if the collective agreement or the fisher's work agreement so provides.

personnes à bord. Ces installations doivent correspondre aux normes minimales en matière de santé et d'hygiène et offrir un niveau de qualité raisonnable.

52. Les installations sanitaires doivent être conçues de manière à éliminer dans la mesure où cela est réalisable la contamination d'autres locaux. Les installations sanitaires utilisées par les pêcheuses doivent leur préserver un degré d'intimité raisonnable.

53. Tous les pêcheurs et toute autre personne à bord doivent avoir accès à de l'eau douce froide et chaude en quantité suffisante pour assurer une hygiène convenable. L'autorité compétente peut déterminer, après consultation, le volume d'eau minimal nécessaire.

54. Lorsque des installations sanitaires sont prévues, elles doivent être ventilées vers l'extérieur et situées à l'écart de tout local d'habitation.

55. Toutes les surfaces des installations sanitaires doivent être faciles à nettoyer correctement. Les sols doivent être recouverts d'un revêtement antidérapant.

56. Sur les navires d'une longueur égale ou supérieure à 24 mètres, tous les pêcheurs n'occupant pas un poste doté d'installations sanitaires doivent avoir accès au moins à une baignoire ou une douche, ou les deux, une toilette et un lavabo pour quatre personnes ou moins.

#### *Buanderies*

57. Dans la mesure où il n'en est pas expressément disposé autrement, des installations appropriées pour le lavage et le séchage des vêtements doivent être prévues selon les besoins, en tenant compte des conditions d'utilisation du navire.

58. Sur les navires d'une longueur égale ou supérieure à 24 mètres, des installations adéquates pour le lavage, le séchage et le repassage des vêtements doivent être prévues.

59. Sur les navires d'une longueur égale ou supérieure à 45 mètres, ces installations doivent être adéquates et situées dans des locaux séparés des postes de couchage, des réfectoires et des toilettes qui soient suffisamment ventilés, chauffés et pourvus de cordes à linge ou autres moyens de séchage.

#### *Installations pour les pêcheurs malades ou blessés*

60. Chaque fois que nécessaire, une cabine doit être mise à la disposition d'un pêcheur blessé ou malade.

61. Sur les navires d'une longueur égale ou supérieure à 45 mètres, une infirmerie séparée doit être prévue. Ce local doit être correctement équipé et maintenu dans un état hygiénique.

#### *Autres installations*

62. Un endroit approprié à l'extérieur des postes de couchage et aisément accessible à partir de ces derniers doit être prévu pour pendre les vêtements de gros temps et autre équipement de protection personnel.

#### *Literie, vaisselle et couverts et fournitures diverses*

63. Tous les pêcheurs à bord doivent avoir à leur disposition de la vaisselle, du linge de lit et autres linges appropriés. Toutefois, les frais de linge peuvent être recouverts sous forme de coûts d'exploitation pour autant qu'une convention collective ou que l'accord d'engagement du pêcheur le prévoie.

*Recreational facilities*

64. For vessels of 24 metres in length and over, appropriate recreational facilities, amenities and services shall be provided for all fishers on board. Where appropriate, mess rooms may be used for recreational activities.

*Communication facilities*

65. All fishers on board shall be given reasonable access to communication facilities, to the extent practicable, at a reasonable cost and not exceeding the full cost to the fishing vessel owner.

*Galley and food storage facilities*

66. Cooking equipment shall be provided on board. To the extent not expressly provided otherwise, this equipment shall be fitted, where practicable, in a separate galley.

67. The galley, or cooking area where a separate galley is not provided, shall be of adequate size for the purpose, well lit and ventilated, and properly equipped and maintained.

68. For vessels of 24 metres in length and over, there shall be a separate galley.

69. The containers of butane or propane gas used for cooking purposes in a galley shall be kept on the open deck and in a shelter which is designed to protect them from external heat sources and external impact.

70. A suitable place for provisions of adequate capacity shall be provided which can be kept dry, cool and well ventilated in order to avoid deterioration of the stores and, to the extent not expressly provided otherwise, refrigerators or other low-temperature storage shall be used, where possible.

71. For vessels of 24 metres in length and over, a provisions storeroom and refrigerator and other low-temperature storage shall be used.

*Food and potable water*

72. Food and potable water shall be sufficient, having regard to the number of fishers, and the duration and nature of the voyage. In addition, they shall be suitable in respect of nutritional value, quality, quantity and variety, having regard as well to the fishers' religious requirements and cultural practices in relation to food.

73. The competent authority may establish requirements for the minimum standards and quantity of food and water to be carried on board.

*Clean and habitable conditions*

74. Accommodation shall be maintained in a clean and habitable condition and shall be kept free of goods and stores which are not the personal property of the occupants.

### *Installations de loisirs*

64. A bord des navires d'une longueur égale ou supérieure à 24 mètres, tous les pêcheurs doivent avoir accès à des installations, des équipements et des services de loisirs. Le cas échéant, les réfectoires peuvent être utilisés comme installations de loisirs.

### *Installations de communications*

65. Dans la mesure du possible, tous les pêcheurs à bord du navire doivent avoir raisonnablement accès à des équipements pour effectuer leurs communications à un coût raisonnable n'excédant pas le coût total facturé à l'armateur à la pêche.

### *Cuisine et cambuse*

66. Des équipements doivent être prévus pour la préparation des aliments. Dans la mesure où il n'en est pas expressément disposé autrement, ces équipements sont installés, si possible, dans une cuisine séparée.

67. La cuisine, ou coin cuisine lorsqu'il n'existe pas de cuisine séparée, doit être d'une dimension adéquate, être bien éclairée et ventilée et être correctement équipée et entretenue.

68. Les navires d'une longueur égale ou supérieure à 24 mètres doivent être équipés d'une cuisine séparée.

69. Les bouteilles de gaz butane ou propane utilisés à des fins de cuisine doivent être placées sur le pont découvert, dans un lieu abrité conçu pour les protéger contre les sources extérieures de chaleur et les chocs.

70. Un emplacement adéquat pour les provisions, d'un volume suffisant, doit être prévu et pouvoir être maintenu sec, frais et bien aéré pour éviter que les provisions ne se gâtent. Dans la mesure où il n'en est pas expressément disposé autrement, des réfrigérateurs ou autres moyens de stockage à basse température sont si possible utilisés.

71. Pour les navires d'une longueur égale ou supérieure à 24 mètres, une cambuse et un réfrigérateur ou autre local d'entreposage à basse température doivent être utilisés.

### *Nourriture et eau potable*

72. L'avitaillement doit être suffisant compte tenu du nombre de pêcheurs à bord ainsi que de la durée et de la nature du voyage. Il doit être en outre d'une valeur nutritionnelle, d'une qualité, d'une quantité et d'une variété satisfaisantes eu égard également aux exigences de la religion des pêcheurs et à leurs habitudes culturelles en matière alimentaire.

73. L'autorité compétente peut établir des prescriptions concernant les normes minimales et la quantité de nourriture et d'eau devant être disponible à bord.

### *Conditions de salubrité et de propreté*

74. Le logement des pêcheurs doit être maintenu dans un état de propreté et de salubrité et ne doit contenir ni bien ni marchandise qui ne soit pas la propriété personnelle des occupants.

75. Galley and food storage facilities shall be maintained in a hygienic condition.

76. Waste shall be kept in closed, well-sealed containers and removed from food-handling areas whenever necessary.

*Inspections by the skipper or under the authority of the skipper*

77. For vessels of 24 metres in length and over, the competent authority shall require frequent inspections to be carried out, by or under the authority of the skipper, to ensure that:

- (a) accommodation is clean, decently habitable and safe, and is maintained in a good state of repair;
- (b) food and water supplies are sufficient; and
- (c) galley and food storage spaces and equipment are hygienic and in a proper state of repair.

The results of such inspections, and the actions taken to address any deficiencies found, shall be recorded and available for review.

*Variations*

78. The competent authority, after consultation, may permit derogations from the provisions in this Annex to take into account, without discrimination, the interests of fishers having differing and distinctive religious and social practices, on condition that such derogations do not result in overall conditions less favourable than those which would result from the application of this Annex.

75. La cuisine et les installations d'entreposage des aliments doivent être maintenues dans des conditions hygiéniques.

76. Les déchets doivent être gardés dans des conteneurs fermés et hermétiques qui sont retirés, quand il y a lieu, des espaces de manutention des vivres.

*Inspections effectuées par le patron ou sous son autorité*

77. Sur les navires d'une longueur égale ou supérieure à 24 mètres, l'autorité compétente doit exiger que des inspections fréquentes soient conduites par le patron ou sous son autorité pour assurer que:

- a) les logements sont propres, décentement habitables, sûrs et maintenus en bon état;
- b) les provisions d'eau et de nourriture sont suffisantes;
- c) la cuisine, la cambuse et les équipements servant à l'entreposage de la nourriture sont hygiéniques et bien entretenus.

Les résultats de ces inspections ainsi que les mesures prises pour remédier à toute défaillance sont consignés et sont disponibles pour consultation.

*Dérogations*

78. L'autorité compétente peut, après consultation, permettre des dérogations aux dispositions de la présente annexe pour tenir compte, sans discrimination, des intérêts des pêcheurs ayant des pratiques religieuses et sociales différentes et particulières, sous réserve qu'il n'en résulte pas des conditions qui, dans l'ensemble, seraient moins favorables que celles qui auraient découlé de l'application de l'annexe.

## Proposed Recommendation

The following is the English version of (B), the proposed Recommendation concerning work in the fishing sector, which is submitted as a basis for the discussion of the fourth item on the agenda of the 96th Session of the Conference.

In accordance with the decisions<sup>22</sup> of the Conference at its 93rd Session (2005) and of the Governing Body at its 295th Session (March 2006),<sup>23</sup> and taking into account subsequent consultations, the text below is that of the Work in Fishing Recommendation which was adopted by the 93rd Session of the Conference. The Office has revised only the draft Preamble to reflect the fact that the proposed instrument, which would replace the Recommendation adopted in 2005, is now being submitted for consideration under the fourth item on the agenda of the 96th Session of the Conference in 2007.

The Office commentary in Report IV(2A) includes indications of instances in which the Committee Drafting Committee may wish to examine any remaining manifest errors or ambiguities or to ensure improved alignment of the English and French texts.

### **B. Proposed Recommendation concerning work in the fishing sector**

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its ninety-sixth Session on 30 May 2007, and

Taking into account the need to replace the Work in Fishing Recommendation, 2005, which revised the Hours of Work (Fishing) Recommendation, 1920, and

Having decided upon the adoption of certain proposals with regard to work in the fishing sector, which is the fourth item on the agenda of the session, and

Having determined that these proposals shall take the form of a Recommendation supplementing the Work in Fishing Convention, 2007 (hereinafter referred to as “the Convention”) and superseding the Work in Fishing Recommendation, 2005;

adopts this ... day of June of the year two thousand and seven the following Recommendation, which may be cited as the Work in Fishing Recommendation, 2007.

---

<sup>22</sup> ILO: *Provisional Record*, Nos. 19A and 25, International Labour Conference, 93rd Session, Geneva, 2005, pp. 25/3–25/5.

<sup>23</sup> GB.295/16/3 and GB.295/PV, para. 246.

## Projet de recommandation

On trouvera ci-après la version française du projet de recommandation concernant le travail dans le secteur de la pêche qui est soumis à la Conférence pour servir de base, lors de la 96<sup>e</sup> session, à la discussion de la quatrième question à l'ordre du jour.

Conformément aux décisions<sup>22</sup> de la Conférence à sa 93<sup>e</sup> session (2005) et du Conseil d'administration à sa 295<sup>e</sup> session (mars 2006)<sup>23</sup>, et compte tenu des consultations tenues ultérieurement, le texte ci-après est celui de la recommandation sur le travail dans la pêche qui a été adoptée par la Conférence sa 93<sup>e</sup> session. Le Bureau n'a révisé que le préambule pour tenir compte du fait que l'instrument proposé, qui remplacerait la recommandation adoptée en 2005, est maintenant soumis pour examen au titre de la quatrième question à l'ordre du jour de la 96<sup>e</sup> session de la Conférence en 2007.

Les commentaires du Bureau figurant dans le rapport IV(2A) indiquent les cas où le comité de rédaction de la commission voudra sans doute examiner les erreurs manifestes ou les ambiguïtés qui peuvent subsister dans le texte ou assurer une meilleure concordance des versions française et anglaise.

### B. Projet de recommandation concernant le travail dans le secteur de la pêche

La Conférence générale de l'Organisation internationale du Travail,

Convoquée à Genève par le Conseil d'administration du Bureau international du Travail, et s'y étant réunie le 30 mai 2007, en sa quatre-vingt-seizième session;

Tenant compte de la nécessité de remplacer la recommandation sur le travail dans la pêche, 2005, portant révision de la recommandation sur la durée du travail (pêche), 1920;

Après avoir décidé d'adopter diverses propositions relatives au travail dans le secteur de la pêche, question qui constitue le quatrième point à l'ordre du jour de la session;

Après avoir décidé que ces propositions prendraient la forme d'une recommandation complétant la convention sur le travail dans la pêche, 2007 (ci-après dénommée «la convention») et remplaçant la recommandation sur le travail dans la pêche, 2005,

adopte, ce ... jour de juin deux mille sept, la recommandation ci-après, qui sera dénommée Recommandation sur le travail dans la pêche, 2007.

<sup>22</sup> BIT: *Compte rendu provisoire* n° 19A et n° 25, pp. 25/3-25/6, Conférence internationale du Travail, 93<sup>e</sup> session, Genève, 2005.

<sup>23</sup> Documents GB.295/16/3 et GB.295/PV, paragr. 246.

## PART I. CONDITIONS FOR WORK ON BOARD FISHING VESSELS

### *Protection of young persons*

1. Members should establish the requirements for the pre-sea training of persons between the ages of 16 and 18 working on board fishing vessels, taking into account international instruments concerning training for work on board fishing vessels, including occupational safety and health issues such as night work, hazardous tasks, work with dangerous machinery, manual handling and transport of heavy loads, work in high latitudes, work for excessive periods of time and other relevant issues identified after an assessment of the risks concerned.

2. The training of persons between the ages of 16 and 18 might be provided through participation in an apprenticeship or approved training programme, which should operate under established rules and be monitored by the competent authority, and should not interfere with the person's general education.

3. Members should take measures to ensure that the safety, lifesaving and survival equipment carried on board fishing vessels carrying persons under the age of 18 is appropriate for the size of such persons.

4. The working hours of fishers under the age of 18 should not exceed eight hours per day and 40 hours per week, and they should not work overtime except where unavoidable for safety reasons.

5. Fishers under the age of 18 should be assured sufficient time for all meals and a break of at least one hour for the main meal of the day.

### *Medical examination*

6. When prescribing the nature of the examination, Members should pay due regard to the age of the person to be examined and the nature of the duties to be performed.

7. The medical certificate should be signed by a medical practitioner approved by the competent authority.

8. Arrangements should be made to enable a person who, after examination, is determined to be unfit for work on board fishing vessels or certain types of fishing vessels, or for certain types of work on board, to apply for a further examination by a medical referee or referees who should be independent of any fishing vessel owner or of any organization of fishing vessel owners or fishers.

9. The competent authority should take into account international guidance on medical examination and certification of persons working at sea, such as the (ILO/WHO) *Guidelines for Conducting Pre-sea and Periodic Medical Fitness Examinations for Seafarers*.

10. For fishers exempted from the application of the provisions concerning medical examination in the Convention, the competent authority should take adequate measures to provide health surveillance for the purpose of occupational safety and health.

## PARTIE I. CONDITIONS DE TRAVAIL À BORD DES NAVIRES DE PÊCHE

### *Protection des adolescents*

1. Les Membres devraient fixer les conditions requises en matière de formation préalable à l'embarquement des personnes âgées de 16 à 18 ans appelées à travailler à bord des navires de pêche, en prenant en considération les instruments internationaux relatifs à la formation au travail à bord de ces navires, notamment pour ce qui a trait aux questions de sécurité et de santé au travail telles que le travail de nuit, les tâches dangereuses, l'utilisation de machines dangereuses, la manutention et le transport de lourdes charges, le travail effectué sous des latitudes élevées, la durée excessive du travail et autres questions pertinentes recensées après évaluation des risques encourus.

2. La formation des personnes âgées de 16 à 18 ans pourrait être assurée par le biais de l'apprentissage ou de la participation à des programmes de formation approuvés, qui devraient être menés selon des règles établies sous la supervision des autorités compétentes et ne devraient pas nuire à la possibilité pour les personnes concernées de suivre les programmes de l'enseignement général.

3. Les Membres devraient prendre des mesures visant à garantir qu'à bord des navires de pêche qui embarquent des jeunes âgés de moins de 18 ans les équipements de sécurité, de sauvetage et de survie soient adaptés à leur taille.

4. Les pêcheurs âgés de moins de 18 ans ne devraient pas travailler plus de huit heures par jour ni plus de quarante heures par semaine, et ne devraient pas effectuer d'heures supplémentaires à moins que cela ne soit inévitable pour des raisons de sécurité.

5. Les pêcheurs âgés de moins de 18 ans devraient être assurés qu'une pause suffisante leur soit accordée pour chacun des repas et bénéficier d'une pause d'au moins une heure pour prendre leur repas principal.

### *Examen médical*

6. Aux fins de la détermination de la nature de l'examen, les Membres devraient tenir compte de l'âge de l'intéressé ainsi que de la nature du travail à effectuer.

7. Le certificat médical devrait être signé par du personnel médical agréé par l'autorité compétente.

8. Des dispositions devraient être prises pour permettre à toute personne qui, après avoir été examinée, est considérée comme inapte à travailler à bord d'un navire de pêche ou de certains types de navires de pêche, ou à effectuer certains types de tâches à bord, de demander à être examinée par un ou plusieurs arbitres médicaux indépendants de tout armateur à la pêche ou de toute organisation d'armateurs à la pêche ou de pêcheurs.

9. L'autorité compétente devrait tenir compte des directives internationales relatives à l'examen médical et au brevet d'aptitude physique des personnes travaillant en mer, telles que les *Directives relatives à la conduite des examens médicaux d'aptitude précédant l'embarquement et des examens médicaux périodiques des gens de mer* (OIT/OMS).

10. L'autorité compétente devrait prendre des mesures adéquates pour que les pêcheurs auxquels ne s'appliquent pas les dispositions relatives à l'examen médical prescrites dans la convention soient médicalement suivis aux fins de la santé et sécurité au travail.

### *Competency and training*

11. Members should:
- (a) take into account generally accepted international standards concerning training and competencies of fishers in determining the competencies required for skippers, mates, engineers and other persons working on board fishing vessels;
  - (b) address the following issues, with regard to the vocational training of fishers: national planning and administration, including coordination; financing and training standards; training programmes, including pre-vocational training and also short courses for working fishers; methods of training; and international cooperation; and
  - (c) ensure that there is no discrimination with regard to access to training.

## PART II. CONDITIONS OF SERVICE

### *Record of service*

12. At the end of each contract, a record of service in regard to that contract should be made available to the fisher concerned, or entered in the fisher's service book.

### *Special measures*

13. For fishers excluded from the scope of the Convention, the competent authority should take measures to provide them with adequate protection with respect to their conditions of work and means of dispute settlement.

### *Payment of fishers*

14. Fishers should have the right to advances against earnings under prescribed conditions.

15. For vessels of 24 metres in length and over, all fishers should be entitled to minimum payment in accordance with national laws, regulations or collective agreements.

## PART III. ACCOMMODATION

16. When establishing requirements or guidance, the competent authority should take into account relevant international guidance on accommodation, food, and health and hygiene relating to persons working or living on board vessels, including the most recent editions of the (FAO/ILO/IMO) *Code of Safety for Fishermen and Fishing Vessels* and the (FAO/ILO/IMO) *Voluntary Guidelines for the Design, Construction and Equipment of Small Fishing Vessels*.

17. The competent authority should work with relevant organizations and agencies to develop and disseminate educational material and on-board information and guidance concerning safe and healthy accommodation and food on board fishing vessels.

### *Compétence et formation*

11. Les Membres devraient:
- a) prendre en compte les normes internationales généralement admises en matière de formation et de qualifications des pêcheurs en définissant les compétences requises pour exercer les fonctions de patron, d'officier de pont, de mécanicien et autres fonctions à bord d'un navire de pêche;
  - b) examiner les questions suivantes relatives à la formation professionnelle des pêcheurs: organisation et administration nationales, y compris la coordination; financement et normes de formation; programmes de formation, y compris la formation préprofessionnelle ainsi que les cours de courte durée destinés aux pêcheurs en activité; méthodes de formation; et coopération internationale;
  - c) s'assurer qu'il n'existe pas de discrimination en matière d'accès à la formation.

## PARTIE II. CONDITIONS DE SERVICE

### *Relevé des états de service*

12. A la fin de chaque contrat, un relevé des états de service concernant ce contrat devrait être mis à la disposition de chaque pêcheur concerné ou noté dans son livret de travail.

### *Mesures spéciales*

13. Pour les pêcheurs exclus du champ d'application de la convention, l'autorité compétente devrait prendre des mesures prévoyant une protection adéquate en ce qui concerne leurs conditions de travail et des mécanismes de règlement des différends.

### *Paiement des pêcheurs*

14. Les pêcheurs devraient avoir le droit au versement d'avances à valoir sur leurs gains dans des conditions déterminées.

15. Pour les navires d'une longueur égale ou supérieure à 24 mètres, tous les pêcheurs devraient avoir droit à un paiement minimal, conformément à la législation nationale ou aux conventions collectives.

## PARTIE III. LOGEMENT

16. Lors de l'élaboration de prescriptions ou directives, l'autorité compétente devrait tenir compte des directives internationales applicables en matière de logement, d'alimentation, et de santé et d'hygiène concernant les personnes qui travaillent ou qui vivent à bord de navires, y compris l'édition la plus récente du *Recueil de règles de sécurité pour les pêcheurs et les navires de pêche* (FAO/OIT/OMI) ainsi que des *Directives facultatives pour la conception, la construction et l'équipement des navires de pêche de faibles dimensions* (FAO/OIT/OMI).

17. L'autorité compétente devrait travailler avec les organisations et agences pertinentes pour élaborer et diffuser des documents pédagogiques et des informations disponibles à bord du navire ainsi que des instructions sur ce qui constitue une alimentation et un logement sûrs et sains à bord des navires de pêche.

18. Inspections of crew accommodation required by the competent authority should be carried out together with initial or periodic surveys or inspections for other purposes.

#### *Design and construction*

19. Adequate insulation should be provided for exposed decks over crew accommodation spaces, external bulkheads of sleeping rooms and mess rooms, machinery casings and boundary bulkheads of galleys and other spaces in which heat is produced, and, as necessary, to prevent condensation or overheating in sleeping rooms, mess rooms, recreation rooms and passageways.

20. Protection should be provided from the heat effects of any steam or hot water service pipes. Main steam and exhaust pipes should not pass through crew accommodation or through passageways leading to crew accommodation. Where this cannot be avoided, pipes should be adequately insulated and encased.

21. Materials and furnishings used in accommodation spaces should be impervious to dampness, easy to keep clean and not likely to harbour vermin.

#### *Noise and vibration*

22. Noise levels for working and living spaces, which are established by the competent authority, should be in conformity with the guidelines of the International Labour Organization on exposure levels to ambient factors in the workplace and, where applicable, the specific protection recommended by the International Maritime Organization, together with any subsequent amending and supplementary instruments for acceptable noise levels on board ships.

23. The competent authority, in conjunction with the competent international bodies and with representatives of organizations of fishing vessel owners and fishers and taking into account, as appropriate, relevant international standards, should review on an ongoing basis the problem of vibration on board fishing vessels with the objective of improving the protection of fishers, as far as practicable, from the adverse effects of vibration.

(1) Such review should cover the effect of exposure to excessive vibration on the health and comfort of fishers and the measures to be prescribed or recommended to reduce vibration on fishing vessels to protect fishers.

(2) Measures to reduce vibration, or its effects, to be considered should include:

- (a) instruction of fishers in the dangers to their health of prolonged exposure to vibration;
- (b) provision of approved personal protective equipment to fishers where necessary; and
- (c) assessment of risks and reduction of exposure in sleeping rooms, mess rooms, recreational accommodation and catering facilities and other fishers' accommodation by adopting measures in accordance with the guidance provided by the (ILO) *Code of practice on ambient factors in the workplace* and any subsequent revisions, taking into account the difference between exposure in the workplace and in the living space.

18. Les inspections du logement de l'équipage prescrites par l'autorité compétente devraient être entreprises conjointement aux enquêtes ou inspections initiales ou périodiques menées à d'autres fins.

### *Conception et construction*

19. Une isolation adéquate devrait être fournie pour les ponts extérieurs recouvrant le logement de l'équipage, les parois extérieures des postes de couchage et réfectoires, les encaissements de machines et les cloisons qui limitent les cuisines et les autres locaux dégageant de la chaleur et pour éviter, au besoin, toute condensation ou chaleur excessive, pour les postes de couchage, les réfectoires, les installations de loisirs et les coursives.

20. Une protection devrait être prévue pour calorifuger les canalisations de vapeur et d'eau chaude. Les tuyauteries principales de vapeur et d'échappement ne devraient pas passer par les logements de l'équipage ni par les coursives y conduisant. Lorsque cela ne peut être évité, les tuyauteries devraient être convenablement isolées et placées dans une gaine.

21. Les matériaux et fournitures utilisés dans le logement de l'équipage devraient être imperméables, faciles à nettoyer et ne pas être susceptibles d'abriter de la vermine.

### *Bruits et vibrations*

22. Les niveaux de bruit établis par l'autorité compétente pour les postes de travail et les locaux d'habitation devraient être conformes aux directives de l'Organisation internationale du Travail relatives aux niveaux d'exposition aux facteurs ambiants sur le lieu de travail ainsi que, le cas échéant, aux normes de protection particulières recommandées par l'Organisation maritime internationale, et à tout instrument relatif aux niveaux de bruit acceptables à bord des navires adopté ultérieurement.

23. L'autorité compétente, conjointement avec les organismes internationaux compétents et les représentants des organisations d'armateurs à la pêche et de pêcheurs et compte tenu, selon le cas, des normes internationales pertinentes, devrait examiner de manière continue le problème des vibrations à bord des navires de pêche en vue d'améliorer, autant que possible, la protection des pêcheurs contre les effets néfastes de telles vibrations.

(1) Cet examen devrait porter sur les effets de l'exposition aux vibrations excessives sur la santé et le confort des pêcheurs et les mesures à prescrire ou à recommander pour réduire les vibrations sur les navires de pêche afin de protéger les pêcheurs.

(2) Les mesures à étudier pour réduire les vibrations ou leurs effets devraient comprendre:

- a) la formation des pêcheurs aux risques que l'exposition prolongée aux vibrations présente pour leur santé;
- b) la fourniture aux pêcheurs d'un équipement de protection individuelle agréé lorsque cela est nécessaire;
- c) l'évaluation des risques et la réduction de l'exposition aux vibrations dans les postes de couchage, les salles à manger, les installations de loisirs et de restauration et autres locaux d'habitation pour les pêcheurs par des mesures conformes aux orientations données dans le *Recueil de directives pratiques sur les facteurs ambiants sur le lieu de travail* (OIT) et ses versions révisées ultérieures, en tenant compte des écarts entre l'exposition sur les lieux de travail et dans les locaux d'habitation.

### *Heating*

24. The heating system should be capable of maintaining the temperature in crew accommodation at a satisfactory level, as established by the competent authority, under normal conditions of weather and climate likely to be met with on service, and should be designed so as not to endanger the health or safety of the fishers or the safety of the vessel.

### *Lighting*

25. Methods of lighting should not endanger the health and safety of the fishers or the safety of the vessel.

### *Sleeping rooms*

26. Each berth should be fitted with a comfortable mattress with a cushioned bottom or a combined mattress, including a spring bottom, or a spring mattress. The cushioning material used should be made of approved material. Berths should not be placed side by side in such a way that access to one berth can be obtained only over another. The lower berth in a double tier should not be less than 0.3 metres above the floor, and the upper berth should be fitted with a dust-proof bottom and placed approximately midway between the bottom of the lower berth and the lower side of the deck head beams. Berths should not be arranged in tiers of more than two. In the case of berths placed along the vessel's side, there should be only a single tier when a side-light is situated above a berth.

27. Sleeping rooms should be fitted with curtains for the sidelights, as well as a mirror, small cabinets for toilet requisites, a book rack and a sufficient number of coat hooks.

28. As far as practicable, berthing of crew members should be so arranged that watches are separated and that no day worker shares a room with a watch-keeper.

29. On vessels of 24 metres in length and over, separate sleeping rooms for men and women should be provided.

### *Sanitary accommodation*

30. Sanitary accommodation spaces should have:
- (a) floors of approved durable material which can be easily cleaned, and which are impervious to dampness and properly drained;
  - (b) bulkheads of steel or other approved material which should be watertight up to at least 0.23 metres above the level of the deck;
  - (c) sufficient lighting, heating and ventilation; and
  - (d) soil pipes and waste pipes of adequate dimensions which are constructed so as to minimize the risk of obstruction and to facilitate cleaning; such pipes should not pass through fresh water or drinking-water tanks, nor should they, if practicable, pass overhead in mess rooms or sleeping accommodation.

### *Chauffage*

24. Le système de chauffage devrait permettre de maintenir la température dans le logement de l'équipage à un niveau satisfaisant, établi par l'autorité compétente, dans les conditions normales de temps et de climat que le navire est susceptible de rencontrer en cours de navigation. Le système devrait être conçu de manière à ne pas constituer un risque pour la santé ou la sécurité de l'équipage, ni pour la sécurité du navire.

### *Eclairage*

25. Les systèmes d'éclairage ne doivent pas mettre en péril la santé ou la sécurité des pêcheurs ni la sécurité du navire.

### *Postes de couchage*

26. Toute couchette devrait être pourvue d'un matelas confortable muni d'un fond rembourré ou d'un matelas combiné, posé sur support élastique, ou d'un matelas à ressorts. Le rembourrage utilisé doit être d'un matériau approuvé. Les couchettes ne devraient pas être placées côte à côte d'une façon telle que l'on ne puisse accéder à l'une d'elles qu'en passant au-dessus d'une autre. Lorsque des couchettes sont superposées, la couchette inférieure ne devrait pas être placée à moins de 0,3 mètre au-dessus du plancher et la couchette supérieure devrait être équipée d'un fond imperméable à la poussière et disposée approximativement à mi-hauteur entre le fond de la couchette inférieure et le dessous des barrots du plafond. La superposition de plus de deux couchettes devrait être interdite. Dans le cas où des couchettes sont placées le long de la muraille du navire, il devrait être interdit de superposer des couchettes à l'endroit où un hublot est situé au-dessus d'une couchette.

27. Les postes de couchage devraient être équipés de rideaux aux hublots, d'un miroir, de petits placards pour les articles de toilette, d'une étagère à livres et d'un nombre suffisant de patères.

28. Dans la mesure du possible, les couchettes des membres de l'équipage devraient être réparties de façon à séparer les quarts et à éviter qu'un pêcheur de jour ne partage le même poste qu'un pêcheur prenant le quart.

29. Les navires d'une longueur égale ou supérieure à 24 mètres devraient être pourvus de postes de couchage séparés pour les hommes et pour les femmes.

### *Installations sanitaires*

30. Les espaces destinés aux installations sanitaires devraient avoir:

- a) des sols revêtus d'un matériau durable approuvé, facile à nettoyer et imperméable, et être pourvus d'un système efficace d'écoulement des eaux;
- b) des cloisons en acier ou en tout autre matériau approuvé qui soient étanches sur une hauteur d'au moins 0,23 mètre à partir du pont;
- c) une ventilation, un éclairage et un chauffage suffisants;
- d) des conduites d'évacuation des eaux des toilettes et des eaux usées de dimensions adéquates et installées de manière à réduire au minimum les risques d'obstruction et à en faciliter le nettoyage, et qui ne devraient pas traverser les réservoirs d'eau douce ou d'eau potable ni, si possible, passer sous les plafonds des réfectoires ou des postes de couchage.

31. Toilets should be of an approved type and provided with an ample flush of water, available at all times and independently controllable. Where practicable, they should be situated convenient to, but separate from, sleeping rooms and washrooms. Where there is more than one toilet in a compartment, the toilets should be sufficiently screened to ensure privacy.

32. Separate sanitary facilities should be provided for women fishers.

#### *Recreational facilities*

33. Where recreational facilities are required, furnishings should include, as a minimum, a bookcase and facilities for reading, writing and, where practicable, games. Recreational facilities and services should be reviewed frequently to ensure that they are appropriate in the light of changes in the needs of fishers resulting from technical, operational and other developments. Consideration should also be given to including the following facilities at no cost to the fishers, where practicable:

- (a) a smoking room;
- (b) television viewing and the reception of radio broadcasts;
- (c) projection of films or video films, the stock of which should be adequate for the duration of the voyage and, where necessary, changed at reasonable intervals;
- (d) sports equipment including exercise equipment, table games, and deck games;
- (e) a library containing vocational and other books, the stock of which should be adequate for the duration of the voyage and changed at reasonable intervals;
- (f) facilities for recreational handicrafts; and
- (g) electronic equipment such as radio, television, video recorder, DVD/CD player, personal computer and software, and cassette recorder/player.

#### *Food*

34. Fishers employed as cooks should be trained and qualified for their position on board.

### PART IV. MEDICAL CARE, HEALTH PROTECTION AND SOCIAL SECURITY

#### *Medical care on board*

35. The competent authority should establish a list of medical supplies and equipment appropriate to the risks concerned that should be carried on fishing vessels; such list should include women's sanitary protection supplies together with discreet, environmentally friendly disposal units.

36. Fishing vessels carrying 100 or more fishers should have a qualified medical doctor on board.

31. Les toilettes devraient être d'un modèle approuvé et pourvues d'une chasse d'eau puissante, en état de fonctionner à tout moment et qui puisse être actionnée individuellement. Là où cela est possible, les toilettes devraient être situées en un endroit aisément accessible à partir des postes de couchage et des locaux affectés aux soins de propreté, mais devraient en être séparées. Si plusieurs toilettes sont installées dans un même local, elles devraient être suffisamment encloses pour préserver l'intimité.

32. Des installations sanitaires séparées devraient être prévues pour les pêcheuses.

#### *Installations de loisirs*

33. Là où des installations de loisirs sont prescrites, les équipements devraient au minimum inclure un meuble bibliothèque et des moyens nécessaires pour lire, écrire et, si possible, jouer. Les installations et services de loisirs devraient faire l'objet de réexamens fréquents afin qu'ils soient adaptés aux besoins des pêcheurs, compte tenu de l'évolution des techniques, des conditions d'exploitation ainsi que de tout autre développement. Lorsque cela est réalisable, il faudrait aussi envisager de fournir gratuitement aux pêcheurs:

- a) un fumoir;
- b) la possibilité de regarder la télévision et d'écouter la radio;
- c) la possibilité de regarder des films ou des vidéos, dont le stock devrait être suffisant pour la durée du voyage et, si nécessaire, être renouvelé à des intervalles raisonnables;
- d) des articles de sport, y compris du matériel de culture physique, des jeux de table et des jeux de pont;
- e) une bibliothèque contenant des ouvrages de caractère professionnel ou autre, en quantité suffisante pour la durée du voyage, et dont le stock devrait être renouvelé à des intervalles raisonnables;
- f) des moyens de réaliser des travaux d'artisanat pour se détendre;
- g) des appareils électroniques tels que radios, télévisions, magnétoscopes, lecteurs de CD/DVD, ordinateurs, logiciels et magnétophones à cassettes.

#### *Nourriture*

34. Les pêcheurs faisant office de cuisinier devraient être formés et compétents pour occuper ce poste à bord.

### PARTIE IV. SOINS MÉDICAUX, PROTECTION DE LA SANTÉ ET SÉCURITÉ SOCIALE

#### *Soins médicaux à bord*

35. L'autorité compétente devrait établir une liste des fournitures médicales et du matériel médical qui devrait se trouver à bord des navires de pêche, compte tenu des risques encourus. Cette liste devrait inclure des produits de protection hygiénique pour les femmes et des récipients discrets non nuisibles pour l'environnement.

36. Un médecin qualifié devrait se trouver à bord des navires de pêche qui embarquent 100 pêcheurs ou plus.

37. Fishers should receive training in basic first aid in accordance with national laws and regulations, taking into account applicable international instruments.

38. A standard medical report form should be specially designed to facilitate the confidential exchange of medical and related information concerning individual fishers between the fishing vessel and the shore in cases of illness or injury.

39. For vessels of 24 metres in length and over, in addition to the provisions of Article 32 of the Convention, the following elements should be taken into account:

- (a) when prescribing the medical equipment and supplies to be carried on board, the competent authority should take into account international recommendations in this field, such as those contained in the most recent editions of the (ILO/IMO/WHO) *International Medical Guide for Ships* and the (WHO) *Model List of Essential Medicines*, as well as advances in medical knowledge and approved methods of treatment;
- (b) inspections of medical equipment and supplies should take place at intervals of no more than 12 months; the inspector should ensure that expiry dates and conditions of storage of all medicines are checked, the contents of the medicine chest are listed and conform to the medical guide used nationally, and medical supplies are labelled with generic names in addition to any brand names used, and with expiry dates and conditions of storage;
- (c) the medical guide should explain how the contents of the medical equipment and supplies are to be used, and should be designed to enable persons other than a medical doctor to care for the sick or injured on board, both with and without medical advice by radio or satellite communication; the guide should be prepared taking into account international recommendations in this field, including those contained in the most recent editions of the (ILO/IMO/WHO) *International Medical Guide for Ships* and the (IMO) *Medical First Aid Guide for Use in Accidents Involving Dangerous Goods*; and
- (d) medical advice provided by radio or satellite communication should be available free of charge to all vessels irrespective of the flag they fly.

### *Occupational safety and health*

#### *Research, dissemination of information and consultation*

40. In order to contribute to the continuous improvement of safety and health of fishers, Members should have in place policies and programmes for the prevention of accidents on board fishing vessels which should provide for the gathering and dissemination of occupational health and safety materials, research and analysis, taking into consideration technological progress and knowledge in the field of occupational safety and health as well as of relevant international instruments.

41. The competent authority should take measures to ensure regular consultations on safety and health matters with the aim of ensuring that all concerned are kept reasonably informed of national, international and other developments in the field and on their possible application to fishing vessels flying the flag of the Member.

37. Les pêcheurs devraient recevoir une formation de base aux premiers secours, conformément à la législation nationale et compte tenu des instruments internationaux pertinents.

38. Un formulaire de rapport médical type devrait être spécialement conçu pour faciliter l'échange confidentiel d'informations médicales et autres informations connexes concernant les pêcheurs entre le navire de pêche et la terre en cas de maladie ou d'accident.

39. Pour les navires d'une longueur égale ou supérieure à 24 mètres, en sus des dispositions de l'article 32 de la convention, les éléments suivants devraient être pris en compte:

- a) en prescrivant le matériel médical et les fournitures médicales à conserver à bord, l'autorité compétente devrait tenir compte des recommandations internationales en la matière, telles que celles prévues dans l'édition la plus récente du *Guide médical international de bord* (OIT/OMI/OMS) et la *Liste modèle des médicaments essentiels* (OMS), ainsi que des progrès réalisés dans les connaissances médicales et les méthodes de traitement approuvées;
- b) le matériel médical et les fournitures médicales devraient faire l'objet d'une inspection tous les douze mois au moins; l'inspecteur devrait s'assurer que les dates de péremption et les conditions de conservation de tous les médicaments sont vérifiées, que le contenu de la pharmacie de bord fait l'objet d'une liste et qu'il correspond au guide médical employé sur le plan national, que les fournitures médicales portent des étiquettes indiquant le nom générique outre le nom de marque, la date de péremption et les conditions de conservation;
- c) le guide médical devrait expliquer le mode d'utilisation du matériel médical et des fournitures médicales et être conçu de façon à permettre à des personnes autres que des médecins de donner des soins aux malades et aux blessés à bord, avec ou sans consultation médicale par radio ou par satellite; le guide devrait être préparé en tenant compte des recommandations internationales en la matière, y compris celles figurant dans l'édition la plus récente du *Guide médical international de bord* (OIT/OMI/OMS) et du *Guide des soins médicaux d'urgence à donner en cas d'accidents dus à des marchandises dangereuses* (OMI);
- d) les consultations médicales par radio ou par satellite devraient être assurées gratuitement à tous les navires quel que soit leur pavillon.

### *Sécurité et santé au travail*

#### *Recherche, diffusion d'informations et consultation*

40. Afin de contribuer à l'amélioration continue de la sécurité et de la santé des pêcheurs, les Membres devraient mettre en place des politiques et des programmes de prévention des accidents à bord des navires de pêche prévoyant la collecte et la diffusion d'informations, de recherches et d'analyses sur la sécurité et la santé au travail, en tenant compte du progrès des techniques et des connaissances dans le domaine de la sécurité et de la santé au travail et des instruments internationaux pertinents.

41. L'autorité compétente devrait prendre des mesures propres à assurer la tenue de consultations régulières sur les questions de santé et de sécurité au travail, en vue de garantir que toutes les personnes concernées sont tenues convenablement informées des évolutions nationales et internationales ainsi que des autres progrès réalisés dans ce domaine, et de leur application possible aux navires de pêche battant le pavillon du Membre.

42. When ensuring that fishing vessel owners, skippers, fishers and other relevant persons receive sufficient and suitable guidance, training material, or other appropriate information, the competent authority should take into account relevant international standards, codes, guidance and other information. In so doing, the competent authority should keep abreast of and utilize international research and guidance concerning safety and health in the fishing sector, including relevant research in occupational safety and health in general which may be applicable to work on board fishing vessels.

43. Information concerning particular hazards should be brought to the attention of all fishers and other persons on board through official notices containing instructions or guidance, or other appropriate means.

44. Joint committees on occupational safety and health should be established:

- (a) ashore; or
- (b) on fishing vessels, where determined by the competent authority, after consultation, to be practicable in light of the number of fishers on board the vessel.

#### *Occupational safety and health management systems*

45. When establishing methods and programmes concerning safety and health in the fishing sector, the competent authority should take into account any relevant international guidance concerning occupational safety and health management systems, including the *Guidelines on occupational safety and health management systems, ILO-OSH 2001*.

#### *Risk evaluation*

46. (1) Risk evaluation in relation to fishing should be conducted, as appropriate, with the participation of fishers or their representatives and should include:

- (a) risk assessment and management;
- (b) training, taking into consideration the relevant provisions of Chapter III of the International Convention on Standards of Training, Certification and Watch-keeping for Fishing Vessel Personnel, 1995 (STCW-F Convention) adopted by the IMO; and
- (c) on-board instruction of fishers.

(2) To give effect to subparagraph (1)(a), Members, after consultation, should adopt laws, regulations or other measures requiring:

- (a) the regular and active involvement of all fishers in improving safety and health by continually identifying hazards, assessing risks and taking action to address risks through safety management;
- (b) an occupational safety and health management system that may include an occupational safety and health policy, provisions for fisher participation and provisions concerning organizing, planning, implementing and evaluating the system and taking action to improve the system; and

42. En veillant à ce que les armateurs à la pêche, les patrons, les pêcheurs et les autres personnes concernées reçoivent suffisamment de directives et de matériel de formation appropriés ainsi que toute autre information pertinente, l'autorité compétente devrait tenir compte des normes internationales, des recueils de directives, des orientations et de toutes autres informations utiles disponibles. Ce faisant, l'autorité compétente devrait se tenir au courant et faire usage des recherches et des orientations internationales en matière de santé et de sécurité dans le secteur de la pêche, y compris des recherches pertinentes dans le domaine de la santé et de la sécurité au travail en général qui pourraient être applicables au travail à bord des navires de pêche.

43. Les informations concernant les dangers particuliers devraient être portées à l'attention de tous les pêcheurs et d'autres personnes à bord au moyen de notices officielles contenant des instructions ou des directives ou d'autres moyens appropriés.

44. Des comités paritaires de santé et de sécurité au travail devraient être établis:

- a) à terre; ou
- b) sur les navires de pêche, si l'autorité compétente, après consultation, décide que cela est réalisable compte tenu du nombre de pêcheurs à bord.

#### *Systèmes de gestion de la santé et de la sécurité au travail*

45. Lors de l'élaboration de méthodes et de programmes relatifs à la santé et à la sécurité dans le secteur de la pêche, l'autorité compétente devrait prendre en considération toutes les directives internationales pertinentes concernant les systèmes de gestion de la santé et de la sécurité au travail, y compris les *Principes directeurs concernant les systèmes de gestion de la sécurité et de la santé au travail, ILO-OSH 2001*.

#### *Evaluation des risques*

46. (1) Des évaluations des risques concernant la pêche devraient être conduites, lorsque cela est approprié, avec la participation de pêcheurs ou de leurs représentants et devraient inclure:

- a) l'évaluation et la gestion des risques;
- b) la formation, en prenant en considération les dispositions pertinentes du chapitre III de la Convention internationale sur les normes de formation du personnel des navires de pêche, de délivrance des brevets et de veille, 1995, adoptée par l'OMI (convention STCW-F);
- c) l'instruction des pêcheurs à bord.

(2) Pour donner effet aux dispositions de l'alinéa a) du sous-paragraphe (1), les Membres devraient adopter, après consultation, une législation ou d'autres mesures exigeant que:

- a) tous les pêcheurs participent régulièrement et activement à l'amélioration de la santé et de la sécurité en répertoriant de façon permanente les dangers, en évaluant les risques et en prenant des mesures visant à les réduire grâce à la gestion de la sécurité;
- b) un système de gestion de la santé et de la sécurité au travail soit mis en place, qui peut inclure une politique relative à la santé et à la sécurité au travail, des dispositions prévoyant la participation des pêcheurs et concernant l'organisation, la planification, l'application et l'évaluation de ce système ainsi que les mesures à prendre pour l'améliorer;

- (c) a system for the purpose of assisting in the implementation of a safety and health policy and programme and providing fishers with a forum to influence safety and health matters; on-board prevention procedures should be designed so as to involve fishers in the identification of hazards and potential hazards and in the implementation of measures to reduce or eliminate such hazards.

(3) When developing the provisions referred to in subparagraph (1)(a), Members should take into account the relevant international instruments on risk assessment and management.

#### *Technical specifications*

47. Members should address the following, to the extent practicable and as appropriate to the conditions in the fishing sector:

- (a) seaworthiness and stability of fishing vessels;
- (b) radio communications;
- (c) temperature, ventilation and lighting of working areas;
- (d) mitigation of the slipperiness of deck surfaces;
- (e) machinery safety, including guarding of machinery;
- (f) vessel familiarization for fishers and fisheries observers new to the vessel;
- (g) personal protective equipment;
- (h) firefighting and lifesaving;
- (i) loading and unloading of the vessel;
- (j) lifting gear;
- (k) anchoring and mooring equipment;
- (l) safety and health in living quarters;
- (m) noise and vibration in work areas;
- (n) ergonomics, including in relation to the layout of workstations and manual lifting and handling;
- (o) equipment and procedures for the catching, handling, storage and processing of fish and other marine resources;
- (p) vessel design, construction and modification relevant to occupational safety and health;
- (q) navigation and vessel handling;
- (r) hazardous materials used on board the vessel;
- (s) safe means of access to and exit from fishing vessels in port;
- (t) special safety and health requirements for young persons;
- (u) prevention of fatigue; and
- (v) other issues related to safety and health.

48. When developing laws, regulations or other measures concerning technical standards relating to safety and health on board fishing vessels, the competent authority should take into account the most recent edition of the (FAO/ILO/IMO) *Code of Safety for Fishermen and Fishing Vessels, Part A*.

- c) un système soit mis en place pour faciliter la mise en œuvre de la politique et du programme relatifs à la santé et à la sécurité au travail et donner aux pêcheurs un moyen d'expression publique leur permettant d'influer sur les questions de santé et de sécurité; les procédures de prévention à bord devraient être conçues de manière à associer les pêcheurs au repérage des dangers existants et potentiels et à la mise en œuvre de mesures propres à les atténuer ou à les éliminer.

(3) Lors de l'élaboration des dispositions mentionnées à l'alinéa a) du sous-paragraph (1), les Membres devraient tenir compte des instruments internationaux pertinents se rapportant à l'évaluation et à la gestion des risques.

### *Spécifications techniques*

47. Les Membres devraient, dans la mesure du possible et selon qu'il convient au secteur de la pêche, examiner les questions suivantes:

- a) navigabilité et stabilité des navires de pêche;
- b) communications par radio;
- c) température, ventilation et éclairage des postes de travail;
- d) atténuation du risque présenté par les ponts glissants;
- e) sécurité d'utilisation des machines, y compris les dispositifs de protection;
- f) familiarisation avec le navire des pêcheurs ou observateurs des pêches nouvellement embarqués;
- g) équipement de protection individuelle;
- h) sauvetage et lutte contre les incendies;
- i) chargement et déchargement du navire;
- j) appareils de levage;
- k) équipements de mouillage et d'amarrage;
- l) santé et sécurité dans les locaux d'habitation;
- m) bruits et vibrations dans les postes de travail;
- n) ergonomie, y compris en ce qui concerne l'aménagement des postes de travail et la manutention et la manipulation des charges;
- o) équipement et procédures pour la prise, la manipulation, le stockage et le traitement du poisson et des autres ressources marines;
- p) conception et construction du navire et modifications touchant à la santé et à la sécurité au travail;
- q) navigation et manœuvre du navire;
- r) matériaux dangereux utilisés à bord;
- s) sécurité des moyens d'accéder aux navires et d'en sortir dans les ports;
- t) prescriptions spéciales en matière de santé et de sécurité applicables aux adolescents;
- u) prévention de la fatigue;
- v) autres questions liées à la santé et à la sécurité.

48. Lors de l'élaboration d'une législation ou d'autres mesures relatives aux normes techniques concernant la santé et la sécurité à bord des navires de pêche, l'autorité compétente devrait tenir compte de l'édition la plus récente du *Recueil de règles de sécurité pour les pêcheurs et les navires de pêche, Partie A* (FAO/OIT/OMI).

*Establishment of a list of occupational diseases*

49. Members should establish a list of diseases known to arise out of exposure to dangerous substances or conditions in the fishing sector.

*Social security*

50. For the purpose of extending social security protection progressively to all fishers, Members should maintain up to date information on the following:

- (a) the percentage of fishers covered;
- (b) the range of contingencies covered; and
- (c) the level of benefits.

51. Every person protected under Article 34 of the Convention should have a right of appeal in the case of a refusal of the benefit or of an adverse determination as to the quality or quantity of the benefit.

52. The protections referred to in Articles 38 and 39 of the Convention should be granted throughout the contingency covered.

**PART V. OTHER PROVISIONS**

53. A Member, in its capacity as a coastal State, when granting licences for fishing in its exclusive economic zone, may require that fishing vessels comply with the standards of the Convention. If such licences are issued by coastal States, these States should take into account certificates or other valid documents stating that the vessel concerned has been inspected by the competent authority or on its behalf and has been found to be in compliance with the provisions of the Convention concerning work in the fishing sector.

*Etablissement d'une liste de maladies professionnelles*

49. Les Membres devraient dresser la liste des maladies dont il est connu qu'elles résultent de l'exposition à des substances ou à des conditions dangereuses dans le secteur de la pêche.

*Sécurité sociale*

50. Aux fins d'étendre progressivement la sécurité sociale à tous les pêcheurs, les Membres devraient établir et tenir à jour des informations sur les points suivants:

- a) le pourcentage de pêcheurs couverts;
- b) l'éventail des éventualités couvertes;
- c) le niveau des prestations.

51. Toute personne protégée en vertu de l'article 34 de la convention devrait avoir le droit de faire recours en cas de refus de la prestation ou d'une décision défavorable sur la qualité ou la quantité de celle-ci.

52. Les prestations visées aux articles 38 et 39 de la convention devraient être accordées pendant toute la durée de l'éventualité couverte.

PARTIE V. AUTRES DISPOSITIONS

53. Un Membre, en sa qualité d'Etat côtier, pourrait exiger que les navires de pêche respectent les normes énoncées dans la convention avant d'accorder l'autorisation de pêcher dans sa zone économique exclusive. Dans le cas où ces autorisations sont délivrées par les Etats côtiers, lesdits Etats devraient prendre en considération les certificats ou autres documents valides indiquant que le navire a été inspecté par l'autorité compétente ou en son nom et qu'il est conforme aux dispositions de la convention sur le travail dans le secteur de la pêche.

**Fourth item on the agenda:  
Work in the fishing sector  
(single discussion)**

**Report of the Committee on the  
Fishing Sector**

1. The Committee on the Fishing Sector held its first sitting on 30 May 2007. It was originally composed of 137 members (70 Government members, 25 Employer members and 42 Worker members). To achieve equality of voting strength, each Government member entitled to vote was allotted 15 votes, each Employer member 42 votes and each Worker member 25 votes. The composition of the Committee was modified seven times during the session and the number of votes attributed to each member adjusted accordingly.<sup>1</sup>
2. The Committee elected its Officers as follows:

*Chairperson:* Mr N. Campbell (Government member, South Africa) at its first sitting

*Vice-Chairpersons:* Mr B. Chapman (Employer member, Canada) and Mr P. Mortensen (Worker member, Denmark) at its first sitting

*Reporter:* Mr J. Thullen (Government member, Ecuador) at its second sitting

<sup>1</sup> The modifications were as follows:

- (a) 31 May: 147 members (84 Government members entitled to vote with 9 votes each, 27 Employer members with 28 votes each and 36 Worker members with 21 votes each);
- (b) 1 June: 144 members (90 Government members entitled to vote with 77 votes each, 21 Employer members with 330 votes each and 33 Worker members with 210 votes each);
- (c) 2 June: 134 members (91 Government members entitled to vote with 456 votes each, 19 Employer members with 2,184 votes each and 24 Worker members with 1,729 votes each);
- (d) 4 June: 126 members (91 Government members entitled to vote with 304 votes each, 19 Employer members with 1,456 votes each and 16 Worker members with 1,729 votes each);
- (e) 5 June: 124 members (91 Government members entitled to vote with 38 votes each, 19 Employer members with 182 votes each and 14 Worker members with 247 votes each);
- (f) 6 June: 126 members (92 Government members entitled to vote with 285 votes each, 19 Employer members with 1,380 votes each and 15 Worker members with 1,748 votes each);
- (g) 8 June: 126 members (94 Government members entitled to vote with 63 votes each, 18 Employer members with 329 votes each and 14 Worker members with 423 votes each).

- 
3. At its fourth sitting the Committee appointed a Drafting Committee composed of the following members: Mr A. Moussat (Government member, France), Mr P. Mackay (Employer member, New Zealand), Mr I. Victor (Worker member, Belgium) and the Reporter, Mr J. Thullen (Government member, Ecuador) (ex officio).
  4. The Committee held 11 sittings.

## Introduction

5. The Chairperson thanked the Committee for his election and reminded the Committee of the importance of its work: it needed to ensure that the estimated 30 million fishers would benefit from a decent measure of protection in their working lives. The very serious problems faced by fishers and their families needed to be addressed. In its work, the Committee should also consider the connection of its mandate with the efforts of other international organizations, namely the International Maritime Organization (IMO) and the Food and Agriculture Organization (FAO). The Chairperson referred to the consultations between the social partners and the Interregional Tripartite Round Table on Labour Standards in the Fishing Sector, held in December 2006. On the whole, the text proposed was mature. He expressed the hope that the good will developed would lead the Committee towards a successful conclusion of its work.
6. The representative of the Secretary-General recalled that, as a result of the outcome of the 93rd Session of the Conference, the Governing Body placed an item on the fishing sector on the agenda of the 96th Session of the Conference. Following informal consultations with the Employers, the Workers and the Government Regional Coordinators, it had been decided that Report IV(1) would be based on a questionnaire focusing on the main problem areas encountered during the discussion in 2005. These included issues of scope, medical certification, hours of rest and crew accommodation. The Round Table held in December 2006 had been characterized by the constructive atmosphere, in which all parties sought the adoption of a Convention that could be widely ratified. The work done within and outside the framework of the Round Table gave rise to the hope that the remaining contentious issues could be resolved.
7. Turning to Report IV(2B), the representative of the Secretary-General clarified that, whereas the Standing Orders of the Conference required that the report be drafted on the basis of replies to the questionnaire, the Governing Body had decided that the report of the Committee on the Fishing Sector of the 93rd Session, and the outcome of additional tripartite consultations, would serve as the basis for the discussion. In light of this, and given that most replies to the questionnaire did not necessitate modifications to the text, the Office had made no substantive changes to the instruments as they appeared in the report of the Committee on the Fishing Sector in 2005. Although a Recommendation had been adopted in 2005, the representative of the Secretary-General reminded the Committee that it was subject to revision, and that a new Recommendation would have to be adopted at the 96th Session. Report IV(2A) contained the replies to the questionnaire sent to all member States, including a chapter addressing specific drafting issues and incorporating the report of the Round Table as an appendix. While the Office had included in its commentary certain proposals for a text on a “progressive implementation approach”, these suggestions were not reflected in the text of the proposed Convention. As such, they would need to be the subject of an amendment.

---

## General discussion

8. Reflecting on the diversity and size of world fisheries, the Employer Vice-Chairperson emphasized the pressing need to protect and promote the basic rights of and decent work for all fishers. The work of the Committee represented an opportunity to adopt an inclusive Convention that could be endorsed by the social partners and governments alike. He expressed disappointment with the limited rate of ratification of the five ILO Conventions for the sector and emphasized that, in order to avoid a similar fate, the Convention would need to: secure the favourable conditions already achieved for some fishers; keep pace with the evolving working relationships and increasing mobility; reflect constraints faced by developing countries; provide for progressive implementation of more favourable working conditions; and reflect diverse physical, infrastructural and cultural characteristics. He invited the Committee to remain open to find innovative ways to address the limited and legitimate concerns that remained unresolved. A number of provisions contained in the 2005 draft Convention needed to be amended. These included: the length/tonnage equivalence as well as the prescriptive requirements in Annex III, which should better reflect the vessel characteristics of Asian vessels, and the provisions on minimum hours of rest, which should be more flexible in relation to diverse fishing operations in coastal fisheries. In addition, reference should be made to a progressive implementation approach and to the role of private employment agencies.
9. In closing, the Employer Vice-Chairperson announced that his group considered introducing a resolution to promote an effective framework governing the use of marine ecosystems and to address Illegal, Unreported and Unregulated (IUU) Fishing.
10. The Worker Vice-Chairperson stated that he was confident that the Committee would be able to achieve a favourable outcome that would benefit fishers throughout the world. He reminded the Committee that the circumstances surrounding its revival were rather unusual and pointed out that the text of the proposed Convention concerning work in the fishing sector had been supported by a large majority of delegations to the 93rd Session of the International Labour Conference (ILC). He reiterated that the Workers' group had strongly supported the text in 2005 and continue to support it in 2007. The Workers' group, however, recognized that some member States had encountered difficulties with some of the provisions, notably with respect to accommodation and the conversion between the length and tonnage of fishing vessels. The last two years had not been wasted, and possible solutions to such problems had been prepared jointly by the Government of Japan and the Workers' group. These suggestions would be presented to the Committee in the following days. In addition, the Workers' group had agreed to consider several problems raised by the Employers' group with regard to manning and hours of rest, a progressive implementation approach and private employment agencies. The social partners had worked closely over several months to find a mutually acceptable compromise, and he trusted that the Workers' group's good will would be appreciated by the Employers' group in order to facilitate the smooth adoption of a Convention. The Office had also provided some very helpful suggestions on the text that could be improved, updated and clarified; his group would bring forward a number of those proposals in the Committee. He pointed out that many governments, in their replies to the ILO's questionnaire, had observed that changes to the existing text should be kept to a minimum. The Workers' group strongly supported that approach. He stressed that the compromises already made by the Workers' group had provided a clear line indicating how far they were prepared to go. Therefore, having shown their willingness to compromise in order to develop various joint proposals, they sincerely hoped that unnecessary proposals for amendments could be avoided, where there was balanced and mature text.

- 
- 11.** The Government member of Germany, speaking on behalf of the Government members of the Committee Member States of the European Union (EU group),<sup>2</sup> Candidate Countries,<sup>3</sup> Countries of the Stabilization and Association Process and potential candidates,<sup>4</sup> the European Free Trade Association countries (EFTA), Iceland and Norway, as well as the Republic of Moldova and Ukraine, welcomed the discussion. The Committee's work would have an important practical impact, given that fishing was among the most dangerous activities. Too many occupational accidents and injuries occurred, and too often involved the loss of lives. This Committee provided a historic opportunity to agree on a global set of rules for the industry and this opportunity should be used effectively. The Convention should ensure improvement in the working conditions of fishers, including occupational safety and health and social protection, as well as contribute to better living conditions for fishers and their families and to increasing the attractiveness of the sector. In 2005, the 25 European Union (EU) Member States had voted in favour of the proposed Convention; the enlargement of the EU to 27 Member States had not changed that position. The Governments he was speaking on behalf of were not requesting substantial modifications to the current draft text, but had an open attitude towards amendments that could contribute to a wide acceptance of the Convention without hollowing out its substance. They therefore trusted that amendments to the draft Convention would be limited to those that were likely to receive wide support. Most of the text was mature and should not be discussed again. The Governments he was speaking on behalf of were, however, willing to modify the Recommendation to ensure its consistency with the Convention and take into account relevant developments since 2005. Four main issues remained to be discussed in the Committee: a progressive implementation approach; private employment agencies; accommodation; manning and hours of rest. Against that background, the Governments he was speaking on behalf of were in favour of procedures that would reduce the discussion of other articles and issues. The Committee might commence the discussion with the four abovementioned issues. The Governments he was speaking on behalf of would cooperate constructively in the Committee, thoroughly examine all proposals, and consider supporting balanced and fair compromises. They were convinced that the Committee would thus achieve a successful conclusion in the adoption of global minimum standards for work in the fishing sector.
- 12.** The Government member of Japan stated that his delegation would be proposing, together with the Workers' group, amendments regarding the length/tonnage equivalence and accommodation requirements. He believed that their joint proposal would pave the way for the adoption of the Convention, not only by his country, but by many other member States and thus extend its benefits to a much larger number of fishers worldwide.
- 13.** The Government member of Canada expressed her delegation's recognition of the inherent dangers of fishing and the importance of achieving a credible and practical instrument that could be widely ratified. Since 2003, many government, worker and employer representatives and the Office had worked hard to develop meaningful updated international labour standards for the fishing sector. It was important for the Committee not to lose sight of the ultimate objective of its work, which was to develop credible international labour standards that would provide appropriate protection for fishers around the globe. This required the right balance in the wording of the instrument providing strong protection for fishers, while accommodating the diverse operations, conditions and

<sup>2</sup> Austria, Belgium, Bulgaria, Czech Republic, Cyprus, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom.

<sup>3</sup> Croatia, Turkey, The former Yugoslav Republic of Macedonia.

<sup>4</sup> Albania, Bosnia and Herzegovina, Montenegro, Serbia.

---

employment relationships that prevailed in the industry. Therefore, the new instruments need not be overly prescriptive and thus impede wide ratification. The Maritime Labour Convention, 2006, provided a useful model in this context. In addition, the Committee should also consider the possibility of using other tools, such as codes of practice, as a means of providing detailed guidance.

14. The Government member of Algeria said that fishers needed to be given the necessary protection in order to achieve the Organization's objective, to foster decent work for all. The Convention to be adopted would, together with the Maritime Labour Convention, 2006, provide a framework to protect fishers and seafarers alike. It would significantly improve the protection of fishers, who were often faced with dangerous working conditions. For its part, his country was determined to spare no effort to assure workers in the fishing sector of decent working conditions. To this end, the national agency responsible for fisheries had been elevated to the rank of a ministry in 2000. In addition, two important regulations were adopted in 2005 and 2006 providing for specific rules governing employment relationships for seafarers, including on fishing vessels. All these developments underlined the importance his country attached to the fishing sector.
15. The Government member of the Bolivarian Republic of Venezuela confirmed his Government's commitment to promoting the protection of workers' rights in this sector and to ensuring the adoption of a Convention that would benefit fishers, men as well as women. Drawing attention to the United Nations Convention on the Law of the Sea (UNCLOS), referred to in the Preamble to the proposed Convention, UNCLOS was considered to be an integral part of the framework of the rights of workers at sea but it could not be the only such reference.
16. The Government member of the Philippines expressed a firm commitment to providing a safer, more just, and decent working environment for fishers. However, he was concerned about how the proposed Convention might apply to the many poor, small-scale fishing operations in developing countries, and emphasized the need for a flexible approach, such as with respect to working hours and living conditions. It was important for the proposed Convention to respect traditional arrangements and to remain sensitive to the situation of developing countries.
17. The Government member of Brazil, speaking on behalf of GRULAC,<sup>5</sup> reported that there was general consensus in the group for the adoption of a new Convention that offered greater protection for fishers. She said that the Committee should take into account the discussions on the proposed Convention in previous years, including that on the pre-eminence of national law where such law was more beneficial to workers. Adoption of the proposed Convention was fundamentally important for those countries that had no specific law relating to this sector. She urged that adoption should not be impeded because it was impossible to meet all the interests of different groups. She believed that progressive implementation of the proposed Convention could be considered, according to the social, economic, and cultural circumstances of each country.
18. The Government member of Namibia, speaking on behalf of the Africa group,<sup>6</sup> looked forward to the building of a consensus on issues such as length/tonnage equivalence,

<sup>5</sup> Argentina, Brazil, Chile, Colombia, Costa Rica, Cuba, Ecuador, Guatemala, Honduras, Mexico, Nicaragua, Panama, Peru, Suriname, Trinidad and Tobago, Uruguay.

<sup>6</sup> Algeria, Benin, Cameroon, Congo, Côte d'Ivoire, Egypt, Ghana, Kenya, Liberia, Libyan Arab Jamahiriya, Mali, Mauritania, Morocco, Mozambique, Namibia, Nigeria, Rwanda, Senegal, South Africa, United Republic of Tanzania, Togo, Tunisia, Zambia, Zimbabwe.

---

accommodation, manning and hours of rest, private employment agencies and progressive implementation of the Convention. While the Convention should be designed to be widely ratified, it was important to remember that this would be an international instrument and countries would need to bring their national laws into line with the Convention. He also recalled that parts of the proposed texts of the instruments were mature, and unless there were compelling reasons to do otherwise, there was no need to change them. The group thus hoped for well balanced and all-inclusive instruments.

- 19.** The Government member of Indonesia, speaking on behalf of the Asia-Pacific group, (ASPAG),<sup>7</sup> noted the positive and constructive developments to date towards adopting a Convention that ensured that the rights and interests of all fishers were protected. However, the low ratification rate of many existing Conventions relating to the fishing sector was of concern. To achieve wide ratification and implementation of this new Convention, therefore, ASPAG considered it important to take into account differences in the development of fishing fleets, including differences in technology used, and variations in the means of determining fishing vessel capacity. The Convention should allow competent authorities to exempt certain fishing vessels or fishing from some or all of its provisions, and also be sufficiently flexible so as to reflect different levels of development in member States.
- 20.** The Government member of Lebanon affirmed that the new Convention was vital in promoting and ensuring the rights of workers in the fishing sector. This was especially so for coastal countries such as Lebanon, where the sector was not very developed and most fishers were self-employed and worked with family members. He believed that the Convention should take into account the varying levels of development of the sector in different countries, allowing for certain exclusions from its provisions if a country could not fully comply.
- 21.** The Government member of New Zealand strongly supported the efforts to achieve a balance between an instrument that could be widely ratified and one that represented real improvements in the lives of fishers. A Convention would need to reflect a global minimum standard, rather than a series of minimum regional standards, but some flexibility should be possible. His Government was not opposed to progressive implementation or exemption mechanisms, provided that they were appropriate and followed consultation with the social partners. He also stated that, while the adoption of a legal instrument was a sound basis to work from in seeking protection for the world's fishers, the goal of high-quality, safe and appropriately rewarded work for fishers could only be achieved by member States maintaining a continual focus on work on fishing. He therefore suggested that the Convention should contain a provision for an ongoing process of monitoring, research and international support. The Government member of New Zealand also expressed concern regarding the draft programme for the Committee's work which required draft amendments to be lodged before the opportunity for general discussion of the relevant issues.
- 22.** The Government member of Kuwait, speaking on behalf of the member States of the Gulf Cooperation Council (GCC),<sup>8</sup> considered that the proposed Convention adequately dealt with all aspects relating to the fundamental rights of fishers and that it would help improve

<sup>7</sup> Australia, Bahrain, China, Fiji, India, Indonesia, Islamic Republic of Iran, Iraq, Japan, Republic of Korea, Kuwait, Lebanon, Malaysia, New Zealand, Oman, Pakistan, Papua New Guinea, Philippines, Qatar, Saudi Arabia, Solomon Islands, Sri Lanka, Thailand, United Arab Emirates, Viet Nam, Yemen.

<sup>8</sup> Bahrain, Kuwait, Oman, Qatar, Saudi Arabia, United Arab Emirates, Yemen.

---

conditions on board fishing vessels in line with the ILO's Decent Work Agenda. The GCC also supported the proposed Recommendation. However, although the importance of extending protection to all fishers was recognized, it was essential for the new Convention to give developing countries greater flexibility in implementing it. The GCC was in the process of restructuring the institutions overseeing the sector and were encouraging them to increase their cooperation with representatives of fishing workers.

- 23.** The Government member of the Islamic Republic of Iran welcomed and supported the proposed instruments since they helped to implement the Decent Work Agenda in the fishing sector. He endorsed the statement made by the Government member of Lebanon and urged adoption of the proposed Convention.
- 24.** The Government member of Turkey supported the need for a new Convention on the fishing sector, acknowledging the extensive work done by the ILO in developing the proposed texts. He noted that existing ILO Conventions on the fishing sector were poorly ratified and that they excluded many categories of fishers; therefore the new Convention needed to be flexible and much easier to ratify.
- 25.** A representative of the International Collective in Support of Fishworkers (ICSF) hoped that the new Convention would cover not only fishers on board vessels but also shore-based operators in the sector. He considered that the latter should at least be covered by the proposed Part VI of the Convention and Article 1(e). He also stated that many women were dependent on the fishing sector, especially in developing countries, and broadening the scope of the Convention to include shore-based workers would contribute towards achieving the UN Millennium Development Goal to promote gender equality and empower women.
- 26.** A representative of the International Christian Maritime Association (ICMA) also supported the adoption of the proposed Convention and pledged the Association's assistance in achieving this. He considered that the Committee did not need to reopen discussion on issues previously agreed upon, but acknowledged that some improvements in the draft texts were needed.
- 27.** The representative of Social Alert and the International Young Christian Workers referred to the joint campaigns of the two groups in support of the rights of informal economy workers. While welcoming the Committee's efforts to provide a set of rights for fishers, all workers in the sector needed protection, including those in the informal economy.
- 28.** Noting that shipmasters and skippers were workers too, the representative of the International Federation of Shipmasters' Associations affirmed the importance of decent work for fishers in the interests of safety of life at sea. He also considered that the new Convention should be practical and have wide acceptance in order to hasten ratification.
- 29.** The representative of the FAO considered the new instruments to be an important step in promoting the safety and health of fishers. Referring to several existing standards on the subject that had been developed jointly by the FAO, the ILO and the IMO, he advised that there needed to be consistency between them and the new instruments. However, he accepted that it might be necessary to reconsider some provisions of the draft safety recommendations for small fishing vessels, currently being developed by the IMO.

---

## Consideration of the proposed Convention concerning work in the fishing sector

### Preamble

30. The Employer Vice-Chairperson introduced an amendment to the sixth preambular paragraph, to insert the words “the Employment Service Convention, 1948,” after the words “in particular”, to delete the word “and” after “1981,”, and to insert “and the Private Employment Agencies Convention, 1997” after the date “1985,”. He argued that both these Conventions were relevant to the fishing sector, so they should be referred to in the Preamble to the proposed Convention. The Worker Vice-Chairperson supported the amendment.
31. The Worker Vice-Chairperson then introduced another amendment to the same sixth preambular paragraph, namely, to add the text “the Maritime Labour Convention, 2006, the Promotional Framework for Occupational Safety and Health Convention, 2006 and the Employment Relationship Recommendation, 2006” between the words “1985” and the ensuing “and”.
32. The Government member of Greece said that, since the Maritime Labour Convention, 2006 did not apply to the fishing sector, he considered that it should not be mentioned in the Preamble to the proposed Convention. The Employer Vice-Chairperson concurred.
33. Following consultations, the Employer and Worker Vice-Chairpersons withdrew their amendments.
34. The Preamble was adopted without amendment.

### Part I. Definitions and scope

#### *Definitions*

#### Article 1

##### Subparagraph (a)

35. The Government member of Indonesia introduced an amendment, seconded by the Government member of China, to insert in subparagraph (a) the words “fishing for training, fishing for research” after the words “subsistence fishing”. She explained that fishing for training and fishing for research were different activities from normal commercial fishing and therefore they should be excluded from the definition of the latter.
36. The Government member of China then introduced another amendment, seconded by the Government member of Indonesia, to replace the words “subsistence fishing and recreational fishing” with “subsistence fishing, recreational fishing and fishing for scientific research and educational purposes”. Fishing for scientific research or for educational purposes was different from fishing for commercial purposes, and it was hoped thus to clarify the text.
37. The Employer Vice-Chairperson pointed out that fishing for research and training often entailed a commercial element, so that if either of the suggested amendments was adopted

---

the text of the Convention would be obscured rather than clarified. He therefore opposed both amendments. The Worker Vice-Chairperson agreed and opposed both amendments for the same reasons, as did several Government members.

- 38.** Neither of the two amendments was adopted. Subparagraph (a) was adopted without amendment.

#### Subparagraph (c)

- 39.** The Employer Vice-Chairperson proposed an amendment to subparagraph (c) in two parts: firstly to replace the words “with the representative” by “with representative”, and secondly to delete the words “, on the measures to be taken to give effect to the provisions of the Convention and with respect to any derogation, exemption or other flexible application as allowed under the Convention”. Single representative organizations of employers and workers were not readily identifiable in some countries, and the first part of the proposed amendment would provide the competent authorities with some flexibility in deciding who to consult. The second part of the amendment reflected text proposed by the Office.
- 40.** The Worker Vice-Chairperson and the Government members of Denmark, Greece and Spain opposed the first part of the amendment, because the original text reflected standard wording in a Convention. They supported the second part of the amendment.
- 41.** The Employer Vice-Chairperson then introduced a subamendment, withdrawing the first part of the amendment and retaining the second part. The amendment was adopted as subamended.
- 42.** Subparagraph (c) was adopted as amended.

#### Subparagraph (d)

- 43.** The Employer Vice-Chairperson introduced an amendment to replace subparagraph (d) by the following text:

“fishing vessel owner” means the owner of the fishing vessel or any other organization or person, such as manager, agent or bareboat charterer, who has assumed the responsibility for the operation of the vessel from the owner and who, on assuming such responsibility, has agreed to take over the duties and responsibilities imposed on the owner of the fishing vessel in accordance with this Convention, regardless of whether any other organizations or persons fulfil certain of these duties and responsibilities on behalf of the fishing vessel owner;.

- 44.** He recalled earlier discussions that had taken place during the 93rd Session of the International Labour Conference as well as during the Round Table. In order for the goal of decent work and sustainable employment to be achieved operators needed to be able to remain economically viable. Globalization required many changes, and his group hoped that the proposed amendment would enable employers to keep pace with change. The amendment represented an effort to insert the notion of the private employment agency as distinct from a traditional recruitment and placement agency. He recognized that there were many countries that either were not in a position to regulate private employment agencies or did not wish to do so: there was nothing in the amendment that would require them to do so. The proposed amendment was an “enabling amendment” which would allow the employer to be someone other than the vessel owner, while at all times recognizing that the vessel owner remained ultimately responsible for all the obligations established in the Convention. The amendment was part of a package that represented a compromise arrangement between the Workers’ and the Employers’ groups; he hoped that it would meet with the approval of the Government members.

- 
45. The Worker Vice-Chairperson fully endorsed the amendment, and thanked the Employers' group for their hard work and dedication in negotiating a compromise. He withdrew a similar amendment submitted by the Workers' group in favour of the Employers' group's proposal.
  46. The Government members of Canada and Norway supported the introduction of this new concept in principle. However, both noted that minor differences existed between the texts proposed by the Employers' and Workers' groups. They found the Workers' group's text to be preferable, since it was more in line with the wording used in the Maritime Labour Convention, 2006.
  47. The Committee adopted the amendment and asked the Drafting Committee to look into the points raised by the Government members of Canada and Norway.
  48. An amendment submitted by the Government member of the Russian Federation was not seconded and therefore not discussed.
  49. Subparagraph (d) was adopted as amended.

#### Subparagraph (e)

50. The Government member of Indonesia introduced an amendment, seconded by the Government member of the Philippines, to insert the words “, trainees, trainers, researchers,” after the words “service of a government”. The reasons for the amendment were the same as for the earlier proposed amendment to subparagraph (a). The Employer Vice-Chairperson opposed the amendment, as did the Worker Vice-Chairperson on the grounds that it would narrow the Convention's application. The Government member of Kuwait, speaking on behalf of the member States of the GCC, and the Government member of Germany, both opposed the amendment.
51. The amendment was not adopted.
52. Subparagraph (e) was adopted without amendment.

#### Subparagraph (f)

53. The Worker Vice-Chairperson proposed an amendment to insert a comma after the word “arrangements”. The Employer Vice-Chairperson agreed with the amendment as did other Government members, and it was adopted.
54. Subparagraph (f) was adopted as amended.

#### Subparagraphs (h) and (i)

55. The Worker Vice-Chairperson proposed an amendment to move subparagraphs (h) and (i) to Annex III. The Employer Vice-Chairperson supported the proposal and, in the absence of comments from Government members, the amendment was adopted.

#### Subparagraph (n)

56. The Employer Vice-Chairperson introduced an amendment to replace the word “person” by the word “fisher”, since the latter term, as already defined, clearly included all persons and its use here would maintain clarity and consistency. The Worker Vice-Chairperson supported the amendment, as did the Government members of Germany and Lebanon. The amendment was adopted.

---

57. Subparagraph (n) was adopted as amended.

58. Article 1 was adopted as amended.

## Scope

### Article 2

59. Article 2 was adopted without amendment.

### Article 3

60. The Employer Vice-Chairperson introduced an amendment to replace Article 3 by the following text:

1. Where the application of the Convention raises special problems of a substantial nature in the light of the particular conditions of service of the fishers or of the fishing vessels' operations concerned, a Member may, after consultation, exclude from the requirements of this Convention, or from certain of its provisions:

- (a) fishing vessels engaged in fishing operations in rivers, lakes or canals;
- (b) limited categories of fishers or fishing vessels.

2. In case of exclusions under the preceding paragraph, and where practicable, the competent authority shall take measures, as appropriate, to extend progressively the requirements under this Convention to the categories of fishers and fishing vessels concerned.

3. Each Member which ratifies this Convention shall:

- (a) in its first report on the application of this Convention submitted under article 22 of the Constitution of the International Labour Organization:
  - (i) list any categories of fishers or fishing vessels excluded under paragraph 1;
  - (ii) give the reasons for any such exclusions, stating the respective positions of the representative organizations of employers and workers concerned, in particular the representative organizations of fishing vessel owners and fishers, where they exist; and
  - (iii) describe any measures taken to provide equivalent protection to the excluded categories; and
- (b) in subsequent reports on the application of the Convention, describe any measures taken in accordance with paragraph 2.

61. He explained that the amendment was motivated in response to a suggestion made by the Office in Report IV(2A).

62. The Worker Vice-Chairperson withdrew a similar amendment in favour of the Employers' group's proposal.

63. The Government member of the Philippines introduced a subamendment to add the following subparagraphs at the end of paragraph 1:

“(c) vessels of traditional design and using traditional fishing practices; and

(d) vessels whose design and limitations do not allow practical modifications for complying with the provisions of this text.”

- 
64. The purpose of the subamendment was to introduce an additional exclusion to the scope of the proposed Convention, recognizing the specific nature of traditional vessels as used in the Philippines and in other developing countries. A similar exclusion appeared in Article II, paragraph 4, of the Maritime Labour Convention, 2006. The subamendment was based on an amendment submitted by his delegation and the Government member of Malaysia, which would fall if the Committee accepted the Employers' proposal.
  65. The Government member of Malaysia supported the subamendment.
  66. The Employer Vice-Chairperson, noting that the subamendment would substantively change a package of elements agreed between the Workers' and Employers' groups, did not support the subamendment.
  67. The Worker Vice-Chairperson said that the package agreed with the Employers' group was already flexible enough; his group did not support a proposal that would widen the scope for exceptions. In addition, he noted that there was no definition of traditional design or traditional fishing practices.
  68. The Government member of China opposed the subamendment. He believed that paragraph 1 of Article 3 provided the competent authority with the power to exclude certain types of fishing vessels. If it was understood correctly, the paragraph already addressed the concerns of the Government member of the Philippines.
  69. The subamendment was not adopted.
  70. The Government member of the Russian Federation proposed an amendment to replace the words "rivers, lakes and canals;" with "fresh waters;". The subamendment was based on an amendment submitted by his delegation, which would fall, if the Committee accepted the Employers' proposal.
  71. The subamendment was supported by the Government member of Sri Lanka.
  72. The Employer Vice-Chairperson, noting that the proposed subamendment represented a more restrictive interpretation than the current text, and pointing to the existence of salt water lakes, canals and parts of rivers, opposed the subamendment. The Worker Vice-Chairperson agreed with the Employer Vice-Chairperson.
  73. The subamendment was not adopted.
  74. The amendment proposed by the Employers' group was adopted.
  75. In consequence, an amendment submitted by the Government members of Indonesia and Malaysia, and an amendment submitted by the Government member of the Russian Federation fell.
  76. Article 3 was adopted as amended.

## Article 4

77. The Chairperson recalled the discussions at the December 2006 Interregional Tripartite Round Table on Labour Standards in the Fishing Sector, with regard to the concept of progressive implementation. It had then been suggested that, in order to achieve wide ratification of the proposed Convention, the text needed to ensure that, in particular, developing countries would be able to ratify and implement the new standard. The Round

---

Table had looked into the concept and discussed how it could be incorporated. As to what would constitute a country that would be able to benefit from the clause, the Round Table had not succeeded in finding a definition. It had been largely agreed, however, that progressive implementation of the standard should take place over a specific time period and through a specific process, so that some countries could implement it slowly, while others could complete this task rapidly.

- 78.** The Employer Vice-Chairperson added that ratification of the instrument was a means to achieving the goal of protecting the largest possible number of fishers. If the infrastructure for implementation was already partly in place in a country, progressive implementation would allow for partial protection under the ratified Convention, rather than no protection, if the standard had not been ratified. There had to be a national plan for implementation, with a defined period and pace of implementation. The government would be accountable for progressive implementation, after consultation with the social partners, as well as for reporting on progress. It would be useful to set time limits: the Round Table had discussed a ten-year time frame, which, however, might be difficult for some developing countries to meet.
- 79.** The Worker Vice-Chairperson endorsed the Employer Vice-Chairperson's comments, and stated that the Workers' group would continue to work on a set of joint amendments with the Employers' group.
- 80.** The Government member of Greece was very encouraged that the social partners were approaching agreement on issues relating to the progressive implementation approach, and trusted that the consensus would not be presented on a "take it or leave it" basis, but rather as a topic for discussion. Progressive implementation appeared to be the best way forward, and could use the "developing country" or the "special conditions" concepts; the latter could apply to countries at various levels of development. His Government would consider the package in relation to three issues – port State control, certification and no-more-favourable-treatment. He asked whether the wording on these issues could be considered to be "mature text". He understood that it would not be possible to resolve all the details within this Committee, but considered it important to address those issues through a resolution that would ask the ILO to develop guidelines for port State control.
- 81.** The Employer Vice-Chairperson introduced an amendment, submitted by his group, which had been subamended following additional consultations with the Workers' group, to replace Article 4 by the following:
1. Where it is not immediately possible for a Member to implement all of the measures provided for in this Convention owing to special problems of a substantial nature in the light of insufficiently developed infrastructure or institutions, the Member may, in accordance with a plan drawn up in consultation, progressively implement all or some of the following provisions:
    - (a) Article 10, paragraph 1;
    - (b) Article 10, paragraph 3, in so far as it applies to vessels remaining at sea for more than three days;
    - (c) Article 15;
    - (d) Article 20;
    - (e) Article 33; and
    - (f) Article 38.
  2. Unless there is a situation of force majeure, paragraph 1 does not apply to fishing vessels which are:
    - (a) 24 metres in length and over; or

- 
- (b) remaining at sea for more than seven days; or
  - (c) normally navigating at a distance exceeding 200 nautical miles from the coastline of the flag State or navigating beyond the outer edge of its continental shelf, whichever distance from the coastline is greater; or
  - (d) subject to port State control as provided for in Article 43 of this Convention;

nor to fishers working on such vessels.

3. Each Member which avails itself of the possibility afforded in paragraph 1 shall:

- (a) in its first report on the application of this Convention submitted under article 22 of the Constitution of the International Labour Organization:
  - (i) indicate the provisions of the Convention to be progressively implemented;
  - (ii) explain the reasons and state the respective positions of representative organizations of employers and workers concerned, and in particular the representative organizations of fishing vessel owners and fishers, where they exist; and
  - (iii) describe the plan for progressive implementation; and
- (b) in subsequent reports on the application of this Convention, describe measures taken with a view to giving effect to all of the provisions of the Convention.

**82.** The subamendments to paragraph 2 of the Article had been drafted in an effort to take account of the views of the Workers' group on trip duration and to address the concerns that had been expressed by some governments in respect of port State control.

**83.** The Worker Vice-Chairperson said that in light of the subamendments introduced to the Employers' group's amendment, the Workers' group withdrew a similar amendment.

**84.** The Government member of Norway reported back on the Government group's meeting, which had focused especially on clarifications of the meaning regarding terminology in certain amendments. Among the questions that had arisen, he specifically asked the Employer Vice-Chairperson to explain the reasoning behind the reference to force majeure in paragraph 2.

**85.** The Employer member of the Netherlands explained that this wording had been proposed to take into account cases where a small vessel that was normally involved in fishing within the 200 nautical mile limit, engaged on voyages of less than seven days and registered in a country making use of the progressive implementation clause, might have to call in to a foreign port due to distress.

**86.** In response to this explanation, the Government member of New Zealand suggested to further subamend the proposal by deleting the words "Unless there is a situation of force majeure," from the beginning of paragraph 2, and to add the words "except where port State control arises through a situation of force majeure."

**87.** The Employer Vice-Chairperson seconded the subamendment.

**88.** The Government member of Greece wondered whether similar wording might not also need to be applied to paragraphs 2(b) and 2(c).

**89.** The representative of the Legal Adviser noted that the concept of progressive implementation envisaged a decision of principle taken for a long time frame, whereas the problem of force majeure related to punctual situations. It therefore seemed that it was likely to be difficult to include the two ideas into a single provision.

- 
90. The Government member of Denmark, seconded by the Government member of Greece, proposed the addition of the word “normally” before the word “remaining” in paragraph 2(b).
  91. The Employer Vice-Chairperson said that the subamendment proposed by the Government member of Denmark constituted a substantive departure from the agreement between the Workers’ group and the Employers’ group, and that he could, therefore, not support that proposal. The Worker Vice-Chairperson agreed.
  92. The Government member of Denmark withdrew his proposal.
  93. The Government member of Greece said that his delegation wished to congratulate the social partners on the agreement that had been reached in respect to Article 4. Nevertheless, he wondered why Article 15, on crew lists, had been included in the list of Articles that could be subject to progressive implementation. Since a paper and pencil were the minimum infrastructure required to compile a crew list, he wondered why that provision would need to be subject to progressive implementation. The information contained in crew lists could be vital for reasons of safety, particularly in case of accidents.
  94. The Chairperson pointed out that progressive implementation of Article 15 could be necessary in places where crews were illiterate, and thus unable to complete crew lists.
  95. The Employer member of the Netherlands said that illiteracy had indeed been the main reason for including Article 15 in the list of Articles for progressive implementation. If crews were literate, the provisions should be complied with. Where a crew list could be made, it should be made.
  96. The Government member of the Netherlands asked why Article 18, which stipulated the need for written labour contracts, had not been included in the list of Articles for progressive implementation, if illiteracy was being taken into account. There were no provisions in the Convention to ensure that those fishers who could not read their own labour contracts would have them explained orally by a third party.
  97. The Government member of the United States asked why paragraph 1 of Article 4 did not set out a time limit on progressive implementation. He wondered whether this might not lead to difficulties and uneven scrutiny by the Committee of Experts on the Application of Conventions and Recommendations when assessing Members’ implementation records. In his opinion, it was important that Members, at the time of ratification, would commit themselves to a specific time frame for the final implementation of the Convention.
  98. The Employer Vice-Chairperson explained that, following long discussions, his group and the Workers’ group had agreed it would not be practical to expect governments to predict with certainty an exact timetable for full implementation. They had wanted a plan to be submitted that would include targets and deadlines, but had realized that it might not be practical to require countries to set out targets and meet them, given that the goal was to protect the maximum number of fishers possible.
  99. The Worker Vice-Chairperson fully endorsed the Employer Vice-Chairperson’s statement; the original suggestion to require a ten-year time frame seemed to be too demanding in view of many countries’ weak medical infrastructure.
  100. The Government member of the United States refrained from proposing a subamendment in light of the statements made. His delegation had not strived for a specific number to be included, but had hoped that the provision could be amended in a way that required Members to commit themselves to a specific time frame at the time of ratification.

---

Although the intent behind the progressive implementation approach and the absence of timelines seemed to be to avoid constraining countries to commit themselves, commitment to its implementation was supposed to be precisely the idea behind the ratification of a Convention. He feared that a precedent was being established for other Conventions.

101. The Government member of New Zealand acknowledged the arguments put forward by the Worker and Employer Vice-Chairpersons. In his understanding, however, the concept of an implementation plan in paragraph 1 automatically comprised at least a rudimentary time frame.
102. The Employer Vice-Chairperson noted that his group and the Workers' group would expect plans to have time projections associated with the plan itself. Implementation would be evaluated on the basis of periodic reports.
103. The Committee adopted the amendment as subamended.
104. Article 4 was adopted as subamended.

## **Article 5**

105. Article 5 was discussed in conjunction with Annex I and both were adopted without amendment.

## **Part II. General principles**

### ***Implementation***

#### **Article 6**

106. Article 6 was adopted without amendment.

#### **Article 7**

107. Article 7 was adopted without amendment.

### ***Responsibilities of fishing vessel owners, skippers and fishers***

#### **Article 8**

##### **Subparagraph (2)(b)**

108. The Government member of the Philippines introduced an amendment, seconded by the Government member of Indonesia, to delete the words “, including prevention of fatigue”. As a hunting activity, fishing required flexible working hours as opportunities arose and it was inevitably tiring, so it was inappropriate to include a reference to preventing fatigue.
109. The Worker Vice-Chairperson could not accept the proposed amendment as it would weaken the text of the Convention. The Government member of Denmark could not

---

support the proposed amendment. The Government member of Greece could not support the proposed amendment, drawing attention to the proposed Article 14(2), which might address the concerns raised. The Government member of Spain said that measures for preventing fatigue needed to be incorporated into workplans, and he could not support the amendment. The Government member of the Islamic Republic of Iran said that fatigue prevention was essential for the safety of fishers, and he also could not support the proposed amendment.

110. The amendment was withdrawn.

### Paragraph 3

111. An amendment submitted by the Government member of Indonesia was not discussed as it was not seconded.

112. Article 8 was adopted without amendment.

## **Part III. Minimum requirements for work on board fishing vessels**

### *Minimum age*

#### **Article 9**

113. Article 9 was adopted without amendment.

### *Medical examination*

#### **Article 10**

114. The Employer Vice-Chairperson withdrew an amendment to paragraph 3 of Article 10.

115. Article 10 was adopted without amendment.

#### **Article 11**

116. An amendment to subparagraph (c) submitted by the Government member of China was not discussed as it was not seconded.

117. Article 11 was adopted without amendment.

#### **Article 12**

118. The Employer Vice-Chairperson withdrew an amendment to the introductory phrase of Article 12.

119. The Worker Vice-Chairperson introduced an amendment to insert the words “In addition to the requirements set out in Article 10 and Article 11,” at the beginning of Article 12. This was done in line with the Office comment in Report IV(2A) on the link between

---

Articles 11 and 12. The language clarified their relationship, and had been expanded by his group to include Article 10.

- 120.** The Employer Vice-Chairperson supported the amendment.
- 121.** The Government member of Argentina proposed subamending the amendment to read as follows: “Without prejudice to existing legislation”. The subamendment was seconded by the Government members of Uruguay and the Bolivarian Republic of Venezuela.
- 122.** The Employer Vice-Chairperson reiterated his support for the original amendment and opposed the subamendment. The rationale behind the original amendment had been to clarify, and not to change the substance of the original text. In his understanding the wording of the subamendment diminished the reference to Articles 10 and 11 and altered the meaning of the original amendment. This view was shared by the Worker Vice-Chairperson.
- 123.** The Government member of Argentina clarified that the intention of the subamendment was to introduce common legal wording; in view of the reactions to his subamendment, it was possible that the English and French translations might be misleading.
- 124.** In reply to a question, the representative of the Legal Adviser explained that text suggested in the Office commentary had intended to clarify that for a fishing vessel of 24 metres in length or greater, the provisions of Article 12 would apply, in addition to those of Articles 10 and 11. The Office had suggested the words “in addition to” because similar language had been used in other parts of the Convention. “Without prejudice” meant that the provisions were not affected, which was different.
- 125.** The Government members of Denmark, France, Lebanon, Namibia, Netherlands, Norway, Sweden and the Employers’ group did not support the subamendment.
- 126.** The subamendment was not adopted.
- 127.** The amendment was adopted.
- 128.** Article 12 was adopted as amended.
- 129.** During the Drafting Committee’s work on Article 12, it had been suggested that, in paragraph 1(b), the words “safety or” be added before the word “health”.
- 130.** Reporting back to the Committee, the Employer member of the Drafting Committee explained that the proposal aimed at addressing situations that might arise where a fisher who became unwell might not just endanger the health of other persons on board, but also represent a safety risk. The Worker member and Government member of the Drafting Committee supported the proposed change.
- 131.** The Chairperson, noting there was no objection, indicated that the instruction given to the Drafting Committee would be to include those words.
- 132.** The Government member of the Netherlands drew the Committee’s attention to Article 10, paragraph 2. He wondered why the wording in Article 12, paragraph 1(b), could not stay in line with this wording.
- 133.** The Employer Vice-Chairperson deemed these two provisions to have very different contexts; therefore, the wording suggested by the previous speaker did not satisfactorily

---

resolve their concern. The Worker Vice-Chairperson agreed with the Employer Vice-Chairperson's view.

134. The Chairperson confirmed that the mandate of the Drafting Committee was to add, in paragraph 1(b), the words "safety or" before the word "health".

## **Part IV. Conditions of service**

### ***Manning and hours of rest***

#### **Article 13**

##### **Subparagraph (a)**

135. The Government member of the Republic of Korea introduced an amendment, seconded by the Government member of Japan, to delete the words "sufficiently and" and replace the word "crew" with "sufficient number of fishers" in subparagraph (a). He explained that the meanings of the word "crew" and that of the word "fisher" were different. Whereas the words "fisher" and "skipper" were defined in Article 1 of the Convention, "crew" was not defined. Referring to the definitions of "officer" and "rating" in the Accommodation of Crews (Fishermen) Convention, 1966 (No. 126), he suggested that the meaning of "crew" could be interpreted to include officers and ratings and exclude the skipper. Regulation 2.7 of the Maritime Labour Convention, 2006, introduced provisions for manning levels, whereby all ships would have a sufficient number of seafarers to ensure that ships were operated safely, efficiently and with due regard to security. The meaning of "fisher" in the proposed text was similar to that of "seafarer" in the Maritime Labour Convention, 2006. The amendment was intended to clarify the language and to ensure coherence with the Maritime Labour Convention, 2006.
136. The Government member of Sweden supported the amendment.
137. The Government member of Greece agreed with the Government member of the Republic of Korea with respect to his interpretation of the Maritime Labour Convention, 2006. However, a difference existed between vessels under the scope of that Convention and fishing vessels under the scope of the Convention proposed. The term "fisher" related to practically all persons on board, whereas the term "crew" only covered those that were in charge of ensuring the vessel's safe navigation. In earlier discussions, it had been clear that Governments did not want to regulate how many "fishers" would need to be on board to ensure fishing operations; the administrations' only goal was to ensure safe navigation. Therefore, the text should stay unchanged.
138. The Government member of Denmark, recalling the discussions of the Committee on the Fishing Sector in 2004 and 2005, suggested that there had been agreement to use the word "crew", for the reasons put forward by Greece. He, therefore, did not support the amendment.
139. The Government member of the United Kingdom said that the word "crew" referred solely to those necessary for the safe operation of a vessel and it had implications for the interpretation of Article 15. The crew list was intended to cover all "fishers" on board, not just a subset of "fishers". She supported the amendment, as the term "crew" was not defined in the Convention and coherence needed to be ensured. The Government members of Iceland and the Netherlands endorsed the position of the Government member of the United Kingdom, and supported the amendment.

- 
140. The Government member of New Zealand suggested that the inclusion of the term “sufficiently” introduced a qualitative aspect. He agreed with the point made by the Government member of the Republic of Korea, but proposed a subamendment to keep the term “sufficiently and”, and to delete the words “sufficient number of” in the second part of the amendment. The Government members of Brazil, Canada and Japan supported the subamendment.
  141. The Government member of India suggested that the Convention use the same terminology throughout the text, in order to avoid confusion. If “crew” was retained, a definition for the word would be required.
  142. The Government member of China supported the original amendment as proposed by the Republic of Korea.
  143. The Government member of Greece opposed the subamendment and pointed out that if the word “crew” were replaced by “fishers” in Article 13, flag States would become obliged to establish not only manning levels for safe navigation, but also to regulate manning levels for fishing operations (such as catching and processing of fish). This was not within the ambit of administrations. He thanked the representative of the United Kingdom for having raised the issue of Article 15; that issue was, however, distinct from the problem faced by the Committee in relation to Article 13. It would be important to clarify that all “fishers”, not just the crew, should be included in the crew list dealt with in Article 15.
  144. The Government member of Namibia, speaking on behalf of the Africa group, said that he would also support the adoption of the original text of Article 13.
  145. The Government member of Norway supported the subamendment proposed by New Zealand. Article 13 referred to the obligation of the owner of the vessel to ensure that it was correctly manned; unlike Article 14, however, it did not require the competent authority to determine a minimum level of manning. Article 13 needed to be read in conjunction with Article 14.
  146. The Government member of the Netherlands said that competent authorities only established a minimum number of fishers on board and their qualifications to ensure the safety of navigation; anyone else on board the vessel was the responsibility of the shipowner. His delegation, therefore, supported the subamendment.
  147. In light of the discussion, the Chairperson suggested that both terms should be avoided. He proposed to delete the term “fishers” from the subamendment, so that the paragraph would read “their vessels are sufficiently and safely manned for the safe navigation and operation of the vessel and under the control of a competent skipper”.
  148. The Government members of Côte d’Ivoire, Greece, Republic of Korea, Lebanon and Sweden expressed their support for the Chairperson’s subamendment. It was also supported by the Employer and Worker Vice-Chairpersons.
  149. The amendment was adopted as subamended by the Chairperson.
  150. The Government member of Ecuador suggested that the Drafting Committee should look into the French and Spanish translation.
  151. Article 13 was adopted as amended.

---

## Article 14

- 152.** The amendment submitted by the Government member of the Philippines to replace in subparagraph 1(b) the sentence beginning “Minimum hours of rest” with the following sentence: “Minimum hours of rest shall follow existing applicable labour laws pertaining to periods of rest as determined by the competent authority”, was not seconded and therefore not discussed.
- 153.** The Government member of the Russian Federation introduced an amendment, seconded by the Government member of Sri Lanka, to increase minimum hours of rest per week from 77 to 84. The minimum hours of rest needed to be increased in view of the fact that work in the fishing sector was physically demanding.
- 154.** The Employer Vice-Chairperson stated that while Employers were, in principle, prepared to accept the need for adjustments, this was an issue that formed part of a package between themselves and the Workers’ group. Any country, however, was free to go beyond the minimum standards set out in the Convention, after consultations with the social partners.
- 155.** The Worker Vice-Chairperson stated that, under different circumstances, his group would have supported the proposed amendment. Given that they had, however, agreed on a text that was acceptable to both Employers and Workers, the Workers’ group could not support the proposed amendment.
- 156.** The amendment was not adopted.
- 157.** The Government member of Chile withdrew an amendment submitted by the Government members of Chile and Panama.
- 158.** The Employer Vice-Chairperson introduced the amendment to replace in paragraph 3, the words “provide at least the same level of protection” by “be substantially equivalent”. It resembled an amendment submitted by the Workers’ group. In order to simplify the discussion, his group suggested subamending its proposed amendment by adding the words “and shall not jeopardize the health of fishers” at the end of paragraph 3.
- 159.** The Worker Vice-Chairperson withdrew an amendment similar to the Employers’ group’s proposal. He supported the Employers’ group’s amendment, as subamended. He also supported a second amendment to be introduced by the Employers’ group.
- 160.** The Employer Vice-Chairperson introduced an amendment submitted by the Employers’ group to add at the end of Article 14, the following paragraph:
- Nothing in this Article shall be deemed to impair the right of the skipper of a vessel to require a fisher to perform any hours of work necessary for the immediate safety of the vessel, the persons on board or the catch, or for the purpose of giving assistance to other boats or ships or persons in distress at sea. Accordingly, the skipper may suspend the schedule of hours of rest and require a fisher to perform any hours necessary until the normal situation has been restored. As soon as practicable after the normal situation has been restored, the skipper shall ensure that any fishers who have performed work in a scheduled rest period are provided with an adequate period of rest.
- 161.** The amendment was simply an attempt by the social partners to establish readily identifiable circumstances under which the skipper might suspend the schedule of hours of rest until the normal situation had been restored.
- 162.** The Government members of Germany, Netherlands, Norway and the United Kingdom supported the amendments.

---

163. Article 14 was adopted as amended.

### ***Crew list***

#### **Article 15**

164. An amendment submitted by the Government member of the Republic of Korea to amend the heading of Article 15 was not seconded.

165. An amendment submitted by the Government member of the Republic of Korea was not seconded.

166. Article 15 was adopted without amendment.

### ***Fisher's work agreement***

#### **Article 16**

167. Article 16 was discussed in conjunction with Annex II. Both were adopted without amendment.

#### **Articles 17, 18 and 19**

168. Articles 17, 18 and 19 were adopted without amendment.

#### **Article 20**

169. The Worker Vice-Chairperson introduced an amendment to replace Article 20 with the following text:

It shall be the responsibility of the fishing vessel owner to ensure that each fisher has a written fisher's work agreement signed by both the fisher and the fishing vessel owner or by an authorized representative of the fishing owner (or, where the fishers are not employed or engaged by the fishing vessel owner, the fishing vessel owner shall have evidence of contractual or similar arrangements) providing them with decent work and living conditions on board the vessel as required by this Convention.

170. The amendment aimed at introducing private employment agencies into the Convention and had been agreed upon with the Employers' group.

171. Following a discussion in which the Government members of Ecuador, India and the Netherlands pointed out that small differences in wording existed between an amendment submitted by the Employers' group and an amendment proposed by the Workers' group, the Committee took up a suggestion made by the Government member of Norway to ask the Drafting Committee to reconcile the wording.

172. The Committee adopted the amendment.

173. Article 20 was adopted as amended.

---

## **Repatriation**

### **Article 21**

- 174.** The Employer Vice-Chairperson, introduced an amendment that sought to add at the end of Article 21, the following paragraph: “National laws and regulations shall not prejudice any right of the fishing vessel owner to recover the cost of repatriation under third-party contractual arrangements.”
- 175.** He explained that this paragraph needed to be adjusted, following the Committee’s decision to introduce private employment agencies. Since the fishing vessel owner continued to be responsible, it was important that he/she would be in a position to reclaim repatriation costs from a private employment agency, if such an agency were the true employer of the fisher repatriated.
- 176.** The Worker Vice-Chairperson withdrew an identical amendment submitted by his group in support of the Employers’ amendment.
- 177.** The Government member of Germany, speaking on behalf of the EU group, Iceland and Norway, supported the amendment as it was in line with similar provisions in the Maritime Labour Convention, 2006.
- 178.** The Government member of Namibia, speaking on behalf of the Africa group, supported the amendment since it was in accordance with the principles usually found in such contractual arrangements.
- 179.** The amendment was adopted.
- 180.** Article 21 was adopted as amended.

## **Recruitment and placement**

### **Article 22**

- 181.** The Employer Vice-Chairperson introduced an amendment that sought to add, at the end of Article 22, the following sub-heading and paragraphs:

*Private employment agencies*

4. A Member which has ratified the Private Employment Agencies Convention, 1997, may allocate certain responsibilities under this Convention to private employment agencies that provide the services referred to in paragraph 1(b) of Article 1 of that Convention. The respective responsibilities of any such private employment agencies and of the fishing vessel owners, who shall be the “user enterprise” for the purpose of that Convention, shall be determined and allocated, as provided for in Article 12 of that Convention.

5. Such a Member shall adopt laws, regulations or other measures to ensure that no allocation of the respective responsibilities or obligations to the private employment agencies providing the service and to the “user enterprise” pursuant to this Convention shall preclude the fisher from asserting a right to a lien arising against the fishing vessel under a Member’s relevant domestic law.

6. Notwithstanding paragraph 4, the fishing vessel owner shall still be liable in the event that the private employment agency defaults on its obligations to a fisher for whom, in the context of the Private Employment Agencies Convention, 1997, the fishing vessel owner is the “user enterprise”.

---

7. Nothing in this Convention shall be deemed to impose on a Member the obligation to allow the operation in its fishing sector of private employment agencies as referred to in paragraph 4 of this Article.

- 182.** The Employer Vice-Chairperson explained that the text proposed resulted from long discussions between his group and the Workers' group, and also took into account comments by Government members at the Round Table. Paragraph 7 had been added to clarify that the provisions would not erode a Government's right to decide whether it would allow private employment agencies to operate.
- 183.** The Worker Vice-Chairperson supported the Employers' group's amendment and withdrew an identical amendment. In addition, he proposed to delete the words "under a Member's relevant domestic law" at the end of paragraph 5.
- 184.** In response to a question by the Employers' group, the representative of the Legal Adviser explained that the deletion made the text clearer, since the reference to a Member's domestic laws was confusing given that a Member could only change its own domestic laws.
- 185.** The Employer Vice-Chairperson and the Government member of Germany, speaking on behalf of the EU group, Iceland and Norway, supported the amendment as subamended.
- 186.** The Government member of Ireland supported the subamendment, but sought clarification from the representative of the Legal Adviser. His delegation was reluctant to link directly the proposed Convention to the Private Employment Agencies Convention, 1997 (No. 181).
- 187.** The representative of the Legal Adviser explained that paragraph 4 only applied to a Member which had ratified the Private Employment Agencies Convention, 1997 (No. 181), and allowed that Member to allocate certain responsibilities under this Convention to private employment agencies. Were Ireland to ratify Convention No. 181, it would need to adapt its laws and regulations as provided for under paragraph 5, only if it also chose to allocate responsibilities as indicated under paragraph 4 to private employment agencies.
- 188.** The Government member of Greece asked whether a country that had not ratified Convention No. 181 could nevertheless take advantage of the provisions contained in the proposed amendment.
- 189.** The representative of the Legal Adviser replied that those provisions applied only to Members which had ratified the Private Employment Agencies Convention, 1997 (No. 181).
- 190.** The Chairperson observed that the Drafting Committee would need to have some guidance from the Committee on whether the new paragraphs, if adopted, would constitute a new Article or be incorporated into Article 22.
- 191.** The Employer Vice-Chairperson said his group had no preference.
- 192.** The Worker Vice-Chairperson said he preferred new paragraphs to be incorporated into Article 22.
- 193.** The Government member of Greece, supported by the Government member of the Libyan Arab Jamahiriya, suggested that the first two paragraphs of the amendment be combined and that the resulting three paragraphs be added to Article 22.

---

194. The amendment was adopted as subamended.

195. Article 22 was adopted as amended.

196. The Drafting Committee proposed adding the words “Recruitment and placement services” before paragraph 1, and the words “Private employment agencies” before the newly adopted paragraph 4. The Government member of Greece did not support the use of the words “services” and “agencies” in these titles because of the difficulties that such words had caused in the discussion of previous instruments. The Chairperson proposed replacing the first heading by the words “Recruitment and placement of fishers”. This was supported by the Employer Vice-Chairperson, the Worker Vice-Chairperson and the Government member of Greece, as well as by the other Committee members, and the new text was referred back to the Drafting Committee.

### ***Payment of fishers***

#### **Article 23**

197. The Employer Vice-Chairperson introduced the proposed amendment to insert the word “other” after the words “monthly or”. It reflected a suggestion made by the Office in Report IV(2A).

198. The Worker Vice-Chairperson said his group had no objection to the proposed amendment.

199. The amendment was adopted.

200. Article 23 was adopted as amended.

#### **Article 24**

201. Article 24 was adopted without amendment.

### **Part V. Accommodation and food**

#### **Articles 25 and 26**

202. Articles 25 and 26 were adopted without amendment.

#### **Article 27**

##### **Subparagraph (c)**

203. The Government member of Canada, speaking also on behalf of the Government member of the United States, introduced an amendment to replace the word “However” with “In accordance with national laws and regulations”. This was intended to clarify the text. The Government member of Namibia supported the amendment as did the Government member of Greece.

204. The Government member of Japan proposed a subamendment, seconded by the Government member of the Netherlands, to insert the word “Notwithstanding,” before the

---

words “In accordance with national laws and regulations”. The Worker Vice-Chairperson opposed the subamendment, preferring the use of the word “However”.

**205.** The Government member of Japan proposed a further subamendment, seconded by the Government member of the Netherlands, to insert the word “However” instead of the word “Notwithstanding”. The Employer Vice-Chairperson supported the text as further subamended, as did the Worker Vice-Chairperson. The Government members of Canada, Ecuador and Lebanon also agreed with the text as further subamended and it was adopted.

**206.** Article 27 was adopted as amended.

## **Article 28**

**207.** Article 28 was adopted without amendment.

## **Part VI. Medical care, health protection and social security**

### ***Medical care***

#### **Articles 29–30**

**208.** Articles 29–30 were adopted without amendment.

### ***Occupational safety and health and accident prevention***

#### **Articles 31–33**

**209.** Articles 31–33 were adopted without amendment.

### ***Social security***

#### **Articles 34–37**

**210.** Articles 34–37 were adopted without amendment.

### ***Protection in the case of work-related sickness, injury or death***

## **Article 38**

**211.** Article 38 was adopted without amendment.

---

## Article 39

### Paragraph 2

- 212.** The Government member of Canada withdrew an amendment.
- 213.** The Worker Vice-Chairperson withdrew an amendment.
- 214.** The Government member of Germany, on behalf of the EU group, Iceland and Norway, introduced an amendment to replace the words “a wilful act, default or misbehaviour” with “wilful misconduct of the fisher”, to be consistent with the Maritime Labour Convention, 2006.
- 215.** The Employer Vice-Chairperson did not oppose the amendment, but was concerned that the term “wilful misconduct” did not include connotations of default or negligence. He wished to record that the term should be interpreted as including connotations of default, wilful acts, misbehaviour and negligence. The degree to which any or all the elements were present would differ from case to case. He added that, if this was the interpretation of the term by the Committee, he would support the amendment.
- 216.** The Government member of Germany said that his understanding of the term “wilful misconduct” was the same as that of the Employers’ group.
- 217.** The amendment was adopted.
- 218.** The Government member of the Philippines withdrew an amendment.
- 219.** Article 39 was adopted as amended.
- 220.** Since the Employer Vice-Chairperson was concerned that his earlier intervention might have been misunderstood, he introduced a draft statement proposed by the Employers’ and Workers’ groups concerning the interpretation of the words “wilful misconduct”. He explained that his earlier, similar statement had been made for the purpose of the Committee’s adopting it as its interpretation of paragraph 2 of Article 39. The statement jointly put to the Committee read: “Notwithstanding other interpretations accepted by various international bodies, for the purpose of this Convention ‘wilful misconduct’ may include the separate concepts of ‘wilful act’, ‘default’ and ‘misbehaviour’. The degree to which any or all these elements bear on determining an issue of misconduct will depend on the facts of each case.”
- 221.** In response to a request for clarification, the Employer Vice-Chairperson pointed out that a meeting of the friends of the Chair had been held to address this point, which had included Government, Employer and Worker members. In view of the fact that Government members wanted to amend paragraph 2 of Article 39 to be in line with the wording used in the Maritime Labour Convention, 2006, but that the social partners did not want to change the provision substantially, the friends of the Chair had concluded that wording clarifying the interpretation needed to be read into the record. The draft statement represented wording that would be specific to this Convention and would not impact on the interpretation of other instruments.
- 222.** In response to a request for clarification by the Government members of Namibia and the Netherlands, the Legal Adviser noted that Report IV(2B) served as the basis for the Committee’s discussion. If a committee wanted to ensure that clarity existed on a specific provision, it could either seek legal advice or arrive at a clear consensus by the Committee as a whole on the meaning and interpretation of a particular provision.

- 
- 223.** In addition, the representative of the Legal Adviser made specific reference to the text of paragraph 771 in the Report of the Committee of the Whole of the International Labour Conference (Maritime Session) in 2006. In the text, it had been stated, among other things, that the word “wilful” implied an intention, which meant more than being negligent, and “misconduct” meant doing something which should not be done. Taken together, the words “wilful misconduct” implied at least the intentional doing of something with the knowledge that serious injury or illness was a probable result of the intentional act. Three elements were highlighted in the statement of the Employer Vice-Chairperson: “wilful act”, “default” and “misbehaviour”. A wilful act clearly included an element of intent. “Default” could be, but was not necessarily, intentional. While not a legal term, “misbehaviour” was seen to be more or less synonymous with “misconduct”. The fact that “default” and “misbehaviour” were not qualified could allow for non-intentional elements to fall under the proposed interpretation. In this regard, he suggested that the interpretation proposed by the Employer Vice-Chairperson was not fully compatible with that included in paragraph 771 of the Report of the Committee of the Whole of the International Labour Conference (Maritime Session) in 2006.
- 224.** The Employer Vice-Chairperson reminded the Committee that the text proposed in his statement, as well as the three elements addressed by the representative of the Legal Adviser, appeared in the original proposed Convention, and had been endorsed by a number of Government members, including EU Government members of the Committee. He suggested that, if the Convention had been adopted in 2005, delegates to the International Labour Conference (Maritime Session) would have sought to ensure that the interpretation of the relevant sections of the Maritime Labour Convention, 2006 was consistent with the language being proposed in his statement. Drawing a distinction with regard to the use of the term “default”, he suggested that there could be an omission that was not wilful, but that had the effect of injuring oneself or someone else. Such an instance could, in some cases, reduce the extent to which the vessel owner was liable. He noted that the records of the International Labour Conference (Maritime Session) showed that there was not full agreement on these concepts in the text of Regulation 4.2 on shipowners’ liability and reminded the Committee that the suggestion to have a separate statement to clarify the provision’s meaning in the context of the Work in Fishing Convention had been proposed in particular because it was aiming at not being incompatible with the interpretation given during the International Labour Conference (Maritime Session) discussions in 2006.
- 225.** The representative of the Legal Adviser explained that, although the same term could have different meanings under international law in different Conventions, ILO Conventions formed a body of international labour standards. If a term’s meaning differed from one Convention to the other, inconsistencies might appear and problems arise with respect to the application of the Conventions in national law.
- 226.** Following a short discussion, the Chairperson concluded that there was no clear endorsement for the Employers’ and Workers’ groups’ statement.

## **Part VII. Compliance and enforcement**

### **Article 40**

- 227.** Article 40 was adopted without amendment.

---

## Article 41

**228.** The Employer Vice-Chairperson introduced an amendment to replace Article 41 with the following text, reflecting guidance provided by the Office in Report IV(2A):

1. Members shall require that fishing vessels remaining at sea for more than three days, which are:

- (a) 24 metres in length and over; or
- (b) normally navigating at a distance exceeding 200 nautical miles from the coastline of the flag State or navigating beyond the outer edge of its continental shelf, whichever distance from the coastline is greater,

carry a valid document issued by the competent authority stating that the vessel has been inspected by the competent authority or on its behalf, for compliance with the provisions of this Convention concerning living and working conditions.

2. Such document shall be valid for a period of five years or, if issued on the same date as the International Fishing Vessel Safety Certificate, for the period of validity of that certificate.

**229.** The Worker Vice-Chairperson supported the amendment, and in so doing also withdrew the amendment submitted by the Worker members.

**230.** The Government member of Germany, speaking on behalf of the EU group, Iceland and Norway, supported the amendment.

**231.** The Government member of New Zealand proposed a subamendment to insert the words “which shall not exceed” after the word “period” in paragraph 2. The Government member of Denmark supported the subamendment, noting that it was in accordance with the text of the Maritime Labour Convention, 2006. The subamendment was adopted.

**232.** In reply to a request for clarification of the term “International Fishing Vessel Safety Certificate”, in paragraph 2 of the amendment, the Office explained that it derived from the Torremolinos Protocol of 1993 relating to the Torremolinos International Convention for the Safety of Fishing Vessels, 1977. Since the Torremolinos Protocol had not yet entered into force, the Chairperson added that this provision could also be interpreted to refer to a national safety certificate. The Government member of New Zealand requested that the term be clarified within the proposed new Convention. It was agreed to ask the Drafting Committee to look into whether a specific reference to the Torremolinos Protocol would be required.

**233.** The amendment was adopted.

**234.** The Government member of Malaysia proposed an amendment, supported by the Government member of the Philippines, to replace the word “five” by “two”, saying that there were occasions when safety concerns justified more frequent inspections.

**235.** The Employer Vice-Chairperson did not support the amendment on the grounds that the new wording for Article 41, just adopted, would be sufficient to meet such occasions. The Worker Vice-Chairperson also opposed the amendment, as did the Government member of Germany, speaking on behalf of the EU group, Iceland and Norway. The Government member of Greece pointed out that more frequent inspections would also be permitted by Article 40. The amendment was not adopted.

**236.** Article 41 was adopted as amended.

---

## Article 42

237. Article 42 was adopted without amendment.

## Article 43

### Paragraph 2

238. The Government member of Malaysia introduced an amendment, seconded by the Government member of Indonesia, to delete the words “, and may take measures necessary to rectify any conditions on board which are clearly hazardous to safety or health”. The amendment related to an amendment about to be introduced in connection with paragraph 3. The aim of both was to ensure that matters of non-compliance were addressed diplomatically.

239. The Government member of China supported the amendment.

240. The Worker Vice-Chairperson did not support the amendment; neither did the Government member of Germany, speaking on behalf of the EU group, Iceland and Norway. It was pointed out that the Office text was based on the Merchant Shipping (Minimum Standards) Convention, 1976 (No. 147). The Government member of Namibia, speaking on behalf of the Africa group, and the Government member of Lebanon, also opposed the amendment, as did the Employer Vice-Chairperson.

241. The amendment was not adopted.

242. The Employer Vice-Chairperson introduced an amendment to insert the words “from the crew or the crew’s representative” after “receives a complaint”, and to replace the word “standards” by “requirements”. He then subamended the first part of the amendment to read “from the appointed crew or crew’s representative”. It was reasoned that spurious complaints were to be avoided, so some limitation in the text was necessary.

243. The Worker Vice-Chairperson supported the second part of the amendment, but could not support the first part as subamended. The Government member of Namibia, speaking on behalf of the Africa group, also supported the second part of the amendment, but could not support the first part as subamended. The Government member of Germany, speaking on behalf of the EU group, Iceland and Norway, also opposed the amendment as subamended, pointing out that the Office text was consistent with that of the Maritime Labour Convention, 2006, and that the issue of complaints was dealt with adequately in Article 43.

244. The Employer Vice-Chairperson withdrew the amendment.

245. Paragraph 2 was adopted without amendment.

### Paragraph 3

246. The Government member of Malaysia introduced an amendment, seconded by the Government member of Indonesia, to replace paragraph 3 with the words “Upon receiving the report of the Member made in accordance with paragraph 2, the flag State of the vessel shall take the necessary measures to rectify any conditions on board that vessel which are clearly hazardous to safety or health”. This related to an earlier amendment to paragraph 2.

---

**247.** The Employer Vice-Chairperson opposed the amendment, as did the Worker Vice-Chairperson and the Government member of Germany, speaking on behalf of the EU group, Iceland and Norway. The amendment was not adopted.

**248.** Paragraph 3 was adopted without amendment.

#### Paragraph 4

**249.** The Employer Vice-Chairperson introduced an amendment to replace the words “or, generally, any person with an interest in the safety of the vessel, including an interest in safety or health hazards to the fishers on board” with “or any organizations that represent fishers or fishing vessel owners in matters relating to the safety and health of the vessel or of the fishers on board”. He then subamended the amendment to replace the word “any” with “appropriate” and to refer to the “safety of the vessel or of the safety and health of the fishers on board” instead of the wording of the original amendment.

**250.** The Worker Vice-Chairperson opposed the amendment and its subamended version, as did the Government members of France and Germany, who noted that the wording of the Office text was consistent with the provisions of the Maritime Labour Convention, 2006. The Government member of Namibia, speaking on behalf of the Africa group, did not support the amendment or the subamendment for the same reasons. The Government member of Spain opposed the use of the word “appropriate” in the amended text. The Government member of Greece said that, in practice, port authorities will investigate complaints whatever their source, while the Government member of the United States suggested that paragraph 5 was sufficient to address the Employers’ group’s concerns.

**251.** The Employer Vice-Chairperson withdrew the amendment.

**252.** Paragraph 4 was adopted without amendment.

#### Paragraph 5

**253.** The Government member of Malaysia introduced an amendment, seconded by the Government member of Indonesia, to delete paragraph 5, on the grounds that its provisions were addressed by the rest of the Article and were therefore redundant.

**254.** The Employer Vice-Chairperson did not support the amendment; neither did the Worker Vice-Chairperson. The Government member of Germany, speaking on behalf of the EU group, Iceland and Norway, also opposed the amendment, as did the Government member of the Islamic Republic of Iran. The amendment was not adopted.

**255.** Paragraph 5 was adopted without amendment.

**256.** Article 43 was adopted without amendment.

#### **New Article after Article 43**

**257.** The Government member of New Zealand introduced an amendment, which was seconded by the Government members of the United States and Uruguay, and sought to insert the following five new Articles after Article 43:

Each Member who grants a licence to enable a fishing vessel flying the flag of another State to fish in its exclusive economic zone, whether as part of its domestic fishing operation or to fish the surplus of the Member’s allowable catch within the meaning of Article 62 of the

---

United Nations Convention on the Law of the Sea, 1982, may require compliance with any or all of the requirements of this Convention in respect of the fishing vessel or fishers.

The above Article applies notwithstanding any exemption, dispensation or progressive implementation provision applying to any category of fisher or fishing vessel by the flag State in accordance with this Convention.

Each Member who grants such a licence may also require more favourable conditions than those provided for in this Convention and may maintain such a requirement for such conditions notwithstanding any exemption, dispensation or progressive implementation provision applying to any category of fisher or fishing vessel by the flag State in accordance with this Convention.

Each Member in granting such a licence and maintaining such a licence may have regard to certificates or other valid documentation issued for the purposes of this Convention by the competent authority or on its behalf.

Nothing in this Convention affects the right of any Member to regulate the entry into and stay in its exclusive economic zone or its territory of any foreign national in accordance with national laws, regulations or other measures.

**258.** In response to a request for clarification, the representative of the Legal Adviser recalled that, during the Government group meeting, three questions had been asked by the Government member of New Zealand in connection with the issues addressed by the proposed new Articles. As to the first question, whether there were any provisions in the Convention that required to be enforced or applied by a State party other than in its capacity as a flag State, he explained that no such provisions existed. Under Article 40, ensuring compliance with the Convention was an obligation of the flag State. In its capacity as a port State a Member could exercise jurisdiction as provided in paragraph 2 of Article 43 but this was not an obligation, as followed from the word “may” in that provision. Article 44 merely sought to ensure that Members did not exercise their jurisdiction in a discriminatory manner. The second question asked had been whether the Convention contained provisions that a Member could in its discretion enforce or apply other than in its capacity as a flag State. The relevant provisions were again paragraphs 2–5 of Article 43 concerning port State control, which were based on similar provisions contained in the Merchant Shipping (Minimum Standards) Convention, 1976 (No. 147). The Maritime Labour Convention, 2006, and several Conventions of the IMO also contained provisions on port State control. As to the possibility for a Member to ensure compliance with the standards of this Convention in its exclusive economic zone, the Office had consulted the United Nations Office of Legal Affairs, Division for Ocean Affairs and the Law of the Sea, among other things on the compatibility of Paragraph 53 of the proposed Recommendation (which was similar to the first new Article proposed in the amendment) with UNCLOS. The advice received was, in essence, that the matters dealt with by the proposed fishing Convention could possibly qualify as matters that can be regulated by the coastal State in accordance with Article 62(4) of UNCLOS, since the list contained in that provision was not exhaustive. In response to the third question, the representative of the Legal Adviser stated that there were no provisions in the proposed Convention that could have the effect of limiting what a Member may do in regulating the activities of foreign vessels. While ILO Conventions never prevented Members from adopting higher standards nationally, it was important to bear in mind that there were different schools of thought on the question of how far port State jurisdiction over foreign vessels goes when it is not based on specific treaty provisions.

**259.** The Employer Vice-Chairperson said that he appreciated that a coastal State could take whatever decision it wished in respect of the fishing rights it accorded to foreign vessels, but that it would be important that measures taken would not be construed to be unjustified non-tariff barriers for trade.

- 
- 260.** The Government member of Japan opposed the amendment: his delegation found the problems that the proposed amendment might raise in terms of port State control somewhat disquieting. A provision with such wide-reaching consequences should not be introduced at such a late stage. The Government member of Malaysia shared this view.
- 261.** The Government member of the Philippines observed that the point had already been made that the provisions of the Convention should prevail over national laws. It would be more appropriate for States to enter into bilateral agreements, if they so wished.
- 262.** The Worker Vice-Chairperson and the Government member of the Libyan Arab Jamahiriya deemed that there was not enough time to debate such a complex issue.
- 263.** The Government member of New Zealand, in light of the clarification provided by the representative of the Legal Adviser, withdrew the amendment.

## **Article 44**

- 264.** The Government member of Malaysia introduced an amendment, seconded by the Government member of Indonesia, to delete Article 44 in its entirety. He argued that under certain circumstances the no-more-favourable-treatment provision in Article 44 could be misused for retaliation measures.
- 265.** The Employer and Worker Vice-Chairpersons opposed the amendment. The Worker Vice-Chairperson added that no-more-favourable-treatment was a long-established principle and needed to be retained in the Convention.
- 266.** The Government member of China deemed that the implications of deleting the Article were likely to be adverse, and asked whether the existing wording was the same as that of the Maritime Labour Convention, 2006, or more restrictive.
- 267.** The representative of the Legal Adviser stated that the Article was similar to Article V, paragraph 7, of the Maritime Labour Convention, 2006, which read “Each Member shall implement its responsibilities under this Convention in such a way as to ensure that the ships that fly the flag of any State that has not ratified this Convention do not receive more favourable treatment than the ships that fly the flag of any State that has ratified it.”. It was intended to prevent Members having ratified the Convention being discriminated against.
- 268.** The Government member of Germany, on behalf of the EU group, Iceland and Norway, opposed the amendment.
- 269.** The amendment was not adopted.
- 270.** Article 44 was adopted without amendment.

## **Part VIII. Amendment of Annexes I, II and III**

### **Article 45**

- 271.** Article 45 was adopted without amendment.

---

## **Part IX. Final provisions**

### **Article 46**

272. Article 46 was adopted without amendment.

### ***Entry into force***

273. As regards the entry-into-force provision, the Chairperson proposed that the Committee could use wording similar to that of the Article which the Conference Drafting Committee had sent to the plenary at the 93rd Session of the Conference in 2005, as follows:

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Director-General.
2. It shall come into force 12 months after the date on which the ratifications of ten Members, eight of which are coastal States, have been registered with the Director-General.
3. Thereafter, this Convention shall come into force for any Member 12 months after the date on which its ratification is registered.

274. The Committee adopted the Chairperson's proposal. The Legal Adviser explained that the Conference Drafting Committee would take the Committee's decision into account when preparing the final provisions.

275. The Committee adopted the proposed Convention as amended.

### **Annex I**

276. Annex I was adopted without amendment.

### **Annex II**

277. Annex II was adopted without amendment.

### **Annex III**

### ***Fishing vessel accommodation***

### ***General provisions***

Paragraphs 1–6

278. Paragraphs 1–6 were adopted without amendment on the understanding that the Drafting Committee would take a final decision on the placing of subparagraphs (h) and (i) of Article 1.

---

## Paragraph 7

**279.** The Government member of Japan introduced an amendment on behalf of the Employer members, the Worker members and the Government members of Iceland, India, Indonesia, Japan, Malaysia, Sri Lanka, Thailand, Togo and Viet Nam:

- to insert “44, 48, 50” after “42” and insert “58, 59” after “56” in the introductory part of paragraph 7;
- to replace “55” with “75” in subparagraph (a);
- to replace “175” with “300” in subparagraph (b); and
- to replace “700” with “950” in subparagraph (c).

**280.** The Government member of Japan explained that the new equivalence figures, if agreed, would help Japan to ratify the proposed Convention. The Government members of Brazil, China, Lebanon, and Namibia, on behalf of the Africa group, all supported the amendment.

**281.** Paragraph 7 was adopted as amended.

## ***Planning and control***

### Paragraph 8

**282.** The Worker Vice-Chairperson introduced an amendment to replace the words “for a vessel that changes the flag it flies to the flag of the Member, or when the crew accommodation of a vessel is substantially altered” with “when the crew accommodation of a vessel is substantially altered and, for a vessel that changes the flag it flies to the flag of the Member, require compliance with those requirements of this Annex that are applicable in accordance with paragraph 1 of this Annex”. The amendment was intended to ensure greater clarity in the text.

**283.** The Employer Vice-Chairperson supported the amendment and it was adopted.

**284.** Paragraph 8 was adopted as amended.

### Paragraph 9

**285.** Paragraph 9 was adopted without amendment.

### Paragraph 10

**286.** The Worker Vice-Chairperson introduced an amendment to replace the first sentence with the following:

For vessels of 24 metres in length and over, on every occasion the crew accommodation of the fishing vessel has been reconstructed or substantially altered, the competent authority shall inspect the accommodation for compliance with the requirements of this Convention, and when the vessel changes the flag it flies to the flag of the Member, for compliance with those requirements of this Annex that are applicable in accordance with paragraph 1 of this Annex.

**287.** The Employer Vice-Chairperson supported the amendment and it was adopted.

**288.** Paragraph 10 was adopted as amended.

---

New paragraph after paragraph 10

**289.** The Government member of Japan introduced an amendment on behalf of the Employer members, the Worker members and the Government members of Brazil, Iceland, India, Indonesia, Japan, Malaysia, Sri Lanka, Thailand, Togo and Viet Nam, to insert the following paragraph after paragraph 10: “When a vessel changes flag, any alternative requirements which the competent authority of the Member whose flag the ship was formerly flying may have adopted in accordance with relevant paragraphs of this Annex cease to apply to the vessel.” The amendment was adopted.

**290.** The new paragraph after paragraph 10 was adopted.

***Design and construction***

Headroom

Paragraph 11

**291.** Paragraph 11 was adopted without amendment.

Paragraph 12

**292.** The Government member of Japan introduced an amendment on behalf of the Employer members, the Worker members and the Government members of Brazil, Iceland, India, Indonesia, Japan, Malaysia, Sri Lanka, Thailand, Togo and Viet Nam to delete the sentence “The competent authority may permit some limited reduction in headroom in any space, or part of any space, in such accommodation where it is satisfied that such reduction is reasonable, and will not result in discomfort to the fishers.”. The amendment was adopted.

**293.** Paragraph 12 was adopted as amended.

New paragraph after paragraph 12

**294.** The Government member of Japan introduced an amendment on behalf of the Employer members, the Worker members and the Government members of Brazil, Iceland, India, Indonesia, Japan, Malaysia, Sri Lanka, Thailand, Togo and Viet Nam to insert the following paragraph after paragraph 12: “Notwithstanding paragraph 12, the competent authority may, after consultation, decide that the minimum permitted headroom shall not be less than 190 centimetres in any space – or part of any space – in such accommodation, where it is satisfied that this is reasonable and will not result in discomfort to the fishers.”

**295.** The Government member of Japan explained that there were alternative requirements to the adopted paragraph 12 which should only be introduced by competent authorities after consultation. The amendment was adopted.

**296.** The new paragraph after paragraph 12 was adopted.

Openings into and between  
accommodation spaces

Paragraphs 13–14

**297.** Paragraphs 13–14 were adopted without amendment.

---

Insulation

Paragraph 15

**298.** Paragraph 15 was adopted without amendment.

Other

Paragraphs 16–17

**299.** Paragraphs 16–17 were adopted without amendment.

## ***Sanitary accommodation***

### Amended heading after paragraph 50

**318.** The Government member of Japan introduced an amendment on behalf of the Employer members, the Worker members and the Government members of Brazil, Iceland, India, Indonesia, Japan, Malaysia, Sri Lanka, Thailand, Togo and Viet Nam to replace the heading “Sanitary accommodation” after paragraph 50 with “Tubs or showers, toilets and washbasins”, for the sake of clarity. The amendment was adopted.

**319.** The amended heading after paragraph 50 was adopted.

### Paragraph 51

**320.** Paragraph 51 was adopted without amendment.

### Paragraph 52

**321.** The Employer Vice-Chairperson introduced an amendment to delete the words “used by women fishers” on the basis of gender equality and to avoid discrimination. The Worker Vice-Chairperson supported the amendment and it was adopted.

**322.** Paragraph 52 was adopted as amended.

### Paragraphs 53–56

**323.** Paragraphs 53–56 were adopted without amendment.

### New paragraph after paragraph 56

**324.** An amendment to insert a new paragraph after paragraph 56 was withdrawn.

**325.** The Government member of Japan introduced an amendment submitted by the Employer members, the Worker members and the Government members of Brazil, Iceland, India, Indonesia, Japan, Malaysia, Sri Lanka, Thailand, Togo and Viet Nam to insert the following paragraph after paragraph 56: “Notwithstanding paragraph 56, the competent authority may, after consultation, decide that there shall be provided at least one tub or shower or both and one washbasin for every six persons or fewer, and at least one toilet for every eight persons and fewer, where it is satisfied that this is reasonable and will not result in discomfort to the fishers.” He stated that this alternative requirement for tubs, showers, washbasins and toilets was only to be introduced after consultations.

**326.** The Government member of the Netherlands said that the phrase “at least one toilet for every eight persons and fewer” read “at least one toilet for every eight persons or fewer” in the French and Spanish versions. The Employer Vice-Chairperson proposed a subamendment to replace the phrase “every eight persons and fewer” by “every eight persons or fewer”.

**327.** The Worker Vice-Chairperson supported the subamendment and it was adopted.

**328.** The amendment, as subamended, was adopted.

**329.** The new paragraph after paragraph 56 was adopted.

---

### ***Laundry facilities***

Paragraphs 57–59

330. Paragraphs 57–59 were adopted without amendment.

### ***Facilities for sick and injured fishers***

Paragraphs 60–61

331. Paragraphs 60–61 were adopted without amendment.

### ***Other facilities***

Paragraph 62

332. Paragraph 62 was adopted without amendment.

### ***Bedding, mess utensils and miscellaneous provisions***

Paragraph 63

333. Paragraph 63 was adopted without amendment.

### ***Recreational facilities***

Paragraph 64

334. Paragraph 64 was adopted without amendment.

### ***Communication facilities***

Paragraph 65

335. Paragraph 65 was adopted without amendment.

### ***Galley and food storage facilities***

Paragraphs 66–71

336. Paragraphs 66–71 were adopted without amendment.

### ***Food and potable water***

Paragraphs 72–73

337. Paragraphs 72–73 were adopted without amendment.

---

## ***Clean and habitable conditions***

### Paragraph 74

**338.** The Employer Vice-Chairperson proposed an amendment to insert the words “or for their safety or rescue” at the end of the paragraph. He explained that safety or rescue equipment was not usually fishers’ personal property, but that it should nevertheless be available within their accommodation. The paragraph required that accommodation be kept free from goods and stores that were not the personal property of the occupants, which might exclude safety and rescue equipment, so this exception was necessary. The Worker Vice-Chairperson supported the amendment, as did the Government member of the Islamic Republic of Iran, and it was adopted.

**339.** Paragraph 74 was adopted as amended.

### Paragraphs 75–76

**340.** Paragraphs 75–76 were adopted without amendment.

## ***Inspections by the skipper or under the authority of the skipper***

### Paragraph 77

**341.** Paragraph 77 was adopted without amendment.

## ***Variations***

### Paragraph 78

**342.** Paragraph 78 was adopted without amendment.

**343.** Annex III was adopted as amended.

## **Consideration of the proposed Recommendation concerning work in the fishing sector**

### **Preamble**

**344.** The Worker Vice-Chairperson introduced an amendment to insert the following Paragraph: “Noting the Vocational Training (Fishermen) Recommendation, 1966, and”, between the second and the third paragraphs of the Preamble. He explained that this Recommendation of 1966 was an important reference source in the context of the proposed Recommendation.

**345.** The Employer Vice-Chairperson supported the amendment, as did the Government member of Norway on behalf of all Government members in the Committee. The amendment was adopted.

**346.** The Preamble was adopted as amended.

---

## **Part I. Conditions for work on board fishing vessels**

### ***Protection of young persons***

Paragraphs 1–5

**347.** Paragraphs 1–5 were adopted without amendment.

### ***Medical examination***

Paragraphs 6–10

**348.** Paragraphs 6–10 were adopted without amendment.

### ***Competency and training***

Paragraph 11

**349.** Paragraph 11 was adopted without amendment.

## **Part II. Conditions of service**

### ***Record of service***

Paragraph 12

**350.** Paragraph 12 was adopted without amendment.

### ***Special measures***

Paragraph 13

**351.** Paragraph 13 was adopted without amendment.

### ***Payment of fishers***

Paragraphs 14–15

**352.** Paragraphs 14–15 were adopted without amendment.

New paragraph after paragraph 15

**353.** The Worker Vice-Chairperson withdrew an amendment to introduce a new Paragraph after Paragraph 15.

## **Part III. Accommodation**

Paragraphs 16–18

**354.** Paragraphs 16–18 were adopted without amendment.

---

## ***Design and construction***

Paragraphs 19–21

355. Paragraphs 19–21 were adopted without amendment.

## ***Noise and vibration***

Paragraphs 22–23

356. Paragraphs 22–23 were adopted without amendment.

## ***Heating***

Paragraph 24

357. Paragraph 24 was adopted without amendment.

## ***Lighting***

Paragraph 25

358. Paragraph 25 was adopted without amendment.

## ***Sleeping rooms***

Paragraphs 26–29

359. Paragraphs 26–29 were adopted without amendment.

## ***Sanitary accommodation***

Paragraphs 30–32

360. Paragraphs 30–32 were adopted without amendment.

## ***Recreational facilities***

Paragraph 33

361. Paragraph 33 was adopted without amendment.

## ***Food***

Paragraph 34

362. Paragraph 34 was adopted without amendment.

---

## **Part IV. Medical care, health protection and social security**

### ***Medical care on board***

Paragraphs 35–39

**363.** Paragraphs 35–39 were adopted without amendment.

### ***Occupational safety and health***

Research, dissemination of information and consultation

Paragraphs 40–44

**364.** Paragraphs 40–44 were adopted without amendment.

Occupational safety and health management systems

Paragraph 45

**365.** Paragraph 45 was adopted without amendment.

Risk evaluation

Paragraph 46

**366.** Paragraph 46 was adopted without amendment.

Technical specifications

Paragraphs 47–48

**367.** Paragraphs 47–48 were adopted without amendment.

Establishment of a list of occupational diseases

Paragraph 49

**368.** Paragraph 49 was adopted without amendment.

Social security

Paragraphs 50–52

**369.** Paragraphs 50–52 were adopted without amendment.

## **Part V. Other provisions**

New Paragraph before Paragraph 53

**370.** The Government member of Japan introduced an amendment, seconded by the Government members of Lebanon and Namibia, to insert the following Paragraph before Paragraph 53: “The competent authority should develop an inspection policy for

---

authorized officers to take the measures referred to in paragraph 2 of Article 43 of the Convention. Members should cooperate with each other to the maximum extent possible in the adoption of internationally agreed guidelines on the abovementioned policy.” Such a policy was necessary in order to achieve fair and transparent port State control, and it should be developed in cooperation with other competent authorities so as to ensure harmonization across member States. There was a similar provision in the Maritime Labour Convention, 2006, Guideline B5.2.1.

**371.** The Government member of Norway, speaking on behalf of all Government members in the Committee, supported the amendment, as did both the Employer Vice-Chairperson and the Worker Vice-Chairperson.

**372.** The Government member of the Philippines proposed a subamendment that included a reference to inspection procedures, but the subamendment was not seconded so it was not accepted.

**373.** The amendment was adopted.

**374.** The proposed new Paragraph before Paragraph 53 was adopted.

#### Paragraph 53

**375.** Paragraph 53 was adopted without amendment.

#### New Paragraph after Paragraph 53

**376.** The Government member of Germany, speaking on behalf of the EU group, Iceland and Norway, withdrew an amendment to introduce a new Paragraph after Paragraph 53.

**377.** The proposed Recommendation was adopted as amended.

### Consideration of draft resolutions

**378.** The representative of the Secretary-General explained the usual procedure for dealing with resolutions that were adopted by Conference committees. All such resolutions are referred to the Governing Body meeting in November of the same year for consideration under a standing item on its agenda. Particularly for resolutions with financial implications, the Governing Body is invited to decide on such implications, following the recommendation of its Programme, Financial and Administrative Committee.

**379.** The Government member of Indonesia introduced a draft resolution, seconded by the Government member of Japan, which concerned technical cooperation and the promotion of the proposed Work in Fishing Convention. The draft resolution was similar to a second draft resolution, submitted by the Workers’ group, which also concerned technical cooperation and was more comprehensive than the first. The Committee decided to proceed with the second draft resolution and the first was withdrawn.

**380.** The second draft resolution was introduced by a Worker member and read:

The General Conference of the International Labour Organization,

Having adopted the Work in the Fishing Sector Convention, 2007,

Noting that the success of the Convention will depend upon its being widely ratified, with the effective implementation of its requirements,

---

Mindful that the mandate of the Organization includes the promotion of decent work and living conditions;

Invites the Governing Body of the International Labour Office to request the Director-General to give due priority to conducting tripartite work so as to help ensure the effective implementation of the Convention,

Further invites the Governing Body to request the Director-General to give due access to the resources of the Organization's technical cooperation programme to promote the ratification of the Convention and to assist members requesting assistance in its implementation in such areas as:

- technical assistance for Members, including capacity building for national administrations as well as representative organizations of fishing vessel owners and fishers, and the drafting of national legislation to meet the requirements of the Convention;
- the development of guidelines to establish national action plans for progressive implementation of relevant provisions of the Convention;
- the development of training materials for inspectors and other staff;
- the training of inspectors;
- the development of promotional materials and advocacy tools for the Convention;
- national and regional seminars, as well as workshops on the Convention; and
- promoting the ratification and implementation of the Convention within ILO Decent Work Country Programmes.

**381.** The Government member of Norway, speaking on behalf of the Government group, proposed an amendment to the draft resolution, as follows:

- that the first operative paragraph be replaced by the text: “Invites the Governing Body of the International Labour Office to give due priority to conducting tripartite work to develop guidelines for flag State implementation and the development of guidelines to establish national action plans for progressive implementation of relevant provisions of the Convention,”;
- that the chapeau of the second operative paragraph be replaced by the text: “Further invites the Governing Body to request the Director-General to give due consideration in the programme and budget to technical cooperation programmes to promote the ratification of the Convention and to assist Members requesting assistance in its implementation in such areas as:”; and
- that the second bullet point in the second operative part be deleted.

**382.** Reference to the “Work in the Fishing Sector Convention” in the draft resolution was changed to the “Work in Fishing Convention” as the correct title of the proposed instrument.

**383.** The draft resolution, as amended, was supported by the Committee and was adopted.

**384.** The Government member of Greece, also on behalf of the Workers' group, submitted a draft resolution which concerned port State control and aimed at achieving greater international harmonization in this area. The draft resolution read:

The General Conference of the International Labour Organization,

Having adopted the Work in the Fishing Sector Convention, 2007,

Considering that this Convention aims to establish a new pillar of international legislation for the fishing industry,

---

Mindful of the mandate of the Organization to promote decent work and living conditions,

Noting that sustainable development consists of three pillars: social, economic and environmental,

Noting Articles 43 and 44 of the adopted Convention, which provide for port State responsibilities and control under the terms of “no more favourable treatment”,

Noting that the uniform and harmonized implementation of port State responsibilities in accordance with the relevant provisions of the Convention will contribute to the successful implementation of the Convention,

Considering that, given the global nature of the fishing industry, it is important for port State control officers to receive proper guidelines for the performance of their duties,

Recognizing the work done by the International Maritime Organization (IMO) and the Food and Agriculture Organization of the United Nations (FAO) in this area, and the importance that the international community attaches to cooperation among international agencies;

Invites the Governing Body of the International Labour Office to request the Director-General to convene a tripartite expert meeting of the fishing sector to develop suitable guidance for port State control officers and to request that the Office secure the technical expertise of the IMO and FAO and other relevant international bodies in this regard.

- 385.** The Employer Vice-Chairperson strongly supported the draft resolution, saying that transparent and non-discriminatory port State control was essential in implementing the proposed Convention.
- 386.** The Government member of Norway, speaking on behalf of the Government group, proposed an amendment to the operative paragraph of the draft resolution, to insert the words: “concerning the relevant provisions of the Work in Fishing Convention, 2007” after the words “port State control officers”.
- 387.** On the advice of the representative of the Legal Adviser, the Chairperson proposed a further amendment to the operative paragraph to delete the words “to request the Director-General” and to replace the word “secure” with “seek”, bringing the paragraph into line with Office procedures. Reference to the “Work in the Fishing Sector Convention” was changed to the “Work in Fishing Convention”.
- 388.** The draft resolution, as amended, was supported by the Committee and was adopted.
- 389.** The Workers’ group and the Government member of South Africa submitted a draft resolution concerning tonnage measurement and accommodation. A Worker member introduced the draft resolution, explaining that its aim was to ensure that Annex III of the proposed Convention should be kept up to date with any changes in IMO guidelines on tonnage measurement. The draft resolution read:

The General Conference of the International Labour Organization,

Having adopted the Work in the Fishing Sector Convention, 2007,

Noting the difficulties caused by making an equivalence between the measurement of the size of vessels in terms of length and gross tonnage and the impact it has in the fishing industries,

Recognizing the impact the International Convention on Tonnage Measurement of Ships, 1969, has on the safe design of vessels, including their accommodation,

Recognizing also the importance of accommodation for the provision of decent work for fishers,

---

Recalling the resolution concerning tonnage measurement and the accommodation of crews adopted by the 29th Session of the Joint Maritime Commission, which was endorsed by the Governing Body of the International Labour Office at its 280th Session,

Aware that the International Maritime Organization (IMO) is considering the effects of the International Convention on Tonnage Measurement of Ships, 1969, on ship safety, accommodation, safety, health and welfare, and port charges;

Invites the Governing Body to request the Director-General to monitor these developments and to evaluate any amendment to or interpretation agreements of the International Convention on Tonnage Measurement of Ships, 1969, which may have an impact on the Work in the Fishing Sector Convention, 2007, especially on Annex III;

Invites the Governing Body to request the Director-General to report to it any developments which may have an impact on the Work in the Fishing Sector Convention, 2007, especially on Annex III,

Further invites the Governing Body to act on such a report by requesting the Director-General to give due priority to convening a tripartite meeting of experts, as provided for in Article 45 of the Work in the Fishing Sector Convention, 2007, to address the matter with a view to maintaining the relevance of Annex III of that Convention.

- 390.** The Employer Vice-Chairperson supported the draft resolution.
- 391.** As with the previous draft resolutions, reference to the “Work in the Fishing Sector Convention” was changed to the “Work in Fishing Convention”.
- 392.** The Government member of Germany, speaking on behalf of the EU group, requested clarification of the relationship between the draft resolution and Article 45 of the proposed Convention, to which it referred. The representative of the Legal Adviser described the procedure that could lead up to the adoption of an amendment to Annex III of the Convention, as it appeared when the final paragraph of the draft resolution was seen in conjunction with its preceding paragraphs and Article 45. While the wording of the draft resolution was not very precise, it was sufficiently clear when put in context.
- 393.** The Government member of Canada proposed an amendment, seconded by the Government member of the United Kingdom, firstly to replace the word “endorsed” with “noted” in the fifth preambular paragraph, and secondly to add the words “if required” after the word “priority” in the last operative paragraph.
- 394.** The Chairperson proposed deleting, in the last operative paragraph, the words “requesting the Director-General”, bringing the resolution into line with Office procedures. Other minor textual changes were made to the same paragraph so that it now read: “Further invites the Governing Body to act on such a report by giving due priority if required to convening a tripartite meeting of experts, as provided for in Article 45 of the Work in Fishing Convention, 2007, to address the matter with a view to maintaining the relevance of Annex III of that Convention.”
- 395.** Both parts of the amended text were agreed to by the Committee, as were other changes.
- 396.** The draft resolution was adopted as amended.
- 397.** A Worker member introduced a draft resolution concerning the welfare of fishers, which had been submitted by the Workers’ group and which read:

The General Conference of the International Labour Organization,  
Having adopted the Work in the Fishing Sector Convention, 2007,

---

Recognizing that the provision of adequate social protection and social security for all is a universally accepted development goal,

Acknowledging the specific nature of the fishing industry and the fact that fishers require special protection;

Invites the Governing Body of the International Labour Office to request the Director-General, in a cost-effective manner, to address the following social issues related to fisheries:

- promotion of the provision of effective social protection and social security to all fishers within the ongoing work of the Organization so as to secure effective social protection for all;
- the particular employment problems that are faced by women in the fishing industry, including discrimination and the barriers to access to employment in the industry;
- the causes of occupational diseases and injuries in the fishing sector;
- the need to encourage member States to strongly ensure that fishers on fishing vessels in their ports are able to have access to fishers' and seafarers' welfare facilities;
- the need to provide member States and social partners with advice on developing strategies to improve the retention of fishers and the recruitment and retention of new entrants in fisheries; and
- the education of fishers and their families, by the allocation of resources to, and by working together with, appropriate bodies for the prevention of HIV/AIDS among fishers and in fishing communities.

**398.** The intention of the draft resolution was to ensure that the Office continued to give priority to the fishing sector in its work programmes.

**399.** The Government member of Germany, speaking on behalf of the EU group and Norway, proposed an amendment to replace the word “address” in the chapeau of the last operative paragraph with the words “consider as appropriate”, since the second bullet point in particular was not a major issue for the EU.

**400.** The Government member of India submitted another amendment, seconded by the Workers' group, to insert a new bullet point after the fifth bullet point to read “the need to address issues relating to migrant fishers”. This was subamended by the Government member of the United Kingdom to refer only to “issues relating to migrant fishers”, since the need to address them was now covered by the proposed new wording of the chapeau. The Government member of the United Arab Emirates proposed a further subamendment to insert the words “or temporary” between “migrant” and “fishers”, but this subamendment was not seconded and so not pursued.

**401.** The Employer Vice-Chairperson supported the draft resolution as amended, as did the Workers' group.

**402.** In reply to a request by the Government member of the United States for clarification of the fifth bullet point, a Worker member explained that there were shortages of qualified fishers in some parts of the world and the Office might be able to assist member States in that respect.

**403.** The Government member of New Zealand submitted an amendment to the last bullet point to delete the words “allocation of resources to” and to insert at the end of the paragraph the words “as part of its ongoing programme and budget”. The Employer Vice-Chairperson supported the amendment. The Worker Vice-Chairperson supported deletion of the words “allocation of resources to” but could not support insertion of the word “ongoing” at the end of the last bullet point. The final part of the amendment was subamended to read “as part of its programme and budget”.

---

404. Reference to the “Work in the Fishing Sector Convention” in the draft resolution was changed to the “Work in Fishing Convention” as the correct title of the proposed instrument.

405. The draft resolution was adopted as amended.

## Adoption of the report

406. The Reporter congratulated the Committee on the constructive spirit in which it had carried out its work and its determination to reach a consensus. The tripartite consultations and discussion since 2005 had been very valuable and they had enabled the Committee to focus on the main areas of contention. He thanked the Drafting Committee, which had ensured that the texts of the instruments were in conformity with international labour standards, and that the English and French texts were aligned. In addition, he appreciated the Office’s efforts to align the Spanish version with the authentic texts. He thanked the Office for all their hard work in preparing the draft report. The report constituted a summary of the proceedings and he commended it to the Committee for adoption. He finally thanked the Chairperson and the two Vice-Chairpersons.

407. The report was adopted with minor amendments.

## Closing remarks

408. The Employer Vice-Chairperson recalled the history of the draft instruments, noting the significant progress made in recent years, thanks to the efforts of the Office, governments and the social partners. Effective tripartite working relationships made it possible for consensus to be reached in the present Committee. He observed that it was important for the Office to continue to facilitate the building of the trust and consensus between its constituents. Finally, he thanked the Worker Vice-Chairperson for his leadership and the Office for its hard work in the Committee.

409. The Worker Vice-Chairperson congratulated the Committee on its work, especially commending the Employer Vice-Chairperson and the Employers’ group for their constructive attitude throughout the proceedings, which had provided a fine example of social dialogue between responsible social partners. He also commended the Government members for their constructive input and their willingness to accept compromises. Finally, he expressed his appreciation of the work of the Chairperson and the Office for all their efforts.

410. The Government member of Norway, speaking on behalf of the Government group, thanked the Workers’ and Employers’ groups for their efforts to achieve consensus in the Committee and for the constructive spirit in which they had worked. He also thanked the Chairperson and the Office for all their efforts. He observed that, with the hoped-for adoption of the Convention and Recommendation, it would then be the responsibility of governments both to ratify and to implement the standards in order to achieve decent work for fishers.

411. The Government member of Uruguay was pleased to see the way in which the Committee had concluded its work, which had resulted in an important instrument in the fishing sector. It was to his great satisfaction that the Committee had been able to reach an agreement and overcome obstacles that had seemed insurmountable in 2005. The Government of Uruguay would support and ratify the Convention as soon as possible. In particular, for countries that did not have specific legislation in this area, the adoption of the Convention would be of fundamental importance.

- 
- 412.** The Government member of Nigeria expressed his satisfaction with the adoption of the draft Convention. His Government was very interested in the issue, given the opportunities globalization was bringing to fishers. The Convention was a product of social dialogue: the interests of the various member States had been fully taken into consideration. He commended the Chairperson for successfully undertaking this monumental feat; he was convinced that many countries would soon ratify the Convention.
- 413.** The Government member of Lebanon thanked the Chairperson, the Employer and Worker Vice-Chairpersons and the secretariat for their efforts and excellent work. It was a great success for fishers, vessel owners and public authorities that the Committee had reached an agreement on the Convention and its accompanying Recommendation. Fishers would benefit from wide ratification of the Convention, as their lives and working conditions would improve. Employers would be assisted by the existence of a common legal point of reference. Finally, governments would benefit from the instrument, as it would provide a basis for legislative action.
- 414.** The Government member of Liberia commended the delegates for their tireless efforts to reach agreement on the Convention and Recommendation. He urged all member States to ratify the instrument, and recalled that ratification was not an end in itself: once ratified, the Convention should be implemented fully.
- 415.** The Secretary-General of the Conference said that there was a great deal of symbolism in the fact that, instead of postponing indefinitely further discussion of a proposed Convention that had previously failed to receive the support of the Conference, Workers, Employers and Governments had worked together for the past two years in order to achieve success out of what first seemed to be a failure. He felt that this positive, forward-looking spirit ran throughout the present session of the Conference. In a meeting with the Vice-President of the World Bank earlier in the day, he had emphasized that all international actors needed to give more importance to the outcome of the ILO's unique achievements: only the ILO gave a voice to those who really knew the industry, because they worked directly in and with it. He congratulated the Committee for adopting an instrument that would bring decent work to 30 million fishers and create a level playing field from which the owners of the world's 4 million fishing vessels could benefit. Therefore, it was important that work on ratification of the Convention would begin right after the adoption by the Conference.
- 416.** The Chairperson thanked the Committee members as well as the secretariat, and expressed his pleasure for having been able to work with all of them. He looked forward to continuing to work with the members of the Committee and the ILO in the development of port State inspection guidelines and to ensuring that the Convention was widely ratified. The Committee could be proud of the instrument; it was, however, understood that the fishing industry would inevitably change and that the Convention, since it was a "living instrument", would eventually need to be updated. He was looking forward to the day that they would, therefore, work together again.

Geneva, 8 June 2007.

## A. Proposed Convention concerning work in the fishing sector

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its ninety-sixth Session on 30 May 2007, and

Recognizing that globalization has a profound impact on the fishing sector, and

Noting the ILO Declaration on Fundamental Principles and Rights at Work, 1998, and

Taking into consideration the fundamental rights to be found in the following international labour Conventions: the Forced Labour Convention, 1930 (No. 29), the Freedom of Association and Protection of the Right to Organise Convention, 1948 (No. 87), the Right to Organise and Collective Bargaining Convention, 1949 (No. 98), the Equal Remuneration Convention, 1951 (No. 100), the Abolition of Forced Labour Convention, 1957 (No. 105), the Discrimination (Employment and Occupation) Convention, 1958 (No. 111), the Minimum Age Convention, 1973 (No. 138), and the Worst Forms of Child Labour Convention, 1999 (No. 182), and

Noting the relevant instruments of the International Labour Organization, in particular the Occupational Safety and Health Convention (No. 155) and Recommendation (No. 164), 1981, and the Occupational Health Services Convention (No. 161) and Recommendation (No. 171), 1985, and

Noting, in addition, the Social Security (Minimum Standards) Convention, 1952 (No. 102), and considering that the provisions of Article 77 of that Convention should not be an obstacle to protection extended by Members to fishers under social security schemes, and

Recognizing that the International Labour Organization considers fishing as a hazardous occupation when compared to other occupations, and

Noting also Article 1, paragraph 3, of the Seafarers' Identity Documents Convention (Revised), 2003 (No. 185), and

Mindful of the core mandate of the Organization, which is to promote decent conditions of work, and

Mindful of the need to protect and promote the rights of fishers in this regard, and

Recalling the United Nations Convention on the Law of the Sea, 1982, and

Taking into account the need to revise the following international Conventions adopted by the International Labour Conference specifically concerning the fishing sector, namely the Minimum Age (Fishermen) Convention, 1959 (No. 112), the Medical Examination (Fishermen) Convention, 1959 (No. 113), the Fishermen's Articles of Agreement Convention, 1959 (No. 114), and the Accommodation of Crews (Fishermen) Convention, 1966 (No. 126), and the need to supersede the Hours of Work (Fishing) Recommendation, 1920 (No. 7), to bring them up to date and to reach a greater number of the world's fishers, particularly those working on board smaller vessels, and

---

Noting that the objective of this Convention is to ensure that fishers have decent conditions of work on board fishing vessels with regard to minimum requirements for work on board; conditions of service; accommodation and food; occupational safety and health protection; medical care and social security, and

Having decided upon the adoption of certain proposals with regard to work in the fishing sector, which is the fourth item on the agenda of the session, and

Having determined that these proposals shall take the form of an international Convention;

adopts this ... day of June of the year two thousand and seven the following Convention, which may be cited as the Work in Fishing Convention, 2007.

## PART I. DEFINITIONS AND SCOPE

### DEFINITIONS

#### *Article 1*

For the purposes of the Convention:

- (a) “commercial fishing” means all fishing operations, including fishing operations on rivers, lakes or canals, with the exception of subsistence fishing and recreational fishing;
- (b) “competent authority” means the minister, government department or other authority having power to issue and enforce regulations, orders or other instructions having the force of law in respect of the subject matter of the provision concerned;
- (c) “consultation” means consultation by the competent authority with the representative organizations of employers and workers concerned, and in particular the representative organizations of fishing vessel owners and fishers, where they exist;
- (d) “fishing vessel owner” means the owner of the fishing vessel or any other organization or person, such as the manager, agent or bareboat charterer, who has assumed the responsibility for the operation of the vessel from the owner and who, on assuming such responsibility, has agreed to take over the duties and responsibilities imposed on fishing vessel owners in accordance with the Convention, regardless of whether any other organization or person fulfils certain of the duties or responsibilities on behalf of the fishing vessel owner;
- (e) “fisher” means every person employed or engaged in any capacity or carrying out an occupation on board any fishing vessel, including persons working on board who are paid on the basis of a share of the catch but excluding pilots, naval personnel, other persons in the permanent service of a government, shore-based persons carrying out work aboard a fishing vessel and fisheries observers;
- (f) “fisher’s work agreement” means a contract of employment, articles of agreement or other similar arrangements, or any other contract governing a fisher’s living and working conditions on board a vessel;

- 
- (g) “fishing vessel” or “vessel” means any ship or boat, of any nature whatsoever, irrespective of the form of ownership, used or intended to be used for the purpose of commercial fishing;
  - (h) “gross tonnage” means the gross tonnage calculated in accordance with the tonnage measurement regulations contained in Annex I to the International Convention on Tonnage Measurement of Ships, 1969, or any instrument amending or replacing it;
  - (i) “length” (L) shall be taken as 96 per cent of the total length on a waterline at 85 per cent of the least moulded depth measured from the keel line, or as the length from the foreside of the stem to the axis of the rudder stock on that waterline, if that be greater. In vessels designed with rake of keel, the waterline on which this length is measured shall be parallel to the designed waterline;
  - (j) “length overall” (LOA) shall be taken as the distance in a straight line parallel to the designed waterline between the foremost point of the bow and the aftermost point of the stern;
  - (k) “recruitment and placement service” means any person, company, institution, agency or other organization, in the public or the private sector, which is engaged in recruiting fishers on behalf of, or placing fishers with, fishing vessel owners;
  - (l) “skipper” means the fisher having command of a fishing vessel.

## SCOPE

### *Article 2*

1. Except as otherwise provided herein, this Convention applies to all fishers and all fishing vessels engaged in commercial fishing operations.

2. In the event of doubt as to whether a vessel is engaged in commercial fishing, the question shall be determined by the competent authority after consultation.

3. Any Member, after consultation, may extend, in whole or in part, to fishers working on smaller vessels the protection provided in this Convention for fishers working on vessels of 24 metres in length and over.

### *Article 3*

1. Where the application of the Convention raises special problems of a substantial nature in the light of the particular conditions of service of the fishers or of the fishing vessels’ operations concerned, a Member may, after consultation, exclude from the requirements of this Convention, or from certain of its provisions:

- (a) fishing vessels engaged in fishing operations in rivers, lakes or canals;
- (b) limited categories of fishers or fishing vessels.

2. In case of exclusions under the preceding paragraph, and where practicable, the competent authority shall take measures, as appropriate, to extend progressively the requirements under this Convention to the categories of fishers and fishing vessels concerned.

3. Each Member which ratifies this Convention shall:

- 
- (a) in its first report on the application of this Convention submitted under article 22 of the Constitution of the International Labour Organisation:
    - (i) list any categories of fishers or fishing vessels excluded under paragraph 1;
    - (ii) give the reasons for any such exclusions, stating the respective positions of the representative organizations of employers and workers concerned, in particular the representative organizations of fishing vessel owners and fishers, where they exist; and
    - (iii) describe any measures taken to provide equivalent protection to the excluded categories; and
  - (b) in subsequent reports on the application of the Convention, describe any measures taken in accordance with paragraph 2.

#### *Article 4*

1. Where it is not immediately possible for a Member to implement all of the measures provided for in this Convention owing to special problems of a substantial nature in the light of insufficiently developed infrastructure or institutions, the Member may, in accordance with a plan drawn up in consultation, progressively implement all or some of the following provisions:

- (a) Article 10, paragraph 1;
- (b) Article 10, paragraph 3, in so far as it applies to vessels remaining at sea for more than three days;
- (c) Article 15;
- (d) Article 20;
- (e) Article 33; and
- (f) Article 38.

2. Paragraph 1 does not apply to fishing vessels which:

- (a) are 24 metres in length and over; or
- (b) remain at sea for more than seven days; or
- (c) normally navigate at a distance exceeding 200 nautical miles from the coastline of the flag State or navigate beyond the outer edge of its continental shelf, whichever distance from the coastline is greater; or
- (d) are subject to port State control as provided for in Article 43 of this Convention, except where port State control arises through a situation of force majeure,

nor to fishers working on such vessels.

3. Each Member which avails itself of the possibility afforded in paragraph 1 shall:

- (a) in its first report on the application of this Convention submitted under article 22 of the Constitution of the International Labour Organisation:

- 
- (i) indicate the provisions of the Convention to be progressively implemented;
  - (ii) explain the reasons and state the respective positions of representative organizations of employers and workers concerned, and in particular the representative organizations of fishing vessel owners and fishers, where they exist; and
  - (iii) describe the plan for progressive implementation; and
- (b) in subsequent reports on the application of this Convention, describe measures taken with a view to giving effect to all of the provisions of the Convention.

#### *Article 5*

1. For the purpose of this Convention, the competent authority, after consultation, may decide to use length overall (LOA) in place of length (L) as the basis for measurement, in accordance with the equivalence set out in Annex I. In addition, for the purpose of the paragraphs specified in Annex III of this Convention, the competent authority, after consultation, may decide to use gross tonnage in place of length (L) or length overall (LOA) as the basis for measurement in accordance with the equivalence set out in Annex III.

2. In the reports submitted under article 22 of the Constitution, the Member shall communicate the reasons for the decision taken under this Article and any comments arising from the consultation.

### PART II. GENERAL PRINCIPLES

#### IMPLEMENTATION

#### *Article 6*

1. Each Member shall implement and enforce laws, regulations or other measures that it has adopted to fulfil its commitments under this Convention with respect to fishers and fishing vessels under its jurisdiction. Other measures may include collective agreements, court decisions, arbitration awards, or other means consistent with national law and practice.

2. Nothing in this Convention shall affect any law, award or custom, or any agreement between fishing vessel owners and fishers, which ensures more favourable conditions than those provided for in this Convention.

### COMPETENT AUTHORITY AND COORDINATION

#### *Article 7*

Each Member shall:

- (a) designate the competent authority or authorities; and
- (b) establish mechanisms for coordination among relevant authorities for the fishing sector at the national and local levels, as appropriate, and define their functions and

---

responsibilities, taking into account their complementarities and national conditions and practice.

RESPONSIBILITIES OF FISHING VESSEL OWNERS,  
SKIPPER AND FISHERS

*Article 8*

1. The fishing vessel owner has the overall responsibility to ensure that the skipper is provided with the necessary resources and facilities to comply with the obligations of this Convention.

2. The skipper has the responsibility for the safety of the fishers on board and the safe operation of the vessel, including but not limited to the following areas:

- (a) providing such supervision as will ensure that, as far as possible, fishers perform their work in the best conditions of safety and health;
- (b) managing the fishers in a manner which respects safety and health, including prevention of fatigue;
- (c) facilitating on-board occupational safety and health awareness training; and
- (d) ensuring compliance with safety of navigation, watchkeeping and associated good seamanship standards.

3. The skipper shall not be constrained by the fishing vessel owner from taking any decision which, in the professional judgement of the skipper, is necessary for the safety of the vessel and its safe navigation and safe operation, or the safety of the fishers on board.

4. Fishers shall comply with the lawful orders of the skipper and applicable safety and health measures.

PART III. MINIMUM REQUIREMENTS FOR WORK  
ON BOARD FISHING VESSELS

MINIMUM AGE

*Article 9*

1. The minimum age for work on board a fishing vessel shall be 16 years. However, the competent authority may authorize a minimum age of 15 for persons who are no longer subject to compulsory schooling as provided by national legislation, and who are engaged in vocational training in fishing.

2. The competent authority, in accordance with national laws and practice, may authorize persons of the age of 15 to perform light work during school holidays. In such cases, it shall determine, after consultation, the kinds of work permitted and shall prescribe the conditions in which such work shall be undertaken and the periods of rest required.

3. The minimum age for assignment to activities on board fishing vessels, which by their nature or the circumstances in which they are carried out are likely to jeopardize the health, safety or morals of young persons, shall not be less than 18 years.

---

4. The types of activities to which paragraph 3 of this Article applies shall be determined by national laws or regulations, or by the competent authority, after consultation, taking into account the risks concerned and the applicable international standards.

5. The performance of the activities referred to in paragraph 3 of this Article as from the age of 16 may be authorized by national laws or regulations, or by decision of the competent authority, after consultation, on condition that the health, safety and morals of the young persons concerned are fully protected and that the young persons concerned have received adequate specific instruction or vocational training and have completed basic pre-sea safety training.

6. The engagement of fishers under the age of 18 for work at night shall be prohibited. For the purpose of this Article, “night” shall be defined in accordance with national law and practice. It shall cover a period of at least nine hours starting no later than midnight and ending no earlier than 5 a.m. An exception to strict compliance with the night work restriction may be made by the competent authority when:

- (a) the effective training of the fishers concerned, in accordance with established programmes and schedules, would be impaired; or
- (b) the specific nature of the duty or a recognized training programme requires that fishers covered by the exception perform duties at night and the authority determines, after consultation, that the work will not have a detrimental impact on their health or well-being.

7. None of the provisions in this Article shall affect any obligations assumed by the Member arising from the ratification of any other international labour Convention.

## MEDICAL EXAMINATION

### *Article 10*

1. No fishers shall work on board a fishing vessel without a valid medical certificate attesting to fitness to perform their duties.

2. The competent authority, after consultation, may grant exemptions from the application of paragraph 1 of this Article, taking into account the safety and health of fishers, size of the vessel, availability of medical assistance and evacuation, duration of the voyage, area of operation, and type of fishing operation.

3. The exemptions in paragraph 2 of this Article shall not apply to a fisher working on a fishing vessel of 24 metres in length and over or which normally remains at sea for more than three days. In urgent cases, the competent authority may permit a fisher to work on such a vessel for a period of a limited and specified duration until a medical certificate can be obtained, provided that the fisher is in possession of an expired medical certificate of a recent date.

### *Article 11*

Each Member shall adopt laws, regulations or other measures providing for:

- (a) the nature of medical examinations;

- 
- (b) the form and content of medical certificates;
  - (c) the issue of a medical certificate by a duly qualified medical practitioner or, in the case of a certificate solely concerning eyesight, by a person recognized by the competent authority as qualified to issue such a certificate; these persons shall enjoy full independence in exercising their professional judgement;
  - (d) the frequency of medical examinations and the period of validity of medical certificates;
  - (e) the right to a further examination by a second independent medical practitioner in the event that a person has been refused a certificate or has had limitations imposed on the work he or she may perform; and
  - (f) other relevant requirements.

### *Article 12*

In addition to the requirements set out in Article 10 and Article 11, on a fishing vessel of 24 metres in length and over, or on a vessel which normally remains at sea for more than three days:

1. The medical certificate of a fisher shall state, at a minimum, that:
  - (a) the hearing and sight of the fisher concerned are satisfactory for the fisher's duties on the vessel; and
  - (b) the fisher is not suffering from any medical condition likely to be aggravated by service at sea or to render the fisher unfit for such service or to endanger the safety or health of other persons on board.
2. The medical certificate shall be valid for a maximum period of two years unless the fisher is under the age of 18, in which case the maximum period of validity shall be one year.
3. If the period of validity of a certificate expires in the course of a voyage, the certificate shall remain in force until the end of that voyage.

## PART IV. CONDITIONS OF SERVICE

### MANNING AND HOURS OF REST

### *Article 13*

Each Member shall adopt laws, regulations or other measures requiring that owners of fishing vessels flying its flag ensure that:

- (a) their vessels are sufficiently and safely manned for the safe navigation and operation of the vessel and under the control of a competent skipper; and
- (b) fishers are given regular periods of rest of sufficient length to ensure safety and health.

---

## *Article 14*

1. In addition to the requirements set out in Article 13, the competent authority shall:

- (a) for vessels of 24 metres in length and over, establish a minimum level of manning for the safe navigation of the vessel, specifying the number and the qualifications of the fishers required;
- (b) for fishing vessels regardless of size remaining at sea for more than three days, after consultation and for the purpose of limiting fatigue, establish the minimum hours of rest to be provided to fishers. Minimum hours of rest shall not be less than:
  - (i) ten hours in any 24-hour period; and
  - (ii) 77 hours in any seven-day period.

2. The competent authority may permit, for limited and specified reasons, temporary exceptions to the limits established in paragraph 1(b) of this Article. However, in such circumstances, it shall require that fishers shall receive compensatory periods of rest as soon as practicable.

3. The competent authority, after consultation, may establish alternative requirements to those in paragraphs 1 and 2 of this Article. However, such alternative requirements shall be substantially equivalent and shall not jeopardize the safety and health of the fishers.

4. Nothing in this Article shall be deemed to impair the right of the skipper of a vessel to require a fisher to perform any hours of work necessary for the immediate safety of the vessel, the persons on board or the catch, or for the purpose of giving assistance to other boats or ships or persons in distress at sea. Accordingly, the skipper may suspend the schedule of hours of rest and require a fisher to perform any hours of work necessary until the normal situation has been restored. As soon as practicable after the normal situation has been restored, the skipper shall ensure that any fishers who have performed work in a scheduled rest period are provided with an adequate period of rest.

## CREW LIST

## *Article 15*

Every fishing vessel shall carry a crew list, a copy of which shall be provided to authorized persons ashore prior to departure of the vessel, or communicated ashore immediately after departure of the vessel. The competent authority shall determine to whom and when such information shall be provided and for what purpose or purposes.

## FISHER'S WORK AGREEMENT

## *Article 16*

Each Member shall adopt laws, regulations or other measures:

- (a) requiring that fishers working on vessels flying its flag have the protection of a fisher's work agreement that is comprehensible to them and is consistent with the provisions of this Convention; and

- 
- (b) specifying the minimum particulars to be included in fishers' work agreements in accordance with the provisions contained in Annex II.

#### *Article 17*

Each Member shall adopt laws, regulations or other measures regarding:

- (a) procedures for ensuring that a fisher has an opportunity to review and seek advice on the terms of the fisher's work agreement before it is concluded;
- (b) where applicable, the maintenance of records concerning the fisher's work under such an agreement; and
- (c) the means of settling disputes in connection with a fisher's work agreement.

#### *Article 18*

The fisher's work agreement, a copy of which shall be provided to the fisher, shall be carried on board and be available to the fisher and, in accordance with national law and practice, to other concerned parties on request.

#### *Article 19*

Articles 16 to 18 and Annex II do not apply to a fishing vessel owner who is also single-handedly operating the vessel.

#### *Article 20*

It shall be the responsibility of the fishing vessel owner to ensure that each fisher has a written fisher's work agreement signed by both the fisher and the fishing vessel owner or by an authorized representative of the fishing vessel owner (or, where fishers are not employed or engaged by the fishing vessel owner, the fishing vessel owner shall have evidence of contractual or similar arrangements) providing decent work and living conditions on board the vessel as required by this Convention.

### REPATRIATION

#### *Article 21*

1. Members shall ensure that fishers on a fishing vessel that flies their flag and that enters a foreign port are entitled to repatriation in the event that the fisher's work agreement has expired or has been terminated for justified reasons by the fisher or by the fishing vessel owner, or the fisher is no longer able to carry out the duties required under the work agreement or cannot be expected to carry them out in the specific circumstances. This also applies to fishers from that vessel who are transferred for the same reasons from the vessel to the foreign port.

2. The cost of the repatriation referred to in paragraph 1 of this Article shall be borne by the fishing vessel owner, except where the fisher has been found, in accordance with national laws, regulations or other measures, to be in serious default of his or her work agreement obligations.

---

3. Members shall prescribe, by means of laws, regulations or other measures, the precise circumstances entitling a fisher covered by paragraph 1 of this Article to repatriation, the maximum duration of service periods on board following which a fisher is entitled to repatriation, and the destinations to which fishers may be repatriated.

4. If a fishing vessel owner fails to provide for the repatriation referred to in this Article, the Member whose flag the vessel flies shall arrange for the repatriation of the fisher concerned and shall be entitled to recover the cost from the fishing vessel owner.

5. National laws and regulations shall not prejudice any right of the fishing vessel owner to recover the cost of repatriation under third party contractual agreements.

## RECRUITMENT AND PLACEMENT

### *Article 22*

#### *Recruitment and placement of fishers*

1. Each Member that operates a public service providing recruitment and placement for fishers shall ensure that the service forms part of, or is coordinated with, a public employment service for all workers and employers.

2. Any private service providing recruitment and placement for fishers which operates in the territory of a Member shall do so in conformity with a standardized system of licensing or certification or other form of regulation, which shall be established, maintained or modified only after consultation.

3. Each Member shall, by means of laws, regulations or other measures:

- (a) prohibit recruitment and placement services from using means, mechanisms or lists intended to prevent or deter fishers from engaging for work;
- (b) require that no fees or other charges for recruitment or placement of fishers be borne directly or indirectly, in whole or in part, by the fisher; and
- (c) determine the conditions under which any licence, certificate or similar authorization of a private recruitment or placement service may be suspended or withdrawn in case of violation of relevant laws or regulations; and specify the conditions under which private recruitment and placement services can operate.

#### *Private employment agencies*

4. A Member which has ratified the Private Employment Agencies Convention, 1997 (No. 181), may allocate certain responsibilities under this Convention to private employment agencies that provide the services referred to in paragraph 1(b) of Article 1 of that Convention. The respective responsibilities of any such private employment agencies and of the fishing vessel owners, who shall be the “user enterprise” for the purpose of that Convention, shall be determined and allocated, as provided for in Article 12 of that Convention. Such a Member shall adopt laws, regulations or other measures to ensure that no allocation of the respective responsibilities or obligations to the private employment agencies providing the service and to the “user enterprise” pursuant to this Convention shall preclude the fisher from asserting a right to a lien arising against the fishing vessel.

---

5. Notwithstanding the provisions of paragraph 4, the fishing vessel owner shall be liable in the event that the private employment agency defaults on its obligations to a fisher for whom, in the context of the Private Employment Agencies Convention, 1997 (No. 181), the fishing vessel owner is the “user enterprise”.

6. Nothing in this Convention shall be deemed to impose on a Member the obligation to allow the operation in its fishing sector of private employment agencies as referred to in paragraph 4 of this Article.

#### PAYMENT OF FISHERS

##### *Article 23*

Each Member, after consultation, shall adopt laws, regulations or other measures providing that fishers who are paid a wage are ensured a monthly or other regular payment.

##### *Article 24*

Each Member shall require that all fishers working on board fishing vessels shall be given a means to transmit all or part of their payments received, including advances, to their families at no cost.

#### PART V. ACCOMMODATION AND FOOD

##### *Article 25*

Each Member shall adopt laws, regulations or other measures for fishing vessels that fly its flag with respect to accommodation, food and potable water on board.

##### *Article 26*

Each Member shall adopt laws, regulations or other measures requiring that accommodation on board fishing vessels that fly its flag shall be of sufficient size and quality and appropriately equipped for the service of the vessel and the length of time fishers live on board. In particular, such measures shall address, as appropriate, the following issues:

- (a) approval of plans for the construction or modification of fishing vessels in respect of accommodation;
- (b) maintenance of accommodation and galley spaces with due regard to hygiene and overall safe, healthy and comfortable conditions;
- (c) ventilation, heating, cooling and lighting;
- (d) mitigation of excessive noise and vibration;
- (e) location, size, construction materials, furnishing and equipping of sleeping rooms, mess rooms and other accommodation spaces;
- (f) sanitary facilities, including toilets and washing facilities, and supply of sufficient hot and cold water; and

- 
- (g) procedures for responding to complaints concerning accommodation that does not meet the requirements of this Convention.

#### *Article 27*

Each Member shall adopt laws, regulations or other measures requiring that:

- (a) the food carried and served on board be of a sufficient nutritional value, quality and quantity;
- (b) potable water be of sufficient quality and quantity; and
- (c) the food and water shall be provided by the fishing vessel owner at no cost to the fisher. However, in accordance with national laws and regulations, the cost can be recovered as an operational cost if the collective agreement governing a share system or a fisher's work agreement so provides.

#### *Article 28*

1. The laws, regulations or other measures to be adopted by the Member in accordance with Articles 25 to 27 shall give full effect to Annex III concerning fishing vessel accommodation. Annex III may be amended in the manner provided for in Article 45.

2. A Member which is not in a position to implement the provisions of Annex III may, after consultation, adopt provisions in its laws and regulations or other measures which are substantially equivalent to the provisions set out in Annex III, with the exception of provisions related to Article 27.

### PART VI. MEDICAL CARE, HEALTH PROTECTION AND SOCIAL SECURITY

#### MEDICAL CARE

#### *Article 29*

Each Member shall adopt laws, regulations or other measures requiring that:

- (a) fishing vessels carry appropriate medical equipment and medical supplies for the service of the vessel, taking into account the number of fishers on board, the area of operation and the length of the voyage;
- (b) fishing vessels have at least one fisher on board who is qualified or trained in first aid and other forms of medical care and who has the necessary knowledge to use the medical equipment and supplies for the vessel concerned, taking into account the number of fishers on board, the area of operation and the length of the voyage;
- (c) medical equipment and supplies carried on board be accompanied by instructions or other information in a language and format understood by the fisher or fishers referred to in subparagraph (b);
- (d) fishing vessels be equipped for radio or satellite communication with persons or services ashore that can provide medical advice, taking into account the area of operation and the length of the voyage; and

- 
- (e) fishers have the right to medical treatment ashore and the right to be taken ashore in a timely manner for treatment in the event of serious injury or illness.

### *Article 30*

For fishing vessels of 24 metres in length and over, taking into account the number of fishers on board, the area of operation and the duration of the voyage, each Member shall adopt laws, regulations or other measures requiring that:

- (a) the competent authority prescribe the medical equipment and medical supplies to be carried on board;
- (b) the medical equipment and medical supplies carried on board be properly maintained and inspected at regular intervals established by the competent authority by responsible persons designated or approved by the competent authority;
- (c) the vessels carry a medical guide adopted or approved by the competent authority, or the latest edition of the *International Medical Guide for Ships*;
- (d) the vessels have access to a prearranged system of medical advice to vessels at sea by radio or satellite communication, including specialist advice, which shall be available at all times;
- (e) the vessels carry on board a list of radio or satellite stations through which medical advice can be obtained; and
- (f) to the extent consistent with the Member's national law and practice, medical care while the fisher is on board or landed in a foreign port be provided free of charge to the fisher.

## OCCUPATIONAL SAFETY AND HEALTH AND ACCIDENT PREVENTION

### *Article 31*

Each Member shall adopt laws, regulations or other measures concerning:

- (a) the prevention of occupational accidents, occupational diseases and work-related risks on board fishing vessels, including risk evaluation and management, training and on-board instruction of fishers;
- (b) training for fishers in the handling of types of fishing gear they will use and in the knowledge of the fishing operations in which they will be engaged;
- (c) the obligations of fishing vessel owners, fishers and others concerned, due account being taken of the safety and health of fishers under the age of 18;
- (d) the reporting and investigation of accidents on board fishing vessels flying its flag; and
- (e) the setting up of joint committees on occupational safety and health or, after consultation, of other appropriate bodies.

---

### *Article 32*

1. The requirements of this Article shall apply to fishing vessels of 24 metres in length and over normally remaining at sea for more than three days and, after consultation, to other vessels, taking into account the number of fishers on board, the area of operation, and the duration of the voyage.

2. The competent authority shall:

- (a) after consultation, require that the fishing vessel owner, in accordance with national laws, regulations, collective bargaining agreements and practice, establish on-board procedures for the prevention of occupational accidents, injuries and diseases, taking into account the specific hazards and risks on the fishing vessel concerned; and
- (b) require that fishing vessel owners, skippers, fishers and other relevant persons be provided with sufficient and suitable guidance, training material, or other appropriate information on how to evaluate and manage risks to safety and health on board fishing vessels.

3. Fishing vessel owners shall:

- (a) ensure that every fisher on board is provided with appropriate personal protective clothing and equipment;
- (b) ensure that every fisher on board has received basic safety training approved by the competent authority; the competent authority may grant written exemptions from this requirement for fishers who have demonstrated equivalent knowledge and experience; and
- (c) ensure that fishers are sufficiently and reasonably familiarized with equipment and its methods of operation, including relevant safety measures, prior to using the equipment or participating in the operations concerned.

### *Article 33*

Risk evaluation in relation to fishing shall be conducted, as appropriate, with the participation of fishers or their representatives.

## SOCIAL SECURITY

### *Article 34*

Each Member shall ensure that fishers ordinarily resident in its territory, and their dependants to the extent provided in national law, are entitled to benefit from social security protection under conditions no less favourable than those applicable to other workers, including employed and self-employed persons, ordinarily resident in its territory.

### *Article 35*

Each Member shall undertake to take steps, according to national circumstances, to achieve progressively comprehensive social security protection for all fishers who are ordinarily resident in its territory.

---

### *Article 36*

Members shall cooperate through bilateral or multilateral agreements or other arrangements, in accordance with national laws, regulations or practice:

- (a) to achieve progressively comprehensive social security protection for fishers, taking into account the principle of equality of treatment irrespective of nationality; and
- (b) to ensure the maintenance of social security rights which have been acquired or are in the course of acquisition by all fishers regardless of residence.

### *Article 37*

Notwithstanding the attribution of responsibilities in Articles 34, 35 and 36, Members may determine, through bilateral and multilateral agreements and through provisions adopted in the framework of regional economic integration organizations, other rules concerning the social security legislation to which fishers are subject.

## PROTECTION IN THE CASE OF WORK-RELATED SICKNESS, INJURY OR DEATH

### *Article 38*

1. Each Member shall take measures to provide fishers with protection, in accordance with national laws, regulations or practice, for work-related sickness, injury or death.

2. In the event of injury due to occupational accident or disease, the fisher shall have access to:

- (a) appropriate medical care; and
- (b) the corresponding compensation in accordance with national laws and regulations.

3. Taking into account the characteristics within the fishing sector, the protection referred to in paragraph 1 of this Article may be ensured through:

- (a) a system for fishing vessel owners' liability; or
- (b) compulsory insurance, workers' compensation or other schemes.

### *Article 39*

1. In the absence of national provisions for fishers, each Member shall adopt laws, regulations or other measures to ensure that fishing vessel owners are responsible for the provision to fishers on vessels flying its flag, of health protection and medical care while employed or engaged or working on a vessel at sea or in a foreign port. Such laws, regulations or other measures shall ensure that fishing vessel owners are responsible for defraying the expenses of medical care, including related material assistance and support, during medical treatment in a foreign country, until the fisher has been repatriated.

2. National laws or regulations may permit the exclusion of the liability of the fishing vessel owner if the injury occurred otherwise than in the service of the vessel or the sickness or infirmity was concealed during engagement, or the injury or sickness was due to wilful misconduct of the fisher.

---

## PART VII. COMPLIANCE AND ENFORCEMENT

### *Article 40*

Each Member shall effectively exercise its jurisdiction and control over vessels that fly its flag by establishing a system for ensuring compliance with the requirements of this Convention including, as appropriate, inspections, reporting, monitoring, complaint procedures, appropriate penalties and corrective measures, in accordance with national laws or regulations.

### *Article 41*

1. Members shall require that fishing vessels remaining at sea for more than three days, which:

- (a) are 24 metres in length and over; or
- (b) normally navigate at a distance exceeding 200 nautical miles from the coastline of the flag State or navigate beyond the outer edge of its continental shelf, whichever distance from the coastline is greater,

carry a valid document issued by the competent authority stating that the vessel has been inspected by the competent authority or on its behalf, for compliance with the provisions of this Convention concerning living and working conditions.

2. The period of validity of such document may coincide with the period of validity of a national or an international fishing vessel safety certificate, but in no case shall such period of validity exceed five years.

### *Article 42*

1. The competent authority shall appoint a sufficient number of qualified inspectors to fulfil its responsibilities under Article 41.

2. In establishing an effective system for the inspection of living and working conditions on board fishing vessels, a Member, where appropriate, may authorize public institutions or other organizations that it recognizes as competent and independent to carry out inspections and issue documents. In all cases, the Member shall remain fully responsible for the inspection and issuance of the related documents concerning the living and working conditions of the fishers on fishing vessels that fly its flag.

### *Article 43*

1. A Member which receives a complaint or obtains evidence that a fishing vessel that flies its flag does not conform to the requirements of this Convention shall take the steps necessary to investigate the matter and ensure that action is taken to remedy any deficiencies found.

2. If a Member, in whose port a fishing vessel calls in the normal course of its business or for operational reasons, receives a complaint or obtains evidence that such vessel does not conform to the requirements of this Convention, it may prepare a report addressed to the government of the flag State of the vessel, with a copy to the Director-General of the International Labour Office, and may take measures necessary to rectify any conditions on board which are clearly hazardous to safety or health.

---

3. In taking the measures referred to in paragraph 2 of this Article, the Member shall notify forthwith the nearest representative of the flag State and, if possible, shall have such representative present. The Member shall not unreasonably detain or delay the vessel.

4. For the purpose of this Article, the complaint may be submitted by a fisher, a professional body, an association, a trade union or, generally, any person with an interest in the safety of the vessel, including an interest in safety or health hazards to the fishers on board.

5. This Article does not apply to complaints which a Member considers to be manifestly unfounded.

#### *Article 44*

Each Member shall apply this Convention in such a way as to ensure that the fishing vessels flying the flag of any State that has not ratified this Convention do not receive more favourable treatment than fishing vessels that fly the flag of any Member that has ratified it.

### PART VIII. AMENDMENT OF ANNEXES I, II AND III

#### *Article 45*

1. Subject to the relevant provisions of this Convention, the International Labour Conference may amend Annexes I, II and III. The Governing Body of the International Labour Office may place an item on the agenda of the Conference regarding proposals for such amendments established by a tripartite meeting of experts. The decision to adopt the proposals shall require a majority of two-thirds of the votes cast by the delegates present at the Conference, including at least half the Members that have ratified this Convention.

2. Any amendment adopted in accordance with paragraph 1 of this Article shall enter into force six months after the date of its adoption for any Member that has ratified this Convention, unless such Member has given written notice to the Director-General of the International Labour Office that it shall not enter into force for that Member, or shall only enter into force at a later date upon subsequent written notification.

### PART IX. FINAL PROVISIONS

#### *Article 46*

This Convention revises the Minimum Age (Fishermen) Convention, 1959 (No. 112), the Medical Examination (Fishermen) Convention, 1959 (No. 113), the Fishermen's Articles of Agreement Convention, 1959 (No. 114), and the Accommodation of Crews (Fishermen) Convention, 1966 (No. 126).

*Note: The Conference Drafting Committee will, in accordance with its mandate under article 6, paragraph 3, of the Standing Orders of the International Labour Conference, insert the standard final articles, taking into account relevant decisions of the Conference Committee and, in particular, in relation to the entry into force provisions.*

---

## ANNEX I

### EQUIVALENCE IN MEASUREMENT

For the purpose of this Convention, where the competent authority, after consultation, decides to use length overall (LOA) rather than length (L) as the basis of measurement:

- (a) a length overall (LOA) of 16.5 metres shall be considered equivalent to a length (L) of 15 metres;
- (b) a length overall (LOA) of 26.5 metres shall be considered equivalent to a length (L) of 24 metres;
- (c) a length overall (LOA) of 50 metres shall be considered equivalent to a length (L) of 45 metres.

---

## ANNEX II

### FISHER'S WORK AGREEMENT

The fisher's work agreement shall contain the following particulars, except in so far as the inclusion of one or more of them is rendered unnecessary by the fact that the matter is regulated in another manner by national laws or regulations, or a collective bargaining agreement where applicable:

- (a) the fisher's family name and other names, date of birth or age, and birthplace;
- (b) the place at which and date on which the agreement was concluded;
- (c) the name of the fishing vessel or vessels and the registration number of the vessel or vessels on board which the fisher undertakes to work;
- (d) the name of the employer, or fishing vessel owner, or other party to the agreement with the fisher;
- (e) the voyage or voyages to be undertaken, if this can be determined at the time of making the agreement;
- (f) the capacity in which the fisher is to be employed or engaged;
- (g) if possible, the place at which and date on which the fisher is required to report on board for service;
- (h) the provisions to be supplied to the fisher, unless some alternative system is provided for by national law or regulation;
- (i) the amount of wages, or the amount of the share and the method of calculating such share if remuneration is to be on a share basis, or the amount of the wage and share and the method of calculating the latter if remuneration is to be on a combined basis, and any agreed minimum wage;
- (j) the termination of the agreement and the conditions thereof, namely:
  - (i) if the agreement has been made for a definite period, the date fixed for its expiry;
  - (ii) if the agreement has been made for a voyage, the port of destination and the time which has to expire after arrival before the fisher shall be discharged;
  - (iii) if the agreement has been made for an indefinite period, the conditions which shall entitle either party to rescind it, as well as the required period of notice for rescission, provided that such period shall not be less for the employer, or fishing vessel owner or other party to the agreement with the fisher;
- (k) the protection that will cover the fisher in the event of sickness, injury or death in connection with service;
- (l) the amount of paid annual leave or the formula used for calculating leave, where applicable;

- 
- (m) the health and social security coverage and benefits to be provided to the fisher by the employer, fishing vessel owner, or other party or parties to the fisher's work agreement, as applicable;
  - (n) the fisher's entitlement to repatriation;
  - (o) a reference to the collective bargaining agreement, where applicable;
  - (p) the minimum periods of rest, in accordance with national laws, regulations or other measures; and
  - (q) any other particulars which national law or regulation may require.

---

## ANNEX III

### FISHING VESSEL ACCOMMODATION

#### *General provisions*

1. For the purposes of this Annex:

- (a) “new fishing vessel” means a vessel for which:
- (i) the building or major conversion contract has been placed on or after the date of the entry into force of the Convention for the Member concerned; or
  - (ii) the building or major conversion contract has been placed before the date of the entry into force of the Convention for the Member concerned, and which is delivered three years or more after that date; or
  - (iii) in the absence of a building contract, on or after the date of the entry into force of the Convention for the Member concerned:
    - the keel is laid, or
    - construction identifiable with a specific vessel begins, or
    - assembly has commenced comprising at least 50 tonnes or 1 per cent of the estimated mass of all structural material, whichever is less;
- (b) “existing vessel” means a vessel that is not a new fishing vessel.

2. The following shall apply to all new, decked fishing vessels, subject to any exclusions provided for in accordance with Article 3 of the Convention. The competent authority may, after consultation, also apply the requirements of this Annex to existing vessels, when and in so far as it determines that this is reasonable and practicable.

3. The competent authority, after consultation, may permit variations to the provisions of this Annex for fishing vessels normally remaining at sea for less than 24 hours where the fishers do not live on board the vessel in port. In the case of such vessels, the competent authority shall ensure that the fishers concerned have adequate facilities for resting, eating and sanitation purposes.

4. Any variations made by a Member under paragraph 3 of this Annex shall be reported to the International Labour Office under article 22 of the Constitution of the International Labour Organization.

5. The requirements for vessels of 24 metres in length and over may be applied to vessels between 15 and 24 metres in length where the competent authority determines, after consultation, that this is reasonable and practicable.

6. Fishers working on board feeder vessels which do not have appropriate accommodation and sanitary facilities shall be provided with such accommodation and facilities on board the mother vessel.

7. Members may extend the requirements of this Annex regarding noise and vibration, ventilation, heating and air conditioning, and lighting to enclosed working spaces and spaces used for storage if, after consultation, such application is considered

---

appropriate and will not have a negative influence on the function of the process or working conditions or the quality of the catches.

8. The use of gross tonnage as referred to in Article 5 of the Convention is limited to the following specified paragraphs of this Annex: 14, 37, 38, 41, 43, 46, 49, 53, 55, 61, 64, 65 and 67. For these purposes, where the competent authority, after consultation, decides to use gross tonnage (gt) as the basis of measurement:

- (a) a gross tonnage of 75 gt shall be considered equivalent to a length (L) of 15 metres or a length overall (LOA) of 16.5 metres;
- (b) a gross tonnage of 300 gt shall be considered equivalent to a length (L) of 24 metres or a length overall (LOA) of 26.5 metres;
- (c) a gross tonnage of 950 gt shall be considered equivalent to a length (L) of 45 metres or a length overall (LOA) of 50 metres.

### *Planning and control*

9. The competent authority shall satisfy itself that, on every occasion when a vessel is newly constructed or the crew accommodation of a vessel has been reconstructed, such vessel complies with the requirements of this Annex. The competent authority shall, to the extent practicable, require compliance with this Annex when the crew accommodation of a vessel is substantially altered and, for a vessel that changes the flag it flies to the flag of the Member, require compliance with those requirements of this Annex that are applicable in accordance with paragraph 2 of this Annex.

10. For the occasions noted in paragraph 9 of this Annex, for vessels of 24 metres in length and over, detailed plans and information concerning accommodation shall be required to be submitted for approval to the competent authority, or an entity authorized by it.

11. For vessels of 24 metres in length and over, on every occasion when the crew accommodation of the fishing vessel has been reconstructed or substantially altered, the competent authority shall inspect the accommodation for compliance with the requirements of the Convention, and when the vessel changes the flag it flies to the flag of the Member, for compliance with those requirements of this Annex that are applicable in accordance with paragraph 2 of this Annex. The competent authority may carry out additional inspections of crew accommodation at its discretion.

12. When a vessel changes flag, any alternative requirements which the competent authority of the Member whose flag the ship was formerly flying may have adopted in accordance with paragraphs 15, 39, 47 or 62 of this Annex cease to apply to the vessel.

### *Design and construction*

#### *Headroom*

13. There shall be adequate headroom in all accommodation spaces. For spaces where fishers are expected to stand for prolonged periods, the minimum headroom shall be prescribed by the competent authority.

14. For vessels of 24 metres in length and over, the minimum permitted headroom in all accommodation where full and free movement is necessary shall not be less than 200 centimetres.

---

15. Notwithstanding the provisions of paragraph 14, the competent authority may, after consultation, decide that the minimum permitted headroom shall not be less than 190 centimetres in any space – or part of any space – in such accommodation, where it is satisfied that this is reasonable and will not result in discomfort to the fishers.

#### *Openings into and between accommodation spaces*

16. There shall be no direct openings into sleeping rooms from fish rooms and machinery spaces, except for the purpose of emergency escape. Where reasonable and practicable, direct openings from galleys, storerooms, drying rooms or communal sanitary areas shall be avoided unless expressly provided otherwise.

17. For vessels of 24 metres in length and over, there shall be no direct openings, except for the purpose of emergency escape, into sleeping rooms from fish rooms and machinery spaces or from galleys, storerooms, drying rooms or communal sanitary areas; that part of the bulkhead separating such places from sleeping rooms and external bulkheads shall be efficiently constructed of steel or another approved material and shall be watertight and gas-tight. This provision does not exclude the possibility of sanitary areas being shared between two cabins.

#### *Insulation*

18. Accommodation spaces shall be adequately insulated; the materials used to construct internal bulkheads, panelling and sheeting, and floors and joinings shall be suitable for the purpose and shall be conducive to ensuring a healthy environment. Sufficient drainage shall be provided in all accommodation spaces.

#### *Other*

19. All practicable measures shall be taken to protect fishing vessels' crew accommodation against flies and other insects, particularly when vessels are operating in mosquito-infested areas.

20. Emergency escapes from all crew accommodation spaces shall be provided as necessary.

#### *Noise and vibration*

21. The competent authority shall take measures to limit excessive noise and vibration in accommodation spaces and, as far as practicable, in accordance with relevant international standards.

22. For vessels of 24 metres in length and over, the competent authority shall adopt standards for noise and vibration in accommodation spaces which shall ensure adequate protection to fishers from the effects of such noise and vibration, including the effects of noise- and vibration-induced fatigue.

#### *Ventilation*

23. Accommodation spaces shall be ventilated, taking into account climatic conditions. The system of ventilation shall supply air in a satisfactory condition whenever fishers are on board.

24. Ventilation arrangements or other measures shall be such as to protect non-smokers from tobacco smoke.

---

25. Vessels of 24 metres in length and over shall be equipped with a system of ventilation for accommodation, which shall be controlled so as to maintain the air in a satisfactory condition and to ensure sufficiency of air movement in all weather conditions and climates. Ventilation systems shall be in operation at all times when fishers are on board.

#### *Heating and air conditioning*

26. Accommodation spaces shall be adequately heated, taking into account climatic conditions.

27. For vessels of 24 metres in length and over, adequate heat shall be provided, through an appropriate heating system, except in fishing vessels operating exclusively in tropical climates. The system of heating shall provide heat in all conditions, as necessary, and shall be in operation when fishers are living or working on board, and when conditions so require.

28. For vessels of 24 metres in length and over, with the exception of those regularly engaged in areas where temperate climatic conditions do not require it, air conditioning shall be provided in accommodation spaces, the bridge, the radio room and any centralized machinery control room.

#### *Lighting*

29. All accommodation spaces shall be provided with adequate light.

30. Wherever practicable, accommodation spaces shall be lit with natural light in addition to artificial light. Where sleeping spaces have natural light, a means of blocking the light shall be provided.

31. Adequate reading light shall be provided for every berth in addition to the normal lighting of the sleeping room.

32. Emergency lighting shall be provided in sleeping rooms.

33. Where a vessel is not fitted with emergency lighting in mess rooms, passageways, and any other spaces that are or may be used for emergency escape, permanent night lighting shall be provided in such spaces.

34. For vessels of 24 metres in length and over, lighting in accommodation spaces shall meet a standard established by the competent authority. In any part of the accommodation space available for free movement, the minimum standard for such lighting shall be such as to permit a person with normal vision to read an ordinary printed newspaper on a clear day.

#### *Sleeping rooms*

##### *General*

35. Where the design, dimensions or purpose of the vessel allow, the sleeping accommodation shall be located so as to minimize the effects of motion and acceleration but shall in no case be located forward of the collision bulkhead.

---

### *Floor area*

36. The number of persons per sleeping room and the floor area per person, excluding space occupied by berths and lockers, shall be such as to provide adequate space and comfort for the fishers on board, taking into account the service of the vessel.

37. For vessels of 24 metres in length and over but which are less than 45 metres in length, the floor area per person of sleeping rooms, excluding space occupied by berths and lockers, shall not be less than 1.5 square metres.

38. For vessels of 45 metres in length and over, the floor area per person of sleeping rooms, excluding space occupied by berths and lockers, shall not be less than 2 square metres.

39. Notwithstanding the provisions of paragraphs 37 and 38, the competent authority may, after consultation, decide that the minimum permitted floor area per person of sleeping rooms, excluding space occupied by berths and lockers, shall not be less than 1.0 and 1.5 square metres respectively, where the competent authority is satisfied that this is reasonable and will not result in discomfort to the fishers.

### *Persons per sleeping room*

40. To the extent not expressly provided otherwise, the number of persons allowed to occupy each sleeping room shall not be more than six.

41. For vessels of 24 metres in length and over, the number of persons allowed to occupy each sleeping room shall not be more than four. The competent authority may permit exceptions to this requirement in particular cases if the size, type or intended service of the vessel makes the requirement unreasonable or impracticable.

42. To the extent not expressly provided otherwise, a separate sleeping room or sleeping rooms shall be provided for officers, wherever practicable.

43. For vessels of 24 metres in length and over, sleeping rooms for officers shall be for one person wherever possible and in no case shall the sleeping room contain more than two berths. The competent authority may permit exceptions to the requirements of this paragraph in particular cases if the size, type or intended service of the vessel makes the requirements unreasonable or impracticable.

### *Other*

44. The maximum number of persons to be accommodated in any sleeping room shall be legibly and indelibly marked in a place in the room where it can be conveniently seen.

45. Individual berths of appropriate dimensions shall be provided. Mattresses shall be of a suitable material.

46. For vessels of 24 metres in length and over, the minimum inside dimensions of the berths shall not be less than 198 by 80 centimetres.

47. Notwithstanding the provisions of paragraph 46, the competent authority may, after consultation, decide that the minimum inside dimensions of the berths shall not be less than 190 by 70 centimetres, where it is satisfied that this is reasonable and will not result in discomfort to the fishers.

---

48. Sleeping rooms shall be so planned and equipped as to ensure reasonable comfort for the occupants and to facilitate tidiness. Equipment provided shall include berths, individual lockers sufficient for clothing and other personal effects, and a suitable writing surface.

49. For vessels of 24 metres in length and over, a desk suitable for writing, with a chair, shall be provided.

50. Sleeping accommodation shall be situated or equipped, as practicable, so as to provide appropriate levels of privacy for men and for women.

#### *Mess rooms*

51. Mess rooms shall be as close as possible to the galley, but in no case shall be located forward of the collision bulkhead.

52. Vessels shall be provided with mess-room accommodation suitable for their service. To the extent not expressly provided otherwise, mess-room accommodation shall be separate from sleeping quarters, where practicable.

53. For vessels of 24 metres in length and over, mess-room accommodation shall be separate from sleeping quarters.

54. The dimensions and equipment of each mess room shall be sufficient for the number of persons likely to use it at any one time.

55. For vessels of 24 metres in length and over, a refrigerator of sufficient capacity and facilities for making hot and cold drinks shall be available and accessible to fishers at all times.

#### *Tubs or showers, toilets and washbasins*

56. Sanitary facilities, which include toilets, washbasins, and tubs or showers, shall be provided for all persons on board, as appropriate for the service of the vessel. These facilities shall meet at least minimum standards of health and hygiene and reasonable standards of quality.

57. The sanitary accommodation shall be such as to eliminate contamination of other spaces as far as practicable. The sanitary facilities shall allow for reasonable privacy.

58. Cold fresh water and hot fresh water shall be available to all fishers and other persons on board, in sufficient quantities to allow for proper hygiene. The competent authority may establish, after consultation, the minimum amount of water to be provided.

59. Where sanitary facilities are provided, they shall be fitted with ventilation to the open air, independent of any other part of the accommodation.

60. All surfaces in sanitary accommodation shall be such as to facilitate easy and effective cleaning. Floors shall have a non-slip deck covering.

61. On vessels of 24 metres in length and over, for all fishers who do not occupy rooms to which sanitary facilities are attached, there shall be provided at least one tub or shower or both, one toilet, and one washbasin for every four persons or fewer.

---

62. Notwithstanding the provisions of paragraph 61, the competent authority may, after consultation, decide that there shall be provided at least one tub or shower or both and one washbasin for every six persons or fewer, and at least one toilet for every eight persons or fewer, where the competent authority is satisfied that this is reasonable and will not result in discomfort to the fishers.

#### *Laundry facilities*

63. Amenities for washing and drying clothes shall be provided as necessary, taking into account the service of the vessel, to the extent not expressly provided otherwise.

64. For vessels of 24 metres in length and over, adequate facilities for washing, drying and ironing clothes shall be provided.

65. For vessels of 45 metres in length and over, adequate facilities for washing, drying and ironing clothes shall be provided in a compartment separate from sleeping rooms, mess rooms and toilets, and shall be adequately ventilated, heated and equipped with lines or other means for drying clothes.

#### *Facilities for sick and injured fishers*

66. Whenever necessary, a cabin shall be made available for a fisher who suffers illness or injury.

67. For vessels of 45 metres in length and over, there shall be a separate sick bay. The space shall be properly equipped and shall be maintained in a hygienic state.

#### *Other facilities*

68. A place for hanging foul-weather gear and other personal protective equipment shall be provided outside of, but convenient to, sleeping rooms.

#### *Bedding, mess utensils and miscellaneous provisions*

69. Appropriate eating utensils, and bedding and other linen shall be provided to all fishers on board. However, the cost of the linen can be recovered as an operational cost if the collective agreement or the fisher's work agreement so provides.

#### *Recreational facilities*

70. For vessels of 24 metres in length and over, appropriate recreational facilities, amenities and services shall be provided for all fishers on board. Where appropriate, mess rooms may be used for recreational activities.

#### *Communication facilities*

71. All fishers on board shall be given reasonable access to communication facilities, to the extent practicable, at a reasonable cost and not exceeding the full cost to the fishing vessel owner.

---

### *Galley and food storage facilities*

72. Cooking equipment shall be provided on board. To the extent not expressly provided otherwise, this equipment shall be fitted, where practicable, in a separate galley.

73. The galley, or cooking area where a separate galley is not provided, shall be of adequate size for the purpose, well lit and ventilated, and properly equipped and maintained.

74. For vessels of 24 metres in length and over, there shall be a separate galley.

75. The containers of butane or propane gas used for cooking purposes in a galley shall be kept on the open deck and in a shelter which is designed to protect them from external heat sources and external impact.

76. A suitable place for provisions of adequate capacity shall be provided which can be kept dry, cool and well ventilated in order to avoid deterioration of the stores and, to the extent not expressly provided otherwise, refrigerators or other low-temperature storage shall be used, where possible.

77. For vessels of 24 metres in length and over, a provisions storeroom and refrigerator and other low-temperature storage shall be used.

### *Food and potable water*

78. Food and potable water shall be sufficient, having regard to the number of fishers, and the duration and nature of the voyage. In addition, they shall be suitable in respect of nutritional value, quality, quantity and variety, having regard as well to the fishers' religious requirements and cultural practices in relation to food.

79. The competent authority may establish requirements for the minimum standards and quantity of food and water to be carried on board.

### *Clean and habitable conditions*

80. Accommodation shall be maintained in a clean and habitable condition and shall be kept free of goods and stores which are not the personal property of the occupants or for their safety or rescue.

81. Galley and food storage facilities shall be maintained in a hygienic condition.

82. Waste shall be kept in closed, well-sealed containers and removed from food-handling areas whenever necessary.

### *Inspections by the skipper or under the authority of the skipper*

83. For vessels of 24 metres in length and over, the competent authority shall require frequent inspections to be carried out, by or under the authority of the skipper, to ensure that:

- (a) accommodation is clean, decently habitable and safe, and is maintained in a good state of repair;
- (b) food and water supplies are sufficient; and

- 
- (c) galley and food storage spaces and equipment are hygienic and in a proper state of repair.

The results of such inspections, and the actions taken to address any deficiencies found, shall be recorded and available for review.

### *Variations*

84. The competent authority, after consultation, may permit derogations from the provisions in this Annex to take into account, without discrimination, the interests of fishers having differing and distinctive religious and social practices, on condition that such derogations do not result in overall conditions less favourable than those which would result from the application of this Annex.

---

## **B. Proposed Recommendation concerning work in the fishing sector**

The General Conference of the International Labour Organization,

Having been convened at Geneva by the Governing Body of the International Labour Office, and having met in its ninety-sixth Session on 30 May 2007, and

Noting the Vocational Training (Fishermen) Recommendation, 1966 (No. 126), and

Taking into account the need to supersede the Work in Fishing Recommendation, 2005 (No. 196), which revised the Hours of Work (Fishing) Recommendation, 1920 (No. 7), and

Having decided upon the adoption of certain proposals with regard to work in the fishing sector, which is the fourth item on the agenda of the session, and

Having determined that these proposals shall take the form of a Recommendation supplementing the Work in Fishing Convention, 2007 (hereinafter referred to as “the Convention”) and superseding the Work in Fishing Recommendation, 2005 (No. 196);

adopts this ... day of June of the year two thousand and seven the following Recommendation, which may be cited as the Work in Fishing Recommendation, 2007.

### **PART I. CONDITIONS FOR WORK ON BOARD FISHING VESSELS**

#### *Protection of young persons*

1. Members should establish the requirements for the pre-sea training of persons between the ages of 16 and 18 working on board fishing vessels, taking into account international instruments concerning training for work on board fishing vessels, including occupational safety and health issues such as night work, hazardous tasks, work with dangerous machinery, manual handling and transport of heavy loads, work in high latitudes, work for excessive periods of time and other relevant issues identified after an assessment of the risks concerned.

2. The training of persons between the ages of 16 and 18 might be provided through participation in an apprenticeship or approved training programme, which should operate under established rules and be monitored by the competent authority, and should not interfere with the person’s general education.

3. Members should take measures to ensure that the safety, lifesaving and survival equipment carried on board fishing vessels carrying persons under the age of 18 is appropriate for the size of such persons.

4. The working hours of fishers under the age of 18 should not exceed eight hours per day and 40 hours per week, and they should not work overtime except where unavoidable for safety reasons.

5. Fishers under the age of 18 should be assured sufficient time for all meals and a break of at least one hour for the main meal of the day.

---

### *Medical examination*

6. When prescribing the nature of the examination, Members should pay due regard to the age of the person to be examined and the nature of the duties to be performed.

7. The medical certificate should be signed by a medical practitioner approved by the competent authority.

8. Arrangements should be made to enable a person who, after examination, is determined to be unfit for work on board fishing vessels or certain types of fishing vessels, or for certain types of work on board, to apply for a further examination by a medical referee or referees who should be independent of any fishing vessel owner or of any organization of fishing vessel owners or fishers.

9. The competent authority should take into account international guidance on medical examination and certification of persons working at sea, such as the (ILO/WHO) *Guidelines for Conducting Pre-Sea and Periodic Medical Fitness Examinations for Seafarers*.

10. For fishers exempted from the application of the provisions concerning medical examination in the Convention, the competent authority should take adequate measures to provide health surveillance for the purpose of occupational safety and health.

### *Competency and training*

11. Members should:

- (a) take into account generally accepted international standards concerning training and competencies of fishers in determining the competencies required for skippers, mates, engineers and other persons working on board fishing vessels;
- (b) address the following issues, with regard to the vocational training of fishers: national planning and administration, including coordination; financing and training standards; training programmes, including pre-vocational training and also short courses for working fishers; methods of training; and international cooperation; and
- (c) ensure that there is no discrimination with regard to access to training.

## PART II. CONDITIONS OF SERVICE

### *Record of service*

12. At the end of each contract, a record of service in regard to that contract should be made available to the fisher concerned, or entered in the fisher's service book.

### *Special measures*

13. For fishers excluded from the scope of the Convention, the competent authority should take measures to provide them with adequate protection with respect to their conditions of work and means of dispute settlement.

---

### *Payment of fishers*

14. Fishers should have the right to advances against earnings under prescribed conditions.

15. For vessels of 24 metres in length and over, all fishers should be entitled to minimum payment in accordance with national laws, regulations or collective agreements.

### PART III. ACCOMMODATION

16. When establishing requirements or guidance, the competent authority should take into account relevant international guidance on accommodation, food, and health and hygiene relating to persons working or living on board vessels, including the most recent editions of the (FAO/ILO/IMO) *Code of Safety for Fishermen and Fishing Vessels* and the (FAO/ILO/IMO) *Voluntary Guidelines for the Design, Construction and Equipment of Small Fishing Vessels*.

17. The competent authority should work with relevant organizations and agencies to develop and disseminate educational material and on-board information and guidance concerning safe and healthy accommodation and food on board fishing vessels.

18. Inspections of crew accommodation required by the competent authority should be carried out together with initial or periodic surveys or inspections for other purposes.

#### *Design and construction*

19. Adequate insulation should be provided for exposed decks over crew accommodation spaces, external bulkheads of sleeping rooms and mess rooms, machinery casings and boundary bulkheads of galleys and other spaces in which heat is produced, and, as necessary, to prevent condensation or overheating in sleeping rooms, mess rooms, recreation rooms and passageways.

20. Protection should be provided from the heat effects of any steam or hot water service pipes. Main steam and exhaust pipes should not pass through crew accommodation or through passageways leading to crew accommodation. Where this cannot be avoided, pipes should be adequately insulated and encased.

21. Materials and furnishings used in accommodation spaces should be impervious to dampness, easy to keep clean and not likely to harbour vermin.

#### *Noise and vibration*

22. Noise levels for working and living spaces, which are established by the competent authority, should be in conformity with the guidelines of the International Labour Organization on exposure levels to ambient factors in the workplace and, where applicable, the specific protection recommended by the International Maritime Organization, together with any subsequent amending and supplementary instruments for acceptable noise levels on board ships.

23. The competent authority, in conjunction with the competent international bodies and with representatives of organizations of fishing vessel owners and fishers and taking into account, as appropriate, relevant international standards, should review on an ongoing basis the problem of vibration on board fishing vessels with the objective of improving the protection of fishers, as far as practicable, from the adverse effects of vibration.

---

(1) Such review should cover the effect of exposure to excessive vibration on the health and comfort of fishers and the measures to be prescribed or recommended to reduce vibration on fishing vessels to protect fishers.

(2) Measures to reduce vibration, or its effects, to be considered should include:

- (a) instruction of fishers in the dangers to their health of prolonged exposure to vibration;
- (b) provision of approved personal protective equipment to fishers where necessary; and
- (c) assessment of risks and reduction of exposure in sleeping rooms, mess rooms, recreational accommodation and catering facilities and other fishers' accommodation by adopting measures in accordance with the guidance provided by the (ILO) *Code of practice on ambient factors in the workplace* and any subsequent revisions, taking into account the difference between exposure in the workplace and in the living space.

### *Heating*

24. The heating system should be capable of maintaining the temperature in crew accommodation at a satisfactory level, as established by the competent authority, under normal conditions of weather and climate likely to be met with on service, and should be designed so as not to endanger the safety or health of the fishers or the safety of the vessel.

### *Lighting*

25. Methods of lighting should not endanger the safety or health of the fishers or the safety of the vessel.

### *Sleeping rooms*

26. Each berth should be fitted with a comfortable mattress with a cushioned bottom or a combined mattress, including a spring bottom, or a spring mattress. The cushioning material used should be made of approved material. Berths should not be placed side by side in such a way that access to one berth can be obtained only over another. The lower berth in a double tier should not be less than 0.3 metres above the floor, and the upper berth should be fitted with a dust-proof bottom and placed approximately midway between the bottom of the lower berth and the lower side of the deck head beams. Berths should not be arranged in tiers of more than two. In the case of berths placed along the vessel's side, there should be only a single tier when a sidelight is situated above a berth.

27. Sleeping rooms should be fitted with curtains for the sidelights, as well as a mirror, small cabinets for toilet requisites, a book rack and a sufficient number of coat hooks.

28. As far as practicable, berthing of crew members should be so arranged that watches are separated and that no day worker shares a room with a watchkeeper.

29. On vessels of 24 metres in length and over, separate sleeping rooms for men and for women should be provided.

### *Sanitary accommodation*

30. Sanitary accommodation spaces should have:

- 
- (a) floors of approved durable material which can be easily cleaned, and which are impervious to dampness and properly drained;
  - (b) bulkheads of steel or other approved material which should be watertight up to at least 0.23 metres above the level of the deck;
  - (c) sufficient lighting, heating and ventilation; and
  - (d) soil pipes and waste pipes of adequate dimensions which are constructed so as to minimize the risk of obstruction and to facilitate cleaning; such pipes should not pass through fresh water or drinking-water tanks, nor should they, if practicable, pass overhead in mess rooms or sleeping accommodation.

31. Toilets should be of an approved type and provided with an ample flush of water, available at all times and independently controllable. Where practicable, they should be situated convenient to, but separate from, sleeping rooms and washrooms. Where there is more than one toilet in a compartment, the toilets should be sufficiently screened to ensure privacy.

32. Separate sanitary facilities should be provided for men and for women.

#### *Recreational facilities*

33. Where recreational facilities are required, furnishings should include, as a minimum, a bookcase and facilities for reading, writing and, where practicable, games. Recreational facilities and services should be reviewed frequently to ensure that they are appropriate in the light of changes in the needs of fishers resulting from technical, operational and other developments. Consideration should also be given to including the following facilities at no cost to the fishers, where practicable:

- (a) a smoking room;
- (b) television viewing and the reception of radio broadcasts;
- (c) projection of films or video films, the stock of which should be adequate for the duration of the voyage and, where necessary, changed at reasonable intervals;
- (d) sports equipment including exercise equipment, table games, and deck games;
- (e) a library containing vocational and other books, the stock of which should be adequate for the duration of the voyage and changed at reasonable intervals;
- (f) facilities for recreational handicrafts; and
- (g) electronic equipment such as radio, television, video recorder, DVD/CD player, personal computer and software, and cassette recorder/player.

#### *Food*

34. Fishers employed as cooks should be trained and qualified for their position on board.

---

PART IV. MEDICAL CARE, HEALTH PROTECTION  
AND SOCIAL SECURITY

*Medical care on board*

35. The competent authority should establish a list of medical supplies and equipment appropriate to the risks concerned that should be carried on fishing vessels; such list should include women's sanitary protection supplies together with discreet, environmentally friendly disposal units.

36. Fishing vessels carrying 100 or more fishers should have a qualified medical doctor on board.

37. Fishers should receive training in basic first aid in accordance with national laws and regulations, taking into account applicable international instruments.

38. A standard medical report form should be specially designed to facilitate the confidential exchange of medical and related information concerning individual fishers between the fishing vessel and the shore in cases of illness or injury.

39. For vessels of 24 metres in length and over, in addition to the provisions of Article 32 of the Convention, the following elements should be taken into account:

- (a) when prescribing the medical equipment and supplies to be carried on board, the competent authority should take into account international recommendations in this field, such as those contained in the most recent editions of the (ILO/IMO/WHO) *International Medical Guide for Ships* and the (WHO) *Model List of Essential Medicines*, as well as advances in medical knowledge and approved methods of treatment;
- (b) inspections of medical equipment and supplies should take place at intervals of no more than 12 months; the inspector should ensure that expiry dates and conditions of storage of all medicines are checked, the contents of the medicine chest are listed and conform to the medical guide used nationally, and medical supplies are labelled with generic names in addition to any brand names used, and with expiry dates and conditions of storage;
- (c) the medical guide should explain how the contents of the medical equipment and supplies are to be used, and should be designed to enable persons other than a medical doctor to care for the sick or injured on board, both with and without medical advice by radio or satellite communication; the guide should be prepared taking into account international recommendations in this field, including those contained in the most recent editions of the (ILO/IMO/WHO) *International Medical Guide for Ships* and the (IMO) *Medical First Aid Guide for Use in Accidents Involving Dangerous Goods*; and
- (d) medical advice provided by radio or satellite communication should be available free of charge to all vessels irrespective of the flag they fly.

---

## *Occupational safety and health*

### *Research, dissemination of information and consultation*

40. In order to contribute to the continuous improvement of safety and health of fishers, Members should have in place policies and programmes for the prevention of accidents on board fishing vessels which should provide for the gathering and dissemination of occupational safety and health materials, research and analysis, taking into consideration technological progress and knowledge in the field of occupational safety and health as well as of relevant international instruments.

41. The competent authority should take measures to ensure regular consultations on safety and health matters with the aim of ensuring that all concerned are kept reasonably informed of national, international and other developments in the field and on their possible application to fishing vessels flying the flag of the Member.

42. When ensuring that fishing vessel owners, skippers, fishers and other relevant persons receive sufficient and suitable guidance, training material, or other appropriate information, the competent authority should take into account relevant international standards, codes, guidance and other information. In so doing, the competent authority should keep abreast of and utilize international research and guidance concerning safety and health in the fishing sector, including relevant research in occupational safety and health in general which may be applicable to work on board fishing vessels.

43. Information concerning particular hazards should be brought to the attention of all fishers and other persons on board through official notices containing instructions or guidance, or other appropriate means.

44. Joint committees on occupational safety and health should be established:

- (a) ashore; or
- (b) on fishing vessels, where determined by the competent authority, after consultation, to be practicable in light of the number of fishers on board the vessel.

### *Occupational safety and health management systems*

45. When establishing methods and programmes concerning safety and health in the fishing sector, the competent authority should take into account any relevant international guidance concerning occupational safety and health management systems, including the *Guidelines on occupational safety and health management systems, ILO-OSH 2001*.

### *Risk evaluation*

46. (1) Risk evaluation in relation to fishing should be conducted, as appropriate, with the participation of fishers or their representatives and should include:

- (a) risk assessment and management;
- (b) training, taking into consideration the relevant provisions of Chapter III of the International Convention on Standards of Training, Certification and Watchkeeping for Fishing Vessel Personnel, 1995 (STCW-F Convention) adopted by the IMO; and
- (c) on-board instruction of fishers.

---

(2) To give effect to subparagraph (1)(a), Members, after consultation, should adopt laws, regulations or other measures requiring:

- (a) the regular and active involvement of all fishers in improving safety and health by continually identifying hazards, assessing risks and taking action to address risks through safety management;
- (b) an occupational safety and health management system that may include an occupational safety and health policy, provisions for fisher participation and provisions concerning organizing, planning, implementing and evaluating the system and taking action to improve the system; and
- (c) a system for the purpose of assisting in the implementation of a safety and health policy and programme and providing fishers with a forum to influence safety and health matters; on-board prevention procedures should be designed so as to involve fishers in the identification of hazards and potential hazards and in the implementation of measures to reduce or eliminate such hazards.

(3) When developing the provisions referred to in subparagraph (1)(a), Members should take into account the relevant international instruments on risk assessment and management.

#### *Technical specifications*

47. Members should address the following, to the extent practicable and as appropriate to the conditions in the fishing sector:

- (a) seaworthiness and stability of fishing vessels;
- (b) radio communications;
- (c) temperature, ventilation and lighting of working areas;
- (d) mitigation of the slipperiness of deck surfaces;
- (e) machinery safety, including guarding of machinery;
- (f) vessel familiarization for fishers and fisheries observers new to the vessel;
- (g) personal protective equipment;
- (h) firefighting and lifesaving;
- (i) loading and unloading of the vessel;
- (j) lifting gear;
- (k) anchoring and mooring equipment;
- (l) safety and health in living quarters;
- (m) noise and vibration in work areas;
- (n) ergonomics, including in relation to the layout of workstations and manual lifting and handling;

- 
- (o) equipment and procedures for the catching, handling, storage and processing of fish and other marine resources;
  - (p) vessel design, construction and modification relevant to occupational safety and health;
  - (q) navigation and vessel handling;
  - (r) hazardous materials used on board the vessel;
  - (s) safe means of access to and exit from fishing vessels in port;
  - (t) special safety and health requirements for young persons;
  - (u) prevention of fatigue; and
  - (v) other issues related to safety and health.

48. When developing laws, regulations or other measures concerning technical standards relating to safety and health on board fishing vessels, the competent authority should take into account the most recent edition of the (FAO/ILO/IMO) *Code of Safety for Fishermen and Fishing Vessels, Part A*.

#### *Establishment of a list of occupational diseases*

49. Members should establish a list of diseases known to arise out of exposure to dangerous substances or conditions in the fishing sector.

#### *Social security*

50. For the purpose of extending social security protection progressively to all fishers, Members should maintain up to date information on the following:

- (a) the percentage of fishers covered;
- (b) the range of contingencies covered; and
- (c) the level of benefits.

51. Every person protected under Article 34 of the Convention should have a right of appeal in the case of a refusal of the benefit or of an adverse determination as to the quality or quantity of the benefit.

52. The protections referred to in Articles 38 and 39 of the Convention should be granted throughout the contingency covered.

### PART V. OTHER PROVISIONS

53. The competent authority should develop an inspection policy for authorized officers to take the measures referred to in paragraph 2 of Article 43 of the Convention.

54. Members should cooperate with each other to the maximum extent possible in the adoption of internationally agreed guidelines on the policy referred to in paragraph 53 of this Recommendation.

---

55. A Member, in its capacity as a coastal State, when granting licences for fishing in its exclusive economic zone, may require that fishing vessels comply with the requirements of the Convention. If such licences are issued by coastal States, these States should take into account certificates or other valid documents stating that the vessel concerned has been inspected by the competent authority or on its behalf and has been found to be in compliance with the provisions of the Convention.

---

## Annex

### Resolution concerning promotion of the ratification of the Work in Fishing Convention, 2007

The General Conference of the International Labour Organization,

Having adopted the Work in Fishing Convention, 2007,

Noting that the success of the Convention will depend upon its being widely ratified, with the effective implementation of its requirements,

Mindful that the mandate of the Organization includes the promotion of decent work and living conditions;

Invites the Governing Body of the International Labour Office to request the Director-General to give due priority to conducting tripartite work to develop guidelines for flag State implementation and to develop guidelines to establish national action plans for progressive implementation of relevant provisions of the Convention,

Further invites the Governing Body to request the Director-General to give due consideration in the programme and budget for technical cooperation programmes to promote the ratification of the Convention and to assist members requesting assistance in its implementation in such areas as:

- technical assistance for Members, including capacity building for national administrations as well as representative organizations of fishing vessel owners and fishers, and the drafting of national legislation to meet the requirements of the Convention;
- the development of training materials for inspectors and other staff;
- the training of inspectors;
- the development of promotional materials and advocacy tools for the Convention;
- national and regional seminars, as well as workshops on the Convention; and
- promoting the ratification and implementation of the Convention within ILO Decent Work Country Programmes.

---

## Resolution concerning port State control

The General Conference of the International Labour Organization,

Having adopted the Work in Fishing Convention, 2007,

Considering that this Convention aims to establish a new pillar of international legislation for the fishing industry,

Mindful of the mandate of the Organization to promote decent work and living conditions,

Noting that sustainable development consists of three pillars: social, economic and environmental,

Noting Articles 43 and 44 of the adopted Convention, which provide for port State responsibilities and control under the terms of “no more favourable treatment”,

Noting that the uniform and harmonized implementation of port State responsibilities in accordance with the relevant provisions of the Convention will contribute to the successful implementation of the Convention,

Considering that, given the global nature of the fishing industry, it is important for port State control officers to receive proper guidelines for the performance of their duties,

Recognizing the work done by the International Maritime Organization (IMO) and the Food and Agriculture Organization of the United Nations (FAO) in this area, and the importance that the international community attaches to cooperation among international agencies;

Invites the Governing Body of the International Labour Office to convene a tripartite meeting of experts of the fishing sector to develop suitable guidance for port State control officers concerning the relevant provisions of the Work in Fishing Convention, 2007, and to request that the Office seek the technical expertise of the IMO and FAO and other relevant international bodies in this regard.

---

## **Resolution concerning tonnage measurement and accommodation**

The General Conference of the International Labour Organization,

Having adopted the Work in Fishing Convention, 2007,

Noting the difficulties caused by making an equivalence between the measurement of the size of vessels in terms of length and gross tonnage and the impact it has in the fishing industries,

Recognizing the impact the International Convention on Tonnage Measurement of Ships, 1969, has on the safe design of vessels, including their accommodation,

Recognizing also the importance of accommodation for the provision of decent work for fishers,

Recalling the resolution concerning tonnage measurement and the accommodation of crews adopted by the 29th Session of the Joint Maritime Commission, which was noted by the Governing Body of the International Labour Office at its 280th Session,

Aware that the International Maritime Organization (IMO) is considering the effects of the International Convention on Tonnage Measurement of Ships, 1969, on ship safety, accommodation, safety, health and welfare, and port charges;

Invites the Governing Body to request the Director-General to monitor these developments and to evaluate any amendment to or interpretation agreements of the International Convention on Tonnage Measurement of Ships, 1969, which may have an impact on the Work in Fishing Convention, 2007, especially on Annex III;

Invites the Governing Body to request the Director-General to report to it any developments which may have an impact on the Work in Fishing Convention, 2007, especially on Annex III,

Further invites the Governing Body to act on such a report by giving due priority, if required, to convening a tripartite meeting of experts, as provided for in Article 45 of the Work in Fishing Convention, 2007, to address the matter with a view to maintaining the relevance of Annex III of that Convention.

---

## **Resolution concerning promotion of welfare for the fishers**

The General Conference of the International Labour Organization,

Having adopted the Work in Fishing Convention, 2007,

Recognizing that the provision of adequate social protection and social security for all is a universally accepted development goal,

Acknowledging the specific nature of the fishing industry and the fact that fishers require special protection;

Invites the Governing Body of the International Labour Office to request the Director-General, in a cost-effective manner, to consider, as appropriate, the following social issues related to fisheries, as part of its programme and budget:

- promotion of the provision of effective social protection and social security to all fishers within the ongoing work of the Organization so as to secure effective social protection for all;
- the particular employment problems that are faced by women in the fishing industry, including discrimination and the barriers to access to employment in the industry;
- the causes of occupational diseases and injuries in the fishing sector;
- the need to encourage member States to strongly ensure that fishers on fishing vessels in their ports are able to have access to fishers' and seafarers' welfare facilities;
- the need to provide member States and social partners with advice on developing strategies to improve the retention of fishers and the recruitment and retention of new entrants in fisheries;
- the issues relating to migrant fishers; and
- the education of fishers and their families by working together with appropriate bodies for the prevention of HIV/AIDS among fishers and in fishing communities.

## **TEXT OF THE CONVENTION CONCERNING WORK IN THE FISHING SECTOR**

The General Conference of the International Labour Organization,  
Having been convened at Geneva by the Governing Body of the  
International Labour Office, and having met in its ninety-sixth  
Session on 30 May 2007, and

Recognizing that globalization has a profound impact on the fishing  
sector, and

Noting the ILO Declaration on Fundamental Principles and Rights at  
Work, 1998, and

Taking into consideration the fundamental rights to be found in the  
following international labour Conventions: the Forced Labour  
Convention, 1930 (No. 29), the Freedom of Association and  
Protection of the Right to Organise Convention, 1948 (No. 87), the  
Right to Organise and Collective Bargaining Convention, 1949 (No.  
98), the Equal Remuneration Convention, 1951 (No. 100), the  
Abolition of Forced Labour Convention, 1957 (No. 105), the  
Discrimination (Employment and Occupation) Convention, 1958  
(No. 111), the Minimum Age Convention, 1973 (No. 138), and the  
Worst Forms of Child Labour Convention, 1999 (No. 182), and

Noting the relevant instruments of the International Labour  
Organization, in particular the Occupational Safety and Health  
Convention (No. 155) and Recommendation (No. 164), 1981, and  
the Occupational Health Services Convention (No. 161) and  
Recommendation (No. 171), 1985, and

Noting, in addition, the Social Security (Minimum Standards)  
Convention, 1952 (No. 102), and considering that the provisions of  
Article 77 of that Convention should not be an obstacle to  
protection extended by Members to fishers under social security  
schemes, and

Recognizing that the International Labour Organization considers  
fishing as a hazardous occupation when compared to other  
occupations, and

Noting also Article 1, paragraph 3, of the Seafarers' Identity  
Documents Convention (Revised), 2003 (No. 185), and

Mindful of the core mandate of the Organization, which is to promote  
decent conditions of work, and

Mindful of the need to protect and promote the rights of fishers in this  
regard, and

Recalling the United Nations Convention on the Law of the Sea, 1982,  
and

Taking into account the need to revise the following international  
Conventions adopted by the International Labour Conference

---

## **TEXTE DE LA CONVENTION CONCERNANT LE TRAVAIL DANS LE SECTEUR DE LA PÊCHE**

La Conférence générale de l'Organisation internationale du Travail,  
Convoquée à Genève par le Conseil d'administration du Bureau  
international du Travail, et s'y étant réunie le 30 mai 2007, en sa  
quatre-vingt-seizième session;

Reconnaissant que la mondialisation a un impact profond sur le secteur  
de la pêche;

Notant la Déclaration de l'OIT relative aux principes et droits  
fondamentaux au travail, 1998;

Tenant compte des droits fondamentaux énoncés dans les conventions  
internationales du travail suivantes: la convention (n° 29) sur le  
travail forcé, 1930, la convention (n° 87) sur la liberté syndicale et la  
protection du droit syndical, 1948, la convention (n° 98) sur le droit  
d'organisation et de négociation collective, 1949, la convention  
(n° 100) sur l'égalité de rémunération, 1951, la convention (n° 105)  
sur l'abolition du travail forcé, 1957, la convention (n° 111)  
concernant la discrimination (emploi et profession), 1958, la  
convention (n° 138) sur l'âge minimum, 1973, et la convention  
(n° 182) sur les pires formes de travail des enfants, 1999;

Notant les instruments pertinents de l'Organisation internationale du  
Travail, en particulier la convention (n° 155) et la  
recommandation (n° 164) sur la sécurité et la santé des  
travailleurs, 1981, ainsi que la convention (n° 161) et la  
recommandation (n° 171) sur les services de santé au travail, 1985;

Notant en outre la convention (n° 102) concernant la sécurité sociale  
(norme minimum), 1952, et considérant que les dispositions de  
l'article 77 de ladite convention ne devraient pas faire obstacle à la  
protection offerte aux pêcheurs par les Membres dans le cadre des  
systèmes de sécurité sociale;

Reconnaissant que l'Organisation internationale du Travail considère  
la pêche comme une activité dangereuse par rapport à d'autres;

Notant également le paragraphe 3 de l'article 1 de la convention  
(n° 185) sur les pièces d'identité des gens de mer (révisée), 2003;

Consciente que l'Organisation a pour mandat fondamental de  
promouvoir des conditions de travail décentes;

Consciente de la nécessité de protéger et de promouvoir les droits des  
pêcheurs en la matière;

Rappelant la Convention des Nations Unies sur le droit de la mer, 1982;

Tenant compte de la nécessité de réviser les conventions  
internationales suivantes adoptées par la Conférence

---

internationale du Travail concernant spécifiquement le secteur de la pêche, à savoir la convention (n° 112) sur l'âge minimum (pêcheurs), 1959, la convention (n° 113) sur l'examen médical des pêcheurs, 1959, la convention (n° 114) sur le contrat d'engagement des pêcheurs, 1959, et la convention (n° 126) sur le logement à bord des bateaux de pêche, 1966, afin de mettre à jour ces instruments et d'atteindre un plus grand nombre de pêcheurs dans le monde, en particulier ceux travaillant à bord de navires plus petits;

Notant que l'objectif de la présente convention est d'assurer que les pêcheurs bénéficient de conditions décentes pour travailler à bord des navires de pêche en ce qui concerne les conditions minimales requises pour le travail à bord, les conditions de service, le logement et l'alimentation, la protection de la sécurité et de la santé au travail, les soins médicaux et la sécurité sociale;

Après avoir décidé d'adopter diverses propositions relatives au travail dans le secteur de la pêche, question qui constitue le quatrième point à l'ordre du jour de la session;

Après avoir décidé que ces propositions prendraient la forme d'une convention internationale,

adopte, ce jour de juin deux mille sept, la convention ci-après, qui sera dénommée Convention sur le travail dans la pêche, 2007.

## PARTIE I. DÉFINITIONS ET CHAMP D'APPLICATION

### DÉFINITIONS

#### *Article 1*

Aux fins de la présente convention:

- a) les termes «pêche commerciale» désignent toutes les opérations de pêche, y compris les opérations de pêche dans les cours d'eau, les lacs ou les canaux, à l'exception de la pêche de subsistance et de la pêche de loisir;
- b) les termes «autorité compétente» désignent le ministre, le service gouvernemental ou toute autre autorité habilités à édicter et à faire respecter les règlements, arrêtés ou autres instructions ayant force obligatoire dans le domaine visé par la disposition de la convention;
- c) le terme «consultation» désigne la consultation par l'autorité compétente des organisations représentatives d'employeurs et de travailleurs intéressées, et en particulier les organisations représentatives d'armateurs à la pêche et de pêcheurs, s'il en existe;

- 
- (d) “fishing vessel owner” means the owner of the fishing vessel or any other organization or person, such as the manager, agent or bareboat charterer, who has assumed the responsibility for the operation of the vessel from the owner and who, on assuming such responsibility, has agreed to take over the duties and responsibilities imposed on fishing vessel owners in accordance with the Convention, regardless of whether any other organization or person fulfils certain of the duties or responsibilities on behalf of the fishing vessel owner;
- (e) “fisher” means every person employed or engaged in any capacity or carrying out an occupation on board any fishing vessel, including persons working on board who are paid on the basis of a share of the catch but excluding pilots, naval personnel, other persons in the permanent service of a government, shore-based persons carrying out work aboard a fishing vessel and fisheries observers;
- (f) “fisher’s work agreement” means a contract of employment, articles of agreement or other similar arrangements, or any other contract governing a fisher’s living and working conditions on board a vessel;
- (g) “fishing vessel” or “vessel” means any ship or boat, of any nature whatsoever, irrespective of the form of ownership, used or intended to be used for the purpose of commercial fishing;
- (h) “gross tonnage” means the gross tonnage calculated in accordance with the tonnage measurement regulations contained in Annex I to the International Convention on Tonnage Measurement of Ships, 1969, or any instrument amending or replacing it;
- (i) “length” (L) shall be taken as 96 per cent of the total length on a waterline at 85 per cent of the least moulded depth measured from the keel line, or as the length from the foreside of the stem to the axis of the rudder stock on that waterline, if that be greater. In vessels designed with rake of keel, the waterline on which this length is measured shall be parallel to the designed waterline;
- (j) “length overall” (LOA) shall be taken as the distance in a straight line parallel to the designed waterline between the foremost point of the bow and the aftermost point of the stern;
- (k) “recruitment and placement service” means any person, company, institution, agency or other organization, in the public or the private sector, which is engaged in recruiting fishers on behalf of, or placing fishers with, fishing vessel owners;
- (l) “skipper” means the fisher having command of a fishing vessel.

- 
- d) les termes «armateur à la pêche» désignent le propriétaire du navire ou toute autre entité ou personne, telle que le gérant, l'agent ou l'affréteur coque nue, à laquelle le propriétaire a confié la responsabilité de l'exploitation du navire et qui, en assumant cette responsabilité, a accepté de se charger des tâches et obligations incombant aux armateurs à la pêche aux termes de la présente convention, indépendamment du fait que d'autres entités ou personnes s'acquittent en son nom de certaines de ces tâches ou responsabilités;
- e) le terme «pêcheur» désigne toute personne employée ou engagée à quelque titre que ce soit ou exerçant une activité professionnelle à bord d'un navire de pêche, y compris les personnes travaillant à bord qui sont rémunérées à la part, mais à l'exclusion des pilotes, des équipages de la flotte de guerre, des autres personnes au service permanent du gouvernement, des personnes basées à terre chargées d'effectuer des travaux à bord d'un navire de pêche et des observateurs des pêches;
- f) les termes «accord d'engagement du pêcheur» désignent le contrat d'emploi, le contrat d'engagement ou autre accord similaire ainsi que tout autre contrat régissant les conditions de vie et de travail du pêcheur à bord du navire;
- g) les termes «navire de pêche» ou «navire» désignent tout bateau ou embarcation, quelles qu'en soient la nature et la forme de propriété, affecté ou destiné à être affecté à la pêche commerciale;
- h) les termes «jauge brute» désignent le tonnage brut d'un navire évalué conformément aux dispositions de l'annexe I à la Convention internationale de 1969 sur le jaugeage des navires ou de tout instrument l'amendant ou la remplaçant;
- i) le terme «longueur» (L) désigne 96 pour cent de la longueur totale à la flottaison située à une distance de la ligne de quille égale à 85 pour cent du creux minimal sur quille, ou encore à la distance entre la face avant de l'étrave et l'axe de la mèche du gouvernail à cette flottaison, si cette valeur est supérieure. Pour les navires conçus pour naviguer avec une quille inclinée, la flottaison servant à mesurer cette longueur doit être parallèle à la flottaison en charge prévue;
- j) les termes «longueur hors tout» (LHT) désignent la distance mesurée en ligne droite parallèlement à la flottaison en charge prévue de l'extrémité avant de la proue à l'extrémité arrière de la poupe;
- k) les termes «service de recrutement et de placement» désignent toute personne, société, institution, agence ou autre organisation du secteur public ou privé exerçant des activités relatives au recrutement de pêcheurs pour le compte, ou au placement de pêcheurs auprès, d'armateurs à la pêche;
- l) le terme «patron» désigne le pêcheur chargé du commandement d'un navire de pêche.

---

SCOPE

*Article 2*

1. Except as otherwise provided herein, this Convention applies to all fishers and all fishing vessels engaged in commercial fishing operations.
2. In the event of doubt as to whether a vessel is engaged in commercial fishing, the question shall be determined by the competent authority after consultation.
3. Any Member, after consultation, may extend, in whole or in part, to fishers working on smaller vessels the protection provided in this Convention for fishers working on vessels of 24 metres in length and over.

*Article 3*

1. Where the application of the Convention raises special problems of a substantial nature in the light of the particular conditions of service of the fishers or of the fishing vessels' operations concerned, a Member may, after consultation, exclude from the requirements of this Convention, or from certain of its provisions:
  - (a) fishing vessels engaged in fishing operations in rivers, lakes or canals;
  - (b) limited categories of fishers or fishing vessels.
2. In case of exclusions under the preceding paragraph, and where practicable, the competent authority shall take measures, as appropriate, to extend progressively the requirements under this Convention to the categories of fishers and fishing vessels concerned.
3. Each Member which ratifies this Convention shall:
  - (a) in its first report on the application of this Convention submitted under article 22 of the Constitution of the International Labour Organisation:
    - (i) list any categories of fishers or fishing vessels excluded under paragraph 1;
    - (ii) give the reasons for any such exclusions, stating the respective positions of the representative organizations of employers and workers concerned, in particular the representative organizations of fishing vessel owners and fishers, where they exist; and
    - (iii) describe any measures taken to provide equivalent protection to the excluded categories; and
  - (b) in subsequent reports on the application of the Convention, describe any measures taken in accordance with paragraph 2.

---

## CHAMP D'APPLICATION

### *Article 2*

1. Sauf disposition contraire de la présente convention, celle-ci s'applique à tous les pêcheurs et à tous les navires de pêche engagés dans des opérations de pêche commerciale.

2. En cas de doute sur l'affectation d'un navire à la pêche commerciale, il appartient à l'autorité compétente de déterminer son type d'affectation après consultation.

3. Tout Membre peut, après consultation, étendre totalement ou en partie la protection prévue par la convention pour les pêcheurs travaillant sur des navires d'une longueur égale ou supérieure à 24 mètres à ceux travaillant sur des navires plus petits.

### *Article 3*

1. Lorsque l'application de la convention soulève des problèmes particuliers d'une importance significative compte tenu des conditions spécifiques de service des pêcheurs ou des opérations des navires de pêche considérés, un Membre peut, après consultation, exclure des prescriptions de la présente convention, ou de certaines de ses dispositions:

- a) les navires de pêche engagés dans des opérations de pêche sur les cours d'eau, les lacs ou les canaux;
- b) des catégories limitées de pêcheurs ou de navires de pêche.

2. En cas d'exclusion visée au paragraphe précédent, et lorsque cela est réalisable, l'autorité compétente prend, si besoin est, des mesures pour étendre progressivement les prescriptions prévues par la présente convention aux catégories de pêcheurs ou de navires de pêche concernées.

3. Tout Membre qui ratifie la présente convention doit:

- a) dans son premier rapport sur l'application de la convention présenté en vertu de l'article 22 de la Constitution de l'Organisation internationale du Travail:
  - i) indiquer les catégories de pêcheurs ou de navires de pêche qui sont exclues en application du paragraphe 1;
  - ii) donner les motifs de ces exclusions en exposant les positions respectives des organisations représentatives d'employeurs et de travailleurs intéressées, en particulier des organisations représentatives d'armateurs à la pêche et de pêcheurs, s'il en existe;
  - iii) décrire toute mesure prise pour octroyer une protection équivalente aux catégories exclues;
- b) dans ses rapports ultérieurs sur l'application de la convention, décrire toute mesure prise conformément au paragraphe 2.

---

*Article 4*

1. Where it is not immediately possible for a Member to implement all of the measures provided for in this Convention owing to special problems of a substantial nature in the light of insufficiently developed infrastructure or institutions, the Member may, in accordance with a plan drawn up in consultation, progressively implement all or some of the following provisions:

- (a) Article 10, paragraph 1;
- (b) Article 10, paragraph 3, in so far as it applies to vessels remaining at sea for more than three days;
- (c) Article 15;
- (d) Article 20;
- (e) Article 33; and
- (f) Article 38.

2. Paragraph 1 does not apply to fishing vessels which:

- (a) are 24 metres in length and over; or
- (b) remain at sea for more than seven days; or
- (c) normally navigate at a distance exceeding 200 nautical miles from the coastline of the flag State or navigate beyond the outer edge of its continental shelf, whichever distance from the coastline is greater; or
- (d) are subject to port State control as provided for in Article 43 of this Convention, except where port State control arises through a situation of force majeure,

nor to fishers working on such vessels.

3. Each Member which avails itself of the possibility afforded in paragraph 1 shall:

- (a) in its first report on the application of this Convention submitted under article 22 of the Constitution of the International Labour Organisation:
  - (i) indicate the provisions of the Convention to be progressively implemented;
  - (ii) explain the reasons and state the respective positions of representative organizations of employers and workers concerned, and in particular the representative organizations of fishing vessel owners and fishers, where they exist; and
  - (iii) describe the plan for progressive implementation; and
- (b) in subsequent reports on the application of this Convention, describe measures taken with a view to giving effect to all of the provisions of the Convention.

---

#### *Article 4*

1. Lorsqu'il n'est pas immédiatement possible pour un Membre de mettre en œuvre l'ensemble des mesures prévues par la présente convention en raison de problèmes particuliers d'une importance significative compte tenu des infrastructures ou institutions insuffisamment développées, le Membre peut, conformément à un plan établi en consultation, mettre en œuvre progressivement tout ou partie des dispositions suivantes:

- a) article 10, paragraphe 1;
- b) article 10, paragraphe 3, dans la mesure où il s'applique aux navires passant plus de trois jours en mer;
- c) article 15;
- d) article 20;
- e) article 33;
- f) article 38.

2. Le paragraphe 1 ne s'applique pas aux navires de pêche:

- a) d'une longueur égale ou supérieure à 24 mètres; ou
- b) passant plus de sept jours en mer; ou
- c) naviguant habituellement à plus de 200 milles nautiques de la côte de l'Etat du pavillon ou au-delà du rebord externe du plateau continental, si celui-ci est plus éloigné de la côte; ou
- d) soumis au contrôle de l'Etat du port tel que prévu à l'article 43 de la convention, sauf lorsque le contrôle par l'Etat du port découle d'un cas de force majeure,

ni aux pêcheurs qui travaillent sur ces navires.

3. Tout Membre qui se prévaut de la possibilité prévue au paragraphe 1 doit:

- a) dans son premier rapport sur l'application de la convention présenté en vertu de l'article 22 de la Constitution de l'Organisation internationale du Travail:
  - i) indiquer les dispositions de la convention devant être mises en œuvre progressivement;
  - ii) en préciser les motifs et exposer les positions respectives des organisations représentatives d'employeurs et de travailleurs intéressés, en particulier des organisations représentatives d'armateurs à la pêche et de pêcheurs, s'il en existe;
  - iii) décrire le plan de mise en œuvre progressive;
- b) dans ses rapports ultérieurs sur l'application de la convention, décrire les mesures prises en vue de donner effet à l'ensemble des dispositions de la convention.

---

*Article 5*

1. For the purpose of this Convention, the competent authority, after consultation, may decide to use length overall (LOA) in place of length (L) as the basis for measurement, in accordance with the equivalence set out in Annex I. In addition, for the purpose of the paragraphs specified in Annex III of this Convention, the competent authority, after consultation, may decide to use gross tonnage in place of length (L) or length overall (LOA) as the basis for measurement in accordance with the equivalence set out in Annex III.

2. In the reports submitted under article 22 of the Constitution, the Member shall communicate the reasons for the decision taken under this Article and any comments arising from the consultation.

PART II. GENERAL PRINCIPLES

IMPLEMENTATION

*Article 6*

1. Each Member shall implement and enforce laws, regulations or other measures that it has adopted to fulfil its commitments under this Convention with respect to fishers and fishing vessels under its jurisdiction. Other measures may include collective agreements, court decisions, arbitration awards, or other means consistent with national law and practice.

2. Nothing in this Convention shall affect any law, award or custom, or any agreement between fishing vessel owners and fishers, which ensures more favourable conditions than those provided for in this Convention.

COMPETENT AUTHORITY AND COORDINATION

*Article 7*

Each Member shall:

- (a) designate the competent authority or authorities; and
- (b) establish mechanisms for coordination among relevant authorities for the fishing sector at the national and local levels, as appropriate, and define their functions and responsibilities, taking into account their complementarities and national conditions and practice.

---

## *Article 5*

1. Aux fins de la présente convention, l'autorité compétente peut, après consultation, décider d'utiliser la longueur hors tout (LHT) à la place de la longueur (L) comme critère de mesure, conformément à l'équivalence établie à l'annexe I. En outre, aux fins des paragraphes spécifiés à l'annexe III de la présente convention, l'autorité compétente peut, après consultation, décider d'utiliser la jauge brute à la place de la longueur (L) ou de la longueur hors tout (LHT) comme critère de mesure, conformément à l'équivalence établie à l'annexe III.

2. Dans les rapports présentés en vertu de l'article 22 de la Constitution, le Membre communiquera les raisons de la décision prise en vertu du présent article et les observations faites lors de la consultation.

## PARTIE II. PRINCIPES GÉNÉRAUX

### MISE EN ŒUVRE

## *Article 6*

1. Tout Membre doit mettre en œuvre et faire respecter les lois, règlements ou autres mesures qu'il a adoptés afin de s'acquitter de ses obligations aux termes de la présente convention en ce qui concerne les pêcheurs et les navires de pêche relevant de sa compétence. Les autres mesures peuvent comprendre des conventions collectives, des décisions judiciaires, des sentences arbitrales et autres moyens conformes à la législation et à la pratique nationales.

2. Aucune des dispositions de la présente convention n'affecte les lois, sentences, coutumes ou accords entre armateurs à la pêche et pêcheurs qui assurent des conditions plus favorables que celles prévues par la convention.

### AUTORITÉ COMPÉTENTE ET COORDINATION

## *Article 7*

Tout Membre doit:

- a) désigner l'autorité compétente ou les autorités compétentes;
- b) établir des mécanismes de coordination entre les autorités concernées pour le secteur de la pêche aux niveaux national et local, selon le cas, et définir leurs fonctions et responsabilités en tenant compte de leur complémentarité ainsi que des conditions et de la pratique nationales.

---

RESPONSIBILITIES OF FISHING VESSEL OWNERS,  
SKIPPER AND FISHERS

*Article 8*

1. The fishing vessel owner has the overall responsibility to ensure that the skipper is provided with the necessary resources and facilities to comply with the obligations of this Convention.

2. The skipper has the responsibility for the safety of the fishers on board and the safe operation of the vessel, including but not limited to the following areas:

- (a) providing such supervision as will ensure that, as far as possible, fishers perform their work in the best conditions of safety and health;
- (b) managing the fishers in a manner which respects safety and health, including prevention of fatigue;
- (c) facilitating on-board occupational safety and health awareness training; and
- (d) ensuring compliance with safety of navigation, watchkeeping and associated good seamanship standards.

3. The skipper shall not be constrained by the fishing vessel owner from taking any decision which, in the professional judgement of the skipper, is necessary for the safety of the vessel and its safe navigation and safe operation, or the safety of the fishers on board.

4. Fishers shall comply with the lawful orders of the skipper and applicable safety and health measures.

PART III. MINIMUM REQUIREMENTS  
FOR WORK ON BOARD FISHING VESSELS

MINIMUM AGE

*Article 9*

1. The minimum age for work on board a fishing vessel shall be 16 years. However, the competent authority may authorize a minimum age of 15 for persons who are no longer subject to compulsory schooling as provided by national legislation, and who are engaged in vocational training in fishing.

2. The competent authority, in accordance with national laws and practice, may authorize persons of the age of 15 to perform light work during school holidays. In such cases, it shall determine, after consultation, the kinds of work permitted and shall prescribe the conditions in which such work shall be undertaken and the periods of rest required.

---

RESPONSABILITÉS DES ARMATEURS À LA PÊCHE,  
DES PATRONS ET DES PÊCHEURS

*Article 8*

1. L'armateur à la pêche a la responsabilité globale de veiller à ce que le patron dispose des ressources et moyens nécessaires pour s'acquitter des obligations de la présente convention.

2. La responsabilité de la sécurité des pêcheurs à bord et du fonctionnement sûr du navire incombe au patron, notamment, mais non exclusivement, dans les domaines suivants:

- a) la supervision, qui doit être exercée de façon à ce que les pêcheurs puissent, dans la mesure du possible, exécuter leur travail dans les meilleures conditions de sécurité et de santé;
- b) l'organisation du travail des pêcheurs, qui doit respecter la sécurité et la santé, y compris la prévention de la fatigue;
- c) la mise à disposition à bord d'une formation de sensibilisation à la sécurité et à la santé au travail;
- d) le respect des normes de sécurité de la navigation et de veille et des bonnes pratiques maritimes y relatives.

3. L'armateur à la pêche ne doit pas entraver la liberté du patron de prendre toute décision qui, de l'avis professionnel de ce dernier, est nécessaire pour la sécurité du navire, de sa navigation ou de son exploitation, ou pour la sécurité des pêcheurs qui sont à bord.

4. Les pêcheurs doivent respecter les ordres légaux du patron et les mesures de sécurité et de santé applicables.

PARTIE III. CONDITIONS MINIMALES REQUISES POUR LE TRAVAIL  
À BORD DES NAVIRES DE PÊCHE

ÂGE MINIMUM

*Article 9*

1. L'âge minimum pour le travail à bord d'un navire de pêche est de 16 ans. Toutefois, l'autorité compétente peut autoriser un âge minimum de 15 ans pour les personnes qui ne sont plus soumises à l'obligation de scolarité imposée par la législation nationale et suivent une formation professionnelle en matière de pêche.

2. L'autorité compétente peut, conformément à la législation et à la pratique nationales, autoriser des personnes âgées de 15 ans à exécuter des travaux légers lors des vacances scolaires. Dans ces cas, elle déterminera, après consultation, les types de travail autorisés et prescrira les conditions dans lesquelles ce travail sera entrepris et les périodes de repos requises.

---

3. The minimum age for assignment to activities on board fishing vessels, which by their nature or the circumstances in which they are carried out are likely to jeopardize the health, safety or morals of young persons, shall not be less than 18 years.

4. The types of activities to which paragraph 3 of this Article applies shall be determined by national laws or regulations, or by the competent authority, after consultation, taking into account the risks concerned and the applicable international standards.

5. The performance of the activities referred to in paragraph 3 of this Article as from the age of 16 may be authorized by national laws or regulations, or by decision of the competent authority, after consultation, on condition that the health, safety and morals of the young persons concerned are fully protected and that the young persons concerned have received adequate specific instruction or vocational training and have completed basic pre-sea safety training.

6. The engagement of fishers under the age of 18 for work at night shall be prohibited. For the purpose of this Article, "night" shall be defined in accordance with national law and practice. It shall cover a period of at least nine hours starting no later than midnight and ending no earlier than 5 a.m. An exception to strict compliance with the night work restriction may be made by the competent authority when:

- (a) the effective training of the fishers concerned, in accordance with established programmes and schedules, would be impaired; or
- (b) the specific nature of the duty or a recognized training programme requires that fishers covered by the exception perform duties at night and the authority determines, after consultation, that the work will not have a detrimental impact on their health or well-being.

7. Nothing in this Article shall affect any obligations assumed by the Member arising from the ratification of any other international labour Convention.

## MEDICAL EXAMINATION

### *Article 10*

1. No fishers shall work on board a fishing vessel without a valid medical certificate attesting to fitness to perform their duties.

2. The competent authority, after consultation, may grant exemptions from the application of paragraph 1 of this Article, taking into account the safety and health of fishers, size of the vessel, availability of medical assistance and evacuation, duration of the voyage, area of operation, and type of fishing operation.

---

3. L'âge minimum d'affectation à des activités à bord d'un navire de pêche qui, par leur nature ou les conditions dans lesquelles elles s'exercent, sont susceptibles de compromettre la santé, la sécurité ou la moralité des jeunes gens ne doit pas être inférieur à 18 ans.

4. Les types d'activités visés au paragraphe 3 du présent article sont déterminés par la législation nationale ou l'autorité compétente, après consultation, en tenant compte des risques qu'ils comportent et des normes internationales applicables.

5. L'exécution des activités visées au paragraphe 3 du présent article dès l'âge de 16 ans peut être autorisée par la législation nationale ou par une décision de l'autorité compétente, après consultation, à condition que la santé, la sécurité et la moralité des jeunes gens soient pleinement garanties, qu'ils aient reçu une instruction ou une formation professionnelle spécifiques et adéquates et qu'ils aient suivi une formation de base aux questions de sécurité préalable à l'embarquement.

6. Il est interdit d'engager un pêcheur de moins de 18 ans pour un travail de nuit. Aux fins du présent article, le terme «nuit» est défini conformément à la législation et à la pratique nationales. Il couvre une période de neuf heures consécutives au moins, commençant au plus tard à minuit et se terminant au plus tôt à 5 heures du matin. Une dérogation à la stricte observation de la restriction concernant le travail de nuit peut être décidée par l'autorité compétente quand:

- a) la formation effective des pêcheurs concernés dans le cadre de programmes et plans d'études établis pourrait en être compromise; ou
- b) la nature particulière de la tâche ou un programme de formation agréé exige que les pêcheurs visés par la dérogation travaillent la nuit et l'autorité décide, après consultation, que ce travail ne portera pas préjudice à leur santé ou à leur bien-être.

7. Aucune des dispositions du présent article n'a d'incidence sur les obligations souscrites par le Membre en vertu de la ratification d'autres conventions internationales du travail.

## EXAMEN MÉDICAL

### *Article 10*

1. Aucun pêcheur ne doit travailler à bord d'un navire de pêche sans disposer d'un certificat médical valide attestant de son aptitude à exécuter ses tâches.

2. L'autorité compétente peut, après consultation, octroyer des dérogations à l'application du paragraphe 1 du présent article, compte tenu de la sécurité et de la santé des pêcheurs, de la taille du navire, de la disponibilité de l'assistance médicale et des moyens d'évacuation, de la durée du voyage, de la zone d'opération et du type d'activité de pêche.

---

3. The exemptions in paragraph 2 of this Article shall not apply to a fisher working on a fishing vessel of 24 metres in length and over or which normally remains at sea for more than three days. In urgent cases, the competent authority may permit a fisher to work on such a vessel for a period of a limited and specified duration until a medical certificate can be obtained, provided that the fisher is in possession of an expired medical certificate of a recent date.

### *Article 11*

Each Member shall adopt laws, regulations or other measures providing for:

- (a) the nature of medical examinations;
- (b) the form and content of medical certificates;
- (c) the issue of a medical certificate by a duly qualified medical practitioner or, in the case of a certificate solely concerning eyesight, by a person recognized by the competent authority as qualified to issue such a certificate; these persons shall enjoy full independence in exercising their professional judgement;
- (d) the frequency of medical examinations and the period of validity of medical certificates;
- (e) the right to a further examination by a second independent medical practitioner in the event that a person has been refused a certificate or has had limitations imposed on the work he or she may perform; and
- (f) other relevant requirements.

### *Article 12*

In addition to the requirements set out in Article 10 and Article 11, on a fishing vessel of 24 metres in length and over, or on a vessel which normally remains at sea for more than three days:

1. The medical certificate of a fisher shall state, at a minimum, that:
  - (a) the hearing and sight of the fisher concerned are satisfactory for the fisher's duties on the vessel; and
  - (b) the fisher is not suffering from any medical condition likely to be aggravated by service at sea or to render the fisher unfit for such service or to endanger the safety or health of other persons on board.
2. The medical certificate shall be valid for a maximum period of two years unless the fisher is under the age of 18, in which case the maximum period of validity shall be one year.
3. If the period of validity of a certificate expires in the course of a voyage, the certificate shall remain in force until the end of that voyage.

---

3. Les dérogations visées au paragraphe 2 du présent article ne s'appliqueront pas à un pêcheur travaillant sur un navire de pêche d'une longueur égale ou supérieure à 24 mètres ou qui passe normalement plus de trois jours en mer. Dans les cas urgents, l'autorité compétente peut autoriser un pêcheur à travailler sur un tel navire pour une période d'une durée limitée et spécifiée en attendant qu'il puisse obtenir un certificat médical, sous réserve que ce pêcheur soit en possession d'un certificat médical expiré depuis peu.

### *Article 11*

Tout Membre doit adopter des lois, règlements ou autres mesures concernant:

- a) la nature des examens médicaux;
- b) la forme et le contenu des certificats médicaux;
- c) la délivrance du certificat médical par du personnel médical dûment qualifié ou, dans le cas d'un certificat concernant seulement la vue, par une personne habilitée par l'autorité compétente à délivrer un tel certificat; ces personnes doivent jouir d'une totale indépendance lorsqu'elles exercent leur jugement professionnel;
- d) la fréquence des examens médicaux et la durée de validité des certificats médicaux;
- e) le droit pour une personne d'être réexaminée par du personnel médical indépendant différent au cas où elle se verrait refuser un certificat ou imposer des limitations au travail qu'elle peut effectuer;
- f) les autres conditions requises.

### *Article 12*

Outre les prescriptions énoncées aux articles 10 et 11, sur un navire de pêche d'une longueur égale ou supérieure à 24 mètres ou passant normalement plus de trois jours en mer:

1. Le certificat médical du pêcheur doit au minimum indiquer:

- a) que l'ouïe et la vue de l'intéressé sont satisfaisantes compte tenu de ses tâches sur le navire; et
- b) que l'intéressé n'a aucun problème médical de nature à être aggravé par le service en mer ou à le rendre inapte à ce service ou à mettre en danger la sécurité ou la santé d'autres personnes à bord.

2. Le certificat médical est valide pendant deux ans au maximum à moins que le pêcheur soit âgé de moins de 18 ans, auquel cas la durée maximale de validité est d'un an.

3. Si la période de validité du certificat expire au cours d'un voyage, le certificat reste valide jusqu'à la fin du voyage.

---

PART IV. CONDITIONS OF SERVICE

MANNING AND HOURS OF REST

*Article 13*

Each Member shall adopt laws, regulations or other measures requiring that owners of fishing vessels flying its flag ensure that:

- (a) their vessels are sufficiently and safely manned for the safe navigation and operation of the vessel and under the control of a competent skipper; and
- (b) fishers are given regular periods of rest of sufficient length to ensure safety and health.

*Article 14*

1. In addition to the requirements set out in Article 13, the competent authority shall:

- (a) for vessels of 24 metres in length and over, establish a minimum level of manning for the safe navigation of the vessel, specifying the number and the qualifications of the fishers required;
- (b) for fishing vessels regardless of size remaining at sea for more than three days, after consultation and for the purpose of limiting fatigue, establish the minimum hours of rest to be provided to fishers. Minimum hours of rest shall not be less than:
  - (i) ten hours in any 24-hour period; and
  - (ii) 77 hours in any seven-day period.

2. The competent authority may permit, for limited and specified reasons, temporary exceptions to the limits established in paragraph 1(b) of this Article. However, in such circumstances, it shall require that fishers shall receive compensatory periods of rest as soon as practicable.

3. The competent authority, after consultation, may establish alternative requirements to those in paragraphs 1 and 2 of this Article. However, such alternative requirements shall be substantially equivalent and shall not jeopardize the safety and health of the fishers.

4. Nothing in this Article shall be deemed to impair the right of the skipper of a vessel to require a fisher to perform any hours of work necessary for the immediate safety of the vessel, the persons on board or the catch, or for the purpose of giving assistance to other boats or ships or persons in distress at sea. Accordingly, the skipper may suspend the schedule of hours of rest and require a fisher to perform any hours of work necessary until the

---

## PARTIE IV. CONDITIONS DE SERVICE

### ÉQUIPAGE ET DURÉE DU REPOS

#### *Article 13*

Tout Membre doit adopter des lois, règlements ou autres mesures prévoyant que les armateurs de navires de pêche battant son pavillon veillent à ce que:

- a) leurs navires soient dotés d'effectifs suffisants en nombre et en qualité pour assurer la sécurité de navigation et de fonctionnement du navire sous le contrôle d'un patron compétent;
- b) soient octroyées aux pêcheurs des périodes de repos régulières d'une durée suffisante pour préserver leur sécurité et leur santé.

#### *Article 14*

1. Outre les prescriptions énoncées à l'article 13, l'autorité compétente doit:

- a) pour les navires d'une longueur égale ou supérieure à 24 mètres, fixer l'effectif minimal propre à garantir la sécurité de navigation du navire et préciser le nombre de pêcheurs requis et les qualifications qu'ils doivent posséder;
- b) pour les navires de pêche passant plus de trois jours en mer, quelle que soit leur taille, fixer, après consultation et en vue de limiter la fatigue, une durée minimum de repos pour les pêcheurs. Cette durée ne doit pas être inférieure à:
  - i) dix heures par période de 24 heures;
  - ii) 77 heures par période de sept jours.

2. L'autorité compétente peut, pour des raisons limitées et précises, autoriser qu'il soit dérogé temporairement aux durées de repos fixées à l'alinéa b) du paragraphe 1 du présent article. Dans ces cas, elle doit toutefois exiger que des périodes de repos compensatoires soient accordées aux pêcheurs dès que possible.

3. L'autorité compétente peut, après consultation, établir des prescriptions remplaçant celles fixées aux paragraphes 1 et 2 du présent article. Toutefois, lesdites prescriptions doivent être équivalentes dans l'ensemble et ne pas mettre en danger la sécurité et la santé des pêcheurs.

4. Aucune des dispositions du présent article n'affecte le droit du patron d'un navire d'exiger d'un pêcheur les heures de travail nécessaires pour assurer la sécurité immédiate du navire, des personnes à bord ou des captures ou pour porter secours à d'autres embarcations ou aux personnes en détresse en mer. Le cas échéant, le patron peut suspendre les horaires normaux de repos et exiger qu'un pêcheur accomplisse les heures de travail

---

normal situation has been restored. As soon as practicable after the normal situation has been restored, the skipper shall ensure that any fishers who have performed work in a scheduled rest period are provided with an adequate period of rest.

#### CREW LIST

##### *Article 15*

Every fishing vessel shall carry a crew list, a copy of which shall be provided to authorized persons ashore prior to departure of the vessel, or communicated ashore immediately after departure of the vessel. The competent authority shall determine to whom and when such information shall be provided and for what purpose or purposes.

#### FISHER'S WORK AGREEMENT

##### *Article 16*

Each Member shall adopt laws, regulations or other measures:

- (a) requiring that fishers working on vessels flying its flag have the protection of a fisher's work agreement that is comprehensible to them and is consistent with the provisions of this Convention; and
- (b) specifying the minimum particulars to be included in fishers' work agreements in accordance with the provisions contained in Annex II.

##### *Article 17*

Each Member shall adopt laws, regulations or other measures regarding:

- (a) procedures for ensuring that a fisher has an opportunity to review and seek advice on the terms of the fisher's work agreement before it is concluded;
- (b) where applicable, the maintenance of records concerning the fisher's work under such an agreement; and
- (c) the means of settling disputes in connection with a fisher's work agreement.

##### *Article 18*

The fisher's work agreement, a copy of which shall be provided to the fisher, shall be carried on board and be available to the fisher and, in accordance with national law and practice, to other concerned parties on request.

---

nécessaires jusqu'au retour à une situation normale. Dès que cela est réalisable après le retour à une situation normale, le patron doit faire en sorte que tout pêcheur ayant effectué un travail alors qu'il était en période de repos selon l'horaire normal bénéficie d'une période de repos adéquate.

#### LISTE D'ÉQUIPAGE

##### *Article 15*

Tout navire de pêche doit avoir à bord une liste d'équipage, dont un exemplaire est fourni aux personnes autorisées à terre avant le départ du navire ou communiqué à terre immédiatement après. L'autorité compétente doit déterminer à qui, à quel moment et à quelles fins cette information doit être fournie.

#### ACCORD D'ENGAGEMENT DU PÊCHEUR

##### *Article 16*

Tout Membre doit adopter des lois, règlements ou autres mesures:

- a) prévoyant que les pêcheurs travaillant à bord des navires battant son pavillon soient protégés par un accord d'engagement qui soit conforme aux dispositions de la présente convention et qui leur soit compréhensible;
- b) indiquant les mentions minimales à inclure dans les accords d'engagement des pêcheurs, conformément aux dispositions de l'annexe II.

##### *Article 17*

Tout Membre doit adopter des lois, règlements ou autres mesures concernant:

- a) les procédures garantissant que le pêcheur a la possibilité d'examiner les clauses de son accord d'engagement et de demander conseil à ce sujet avant de le conclure;
- b) s'il y a lieu, la tenue des états de service du pêcheur dans le cadre de cet accord;
- c) les moyens de régler les différends relatifs à l'accord d'engagement du pêcheur.

##### *Article 18*

L'accord d'engagement du pêcheur, dont un exemplaire lui est remis, est disponible à bord, à la disposition du pêcheur et, conformément à la législation et à la pratique nationales, de toute autre partie concernée qui en fait la demande.

---

*Article 19*

Articles 16 to 18 and Annex II do not apply to a fishing vessel owner who is also single-handedly operating the vessel.

*Article 20*

It shall be the responsibility of the fishing vessel owner to ensure that each fisher has a written fisher's work agreement signed by both the fisher and the fishing vessel owner or by an authorized representative of the fishing vessel owner (or, where fishers are not employed or engaged by the fishing vessel owner, the fishing vessel owner shall have evidence of contractual or similar arrangements) providing decent work and living conditions on board the vessel as required by this Convention.

REPATRIATION

*Article 21*

1. Members shall ensure that fishers on a fishing vessel that flies their flag and that enters a foreign port are entitled to repatriation in the event that the fisher's work agreement has expired or has been terminated for justified reasons by the fisher or by the fishing vessel owner, or the fisher is no longer able to carry out the duties required under the work agreement or cannot be expected to carry them out in the specific circumstances. This also applies to fishers from that vessel who are transferred for the same reasons from the vessel to the foreign port.

2. The cost of the repatriation referred to in paragraph 1 of this Article shall be borne by the fishing vessel owner, except where the fisher has been found, in accordance with national laws, regulations or other measures, to be in serious default of his or her work agreement obligations.

3. Members shall prescribe, by means of laws, regulations or other measures, the precise circumstances entitling a fisher covered by paragraph 1 of this Article to repatriation, the maximum duration of service periods on board following which a fisher is entitled to repatriation, and the destinations to which fishers may be repatriated.

4. If a fishing vessel owner fails to provide for the repatriation referred to in this Article, the Member whose flag the vessel flies shall arrange for the repatriation of the fisher concerned and shall be entitled to recover the cost from the fishing vessel owner.

5. National laws and regulations shall not prejudice any right of the fishing vessel owner to recover the cost of repatriation under third party contractual agreements.

---

### *Article 19*

Les articles 16 à 18 et l'annexe II ne s'appliquent pas au propriétaire de navire qui exploite celui-ci seul.

### *Article 20*

Il incombe à l'armateur à la pêche de veiller à ce que chaque pêcheur soit en possession d'un accord d'engagement de pêcheur écrit, signé à la fois par le pêcheur et l'armateur à la pêche, ou par un représentant autorisé de celui-ci (ou, lorsque le pêcheur n'est pas employé ou engagé par l'armateur à la pêche, l'armateur à la pêche doit avoir une preuve d'un arrangement contractuel ou équivalent), prévoyant des conditions de vie et de travail décentes à bord du navire, conformément aux dispositions de la présente convention.

## RAPATRIEMENT

### *Article 21*

1. Les Membres doivent veiller à ce que les pêcheurs à bord d'un navire de pêche battant leur pavillon et qui entre dans un port étranger aient le droit d'être rapatriés lorsque l'accord d'engagement du pêcheur a expiré, ou lorsque le pêcheur ou l'armateur à la pêche y a mis fin pour des raisons justifiées, ou lorsque le pêcheur n'est plus en mesure de s'acquitter des tâches qui lui incombent en vertu de l'accord d'engagement ou qu'on ne peut attendre de lui qu'il les exécute compte tenu des circonstances. La présente disposition s'applique également aux pêcheurs de ce navire qui sont transférés pour les mêmes raisons du navire vers un port étranger.

2. Les frais du rapatriement visé au paragraphe 1 du présent article doivent être pris en charge par l'armateur à la pêche, sauf si le pêcheur a été reconnu, conformément à la législation nationale ou à d'autres dispositions applicables, coupable d'un manquement grave aux obligations de son accord d'engagement.

3. Les Membres doivent déterminer, par voie de législation ou autre, les circonstances précises donnant droit à un rapatriement, la durée maximale des périodes d'embarquement au terme desquelles les pêcheurs visés au paragraphe 1 du présent article ont droit au rapatriement, et les destinations vers lesquelles ils peuvent être rapatriés.

4. Si l'armateur à la pêche omet de pourvoir au rapatriement visé au présent article, le Membre dont le navire bat pavillon doit organiser le rapatriement du pêcheur concerné et a le droit de recouvrer les frais auprès de l'armateur à la pêche.

5. La législation nationale ne doit pas faire obstacle au droit de l'armateur à la pêche de recouvrer le coût du rapatriement au titre d'arrangements contractuels avec des tiers.

---

## RECRUITMENT AND PLACEMENT

### *Article 22*

#### *Recruitment and placement of fishers*

1. Each Member that operates a public service providing recruitment and placement for fishers shall ensure that the service forms part of, or is coordinated with, a public employment service for all workers and employers.

2. Any private service providing recruitment and placement for fishers which operates in the territory of a Member shall do so in conformity with a standardized system of licensing or certification or other form of regulation, which shall be established, maintained or modified only after consultation.

3. Each Member shall, by means of laws, regulations or other measures:

- (a) prohibit recruitment and placement services from using means, mechanisms or lists intended to prevent or deter fishers from engaging for work;
- (b) require that no fees or other charges for recruitment or placement of fishers be borne directly or indirectly, in whole or in part, by the fisher; and
- (c) determine the conditions under which any licence, certificate or similar authorization of a private recruitment or placement service may be suspended or withdrawn in case of violation of relevant laws or regulations; and specify the conditions under which private recruitment and placement services can operate.

#### *Private employment agencies*

4. A Member which has ratified the Private Employment Agencies Convention, 1997 (No. 181), may allocate certain responsibilities under this Convention to private employment agencies that provide the services referred to in paragraph 1(b) of Article 1 of that Convention. The respective responsibilities of any such private employment agencies and of the fishing vessel owners, who shall be the “user enterprise” for the purpose of that Convention, shall be determined and allocated, as provided for in Article 12 of that Convention. Such a Member shall adopt laws, regulations or other measures to ensure that no allocation of the respective responsibilities or obligations to the private employment agencies providing the service and to the “user enterprise” pursuant to this Convention shall preclude the fisher from asserting a right to a lien arising against the fishing vessel.

5. Notwithstanding the provisions of paragraph 4, the fishing vessel owner shall be liable in the event that the private employment agency

---

## RECRUTEMENT ET PLACEMENT

### *Article 22*

#### *Recrutement et placement des pêcheurs*

1. Tout Membre qui a mis en place un service public de recrutement et de placement de pêcheurs doit s'assurer que ce service fait partie du service public de l'emploi ouvert à l'ensemble des travailleurs et des employeurs ou qu'il agit en coordination avec celui-ci.

2. Les services privés de recrutement et de placement de pêcheurs qui sont établis sur le territoire d'un Membre doivent exercer leur activité en vertu d'un système de licence ou d'agrément normalisé ou d'une autre forme de réglementation, lesquels ne seront établis, maintenus ou modifiés qu'après consultation.

3. Tout Membre doit, par voie de législation ou autres mesures:

- a) interdire aux services de recrutement et de placement d'avoir recours à des moyens, mécanismes ou listes visant à empêcher ou à dissuader les pêcheurs d'obtenir un engagement;
- b) interdire que des honoraires ou autres frais soient supportés par les pêcheurs, directement ou indirectement, en tout ou en partie, pour le recrutement ou le placement;
- c) fixer les conditions dans lesquelles une licence, un agrément ou toute autre autorisation d'un service privé de recrutement et de placement peuvent être suspendus ou retirés en cas d'infraction à la législation pertinente et préciser les conditions dans lesquelles lesdits services privés peuvent exercer leurs activités.

#### *Agences d'emploi privées*

4. Tout Membre qui a ratifié la convention (n° 181) sur les agences d'emploi privées, 1997, peut confier certaines des responsabilités découlant de la présente convention à des agences d'emploi privées qui fournissent les services visés à l'alinéa b) du paragraphe 1 de l'article 1 de la convention précitée. Les responsabilités respectives de ces agences d'emploi privées et des armateurs à la pêche, qui sont les «entreprises utilisatrices» au sens de ladite convention, sont déterminées et réparties conformément à l'article 12 de cette même convention. Un tel Membre doit adopter des lois, des règlements ou d'autres mesures pour faire en sorte que l'attribution des responsabilités ou obligations respectives des agences d'emploi privées prestataires du service et de l'«entreprise utilisatrice» conformément à la présente convention n'empêche pas le pêcheur de faire valoir un droit de privilège sur un navire de pêche.

5. Nonobstant les dispositions du paragraphe 4, l'armateur à la pêche est responsable si l'agence d'emploi privée manque aux obligations qui lui

---

defaults on its obligations to a fisher for whom, in the context of the Private Employment Agencies Convention, 1997 (No. 181), the fishing vessel owner is the “user enterprise”.

6. Nothing in this Convention shall be deemed to impose on a Member the obligation to allow the operation in its fishing sector of private employment agencies as referred to in paragraph 4 of this Article.

#### PAYMENT OF FISHERS

##### *Article 23*

Each Member, after consultation, shall adopt laws, regulations or other measures providing that fishers who are paid a wage are ensured a monthly or other regular payment.

##### *Article 24*

Each Member shall require that all fishers working on board fishing vessels shall be given a means to transmit all or part of their payments received, including advances, to their families at no cost.

#### PART V. ACCOMMODATION AND FOOD

##### *Article 25*

Each Member shall adopt laws, regulations or other measures for fishing vessels that fly its flag with respect to accommodation, food and potable water on board.

##### *Article 26*

Each Member shall adopt laws, regulations or other measures requiring that accommodation on board fishing vessels that fly its flag shall be of sufficient size and quality and appropriately equipped for the service of the vessel and the length of time fishers live on board. In particular, such measures shall address, as appropriate, the following issues:

- (a) approval of plans for the construction or modification of fishing vessels in respect of accommodation;
- (b) maintenance of accommodation and galley spaces with due regard to hygiene and overall safe, healthy and comfortable conditions;
- (c) ventilation, heating, cooling and lighting;
- (d) mitigation of excessive noise and vibration;
- (e) location, size, construction materials, furnishing and equipping of sleeping rooms, mess rooms and other accommodation spaces;

---

incombent à l'égard du pêcheur pour lequel, dans le cadre de la convention (n° 181) sur les agences d'emploi privées, 1997, l'armateur à la pêche est l'«entreprise utilisatrice».

6. Aucune des dispositions de la présente convention ne saurait être interprétée comme imposant à un Membre l'obligation d'autoriser dans son secteur de pêche le recours à des agences d'emploi privées telles que visées au paragraphe 4 du présent article.

## PAIEMENT DES PÊCHEURS

### *Article 23*

Tout Membre adopte, après consultation, une législation ou d'autres mesures prescrivant que les pêcheurs qui perçoivent un salaire seront payés mensuellement ou à d'autres intervalles réguliers.

### *Article 24*

Tout Membre doit exiger que tous les pêcheurs travaillant à bord de navires de pêche aient les moyens de faire parvenir à leur famille et sans frais tout ou partie des paiements reçus, y compris les avances.

## PARTIE V. LOGEMENT ET ALIMENTATION

### *Article 25*

Tout Membre doit adopter une législation ou d'autres mesures relatives au logement, à la nourriture et à l'eau potable à bord des navires de pêche battant son pavillon.

### *Article 26*

Tout Membre doit adopter une législation ou d'autres mesures prévoyant que le logement à bord des navires de pêche battant son pavillon sera d'une qualité et d'une taille suffisantes et qu'il sera équipé de façon adaptée au service du navire et à la durée du séjour des pêcheurs à bord. En particulier, ces mesures règlent, selon le cas, les questions suivantes:

- a) approbation des plans de construction ou de modification des navires de pêche en ce qui concerne le logement;
- b) maintien du logement et de la cuisine dans des conditions générales d'hygiène, de sécurité, de santé et de confort;
- c) ventilation, chauffage, refroidissement et éclairage;
- d) réduction des bruits et vibrations excessifs;
- e) emplacement, taille, matériaux de construction, ameublement et équipement des cabines, réfectoires et autres espaces de logement;

- 
- (f) sanitary facilities, including toilets and washing facilities, and supply of sufficient hot and cold water; and
  - (g) procedures for responding to complaints concerning accommodation that does not meet the requirements of this Convention.

#### *Article 27*

Each Member shall adopt laws, regulations or other measures requiring that:

- (a) the food carried and served on board be of a sufficient nutritional value, quality and quantity;
- (b) potable water be of sufficient quality and quantity; and
- (c) the food and water shall be provided by the fishing vessel owner at no cost to the fisher. However, in accordance with national laws and regulations, the cost can be recovered as an operational cost if the collective agreement governing a share system or a fisher's work agreement so provides.

#### *Article 28*

1. The laws, regulations or other measures to be adopted by the Member in accordance with Articles 25 to 27 shall give full effect to Annex III concerning fishing vessel accommodation. Annex III may be amended in the manner provided for in Article 45.

2. A Member which is not in a position to implement the provisions of Annex III may, after consultation, adopt provisions in its laws and regulations or other measures which are substantially equivalent to the provisions set out in Annex III, with the exception of provisions related to Article 27.

### PART VI. MEDICAL CARE, HEALTH PROTECTION AND SOCIAL SECURITY

#### MEDICAL CARE

#### *Article 29*

Each Member shall adopt laws, regulations or other measures requiring that:

- (a) fishing vessels carry appropriate medical equipment and medical supplies for the service of the vessel, taking into account the number of fishers on board, the area of operation and the length of the voyage;

- 
- f) installations sanitaires, comprenant des toilettes et des moyens de lavage, et fourniture d'eau chaude et froide en quantité suffisante;
  - g) procédures d'examen des plaintes concernant des conditions de logement qui ne satisfont pas aux prescriptions de la présente convention.

#### *Article 27*

Tout Membre doit adopter une législation ou d'autres mesures prévoyant que:

- a) la nourriture transportée et servie à bord doit être d'une valeur nutritionnelle, d'une qualité et d'une quantité suffisantes;
- b) l'eau potable doit être d'une qualité et d'une quantité suffisantes;
- c) la nourriture et l'eau potable doivent être fournies par l'armateur à la pêche sans frais pour le pêcheur. Toutefois, conformément à la législation nationale, les frais peuvent être recouverts sous forme de coûts d'exploitation pour autant qu'une convention collective régissant un système de rémunération à la part ou que l'accord d'engagement du pêcheur le prévoie.

#### *Article 28*

1. La législation ou les autres mesures adoptées par le Membre conformément aux articles 25 à 27 doivent donner pleinement effet à l'annexe III concernant le logement à bord des navires de pêche. L'annexe III peut être amendée de la façon prévue à l'article 45.

2. Un Membre qui n'est pas en mesure d'appliquer les dispositions de l'annexe III peut, après consultation, adopter dans sa législation des dispositions ou d'autres mesures équivalentes dans l'ensemble aux dispositions énoncées à l'annexe III, à l'exception des dispositions se rapportant à l'article 27.

### PARTIE VI. SOINS MÉDICAUX, PROTECTION DE LA SANTÉ ET SÉCURITÉ SOCIALE

#### SOINS MÉDICAUX

#### *Article 29*

Tout Membre doit adopter une législation ou d'autres mesures prévoyant que:

- a) les navires de pêche soient dotés de fournitures et d'un matériel médicaux adaptés au service du navire, compte tenu du nombre de pêcheurs à bord, de la zone d'opération et de la durée du voyage;

- 
- (b) fishing vessels have at least one fisher on board who is qualified or trained in first aid and other forms of medical care and who has the necessary knowledge to use the medical equipment and supplies for the vessel concerned, taking into account the number of fishers on board, the area of operation and the length of the voyage;
  - (c) medical equipment and supplies carried on board be accompanied by instructions or other information in a language and format understood by the fisher or fishers referred to in subparagraph (b);
  - (d) fishing vessels be equipped for radio or satellite communication with persons or services ashore that can provide medical advice, taking into account the area of operation and the length of the voyage; and
  - (e) fishers have the right to medical treatment ashore and the right to be taken ashore in a timely manner for treatment in the event of serious injury or illness.

#### *Article 30*

For fishing vessels of 24 metres in length and over, taking into account the number of fishers on board, the area of operation and the duration of the voyage, each Member shall adopt laws, regulations or other measures requiring that:

- (a) the competent authority prescribe the medical equipment and medical supplies to be carried on board;
- (b) the medical equipment and medical supplies carried on board be properly maintained and inspected at regular intervals established by the competent authority by responsible persons designated or approved by the competent authority;
- (c) the vessels carry a medical guide adopted or approved by the competent authority, or the latest edition of the *International Medical Guide for Ships*;
- (d) the vessels have access to a prearranged system of medical advice to vessels at sea by radio or satellite communication, including specialist advice, which shall be available at all times;
- (e) the vessels carry on board a list of radio or satellite stations through which medical advice can be obtained; and
- (f) to the extent consistent with the Member's national law and practice, medical care while the fisher is on board or landed in a foreign port be provided free of charge to the fisher.

#### OCCUPATIONAL SAFETY AND HEALTH AND ACCIDENT PREVENTION

#### *Article 31*

Each Member shall adopt laws, regulations or other measures concerning:

- 
- b) les navires de pêche aient à leur bord au moins un pêcheur qualifié ou formé pour donner les premiers secours et autres formes de soins médicaux, qui sache utiliser les fournitures et le matériel médicaux dont est doté le navire, compte tenu du nombre de pêcheurs à bord, de la zone d'opération et de la durée du voyage;
  - c) les fournitures et le matériel médicaux présents à bord soient accompagnés d'instructions ou d'autres informations dans une langue et une présentation compréhensibles au pêcheur ou aux pêcheurs visés à l'alinéa b);
  - d) les navires de pêche soient équipés d'un système de communication par radio ou par satellite avec des personnes ou services à terre pouvant fournir des consultations médicales, compte tenu de la zone d'opération et de la durée du voyage;
  - e) les pêcheurs aient le droit de bénéficier d'un traitement médical à terre et d'être débarqués à cet effet en temps voulu en cas de lésion ou de maladie graves.

#### *Article 30*

Pour les navires de pêche d'une longueur égale ou supérieure à 24 mètres, compte tenu du nombre de pêcheurs à bord, de la zone d'opération et de la durée du voyage, tout Membre doit adopter une législation ou d'autres mesures prévoyant que:

- a) l'autorité compétente prescrive le matériel médical et les fournitures médicales devant être disponibles à bord;
- b) le matériel médical et les fournitures médicales disponibles à bord soient entretenus de façon adéquate et inspectés à des intervalles réguliers, fixés par l'autorité compétente, par des responsables désignés ou agréés par celle-ci;
- c) les navires soient pourvus d'un guide médical de bord adopté ou approuvé par l'autorité compétente ou de l'édition la plus récente du *Guide médical international de bord*;
- d) les navires en mer aient accès à un dispositif organisé de consultations médicales par radio ou par satellite, y compris à des conseils de spécialistes, à toute heure du jour ou de la nuit;
- e) les navires conservent à bord une liste de stations de radio ou de satellite par l'intermédiaire desquelles des consultations médicales peuvent être obtenues;
- f) dans une mesure conforme à la législation et à la pratique du Membre, les soins médicaux dispensés au pêcheur lorsqu'il est à bord ou débarqué dans un port étranger lui soient fournis gratuitement.

#### SÉCURITÉ ET SANTÉ AU TRAVAIL ET PRÉVENTION DES ACCIDENTS DU TRAVAIL

#### *Article 31*

Tout Membre doit adopter une législation ou d'autres mesures concernant:

- 
- (a) the prevention of occupational accidents, occupational diseases and work-related risks on board fishing vessels, including risk evaluation and management, training and on-board instruction of fishers;
  - (b) training for fishers in the handling of types of fishing gear they will use and in the knowledge of the fishing operations in which they will be engaged;
  - (c) the obligations of fishing vessel owners, fishers and others concerned, due account being taken of the safety and health of fishers under the age of 18;
  - (d) the reporting and investigation of accidents on board fishing vessels flying its flag; and
  - (e) the setting up of joint committees on occupational safety and health or, after consultation, of other appropriate bodies.

### *Article 32*

1. The requirements of this Article shall apply to fishing vessels of 24 metres in length and over normally remaining at sea for more than three days and, after consultation, to other vessels, taking into account the number of fishers on board, the area of operation, and the duration of the voyage.

2. The competent authority shall:

- (a) after consultation, require that the fishing vessel owner, in accordance with national laws, regulations, collective bargaining agreements and practice, establish on-board procedures for the prevention of occupational accidents, injuries and diseases, taking into account the specific hazards and risks on the fishing vessel concerned; and
- (b) require that fishing vessel owners, skippers, fishers and other relevant persons be provided with sufficient and suitable guidance, training material, or other appropriate information on how to evaluate and manage risks to safety and health on board fishing vessels.

3. Fishing vessel owners shall:

- (a) ensure that every fisher on board is provided with appropriate personal protective clothing and equipment;
- (b) ensure that every fisher on board has received basic safety training approved by the competent authority; the competent authority may grant written exemptions from this requirement for fishers who have demonstrated equivalent knowledge and experience; and
- (c) ensure that fishers are sufficiently and reasonably familiarized with equipment and its methods of operation, including relevant safety measures, prior to using the equipment or participating in the operations concerned.

- 
- a) la prévention des accidents du travail, des maladies professionnelles et des risques liés au travail à bord des navires, notamment l'évaluation et la gestion des risques, la formation des pêcheurs et l'instruction à bord;
  - b) la formation des pêcheurs à l'utilisation des engins de pêche dont ils se serviront et à la connaissance des opérations de pêche qu'ils auront à effectuer;
  - c) les obligations des armateurs à la pêche, des pêcheurs et autres personnes intéressées, compte dûment tenu de la sécurité et de la santé des pêcheurs âgés de moins de 18 ans;
  - d) la déclaration des accidents survenant à bord des navires de pêche battant son pavillon et la réalisation d'enquêtes sur ces accidents;
  - e) la constitution de comités paritaires de sécurité et de santé au travail ou, après consultation, d'autres organismes qualifiés.

### *Article 32*

1. Les prescriptions du présent article s'appliquent aux navires d'une longueur égale ou supérieure à 24 mètres passant habituellement plus de trois jours en mer et, après consultation, à d'autres navires, compte tenu du nombre de pêcheurs à bord, de la zone d'opération et de la durée du voyage.

2. L'autorité compétente doit:

- a) après consultation, faire obligation à l'armateur à la pêche d'établir, conformément à la législation, aux conventions collectives et à la pratique nationales, des procédures à bord visant à prévenir les accidents du travail et les lésions et maladies professionnelles, compte tenu des dangers et risques spécifiques du navire de pêche concerné;
- b) exiger que les armateurs à la pêche, les patrons, les pêcheurs et les autres personnes concernées reçoivent suffisamment de directives et de matériel de formation appropriés ainsi que toute autre information pertinente sur la manière d'évaluer et de gérer les risques en matière de sécurité et de santé à bord des navires de pêche.

3. Les armateurs à la pêche doivent:

- a) veiller à ce que tous les pêcheurs à bord reçoivent des vêtements et équipements de protection individuelle appropriés;
- b) veiller à ce que tous les pêcheurs à bord aient reçu une formation de base en matière de sécurité, approuvée par l'autorité compétente; cette dernière peut cependant accorder une dérogation écrite dans le cas des pêcheurs qui démontrent qu'ils possèdent des connaissances et une expérience équivalentes;
- c) veiller à ce que les pêcheurs soient suffisamment et convenablement familiarisés avec l'équipement et son utilisation, y compris avec les mesures de sécurité s'y rapportant, avant d'utiliser cet équipement ou de participer aux opérations concernées.

---

*Article 33*

Risk evaluation in relation to fishing shall be conducted, as appropriate, with the participation of fishers or their representatives.

SOCIAL SECURITY

*Article 34*

Each Member shall ensure that fishers ordinarily resident in its territory, and their dependants to the extent provided in national law, are entitled to benefit from social security protection under conditions no less favourable than those applicable to other workers, including employed and self-employed persons, ordinarily resident in its territory.

*Article 35*

Each Member shall undertake to take steps, according to national circumstances, to achieve progressively comprehensive social security protection for all fishers who are ordinarily resident in its territory.

*Article 36*

Members shall cooperate through bilateral or multilateral agreements or other arrangements, in accordance with national laws, regulations or practice:

- (a) to achieve progressively comprehensive social security protection for fishers, taking into account the principle of equality of treatment irrespective of nationality; and
- (b) to ensure the maintenance of social security rights which have been acquired or are in the course of acquisition by all fishers regardless of residence.

*Article 37*

Notwithstanding the attribution of responsibilities in Articles 34, 35 and 36, Members may determine, through bilateral and multilateral agreements and through provisions adopted in the framework of regional economic integration organizations, other rules concerning the social security legislation to which fishers are subject.

PROTECTION IN THE CASE OF WORK-RELATED  
SICKNESS, INJURY OR DEATH

*Article 38*

1. Each Member shall take measures to provide fishers with protection, in accordance with national laws, regulations or practice, for work-related sickness, injury or death.

---

*Article 33*

L'évaluation des risques concernant la pêche est effectuée, selon le cas, avec la participation de pêcheurs ou de leurs représentants.

SÉCURITÉ SOCIALE

*Article 34*

Tout Membre veille à ce que les pêcheurs résidant habituellement sur son territoire et, dans la mesure prévue par la législation nationale, les personnes à leur charge bénéficient de la sécurité sociale à des conditions non moins favorables que celles qui s'appliquent aux autres travailleurs, y compris les personnes salariées ou indépendantes, résidant habituellement sur son territoire.

*Article 35*

Tout Membre s'engage à prendre des mesures, en fonction de la situation nationale, pour assurer progressivement une protection complète de sécurité sociale à tous les pêcheurs résidant habituellement sur son territoire.

*Article 36*

Les Membres doivent coopérer, dans le cadre d'accords bilatéraux ou multilatéraux ou d'autres arrangements, en conformité avec la législation ou la pratique nationales, en vue:

- a) d'assurer progressivement une protection complète de sécurité sociale aux pêcheurs, sans considération de nationalité, en tenant compte du principe d'égalité de traitement;
- b) de garantir le maintien des droits en matière de sécurité sociale acquis ou en cours d'acquisition par tous les pêcheurs, indépendamment de leur lieu de résidence.

*Article 37*

Nonobstant l'attribution des responsabilités prévues aux articles 34, 35 et 36, les Membres peuvent établir, par des accords bilatéraux ou multilatéraux ou par des dispositions adoptées dans le cadre d'organisations régionales d'intégration économique, d'autres règles relatives à la législation en matière de sécurité sociale applicable aux pêcheurs.

PROTECTION EN CAS DE MALADIE,  
LÉSION OU DÉCÈS LIÉS AU TRAVAIL

*Article 38*

1. Tout Membre prend des mesures en vue d'assurer aux pêcheurs une protection, conformément à la législation et à la pratique nationales, en cas de maladie, de lésion ou de décès liés au travail.

---

2. In the event of injury due to occupational accident or disease, the fisher shall have access to:

- (a) appropriate medical care; and
- (b) the corresponding compensation in accordance with national laws and regulations.

3. Taking into account the characteristics within the fishing sector, the protection referred to in paragraph 1 of this Article may be ensured through:

- (a) a system for fishing vessel owners' liability; or
- (b) compulsory insurance, workers' compensation or other schemes.

### *Article 39*

1. In the absence of national provisions for fishers, each Member shall adopt laws, regulations or other measures to ensure that fishing vessel owners are responsible for the provision to fishers on vessels flying its flag, of health protection and medical care while employed or engaged or working on a vessel at sea or in a foreign port. Such laws, regulations or other measures shall ensure that fishing vessel owners are responsible for defraying the expenses of medical care, including related material assistance and support, during medical treatment in a foreign country, until the fisher has been repatriated.

2. National laws or regulations may permit the exclusion of the liability of the fishing vessel owner if the injury occurred otherwise than in the service of the vessel or the sickness or infirmity was concealed during engagement, or the injury or sickness was due to wilful misconduct of the fisher.

## PART VII. COMPLIANCE AND ENFORCEMENT

### *Article 40*

Each Member shall effectively exercise its jurisdiction and control over vessels that fly its flag by establishing a system for ensuring compliance with the requirements of this Convention including, as appropriate, inspections, reporting, monitoring, complaint procedures, appropriate penalties and corrective measures, in accordance with national laws or regulations.

### *Article 41*

1. Members shall require that fishing vessels remaining at sea for more than three days, which:

---

2. En cas de lésion provoquée par un accident du travail ou une maladie professionnelle, le pêcheur doit:

- a) avoir accès à des soins médicaux appropriés;
- b) bénéficier d'une indemnisation correspondante conformément à la législation nationale.

3. Compte tenu des caractéristiques du secteur de la pêche, la protection visée au paragraphe 1 du présent article pourra être assurée:

- a) soit par un régime reposant sur la responsabilité de l'armateur à la pêche;
- b) soit par un régime d'assurance obligatoire d'indemnisation des travailleurs ou d'autres régimes.

### *Article 39*

1. En l'absence de dispositions nationales applicables aux pêcheurs, tout Membre adopte une législation ou d'autres mesures visant à garantir que les armateurs à la pêche assurent la protection de la santé et les soins médicaux des pêcheurs lorsque ces derniers sont employés ou engagés ou travaillent à bord d'un navire battant son pavillon, en mer ou dans un port étranger. Cette législation ou ces autres mesures doivent garantir que les armateurs à la pêche acquittent les frais des soins médicaux, y compris l'aide et le soutien matériels correspondants pendant la durée des traitements médicaux dispensés à l'étranger jusqu'au rapatriement du pêcheur.

2. La législation nationale peut prévoir de décharger l'armateur à la pêche de sa responsabilité dans le cas où l'accident n'est pas survenu au service du navire de pêche ou si la maladie ou l'infirmité a été dissimulée lors de l'engagement ou si l'accident ou la maladie est imputable à une faute intentionnelle du pêcheur.

## PARTIE VII. RESPECT ET APPLICATION

### *Article 40*

Tout Membre exerce effectivement sa juridiction et son contrôle sur les navires battant son pavillon en se dotant d'un système propre à garantir le respect des prescriptions de la présente convention, notamment en prévoyant, s'il y a lieu, la conduite d'inspections, l'établissement de rapports, une procédure de règlement des plaintes, un suivi et la mise en œuvre de sanctions et mesures correctives appropriées conformément à la législation nationale.

### *Article 41*

1. Les Membres doivent exiger que les navires de pêche qui passent plus de trois jours en mer et qui:

- 
- (a) are 24 metres in length and over; or
- (b) normally navigate at a distance exceeding 200 nautical miles from the coastline of the flag State or navigate beyond the outer edge of its continental shelf, whichever distance from the coastline is greater,
- carry a valid document issued by the competent authority stating that the vessel has been inspected by the competent authority or on its behalf, for compliance with the provisions of this Convention concerning living and working conditions.

2. The period of validity of such document may coincide with the period of validity of a national or an international fishing vessel safety certificate, but in no case shall such period of validity exceed five years.

#### *Article 42*

1. The competent authority shall appoint a sufficient number of qualified inspectors to fulfil its responsibilities under Article 41.

2. In establishing an effective system for the inspection of living and working conditions on board fishing vessels, a Member, where appropriate, may authorize public institutions or other organizations that it recognizes as competent and independent to carry out inspections and issue documents. In all cases, the Member shall remain fully responsible for the inspection and issuance of the related documents concerning the living and working conditions of the fishers on fishing vessels that fly its flag.

#### *Article 43*

1. A Member which receives a complaint or obtains evidence that a fishing vessel that flies its flag does not conform to the requirements of this Convention shall take the steps necessary to investigate the matter and ensure that action is taken to remedy any deficiencies found.

2. If a Member, in whose port a fishing vessel calls in the normal course of its business or for operational reasons, receives a complaint or obtains evidence that such vessel does not conform to the requirements of this Convention, it may prepare a report addressed to the government of the flag State of the vessel, with a copy to the Director-General of the International Labour Office, and may take measures necessary to rectify any conditions on board which are clearly hazardous to safety or health.

3. In taking the measures referred to in paragraph 2 of this Article, the Member shall notify forthwith the nearest representative of the flag State and, if possible, shall have such representative present. The Member shall not unreasonably detain or delay the vessel.

4. For the purpose of this Article, the complaint may be submitted by a fisher, a professional body, an association, a trade union or, generally, any

- 
- a) ont une longueur égale ou supérieure à 24 mètres, ou
- b) naviguent habituellement à plus de 200 milles nautiques de la côte de l'Etat du pavillon ou au-delà du rebord externe du plateau continental, si celui-ci est plus éloigné,

aient à bord un document valide délivré par l'autorité compétente, indiquant qu'ils ont été inspectés par l'autorité compétente ou en son nom, en vue de déterminer leur conformité avec les dispositions de la présente convention concernant les conditions de vie et de travail à bord.

2. La durée de validité de ce document peut coïncider avec celle d'un certificat national ou international de sécurité des navires de pêche mais ne dépasse en aucun cas cinq ans.

#### *Article 42*

1. L'autorité compétente désigne des inspecteurs qualifiés en nombre suffisant pour assumer les responsabilités qui lui incombent en vertu de l'article 41.

2. Aux fins de l'instauration d'un système efficace d'inspection des conditions de vie et de travail à bord des navires de pêche, un Membre peut, s'il y a lieu, autoriser des institutions publiques ou d'autres organismes dont il reconnaît la compétence et l'indépendance à réaliser des inspections et à délivrer des certificats. Dans tous les cas, le Membre demeure entièrement responsable de l'inspection et de la délivrance des certificats correspondants relatifs aux conditions de vie et de travail des pêcheurs à bord des navires battant son pavillon.

#### *Article 43*

1. Si un Membre reçoit une plainte ou acquiert la preuve qu'un navire battant son pavillon ne se conforme pas aux prescriptions de la convention, il prend les dispositions nécessaires pour enquêter et s'assurer que des mesures sont prises pour remédier aux manquements constatés.

2. Si un Membre dans le port duquel un navire de pêche fait escale dans le cours normal de son activité ou pour une raison inhérente à son exploitation reçoit une plainte ou acquiert la preuve que ce navire de pêche n'est pas conforme aux prescriptions de la présente convention, il peut adresser un rapport au gouvernement de l'Etat du pavillon, avec copie au Directeur général du Bureau international du Travail, et prendre les mesures nécessaires pour redresser toute situation à bord qui constitue manifestement un danger pour la sécurité ou la santé.

3. S'il prend les mesures mentionnées au paragraphe 2 du présent article, le Membre doit en informer immédiatement le plus proche représentant de l'Etat du pavillon et demander à celui-ci d'être présent si possible. Il ne doit pas retenir ou retarder indûment le navire.

4. Aux fins du présent article, une plainte peut être soumise par un pêcheur, un organisme professionnel, une association, un syndicat ou, de

---

person with an interest in the safety of the vessel, including an interest in safety or health hazards to the fishers on board.

5. This Article does not apply to complaints which a Member considers to be manifestly unfounded.

*Article 44*

Each Member shall apply this Convention in such a way as to ensure that the fishing vessels flying the flag of any State that has not ratified this Convention do not receive more favourable treatment than fishing vessels that fly the flag of any Member that has ratified it.

PART VIII. AMENDMENT OF ANNEXES I, II AND III

*Article 45*

1. Subject to the relevant provisions of this Convention, the International Labour Conference may amend Annexes I, II and III. The Governing Body of the International Labour Office may place an item on the agenda of the Conference regarding proposals for such amendments established by a tripartite meeting of experts. The decision to adopt the proposals shall require a majority of two-thirds of the votes cast by the delegates present at the Conference, including at least half the Members that have ratified this Convention.

2. Any amendment adopted in accordance with paragraph 1 of this Article shall enter into force six months after the date of its adoption for any Member that has ratified this Convention, unless such Member has given written notice to the Director-General of the International Labour Office that it shall not enter into force for that Member, or shall only enter into force at a later date upon subsequent written notification.

PART IX. FINAL PROVISIONS

*Article 46*

This Convention revises the Minimum Age (Fishermen) Convention, 1959 (No. 112), the Medical Examination (Fishermen) Convention, 1959 (No. 113), the Fishermen's Articles of Agreement Convention, 1959 (No. 114), and the Accommodation of Crews (Fishermen) Convention, 1966 (No. 126).

*Article 47*

The formal ratifications of this Convention shall be communicated to the Director-General of the International Labour Office for registration.

---

manière générale, toute personne ayant un intérêt à la sécurité du navire, y compris en ce qui concerne les risques relatifs à la sécurité ou à la santé des pêcheurs à bord.

5. Cet article ne s'applique pas aux plaintes qu'un Membre considère manifestement infondées.

#### *Article 44*

Tout Membre appliquera la présente convention de manière à garantir que les navires de pêche battant pavillon de tout Etat qui n'a pas ratifié la convention ne bénéficient pas d'un traitement plus favorable que celui accordé aux navires battant pavillon de tout Membre qui l'a ratifiée.

### PARTIE VIII. AMENDEMENTS DES ANNEXES I, II ET III

#### *Article 45*

1. Sous réserve des dispositions pertinentes de la présente convention, la Conférence internationale du Travail peut amender les annexes I, II et III. Le Conseil d'administration du Bureau international du Travail peut inscrire à l'ordre du jour de la Conférence une question concernant des propositions d'amendements établies par une réunion tripartite d'experts. La majorité des deux tiers des voix des délégués présents à la Conférence, comprenant au moins la moitié des Membres ayant ratifié cette convention, est requise pour l'adoption d'amendements.

2. Tout amendement adopté conformément au paragraphe 1 du présent article entre en vigueur six mois après la date de son adoption pour tout Membre ayant ratifié la présente convention, à moins que le Membre en question n'ait adressé au Directeur général du Bureau international du Travail une notification écrite précisant que cet amendement n'entrera pas en vigueur à son égard ou n'entrera en vigueur qu'ultérieurement à la suite d'une nouvelle notification.

### PARTIE IX. DISPOSITIONS FINALES

#### *Article 46*

La présente convention révisé la convention (n° 112) sur l'âge minimum (pêcheurs), 1959, la convention (n° 113) sur l'examen médical des pêcheurs, 1959, la convention (n° 114) sur le contrat d'engagement des pêcheurs, 1959, et la convention (n° 126) sur le logement à bord des bateaux de pêche, 1966.

#### *Article 47*

Les ratifications formelles de la présente convention sont communiquées au Directeur général du Bureau international du Travail aux fins d'enregistrement.

---

*Article 48*

1. This Convention shall be binding only upon those Members of the International Labour Organization whose ratifications have been registered with the Director-General of the International Labour Office.

2. It shall come into force 12 months after the date on which the ratifications of ten Members, eight of which are coastal States, have been registered with the Director-General.

3. Thereafter, this Convention shall come into force for any Member 12 months after the date on which its ratification is registered.

*Article 49*

1. A Member which has ratified this Convention may denounce it after the expiration of ten years from the date on which the Convention first comes into force, by an act communicated to the Director-General of the International Labour Office for registration. Such denunciation shall not take effect until one year after the date on which it is registered.

2. Each Member which has ratified this Convention and which does not, within the year following the expiration of the period of ten years mentioned in the preceding paragraph, exercise the right of denunciation provided for in this Article, will be bound for another period of ten years and, thereafter, may denounce this Convention within the first year of each new period of ten years under the terms provided for in this Article.

*Article 50*

1. The Director-General of the International Labour Office shall notify all Members of the International Labour Organization of the registration of all ratifications, declarations and denunciations that have been communicated by the Members of the Organization.

2. When notifying the Members of the Organization of the registration of the last of the ratifications required to bring the Convention into force, the Director-General shall draw the attention of the Members of the Organization to the date upon which the Convention will come into force.

*Article 51*

The Director-General of the International Labour Office shall communicate to the Secretary-General of the United Nations for registration in accordance with Article 102 of the Charter of the United Nations full particulars of all ratifications, declarations and denunciations registered by the Director-General.

---

### *Article 48*

1. La présente convention ne lie que les Membres de l'Organisation internationale du Travail dont la ratification a été enregistrée par le Directeur général du Bureau international du Travail.

2. Elle entre en vigueur 12 mois après que les ratifications de dix Membres comprenant huit Etats côtiers ont été enregistrées par le Directeur général.

3. Par la suite, la convention entre en vigueur pour chaque Membre 12 mois après la date de l'enregistrement de sa ratification.

### *Article 49*

1. Tout Membre ayant ratifié la présente convention peut la dénoncer à l'expiration d'une période de dix années après la date de la mise en vigueur initiale de la convention, par un acte communiqué au Directeur général du Bureau international du Travail aux fins d'enregistrement. La dénonciation prend effet une année après avoir été enregistrée.

2. Tout Membre ayant ratifié la présente convention qui, dans l'année après l'expiration de la période de dix années mentionnée au paragraphe précédent, ne se prévaut pas de la faculté de dénonciation prévue par le présent article sera lié pour une nouvelle période de dix années et, par la suite, pourra dénoncer la présente convention dans la première année de chaque nouvelle période de dix années dans les conditions prévues au présent article.

### *Article 50*

1. Le Directeur général du Bureau international du Travail notifiera à tous les Membres de l'Organisation internationale du Travail l'enregistrement de toutes les ratifications, déclarations, et dénonciations qui lui seront communiquées par les Membres de l'Organisation.

2. En notifiant aux Membres de l'Organisation l'enregistrement de la dernière ratification nécessaire à l'entrée en vigueur de la présente convention, le Directeur général appelle l'attention des Membres de l'Organisation sur la date à laquelle la convention entrera en vigueur.

### *Article 51*

Le Directeur général du Bureau international du Travail communique au Secrétaire général des Nations Unies, aux fins d'enregistrement, conformément à l'article 102 de la Charte des Nations Unies, des renseignements complets au sujet de toutes ratifications, déclarations et dénonciations enregistrées par le Directeur général.

---

*Article 52*

At such times as it may consider necessary, the Governing Body of the International Labour Office shall present to the General Conference a report on the working of this Convention and shall examine the desirability of placing on the agenda of the Conference the question of its revision in whole or in part, taking into account also the provisions of Article 45.

*Article 53*

1. Should the Conference adopt a new Convention revising this Convention, then, unless the new Convention otherwise provides:

- (a) the ratification by a Member of the new revising Convention shall *ipso jure* involve the immediate denunciation of this Convention, notwithstanding the provisions of Article 49 above, if and when the new revising Convention shall have come into force;
- (b) as from the date when the new revising Convention comes into force this Convention shall cease to be open to ratification by the Members.

2. This Convention shall in any case remain in force in its actual form and content for those Members which have ratified it but have not ratified the revising Convention.

*Article 54*

The English and French versions of the text of this Convention are equally authoritative.

---

### *Article 52*

Chaque fois qu'il le juge nécessaire, le Conseil d'administration du Bureau international du Travail présente à la Conférence générale un rapport sur l'application de la présente convention et examine s'il y a lieu d'inscrire à l'ordre du jour de la Conférence la question de sa révision totale ou partielle, prenant également en considération les dispositions de l'article 45.

### *Article 53*

1. Au cas où la Conférence adopte une nouvelle convention portant révision de la présente convention, et à moins que la nouvelle convention n'en dispose autrement:

- a) la ratification par un Membre de la nouvelle convention portant révision entraîne de plein droit, nonobstant les dispositions de l'article 49 ci-dessus, la dénonciation immédiate de la présente convention, sous réserve que la nouvelle convention portant révision soit entrée en vigueur ;
- b) à partir de la date de l'entrée en vigueur de la nouvelle convention portant révision, la présente convention cesse d'être ouverte à la ratification des Membres.

2. La présente convention demeure en tout cas en vigueur dans sa forme et teneur pour les Membres qui l'auraient ratifiée et qui ne ratifieraient pas la convention portant révision.

### *Article 54*

Les versions française et anglaise de la présente convention font également foi.

---

## ANNEX I

### EQUIVALENCE IN MEASUREMENT

For the purpose of this Convention, where the competent authority, after consultation, decides to use length overall (LOA) rather than length (L) as the basis of measurement:

- (a) a length overall (LOA) of 16.5 metres shall be considered equivalent to a length (L) of 15 metres;
- (b) a length overall (LOA) of 26.5 metres shall be considered equivalent to a length (L) of 24 metres;
- (c) a length overall (LOA) of 50 metres shall be considered equivalent to a length (L) of 45 metres.

---

## ANNEXE I

### EQUIVALENCE POUR LE MESURAGE

Aux fins de la présente convention, lorsque l'autorité compétente, après consultation, décide d'utiliser la longueur hors tout (LHT) comme critère de mesure plutôt que la longueur (L):

- a)* une longueur hors tout (LHT) de 16,5 mètres sera considérée comme équivalente à une longueur (L) de 15 mètres;
- b)* une longueur hors tout (LHT) de 26,5 mètres sera considérée comme équivalente à une longueur (L) de 24 mètres;
- c)* une longueur hors tout (LHT) de 50 mètres sera considérée comme équivalente à une longueur (L) de 45 mètres.

---

## ANNEX II

### FISHER'S WORK AGREEMENT

The fisher's work agreement shall contain the following particulars, except in so far as the inclusion of one or more of them is rendered unnecessary by the fact that the matter is regulated in another manner by national laws or regulations, or a collective bargaining agreement where applicable:

- (a) the fisher's family name and other names, date of birth or age, and birthplace;
- (b) the place at which and date on which the agreement was concluded;
- (c) the name of the fishing vessel or vessels and the registration number of the vessel or vessels on board which the fisher undertakes to work;
- (d) the name of the employer, or fishing vessel owner, or other party to the agreement with the fisher;
- (e) the voyage or voyages to be undertaken, if this can be determined at the time of making the agreement;
- (f) the capacity in which the fisher is to be employed or engaged;
- (g) if possible, the place at which and date on which the fisher is required to report on board for service;
- (h) the provisions to be supplied to the fisher, unless some alternative system is provided for by national law or regulation;
- (i) the amount of wages, or the amount of the share and the method of calculating such share if remuneration is to be on a share basis, or the amount of the wage and share and the method of calculating the latter if remuneration is to be on a combined basis, and any agreed minimum wage;
- (j) the termination of the agreement and the conditions thereof, namely:
  - (i) if the agreement has been made for a definite period, the date fixed for its expiry;
  - (ii) if the agreement has been made for a voyage, the port of destination and the time which has to expire after arrival before the fisher shall be discharged;
  - (iii) if the agreement has been made for an indefinite period, the conditions which shall entitle either party to rescind it, as well as the required period of notice for rescission, provided that such period shall not be less for the employer, or fishing vessel owner or other party to the agreement with the fisher;
- (k) the protection that will cover the fisher in the event of sickness, injury or death in connection with service;

---

## ANNEXE II

### ACCORD D'ENGAGEMENT DU PÊCHEUR

L'accord d'engagement du pêcheur devra comporter les mentions suivantes, sauf dans les cas où l'inclusion de l'une de ces mentions ou de certaines d'entre elles est inutile, la question étant déjà réglée d'une autre manière par la législation nationale ou, le cas échéant, par une convention collective:

- a) les nom et prénoms du pêcheur, la date de naissance ou l'âge, ainsi que le lieu de naissance;
- b) le lieu et la date de la conclusion de l'accord;
- c) la désignation du ou des navires de pêche et le numéro d'immatriculation du ou des navires de pêche à bord duquel ou desquels le pêcheur s'engage à travailler;
- d) le nom de l'employeur ou de l'armateur à la pêche ou autre partie à l'accord;
- e) le voyage ou les voyages à entreprendre, s'ils peuvent être déterminés au moment de l'engagement;
- f) la fonction pour laquelle le pêcheur doit être employé ou engagé;
- g) si possible, la date à laquelle et le lieu où le pêcheur sera tenu de se présenter à bord pour le commencement de son service;
- h) les vivres à allouer au pêcheur, sauf si la législation nationale prévoit un système différent;
- i) le montant du salaire du pêcheur ou, s'il est rémunéré à la part, le pourcentage de sa part et le mode de calcul de celle-ci, ou encore, si un système mixte de rémunération est appliqué, le montant du salaire, le pourcentage de sa part et le mode de calcul de celle-ci, ainsi que tout salaire minimum convenu;
- j) l'échéance de l'accord et les conditions y relatives, soit:
  - i) si l'accord a été conclu pour une durée déterminée, la date fixée pour son expiration;
  - ii) si l'accord a été conclu au voyage, le port de destination convenu pour la fin de l'accord et l'indication du délai à l'expiration duquel le pêcheur sera libéré après l'arrivée à cette destination;
  - iii) si l'accord a été conclu pour une durée indéterminée, les conditions dans lesquelles chaque partie pourra dénoncer l'accord ainsi que le délai de préavis requis, lequel n'est pas plus court pour l'employeur, l'armateur à la pêche ou autre partie que pour le pêcheur;
- k) la protection en cas de maladie, de lésion ou de décès du pêcheur lié à son service;

- 
- (l) the amount of paid annual leave or the formula used for calculating leave, where applicable;
  - (m) the health and social security coverage and benefits to be provided to the fisher by the employer, fishing vessel owner, or other party or parties to the fisher's work agreement, as applicable;
  - (n) the fisher's entitlement to repatriation;
  - (o) a reference to the collective bargaining agreement, where applicable;
  - (p) the minimum periods of rest, in accordance with national laws, regulations or other measures; and
  - (q) any other particulars which national law or regulation may require.

- 
- l)* le congé payé annuel ou la formule utilisée pour le calculer, le cas échéant;
  - m)* les prestations en matière de protection de la santé et de sécurité sociale qui doivent être assurées au pêcheur par l'employeur, l'armateur à la pêche ou autre partie à l'accord d'engagement du pêcheur, selon le cas;
  - n)* le droit du pêcheur à un rapatriement;
  - o)* la référence à la convention collective, le cas échéant;
  - p)* les périodes minimales de repos conformément à la législation nationale ou autres mesures;
  - q)* toutes autres mentions que la législation nationale peut exiger.

---

## ANNEX III

### FISHING VESSEL ACCOMMODATION

#### *General provisions*

1. For the purposes of this Annex:

- (a) “new fishing vessel” means a vessel for which:
- (i) the building or major conversion contract has been placed on or after the date of the entry into force of the Convention for the Member concerned; or
  - (ii) the building or major conversion contract has been placed before the date of the entry into force of the Convention for the Member concerned, and which is delivered three years or more after that date; or
  - (iii) in the absence of a building contract, on or after the date of the entry into force of the Convention for the Member concerned:
    - the keel is laid, or
    - construction identifiable with a specific vessel begins, or
    - assembly has commenced comprising at least 50 tonnes or 1 per cent of the estimated mass of all structural material, whichever is less;
- (b) “existing vessel” means a vessel that is not a new fishing vessel.

2. The following shall apply to all new, decked fishing vessels, subject to any exclusions provided for in accordance with Article 3 of the Convention. The competent authority may, after consultation, also apply the requirements of this Annex to existing vessels, when and in so far as it determines that this is reasonable and practicable.

3. The competent authority, after consultation, may permit variations to the provisions of this Annex for fishing vessels normally remaining at sea for less than 24 hours where the fishers do not live on board the vessel in port. In the case of such vessels, the competent authority shall ensure that the fishers concerned have adequate facilities for resting, eating and sanitation purposes.

4. Any variations made by a Member under paragraph 3 of this Annex shall be reported to the International Labour Office under article 22 of the Constitution of the International Labour Organisation.

---

## ANNEXE III

### LOGEMENT À BORD DES NAVIRES DE PÊCHE

#### *Dispositions générales*

1. Aux fins de la présente annexe:

- a) les termes «navire de pêche neuf» désignent un navire pour lequel:
- i) le contrat de construction ou de transformation importante a été passé à la date d'entrée en vigueur de la convention pour le Membre concerné ou après cette date; ou
  - ii) le contrat de construction ou de transformation importante a été passé avant la date d'entrée en vigueur de la convention pour le Membre concerné, et qui est livré trois ans ou plus après cette date; ou
  - iii) en l'absence d'un contrat de construction, à la date d'entrée en vigueur de la convention pour le Membre concerné ou après cette date:
    - la quille est posée; ou
    - une construction permettant d'identifier un navire particulier a commencé; ou
    - le montage a commencé, employant au moins 50 tonnes ou 1 pour cent de la masse estimée de tous les matériaux de structure, si cette dernière valeur est inférieure;
- b) les termes «navire existant» désignent un navire qui n'est pas un navire de pêche neuf.

2. Les dispositions suivantes s'appliquent à tous les nouveaux navires de pêche pontés, sauf exclusions autorisées aux termes de l'article 3 de la convention. L'autorité compétente peut également, après consultation, appliquer les prescriptions de la présente annexe aux navires existants, dès lors que et dans la mesure où elle décide que cela est raisonnable et réalisable.

3. L'autorité compétente peut, après consultation, autoriser des dérogations aux dispositions de la présente annexe pour des navires de pêche ne restant normalement en mer que pour des durées inférieures à 24 heures si les pêcheurs ne vivent pas à bord du navire lorsqu'il est au port. Dans le cas de tels navires, l'autorité compétente doit veiller à ce que les pêcheurs concernés aient à leur disposition des installations adéquates pour leurs repos, alimentation et hygiène.

4. Toute dérogation faite par un Membre en vertu du paragraphe 3 de la présente annexe doit être communiquée au Bureau international du Travail conformément à l'article 22 de la Constitution de l'Organisation internationale du Travail.

---

5. The requirements for vessels of 24 metres in length and over may be applied to vessels between 15 and 24 metres in length where the competent authority determines, after consultation, that this is reasonable and practicable.

6. Fishers working on board feeder vessels which do not have appropriate accommodation and sanitary facilities shall be provided with such accommodation and facilities on board the mother vessel.

7. Members may extend the requirements of this Annex regarding noise and vibration, ventilation, heating and air conditioning, and lighting to enclosed working spaces and spaces used for storage if, after consultation, such application is considered appropriate and will not have a negative influence on the function of the process or working conditions or the quality of the catches.

8. The use of gross tonnage as referred to in Article 5 of the Convention is limited to the following specified paragraphs of this Annex: 14, 37, 38, 41, 43, 46, 49, 53, 55, 61, 64, 65 and 67. For these purposes, where the competent authority, after consultation, decides to use gross tonnage (gt) as the basis of measurement:

- (a) a gross tonnage of 75 gt shall be considered equivalent to a length (L) of 15 metres or a length overall (LOA) of 16.5 metres;
- (b) a gross tonnage of 300 gt shall be considered equivalent to a length (L) of 24 metres or a length overall (LOA) of 26.5 metres;
- (c) a gross tonnage of 950 gt shall be considered equivalent to a length (L) of 45 metres or a length overall (LOA) of 50 metres.

### *Planning and control*

9. The competent authority shall satisfy itself that, on every occasion when a vessel is newly constructed or the crew accommodation of a vessel has been reconstructed, such vessel complies with the requirements of this Annex. The competent authority shall, to the extent practicable, require compliance with this Annex when the crew accommodation of a vessel is substantially altered and, for a vessel that changes the flag it flies to the flag of the Member, require compliance with those requirements of this Annex that are applicable in accordance with paragraph 2 of this Annex.

10. For the occasions noted in paragraph 9 of this Annex, for vessels of 24 metres in length and over, detailed plans and information concerning accommodation shall be required to be submitted for approval to the competent authority, or an entity authorized by it.

11. For vessels of 24 metres in length and over, on every occasion when the crew accommodation of the fishing vessel has been reconstructed or

---

5. Les prescriptions valables pour les navires d'une longueur égale ou supérieure à 24 mètres peuvent s'appliquer aux navires d'une longueur comprise entre 15 et 24 mètres si l'autorité compétente décide, après consultation, que cela est raisonnable et réalisable.

6. Les pêcheurs travaillant à bord de navires nourrices dépourvus de logements et d'installations sanitaires appropriés pourront utiliser ceux du navire mère.

7. Les Membres peuvent étendre les dispositions de la présente annexe relatives au bruit et aux vibrations, à la ventilation, au chauffage et à la climatisation, à l'éclairage aux lieux de travail clos et aux espaces servant à l'entreposage si, après consultation, cette extension est considérée appropriée et n'influe pas négativement sur les conditions de travail ou sur le traitement ou la qualité des captures.

8. L'utilisation de la jauge brute visée à l'article 5 de la convention est limitée aux paragraphes de la présente annexe spécifiés ci-après: 14, 37, 38, 41, 43, 46, 49, 53, 55, 61, 64, 65 et 67. A ces fins, lorsque l'autorité compétente, après consultation, décide d'utiliser la jauge brute comme critère de mesure:

- a) une jauge brute de 75 sera considérée comme équivalente à une longueur (L) de 15 mètres, ou à une longueur hors tout (LHT) de 16,5 mètres;
- b) une jauge brute de 300 sera considérée comme équivalente à une longueur (L) de 24 mètres, ou à une longueur hors tout (LHT) de 26,5 mètres;
- c) une jauge brute de 950 sera considérée comme équivalente à une longueur (L) de 45 mètres, ou à une longueur hors tout (LHT) de 50 mètres.

#### *Planification et contrôle*

9. L'autorité compétente doit vérifier que, chaque fois qu'un navire vient d'être construit, ou que le logement de l'équipage à bord du navire a été refait à neuf, ledit navire est conforme aux prescriptions de la présente annexe. L'autorité compétente doit, dans la mesure du possible, exiger qu'un navire dont le logement de l'équipage a été substantiellement modifié soit conforme aux prescriptions de la présente annexe et qu'un navire qui remplace son pavillon par le pavillon du Membre soit conforme aux prescriptions de la présente annexe applicables conformément au paragraphe 2 de ladite annexe.

10. Dans les situations visées au paragraphe 9 de la présente annexe, pour les navires d'une longueur égale ou supérieure à 24 mètres, l'autorité compétente doit demander que les plans détaillés du logement de l'équipage et des informations à son sujet soient soumis pour approbation à l'autorité compétente ou à une entité qu'elle a habilitée à cette fin.

11. Pour les navires d'une longueur égale ou supérieure à 24 mètres, l'autorité compétente doit contrôler, chaque fois que le logement de

---

substantially altered, the competent authority shall inspect the accommodation for compliance with the requirements of the Convention, and when the vessel changes the flag it flies to the flag of the Member, for compliance with those requirements of this Annex that are applicable in accordance with paragraph 2 of this Annex. The competent authority may carry out additional inspections of crew accommodation at its discretion.

12. When a vessel changes flag, any alternative requirements which the competent authority of the Member whose flag the ship was formerly flying may have adopted in accordance with paragraphs 15, 39, 47 or 62 of this Annex cease to apply to the vessel.

### *Design and construction*

#### *Headroom*

13. There shall be adequate headroom in all accommodation spaces. For spaces where fishers are expected to stand for prolonged periods, the minimum headroom shall be prescribed by the competent authority.

14. For vessels of 24 metres in length and over, the minimum permitted headroom in all accommodation where full and free movement is necessary shall not be less than 200 centimetres.

15. Notwithstanding the provisions of paragraph 14, the competent authority may, after consultation, decide that the minimum permitted headroom shall not be less than 190 centimetres in any space – or part of any space – in such accommodation, where it is satisfied that this is reasonable and will not result in discomfort to the fishers.

#### *Openings into and between accommodation spaces*

16. There shall be no direct openings into sleeping rooms from fish rooms and machinery spaces, except for the purpose of emergency escape. Where reasonable and practicable, direct openings from galleys, storerooms, drying rooms or communal sanitary areas shall be avoided unless expressly provided otherwise.

17. For vessels of 24 metres in length and over, there shall be no direct openings, except for the purpose of emergency escape, into sleeping rooms from fish rooms and machinery spaces or from galleys, storerooms, drying rooms or communal sanitary areas; that part of the bulkhead separating such places from sleeping rooms and external bulkheads shall be efficiently constructed of steel or another approved material and shall be watertight and gas-tight. This provision does not exclude the possibility of sanitary areas being shared between two cabins.

---

l'équipage a été refait à neuf ou substantiellement modifié, que celui-ci est conforme aux prescriptions de la convention, et lorsque le navire remplace son pavillon par le pavillon du Membre, contrôler qu'il est conforme aux prescriptions de la présente annexe applicables conformément au paragraphe 2 de ladite annexe. L'autorité compétente peut réaliser, lorsqu'elle le juge opportun, des inspections complémentaires du logement de l'équipage.

12. Lorsqu'un navire change de pavillon, toute prescription que l'autorité compétente du Membre dont le navire battait précédemment pavillon peut avoir adoptée conformément aux dispositions des paragraphes 15, 39, 47 ou 62 de la présente annexe cesse de s'appliquer au navire.

### *Conception et construction*

#### *Hauteur sous barrot*

13. Tous les logements doivent avoir une hauteur sous barrot adéquate. L'autorité compétente doit prescrire la hauteur sous barrot minimale des locaux où les pêcheurs doivent se tenir debout pendant de longues périodes.

14. Sur les navires d'une longueur égale ou supérieure à 24 mètres, la hauteur sous barrot minimale autorisée dans tous les logements où les pêcheurs doivent pouvoir jouir d'une entière liberté de mouvement ne doit pas être inférieure à 200 centimètres.

15. Nonobstant les dispositions du paragraphe 14, l'autorité compétente peut, après consultation, décider que la hauteur sous barrot minimale autorisée ne doit pas être inférieure à 190 centimètres dans tout logement, ou partie de logement, où elle s'est assurée que cela est raisonnable et ne causera pas d'inconfort aux pêcheurs.

#### *Ouvertures donnant sur les locaux d'habitation et entre eux*

16. Les ouvertures directes entre les postes de couchage et les cales à poissons et salles des machines doivent être proscrites, sauf lorsqu'il s'agit d'issues de secours. Dans la mesure où cela est raisonnable et réalisable, les ouvertures directes entre les postes de couchage et les cuisines, cambuses, séchoirs ou installations sanitaires communes doivent être évitées, à moins qu'il n'en soit expressément disposé autrement.

17. Sur les navires d'une longueur égale ou supérieure à 24 mètres, il ne doit y avoir aucune ouverture reliant directement les postes de couchage aux cales à poissons, salles des machines, cuisines, cambuses, séchoirs ou installations sanitaires communes, sauf lorsqu'il s'agit d'issues de secours; la partie de la cloison séparant ces locaux des postes de couchage et des cloisons externes doit être convenablement construite en acier ou autre matériau homologué et être étanche à l'eau et aux gaz. La présente disposition n'exclut pas la possibilité d'un partage d'installations sanitaires entre deux cabines.

---

### *Insulation*

18. Accommodation spaces shall be adequately insulated; the materials used to construct internal bulkheads, panelling and sheeting, and floors and joinings shall be suitable for the purpose and shall be conducive to ensuring a healthy environment. Sufficient drainage shall be provided in all accommodation spaces.

### *Other*

19. All practicable measures shall be taken to protect fishing vessels' crew accommodation against flies and other insects, particularly when vessels are operating in mosquito-infested areas.

20. Emergency escapes from all crew accommodation spaces shall be provided as necessary.

### *Noise and vibration*

21. The competent authority shall take measures to limit excessive noise and vibration in accommodation spaces and, as far as practicable, in accordance with relevant international standards.

22. For vessels of 24 metres in length and over, the competent authority shall adopt standards for noise and vibration in accommodation spaces which shall ensure adequate protection to fishers from the effects of such noise and vibration, including the effects of noise- and vibration-induced fatigue.

### *Ventilation*

23. Accommodation spaces shall be ventilated, taking into account climatic conditions. The system of ventilation shall supply air in a satisfactory condition whenever fishers are on board.

24. Ventilation arrangements or other measures shall be such as to protect non-smokers from tobacco smoke.

25. Vessels of 24 metres in length and over shall be equipped with a system of ventilation for accommodation, which shall be controlled so as to maintain the air in a satisfactory condition and to ensure sufficiency of air movement in all weather conditions and climates. Ventilation systems shall be in operation at all times when fishers are on board.

### *Heating and air conditioning*

26. Accommodation spaces shall be adequately heated, taking into account climatic conditions.

---

### *Isolation*

18. L'isolation du logement de l'équipage doit être adéquate; les matériaux employés pour construire les cloisons, les panneaux et les vaigrages intérieurs, ainsi que les revêtements de sol et les joints doivent être adaptés à leur emploi et de nature à garantir un environnement sain. Des dispositifs d'écoulement des eaux suffisants doivent être prévus dans tous les logements.

### *Autres*

19. Tous les moyens possibles doivent être mis en œuvre pour empêcher que les mouches et autres insectes ne pénètrent dans les locaux d'habitation de l'équipage des navires de pêche, en particulier lorsque ceux-ci opèrent dans des zones infestées de moustiques.

20. Tous les logements d'équipage doivent être dotés des issues de secours nécessaires.

### *Bruits et vibrations*

21. L'autorité compétente doit prendre des mesures pour réduire les bruits et vibrations excessifs dans les locaux d'habitation, si possible en conformité avec les normes internationales pertinentes.

22. Sur les navires d'une longueur égale ou supérieure à 24 mètres, l'autorité compétente doit adopter des normes réglementant les niveaux de bruit et de vibrations dans les locaux d'habitation de manière à protéger adéquatement les pêcheurs des effets nocifs de ces bruits et vibrations, notamment de la fatigue qu'ils induisent.

### *Ventilation*

23. Les locaux d'habitation doivent être ventilés en fonction des conditions climatiques. Le système de ventilation doit permettre une aération satisfaisante des locaux lorsque les pêcheurs sont à bord.

24. Le système de ventilation doit être conçu ou d'autres mesures doivent être prises de manière à protéger les non-fumeurs de la fumée de tabac.

25. Les navires d'une longueur égale ou supérieure à 24 mètres doivent être équipés d'un système de ventilation réglable des locaux d'habitation, de façon à maintenir l'air dans des conditions satisfaisantes et à en assurer une circulation suffisante par tous les temps et sous tous les climats. Les systèmes de ventilation doivent fonctionner en permanence lorsque les pêcheurs sont à bord.

### *Chauffage et climatisation*

26. Les locaux d'habitation doivent être chauffés de manière adéquate en fonction des conditions climatiques.

---

27. For vessels of 24 metres in length and over, adequate heat shall be provided, through an appropriate heating system, except in fishing vessels operating exclusively in tropical climates. The system of heating shall provide heat in all conditions, as necessary, and shall be in operation when fishers are living or working on board, and when conditions so require.

28. For vessels of 24 metres in length and over, with the exception of those regularly engaged in areas where temperate climatic conditions do not require it, air conditioning shall be provided in accommodation spaces, the bridge, the radio room and any centralized machinery control room.

### *Lighting*

29. All accommodation spaces shall be provided with adequate light.

30. Wherever practicable, accommodation spaces shall be lit with natural light in addition to artificial light. Where sleeping spaces have natural light, a means of blocking the light shall be provided.

31. Adequate reading light shall be provided for every berth in addition to the normal lighting of the sleeping room.

32. Emergency lighting shall be provided in sleeping rooms.

33. Where a vessel is not fitted with emergency lighting in mess rooms, passageways, and any other spaces that are or may be used for emergency escape, permanent night lighting shall be provided in such spaces.

34. For vessels of 24 metres in length and over, lighting in accommodation spaces shall meet a standard established by the competent authority. In any part of the accommodation space available for free movement, the minimum standard for such lighting shall be such as to permit a person with normal vision to read an ordinary printed newspaper on a clear day.

### *Sleeping rooms*

#### *General*

35. Where the design, dimensions or purpose of the vessel allow, the sleeping accommodation shall be located so as to minimize the effects of motion and acceleration but shall in no case be located forward of the collision bulkhead.

---

27. Sur les navires d'une longueur égale ou supérieure à 24 mètres, un chauffage adéquat fourni par un système de chauffage approprié doit être prévu sauf sur les navires de pêche opérant exclusivement en zone tropicale. Le système de chauffage doit fournir de la chaleur dans toutes les conditions, suivant les besoins, et fonctionner lorsque les pêcheurs séjournent ou travaillent à bord et que les conditions l'exigent.

28. Sur les navires d'une longueur égale ou supérieure à 24 mètres, à l'exception de ceux opérant dans des zones où les conditions climatiques tempérées ne l'exigent pas, les locaux d'habitation, la passerelle, les salles de radio et toute salle de contrôle des machines centralisée doivent être équipés d'un système de climatisation.

### *Eclairage*

29. Tous les locaux d'habitation doivent bénéficier d'un éclairage adéquat.

30. Dans la mesure du possible, les locaux d'habitation doivent, outre un éclairage artificiel, être éclairés par la lumière naturelle. Lorsque les postes de couchage sont éclairés par la lumière naturelle, un moyen de l'occulter doit être prévu.

31. Chaque couchette doit être dotée d'un éclairage de chevet en complément de l'éclairage normal du poste de couchage.

32. Les postes de couchage doivent être équipés d'un éclairage de secours.

33. Si à bord d'un navire les réfectoires, les coursives et les locaux qui sont ou peuvent être traversés comme issues de secours ne sont pas équipés d'un éclairage de secours, un éclairage permanent doit y être prévu pendant la nuit.

34. Sur les navires d'une longueur égale ou supérieure à 24 mètres, les locaux d'habitation doivent être éclairés conformément à une norme établie par l'autorité compétente. En tous points du local d'habitation où l'on peut circuler librement, la norme minimale de cet éclairage doit être telle qu'une personne dotée d'une acuité visuelle normale puisse lire, par temps clair, un journal imprimé ordinaire.

### *Postes de couchage*

#### *Dispositions générales*

35. Lorsque la conception, les dimensions ou l'usage même du navire le permettent, les postes de couchage doivent être situés de telle manière que les mouvements et l'accélération du navire soient ressentis le moins possible mais ils ne doivent être situés en aucun cas en avant de la cloison d'abordage.

---

### *Floor area*

36. The number of persons per sleeping room and the floor area per person, excluding space occupied by berths and lockers, shall be such as to provide adequate space and comfort for the fishers on board, taking into account the service of the vessel.

37. For vessels of 24 metres in length and over but which are less than 45 metres in length, the floor area per person of sleeping rooms, excluding space occupied by berths and lockers, shall not be less than 1.5 square metres.

38. For vessels of 45 metres in length and over, the floor area per person of sleeping rooms, excluding space occupied by berths and lockers, shall not be less than 2 square metres.

39. Notwithstanding the provisions of paragraphs 37 and 38, the competent authority may, after consultation, decide that the minimum permitted floor area per person of sleeping rooms, excluding space occupied by berths and lockers, shall not be less than 1.0 and 1.5 square metres respectively, where the competent authority is satisfied that this is reasonable and will not result in discomfort to the fishers.

### *Persons per sleeping room*

40. To the extent not expressly provided otherwise, the number of persons allowed to occupy each sleeping room shall not be more than six.

41. For vessels of 24 metres in length and over, the number of persons allowed to occupy each sleeping room shall not be more than four. The competent authority may permit exceptions to this requirement in particular cases if the size, type or intended service of the vessel makes the requirement unreasonable or impracticable.

42. To the extent not expressly provided otherwise, a separate sleeping room or sleeping rooms shall be provided for officers, wherever practicable.

43. For vessels of 24 metres in length and over, sleeping rooms for officers shall be for one person wherever possible and in no case shall the sleeping room contain more than two berths. The competent authority may permit exceptions to the requirements of this paragraph in particular cases if the size, type or intended service of the vessel makes the requirements unreasonable or impracticable.

### *Other*

44. The maximum number of persons to be accommodated in any sleeping room shall be legibly and indelibly marked in a place in the room where it can be conveniently seen.

---

### *Superficie au sol*

36. Le nombre de personnes par poste de couchage ainsi que la superficie au sol par personne, déduction faite de la superficie occupée par les couchettes et les armoires, doivent permettre aux pêcheurs de disposer de suffisamment d'espace et de confort à bord, compte tenu de l'utilisation du navire.

37. Sur les navires d'une longueur égale ou supérieure à 24 mètres, mais inférieure à 45 mètres, la superficie au sol par occupant d'un poste de couchage, déduction faite de la superficie occupée par les couchettes et les armoires, ne doit pas être inférieure à 1,5 mètre carré.

38. Sur les navires d'une longueur égale ou supérieure à 45 mètres, la superficie au sol par occupant d'un poste de couchage, déduction faite de la superficie occupée par les couchettes et les armoires, ne doit pas être inférieure à 2 mètres carrés.

39. Nonobstant les dispositions des paragraphes 37 et 38, l'autorité compétente peut, après consultation, décider que la superficie au sol minimale autorisée par occupant d'un poste de couchage, déduction faite de la superficie occupée par les couchettes et les armoires, ne doit pas être inférieure à 1,0 et 1,5 mètre carré respectivement, si elle s'est assurée que cela est raisonnable et ne causera pas d'inconfort aux pêcheurs.

### *Nombre de personnes par poste de couchage*

40. Dans la mesure où il n'en est pas expressément disposé autrement, le nombre de personnes autorisées à occuper un poste de couchage ne doit pas être supérieur à six.

41. Sur les navires d'une longueur égale ou supérieure à 24 mètres, le nombre de personnes autorisées à occuper un poste de couchage ne doit pas être supérieur à quatre. L'autorité compétente peut accorder des dérogations à cette prescription dans certains cas si la taille et le type du navire ou son utilisation la rendent déraisonnable ou irréalisable.

42. Dans la mesure où il n'en est pas expressément disposé autrement, une ou plusieurs cabines séparées doivent être réservées aux officiers, lorsque cela est possible.

43. Sur les navires d'une longueur égale ou supérieure à 24 mètres, les postes de couchage réservés aux officiers doivent accueillir une seule personne dans la mesure du possible et ne doivent en aucun cas contenir plus de deux couchettes. L'autorité compétente peut accorder des dérogations aux prescriptions de ce paragraphe dans certains cas si la taille et le type du navire ou son utilisation les rendent déraisonnables ou irréalisables.

### *Autres*

44. Le nombre maximal de personnes autorisées à occuper un poste de couchage doit être inscrit de manière lisible et indélébile à un endroit où il peut se lire facilement.

---

45. Individual berths of appropriate dimensions shall be provided. Mattresses shall be of a suitable material.

46. For vessels of 24 metres in length and over, the minimum inside dimensions of the berths shall not be less than 198 by 80 centimetres.

47. Notwithstanding the provisions of paragraph 46, the competent authority may, after consultation, decide that the minimum inside dimensions of the berths shall not be less than 190 by 70 centimetres, where it is satisfied that this is reasonable and will not result in discomfort to the fishers.

48. Sleeping rooms shall be so planned and equipped as to ensure reasonable comfort for the occupants and to facilitate tidiness. Equipment provided shall include berths, individual lockers sufficient for clothing and other personal effects, and a suitable writing surface.

49. For vessels of 24 metres in length and over, a desk suitable for writing, with a chair, shall be provided.

50. Sleeping accommodation shall be situated or equipped, as practicable, so as to provide appropriate levels of privacy for men and for women.

#### *Mess rooms*

51. Mess rooms shall be as close as possible to the galley, but in no case shall be located forward of the collision bulkhead.

52. Vessels shall be provided with mess-room accommodation suitable for their service. To the extent not expressly provided otherwise, mess-room accommodation shall be separate from sleeping quarters, where practicable.

53. For vessels of 24 metres in length and over, mess-room accommodation shall be separate from sleeping quarters.

54. The dimensions and equipment of each mess room shall be sufficient for the number of persons likely to use it at any one time.

55. For vessels of 24 metres in length and over, a refrigerator of sufficient capacity and facilities for making hot and cold drinks shall be available and accessible to fishers at all times.

#### *Tubs or showers, toilets and washbasins*

56. Sanitary facilities, which include toilets, washbasins, and tubs or showers, shall be provided for all persons on board, as appropriate for the service of the vessel. These facilities shall meet at least minimum standards of health and hygiene and reasonable standards of quality.

---

45. Des couchettes individuelles de dimensions suffisantes doivent être prévues. Les matelas doivent être d'un matériau adéquat.

46. Sur les navires d'une longueur égale ou supérieure à 24 mètres, les dimensions internes minimales des couchettes ne doivent pas être inférieures à 198 centimètres sur 80 centimètres.

47. Nonobstant les dispositions du paragraphe 46, l'autorité compétente peut, après consultation, décider que les dimensions internes minimales des couchettes ne doivent pas être inférieures à 190 centimètres par 70 centimètres, si elle s'est assurée que cela est raisonnable et ne causera pas d'inconfort aux pêcheurs.

48. Les postes de couchage doivent être conçus et équipés de manière à garantir aux occupants un confort raisonnable et à faciliter leur maintien en ordre. Les équipements fournis doivent comprendre des couchettes, des armoires individuelles suffisamment grandes pour contenir des vêtements et autres effets personnels et une surface plane adéquate où il est possible d'écrire.

49. Sur les navires d'une longueur égale ou supérieure à 24 mètres, un bureau pour écrire et une chaise adaptés doivent être fournis.

50. Les postes de couchage doivent, dans la mesure du possible, être situés ou équipés de telle manière que tant les hommes que les femmes puissent convenablement préserver leur intimité.

### *Réfectoires*

51. Les réfectoires doivent être aussi proches que possible de la cuisine, mais en aucun cas en avant de la cloison d'abordage.

52. Les navires doivent posséder un réfectoire adapté à leur utilisation. Le local du réfectoire doit être si possible à l'écart des postes de couchage, dans la mesure où il n'en est pas expressément disposé autrement.

53. Sur les navires d'une longueur égale ou supérieure à 24 mètres, le réfectoire doit être séparé des postes de couchage.

54. Les dimensions et l'aménagement de chaque réfectoire doivent être suffisants pour qu'il puisse accueillir le nombre de personnes susceptibles de l'utiliser en même temps.

55. Sur les navires d'une longueur égale ou supérieure à 24 mètres, les pêcheurs doivent à tout moment avoir accès à un réfrigérateur d'un volume suffisant et avoir la possibilité de se préparer des boissons chaudes ou froides.

### *Baignoires ou douches, toilettes et lavabos*

56. Des installations sanitaires appropriées à l'utilisation du navire, qui comprennent des toilettes, lavabos, baignoires ou douches, doivent être prévues pour toutes les personnes à bord. Ces installations doivent correspondre aux normes minimales en matière de santé et d'hygiène et offrir un niveau de qualité raisonnable.

---

57. The sanitary accommodation shall be such as to eliminate contamination of other spaces as far as practicable. The sanitary facilities shall allow for reasonable privacy.

58. Cold fresh water and hot fresh water shall be available to all fishers and other persons on board, in sufficient quantities to allow for proper hygiene. The competent authority may establish, after consultation, the minimum amount of water to be provided.

59. Where sanitary facilities are provided, they shall be fitted with ventilation to the open air, independent of any other part of the accommodation.

60. All surfaces in sanitary accommodation shall be such as to facilitate easy and effective cleaning. Floors shall have a non-slip deck covering.

61. On vessels of 24 metres in length and over, for all fishers who do not occupy rooms to which sanitary facilities are attached, there shall be provided at least one tub or shower or both, one toilet, and one washbasin for every four persons or fewer.

62. Notwithstanding the provisions of paragraph 61, the competent authority may, after consultation, decide that there shall be provided at least one tub or shower or both and one washbasin for every six persons or fewer, and at least one toilet for every eight persons or fewer, where the competent authority is satisfied that this is reasonable and will not result in discomfort to the fishers.

#### *Laundry facilities*

63. Amenities for washing and drying clothes shall be provided as necessary, taking into account the service of the vessel, to the extent not expressly provided otherwise.

64. For vessels of 24 metres in length and over, adequate facilities for washing, drying and ironing clothes shall be provided.

65. For vessels of 45 metres in length and over, adequate facilities for washing, drying and ironing clothes shall be provided in a compartment separate from sleeping rooms, mess rooms and toilets, and shall be adequately ventilated, heated and equipped with lines or other means for drying clothes.

#### *Facilities for sick and injured fishers*

66. Whenever necessary, a cabin shall be made available for a fisher who suffers illness or injury.

67. For vessels of 45 metres in length and over, there shall be a separate sick bay. The space shall be properly equipped and shall be maintained in a hygienic state.

---

57. Les installations sanitaires doivent être conçues de manière à éliminer dans la mesure où cela est réalisable la contamination d'autres locaux. Les installations sanitaires doivent préserver un degré d'intimité raisonnable.

58. Tous les pêcheurs et toute autre personne à bord doivent avoir accès à de l'eau douce froide et chaude en quantité suffisante pour assurer une hygiène convenable. L'autorité compétente peut déterminer, après consultation, le volume d'eau minimal nécessaire.

59. Lorsque des installations sanitaires sont prévues, elles doivent être ventilées vers l'extérieur et situées à l'écart de tout local d'habitation.

60. Toutes les surfaces des installations sanitaires doivent être faciles à nettoyer correctement. Les sols doivent être recouverts d'un revêtement antidérapant.

61. Sur les navires d'une longueur égale ou supérieure à 24 mètres, tous les pêcheurs n'occupant pas un poste doté d'installations sanitaires doivent avoir accès au moins à une baignoire ou une douche, ou les deux, une toilette et un lavabo pour quatre personnes ou moins.

62. Nonobstant les dispositions du paragraphe 61, l'autorité compétente peut, après consultation, décider de prévoir au moins une baignoire ou une douche, ou les deux, et un lavabo pour six personnes ou moins, et au moins une toilette pour huit personnes ou moins, si elle s'est assurée que cela est raisonnable et ne causera pas d'inconfort aux pêcheurs.

### *Buanderies*

63. Dans la mesure où il n'en est pas expressément disposé autrement, des installations appropriées pour le lavage et le séchage des vêtements doivent être prévues selon les besoins, en tenant compte des conditions d'utilisation du navire.

64. Sur les navires d'une longueur égale ou supérieure à 24 mètres, des installations adéquates pour le lavage, le séchage et le repassage des vêtements doivent être prévues.

65. Sur les navires d'une longueur égale ou supérieure à 45 mètres, ces installations doivent être adéquates et situées dans des locaux séparés des postes de couchage, des réfectoires et des toilettes qui soient suffisamment ventilés, chauffés et pourvus de cordes à linge ou autres moyens de séchage.

### *Installations pour les pêcheurs malades ou blessés*

66. Chaque fois que nécessaire, une cabine doit être mise à la disposition d'un pêcheur blessé ou malade.

67. Sur les navires d'une longueur égale ou supérieure à 45 mètres, une infirmerie séparée doit être prévue. Ce local doit être correctement équipé et maintenu dans un état hygiénique.

---

### *Other facilities*

68. A place for hanging foul-weather gear and other personal protective equipment shall be provided outside of, but convenient to, sleeping rooms.

### *Bedding, mess utensils and miscellaneous provisions*

69. Appropriate eating utensils, and bedding and other linen shall be provided to all fishers on board. However, the cost of the linen can be recovered as an operational cost if the collective agreement or the fisher's work agreement so provides.

### *Recreational facilities*

70. For vessels of 24 metres in length and over, appropriate recreational facilities, amenities and services shall be provided for all fishers on board. Where appropriate, mess rooms may be used for recreational activities.

### *Communication facilities*

71. All fishers on board shall be given reasonable access to communication facilities, to the extent practicable, at a reasonable cost and not exceeding the full cost to the fishing vessel owner.

### *Galley and food storage facilities*

72. Cooking equipment shall be provided on board. To the extent not expressly provided otherwise, this equipment shall be fitted, where practicable, in a separate galley.

73. The galley, or cooking area where a separate galley is not provided, shall be of adequate size for the purpose, well lit and ventilated, and properly equipped and maintained.

74. For vessels of 24 metres in length and over, there shall be a separate galley.

75. The containers of butane or propane gas used for cooking purposes in a galley shall be kept on the open deck and in a shelter which is designed to protect them from external heat sources and external impact.

76. A suitable place for provisions of adequate capacity shall be provided which can be kept dry, cool and well ventilated in order to avoid deterioration of the stores and, to the extent not expressly provided otherwise, refrigerators or other low-temperature storage shall be used, where possible.

---

### *Autres installations*

68. Un endroit approprié à l'extérieur des postes de couchage et aisément accessible à partir de ces derniers doit être prévu pour pendre les vêtements de gros temps et autre équipement de protection personnel.

### *Literie, vaisselle et couverts et fournitures diverses*

69. Tous les pêcheurs à bord doivent avoir à leur disposition de la vaisselle, du linge de lit et autres linges appropriés. Toutefois, les frais de linge peuvent être recouverts sous forme de coûts d'exploitation pour autant qu'une convention collective ou que l'accord d'engagement du pêcheur le prévoie.

### *Installations de loisirs*

70. A bord des navires d'une longueur égale ou supérieure à 24 mètres, tous les pêcheurs doivent avoir accès à des installations, des équipements et des services de loisirs. Le cas échéant, les réfectoires peuvent être utilisés comme installations de loisirs.

### *Installations de communications*

71. Dans la mesure du possible, tous les pêcheurs à bord du navire doivent avoir raisonnablement accès à des équipements pour effectuer leurs communications à un coût raisonnable n'excédant pas le coût total facturé à l'armateur à la pêche.

### *Cuisine et cambuse*

72. Des équipements doivent être prévus pour la préparation des aliments. Dans la mesure où il n'en est pas expressément disposé autrement, ces équipements sont installés, si possible, dans une cuisine séparée.

73. La cuisine, ou coin cuisine lorsqu'il n'existe pas de cuisine séparée, doit être d'une dimension adéquate, être bien éclairée et ventilée et être correctement équipée et entretenue.

74. Les navires d'une longueur égale ou supérieure à 24 mètres doivent être équipés d'une cuisine séparée.

75. Les bouteilles de gaz butane ou propane utilisé à des fins de cuisine doivent être placées sur le pont découvert, dans un lieu abrité conçu pour les protéger contre les sources extérieures de chaleur et les chocs.

76. Un emplacement adéquat pour les provisions, d'un volume suffisant, doit être prévu et pouvoir être maintenu sec, frais et bien aéré pour éviter que les provisions ne se gâtent. Dans la mesure où il n'en est pas expressément disposé autrement, des réfrigérateurs ou autres moyens de stockage à basse température sont si possible utilisés.

---

77. For vessels of 24 metres in length and over, a provisions storeroom and refrigerator and other low-temperature storage shall be used.

#### *Food and potable water*

78. Food and potable water shall be sufficient, having regard to the number of fishers, and the duration and nature of the voyage. In addition, they shall be suitable in respect of nutritional value, quality, quantity and variety, having regard as well to the fishers' religious requirements and cultural practices in relation to food.

79. The competent authority may establish requirements for the minimum standards and quantity of food and water to be carried on board.

#### *Clean and habitable conditions*

80. Accommodation shall be maintained in a clean and habitable condition and shall be kept free of goods and stores which are not the personal property of the occupants or for their safety or rescue.

81. Galley and food storage facilities shall be maintained in a hygienic condition.

82. Waste shall be kept in closed, well-sealed containers and removed from food-handling areas whenever necessary.

#### *Inspections by the skipper or under the authority of the skipper*

83. For vessels of 24 metres in length and over, the competent authority shall require frequent inspections to be carried out, by or under the authority of the skipper, to ensure that:

- (a) accommodation is clean, decently habitable and safe, and is maintained in a good state of repair;
- (b) food and water supplies are sufficient; and
- (c) galley and food storage spaces and equipment are hygienic and in a proper state of repair.

The results of such inspections, and the actions taken to address any deficiencies found, shall be recorded and available for review.

#### *Variations*

84. The competent authority, after consultation, may permit derogations from the provisions in this Annex to take into account, without discrimination, the interests of fishers having differing and distinctive religious and social practices, on condition that such derogations do not result in overall conditions less favourable than those which would result from the application of this Annex.

---

77. Pour les navires d'une longueur égale ou supérieure à 24 mètres, une cambuse et un réfrigérateur ou autre local d'entreposage à basse température doivent être utilisés.

#### *Nourriture et eau potable*

78. L'avitaillement doit être suffisant compte tenu du nombre de pêcheurs à bord ainsi que de la durée et de la nature du voyage. Il doit être en outre d'une valeur nutritionnelle, d'une qualité, d'une quantité et d'une variété satisfaisantes eu égard également aux exigences de la religion des pêcheurs et à leurs habitudes culturelles en matière alimentaire.

79. L'autorité compétente peut établir des prescriptions concernant les normes minimales et la quantité de nourriture et d'eau devant être disponible à bord.

#### *Conditions de salubrité et de propreté*

80. Le logement des pêcheurs doit être maintenu dans un état de propreté et de salubrité et ne doit contenir ni bien ni marchandise qui ne soit pas la propriété personnelle des occupants ou destiné à leur sécurité ou sauvetage.

81. La cuisine et les installations d'entreposage des aliments doivent être maintenues dans des conditions hygiéniques.

82. Les déchets doivent être gardés dans des conteneurs fermés et hermétiques qui sont retirés, quand il y a lieu, des espaces de manutention des vivres.

#### *Inspections effectuées par le patron ou sous son autorité*

83. Sur les navires d'une longueur égale ou supérieure à 24 mètres, l'autorité compétente doit exiger que des inspections fréquentes soient conduites par le patron ou sous son autorité pour assurer que:

- a) les logements sont propres, décentement habitables, sûrs et maintenus en bon état;
- b) les provisions d'eau et de nourriture sont suffisantes;
- c) la cuisine, la cambuse et les équipements servant à l'entreposage de la nourriture sont hygiéniques et bien entretenus.

Les résultats de ces inspections ainsi que les mesures prises pour remédier à tout manquement sont consignés et sont disponibles pour consultation.

#### *Déroations*

84. L'autorité compétente peut, après consultation, permettre des dérogations aux dispositions de la présente annexe pour tenir compte, sans discrimination, des intérêts des pêcheurs ayant des pratiques religieuses et sociales différentes et particulières, sous réserve qu'il n'en résulte pas des conditions qui, dans l'ensemble, seraient moins favorables que celles qui auraient découlé de l'application de l'annexe.

International Labour Conference

## ***Provisional Record***

Ninety-sixth Session, Geneva, 2007

# 12B

Conférence internationale du Travail

## ***Compte rendu provisoire***

Quatre-vingt-seizième session, Genève, 2007

---

TEXT OF THE RECOMMENDATION CONCERNING  
WORK IN THE FISHING SECTOR  
SUBMITTED BY THE DRAFTING COMMITTEE

TEXTE DE LA RECOMMANDATION CONCERNANT  
LE TRAVAIL DANS LE SECTEUR DE LA PÊCHE  
PRÉSENTÉ PAR LE COMITÉ DE RÉDACTION

---

**TEXTE DE LA RECOMMANDATION  
CONCERNANT LE TRAVAIL DANS LE SECTEUR  
DE LA PÊCHE**

La Conférence générale de l'Organisation internationale du Travail,  
Convoquée à Genève par le Conseil d'administration du Bureau  
international du Travail, et s'y étant réunie le 30 mai 2007, en sa  
quatre-vingt-seizième session;

Notant la recommandation (n° 126) sur la formation professionnelle  
des pêcheurs, 1966;

Tenant compte de la nécessité de remplacer la recommandation  
(n° 196) sur le travail dans la pêche, 2005, portant révision de la  
recommandation (n° 7) sur la durée du travail (pêche), 1920;

Après avoir décidé d'adopter diverses propositions relatives au travail  
dans le secteur de la pêche, question qui constitue le quatrième  
point à l'ordre du jour de la session;

Après avoir décidé que ces propositions prendraient la forme d'une  
recommandation complétant la convention sur le travail dans la  
pêche, 2007 (ci-après dénommée «la convention») et remplaçant  
la recommandation (n° 196) sur le travail dans la pêche, 2005,

adopte, ce                    jour de juin deux mille sept, la recommandation ci-après,  
qui sera dénommée Recommandation sur le travail dans la pêche, 2007.

**PARTIE I. CONDITIONS DE TRAVAIL À BORD DES NAVIRES  
DE PÊCHE**

*Protection des jeunes gens*

1. Les Membres devraient fixer les conditions requises en matière de  
formation préalable à l'embarquement des personnes âgées de 16 à 18 ans  
appelées à travailler à bord des navires de pêche, en prenant en  
considération les instruments internationaux relatifs à la formation au  
travail à bord de ces navires, notamment pour ce qui a trait aux questions de  
sécurité et de santé au travail telles que le travail de nuit, les tâches  
dangereuses, l'utilisation de machines dangereuses, la manutention et le  
transport de lourdes charges, le travail effectué sous des latitudes élevées, la  
durée excessive du travail et autres questions pertinentes recensées après  
évaluation des risques encourus.

2. La formation des personnes âgées de 16 à 18 ans pourrait être  
assurée par le biais de l'apprentissage ou de la participation à des  
programmes de formation approuvés, qui devraient être menés selon des  
règles établies sous la supervision des autorités compétentes et ne devraient  
pas nuire à la possibilité pour les personnes concernées de suivre les  
programmes de l'enseignement général.

---

3. Members should take measures to ensure that the safety, lifesaving and survival equipment carried on board fishing vessels carrying persons under the age of 18 is appropriate for the size of such persons.

4. The working hours of fishers under the age of 18 should not exceed eight hours per day and 40 hours per week, and they should not work overtime except where unavoidable for safety reasons.

5. Fishers under the age of 18 should be assured sufficient time for all meals and a break of at least one hour for the main meal of the day.

### *Medical examination*

6. When prescribing the nature of the examination, Members should pay due regard to the age of the person to be examined and the nature of the duties to be performed.

7. The medical certificate should be signed by a medical practitioner approved by the competent authority.

8. Arrangements should be made to enable a person who, after examination, is determined to be unfit for work on board fishing vessels or certain types of fishing vessels, or for certain types of work on board, to apply for a further examination by a medical referee or referees who should be independent of any fishing vessel owner or of any organization of fishing vessel owners or fishers.

9. The competent authority should take into account international guidance on medical examination and certification of persons working at sea, such as the (ILO/WHO) *Guidelines for Conducting Pre-Sea and Periodic Medical Fitness Examinations for Seafarers*.

10. For fishers exempted from the application of the provisions concerning medical examination in the Convention, the competent authority should take adequate measures to provide health surveillance for the purpose of occupational safety and health.

### *Competency and training*

11. Members should:

- (a) take into account generally accepted international standards concerning training and competencies of fishers in determining the competencies required for skippers, mates, engineers and other persons working on board fishing vessels;
- (b) address the following issues, with regard to the vocational training of fishers: national planning and administration, including coordination;

---

3. Les Membres devraient prendre des mesures visant à garantir qu'à bord des navires de pêche qui embarquent des jeunes gens âgés de moins de 18 ans les équipements de sécurité, de sauvetage et de survie soient adaptés à leur taille.

4. Les pêcheurs âgés de moins de 18 ans ne devraient pas travailler plus de huit heures par jour ni plus de 40 heures par semaine, et ne devraient pas effectuer d'heures supplémentaires à moins que cela ne soit inévitable pour des raisons de sécurité.

5. Les pêcheurs âgés de moins de 18 ans devraient être assurés qu'une pause suffisante leur soit accordée pour chacun des repas et bénéficier d'une pause d'au moins une heure pour prendre leur repas principal.

### *Examen médical*

6. Aux fins de la détermination de la nature de l'examen, les Membres devraient tenir compte de l'âge de l'intéressé ainsi que de la nature du travail à effectuer.

7. Le certificat médical devrait être signé par du personnel médical agréé par l'autorité compétente.

8. Des dispositions devraient être prises pour permettre à toute personne qui, après avoir été examinée, est considérée comme inapte à travailler à bord d'un navire de pêche ou de certains types de navires de pêche, ou à effectuer certains types de tâches à bord, de demander à être examinée par un ou plusieurs arbitres médicaux indépendants de tout armateur à la pêche ou de toute organisation d'armateurs à la pêche ou de pêcheurs.

9. L'autorité compétente devrait tenir compte des directives internationales relatives à l'examen médical et au brevet d'aptitude physique des personnes travaillant en mer, telles que les *Directives relatives à la conduite des examens médicaux d'aptitude précédant l'embarquement et des examens médicaux périodiques des gens de mer* (OIT/OMS).

10. L'autorité compétente devrait prendre des mesures adéquates pour que les pêcheurs auxquels ne s'appliquent pas les dispositions relatives à l'examen médical prescrites dans la convention soient médicalement suivis aux fins de la sécurité et santé au travail.

### *Compétence et formation*

11. Les Membres devraient:

- a) prendre en compte les normes internationales généralement admises en matière de formation et de qualifications des pêcheurs en définissant les compétences requises pour exercer les fonctions de patron, d'officier de pont, de mécanicien et autres fonctions à bord d'un navire de pêche;
- b) examiner les questions suivantes relatives à la formation professionnelle des pêcheurs: organisation et administration

---

financing and training standards; training programmes, including pre-vocational training and also short courses for working fishers; methods of training; and international cooperation; and

- (c) ensure that there is no discrimination with regard to access to training.

## PART II. CONDITIONS OF SERVICE

### *Record of service*

12. At the end of each contract, a record of service in regard to that contract should be made available to the fisher concerned, or entered in the fisher's service book.

### *Special measures*

13. For fishers excluded from the scope of the Convention, the competent authority should take measures to provide them with adequate protection with respect to their conditions of work and means of dispute settlement.

### *Payment of fishers*

14. Fishers should have the right to advances against earnings under prescribed conditions.

15. For vessels of 24 metres in length and over, all fishers should be entitled to minimum payment in accordance with national laws, regulations or collective agreements.

## PART III. ACCOMMODATION

16. When establishing requirements or guidance, the competent authority should take into account relevant international guidance on accommodation, food, and health and hygiene relating to persons working or living on board vessels, including the most recent editions of the (FAO/ILO/IMO) *Code of Safety for Fishermen and Fishing Vessels* and the (FAO/ILO/IMO) *Voluntary Guidelines for the Design, Construction and Equipment of Small Fishing Vessels*.

17. The competent authority should work with relevant organizations and agencies to develop and disseminate educational material and on-board information and guidance concerning safe and healthy accommodation and food on board fishing vessels.

- 
- nationales, y compris la coordination; financement et normes de formation; programmes de formation, y compris la formation préprofessionnelle ainsi que les cours de courte durée destinés aux pêcheurs en activité; méthodes de formation; et coopération internationale;
- c) s'assurer qu'il n'existe pas de discrimination en matière d'accès à la formation.

## PARTIE II. CONDITIONS DE SERVICE

### *Relevé des états de service*

12. A la fin de chaque contrat, un relevé des états de service concernant ce contrat devrait être mis à la disposition de chaque pêcheur concerné ou noté dans son livret de travail.

### *Mesures spéciales*

13. Pour les pêcheurs exclus du champ d'application de la convention, l'autorité compétente devrait prendre des mesures prévoyant une protection adéquate en ce qui concerne leurs conditions de travail et des mécanismes de règlement des différends.

### *Paiement des pêcheurs*

14. Les pêcheurs devraient avoir droit au versement d'avances à valoir sur leurs gains dans des conditions déterminées.

15. Pour les navires d'une longueur égale ou supérieure à 24 mètres, tous les pêcheurs devraient avoir droit à un paiement minimal, conformément à la législation nationale ou aux conventions collectives.

## PARTIE III. LOGEMENT

16. Lors de l'élaboration de prescriptions ou directives, l'autorité compétente devrait tenir compte des directives internationales applicables en matière de logement, d'alimentation, et de santé et d'hygiène concernant les personnes qui travaillent ou qui vivent à bord de navires, y compris l'édition la plus récente du *Recueil de règles de sécurité pour les pêcheurs et les navires de pêche* (FAO/OIT/OMI) ainsi que des *Directives facultatives pour la conception, la construction et l'équipement des navires de pêche de faibles dimensions* (FAO/OIT/ OMI).

17. L'autorité compétente devrait travailler avec les organisations et agences pertinentes pour élaborer et diffuser des documents pédagogiques et des informations disponibles à bord du navire ainsi que des instructions sur ce qui constitue une alimentation et un logement sûrs et sains à bord des navires de pêche.

---

18. Inspections of crew accommodation required by the competent authority should be carried out together with initial or periodic surveys or inspections for other purposes.

### *Design and construction*

19. Adequate insulation should be provided for exposed decks over crew accommodation spaces, external bulkheads of sleeping rooms and mess rooms, machinery casings and boundary bulkheads of galleys and other spaces in which heat is produced, and, as necessary, to prevent condensation or overheating in sleeping rooms, mess rooms, recreation rooms and passageways.

20. Protection should be provided from the heat effects of any steam or hot water service pipes. Main steam and exhaust pipes should not pass through crew accommodation or through passageways leading to crew accommodation. Where this cannot be avoided, pipes should be adequately insulated and encased.

21. Materials and furnishings used in accommodation spaces should be impervious to dampness, easy to keep clean and not likely to harbour vermin.

### *Noise and vibration*

22. Noise levels for working and living spaces, which are established by the competent authority, should be in conformity with the guidelines of the International Labour Organization on exposure levels to ambient factors in the workplace and, where applicable, the specific protection recommended by the International Maritime Organization, together with any subsequent amending and supplementary instruments for acceptable noise levels on board ships.

23. The competent authority, in conjunction with the competent international bodies and with representatives of organizations of fishing vessel owners and fishers and taking into account, as appropriate, relevant international standards, should review on an ongoing basis the problem of vibration on board fishing vessels with the objective of improving the protection of fishers, as far as practicable, from the adverse effects of vibration.

(1) Such review should cover the effect of exposure to excessive vibration on the health and comfort of fishers and the measures to be prescribed or recommended to reduce vibration on fishing vessels to protect fishers.

(2) Measures to reduce vibration, or its effects, to be considered should include:

(a) instruction of fishers in the dangers to their health of prolonged exposure to vibration;

---

18. Les inspections du logement de l'équipage prescrites par l'autorité compétente devraient être entreprises conjointement aux enquêtes ou inspections initiales ou périodiques menées à d'autres fins.

### *Conception et construction*

19. Une isolation adéquate devrait être fournie pour les ponts extérieurs recouvrant le logement de l'équipage, les parois extérieures des postes de couchage et réfectoires, les encaissements de machines et les cloisons qui limitent les cuisines et les autres locaux dégageant de la chaleur et pour éviter, au besoin, toute condensation ou chaleur excessive, pour les postes de couchage, les réfectoires, les installations de loisirs et les coursives.

20. Une protection devrait être prévue pour calorifuger les canalisations de vapeur et d'eau chaude. Les tuyauteries principales de vapeur et d'échappement ne devraient pas passer par les logements de l'équipage ni par les coursives y conduisant. Lorsque cela ne peut être évité, les tuyauteries devraient être convenablement isolées et placées dans une gaine.

21. Les matériaux et fournitures utilisés dans le logement de l'équipage devraient être imperméables, faciles à nettoyer et ne pas être susceptibles d'abriter de la vermine.

### *Bruits et vibrations*

22. Les niveaux de bruit établis par l'autorité compétente pour les postes de travail et les locaux d'habitation devraient être conformes aux directives de l'Organisation internationale du Travail relatives aux niveaux d'exposition aux facteurs ambiants sur le lieu de travail ainsi que, le cas échéant, aux normes de protection particulières recommandées par l'Organisation maritime internationale, et à tout instrument relatif aux niveaux de bruit acceptables à bord des navires adopté ultérieurement.

23. L'autorité compétente, conjointement avec les organismes internationaux compétents et les représentants des organisations d'armateurs à la pêche et de pêcheurs et compte tenu, selon le cas, des normes internationales pertinentes, devrait examiner de manière continue le problème des vibrations à bord des navires de pêche en vue d'améliorer, autant que possible, la protection des pêcheurs contre les effets néfastes de telles vibrations.

(1) Cet examen devrait porter sur les effets de l'exposition aux vibrations excessives sur la santé et le confort des pêcheurs et les mesures à prescrire ou à recommander pour réduire les vibrations sur les navires de pêche afin de protéger les pêcheurs.

(2) Les mesures à étudier pour réduire les vibrations ou leurs effets devraient comprendre:

a) la formation des pêcheurs aux risques que l'exposition prolongée aux vibrations présente pour leur santé;

- 
- (b) provision of approved personal protective equipment to fishers where necessary; and
  - (c) assessment of risks and reduction of exposure in sleeping rooms, mess rooms, recreational accommodation and catering facilities and other fishers' accommodation by adopting measures in accordance with the guidance provided by the (ILO) *Code of practice on ambient factors in the workplace* and any subsequent revisions, taking into account the difference between exposure in the workplace and in the living space.

### *Heating*

24. The heating system should be capable of maintaining the temperature in crew accommodation at a satisfactory level, as established by the competent authority, under normal conditions of weather and climate likely to be met with on service, and should be designed so as not to endanger the safety or health of the fishers or the safety of the vessel.

### *Lighting*

25. Methods of lighting should not endanger the safety or health of the fishers or the safety of the vessel.

### *Sleeping rooms*

26. Each berth should be fitted with a comfortable mattress with a cushioned bottom or a combined mattress, including a spring bottom, or a spring mattress. The cushioning material used should be made of approved material. Berths should not be placed side by side in such a way that access to one berth can be obtained only over another. The lower berth in a double tier should not be less than 0.3 metres above the floor, and the upper berth should be fitted with a dust-proof bottom and placed approximately midway between the bottom of the lower berth and the lower side of the deck head beams. Berths should not be arranged in tiers of more than two. In the case of berths placed along the vessel's side, there should be only a single tier when a sidelight is situated above a berth.

27. Sleeping rooms should be fitted with curtains for the sidelights, as well as a mirror, small cabinets for toilet requisites, a book rack and a sufficient number of coat hooks.

28. As far as practicable, berthing of crew members should be so arranged that watches are separated and that no day worker shares a room with a watchkeeper.

- 
- b) la fourniture aux pêcheurs d'un équipement de protection individuelle agréé lorsque cela est nécessaire;
  - c) l'évaluation des risques et la réduction de l'exposition aux vibrations dans les postes de couchage, les salles à manger, les installations de loisirs et de restauration et autres locaux d'habitation pour les pêcheurs par des mesures conformes aux orientations données dans le *Recueil de directives pratiques sur les facteurs ambiants sur le lieu de travail* (OIT) et ses versions révisées ultérieures, en tenant compte des écarts entre l'exposition sur les lieux de travail et dans les locaux d'habitation.

### *Chauffage*

24. Le système de chauffage devrait permettre de maintenir la température dans le logement de l'équipage à un niveau satisfaisant, établi par l'autorité compétente, dans les conditions normales de temps et de climat que le navire est susceptible de rencontrer en cours de navigation. Le système devrait être conçu de manière à ne pas constituer un risque pour la sécurité ou la santé de l'équipage, ni pour la sécurité du navire.

### *Eclairage*

25. Les systèmes d'éclairage ne doivent pas mettre en péril la sécurité ou la santé des pêcheurs ni la sécurité du navire.

### *Postes de couchage*

26. Toute couchette devrait être pourvue d'un matelas confortable muni d'un fond rembourré ou d'un matelas combiné, posé sur support élastique, ou d'un matelas à ressorts. Le rembourrage utilisé doit être d'un matériau approuvé. Les couchettes ne devraient pas être placées côte à côte d'une façon telle que l'on ne puisse accéder à l'une d'elles qu'en passant au-dessus d'une autre. Lorsque des couchettes sont superposées, la couchette inférieure ne devrait pas être placée à moins de 0,3 mètre au-dessus du plancher et la couchette supérieure devrait être équipée d'un fond imperméable à la poussière et disposée approximativement à mi-hauteur entre le fond de la couchette inférieure et le dessous des barrots du plafond. La superposition de plus de deux couchettes devrait être interdite. Dans le cas où des couchettes sont placées le long de la muraille du navire, il devrait être interdit de superposer des couchettes à l'endroit où un hublot est situé au-dessus d'une couchette.

27. Les postes de couchage devraient être équipés de rideaux aux hublots, d'un miroir, de petits placards pour les articles de toilette, d'une étagère à livres et d'un nombre suffisant de patères.

28. Dans la mesure du possible, les couchettes des membres de l'équipage devraient être réparties de façon à séparer les quarts et à éviter qu'un pêcheur de jour ne partage le même poste qu'un pêcheur prenant le quart.

---

29. On vessels of 24 metres in length and over, separate sleeping rooms for men and for women should be provided.

*Sanitary accommodation*

30. Sanitary accommodation spaces should have:

- (a) floors of approved durable material which can be easily cleaned, and which are impervious to dampness and properly drained;
- (b) bulkheads of steel or other approved material which should be watertight up to at least 0.23 metres above the level of the deck;
- (c) sufficient lighting, heating and ventilation; and
- (d) soil pipes and waste pipes of adequate dimensions which are constructed so as to minimize the risk of obstruction and to facilitate cleaning; such pipes should not pass through fresh water or drinking-water tanks, nor should they, if practicable, pass overhead in mess rooms or sleeping accommodation.

31. Toilets should be of an approved type and provided with an ample flush of water, available at all times and independently controllable. Where practicable, they should be situated convenient to, but separate from, sleeping rooms and washrooms. Where there is more than one toilet in a compartment, the toilets should be sufficiently screened to ensure privacy.

32. Separate sanitary facilities should be provided for men and for women.

*Recreational facilities*

33. Where recreational facilities are required, furnishings should include, as a minimum, a bookcase and facilities for reading, writing and, where practicable, games. Recreational facilities and services should be reviewed frequently to ensure that they are appropriate in the light of changes in the needs of fishers resulting from technical, operational and other developments. Consideration should also be given to including the following facilities at no cost to the fishers, where practicable:

- (a) a smoking room;
- (b) television viewing and the reception of radio broadcasts;
- (c) projection of films or video films, the stock of which should be adequate for the duration of the voyage and, where necessary, changed at reasonable intervals;

---

29. Les navires d'une longueur égale ou supérieure à 24 mètres devraient être pourvus de postes de couchage séparés pour les hommes et pour les femmes.

#### *Installations sanitaires*

30. Les espaces destinés aux installations sanitaires devraient avoir:

- a) des sols revêtus d'un matériau durable approuvé, facile à nettoyer et imperméable, et être pourvus d'un système efficace d'écoulement des eaux;
- b) des cloisons en acier ou en tout autre matériau approuvé qui soient étanches sur une hauteur d'au moins 0,23 mètre à partir du pont;
- c) une ventilation, un éclairage et un chauffage suffisants;
- d) des conduites d'évacuation des eaux des toilettes et des eaux usées de dimensions adéquates et installées de manière à réduire au minimum les risques d'obstruction et à en faciliter le nettoyage, et qui ne devraient pas traverser les réservoirs d'eau douce ou d'eau potable ni, si possible, passer sous les plafonds des réfectoires ou des postes de couchage.

31. Les toilettes devraient être d'un modèle approuvé et pourvues d'une chasse d'eau puissante, en état de fonctionner à tout moment et qui puisse être actionnée individuellement. Là où cela est possible, les toilettes devraient être situées en un endroit aisément accessible à partir des postes de couchage et des locaux affectés aux soins de propreté, mais devraient en être séparées. Si plusieurs toilettes sont installées dans un même local, elles devraient être suffisamment encloses pour préserver l'intimité.

32. Des installations sanitaires séparées devraient être prévues pour les hommes et pour les femmes.

#### *Installations de loisirs*

33. Là où des installations de loisirs sont prescrites, les équipements devraient au minimum inclure un meuble bibliothèque et des moyens nécessaires pour lire, écrire et, si possible, jouer. Les installations et services de loisirs devraient faire l'objet de réexamens fréquents afin qu'ils soient adaptés aux besoins des pêcheurs, compte tenu de l'évolution des techniques, des conditions d'exploitation ainsi que de tout autre développement. Lorsque cela est réalisable, il faudrait aussi envisager de fournir gratuitement aux pêcheurs:

- a) un fumoir;
- b) la possibilité de regarder la télévision et d'écouter la radio;
- c) la possibilité de regarder des films ou des vidéos, dont le stock devrait être suffisant pour la durée du voyage et, si nécessaire, être renouvelé à des intervalles raisonnables;

- 
- (d) sports equipment including exercise equipment, table games, and deck games;
  - (e) a library containing vocational and other books, the stock of which should be adequate for the duration of the voyage and changed at reasonable intervals;
  - (f) facilities for recreational handicrafts; and
  - (g) electronic equipment such as radio, television, video recorder, CD/DVD player, personal computer and software, and cassette recorder/player.

### *Food*

34. Fishers employed as cooks should be trained and qualified for their position on board.

## PART IV. MEDICAL CARE, HEALTH PROTECTION AND SOCIAL SECURITY

### *Medical care on board*

35. The competent authority should establish a list of medical supplies and equipment appropriate to the risks concerned that should be carried on fishing vessels; such list should include women's sanitary protection supplies together with discreet, environmentally friendly disposal units.

36. Fishing vessels carrying 100 or more fishers should have a qualified medical doctor on board.

37. Fishers should receive training in basic first aid in accordance with national laws and regulations, taking into account applicable international instruments.

38. A standard medical report form should be specially designed to facilitate the confidential exchange of medical and related information concerning individual fishers between the fishing vessel and the shore in cases of illness or injury.

39. For vessels of 24 metres in length and over, in addition to the provisions of Article 32 of the Convention, the following elements should be taken into account:

- (a) when prescribing the medical equipment and supplies to be carried on board, the competent authority should take into account international recommendations in this field, such as those contained in the most recent editions of the (ILO/IMO/WHO) *International Medical Guide for Ships* and the (WHO) *Model List of Essential Medicines*, as well as advances in medical knowledge and approved methods of treatment;

- 
- d) des articles de sport, y compris du matériel de culture physique, des jeux de table et des jeux de pont;
  - e) une bibliothèque contenant des ouvrages de caractère professionnel ou autre, en quantité suffisante pour la durée du voyage, et dont le stock devrait être renouvelé à des intervalles raisonnables;
  - f) des moyens de réaliser des travaux d'artisanat pour se détendre;
  - g) des appareils électroniques tels que radios, télévisions, magnétoscopes, lecteurs de CD/DVD, ordinateurs, logiciels et magnétophones à cassettes.

### *Nourriture*

34. Les pêcheurs faisant office de cuisinier devraient être formés et compétents pour occuper ce poste à bord.

## PARTIE IV. SOINS MÉDICAUX, PROTECTION DE LA SANTÉ ET SÉCURITÉ SOCIALE

### *Soins médicaux à bord*

35. L'autorité compétente devrait établir une liste des fournitures médicales et du matériel médical qui devrait se trouver à bord des navires de pêche, compte tenu des risques encourus. Cette liste devrait inclure des produits de protection hygiénique pour les femmes et des récipients discrets non nuisibles pour l'environnement.

36. Un médecin qualifié devrait se trouver à bord des navires de pêche qui embarquent 100 pêcheurs ou plus.

37. Les pêcheurs devraient recevoir une formation de base aux premiers secours, conformément à la législation nationale et compte tenu des instruments internationaux pertinents.

38. Un formulaire de rapport médical type devrait être spécialement conçu pour faciliter l'échange confidentiel d'informations médicales et autres informations connexes concernant les pêcheurs entre le navire de pêche et la terre en cas de maladie ou d'accident.

39. Pour les navires d'une longueur égale ou supérieure à 24 mètres, en sus des dispositions de l'article 32 de la convention, les éléments suivants devraient être pris en compte:

- a) en prescrivant le matériel médical et les fournitures médicales à conserver à bord, l'autorité compétente devrait tenir compte des recommandations internationales en la matière, telles que celles prévues dans l'édition la plus récente du *Guide médical international de bord* (OIT/OMI/OMS) et la *Liste modèle des médicaments essentiels* (OMS), ainsi que des progrès réalisés dans les connaissances médicales et les méthodes de traitement approuvées;

- 
- (b) inspections of medical equipment and supplies should take place at intervals of no more than 12 months; the inspector should ensure that expiry dates and conditions of storage of all medicines are checked, the contents of the medicine chest are listed and conform to the medical guide used nationally, and medical supplies are labelled with generic names in addition to any brand names used, and with expiry dates and conditions of storage;
  - (c) the medical guide should explain how the contents of the medical equipment and supplies are to be used, and should be designed to enable persons other than a medical doctor to care for the sick or injured on board, both with and without medical advice by radio or satellite communication; the guide should be prepared taking into account international recommendations in this field, including those contained in the most recent editions of the (ILO/IMO/WHO) *International Medical Guide for Ships* and the (IMO) *Medical First Aid Guide for Use in Accidents Involving Dangerous Goods*; and
  - (d) medical advice provided by radio or satellite communication should be available free of charge to all vessels irrespective of the flag they fly.

### *Occupational safety and health*

#### *Research, dissemination of information and consultation*

40. In order to contribute to the continuous improvement of safety and health of fishers, Members should have in place policies and programmes for the prevention of accidents on board fishing vessels which should provide for the gathering and dissemination of occupational safety and health materials, research and analysis, taking into consideration technological progress and knowledge in the field of occupational safety and health as well as of relevant international instruments.

41. The competent authority should take measures to ensure regular consultations on safety and health matters with the aim of ensuring that all concerned are kept reasonably informed of national, international and other developments in the field and on their possible application to fishing vessels flying the flag of the Member.

42. When ensuring that fishing vessel owners, skippers, fishers and other relevant persons receive sufficient and suitable guidance, training material, or other appropriate information, the competent authority should take into account relevant international standards, codes, guidance and other information. In so doing, the competent authority should keep abreast of and utilize international research and guidance concerning safety and health in the fishing sector, including relevant research in occupational safety and health in general which may be applicable to work on board fishing vessels.

- 
- b) le matériel médical et les fournitures médicales devraient faire l'objet d'une inspection tous les 12 mois au moins; l'inspecteur devrait s'assurer que les dates de péremption et les conditions de conservation de tous les médicaments sont vérifiées, que le contenu de la pharmacie de bord fait l'objet d'une liste et qu'il correspond au guide médical employé sur le plan national, que les fournitures médicales portent des étiquettes indiquant le nom générique outre le nom de marque, la date de péremption et les conditions de conservation;
  - c) le guide médical devrait expliquer le mode d'utilisation du matériel médical et des fournitures médicales et être conçu de façon à permettre à des personnes autres que des médecins de donner des soins aux malades et aux blessés à bord, avec ou sans consultation médicale par radio ou par satellite; le guide devrait être préparé en tenant compte des recommandations internationales en la matière, y compris celles figurant dans l'édition la plus récente du *Guide médical international de bord* (OIT/OMI/OMS) et du *Guide des soins médicaux d'urgence à donner en cas d'accidents dus à des marchandises dangereuses* (OMI);
  - d) les consultations médicales par radio ou par satellite devraient être assurées gratuitement à tous les navires quel que soit leur pavillon.

### *Sécurité et santé au travail*

#### *Recherche, diffusion d'informations et consultation*

40. Afin de contribuer à l'amélioration continue de la sécurité et de la santé des pêcheurs, les Membres devraient mettre en place des politiques et des programmes de prévention des accidents à bord des navires de pêche prévoyant la collecte et la diffusion d'informations, de recherches et d'analyses sur la sécurité et la santé au travail, en tenant compte du progrès des techniques et des connaissances dans le domaine de la sécurité et de la santé au travail et des instruments internationaux pertinents.

41. L'autorité compétente devrait prendre des mesures propres à assurer la tenue de consultations régulières sur les questions de sécurité et de santé au travail, en vue de garantir que toutes les personnes concernées sont tenues convenablement informées des évolutions nationales et internationales ainsi que des autres progrès réalisés dans ce domaine, et de leur application possible aux navires de pêche battant le pavillon du Membre.

42. En veillant à ce que les armateurs à la pêche, les patrons, les pêcheurs et les autres personnes concernées reçoivent suffisamment de directives et de matériel de formation appropriés ainsi que toute autre information pertinente, l'autorité compétente devrait tenir compte des normes internationales, des recueils de directives, des orientations et de toutes autres informations utiles disponibles. Ce faisant, l'autorité compétente devrait se tenir au courant et faire usage des recherches et des orientations internationales en matière de sécurité et de santé dans le secteur de la pêche, y compris des recherches pertinentes dans le domaine de la sécurité et de la santé au travail en général qui pourraient être applicables au travail à bord des navires de pêche.

---

43. Information concerning particular hazards should be brought to the attention of all fishers and other persons on board through official notices containing instructions or guidance, or other appropriate means.

44. Joint committees on occupational safety and health should be established:

- (a) ashore; or
- (b) on fishing vessels, where determined by the competent authority, after consultation, to be practicable in light of the number of fishers on board the vessel.

#### *Occupational safety and health management systems*

45. When establishing methods and programmes concerning safety and health in the fishing sector, the competent authority should take into account any relevant international guidance concerning occupational safety and health management systems, including the *Guidelines on occupational safety and health management systems, ILO-OSH 2001*.

#### *Risk evaluation*

46. (1) Risk evaluation in relation to fishing should be conducted, as appropriate, with the participation of fishers or their representatives and should include:

- (a) risk assessment and management;
- (b) training, taking into consideration the relevant provisions of Chapter III of the International Convention on Standards of Training, Certification and Watchkeeping for Fishing Vessel Personnel, 1995 (STCW-F Convention) adopted by the IMO; and
- (c) on-board instruction of fishers.

(2) To give effect to subparagraph (1)(a), Members, after consultation, should adopt laws, regulations or other measures requiring:

- (a) the regular and active involvement of all fishers in improving safety and health by continually identifying hazards, assessing risks and taking action to address risks through safety management;
- (b) an occupational safety and health management system that may include an occupational safety and health policy, provisions for fisher participation and provisions concerning organizing, planning, implementing and evaluating the system and taking action to improve the system; and
- (c) a system for the purpose of assisting in the implementation of a safety and health policy and programme and providing fishers with a forum to

---

43. Les informations concernant les dangers particuliers devraient être portées à l'attention de tous les pêcheurs et d'autres personnes à bord au moyen de notices officielles contenant des instructions ou des directives ou d'autres moyens appropriés.

44. Des comités paritaires de sécurité et de santé au travail devraient être établis:

- a) à terre; ou
- b) sur les navires de pêche, si l'autorité compétente, après consultation, décide que cela est réalisable compte tenu du nombre de pêcheurs à bord.

#### *Systèmes de gestion de la sécurité et de la santé au travail*

45. Lors de l'élaboration de méthodes et de programmes relatifs à la sécurité et à la santé dans le secteur de la pêche, l'autorité compétente devrait prendre en considération toutes les directives internationales pertinentes concernant les systèmes de gestion de la sécurité et de la santé au travail, y compris les *Principes directeurs concernant les systèmes de gestion de la sécurité et de la santé au travail, ILO-OSH 2001*.

#### *Evaluation des risques*

46. (1) Des évaluations des risques concernant la pêche devraient être conduites, lorsque cela est approprié, avec la participation de pêcheurs ou de leurs représentants et devraient inclure:

- a) l'évaluation et la gestion des risques;
- b) la formation, en prenant en considération les dispositions pertinentes du chapitre III de la Convention internationale sur les normes de formation du personnel des navires de pêche, de délivrance des brevets et de veille, 1995, adoptée par l'OMI (convention STCW-F);
- c) l'instruction des pêcheurs à bord.

(2) Pour donner effet aux dispositions de l'alinéa a) du sous-paragraph (1), les Membres devraient adopter, après consultation, une législation ou d'autres mesures exigeant que:

- a) tous les pêcheurs participent régulièrement et activement à l'amélioration de la sécurité et de la santé en répertoriant de façon permanente les dangers, en évaluant les risques et en prenant des mesures visant à les réduire grâce à la gestion de la sécurité;
- b) un système de gestion de la sécurité et de la santé au travail soit mis en place, qui peut inclure une politique relative à la sécurité et à la santé au travail, des dispositions prévoyant la participation des pêcheurs et concernant l'organisation, la planification, l'application et l'évaluation de ce système ainsi que les mesures à prendre pour l'améliorer;
- c) un système soit mis en place pour faciliter la mise en œuvre de la politique et du programme relatifs à la sécurité et à la santé au travail et

---

influence safety and health matters; on-board prevention procedures should be designed so as to involve fishers in the identification of hazards and potential hazards and in the implementation of measures to reduce or eliminate such hazards.

(3) When developing the provisions referred to in subparagraph (1)(a), Members should take into account the relevant international instruments on risk assessment and management.

### *Technical specifications*

47. Members should address the following, to the extent practicable and as appropriate to the conditions in the fishing sector:

- (a) seaworthiness and stability of fishing vessels;
- (b) radio communications;
- (c) temperature, ventilation and lighting of working areas;
- (d) mitigation of the slipperiness of deck surfaces;
- (e) machinery safety, including guarding of machinery;
  
- (f) vessel familiarization for fishers and fisheries observers new to the vessel;
- (g) personal protective equipment;
- (h) firefighting and lifesaving;
- (i) loading and unloading of the vessel;
- (j) lifting gear;
- (k) anchoring and mooring equipment;
- (l) safety and health in living quarters;
- (m) noise and vibration in work areas;
- (n) ergonomics, including in relation to the layout of workstations and manual lifting and handling;
- (o) equipment and procedures for the catching, handling, storage and processing of fish and other marine resources;
- (p) vessel design, construction and modification relevant to occupational safety and health;
- (q) navigation and vessel handling;
- (r) hazardous materials used on board the vessel;
- (s) safe means of access to and exit from fishing vessels in port;
- (t) special safety and health requirements for young persons;

---

donner aux pêcheurs un moyen d'expression publique leur permettant d'influer sur les questions de sécurité et de santé; les procédures de prévention à bord devraient être conçues de manière à associer les pêcheurs au repérage des dangers existants et potentiels et à la mise en œuvre de mesures propres à les atténuer ou à les éliminer.

(3) Lors de l'élaboration des dispositions mentionnées à l'alinéa *a*) du sous-paragraphe (1), les Membres devraient tenir compte des instruments internationaux pertinents se rapportant à l'évaluation et à la gestion des risques.

### *Spécifications techniques*

47. Les Membres devraient, dans la mesure du possible et selon qu'il convient au secteur de la pêche, examiner les questions suivantes:

- a)* navigabilité et stabilité des navires de pêche;
- b)* communications par radio;
- c)* température, ventilation et éclairage des postes de travail;
- d)* atténuation du risque présenté par les ponts glissants;
- e)* sécurité d'utilisation des machines, y compris les dispositifs de protection;
- f)* familiarisation avec le navire des pêcheurs ou observateurs des pêches nouvellement embarqués;
- g)* équipement de protection individuelle;
- h)* sauvetage et lutte contre les incendies;
- i)* chargement et déchargement du navire;
- j)* appareils de levage;
- k)* équipements de mouillage et d'amarrage;
- l)* sécurité et santé dans les locaux d'habitation;
- m)* bruits et vibrations dans les postes de travail;
- n)* ergonomie, y compris en ce qui concerne l'aménagement des postes de travail et la manutention et la manipulation des charges;
- o)* équipement et procédures pour la prise, la manipulation, le stockage et le traitement du poisson et des autres ressources marines;
- p)* conception et construction du navire et modifications touchant à la sécurité et à la santé au travail;
- q)* navigation et manœuvre du navire;
- r)* matériaux dangereux utilisés à bord;
- s)* sécurité des moyens d'accéder aux navires et d'en sortir dans les ports;
- t)* prescriptions spéciales en matière de sécurité et de santé applicables aux jeunes gens;

- 
- (u) prevention of fatigue; and
  - (v) other issues related to safety and health.

48. When developing laws, regulations or other measures concerning technical standards relating to safety and health on board fishing vessels, the competent authority should take into account the most recent edition of the (FAO/ILO/IMO) *Code of Safety for Fishermen and Fishing Vessels, Part A*.

#### *Establishment of a list of occupational diseases*

49. Members should establish a list of diseases known to arise out of exposure to dangerous substances or conditions in the fishing sector.

#### *Social security*

50. For the purpose of extending social security protection progressively to all fishers, Members should maintain up to date information on the following:

- (a) the percentage of fishers covered;
- (b) the range of contingencies covered; and
- (c) the level of benefits.

51. Every person protected under Article 34 of the Convention should have a right of appeal in the case of a refusal of the benefit or of an adverse determination as to the quality or quantity of the benefit.

52. The protections referred to in Articles 38 and 39 of the Convention should be granted throughout the contingency covered.

### PART V. OTHER PROVISIONS

53. The competent authority should develop an inspection policy for authorized officers to take the measures referred to in paragraph 2 of Article 43 of the Convention.

54. Members should cooperate with each other to the maximum extent possible in the adoption of internationally agreed guidelines on the policy referred to in paragraph 53 of this Recommendation.

55. A Member, in its capacity as a coastal State, when granting licences for fishing in its exclusive economic zone, may require that fishing vessels comply with the requirements of the Convention. If such licences are issued by coastal States, these States should take into account certificates or other valid documents stating that the vessel concerned has been inspected by the competent authority or on its behalf and has been found to be in compliance with the provisions of the Convention.

- 
- u) prévention de la fatigue;
  - v) autres questions liées à la sécurité et à la santé.

48. Lors de l'élaboration d'une législation ou d'autres mesures relatives aux normes techniques concernant la sécurité et la santé à bord des navires de pêche, l'autorité compétente devrait tenir compte de l'édition la plus récente du *Recueil de règles de sécurité pour les pêcheurs et les navires de pêche, Partie A* (FAO/OIT/OMI).

#### *Etablissement d'une liste de maladies professionnelles*

49. Les Membres devraient dresser la liste des maladies dont il est connu qu'elles résultent de l'exposition à des substances ou à des conditions dangereuses dans le secteur de la pêche.

#### *Sécurité sociale*

50. Aux fins d'étendre progressivement la sécurité sociale à tous les pêcheurs, les Membres devraient établir et tenir à jour des informations sur les points suivants:

- a) le pourcentage de pêcheurs couverts;
- b) l'éventail des éventualités couvertes;
- c) le niveau des prestations.

51. Toute personne protégée en vertu de l'article 34 de la convention devrait avoir le droit de faire recours en cas de refus de la prestation ou d'une décision défavorable sur la qualité ou la quantité de celle-ci.

52. Les prestations visées aux articles 38 et 39 de la convention devraient être accordées pendant toute la durée de l'éventualité couverte.

### PARTIE V. AUTRES DISPOSITIONS

53. L'autorité compétente devrait élaborer une politique d'inspection à l'intention des fonctionnaires autorisés à prendre les mesures visées au paragraphe 2 de l'article 43 de la convention.

54. Les Membres devraient, autant que possible, coopérer les uns avec les autres pour l'adoption de principes directeurs, approuvés au niveau international, concernant la politique visée au paragraphe 53 de la présente recommandation.

55. Un Membre, en sa qualité d'Etat côtier, pourrait exiger que les navires de pêche respectent les prescriptions énoncées dans la convention avant d'accorder l'autorisation de pêcher dans sa zone économique exclusive. Dans le cas où ces autorisations sont délivrées par les Etats côtiers, lesdits Etats devraient prendre en considération les certificats ou autres documents valides indiquant que le navire a été inspecté par l'autorité compétente ou en son nom et qu'il est conforme aux dispositions de la convention.

**Eighteenth sitting**

Thursday, 14 June 2007, 10.15 a.m.

*President: Mr. Sulka*

---

**The PRESIDENT**

I declare open the 18th sitting of this session of the International Labour Conference. The Clerk of the Conference has an announcement to make.

**RATIFICATION OF INTERNATIONAL LABOUR  
CONVENTIONS BY LITHUANIA AND NEW ZEALAND**

---

**The CLERK OF THE CONFERENCE**

It is my pleasure to announce that the Nursing Personnel Convention, 1977 (No. 149), has been ratified by Lithuania, with registration of the instrument on 12 June 2007. It will enter into force for Lithuania on 12 June 2008. The Occupational Safety and Health Convention, 1981 (No. 155), has been ratified by New Zealand, with registration of the instrument by the Director-General on 12 June 2007. It will enter into force for New Zealand on 12 June 2008.

**SECOND REPORT OF THE CREDENTIALS COMMITTEE:  
SUBMISSION AND NOTING**

---

**The PRESIDENT**

We shall now consider the second report of the Credentials Committee, which is published in *Provisional Record* No. 4C.

I invite the Officers of the Committee to take their places on the podium. They are: Mr. Kavuludi (Chairperson), Ms. Horvatić (Employer member) and Mr. Edström (Worker member).

I now give the floor to Mr. Kavuludi, who will present the second report of the Credentials Committee.

---

Mr. KAVULUDI (*Government, Kenya; Chairperson, Credentials Committee*)

I have the honour to present for the first time to the Conference a short overview of the activities of the Credentials Committee of the Conference. The full account of this activity is reflected in the two reports issued as *Provisional Records* No. 4B and No. 4C.

During this Conference, 17 objections have been presented to the Credentials Committee. These objections relate both to the credentials of delegates and their advisers already accredited by the Conference and reflected in the *Provisional List of Delegations*, and to the failure to deposit credentials of Employers' or Workers' delegates.

The Committee also dealt with three complaints regarding the non-payment of expenses of Workers' and Employers' delegates. We also received two communications, one of which relayed particularly

worrying facts concerning obstructions created by the Government of Chad to the presence of the nominated Workers' delegates.

This was one of the heaviest workloads in the long history of the Credentials Committee. In addition to examining documents submitted to it, the Committee organized eight sittings with the authors of the objections and the Governments concerned. The Committee found that one case was of particular gravity. It involves the Workers' delegate of Myanmar. Although the Committee considered that the nomination made by the Government of Myanmar warrants invalidation by the Conference, they decided to propose this year respectfully that the Conference request the Government of Myanmar, by virtue of article 26bis, paragraph 7, of the *Interim Provisions of the Conference Standing Orders*, to comply with a certain number of monitoring measures indicated in our second report and in particular to submit, at the next session of the Conference, a detailed report on the procedure used to nominate Workers' delegates and advisers. I therefore draw your attention to paragraph 62 of our second report and invite you to adopt our proposal contained in that paragraph.

I also bring to your attention paragraph 8 of our second report proposing the renewal of monitoring measures concerning Djibouti and our new mandate introduced by the *Interim Provisions of the Conference Standing Orders*.

This year, we also had to deal with two member States against whom objections were lodged both by Employers and Workers, namely the Islamic Republic of Iran and the Bolivarian Republic of Venezuela. I invite the Conference to review our findings presented in the second report and encourage the Governments concerned to take into account our comments and recommendations.

For the first time, we are proposing to use our new mandate of monitoring in relation to a complaint of non-payment of expenses of a Worker's delegate of Afghanistan. In light of the lack of implementation of the Committee's recommendations last year, and this year's failure to cover the travel and subsistence expenses of the Workers' delegate, we propose that the Conference request certain monitoring measures from the Government of Afghanistan. I therefore bring to your attention paragraph 112 of *Provisional Record* No. 4C reflecting our proposal and invite you to adopt it.

The Committee has again found that too many alterations have been made to credentials during this session, even after the publication of the revised

*Provisional List of Delegations.* On behalf of the Committee, I would request Governments, whenever possible, to present complete, clear credentials within the deadline laid down for the purpose, so as to facilitate the verification of credentials.

The Committee once again notes the usefulness of the database for the verification of credentials which has been created by the International Labour Office and invites all those concerned to take full advantage of it in future.

In our first report we noted with concern that women are not always adequately represented in national delegations. The target of 30 per cent participation still remains a long way off, despite the fact that there were only 14 women delegates in 1982 compared to 114 today. I would like to emphasize that it is not only up to governments to improve these figures but also the responsibility of employers and workers.

The Committee wishes to emphasize that it found its new mandate, introduced in the year 2005 under the *Interim Provisions of the Conference Standing Orders concerning the verification of credentials*, extremely useful for its work. These *Interim Provisions* will be reviewed by the Governing Body in November 2007, and we respectfully request the Governing Body and the 97th Session of the International Labour Conference to introduce them as amendments to the Conference Standing Orders.

With its authority being put into question by one government, the Committee also felt that there was a need to introduce paragraph 128 in its general comments, reassuring the Conference of the Committee's total impartiality and devotion to performing the tasks assigned to it by the Conference.

I would also like to express my warm thanks to my two colleagues, Lidija Horvatić, Employers' delegate from Croatia, and Mr. Ulf Edström, Workers' delegate from Sweden, for their thoroughness, their deep knowledge, and the spirit of cooperation and consensus which characterized our discussions this year.

Finally, I thank the members of the secretariat, under the able and untiring stewardship of Mr. Petrovic, for their commitment, efficiency and excellent technical support. I thank all of you for your confidence.

---

The PRESIDENT

The Credentials Committee has adopted its second report unanimously. The Conference is simply called on to note it and to adopt the proposals contained in paragraphs 8, 62 and 112, which concern the delegations of Djibouti, Myanmar and Afghanistan, respectively.

*(The report is noted and the proposals are adopted.)*

Before moving on, I should like to express my gratitude to the Officers of the Credentials Committee for the excellent work they have done. The secretariat has provided valiant and efficient support to the Committee, so they also deserve our warm thanks.

---

**RECORD VOTE ON THE RESOLUTION CONCERNING THE ADOPTION OF THE PROGRAMME AND BUDGET FOR 2008-09 AND THE ALLOCATION OF THE BUDGET OF INCOME AMONG MEMBER STATES**

---

The PRESIDENT

We shall now move on to the record vote on the resolution concerning the adoption of the Programme and Budget for 2008-09 and the allocation of the budget of income among member States, contained in *Provisional Record* No. 11.

*(A record vote is taken.)*

*(The detailed results of the vote will be found at the end of the record of this sitting.)*

The result of the vote is as follows: 423 votes in favour, 11 against, with 5 abstentions. Given that the quorum was 296, and the required two-thirds majority of the votes cast, including abstentions, was reached, the resolution is adopted.

*(The resolution is adopted.)*

Certain delegates have been asking for the floor in order to explain their votes.

---

Mr. SMYTHE (*Government, Australia*)

The Australian Government considers that the budget increase proposed to the Conference is excessive. Accordingly, the Australian Government is, regrettably, not able to support the budget. Unfortunately, the efforts made to date to identify further efficiencies and budget savings have not been as successful as they could have been without prejudicing the ILO's core responsibilities. Australia's official policy is to support zero nominal growth in the budgets of international organizations. It is disappointing that a consensus has not been reached on this matter. Let me underscore the fact that Australia remains committed to supporting the work of the ILO.

---

*Original French:* Ms. SCHAER BOURBEAU (*Government, Switzerland*)

As we emphasized during the discussions on the draft programme and budget of the ILO for 2008-09, Switzerland supports the main proposals and strategic orientations set out in it. My country also accepts the scale of contributions fixing its share for the next biennium.

However, Switzerland is concerned, as it has already pointed out on several occasions, about the fact that the Programme and Budget for 2008-09 does not contain sufficient resources to finance the renovation of the ILO headquarters building, estimated at 120 million Swiss francs, as well as maintenance of the Organization's premises, both at the headquarters and in the regions.

We would like to remind you that the responsibility for maintaining and refurbishing a property lies with the owner of the building. In this case, it is the ILO that is the owner of its headquarters building in Geneva. Just as any other international organization in the same situation, the ILO must therefore provide in its regular budget a sufficient amount of resources to finance the maintenance and renovation of its infrastructure.

At a time of budgetary constraints, it is tempting to give priority to financing programmes over building infrastructure. However, this rationale overlooks the fact that the proper maintenance of buildings, as

well as other logistical or administrative tasks, is essential for the Organization to be able to carry out its work. Switzerland would have preferred the ILO to have already taken this into account and to have included the renovation of the headquarters building as such, with sufficient resources, in the next programme and budget.

This is unfortunately not the case, and we regret it. That is why my delegation abstained during the vote.

---

Ms. PONTICELLI (*Government, United States*)

The United States Government supports a zero nominal growth policy for all international organizations. In special recognition of the United States' support for the ILO and its programmes, especially the Decent Work Country Programmes initiative, the United States sought a negotiated compromise for a budget above zero nominal growth. Unfortunately, that negotiation was unsuccessful.

The United States would have liked to be able to join a consensus on the ILO programme and budget for the biennium 2008–09. We believe that it is in the interest of all international organizations to achieve consensus budgets through consultation and negotiation with member States, especially major contributors. We believe that further efficiencies and savings could have been found in the programme and budget without adverse effects on the ILO's core activities. The United States cannot support the Programme and Budget for 2008–09 as proposed by the Director-General.

---

Mr. RICHARDS (*Government, United Kingdom*)

I would like to explain very briefly why the United Kingdom Government has voted against the resolution concerning the adoption of the Programme and Budget for 2008–09.

We have, throughout the budget discussions with the Governing Body and the Finance Committee, made it clear that, while we fully support the work of the ILO, we consider that the proposed budget increase is excessive. As we said in previous discussions, we welcome the Director-General's agreement to reduce the original proposal by US\$3 million.

However, we believe that further efficiency savings could have been achieved by stricter priority setting without affecting the ILO's work. Budgetary constraints, efficiency savings and the accompanying process of priority setting are the norm for many large organizations and the ILO is no exception. Our hope was for a budget on which all Governments could agree. We regret that that has not happened, and that we could not join the consensus.

In conclusion, I would stress, once again, that our vote does not imply any lack of support for the ILO. On the contrary, the importance we attach to rigorous budgetary control is rooted in our support for the ILO's work and our belief that a more cost-efficient ILO would be a stronger and more effective ILO.

---

**FINAL RECORD VOTE ON THE ADOPTION OF THE WORK  
IN FISHING CONVENTION**

---

The PRESIDENT

The Conference is now required to hold a record vote on the adoption of the Work in Fishing Convention. The text of this Convention was published in *Provisional Record* No. 12A.

*(A record vote is taken.)*

*(The detailed results of the vote will be found at the end of the record of this sitting.)*

The result of the vote is as follows: 437 votes in favour, 2 votes against, with 22 abstentions. The quorum was 296, and the majority required 293. Given that the quorum has been reached and the required two-thirds majority of the votes cast, including abstentions, is met, the Work in Fishing Convention, 2007, is adopted.

*(The Convention is adopted.)*

*(Applause.)*

A number of delegates have requested the floor in order to explain their votes.

---

Mr. BABULAL (*Employer, India*)

A fishing Convention, to be widely accepted, requires the right balance in the wording of the instrument so as to provide strong protection for fishermen while accommodating the diverse operations and conditions and employment relationships that prevail in the industry due to different socio-economic conditions in different countries around the world. We have adopted the Work in Fishing Convention, 2007 at this Conference. The social partners have played a very important role in arriving at a compromise to have a Convention which can be ratified by many countries, resulting in better working conditions for the fishermen of the world.

Fishing is a very hazardous occupation. There are inherent dangers in fishing, and achieving a credible and practical instrument which can be ratified widely is very important. Thanks to the efforts of the social partners and Government members we have been able to adopt a Convention reflecting the proper perspective, which could in my mind be widely ratified. The world's fishermen are very diverse and count approximately 41 million persons, 16 million of whom are full-time fishermen. About 93 per cent of the world's catch is adjacent to national jurisdictions. About 95 per cent of the fishermen are from developing countries, as are about 85 per cent of the shipowners.

In view of the above, it is essential for the new Convention to give developing countries and the least developed countries greater flexibility in its implementation; hence the progressive implementation provisions. Given, that progressive implementation is proposed in the present Convention, especially in Articles 3 and 4, and also in the resolution concerning promotion of the ratification of the Work in Fishing Convention, 2007, it is expected that many countries may ratify the Convention. We trust that the Convention will be fully effective in providing fishermen with full benefits and protection.

The International Labour Organization has to develop promotional material for the development of the necessary infrastructure and technical facilities to give proper and effective shape to Annex III. It should help to create facilities in the rural areas of developing and underdeveloped countries so as to provide fisherman with the technical skills to make them more efficient and knowledgeable in their profession, and ensure proper representation for developing and underdeveloped countries in the tripartite meeting of expert, provided for in Article 45 of the Convention.

There are many aspects, such as medical examinations, medical certificates and accommodation, which developing and underdeveloped countries may not be able to implement initially because of their lack of adequate infrastructure, national laws and social and economic conditions. Finally, I would like to quote our Vice-Chairperson, Mr. Chapman, and the observation of various Employers that the ILO is currently engaged in a process of self-examination in order to revitalize its services. There is a need to reinforce the mechanism for facilitating building up of trust and consensus among the various parties.

There is concern that adherence to predetermined positions can lead to people talking at each other instead of with each other. The ILO should play a significant role in identifying issues and perspectives and in facilitating consensus building, leaving aside the insistence on voting that too frequently serves to create winners and losers.

---

Mr. KANEKO (*Government, Japan*)

First of all, I wish to express my deepest appreciation for the ILO's excellent work. I also would like to thank the social partners and member States for the friendship and kindness they extended during the negotiations.

We are very lucky to be here and witness the great achievement of establishing the Work in Fishing Convention, 2007. I believe this great accomplishment is a product of unification of the three parties, workers, employers and governments. The fishing sector throughout the world has been faced with much difficulty in recent years.

Japan's fishing sector is no exception. We have seen a diminishing level of profitability, a drop in the number of fishermen, and many other problems. I believe that the tripartite unification, which we clearly see today here at the ILO, is very important and much needed to keep the fishery sector viable as well as to overcome such problems, and to enable the fishing sector to continue accomplishing the important task of supplying the indispensable food to people all over the world.

The road ahead of us has just been paved and what we have to do from now on is to take steady and firm steps to move forward, the first step being to ratify the Convention.

---

Ms. PONTICELLI (*Government, United States*)

After several years of hard work, the International Labour Conference has adopted the Work in Fishing Convention. We commend all parties for coming together on a final product. As this is a very complicated issue, the United States Government is still reviewing the text of the Convention to determine its scope and applicability. We want to make clear that our vote to adopt this Convention entails no obligation by the United States Government to ratify it. Should it be determined that there is interest in ratification, a review would be conducted by our Tripartite Advisory Panel on International Labour Standards, under the President's Committee on the ILO.

---

Ms. ROBINSON (*Government, Canada*)

Canada welcomes the Work in Fishing Convention and has voted in favour of its adoption. This new international standard is the result of several years of concerted efforts by the Office and the ILO's tripartite constituents. We particularly wish to acknowledge the efforts of Canada's Worker and

Employer representatives that facilitated the final consensus instrument that has been adopted today. Canada appreciates the additional flexibilities that have been included in the Convention with a view to facilitating its broad ratification and implementation. Although the Convention still includes a number of specific technical requirements which will make ratification difficult for federal States such as Canada, we consider its adoption by the Conference to be an important contribution to protecting the world's fishers.

---

Mr. SOUFAN (*Government, Lebanon*)

Lebanon has voted in favour of adopting the proposed Convention concerning work in the fishing sector to mark its belief in the fundamental principles and rights at work enshrined in the preamble of the Convention, as well as its objectives, and in order not to obstruct the process. However, the Convention poses a number of problems for developing countries, particularly in the light of underdeveloped infrastructures and institutions and the lack of financial means to implement it. Given Lebanon's difficult national circumstances and socio-economic constraints and hardships, our vote does not entail any obligation on the part of the Government, nor does it imply the obligation to ratify the Convention, until Lebanon is in a position to do so and honour its obligations, after consultation with the representative organizations of employers and workers, including the representative organizations of fishing vessel owners and fishers and relevant ministries. Owing to those difficulties, Lebanon is unable to implement the Convention, in particular the measures related to social security. Only when those circumstances change will the Government of Lebanon consider ratifying the Convention.

---

*Original Spanish: Mr. FLORES (Government, Bolivarian Republic of Venezuela)*

The Government of the Bolivarian Republic of Venezuela shares the objectives of this Convention, which is to guarantee that fishers enjoy decent working conditions on board fishing vessels. We have been involved in this process and have shown great interest and determination with a view to ensuring the adoption of a Convention that benefits fishers. Nevertheless, my Government has decided to abstain from voting on this Convention, because in the Preamble reference is made to the United Nations Convention on the Law of the Sea of 1982, and once again I would like to say that we have not signed that Convention and are therefore not bound by it whatsoever insofar as it does not reflect the interests of Venezuela.

We believe that the Convention of the United Nations on the Law of the Sea of 1982 should not be used as a model for the proposed Convention on work in the fishing sector, since our country is not signatory to that Convention, and even voted against the instrument at the time of its adoption.

Despite these reservations, our Government is convinced and would like to make this clear before the international community that the Convention on work in the fishing sector will strengthen the rights of fishers and, in the light of this, the Bolivarian Republic of Venezuela supports its objectives. My Government believes that national legislation on this matter guarantees, strengthens and protects the fishing sector to a much greater extent, since it lays

down very advanced protection and social security provisions for workers in this sector.

**FINAL RECORD VOTE ON THE ADOPTION OF THE WORK  
IN FISHING RECOMMENDATION**

---

The PRESIDENT

The Conference will now hold a record vote on the adoption of the Work in Fishing Recommendation. The text of this Recommendation was published in *Provisional Record* No. 12B.

*(A record vote is taken.)*

*(The detailed results of the vote will be found at the end of the record of this sitting.)*

The result of the vote is as follows: 443 votes in favour, zero against, with 19 abstentions. Given that the quorum has been reached and the required two-thirds majority of the votes cast, including abstentions, is met, the Work in Fishing Recommendation, 2007, is adopted.

*(The Recommendation is adopted.)*

That concludes the voting for this morning. I will now pass the floor to the Clerk of the Conference.

**RATIFICATION OF AN INTERNATIONAL LABOUR  
CONVENTION BY TUNISIA**

---

The CLERK OF THE CONFERENCE

I am pleased to announce that on 25 May 2007, the Director-General registered the ratification by the Government of Tunisia of the Workers' Representatives Convention, 1971 (No. 135). The Convention will enter into force for Tunisia on 25 May 2008.

*(The sitting continues with the discussion of the Reports of the Chairperson of the Governing Body and of the Director-General. Delegates' speeches are reproduced in Provisional Record No. 26.)*

**Vote par appel nominal sur la résolution concernant l'adoption du Programme et Budget pour 2008-09 et la répartition du budget des recettes entre les États Membres**

**Record vote on the resolution concerning the adoption of the Programme and Budget for 2008-09 and the allocation of the budget of income among member States**

**Votación nominal sobre la resolución relativa a la adopción del Programa y Presupuesto para 2008-09 y al prorrateo del presupuesto de ingresos entre los Estados Miembros**

**Eighteenth sitting**

Thursday, 14 June 2007, 11.00 a.m.

*President: Mr. Blondel***REPORTS OF THE CHAIRPERSON OF THE GOVERNING  
BODY AND OF THE DIRECTOR-GENERAL:  
DISCUSSION (CONT.)**

---

**The PRESIDENT**

---

We shall now return to the discussion of the Reports of the Chairperson of the Governing Body and of the Director-General.

*The sitting continues with delegates' statements.*

*The transcript of speeches made in a language other than English, French or Spanish is produced in the language chosen by the country concerned for the purpose of official correspondence with the ILO.*

---

**Mr. KHAN (Government, Pakistan)**

---

It is an honour for me to address the 96th Session of the International Labour Conference, the parliament of the world of work. The Conference provides an excellent opportunity to reflect upon the challenges raised by the Governments and the social partners in the tripartite setting of the ILO.

The Director-General, in his Report to the International Labour Conference, has outlined the challenges and the implementation of the Decent Work Agenda and has presented some options for meeting these challenges and their impact on sustainable development. We find the Director-General's views of great interest and believe that they merit further discussion and careful reflection. I would like to share some general thoughts on the issue.

Promoting decent work requires, as a prerequisite, the existence of sustainable enterprises. For this, managing the effects of globalization, strengthening institutions and governments at all levels is essential. This is not an easy task, especially in the context of the rapid and profound changes being brought about by globalization. Decent work is best promoted through strong and efficient markets and strong effective institutions.

Social inequality within and among nations, aggravated by an uneven distribution of benefits and the cost of globalization, is a serious threat to sustainable development. We have to ensure that human financial and material resources are combined equitably and efficiently to achieve innovation and enhanced productivity. This calls for a new form of cooperation among governments, businesses and societies.

The ILO, with its unique tripartite structure, has a central role to play in all the areas that I have just

mentioned. We would agree with the Director-General that in order for the ILO to play an effective role this Organization must constantly review and strengthen its capacity to assist its membership. However, we believe that in doing so we must especially strengthen the Organization's ability to undertake data gathering and analytical work, provide technical assistance in complex, interdisciplinary areas pertaining to employment generation and promote consensus on optimal approaches to achieve decent work in the specific socio-economic context of particular countries. At the same time, the tendency to overload review and reporting mechanisms should be avoided.

The Constitution of the Islamic Republic of Pakistan guarantees freedom and non-discrimination in fundamental human rights. No citizen otherwise qualified for employment can be discriminated against on any grounds. Moreover, Pakistan is one of those countries that has ratified all eight core Conventions of the ILO.

In line with these objectives, the Government of Pakistan has made decent employment central to its economic development policies and has stressed the creation of conditions conducive to decent employment generation, poverty reduction and human resource development for sustainable economic and social development.

The initiatives in these areas include the poverty reduction support strategy, which aims to address people below the poverty line in providing employment opportunities, social security and education. This has brought 10 per cent of the people above the poverty line and reduced unemployment from 7.8 per cent to 6.4 per cent.

Specially targeted programmes have been undertaken for women's empowerment to provide equal opportunities for decent employment. Recently, the Government has reserved 10 per cent of posts in all public sector organizations for women.

Similarly, the Ministry of Labour has undertaken labour inspection and the social protection policies, skills development and a labour market management system to increase employment and decent work.

Pakistan is one of the eight countries in which a "One UN" pilot project was initiated in March this year. We in Pakistan are working closely with the ILO and the social partners, as well as with other United Nations organizations to implement the Decent Work Country Programme. We place on record our appreciation of the support and assistance provided by the ILO and its area office in Islamabad.

We are convinced that we will succeed in implementing our Decent Work Agenda, despite the challenges of an ever more globalizing world.

Ms. LLOYD (*Government, Seychelles*)

I wish to avail myself of this opportunity to convey to the Director-General the good wishes of the President and Government of Seychelles and the gratitude of our people for your successful leadership of the ILO over the years. Under your guidance, the values and principles of the ILO embedded in tripartism and social dialogue have, more than ever, continued to transform the lives of workers in all corners of the world.

Over these years, your stimulating and inspiring interventions have brought about profound, positive changes in the outlook of Governments to enhance an environment for decent and better treatment of workers.

The Decent Work Agenda has been irrefutable evidence of the Director-General's tenacious and relentless effort to bring social justice and democracy to the workplace and beyond. It is also testimony to the objectives of the ILO of ensuring that those in public and private authority develop and implement policies that can give citizens of our member States a fair chance of a decent job. Indeed, a fair chance to a decent job is one of the most widespread democratic and legitimate pursuits worldwide, and it should underpin and be a central objective of all national and international strategies to reduce poverty.

Seychelles wholeheartedly embraces the concept of decent work, as it integrates well within our principle of keeping people at the centre of all national development. Tripartism has been accepted as the main concept and working tool in this process and the Government is doing its utmost to consolidate its efforts. Only in May 2006, the Employment Act was amended to include the institutionalization of a tripartite body, the National Tripartite Employment and Labour Council, and making it a requirement for the Minister for Social Affairs and Employment to consult this Council on all matters relating to labour and employment. You may recall that in 2005 my predecessor reported to this august assembly the adoption of the social charter for dialogue that had been signed by all the social partners. We have in place, therefore, the legal instruments and other mechanisms for employers and workers to influence relevant national policies and programmes.

We are on track to achieve most of the Millennium Development Goals. We are doing this through the implementation of holistic poverty strategies, universal compulsory education up to the age of 15, and gender equality measures, to mention but a few things, and this is evidenced in the Human Development Index where Seychelles is ranked 47 in the world. We are also proud that child labour is foreign to our shores.

At this 96th Session of the International Labour Conference, Seychelles undertakes to fully support the need for us to address issues pertaining to equality at work, and to discuss approaches to tackle those challenges. Equality at work is critical to the advancement of the Decent Work Agenda. If the four strategic objectives identified therein are effectively implemented, it is unquestionable that the achievement of equality will be assured.

With regard to equality, Seychelles is often considered as having "made it", and seen as a model.

Gender equality is more and more mainstreamed at various levels, be it in our Constitution, in our legislation or in our national policies and programmes.

We have a labour force which comprises close to 50 per cent female participation. However, it is those same individuals who are generally single-headed households. We realize that the triple roles that our women have in our society, as mothers and nurturers, producers in the labour force, and participants in our community life, still require attention. We thus call for the social protection objective be interwoven into all national development policies so as to overcome all barriers which may impede our social and economic growth.

There are many complex challenges affecting our world today, and like most, if not all, member States, Seychelles is also subject to the adverse effects of globalization. From this perspective, we need to address the challenges holistically with urgency, zeal and determination, by adopting integrated and systematic socio-economic strategies. It is for this reason that I joined my colleagues in supporting a budget increase for the implementation of programmes designed to empower our nations in the face of these daunting challenges.

I would at this point like to also reiterate the proposal we made two years ago for the need for developing countries to join forces and push for the development and introduction of a vulnerability index to recognize the disparities, vulnerabilities and specificities of countries, with a view to achieving equity and fairness. Such an index will level out the playing field with more equitable participation in the world economy and distribution of benefits. This need arises principally because of the extent to which the economy of a country is exposed to the vicissitudes of factors out of its control. The stimulus for developing such an index comes mostly from the Small Island Developing States (SIDS), as some of us tend to register a relatively high GNP per capita, giving the impression of economic strength, when in reality our economies are fragile and in certain cases extremely vulnerable to external shocks.

Seychelles has committed itself to doubling its GDP by 2017. This would, however, not be done at the expense of the well-being of its workers. We will continue to ensure that we not only apply equality at work at enterprise level, but also extend it to encapsulate the needs of workers and individuals in all its social dimensions, and for this we will, more than ever, need the technical assistance of the ILO to further develop our capacity to integrate national policies within international norms and recommendations.

Let me finish by reaffirming that achieving the objectives of decent work is a major challenge for all member States. However, it is a challenge that we can overcome through international and tripartite solidarity. Let me borrow a well known workers' dictum: "L'union fait la force".

Sr. CALDERA SÁNCHEZ-CAPITÁN (*Ministro de Trabajo y Asuntos Sociales, España*)

Es para mí un honor intervenir ante la Organización Internacional del Trabajo. La OIT representa la conciencia universal a favor de la dignidad en el trabajo, del trabajo decente, y España quiere contribuir a ello. Seguramente España no es el país más rico del mundo, pero está entre los más solidarios.

Es por ello que España se ha convertido en el quinto contribuyente voluntario de la OIT, muy por encima de nuestras posibilidades económicas y de nuestra riqueza. Lo queremos para los españoles, lo queremos para el resto del mundo. Nosotros sabemos, queridos colegas, que España irá mejor, que los ciudadanos tendrán más derechos y que también en el mundo el resto de los ciudadanos los tienen.

Nosotros apostamos por un modelo de integración social donde nadie se quede atrás, y eso vale para nuestros países, pero también para un mundo globalizado donde la justicia, la equidad, la cooperación y la solidaridad deben ser señas de identidad.

Es por ello que mi país ha duplicado en sólo tres años la cooperación al desarrollo, somos el país de la OCDE que ha hecho más intensos esfuerzos en este sentido, y por ello queremos que estos valores universales que defendemos en España sean también defendidos y aplicados en el mundo. Y agradezco el trabajo de la Organización Internacional del Trabajo en defensa de estos valores.

Mirando hacia el futuro, España está comprometida en un programa de reformas sociales muy intenso, como ayer recordó S.A.R. el Príncipe de Asturias en esta misma sala.

España ha aprobado una ley para la igualdad, una ley muy importante, una ley para la igualdad que pretende garantizar la igualdad efectiva entre hombres y mujeres, una ley que en nuestras empresas establece la obligación de aprobar planes de igualdad para que la mujer, a igual trabajo, perciba igual salario, una ley que favorecerá los ascensos profesionales de las mujeres y una ley que impedirá que el hecho de ser madre suponga un retroceso en la carrera profesional de la mujer, una ley que va a aumentar los derechos de la mujer en relación con su maternidad y que establece también un permiso de paternidad para que los hombres se hagan cargo desde el primer segundo del nacimiento del nuevo hijo, una ley para la igualdad, una ley para la mejora de la protección social. Como lo será la ley de la dependencia, cuántos millones de personas en el mundo, discapacitados, o personas mayores no pueden valerse por sí mismos.

España ha aprobado una ley que también favorecerá el empleo y la protección social de las personas afectadas, dándoles el derecho universal a todos ellos para recibir los servicios que necesitan o para recibir las ayudas económicas precisas para que otra persona les preste atención en su situación de dificultad.

Son dos leyes que están a la vanguardia del mundo, a la vanguardia de los derechos sociales que queremos para el mundo. Nos sentimos profundamente solidarios y orgullosos de haber podido desarrollar estas políticas, igual que nos sentimos un país abierto que ante el desafío universal de la inmigración, incorpora a los seres humanos. Los inmigrantes son seres humanos, con los mismos derechos que el resto de los ciudadanos. Agradezco que la OIT haya felicitado a España por la aplicación del Convenio núm. 155 en la integración de los ciudadanos inmigrantes que llegan a España.

Nosotros creemos que debe regularse el flujo migratorio de forma legal, relacionado con la capacidad de acogida de los países fundamentalmente a través del mercado laboral, pero son ciudadanos con derechos, son ciudadanos con derechos civiles, con derechos sociales y con derechos laborales. Por eso hicimos un proceso de regularización de inmigrantes que estaban trabajando en la ilegalidad. De

ese modo, también legalizábamos a sus empresarios, porque cuando alguien trabaja en la economía sumergida, quien le da empleo también está fuera de las normas de la Organización Internacional del Trabajo. Es por eso que me permito llamar la atención a la conciencia universal en favor de los estándares de protección que establece la Organización Internacional del Trabajo. No podemos consentir que haya trabajadores sin derechos, no está a la altura ética de lo que demandan nuestras sociedades, tenemos que regular legalmente los flujos migratorios y favorecer después la integración de las personas que llegan a nuestros países, y hay que hacerlo con legalidad. Legalidad para todos, ésta es una cuestión de derechos civiles y de derechos humanos. Legalidad en esos flujos porque eso será un elemento positivo para las sociedades de donde salen los inmigrantes y para las sociedades de acogida.

---

Mr. HÉTHY (*Government, Hungary*)

---

In recent years, political discussion at the ILO Conference has focused on balanced social and economic development, that is on challenges brought about by the implications of globalization. I am fully convinced that we have done a good job, the ILO and the Office, under the direction of Director-General Somavia, are on the right track.

The ILO has worked out and elevated to international policies its Decent Work Agenda. The 2005 United Nations World Summit and the 2006 High-level Segment of the United Nations Economic and Social Council endorsed the Decent Work Programme as an indispensable element of international development. The agreement concluded with the United Nations Development Programme (UNDP) indicates that there is a real chance to implement this ambitious programme. A meaningful dialogue has got under way among the key actors of economic and trade development, namely the International Monetary Fund (IMF), the World Bank, the World Trade Organization (WTO) and the ILO.

The World Commission on the Social Dimension of Globalization was established and worked hard. Its conclusion, namely that "the cause of the problems is not globalization but the lack of appropriate institutions and the lack of harmonized international policies", provides clear guidance for national and international action.

On that basis, I propose that the Conference support the endeavours outlined in the Director-General's Report entitled: *Decent work for sustainable development* and, in particular, the strategic efforts to enhance the coherence of trade, financial and employment policies.

The discussion and conclusions on sustainable enterprises has been especially relevant and important for Hungary. The Hungarian Government presently is determined to implement far-reaching reforms, among others in the areas of public finances and the social protection system, with the aim to make these systems more effective and less costly and ensure the sustainable development of the country's economy. This process is difficult and painful, but necessary and unavoidable. The Government asks for the support, or at least the understanding, of its social partners, trade unions and employers.

As a member of the European Union, Hungary intends to make a contribution to the Lisbon Strategy. We fully endorse its approach: to create more and

better jobs while ensuring lasting and balanced economic development.

In Hungary we especially focus on job creation, primarily through providing a business-friendly environment. Hungary puts a strong emphasis on improving employability, as well as on developing a labour market which harmonizes demand and supply more efficiently. All these endeavours should be supplemented and underpinned by training opportunities for all ages and in all professional cycles, a stronger social safety net, along with a benefit system which provides assistance in overcoming disadvantages rather than perpetuating them. Sustainable economic growth requires improved competitiveness as well as technological development. All these objectives are linked, horizontally, by the criteria of equal opportunities and social cohesion.

Hungary's Government shares the ILO's commitment, as reaffirmed in the Director-General's Report, to tripartism. In the Central and Eastern European region, Hungary has the oldest and probably the most powerful tripartite structure, the National Council for the Reconciliation of Interests, which made an invaluable contribution to peaceful transition in the context of privatization, growing unemployment, two-digit inflation and dropping real wages in the 1990s. Tripartism has an important role to play in the context of present challenges. We also believe in wider social dialogue involving new emerging actors in society and in the economy. To achieve our goals, the experience of the international community and participation in international cooperation are indispensable for us. Cooperation in the case of the ILO also means some special channels for Hungary, such as our participation in the work of the ILO's Governing Body and our hosting of the ILO's Subregional Office for Central and Eastern Europe which we try to provide the best possible working conditions.

---

*Original Russian: Ms. LEVITSKAYA (Government, Russian Federation)*

The Report of the Director-General, Mr. Juan Somavia, has touched on the most important aspects of the global dimension of the issue of decent work, which are connected with the challenges of globalization. We share his apprehensions concerning the fact that the inequality of income distribution between rich and poor countries, the unsatisfactory state of global employment inequalities, the unfair distribution of labour resources and the shortage of decent jobs together represent a serious threat to sustainable development.

We believe that we must support the efforts being made by the International Labour Organization to draw up strategies to improve governance in the world of labour, harmonize policies in the areas of trade, finances and employment and extend the labour market information base in order to determine the scale of the shortage of decent jobs.

In the conditions we now face, joint efforts need to be made by ILO member States to find effective methods of regulating the economy, governing the world of labour and providing adequate responses to the challenges of globalization. The problems of sustainable development set out in the Report affect all States to a certain extent, both rich and poor, and the Russian Federation is no exception.

The economic indicators in the Russian Federation bear witness to the fact that the country is confidently entering a new stage of development. The

annual growth of GDP is 6 to 7 per cent. We are seeing positive growth in the real income of the population: on average, 10 to 12 per cent on an annual basis. As a result of the measures adopted over the last few years, poverty in Russia has nearly halved. The growth of employment over the last three years has brought jobs to 3 million people. Russia has not only completely overcome its long-term fall in production, but has now become one of the ten largest economies of the world.

The basic priorities of social and economic policy in the Russian Federation over the next decade will be connected to achieving a better quality of life for our citizens and creating conditions for the sustainable development of the economy. This is an entirely attainable target, despite the systemic challenges with which Russia, like many countries, is faced.

What are these challenges? First of all, there is the unfavourable demographic trend: the falling population due to a low birth rate and low life expectancy, and the increase in the proportion of elderly people in the population as a whole. Secondly, we have the influence of global competition on not only the consumer market, but also on the labour market. Thirdly, our social infrastructure is lagging behind our economic growth and human needs. And fourthly, and finally, there is a growing need for the creation of an effective mechanism to supply our growing economy with highly qualified workers.

In response to these challenges, we can already report that the Government of the Russian Federation, under the leadership of the President, have undertaken a series of measures unprecedented in the history of our country in order to create broad opportunities in the coming year for citizens to have access to a higher level of education, better health care and more comfortable living conditions.

The main features of our policies are their comprehensive nature. We are in the final stages of preparing a number of important instruments, including: demographic policy up until 2025; a labour market action plan and migration policy. The Strategy of the Russian Federation has the following goals: to improve the life expectancy of the population through reducing mortality and raising the birth rate; improving the quality of life and health care; exercising a migration policy that meets the needs of sustainable development for the country; and providing highly qualified workers for this new economy by improving the quality of our human resources.

All these decisions provide a basis for the transition of the Russian economy to a new stage of innovative development. The long-term targets have been adopted by the Government and endorsed by the social partners and will be made a reality on the basis of close tripartite cooperation.

---

*Mr. BORG (Government, Malta)*

I am delivering this statement on behalf of the Minister of Malta, Minister Galea, who is not present here today.

On behalf of my Government, I would like to congratulate the ILO on its ongoing commitment to promote the Decent Work Agenda, on which the issue of equality occupies a prominent place. We firmly believe discrimination to be both inequitable and inefficient, constraining productivity but also undermining social cohesion. We welcome the clear achievements outlined in the Global Report in re-

spect of a universal strengthening of political commitment to eliminate discrimination, and of the laws and institutions to do so.

However, we also recognize the need to make laws work, to increase access to legal assistance and to increase the capacity of the judicial system to bring about equality.

We support the strengthening of the role of labour inspectorates to take on a preventive and advisory role in respect of equality, alongside the strengthening of their enforcement capacity.

As always, the role of legislation is necessary but not sufficient, and the equality agenda is also significantly furthered by active labour market measures to increase the employability and job placement of disadvantaged groups.

The potential for public procurement processes to promote equality, whether through qualifying conditions or post-contract compliance with labour laws, is very promising. Furthermore, there remains considerable work to be done on measuring and monitoring the various forms of discrimination. As the Global Report exhorts, we must not be afraid to try to quantify discrimination, for what is measured stands the best chance of being managed.

As so aptly put, equality is a “moving target”, and we must be constantly vigilant to better understand and address not only traditional forms of inequality, particularly gender, race and ethnicity and disability, but also emerging ones such as age, religion and sexual orientation, to mention but a few.

Perhaps one of the most pressing challenges to equality in southern European labour markets today is that of mass immigration in recent years. It must be noted that this occurred alongside the general rise in unemployment in the region, though signs of recovery have been evident in recent months.

Unlike in northern Europe, where immigration has traditionally been used in times of boom, in southern Europe we see immigrant labour being used to correct structural defects in the labour market, such as insufficient labour supplies, inflexible labour markets and uncompetitive low-productivity sectors.

While there is not enough high quality and empirical research on the issue, particularly due to the fact that a high proportion of immigrants may well be working or residing in a clandestine manner, the little research that exists indicates that immigrant workers experience very different pay rates and much poorer working conditions than native workers. Although legislation in most countries does not allow for such distinctions to be made between local and immigrant labour, enforcement in this respect remains weak and must be a priority for action.

The directive proposed by the EU on increased sanctions for those employing illegally staying third country nationals, while at the same time strengthening the latter’s right to redress, can only be welcome.

This brings me to my second point, which is the apparently high prevalence of informal work in Europe. Workers in undeclared employment are outside the scope of labour laws and their enforcement, and, in this respect, the traditional tolerance of informality in southern Europe should be rethought. This will also require a closer examination of the role of regulation and informality in southern Europe, with continued effort to seek an optimal balance between flexibility and security which the European Commission so rightly says can only be

worked out in its detail by each particular country itself.

Lastly, but equally significant, is the issue of gender equality in southern Europe. Since the 1970s, the public participation of women has seen marked change. Primarily, women have benefited from the overall shift from agriculture and low-skill manufacturing in southern Europe towards an increasingly stronger knowledge economy.

Women are now participating fully in higher education and training and making great headway into even traditionally male domains.

I am pleased to say, for instance, that while segregation at tertiary level education has been constantly on the decrease, last year was the first time in Malta that the number of tertiary students in science was higher among women than among men.

Women’s labour market participation in Europe has also seen an increase, though a very modest one. The fact that women are delaying the formation of a family and that fertility rates in southern Europe have dropped markedly is a cause for concern, however, it suggests that women still perceive it to be very difficult to combine the requirements of work and family.

There remains much to be done to bring about family-friendly work organization and the provision of affordable child care. It is critical that efforts are stepped up if the much needed rise in the labour supply is to come about in southern Europe, while by no means devaluing the free choice of a number of women to be full-time homemakers and carers of children or elderly relatives.

The potential for collective bargaining and the role of the social partners in bringing about family-friendly work organizations cannot be overlooked. Likewise, public entities, such as labour inspectorates and public employment services, may also play an important role in providing guidelines and advice on making gender equality a workplace reality.

To conclude, I would like once again to congratulate the ILO on its action plan and Decent Work Programme and on its ongoing commitment to raise labour standards across the world.

---

Mr. MAMMADOV (*Employer, Azerbaijan*)

It is my great pleasure to welcome all of you on behalf of the Azerbaijan Employers' delegation and my own behalf, to thank all persons participating in the organization of this great event and wish success to the work of the Conference.

I would like to take this opportunity to express my deep gratitude to the Director-General of the International Labour Office for his Report to the 96th Session of the International Labour Conference, which addresses the elimination of discrimination in respect of employment and occupation. The eight important issues highlighted in the Report are of great interest and significance to Azerbaijan’s employers.

Azerbaijan ratified ILO Equal Remuneration Convention, 1951 (No. 100) and its Recommendation, which include provisions on discrimination, employment and occupation.

At the same time, the Constitution and Labour Code of the Republic of Azerbaijan prohibit any discrimination in labour relations. That notwithstanding, there are still problems in this regard. Indeed that main problem is the heritage of the former Soviet system, and we need time and experience to move away from Soviet mentality. Moreover, the

Armenian aggression and occupation of 20 per cent of Azerbaijani territory also caused great problems, including the loss of 300,000 jobs, and resulted in one million people becoming refugees.

National legislation and international Conventions are very important tools for solving existing problems. Dialogue between social partners and their joint efforts are crucial.

The Decent Work Country Programme for Azerbaijan, signed in Geneva last year, is a good example of this dialogue and will play an important part in solving a series of problems.

The matter comprehensively highlighted in the Director-General's Report, on support for small and medium-sized enterprises to solve problems they face, is also of great interest and importance for us. More than 80 per cent of the Confederation's members are small and medium-sized enterprises. Since 2005 the National Confederation of Employers' Organizations of Azerbaijan has been successfully implementing a project on capacity building for employers' organizations on productivity and competitiveness in Azerbaijan within the ILO ACT/EMP Programme.

Studies conducted in the context of the project were successful in revealing great problems in small and medium-sized enterprises functioning in the Republic, related to the application of international labour standards. In this case, the Director-General is right to say that these entrepreneurial subjects need the support of employers' organizations.

Moreover, the Decent Work Country Programme includes women's employment issues. Today the involvement of women in business activity is of great importance. In this respect, the project on women entrepreneurship development implemented by the National Confederation of Employers' Organizations of Azerbaijan during last year, with ILO support, played a great role in increasing the number of women entrepreneurs in Azerbaijan. We aim to continue to work on the involvement of women, especially young women, in entrepreneurial activity, and increase their business knowledge and skills, and of course here we rely on ILO support.

As a whole, youth employment is a very important issue. Thus, the Confederation intends to continue its "Know about business" and "Start and improve your business" programmes as part of the implementation of the National Employment Strategy, including the development and approval of the National Action Plan on Youth Employment. These programmes enable young people to obtain business knowledge and skills, and to be trained for entrepreneurial activity.

Another important problem reflected in the Decent Work Country Programme is the elimination of child labour which remains a key element of the Confederation's activity. We now are successfully implementing the ILO ACT/EMP project on strengthening the role of employers in the elimination of child labour in agriculture. The Confederation has started to implement one more project with ILO support, on the social impact of HIV/AIDS in the workplace. The project's target sectors include transport, hotels and tourism.

In his Report, the Director-General touched upon wage squeeze problems, which in our country in most cases occur in the informal economy. Now is just the time to highlight this issue. The National Confederation of Employers' Organizations of Azerbaijan has developed a proposal to move from

an informal economy to a formal economy. I believe we'll greatly support the State and society as a whole through implementation of this project.

A State programme for 2007–10 was approved by Presidential decree on 15 May 2007 for the implementation of The State Employment Strategy.

In Conclusion, I would like to stress the Confederation's wish to strengthen cooperation with the ILO to support the implementation of the above-mentioned programmes, and, thus, support successful implementation of policies for the social and economic development of the country. Within this cooperation, I kindly ask the ILO, IOE and other international organizations, and employers' organizations of developed countries to support the National Confederation of Employers' Organizations of Azerbaijan in implementing its useful project proposals on increasing the business knowledge and skills of young women; occupational health and safety, informal to formal economy transition, employability of disabled persons, and the application of international labour standards at workplaces where it would be useful for national employers' organizations to benefit from the experience of transnational companies in order to make us of international social experience in Azerbaijan.

Once more, I express my deep gratitude and respect to the participants of 96th Session of the International Labour Conference and wish the Conference every success.

---

Sra. MONCADA GODOY (*Secretaria de Estado en los Despachos de Trabajo y Seguridad Social, Honduras*)

Señor Presidente, señoras y señores. La República de Honduras, como parte de la región Centroamericana, se hace presente en esta 96.ª reunión de la Conferencia Internacional del Trabajo, con dos propósitos.

El primero, expresar al Consejo de Administración y al señor Director nuestra aceptación de los retos, oportunidades y responsabilidades para promover de manera eficaz el Programa de Trabajo Decente.

El segundo, compartir en buena parte algunas reflexiones contenidas también en la Memoria, tales como que el sistema internacional, con inclusión de la OIT, aún no ha desarrollado sinergias fuertes entre la sostenibilidad social, medioambiental y económica; que no hay estrategias que integren las tres dimensiones mencionadas y, por lo tanto, no se experimentan avances reales en cuanto al desarrollo sostenible; y que falta desarrollar formas de cooperación entre el Gobierno, la empresa y la sociedad que aseguren la mejor calidad de vida.

Estas reflexiones son un verdadero marco dentro del cual aún no estoy segura si tienen cabida los rostros de tristeza, de angustia y de dolor, pero a la vez de fe y de esperanza, de millones de hombres, mujeres, niños y niñas que este mismo día no tienen qué comer y que no entienden de OIT ni de la existencia de 7.500 instrumentos de ratificación, ni de globalización, ni de mercados, ni de desarrollo sostenible, ni de mundialización, ni de trabajo decente.

Es un compromiso moral y ético de nuestros Gobiernos, del sector empleador y trabajador, y de la sociedad en general, reconocer el nivel de responsabilidad que a cada uno corresponde, frente a la situación de pobreza que abate nuestros pueblos, y, partiendo de ello, trabajar fuerte, trabajar de verdad, sin doble cara y sin doble discurso, en la construc-

ción de un Estado de bienestar eficaz y de un tripartismo dinámico, como se expresa en el Informe.

Señoras y señores, trabajemos en consenso. OIT, ayúdenos a que el instrumento del diálogo social nos permita construir ese consenso, pero a favor de los más necesitados. No hay nada por inventar. Su Memoria, señor Director, es lúcida, pero, ¿cómo hacer para materializarla en acciones en beneficio de las mayorías sin oportunidad?

¿Cómo desarrollar esas nuevas estrategias políticas y técnicas, que permitan a la OIT incidir con efectividad y con urgencia, para que dentro de 10 ó 20 años no tengamos que reconocer nuevamente que estamos atrasados en el cumplimiento de los programas establecidos?

¿Cómo emplear a la población que no posee una educación básica?

¿Cómo emplear a la cantidad de emigrantes que a diario son deportados?

¿Qué estrategias adoptar para que sean apoyadas por las organizaciones sindicales y el sector privado, a fin de impulsar programas masivos de formación profesional?

Y, finalmente, ¿cómo continuar manteniendo la fe y la esperanza de millones de gentes que, aunque no están conformes con la democracia, porque no ha resuelto su problema de empleo, continúan creyendo en ella?

Sin duda, el reto para todos es enorme, y desborda las capacidades de los ministerios de trabajo, cuyos ministros debemos cumplir un nuevo rol, como embajadores plenipotenciarios e itinerantes en el mundo del trabajo decente para un desarrollo sostenible.

Nuestro Gobierno impulsa cambios importantes que, sin duda, no son suficientes para revertir las cifras de la pobreza, pero sí para demostrar que, si hay compromiso, es posible su disminución.

Empleadores y trabajadores, siguiendo la recomendación del Grupo de Alto Nivel, con voluntad y compromiso les invito a unirnos todos en la acción.

---

Ms. ROUNDS GANILAU (*Minister for Labour, Industrial Relations, Tourism and Environment, Fiji*)

I am very honoured to be here and I extend to the President the congratulations of the Fiji delegation on his efficiency in presiding over this august Conference.

The Government and people of Fiji also extend congratulations to the Director-General, Mr. Juan Somavia, for his visionary leadership and to his staff, both here and in Fiji, for challenging us to implement our Decent Work Agenda, towards fair globalization.

The challenge of realizing fair globalization is particularly demanding for all small island States in the Pacific, including Fiji. Our small and vulnerable economies with evolving social and political systems continue to grapple with modern realities and, coupled with the adverse effects of climate change, Pacific island States are increasingly facing immense pressure from globalization at the enterprise, industry, national, regional and international levels.

These complex challenges demand concerted efforts with a common decent work vision by social partners at all different levels of engagement, from the shop floor right through to the international level, so that the political will of our Government at the national level will make decent work a reality. Because of our limited resources and the skewed

landscapes of regional and international trade, it is obvious that we urgently need effective and fair interventionist policies and partnership programmes and projects to give impetus to our national decent work efforts not only within Fiji, but also within the member countries of the Pacific.

Despite these daunting challenges stacked against us, the interim Government of Fiji has made significant progress towards our decent work journey and is fully committed to honouring all its international obligations to the ILO. This is reflected in the recent approval of Fiji's new Employment Relations Law by the interim Government earlier this year, to be effective from 1 October 2007. This enabling labour law finally brings Fiji's employment policy and legislation into compliance with the eight core ILO Conventions and 18 other Conventions, which means that Fiji is now complying with the provisions of the 26 ILO Conventions it has ratified.

This new enabling legislation, which is the basis of Fiji's labour reform, was the result of very extensive and intensive social dialogue among the tripartite social partners, including NGOs, various agencies and the general public, with the guidance of the ILO over the last 10 years. We intend also to establish a national tripartite forum to improve the effectiveness of our social dialogue.

We see for the first time fully paid maternity leave and the introduction of the concept of equal employment opportunities. The new law recognizes sexual harassment as a special form of gender discrimination and the tripartite partners have successfully developed and endorsed a national policy on the prevention of sexual harassment in the workplace and Fiji's first national workplace code of practice on HIV/AIDS.

We see the Equal Remuneration Convention, 1951 (No. 100), and the Discrimination (Employment and Occupation) Convention, 1958 (No. 111), as the primary focus on the relationship between employers and workers in the enterprise. When the fundamental rights of equal remuneration and non-discrimination are observed, other equitable issues automatically fall into place. This is also reflected in the Declaration of Philadelphia. In Fiji, implementation of the policies of equality and non-discrimination is also guaranteed by our national Constitution, which contains a general equality provision pursuant to which all citizens shall be treated equally, including the mentally and physically challenged of our community. We are conscious of the effect of globalization, especially the linking of the economic and social activities of nations through the advancement of technology.

The delegation of Fiji welcomes the discussion on work in the fishing sector and the decision of the Governing Body to revise the seven existing ILO standards concerning fishing. Although small in size, Fiji is a maritime nation and our people are engaged in the fishing sector both locally and overseas, so it is important that standards are developed to protect our workers against the dangers of the new work arrangements, particularly the safeguards needed when workers are engaged in the territorial waters of foreign countries vis-à-vis the right of repatriation when contracts are completed, or in the case of emergency. What happens to our people is a major concern, and we look forward to the adoption of a Convention supplemented by a Recommendation to address the plight of all workers in the fishing industry.

We are particularly interested in the promotion of sustainable enterprises, in observing what form labour management relations will take and in how the development of new technologies will affect the formal and informal sectors. We would like to know how to develop appropriate and facilitating legal frameworks and public policies to stimulate and support the sustainable growth of enterprises, especially those run by women entrepreneurs, and their transition from the informal to the formal economy. Our new national service scheme will facilitate this. We now have new public policies entrenched under the Employment Relations Law that will dissuade private enterprises from using the informal economy as a dumping ground for exploitation, especially for women home workers, the service sector and child labour.

My Ministry also administers and enforces the occupational health and safety legislation which has offered protection to workers in the informal economy since 1996, when our reformed occupational health and safety laws and practice came into effect, and we are currently overhauling our workers' compensation system.

The Report of the Committee of Experts on the Application of Conventions and Recommendations does not cite my country for failing to comply with its reporting obligations. We have now come a long way towards full compliance, and the ILO will agree that we have greatly reduced our reporting deficit. In this regard, I commend our workers' and employers' organizations for their commitment and engagement.

We are now going through a very important phase in our history, a transition period with the leadership of the interim Government, with our economy trying to come to terms with global changes, threats made by our neighbouring countries and the offer of foreign aid with difficult conditions attached. But we continue to move forward in hope.

In conclusion, I extend to you all the best wishes of the delegations of Fiji and the Pacific Islands, and which you a safe journey home.

---

*Original Arabic: Mr. MAATOUG (Secretary of the General People's Committee for Workforce, Training and Employment, Libyan Arab Jamahiriya)*

---

I would like to express my thanks and appreciation to the Director-General for the excellent work he has done to improve the performance of this Organization in all fields.

This session of the Conference is extremely important because it touches upon issues which affect people's daily lives and plays a part in meeting the objectives and the requirements of development. There is a wide gap between the rich and the poor, and the gap between the developed and the developing world is growing, threatening prosperity, security, peace and stability.

The global environment is deteriorating, and the challenges are further exacerbated by globalization, the interdependence of markets, movement of capital and increasing global investment flows, which bring new challenges and new opportunities to labour markets. All of these aspects call for more dialogue and cooperation among civilizations and peoples of the world, irrespective of race, religion, language, culture or tradition.

The Jamahiriya is concerned to achieve development in Africa. It calls on the ILO to play a greater role in advancing the development process in Africa

so as to bring about a substantial increase in decent work opportunities for African women and men.

In this regard, the decent work programme implemented by the Organization in Africa for the period 2007-2015 sets a number of ambitious objectives for the tripartite constituents of the Organization and the Regional Office for Africa with a view to developing decent work programmes and promoting cooperation with the partner agencies to speed up progress and meet the international development objectives which have been agreed upon, including the Millennium Development Goals.

The efforts of the Jamahiriya in the area of decent work and poverty reduction are not limited to providing jobs to its citizens, women and men, and young people in particular, by encouraging them to set up small and medium-sized collective enterprises, by stimulating private initiatives through loans on easy terms and streamlining the formalities required for setting up businesses and construction. It also allows its citizens to recruit and train African workers through legislation which makes it easier for them to enter and reside in the country to work in a regulated and defined environment. This is why we have set up a committee to develop a national programme to address the problems of jobseekers through a methodological approach to determine the scope and causes of the problem, as well as strategic proposals and practical policies, programmes and methods of implementation necessary to ensure decent work.

The Jamahiriya has ratified all of the international charters and Conventions in the field of human rights. It was one of the first countries to commit itself to the fundamental principles and rights at work. The legislation in force in the Jamahiriya grants all its citizens and residents the right to freedom to work, in accordance with international labour standards. I would like to clarify the situation and concept of immigrant labour in the Jamahiriya. Contracts are concluded with workers abroad according to employers' needs to make up for the lack of Libyan labour. In other words, immigrant workers are employed under fixed-term contracts in accordance with the Labour Code, No. 58 of 1970.

Arab labour conventions adopted by the Arab Labour Organization regulate freedom of labour and movement of Arab workers between countries. Decisions have been taken by the Labour and Social Affairs Commission of the African Union on the movement of labour within African Union member States. Other countries have concluded bilateral agreements with the Jamahiriya on the employment of labour. We would like to point out that the Jamahiriya bears the burden of protecting general security and the security of our borders and dealing with organized crime and drug trafficking resulting from illegal migrant labour, which in some cases uses the Jamahiriya as a transit point to enter Europe. Despite cooperation with certain States to regulate labour flows and reduce the impact of illegal immigration, more than six months have elapsed without any tangible results. That is why we would like to announce that the Jamahiriya is going to begin strictly regulating immigrant labour to ensure that the numbers and kinds of workers match labour market requirements and that recruitment is based on fixed-term contracts drawn up in accordance with the Libyan Labour Code, which is in conformity with all the international labour charters and Conventions adopted by this Organization and the

relevant regulation. This will take effect as of 1 July this year.

All the countries involved in the struggle against clandestine immigration should unite in their efforts to set up development projects in countries of origin so as to provide jobs and regular incomes to the citizens of those countries, which would limit the negative impact of clandestine immigration for countries of origin, destination countries and transit countries.

I would like to broach the issue of the human tragedy affecting hundreds of Libyan children who were injected with the HIV/AIDS virus and known as the case of the Bulgarian nurses. We have unfortunately noted information campaigns and political pressure in favour of one of the parties to the detriment of the party that suffered the damage.

It is regrettable that certain States are pursuing a campaign on behalf of the accused while they ignore the human tragedy of innocent children and their families. One or more of these children dies every day, for the crime was perpetrated against over 400 children. This is an ignominious crime affecting innocent children, and is more serious than any other comparable crime as its effects are felt daily, since the disease does not kill immediately, but slowly, increasing the suffering of the victims and their families. Instead of going to school these children are in hospital.

The Jamahiriya affirms the need to step up efforts to promote cooperation in favour of Palestinian workers. It is deeply saddened and appalled by what is happening in the occupied Palestinian territories and the practices of the occupying forces, such as killings and blatant violations of human rights.

Plans for a settlement based on imposing the status quo will not solve the problem of Palestine and will not secure peace in the region. The only solution is to guarantee the return of all Palestinian refugees to their lands and the establishment of a democratic State on the historic lands of Palestine, in which Arabs and Jews live on an equal footing, as it says in the White Book.

---

Mr. TARTAGLIA (*Worker, Italy*)

The Global Report, *Equality at work: Tackling the challenges*, shows that, despite certain steps forward, inequality and discrimination in the workplace remain widespread. Women still have to manage two occupations (an often precarious job and work in the home) and almost always remain far from the wage levels achieved by their male colleagues, even in jobs of equal value. Other forms of inequality add to the "historical" discrimination; one of these is precariousness of employment contracts. Informal jobs are still the main reason for working poverty, all too often below the sustainability threshold in developing countries, and are increasingly widespread among the younger generation in industrialized countries. The first victims of the new and increasing discrimination are migrant workers, especially women, who are often pushed into an illegal status by repressive – if not xenophobic – laws, and remain far from achieving equal treatment even in those few cases in which the laws do not discriminate.

While the fair globalization proposed in the 2004 report of the World Commission on the Social Dimension of Globalization has enjoyed a wide consensus and has received many institutional acknowledgments, it is hardly practised in reality, as

shown by the global growth of inequality both within and between countries.

As yet, there has been no deep change in the actions of the World Bank, the International Monetary Fund (IMF), and the World Trade Organization (WTO), and neither has there been an increase of democracy and transparency in their decision-making processes, as would be required to implement this social dimension, to give priority to the Decent Work Agenda and to make a real contribution to fighting poverty. On the contrary, in developing countries, these institutions almost always develop economic policies that sacrifice any investment in social services, health care, education, housing and workers' rights to the freedom of the markets, especially financial markets.

The European Union itself, which should indeed act as a positive example of development focused on rights and welfare, is failing to give sufficient impetus to the best part of its social and labour policies and, through its economic partnership agreements with the African, Caribbean and Pacific countries, is actually denying the labour rights defined in the ILO Declaration on Fundamental Principles and Rights at Work, which are a key element for partner country development quality.

Therefore, the role of the ILO should be strengthened within a reformed United Nations structure. The tripartite structure of the ILO and its regulatory character remain essential in ensuring that all core labour standards and the decent work concept will become a priority in all the decisions and policies adopted by international organizations. Strengthening technical cooperation and increasing the role of training and of the Turin Centre will support a tripartite agency that must continue to define, implement and monitor universal labour rules.

This monitoring process is a duty for the ILO in countries where the violations of workers' rights are most serious. Therefore, we express our deep concern for the position of the Employers' group, which has refused to discuss the Colombian case. We express the warmest solidarity to the Colombian trade union movement, which is still facing repression, threats and killings.

Establishing consistency between international institutions and individual government policies is the first step towards a greater efficacy of the tools that the ILO can and should make available for the implementation of the Decent Work Agenda worldwide. Richer countries should be accountable for the enforcement of the guidelines defined at the World Summit on Sustainable Development and of the Kyoto Protocol and for allocating 0.7 per cent of GDP to cooperation with poorer countries. At the halfway point, we cannot accept being so far from achieving the Millennium Development Goals, while the most powerful States are multiplying their military expenditure and addressing the serious problems of mankind by resorting to war, which we hoped was – and still want to be – ultimately banned for all people.

There should be more pressure on the governments of leading countries (China for one, but also the United States, Brazil and India) that have not yet adopted the Conventions on freedom of association and collective bargaining. The ILO Tripartite Declaration of Principles concerning Multinational Enterprises and Social Policy and the Guidelines of the Organisation for Economic Co-operation and Development (OECD) for Multinational Enterprises

should become standard tools of economic intervention with sustainable enterprises in any country, as economic and production activities should always be based on respecting labour rights, and indeed all human rights.

Entrepreneurs, apparently committed to corporate social responsibility, should also be more consistent. The spread of unilateral ethical codes seems rather to follow a marketing rationale than a true acceptance of social and environmental rights. It must clearly be said that there is no social responsibility if an enterprise refuses to negotiate with free and representative union organizations. Social responsibility, based on the principles to be set forth by the ILO, is an addition to, and not a substitute for, the existing provisions of law.

---

Mr. PAPIEV (*Government, Ukraine*)

Please allow me on behalf of the delegation of Ukraine to greet you at the 96th Session of the International Labour Conference and to wish you every success in completing your work.

As far as Ukraine is concerned, the cooperation of the International Labour Organization, and indeed the whole of the United Nations system, is of particular importance at the present time.

This is not just connected with the fact the Ukrainian State at the present time is in a state of transformation, going through problematic processes of political development, but also that Ukraine is experiencing all the contradictory tendencies of globalization.

The Government of Ukraine shares and supports the practical activities of the International Labour Organization, bringing about sustainable economic and social development on the basis of extending the potential of decent work on the basis of the improvement of quality of life and strengthening the principles and mechanism of social dialogue. Globalization must bring greater opportunities for providing for social justice and equality.

Decent work must be not just a universal concept but also the reality of life and a target which is so realistic to achieve. We fully agree with what has been stated in the Report of the Director-General concerning the need for a carefully balanced approach to sustainable development and to take account of social, economic and environmental components in close cooperation with the social partners, and with the support of the ILO, the Government of Ukraine has defined decent work as the most important priority of State social policy and has fully subscribed to the Decent Work Agenda.

We believe that it is a very complicated task, but we would also like to emphasize the fact that the Government, President and authorities have no alternative. The priority since the beginning of the Government's activities has been to provide for growth in employment and a reduction in unemployment, growth of income and in particular improvement of wages and social benefits.

Positive trends on the labour market, which we have seen over the last few years, have been further strengthened in 2006 and subsequent years. The results of the monitoring carried out by Ukraine with the active participation of the ILO have shown that we are seeing a considerable improvement in employment, in particular with regard to young people and the disabled. Unemployment has gone down by 6.8 per cent of the economically active population, aged 15–70. It is also positive that there

are far fewer people who have completely lost the hope of finding a job. We have seen a continual growth in wages and particularly in the minimum wage and average wages, and also in the public sector. This has made it possible to considerably increase social security benefits, in particular pensions.

An important aspect of improving the social protection of our citizens is the social security system and services which are being improved on an annual basis. I can give you a few examples of this. The Government, with the active participation of the social partners, has prepared a draft law on flat-rate contributions to the obligatory national insurance system. The introduction of a flat-rate contribution has made it possible to improve the resources flowing into the funds, target allocations of benefits, and increase these benefits.

We have also introduced State benefits with regard to medical insurance and accumulative pension funds. This all comes under the general State development measures in Ukraine for particular categories of the population, particularly those who are physically and mentally disabled and those with learning difficulties. This category of the population will be under the obligatory State social security system from 2011, after a period of transition.

I would also like to say that in Ukraine, with the support of the ILO in carrying out a national social and economic policy, we are expanding cooperation with the social partners on the basis of the principles of social dialogue. We have a draft law on social dialogue which is extremely important; it is going through the Upper National Council in Ukraine in its first reading. The draft law aims to further promote relations between the State, the employers and the trade unions, that is the promotion of social dialogue.

Owing to the positive results which have been achieved in a relatively short time by the present Government, we certainly feel that it is extremely important to focus not only on the joint efforts to be made by the social partners, but also on resources and international technical assistance which could be given by many organizations, including the ILO.

We have to deal with problems of poverty and manifestations of discrimination in the labour sphere, and the informal sector, particularly in the agriculture sector, and improve the skills of our workforce. Ukraine also needs to improve its pension system, and we have not yet managed to draw up bilateral agreements with other countries concerning our migrants, their social benefits and their employment.

We would like to express our gratitude to the ILO for its support and cooperation, particularly with regard to all the aspects highlighted in the Report of the Director-General.

---

Mr. POTTER (*Employer, United States*)

Sustainable development, the need to balance economic, social and environmental priorities, cannot occur unless there are sustainable businesses. Enterprises are the primary source of jobs, and small and medium-sized businesses have the greatest needs.

An economic and labour environment is required that facilitates increasing the rate of economic and productivity growth. Enterprise development is a fundamental means of combating poverty, worker dislocation, and raising the standard of living of

workers. This requires an economic environment which provides clear incentives to enterprises for investment and job creation. At the same time, it requires social policies and institutions which facilitate labour market mobility and flexibility, and promotion systems of worker involvement to raise productivity growth.

Labour market flexibility will be improved in all countries by improving training systems and the employability of workers, encouraging small and medium-sized business development through access to capital markets and improved entrepreneurial and management skills, removing discriminatory barriers to the workplace, reforming the labour market, promoting worker involvement in decisions at the enterprise in workplace levels that enhance job creation, flexibility and security; encouraging research and development and developing tripartite dialogue for employment generation at the national level. The surest sign that national frameworks are failing is the presence of large informal economies. One area that is not mentioned among the major themes of the Director-General's Report is the urgent need to assist member States to better implement and enforce their national labour laws and regulations.

Moreover, a number of other economic, political and legal factors must be present. They include a stable economic, political, legal and social environment, low inflation, low interest rates, coherent macroeconomic policies, stable exchange rates, guarantees of human rights, secure property rights, enforceable contracts, open markets, stable commodity prices, low taxes, currency liberalization and debt reduction.

Labour standards in most countries improve progressively with the rising standard of living which results from development. With respect to ILO standards, it is clear that the considerations that relate to domestic employment policies are equally applicable to ILO standards which, after they are ratified, clearly have an impact at the domestic level.

Like all organizations, the ILO must prioritize its activities and focus its activities on the areas where it has the institutional capabilities and competence needed to provide real solutions. The business community has clearly learned that you need to stick to your knitting.

With regard to the issue of wage and income inequality, this is an issue where we must get the diagnosis right. The Report suggests that increasing inequality is caused by global trade. In my own country, income inequality in the United States can be attributed to premiums on higher education, dual-earner households, changes in household structures, longer hours of work among higher-income workers and pay structures that are tied to individual performance. The lowest 20 per cent of incomes in the United States reflects substantial numbers of single person-headed households, failure to achieve a high-school education and lack of participation in the labour market.

Finally, on the issue of modernizing governance structures, under which we include labour statistics and social security systems, we believe that the most pressing work needs to be undertaken at the local and national levels. Aside from being better able to reflect national priorities, this bottom-up approach has the added benefit of bringing immedi-

ate resources and attention to bear on issues that directly affect the lives of working men and women.

*Ms. TZOTZE-LANARA (Worker, Greece)*

We firstly congratulate the Director-General for the achievement and the work reflected in the Reports presented to this Conference. We also commend the blend of humanity, social concern and insight that, in the presentation of the Report, underpin the Director-General's analysis of the key challenges surrounding the Decent Work Agenda in today's complex global context.

Decent work, linked this year to the concept of broad sustainability and equality and equipped with the necessary policy tools and operative alliances, can become more than just an agenda; it can present us with a vision.

At the same time, the six key challenges highlight the impediments that stand between us and this vision of social justice, equality, and sustainable development in the context of a human globalization. They provide cause for grave concern.

Against the backdrop of widening inequalities within and across countries, dominant patterns of growth favour the better off rather than the poor. As corporate profits explode, millionaires steadily multiply but poverty spreads out along with precarious work conditions and exploitation.

Europe, one of the world's richest regions, is not immune at all with above average poverty rates for children at 20 per cent, and for the elderly at 18 per cent. Severe and persistent discrimination at work seems to fuel this vicious circle of poverty and social exclusion.

In this context, we welcome the timely reiteration that, for the ILO, labour is not a commodity.

We equally welcome the reiteration of the ILO Constitution that "injustice, hardship and privation to large numbers of people" ultimately imperils "the peace and harmony of the world".

Indeed, a deficit in social justice ultimately puts peace in danger. It potentially breeds armed conflict, violence and senseless bloodshed, as it did in Palestine, in Iraq, and wherever else in the world intolerance, arrogance and greed prevail over civilization and peaceful coexistence in a way that is morally, politically and historically unacceptable.

It is equally unacceptable that arrogance and greed also combine to destroy the world's natural resources in a way which ultimately deprives mankind of sustainable development, of a coherent future.

In this grim landscape, there is a way to assure mankind of a coherent future. Tripartism and social dialogue can foster and motivate effective balanced policies. This, however, cannot be achieved in a system that, as the Report correctly assesses, is based on a fundamental flaw: on the belief that markets can replace public policy in balancing economic, social and environmental needs.

Tripartism cannot exist if the labour constituent is destabilized. The wage squeeze and the decline of the labour income share in gross domestic products (GDPs) are all the more alarming when across the globe we are increasingly confronted with aggressive, anti-union behaviour in the service of reducing wages and benefits and violating labour rights.

Trade unionists are murdered in cold blood in many countries, like Colombia, that, in a truly inconceivable way, was left out of our deliberations this year.

In my country, Greece, too, an attempt to dismantle a functioning industrial relations system is regrettably evolving. Successive legislation has unilaterally restricted the collective agreements scope as illustrated by the case of the bank employees' pension funds.

Only last May, the Committee on Freedom of Association requested the Government cease all interference with the collective agreements by which the supplementary pension funds of bank employees were set up, and recommended consultations.

Even more deplorably, and relating to the Director-General's remarks about high-risk investments, a blatant example of what we call "casino capitalism" is under way shaking the foundations of our social security system.

While pension reform is very much in the open, huge amounts of public pension fund assets were unscrupulously invested in so-called structured, or leveraged high-risk bonds, causing serious and irrecoverable losses in major pension funds and seriously undermining the future of social security in our country.

So, on a final note, we cannot but applaud the warning of the Director-General in this respect, and voice our mounting concern, together with the international trade union movement, over this new powerful, non-transparent, non-regulated and aggressive financial activity that affects not only workers but constitutes a new global threat to the wider community and to the stability of our system at large.

Decent work and development need sustainable and responsible capital investments, not shadowy firms specializing in aggressive takeovers and asset stripping.

---

*Original Arabic: Mr. AL-SAEDI (Worker, Iraq)*

---

It gives me pleasure and honour to convey to you the greetings of millions of Iraqi workers who stand together proudly in support of their federation, the General Federation of Iraqi Workers. They pin their hopes on the International Labour Conference to give attention to workers and trade unions in Iraq in order to address their situation in the wake of the United States' occupation and its consequences, including widespread unemployment, the prevalence of child labour, the closure of thousands of factories, deteriorations in the economic, health and social situation, an increase organized crime and terrorist acts which have caused the deaths of many innocent people. A large number of labour leaders have also been killed, threatened or displaced. In this context, United States forces stormed the headquarters of the General Federation in April 2007, and destroyed equipment, files and assets, for no reason. This ignominious conduct contradicts the inviolability of trade union organizations and human rights.

The workers of Iraq constitute an effective power in Iraqi society and are resolved to build up their country and resist the policies of globalization and the privatization of oil resources, education, health and services. They contribute to the establishment of the rule of law and support measures to improve infrastructure in all sectors, especially industry agriculture and services, and to create job opportunities in order to reduce unemployment and criminality and lay the foundations of a society in which equality, dignity and justice reign. The workers stand proudly in support of their Federation, but the Fed-

eration is being hampered in its activities by Decision No 8750 of 8 August 2005, which confiscated the assets of association and trade unions.

In spite of this difficult and complicated situation what we see on the ground, and which instils hope in us to look with confidence towards our future, is a close and sound relationship between the three social partners, together with the support of the Ministry of Labour and Social Affairs for our Federation. This is embodied in the participation of workers' representatives in the high national committee for employment, labour inspection committees, the industrial services committee and the executive board of the social security fund. They also take part in studies and research, are involved in the preparation of the labour code and the social security code, and participate in the tripartite consultative committee. These efforts have been crowned by the decision of the Ministry to reopen workers' education centres.

We would like to express our appreciation to the ILO for its dedication to establishing a social framework that guarantees peace, stability and prosperity, which go hand in hand with social justice, for workers as well as employers. We would also like to thank all the international, regional and Arab organizations, which together with cultural institutions have supported the struggle of the Iraqi workers and the Iraqi people.

---

*Mr. GRYSHCENKO (Employer, Ukraine)*

---

Allow me to greet you on behalf of the Ukrainian employers and express our full support for the principles and ideas set out in the Director-General's Report, and also to emphasize the importance of ensuring sustainable development for decent work.

In the context of globalization and increased competition, we are facing new challenges which can only be overcome through a comprehensive approach to sustainable development, combining economic, social and environmental components. In such conditions, it is essential to strike a balance between flexibility and protection, which would ensure both increased enterprise competitiveness and provide firm guarantees for the protection of workers on the labour market.

The development of sustainable enterprises and stable positive indicators reflecting employment and social protection – all these are interdependent and can only be achieved through collective efforts at the national and global levels. Here the ILO has an important consolidating role to play, with its unique tripartite structure which can determine the level of convergence between state policy and market mechanisms needed to provide the necessary balance for sustainable development.

One priority task for the Ukrainian employers is the improvement of the legislative framework governing the labour market. The tripartite groups are actively working on adjusting legislation and social dialogue institutions to the changing structures of the market, first of all, with a view to securing full compliance with fundamental principles and rights at work. This is evidenced by our new Act on social dialogue, which is the outcome of joint efforts and contains innovative solutions for the labour market and the Ukrainian economy.

We have received considerable support in our efforts from the ILO and its experts. We would like to thank the ILO for the very high level of expert assistance provided towards solving these problems.

The focus of this session of the Conference is on how to achieve decent work together with an efficient and stable economy and sustainable enterprises.

Accordingly, while welcoming this approach and the work being done by the ILO and the Conference on the whole, we would like to draw your attention to the need to strengthen the role of social dialogue. We would emphasize the fact that only strong employers' organizations that are politically neutral, independent and democratic can be responsible and reliable partners.

One can hardly overestimate the role of the IOE and the ILO in these processes.

A real process of democratization of Ukrainian society is evidenced by the results of the Third Congress of the Federation of Employers of Ukraine, the biggest employers' organization in our country. I would like to tell you that the decisions taken by that Congress have depoliticized the Federation of Employers of Ukraine, making it a truly democratic organization based on the principles of the ILO and the IOE.

Unfortunately, however, there is still a risk of outside interference in this process.

We would like to express the hope that legal recognition of the democratic principles adopted at our Congress will be obtained soon.

We would like to thank Mr. Juan Somavia and the ILO for all the support you have given us in these recent endeavours.

---

Ms. HARRE (*Worker, New Zealand*)

---

I will begin my contribution this morning with a short traditional Maori greeting that acknowledges the diversity and unity of those in this room.

E nga iwi

E nga reo

e nga karangatanga maha o nga hau e wha

Tena koutou, tena koutou, tena koutou tatou katoa

My job here is to respond on behalf of New Zealand workers to the Director-General's Report to the Conference. We appreciate the forthright way in which he has exposed shortcomings in progress towards social, environmental and economic sustainability. We agree that by handing much of its responsibility to the free market, the policy establishment has facilitated the transfer of wealth from workers to owners and greater income inequality within and between countries.

Constraining the exercise of property rights, including the rights of owners of capital, is a fundamental role of public policy and also a central purpose of this Organization. That is what labour standards do.

Last century's pact between business and labour enabled economic development in the Western industrialized countries through long-term private investment, public investment in social and physical infrastructure, and the welfare state. But agreements were only reached because workers were organized industrially and politically. Securing an environment for growth required employers to reach agreement with a confident and organized international workers' movement.

Thus, the values underpinning the foundation of the ILO, expressed in the cornerstones of social dialogue and collective bargaining, were necessary conditions for the Western development model last century. Yet, today's prevailing economic model

generally treats those values as obstacles, rather than assets.

In his Report the Director-General makes a strong business case for international labour standards as a development imperative. However, a renewed commitment by ILO constituents, and in particular those who contravene its basic tenets, requires our intellectual belief in the importance of labour standards, social dialogue and collective bargaining to be demonstrated in practical terms. That, in turn, requires much more support for workers' collective organization.

We want an equal voice at the workplace, industry and national policy-making levels, as well as in this Organization. Labour market deregulation in New Zealand in the 1990s has had a sustained negative impact on workers' power at the workplace level. This problem remains despite industrial relations law reform based on the promotion of collective bargaining and improved workplace organizing rights.

Decent jobs in the manufacturing sector have increasingly been replaced with precarious, low-paid jobs in a growing domestic services sector – including in the areas previously dominated by the unpaid work of women, like caring for our elders. To restore and improve on the decent work won through industrial and political struggles last century, in New Zealand we will have to overcome three related obstacles.

First, the limitations of enterprise-based collective bargaining. With more workers employed by companies that compete viciously for market share in the domestic services sector, we need to extend collective bargaining to whole industries.

Second, and despite the organizing rights provided by law, the diminished capacity of unions to reach out to the vast majority of workers in the private sector who are neither union members nor covered by collective agreements.

And thirdly, the continuing hostility of employers to unionization and collective bargaining.

A genuine tripartite commitment to decent work, underpinned by social dialogue and collective bargaining, will assist us in overcoming these obstacles. Indeed, by virtue of our presence here each of the constituent groups in the ILO has taken on a duty to do just that:

- government, through its regulatory, public sector employment and service procurement roles;
- employers' organizations, by building support for worker participation and helping overcome resistance to collective bargaining among their members;
- unions, by reaching beyond the traditional industrial workforce and sharing our resources to organize the new workforce in today's industries and across the globe;
- and the ILO, by promoting worker participation and helping to build the capacity of workers to engage in all relevant forums.

We particularly hope that governments will accept the challenge put down here in this Conference by the President of Chile to demonstrate commitment to the ILO principles by actively rebuilding union capacity and influence. The ILO commitment to social justice is timeless. However, history tells us that building the power of workers to organize is the best tool we have for achieving this ideal.

I would first of all like to thank and congratulate the Director-General for the quality of his Report, which takes up the major challenges of tripartism and social dialogue involved in promoting decent work for sustainable development.

I would not need to go into the details of the Report, for the Report has vividly affirmed all the pertinent issues and the major challenges facing us all in relation to tripartism and social dialogue. We believe that we need to demonstrate our readiness to meet the challenges, being hand-in-hand with advancing the Decent Work Agenda, effectively in harmony with our country-specific decent work programmes and in alignment with the guidance and support of the ILO by: facing strategically the threat posed by globalization to a balanced and sustainable development; facing knowledgeably the wage squeeze and increasing inequalities that are threatening sustainable development in general and that of African countries in particular; generating timely labour market information that follows the standard labour concepts and definitions, to ensure that labour statistics reflect the real situation of workers more accurately; and introducing the cash-for-work programme as self-targeting basic social assistance to overcome abject poverty.

We do indeed share the conviction expressed in the Report of the Director-General that tripartism and social dialogue can play a central role to achieve fair, productive and competitive market economies that are essential for sustainable national development. Therefore, let me brief you on my country's position concerning this endeavour.

The Eritrean people have played a commendable role in the struggle for independence and nation-building in which prosperity and social justice prevail. I would like to underscore the fact that this active participation of the Eritrean people in the affairs of the nation has been a very significant driving force in promoting socio-economic transformation in the country. Recognizing this fact, my Government is taking the necessary steps towards creating a more favourable ground that would help reinforce its people's endeavours.

In connection with this, my Government established the popular development campaign, which includes multi-sector development programmes which have so far started to register encouraging achievements that would contribute to the improvement of people's standard of living. In this development campaign, tripartite cooperation played a significant role.

Another important initiative undertaken by the Government is the cash-for-work policy, a self-targeting social assistance. After evaluating the negative effects of dependence on food hand-outs, cash-for-work was introduced in 2005 and has been implemented extensively, registering encouraging outcomes.

In terms of human resource development in general and particularly targeting young people and females, several colleges have been opened and are absorbing quite a significant number of the target groups. Their products are expected to partly quench the demand of qualified staff in the different sectors. Similarly, other reinforcement activities are under way in the human resource development area.

Although HIV/AIDS prevalence is low in Eritrea, we are conscious of its effect on the productive force. Thus, to keep our workforce safe, HIV/AIDS at the workplace programmes are initiated jointly at tripartite level.

With the proper implementation of the economic and social development strategies we have at hand, we hope to overcome the manpower requirements of the country and offer decent work and life to all. In order to strengthen the capacity of tripartism cooperation to promote dialogue, we are heading to form a tripartite social dialogue council.

Sustainable development cannot be attained without peace. Therefore, the "no war, no peace" situation in which we are trapped now has become an additional challenge to the challenges mentioned in the Director-General's Report, preventing us from implementing our development plans as we intend.

In conclusion, let me take this opportunity to express my hope that the ILO will inject more supportive energy for the full implementation of the issues raised in the Director-General's Report and by previous speakers, so that it can enhance the efforts of countries towards sustainable development.

---

Mr. SUNMONU (*representative, Organization of African Trade Union Unity*)

---

Let me, on behalf of the Organization of African Trade Union Unity (OATUU), which represents African workers and trade unions of all trade union tendencies, congratulate you and the other members of your bureau on your well deserved election. I also express our appreciation to the Director-General, Ambassador Juan Somavia, for his excellent reader-friendly Report.

Allow me to comment on the theme of the Director-General's Report: *Decent work for sustainable development*. Coming from Africa, I am proud that African Heads of State and Government were the first world leaders to adopt the Decent Work Agenda as the best solution for poverty at their extraordinary Summit in Ouagadougou, Burkina Faso, in September 2004. Since then, the Decent Work Agenda has been universally adopted. What then remains is moving from theory to practice and from rhetoric to action.

The neo-liberal economic paradigm that constitutes the main pillar of globalization today is rightly characterized by the World Commission on the Social Dimension of Globalization as "generating unbalanced outcomes both between and within countries. These global imbalances are morally unacceptable and politically unsustainable". This is because neo-liberalism puts profits before people. Time has therefore come to change to a people-centred economic paradigm that is "morally acceptable and politically sustainable".

In order to have a balanced approach to sustainable development, the Decent Work Agenda has to be linked to the basic needs development agenda which the ILO pioneered in the middle 1970s until it was smothered by the neo-liberal agenda of the International Monetary Fund and the World Bank. These basic needs are: food, shelter (housing), health, education, water, energy, transport either by air, road, rail, sea or river and communications such as radio, television and ICTs, which constitute the parameters of the development or lack thereof, of any society anywhere in the world. They also constitute the main foundation for social and sustainable development.

They also constitute the greatest sources of creating hundreds of millions of decent jobs throughout the world. In addition, they constitute the greatest source of wealth creation for the majority of people in every country of the world. When wealth is created for the majority of the people, poverty disappears. There will also be peace and social and political stability, which are the main pillars of sustainable development.

We therefore call on the ILO to go back to the drawing board and come out with a combined Decent Work Agenda and basic needs development agenda.

Concerning UN reform, we advise that the ILO's tripartite identity and character should, under no circumstances, be compromised. There is also the need to strengthen the ILO's tripartite constituencies, particularly the workers, to enable them to play an effective role in the globalization process.

Our organization and its affiliates received technical and financial support from the ILO Regional Office for Africa, the Bureau for Workers Activities (ACTRAV) and from employment, social protection and social dialogue sectors, for our activities throughout Africa, for which we are grateful to the respective Directors and Executive-Directors. We are also grateful for the support given by the Director-General and his officers to our Guinea trade union leaders during their struggle for good governance, democracy and accountability in Guinea.

We call for the strengthening of the capacity of African workers and trade unions in the following areas: workers' education, cooperatives, gender mainstreaming, youth employment, international labour standards, occupational safety and health, social security, social dialogue and strengthening of tripartism.

Please permit me to congratulate the Director-General for his Report: *The situation of workers of the occupied Arab territories*. An impartial reading of the well-documented report will lead one to the inescapable conclusion that the treatment of the Palestinian workers and peoples by the Israeli occupation forces amounts to genocide of the Palestinian people. The OATUU therefore calls for the unconditional withdrawal of Israel from all occupied Palestinian and Arab territories in strict compliance with UN Security Council Resolutions Nos 242, 338, 1397 and 1515. All the Palestinian money illegally seized by the Israeli Government should be unconditionally released to the Palestinian Authority. The daily harassment, ill-treatment and humiliation of the Palestinian people should stop. The international community should resume financial and technical assistance to the Palestinian Authority. The ILO should increase its technical assistance to the Palestinian Authority, workers' and employers' organizations.

The only way peace will return to the Middle East is through justice for the Palestinian people. Israel should therefore withdraw from all occupied Palestinian and Arab lands, including the Syrian Golan Heights, the Lebanese Shebaa farms and East Jerusalem. The State of Palestine, with East Jerusalem as capital should be established and guaranteed by the United Nations, alongside the State of Israel.

---

*Original arabe: M. DJEMAM (représentant, Confédération internationale des syndicats arabes)*

J'aimerais remercier le Directeur général du Bureau international du Travail pour son rapport relatif

au suivi de la Déclaration relative aux principes et droits fondamentaux au travail, rapport qui est extrêmement important et qui nous appelle à travailler de concert, afin de mettre en œuvre toutes les conventions fondamentales en vue de réduire la pauvreté et d'éradiquer le chômage. Ces conventions sont destinées à protéger les droits des travailleurs et à approfondir le dialogue social, qui est l'un des piliers du travail décent, susceptible de garantir la dignité humaine dans les pays arabes.

Le Directeur général a abordé dans son rapport la situation des travailleurs arabes en Palestine et dans les autres territoires arabes occupés, et les souffrances subies par le peuple palestinien sous l'occupation israélienne. Cependant, ce rapport, et malgré le progrès réalisé dans son élaboration, n'a malheureusement pas reflété de façon suffisante les effets destructeurs de la colonisation israélienne et des pratiques inhumaines exercées par celle-ci et qui se manifestent par des assassinats, des déplacements forcés, des arrestations, l'expulsion de travailleurs de leurs lieux de travail et leur appauvrissement, la destruction de leurs maisons, la construction du mur de séparation raciste et le blocus imposé aux civils palestiniens. La politique criminelle appliquée à l'encontre des Palestiniens ne diffère pas de celle utilisée dans le Golan syrien et les fermes libanaises de Sheba où les travailleurs sont exposés aux pires souffrances.

C'est pourquoi nous appelons l'OIT et la communauté internationale dans son ensemble à prendre les mesures nécessaires et pratiques pour soutenir le peuple palestinien, pour qu'il puisse recouvrer sa liberté et sa dignité, lever le blocus qui lui est imposé, l'aider à faire face aux effets de l'occupation israélienne, assurer l'application des décisions internationales ainsi que le retrait total de tous les territoires arabes occupés en Palestine, dans le Golan syrien et dans les fermes libanaises de Sheba. Nous appelons aussi la communauté internationale à déployer des efforts supplémentaires, afin que soit mis un terme à l'occupation anglo-américaine de l'Iraq, afin que le peuple iraquien puisse exercer son droit à l'autodétermination. Nous demandons à l'administration américaine de cesser son ingérence dans les affaires intérieures du Soudan et ses menaces continues à l'encontre de la République arabe syrienne.

Tout en appréciant les efforts déployés par l'OIT pour défendre les libertés et les droits syndicaux, nous regrettons ce qui se passe dans certains pays arabes du Golfe: les gouvernements de l'Arabie saoudite, du Qatar et des Emirats arabes unis pratiquent des violations des droits des travailleurs, tardent à reconnaître le droit d'organisation syndicale et de constituer de véritables organisations de travailleurs, libres, indépendantes et démocratiques. En Arabie saoudite par exemple, les autorités interdisent la constitution de syndicats et privent les travailleurs de l'exercice de toute activité syndicale; les travailleurs étrangers sont exploités de la part des employeurs et de leurs garants, et vivent des situations proches de l'esclavage.

Quant à Bahreïn, le personnel du secteur public est privé de l'exercice du droit syndical et tout travailleur qui exerce une activité syndicale est soumis à des exactions. Le gouvernement interdit encore la grève dans 17 secteurs. Enfin, la loi sur le travail a été élaborée sans consulter les travailleurs.

J'aimerais à cet égard féliciter l'Union générale des travailleurs algériens pour avoir élaboré une

charte économique et sociale qui doit servir d'exemple pour tous les autres pays arabes.

J'aimerais remercier également ACTRAV et le bureau régional de Beyrouth pour leur collaboration fructueuse avec notre mouvement syndical arabe.

Permettez-moi également de féliciter les travailleurs dans le Sultanat d'Oman qui ont pu réaliser des acquis tout à fait louables.

Nous espérons davantage de collaboration technique pour la région arabe et l'extension de l'usage de l'arabe à l'OIT.

---

Mr. KEARNEY (*representative, International Textile, Garment and Leather Workers' Federation*)

---

Were poverty wages, long hours and appalling working conditions the passport to sustainable development, the key textile, clothing and shoe producing countries would be economic and social chart-toppers instead of wallowing in poverty.

Such industries have highlighted, over the past two decades, how exploitative working conditions dehumanize and impoverish workers, their families and communities.

Take Ratnamma. Heavily pregnant she continued working at Shalini Creations, part of Texport Overseas, till the last days of March, fearful of losing her monthly attendance bonus. Already in labour, she had to beg factory managers to let her go home. Only after much hassle and delay did she get permission. No one was allowed to go with her. A few metres from the factory gate she gave birth in the street, cut the umbilical cord herself and struggled home only to find her baby was dead.

Ask Amma, if you could. A few weeks earlier, tired and ill, she too begged to leave Triangle Apparels, part of Gokaldas Exports Limited. She was shouted at, abused and told to resume working. At her wits' end she went to the toilets and hanged herself.

Both factories are in Bangalore, now a powerhouse of India's booming garment industry. Workers there dare not even complain about conditions.

One employer, fibers and fabrics industries, under attack for alleged abusive labour practices, has succeeded in having court-imposed gagging orders applied to its critics, including the trade union representing its workers. Fibers and fabrics industries are making a mockery of labour law, international labour standards and freedom of speech, while the Indian Government stands silently by.

Workers at Hermosa in El Salvador understand the meaning of indecent work and exploitation. After their employer went bust, they were owed US\$850,000 in unpaid wages, benefits and severance. The well-heeled sporting goods brands profiting from sourcing from the factory ignored their plight. Only after extreme pressure did they volunteer a shameful US\$36,000, less than 5 per cent of the amount owed.

In Turkey, workers in the sector slave for low wages with few rights. Less than a fifth are registered, so 3 million textile and garment workers cannot even join a trade union. When workers do organize, as at Metraco in Istanbul, they are harassed by the employer, intimidated by the authorities and fired. Even if they succeed in legal action, they need only be compensated, not reinstated. So employers, at small cost, destroy union organization with impunity, while the Turkish Government stands silently by.

And where is the ILO? Why is it so powerless to help the poorest workers?

Take Workwear Lanka, where 356 lost their jobs when they joined a union and where the Committee on Freedom of Association ruled they should be reinstated. Workwear Lanka still prospers, as does another company, G.P. Garments, who used the same dismissal tactics to rid itself of union organization, firing 518 workers. The Sri Lankan Government stands idly by while these workers remain jobless.

If the ILO is serious about promoting decent work, it must make greater efforts in sectors like textiles, clothing and footwear, concentrate on key issues such as a living wage, working hours, contract labour and how to ensure real freedom of association and collective bargaining. And it must force member governments to apply standards actively.

The payment of a living wage lies at the heart of the ILO Constitution and is embedded in the Declaration of Philadelphia. In practice it is ignored. In most countries, the legal minimum wage is a fraction of what a worker needs to live decently. Often it is not increased for years and is treated everywhere as a ceiling, not a floor. Sustainable development is not possible, for wages earned, even after excessive overtime, do not reach subsistence level. First area for stronger ILO global action.

Poverty level wages force workers and their families to work excessive hours. Recently, garment workers in Sri Lanka have had to work around the clock and twelve-year-olds in China, producing Beijing Olympic goods, are working 15 hours a day, seven days a week. Being worked to death is not the route to sustainable development. Second area for stronger ILO action.

Short-term contracts and contract labour bedevil the sector in countries like Cambodia. Without job security, workers are defenceless, fired if they even think of organizing and cheated of the benefits that go with permanent employment. Rootless work is not the route to sustainable development. Third area for stronger ILO action.

The key to decent work lies in the ability of workers to act together and to bargain with their employer. But, the exercise of these rights becomes more and more difficult. Daily workers who try to organize or oppose exploitative employers are fired, blacklisted and denied the right to ever work again. Those trying to bargain are harassed and intimidated and forced out of workplaces as workers at TOS, part of Hanes Brands, in the Dominican Republic, have recently discovered. Neutering workers is not the route to sustainable development. Fourth area for stronger ILO global action.

Were governments to shoulder their responsibilities, these excesses would disappear. Unfortunately, lethargy, incompetence or downright corruption paralyse many governments. Laws are enacted, but not enforced. Factory and labour inspectorates shrink. Justice disappears as labour cases languish in the courts for years. Government inertia is not the route to sustainable development. Fifth area for stronger ILO global action.

Sustainable development demands decent work. Decent work demands that governments be energetic in the pursuit of worker rights. Universal worker rights demand a sharply focused ILO with a lot more power and influence than today, interacting with other international agencies harnessing globalization, linking global trade and labour standards,

and capable of ensuring that member States do more than pay lip service to key ILO Conventions.

Put simply, the ILO must urgently grow teeth or stop pretending it is the defender of worker rights.

*(The sitting adjourned at 2.15 p.m.)*

## Nineteenth sitting

Thursday, 14 June 2007, 2.40 p.m.

*Presidents: Mr. da Rocha Paranhos, Mr. Barde and Mr. Sulka*

### REPORTS OF THE CHAIRPERSON OF THE GOVERNING BODY AND OF THE DIRECTOR-GENERAL: DISCUSSION (CONC.)

---

The PRESIDENT

---

I declare open the nineteenth sitting of the 96th Session of the International Labour Conference.

We shall now continue the general discussion of the reports of the Chairperson of the Governing Body and of the Director-General.

*The sitting continues with delegates' statements.*

*The transcript of speeches made in a language other than English, French or Spanish is produced in the language chosen by the country concerned for the purpose of official correspondence with the ILO.*

---

M. PIERRE (*travailleur, Haïti*)

---

Haïti, après une longue période de transition, cherche le chemin pouvant conduire le pays vers un Etat de droit.

De l'avis des travailleurs, le gouvernement manifeste une volonté politique, une volonté marquée par les actes suivants: la réalisation de séances de travail avec les syndicats au plus haut sommet de l'Etat sur des questions d'intérêt national. Mais il reste encore à espérer des résultats au bénéfice de la classe des travailleurs.

Dans certains secteurs, le dialogue est établi. Tel est le cas dans le secteur de l'éducation, avec la plate-forme des syndicats d'enseignants.

Les conventions n<sup>os</sup> 138 et 182 relatives au travail des enfants sont ratifiées. Désormais, le nombre de conventions fondamentales ratifiées par Haïti passe de six à huit.

Les conflits éclatant dans la zone franche à Ouanaminthe font l'objet d'une attention soutenue au ministère des Affaires sociales et du Travail.

Le gouvernement, en quête de la création d'emplois, est dévoué dans le cadre de la loi Hope. Cependant, malgré tous ces actes de bonne volonté, qui ne sont d'ailleurs pas suffisants, permettez-moi de saisir l'occasion que m'offre cette tribune pour partager avec vous certaines informations.

A la 95<sup>e</sup> session de la Conférence internationale du Travail, en juin 2006, aucun délégué des travailleurs n'a été désigné.

La Commission tripartite de consultation et d'arbitrage, mise en place en référence à la convention n<sup>o</sup> 144 de l'OIT, n'a pu mener à bien sa mission en raison des moyens financiers limitant son fonc-

tionnement. Un tel comportement du gouvernement a des impacts négatifs sur le dialogue social dans mon pays.

Le Code du travail, vieux de plus d'une vingtaine d'années, fait toujours l'objet de projets de rénovation. La convention n<sup>o</sup> 144 de l'OIT, base de la consultation tripartite, n'a pas fait encore l'objet de ratification.

La corruption qui gangrène les institutions reste encore au stade de débat, de colloque, car les mesures visant à mettre les corrupteurs hors d'état de corrompre tardent encore.

Le chômage et la pauvreté atteignent un niveau record. Le salaire minimum de 70 gourdes, soit 1,9 dollar E.-U., est inacceptable, car les gens à ce niveau sont qualifiés comme des gens pauvres.

Certains employeurs profitent de la faiblesse de la législation haïtienne pour exploiter les travailleurs. Un patron qui ne paie que 90 gourdes, soit 2,2 dollars E.-U. par jour, a osé déclarer qu'il paie plus que le salaire minimum, alors qu'il ne se situe même pas encore au voisinage d'un salaire décent. Voilà pourquoi il est nécessaire de réviser le salaire minimum et de fixer un minimum réel permettant au travailleur et à la travailleuse de se nourrir, par exemple.

C'est aussi l'occasion pour les travailleurs haïtiens de s'adresser aux différentes délégations et Etats Membres de l'OIT sur la situation des travailleurs migrants. Il n'est pas normal qu'Haïti reçoive ses rapatriés de la mer, des frontières, humiliés, maltraités et parfois morts dans des conditions douteuses. Voilà pourquoi nous demandons aux pays hôtes de réviser leur structure d'accueil, car la mondialisation ne saurait accentuer seulement une concentration de richesses où les pays riches se regroupent pour devenir de plus en plus riches en laissant les pays pauvres croupir dans la misère.

Les tenants de la mondialisation n'ont pas pensé à mettre également l'accent sur les droits économiques et sociaux, notamment le travail décent, et enfin le principe du non-refoulement des travailleurs migrants.

Dans un monde solidaire, les travailleurs ne devraient plus continuer à être victimes des discriminations dans les pays hôtes. C'est pourquoi nous demandons à l'OIT d'intervenir afin de permettre à ces travailleurs d'avoir un statut qui leur garantit la protection et le droit de vivre dans des conditions humaines acceptables par tous.

La République d'Haïti vient de connaître des périodes de crise. Aujourd'hui, elle s'efforce de passer de l'instabilité à la stabilité pour arriver à la paix, une paix qui ne peut être durable sans la re-

construction de l'économie haïtienne. En ce sens, nous demandons à la communauté internationale et aux pays amis d'Haïti d'intervenir par des actes concrets dans le cadre de la coopération et par des investissements capables de générer des flux économiques.

Quant à l'OIT, nous croyons fermement qu'elle ne peut agir seule. Elle doit agir dans le cadre d'une politique coopérante. Voilà pourquoi nous demandons à l'OIT non seulement de renforcer les liens existant entre les Etats Membres, mais encore d'aider les organisations de travailleurs, notamment Haïti, à se renforcer par le biais de la formation, de l'assistance technique et d'autres moyens correspondant à leurs besoins.

Ainsi, la lutte pour le travail décent est une nécessité. A notre avis, l'intégration de cette lutte à l'intérieur de la mondialisation est importante, car elle permettra probablement aux tenants de la mondialisation de réparer ses dégâts et de ne plus continuer.

Le tripartisme est le fondement même de l'OIT. Chaque partie doit assumer ses responsabilités. Quant au gouvernement d'Haïti, c'est l'occasion de comprendre qu'il y a nécessité de renforcer la structure tripartite, car c'est par cette structure que l'on peut arriver à établir un dialogue permanent et constructif, dans l'intérêt de tous.

Nous tenons à réaffirmer que c'est par le dialogue que l'on peut jeter les bases pour le respect des principes fondamentaux au travail représentant à la fois une fin et un moyen. Une fin quand il s'agit des droits de l'homme au travail et qu'à ce titre, ils doivent être respectés, un moyen parce que la jouissance de ces droits est le chemin le plus sûr pour réaliser les progrès pour tous et pour toutes dans les domaines afférents au travail.

---

Mr. THOMPSON (*Minister of State, Bahamas*)

I am especially honoured to have this opportunity to speak on behalf of the Government and people of the Commonwealth of the Bahamas and to outline our national labour agenda within the context of the Report of the Director-General.

This is indeed special to me, Mr. President, as my country has only last month, under our democratic Constitution, held general elections which resulted in the formation of a new Government that appreciates the invaluable contributions to nation building by employers and workers alike.

My Government has committed itself to strengthening and improving labour administration; further strengthening its labour relations through bipartite and tripartite consultation; enhancing and simplifying protocols for trade union recognition; establishing proper and well-organized labour exchanges, where labour market information can be used to measure inter alia decent work deficits; instituting a more effective system for the settlement of disputes between employers and employees; introducing a system of apprenticeship in essential disciplines such as the building trades, motor mechanics, appliance repairs, printing, garment manufacture, and furniture-making; providing incentives for private firms to offer profit-sharing arrangements and share/stock options to their employees; promoting technical and vocational training in the public and private sectors; expanding flexitime in the public sector and encourage its expansion in the private sector; and assisting unions and others in the opera-

tion and management of community centres and day-care facilities for children of working parents.

In his Report submitted to this Conference, the Director-General has, with a sense of urgency, called on all delegates to become keenly aware of the challenges that exist within the context of the Conference agenda – challenges that could threaten to derail all that tripartism and social dialogue have accomplished thus far.

The Bahamas will continue to work with its social partners, as well as our CARICOM brothers and sisters and the subregional directorate of the ILO, to advance the Decent Work Agenda within our region. We shall also network with our partners through the United Nations to underline the critical work of the ILO and the need for the multilateral system to be more effective.

The Bahamas, like several other island nations, is relatively flat. This factor, coupled with our tourism-based economy, places us squarely at the front of the fight for more focus to be given by the industrialized countries to the devastating effects of greenhouse emissions and global warming. We therefore join with our brothers and sisters of the region in calling for a systematic and unified approach to this issue and the already obvious climatic changes that are now occurring.

We therefore applaud the Director-General for his focus and we agree that there needs to be, as a matter of priority, a major research and policy effort on the part of the ILO, in conjunction with other international agencies, to determine the effects of a paradigm shift within the context of work patterns as a direct result of having to move to more sustainable patterns of production and consumption – all in an effort to reverse the current destructive path of global warming.

In closing, let me reiterate my country's call for a unified tripartite approach to advancing the critical work of the ILO and the even more crucial value of social dialogue to this process. The ILO has earned its stripes. The ILO has championed the cause of the marginalized and the downtrodden. The ILO was relevant in 1919 and is even more relevant in 2007.

Long live the social partners! Long live social dialogue! And long live the ILO!

---

*Original arabe: M. EL AZZOUZI (travailleur, Maroc)*

Au nom de la délégation des travailleurs du Maroc et, à travers elle, au nom de tous les travailleurs et travailleuses du Maroc, je suis heureux d'exprimer toute notre considération pour le travail sérieux accompli par le BIT sous la conduite de son Directeur général, et pour le rapport qu'il a présenté à cette Conférence qui constitue le thème principal de l'ordre du jour de cette session. Ce rapport exhaustif et objectif a en fait abordé les formes de discrimination au travail dans toute leur diversité.

La délégation syndicale marocaine approuve le contenu du rapport et les analyses qu'il avance et nous estimons qu'il a mis le doigt sur les causes profondes de la discrimination, qu'il a donné les réponses nécessaires et mis tous les acteurs concernés devant leurs responsabilités. De même qu'il a élaboré les plans d'action requis afin que les mandants s'acquittent de leurs tâches.

L'attention accordée au secteur de la pêche, le rappel de la dimension sociale de la mondialisation ainsi que le fait d'avoir consacré aux entreprises durables et au renforcement des capacités de l'OIT deux commissions principales sont une preuve de la

vision tournée vers l'avenir qui requiert la participation de tous dans les débats afin d'accroître l'efficacité et la bonne gouvernance permettant de relever les défis qui touchent aux droits et acquis des forces actives dans le monde.

Le Maroc connaît actuellement une période transitoire s'orientant vers la consécration des droits de l'homme tels que reconnus internationalement et l'élargissement des libertés publiques, y compris la liberté syndicale et l'élaboration de programmes dont le but est de lutter contre les phénomènes sociaux inquiétants tels que la pauvreté, la marginalisation, le chômage et l'habitat insalubre.

Bien que persistent encore certains abus que nous signalerons plus loin, la situation des travailleurs au Maroc a connu une amélioration, surtout depuis l'approbation du Code du travail et son entrée en vigueur depuis environ trois ans, devenant ainsi la référence légale pour traiter les conflits du travail à travers le dialogue social, que ce soit au niveau du gouvernement ou aux niveaux local, sectoriel ou dans les entreprises privées.

La baisse marquée des conflits de travail, au Maroc, est due en partie à l'élargissement relatif de la liberté syndicale et à l'activation des mécanismes de négociation collective. De même que les syndicats marocains sont devenus un partenaire essentiel dans le traitement des grands dossiers et, notamment, le code de couverture médicale qui englobe maintenant tous les professionnels et les artisans ainsi que l'aide médicale accordée aux pauvres et aux personnes à faible revenu, ou encore tout ce qui concerne la réforme des régimes de retraite destinée à établir un régime juste et équitable pour tous les travailleurs. Je saisis d'ailleurs cette occasion pour appeler le BIT à faire profiter de son expérience le Comité national marocain chargé de réformer les systèmes de retraite.

Ces aspects positifs n'excluent pas la persistance de phénomènes négatifs tels que l'absence d'une institution établie pour le dialogue social. Celui-ci demeure en effet sporadique et ne s'exerce qu'en réponse à des pressions ou à des revendications dans des institutions publiques ou des entreprises privées. De même, l'application des dispositions du Code du travail reste peu satisfaisante, et s'y ajoutent l'absence de réglementation du travail des employés de maison et l'extension du secteur informel.

Malgré l'élargissement des libertés syndicales et du droit d'organisation, il y a encore des violations de ces droits fondamentaux que l'on constate au travers des licenciements et des transferts arbitraires auxquelles recourent certaines entreprises publiques et des branches de multinationales, mais aussi certaines dérives sécuritaires et des violations qui ont touché récemment le droit des centrales syndicales à manifester. De telles violations nous font craindre un recul et un retour en arrière alors que nous avons cru que le travail accompli par la Commission justice et réconciliation allait marquer une rupture entre deux époques.

Nous voudrions ici souligner la réponse positive de notre pays aux effets de la communauté internationale pour mettre fin au conflit du Sahara Occidental.

En ce qui concerne la situation dans les territoires arabes occupés, nous approuvons les observations faites par le groupe arabe au sujet du rapport du Secrétaire général et appelons à la cessation des assassinats et des actes de destruction perpétrés par Is-

raël contre le peuple palestinien et l'établissement de l'Etat palestinien avec pour capitale Al-Quods.

Nous affirmons également notre solidarité avec le peuple de l'Iraq frère et demandons l'intervention de la communauté internationale pour que cessent ses souffrances et que les forces d'occupation se retirent de son pays.

Le travail accompli par l'OIT confirme sa capacité à alléger les souffrances des travailleurs des pays du Sud et, notamment, en Afrique. Il lui est ainsi demandé de jouer un rôle essentiel en appelant les pays donateurs à s'acquitter de leurs engagements envers les pays en développement, à annuler les dettes des pays pauvres et adopter les mécanismes susceptibles de réduire les effets tragiques de la migration vers le Nord.

Je voudrais pour finir saluer la CSI et tous ceux qui ont œuvré à unifier le Front syndical mondial dans sa lutte contre les aspects négatifs de la mondialisation sauvage et la défense des acquis de tous les travailleurs du monde.

---

Sr. FAZIO (*trabajador, Uruguay*)

---

Los trabajadores de Uruguay presentes en esta Conferencia hemos analizado la Memoria introductoria predispuestos al estudio serio y detenido, pero ciertamente condicionados por una práctica vigente en sus estructuras que no nos permite alentar ni ser alentadores a la hora de bregar desde nuestra posición de actores sociales por la profundización del diálogo social y del tripartismo.

Entendemos, en primer lugar, que resulta por lo demás justo su análisis, sostenido en el reto a los distintos actores que conforma el sistema que integramos, para que, utilizando precisamente esos instrumentos, formulemos o apoyemos la formulación de políticas dirigidas al desarrollo sostenible en nuestros países, que garanticen el crecimiento con justicia social y que, por otra parte, apuntalando esas decisiones colaborem en la mejora de la eficacia institucional de la OIT.

Consideramos, en segundo lugar, que como trabajadores debemos continuar con la tarea de mejorar y modernizar las relaciones en el mundo del trabajo, precisamente apostando por la utilización de los mecanismos y las herramientas que están a nuestra disposición, como lo están a disposición de nuestro Gobierno y los empleadores de nuestro país.

En tercer lugar, nos toca reiterar, en el ámbito de esta Plenaria, que los trabajadores uruguayos no somos unos recién llegados al Tripartismo, ni consideramos una moda el diálogo social.

Siempre observamos con esperanza los resultados que conlleva la negociación colectiva de todas nuestras condiciones de trabajo, y sobre todo la visión que como trabajadores debemos construir para la estrategia de un nuevo modelo de desarrollo de nuestro país.

Pero, como también ya lo hemos manifestado en este mismo ámbito en pasadas Conferencias, debemos administrar adecuadamente nuestra esperanza.

Nos resulta, en este sentido, auspicioso y esperanzador el avance alcanzado desde la asunción en nuestro país del actual Gobierno de corte progresista, en lo que refiere a un sistema de relaciones laborales adecuado a la normativa nacional e internacional, que ampara nuestros derechos, que incluye especialmente la protección de la libertad sindical de conformidad con el Convenio núm. 98 de la OIT y que instaura ámbitos de negociación colectiva en los sectores público y privado, incluyendo a

los trabajadores rurales y domésticos, aun a pesar de que el sector empleador mantiene viejas prácticas de represión antisindical, lo cual demuestra claramente su falta de cultura democrática y de respeto a los compromisos internacionales, a los cuales ha adherido nuestro país.

Asimismo, reconocemos los avances alcanzados en el tema de los derechos humanos, en relación al procesamiento de connotados terroristas de Estado que se mantenían impunes durante 30 años, que arrasaron durante el período de la dictadura militar con las libertades públicas y el derecho a la vida.

Al tiempo que reconocemos explícitamente estos avances, afirmamos categóricamente que Uruguay debe anular la ley de impunidad, por ser ésta contraria a todos los Convenios internacionales de derechos humanos a los que ha adherido nuestro país, y lograr la plena vigencia de la libertad y la justicia.

En cuarto lugar observamos que, a pesar de los esfuerzos de este organismo por colocar en la agenda del sistema multilateral el planteo estratégico que permita desarrollar planes y programas de trabajo decente, es decir, trabajo digno y sustentable, y a pesar de que la Memoria de la Conferencia que examinamos contiene una temática dirigida a sensibilizar y comprometer a los actores sociales que mantienen la responsabilidad de impulsar un desarrollo económico y social sostenible, con políticas coherentes en esa dirección y, fundamentalmente, la mejora en la eficacia inherente a la acción de esta Organización y el sistema multilateral, lo cierto es que, desde el punto de vista institucional, observamos un debilitamiento de las capacidades de los organismos pertinentes para dirigir las cuestiones vinculadas con el respeto y la observancia de las normas de la OIT en términos de eficacia.

Decimos, sin contemplación alguna, que en esta misma Conferencia, en su Comisión de normas, hemos asistido a una práctica de ciertos grupos empleadores que no dudamos en calificar como de chantaje, específicamente en el tratamiento del tema de las violaciones a la libertad sindical en Colombia.

Así, en esa Comisión y referido a la práctica de terrorismo de Estado que impulsan Gobiernos y empleadores, se aplicó una especie de veto dirigido a neutralizar e impedir la denuncia de los trabajadores del país, y cuyo cometido hace referencia a miles de asesinatos de dirigentes sindicales y a la represión antisindical por la vía de despidos, y en definitiva a una concepción autoritaria del gobierno, que, lejos de impulsar el diálogo y fomentar la sindicalización, es denunciada como partícipe de la represión más criminal.

Ya hemos expresado a la Comisión de normas, y lo reiteramos, que no es legítimo ni ético imponer o extender mandatos espurios contra países del Sur, mientras se baja la vista de modo cómplice pretendiendo no ver las violaciones flagrantes, masivas y sistemáticas de los derechos humanos que cometen algunos Gobiernos aliados al capital multinacional.

Esta conducta es violatoria del derecho humano fundamental a la libertad sindical, del derecho humano a la vida y a la libre expresión de las ideas, implica una conducta gubernamental abiertamente confrontativa con elementales principios de respeto a la vida y la integración social.

En este mismo sentido, el del debilitamiento de las capacidades de esta Organización y de los esfuerzos por modernizar el concepto manejado como

«gobernanza del mundo del trabajo», también observamos que ciertas tendencias, en principio dirigidas a lograr que más países ratifiquen más convenios, se desvían hacia una práctica inspirada en el esfuerzo estratégico del sector empleador nucleado en la Organización Internacional de Empleadores, por debilitar el marco normativo de la OIT sustituyendo sus normas de contenido imperativo y rango protector por otras más flexibles y menos abarcativas. Ya termino.

El concepto conocido como normas de aplicación progresiva, acuñado en esta misma Conferencia, en la Comisión del Sector Pesquero, ejemplifica el cuadro de situación al cual aludimos, y más allá del avance que para los trabajadores del sector implica en muchas partes del mundo la eventual adopción de un convenio y una recomendación, desnuda la estrategia de Gobiernos y empleadores de países del primer mundo en perjuicio y desmedro de los pescadores de países empobrecidos del resto del planeta. En definitiva, señor Presidente, los trabajadores uruguayos redoblamos nuestro compromiso con la dignidad, con el diálogo, con las apuestas por los planes y programas de esta Organización, pero, sobre todo, con los trabajadores del mundo y, en esta hora aciaga, para los compañeros de Colombia, hermanos latinoamericanos, con su demanda y su obstinada lucha por la libertad y la vida.

---

Mr. TABANI (*Employer, Pakistan*)

Let me begin by extending the greetings of the employers of Pakistan to the President and the delegates attending this 96th Session. We wish at the outset to compliment the Director-General on his Report to the Conference this year. It conveys to the tripartite constituents the advice to develop policy tools for a "green jobs initiative" aimed at achieving an environmentally sustainable process of development. This is in addition to his discussion on the wide range of issues on decent work deficits, moving forward on the Decent Work Agenda, the key issues for action as decent work has now become part of economic, social and environmental policies. He has highlighted the need to develop better methodologies to capture the reality of unemployment in developing countries and has emphasized the need for better data as being vital to ILO policy initiatives as well as measuring progress towards the Millennium Development Goal of halving extreme poverty by 2015.

This year I have had the honour of being the spokesperson for the Employers' group in the general discussion on strengthening the ILO's capacity to assist its Members. It is from that experience and perspective that I would consider the Director-General's Report to this Conference. From our debate there was real convergence among participants for the ILO to focus on a core mandate in the world of work. It is only then that the ILO can ensure effectiveness to its constituents, but also to others within the context of globalization as well as United Nations reform. As a pilot country in the United Nations reform process, we are convinced that we need a strong, focused ILO, one that can clearly articulate what it can do to strengthen tripartism, give recognition to the role of key national actors and contribute at country level. Until we have that focus restored, and until the ILO's capacity is rebuilt with regard to its knowledge, skills base and analytical capacity, as has been mentioned by the Director-General himself, I would caution against

looking to shift its work into other areas, important though those areas may be. That is not to say that the ILO should not move forward. It certainly should, as the dynamics of globalization mean that change should be accepted as a constant factor.

An example of how the ILO can be effective comes from my own country. Recently we experienced an important buyer withdrawal from the Sialkot region of Pakistan, an area where sports goods, especially hand-sewn footballs, are produced and where large numbers of small manufacturers depend on export markets for their well-being. Through ILO engagement with us, our worker colleagues and others have been able to respond effectively to the concerns behind buyer withdrawal and they have recently agreed to re-engage and buy from Sialkot. ILO assistance was instrumental in achieving that result, and I would like to express my thanks to Mr Kari Tapiola and his team as well as the ILO Islamabad Office for their practical help in realizing this most positive outcome.

The ILO, through consultations with the tripartite partners, has finalized a plan of action to train employers and workers in the Sialkot region in the application and observance of relevant national labour laws in order to satisfy their buyers. I wish to express our satisfaction with the continued cooperation of the ILO Islamabad Office with the Employers' Federation of Pakistan in the realization of our Decent Work Country Programmes. I wish to thank the ILO Director for his support.

We have noted with satisfaction that the Report recognizes the role of business, albeit cautiously. What is now needed is for the Governing Body to ensure that this realization is reflected in programmes and resources within the employment sector. The ILO is focusing more and more on the experiences and roles of multinational enterprises, thus ignoring the overwhelming majority of small and medium-sized enterprises with limited resources and which face continued challenges as to their sustainability. This is a group that needs the help and assistance of the ILO. It is at this level of economic activity where job creation and entrepreneurship need to be facilitated by an appropriate regulatory environment supportive of business.

The Director-General has also discussed the widening gaps in the distribution of income and wealth in many countries and the fact that labour income in 16 developing countries fell on average from 68 per cent to 62 per cent as a share of national wealth. These are alarming figures. In this context, the report *World Trade 2006, Prospects for 2007*, released by the WTO in April of this year, warns us of the risks that lie ahead in 2007 following the strong trade figures of 2006. It is expected that global merchandise trade could slow down to 6 per cent compared to 8 per cent in 2006. That is a very sharp reduction of 2 per cent, and all should not go well for 2007.

While I can understand the rich contents of the Director-General's Report, it would be my strong recommendation that the Governing Body consider its elements. It can then decide strategically whether the ILO should involve itself and, if so, how, remembering always that the ILO is there first and foremost to respond to the needs of its constituents, to help them to be as effective as possible at the national level and to respond to their needs for technical cooperation that actually helps people. That it what should guide the ILO now and in the future.

---

Mr. SLADOWSKI (*Employer, Poland*)

---

It is a great honour for me to represent Polish employers during this 96th Session of the International Labour Conference. Participating in the Conference is both an honour and a cause of great satisfaction, as every year, it serves as a source of inspiration and numerous initiatives. It is evident how, after a few years of operation, the ILO's Decent Work Agenda is yielding more and more impressive effects. This was noted in the Global Report on *Equality at work: Tackling the challenges*, which provides a very detailed description of many examples of discrimination and inequalities in the contemporary labour world and outlines the successes of programmes and efforts aimed at altering the attitudes of societies and authorities and at changing statutory regulations.

A variety of documents show how the ILO catchphrase of "decent work" is being transformed into real actions, including the Report by the Director-General. It highlights the role and significance of the need for joint efforts at the local and global levels to promote sustainable living conditions, the sustainable functioning of enterprises and a sustainable environment.

In this spirit, our Conference has launched a Report devoted to the promotion of sustainable enterprises, something which is in the centre of focus for Polish employers.

The Report, by opening up for discussion the notion of "sustainable enterprises", points to the huge opportunities inherent in this concept. In this regard, I would like to stress that placing emphasis on recognizing the role played by private businesses in creating jobs, wealth and development opportunities for individuals and entire societies serves as a valuable approach to identifying additional links between legal, fiscal, economic, social and environmental aspects and human capital development, and lays the groundwork for a stronger exchange of information and good practices.

The Report also significantly outlines the possibilities of redefining the policy frameworks for both the business and the public sectors oriented towards the management of changes, such as takeovers, bankruptcies, disclosures and restructuring processes, which usually run counter sustainability.

And finally, there are the crucial parts of the Report on the comprehensive analysis of conditions which can ensure the competitiveness of economies, regions and companies – something so perfectly shown in the Report in the case study of Germany and the Bavarian region (pages 65–66).

On the other hand, discussions on sustainable enterprises are already under way and have revealed the risks which are linked to question of sustainable enterprises. Let me list some examples: first of all, reducing the whole issue to the new obligations of enterprises oriented towards social responsibilities provides a highly unbalanced, not to say distorted, view of the entire concept of sustainable enterprise; second, the meaning of these concepts should not be limited to corporate social responsibility activities which are, we must emphasize, only of a voluntary nature and should remain as such; and third, the strong orientation among our partners from the trade unions to take action on behalf of sustainable enterprise can provide an appropriate opportunity to fight against business.

On behalf of the Polish Employers' group, I want to put the question: "Are we, in Poland, on the right track towards creating a climate for this kind of discussion and solving problems connected with a balanced model of sustainable enterprise?" This is hard to judge, for many reasons. First, because of the lack of earnest social dialogue among the partners. I am afraid that the Government's attitude to the issues presented by social dialogue challenges is reminiscent of a game. At this stage, although the issue is in the full public limelight, there is no real debate in a spirit of cooperation to solve the difficulties.

Secondly, the preference of the Government and, from time to time, trade unions for oversimplified generalizations means that limited-scale phenomena of rather secondary importance are seen as the generally prevailing picture throughout the country, an approach which does not lend itself to creating an atmosphere conducive to problem solving.

Thirdly, there is a lack of understanding of many of the modern challenges which we must face, especially in the long-term, which require all the social partners to work together.

In conclusion, I hope, of course, that using the good examples and the strong principles of the tripartite traditions and the ILO's achievements, we will find a way to increase the effectiveness of social dialogue in Poland through practical and important efforts. And we are ready to offer our substantive contribution to the new subjects discussed at the ILO level.

---

Mr. ZUKHOROV (*Government, Tajikistan*)

Tajikistan, during the period of its membership of the ILO, has consistently subscribed to the ILO's guiding ideas and principles. We, in the Tajik delegation, support the main provisions of the Director-General's Report, with regard to decent employment, equal rights at work and developing and strengthening local potential. All of the issues examined at the present session of the International Labour Conference are extremely important for the development of the decent work programme and will be welcomed everywhere, including in Tajikistan.

Discussion of the Global Report under the follow-up to the ILO Declaration on Fundamental Principles and Rights at Work is especially timely for countries with economies in transition. This issue is a kind of indicator, allowing us to judge the essence of reforms under way, along with their influence on social and labour relations.

Despite the fact that the Labour Code of Tajikistan provides for administrative, and in some cases criminal, liability for any forms of discrimination at work, nevertheless, the fact remains that in our country a gender imbalance exists, both in employment and in wages. The same problem exists in employment and wages for young people, disabled people and certain other categories.

The overriding priority of the Government of Tajikistan remains decreasing the poverty level in our country. I should like to note that comparatively rapid economic growth has led to a decrease in the poverty level from 83 per cent in 1999 to 57 per cent in 2004. In the same period, the level of extreme poverty in our country decreased from 36 per cent to 18 per cent.

The Government provides for an annual increase in pensions and wages for workers in public institu-

tions. In the last five years alone, the average salary has increased more than fivefold and pensions have increased sevenfold. Annual increases in the minimum levels of salaries and pensions, of stipends and other benefits, and of financial compensation for gas and electricity costs, have all contributed to real improvements in the standard of living of our population. At the same time, the income of most of the population remains lower than their actual needs.

The principal reasons for poverty in Tajikistan are low levels of salaries and employment. Over the past 15 years, the population of Tajikistan has increased by more than 25 per cent while the working-age population has increased by more than 50 per cent. However, in the same period, the employment rate rose by only 7 per cent, so the increase in the employment level is much lower than the growth in the working-age population.

Existing tension on the labour market in Tajikistan has led, in particular, to a massive wave of internal labour migration, which on the one hand has attenuated the labour market situation but on the other has given rise to new problems related to the social protection of labour migrants.

In Tajikistan we are successfully carrying out legislative and administrative reforms. Our guiding principles are: ensuring the right to decent work and social protection; implementing a decent work policy and the regulation of the labour market; formulating measures to regulate labour migration, aimed at reducing illegal migration and preventing its negative consequences; ensuring freedom of association and the development of social partnership; and ensuring occupational safety and health.

I would like to note that, in reaching these achievements, the ILO has played a key role. ILO assistance in Tajikistan has enabled us to create a mechanism for social partnership and develop tripartite policies. What is more, recently in Tajikistan special attention has been devoted to eradicating the worst forms of child labour, a goal aided by the ILO's programme on capacity building in Central Asian countries to combat the worst forms of child labour. We are in favour of continued cooperation with and development of this programme and programmes to fight other forms of discrimination at work.

Testimony to this is the fact that, just today, we signed a programme for cooperation between the tripartite partners of Tajikistan and the ILO on decent work. It is our hope that this programme will help us to implement more effectively the principles of social justice, democracy and social dialogue, as well as serving to increase peace and stability.

In conclusion, let me note that, considering the increasing international authority of the Republic of Tajikistan in recent years, we expect there to be an appropriate ILO presence in our country. This would certainly be aided by the opening of an ILO office in Tajikistan. The ILO, in our view, is a very important and necessary Organization in our modern world, and Tajikistan wishes the greatest of success to its future fruitful work.

---

M. NGORWANUBUSA (*gouvernement, Burundi*)

Il me plaît de souligner que mon pays, le Burundi, au demeurant membre du Conseil d'administration du BIT, est très attaché, tant à travers les actions normatives que dans ses attitudes, ses comportements et ses pratiques, à l'élimination de la dis-

crimination sous toutes ses formes et manifestations dans l'emploi et la profession.

Il ne saurait d'ailleurs en être autrement. Depuis les années de l'immédiat après-indépendance, et par la suite et plus singulièrement d'octobre 1993 à 2005, le Burundi a connu des crises multiformes graves, dont une des causes est assurément la re-ventilation de l'égalité au travail et de la juste répartition des postes de responsabilité.

Des négociations franches et laborieuses ont amené les partenaires politiques et sociaux à admettre l'existence de groupes peu ou prou représentés dans l'appareil politique de l'Etat et dans le monde du travail avec comme secteurs cibles l'armée, la sécurité, la magistrature et le circuit économique.

Des mesures correctives ont été initiées, particulièrement avec l'année 2005, qui correspond avec la mise en place des institutions démocratiquement élues.

La Constitution, qui fait siens les principes fondamentaux des droits de l'homme, et en particulier du droit au travail, pose comme inaliénable le droit d'accès aux fonctions civiles et militaires à toutes les composantes de la société burundaise en instituant le principe du pouvoir partagé dans les institutions politiques jusqu'au niveau des communes.

La participation à l'égalité de chances, à la gestion de la chose publique entre les deux principales communautés est affirmée sans ambages, tandis que la communauté très minoritaire des Batwa est représentée de manière volontariste à l'Assemblée nationale et au Sénat par des parlementaires coopérés.

La représentation des femmes, avec un minimum de 30 pour cent dans les institutions politiques, est déjà une réalité au sein du gouvernement qui compte sept femmes sur 20 ministres.

La composition des bureaux de l'Assemblée nationale et du Sénat ne se conçoit pas non plus sans la composante féminine.

La loi portant statut général des fonctionnaires est explicite quant à sa ferme volonté d'éradiquer toutes formes de discrimination, puisqu'elle fustige toute tendance à la discrimination liée à l'ethnie, au sexe, à la religion, à l'état sérologique réel ou supposé, de même qu'elle prend des dispositions particulières en faveur de certaines catégories défavorisées, comme les handicapés.

Une commission de recrutement dotée de pouvoirs étendus et comportant des membres de divers horizons veille à l'équité dans l'accès aux emplois publics sur la base de concours.

Afin d'éviter la politisation de l'administration, mon pays le Burundi s'est doté d'une réglementation qui distingue les postes politiques et les postes techniques, toujours dans l'esprit de promouvoir la pérennité de l'emploi lié aux compétences et aux performances.

Le Code du travail est un instrument de référence pour combattre la discrimination envers les travailleurs migrants, surtout à une époque où le Burundi s'ouvre résolument à de plus grands ensembles régionaux et qu'il crée les conditions optimales pour attirer les investisseurs pour son développement.

Le cadre stratégique de lutte contre la pauvreté, qui a réuni au mois de mai dernier les partenaires au développement, a inscrit en bonne place la promotion des travaux à haute intensité de main-d'œuvre (Himo) afin de faire accéder à l'emploi et aux revenus des catégories entières de personnes qui en étaient dépourvues, comme les jeunes non sco-

larisés, les démobilisés et autres catégories de sinistrés et groupes vulnérables, toujours en vue de rendre effectif le mot d'ordre de travail décent pour tous, mot d'ordre qui, du reste, est inscrit en lettres d'or dans le programme par pays de promotion du travail décent au Burundi.

Je sais gré au Directeur général et à ses collaborateurs pour l'appui constant qu'ils ne cessent d'apporter au gouvernement du Burundi et aux partenaires sociaux dans tous les domaines de leurs préoccupations, qu'il s'agisse des normes, du dialogue social, de la protection sociale, de l'emploi et du perfectionnement professionnel.

C'est par ces mots de remerciement et en réitérant l'engagement ferme du Burundi à faire aboutir les objectifs du BIT que je termine mon propos.

---

Mr. ZARB (*Worker, Malta*)

In his Report for this year, the Director-General touches elaborately on the topic of equality at work. This subject is indeed an important one as equality is fairness or, as one might say, equality depends on fairness.

I therefore want to congratulate the Director-General for presenting such a detailed document which I am convinced has shed more light on the levels of equality at work that have been achieved in this globalized world, and also for showing the way forward to reducing discrimination as much as possible in the workplace, notwithstanding the challenges and obstacles that lie ahead.

At a time when we are witnessing the widening of social and economic disparities, we are seeing also, thanks to the trade unions, more workers rising to combat injustices and discrimination at their place of work. Luckily, workers are more than ever before increasing their knowledge and realizing that power and profit can no longer take preference over their working rights.

In my country, particularly in the last few years, we have seen a sharp rise in workplace exploitation, so much so that today many part-time workers are working under miserable conditions, while those in full-time employment are being forced to accept a reduction in the conditions that they have managed to achieve, not without sacrifice, over the years.

As regards female employment, the General Workers' Union (GWU) has long been calling for the necessary steps to be taken and implemented so as to make the labour market more accessible to enable the largest possible number of women to enter into full-time employment. We have been insisting on such measures as we know from statistics that more women are opting for part-time or homework as a result of their inability to reconcile the work-family balance.

One other issue I would like to touch upon is that of freedom of collective bargaining in my country. This leads me to call your attention to the fact that my country's Government is still interfering in the process of collective bargaining and obstructing the freedom of collective negotiations to such an extent that it is still ignoring, and thus violating, the decision of the ILO Committee on Freedom of Association.

I refer to Case No. 2447, with respect to which a year ago the Committee on Freedom of Association upheld the GWU's complaint and requested the Maltese Government to amend the National and Public Holidays Act so as to ensure that this provision does not render null or void any provisions in

the existing collective agreements and also not to preclude voluntary negotiations in the future.

In spite of the ILO's decision, the situation has remained unchanged and our collective bargaining process will remain hindered as long as the Maltese Government continues to refuse to alter its decision and bring back the law to where it was in 2004.

Therefore we are once again calling upon the International Labour Organization to further press the Maltese Government to adhere to the decision taken by the Committee on Freedom of Association and to let free collective bargaining take its course.

---

Ms. DEFARES (*Government, Suriname*)

Let me first congratulate the President and Vice-President on their election to guide this Conference. It is for me really a great honour to address this august assembly today on behalf of the Minister and make use of the opportunity to reflect on labour and socio-economic policies and the challenges they present.

We greatly appreciate the excellent Report from the Director-General, *Decent work for sustainable development*. To achieve decent work in a globalizing world, we have to commit ourselves to making strong alliances to fight social injustice and poverty.

The Government of Suriname recognizes the Decent Work Agenda of the ILO as an important instrument in accomplishing full and productive employment and decent work for all. The decent work concept is truly a powerful and effective instrument for politicians and policy-makers as it provides ingredients for equitable growth, productive employment and a competitive market economy. Moreover, it fully promotes the integration of sustainable economic, social and environmental development, in which social dialogue and tripartism are crucial.

Climate change is an area of great concern. Some economic sectors and some populations, such as ours, are vulnerable to sea-level rises. On the national level, efforts are being made to tackle and anticipate climate change impacts; therefore, the Surinamese Government welcomes the ILO's approach on low carbon economies and more sustainable patterns of production and consumption. Worth mentioning in this context is the fact that, in 2002, the Government of Suriname added two policy areas to the labour portfolio, namely, technological development and the environment, in order to facilitate a working environment conducive to social and environmental protection. The aim was to create, preserve and restore employability in all phases of working life and to encourage innovation and knowledge for the sustainable development of the environment.

While jobs should become greener, they also should be productive and able to compete – as stated in the Director-General's Report. Suriname is in the process of transforming existing concepts of productivity through newly adapted strategies in order to make quantum leaps. The realization of these concepts is of great importance to our society. At the beginning of the 1990s, the Ministry created the Foundation for Productive Work Units, with the aim of promoting enterprise development and productivity. Particular focus is placed on youth and women in order to enable equal access to entrepreneurship opportunities and training services.

Productivity in Suriname has risen in the mining, construction and tourism sectors; hence, the demand for skilled workers is increasing. The Ministry of

Labour is therefore enhancing its efforts to deliver skilled workers. To improve the adequate matching of labour supply to labour demand, the Ministry is promoting skills development through its vocational training centre. A skills development system is being developed in this regard on a tripartite basis. Simultaneously, the Government is also in the process of adapting its certification system for technical and vocational education and training to meet regional standards.

In conjunction with the growing economy in Suriname, active labour institutions are now being strengthened for the sustainable development of employment, productivity, innovation and competitiveness.

The adaptation of labour laws to changing patterns in the world of work is an integral and essential part of the national socio-economic policy of my country. Based on ILO instruments and Caribbean Community (CARICOM) model laws, the Ministry of Labour will utilize its own expertise to modernize labour legislation. The ultimate goal is to establish and maintain a flexible mechanism to continuously adapt rules in order to be able to implement the concept of decent work and achieve other standardization and integration objectives. The protection of vulnerable groups and an adequate minimum wage system are considered high-priority issues for our Government.

In an attempt to gain a complete overview of the labour market, the Ministry of Labour is executing a survey of the informal sector in cooperation with the General Bureau for Statistics. Relatively recently, integrated work has begun within the Ministries of Finance, Social Affairs, Public Health and Labour to introduce a social security scheme with the emphasis on pensions and general sickness insurance. The Ministry of Labour has a central role and, as part of this role, will tackle the issues of paid maternity leave, social protection and pensions in the private sector separately.

The Ministry of Labour has developed an increased awareness of workers and employers with regard to international labour standards and their relationship to national labour laws. In the years since the 95th Session of the ILC, constant reference has been made by employers' and workers' organizations to international labour standards. The Suriname Labour College recently organized a successful national tripartite seminar to enhance the understanding of the functioning and role of ILO Conventions and Recommendations in general and those related to freedom of association in particular.

Given the broad scope and impact of decent work, the Surinamese Government warmly applauds the dialogue of the ILO with other international agencies.

In conclusion, we underscore once again the importance of the Decent Work Agenda for sustainable development and welcome the many efforts by and support from the ILO in this respect. We also would like to thank the ILO Subregional Office for the Caribbean in Trinidad for its support and assistance in the many areas of our work and concerns. Therefore, I am very convinced of the fruitful outcome of this Conference.

---

M. TRENCHÉV (*travailleur, Bulgarie*)

Monsieur le Président, je suis convaincu que cette 96<sup>e</sup> session de la Conférence internationale du Travail donnera lieu à un fructueux débat concernant

toutes les questions de l'agenda, et plus particulièrement celles soulignées dans le rapport global présenté par le Directeur général consacré à l'élimination de toutes les formes de discrimination dans le domaine de l'emploi et de la profession visées dans la Déclaration relative aux principes et droits fondamentaux au travail et son suivi.

Nous sommes convaincus qu'à cette Conférence tripartite les participants sauront, avec une grande efficacité et un grand sérieux, contribuer au débat concernant le renforcement des capacités de l'OIT et la promotion des entreprises durables.

Dans ce cadre, je suis obligé de souligner que, malgré les résultats positifs concrétisés il y a quatre ans par l'adoption d'une loi contre la discrimination et la création d'un organisme gouvernemental pour sa mise en œuvre, bien que l'année présente ait été déclarée année européenne de l'égalité des chances, l'application des lois antidiscriminatoires au travail se heurte encore à de nombreuses difficultés en Bulgarie.

En premier lieu, je voudrais attirer votre attention sur le travail insuffisant des institutions et organismes bulgares compétents, ainsi que sur le manque de respect des employeurs bulgares à l'égard des droits des handicapés. Il faut en effet ne pas oublier que ces derniers peuvent largement contribuer à l'augmentation de l'emploi, et que leur marginalisation du marché du travail, l'absence de politiques assez flexibles et efficaces pour assurer leur intégration professionnelle et sociale représentent un danger réel pour la cohésion sociale.

Une grande inquiétude dans notre pays est aussi provoquée par les cas d'attitudes négatives et discriminatoires, parfois par une exploitation cruelle des handicapés, plus particulièrement dans les entreprises spécialisées où leurs droits d'association et de travail sont bafoués en raison de leur état physique par des employeurs peu scrupuleux.

En second lieu, je suis obligé d'attirer votre attention sur les inégalités existant entre hommes et femmes dans le domaine du travail notamment en matière d'embauche, de rémunération et de conditions de travail.

Il arrive fréquemment que des employeurs bulgares, essentiellement soucieux de rentabilité, ne respectent pas les droits des femmes au travail, notamment ceux liés à la protection de la maternité (garde des enfants, retour au travail, etc.).

Ce phénomène est très marquant, surtout dans le secteur informel de l'économie. Plusieurs enquêtes ont permis de constater de manière irréfutable que certaines jeunes femmes repoussent la décision d'avoir des enfants car elles ont peur de perdre leur emploi ou de ne pas retrouver les mêmes conditions de travail après leur retour en entreprise.

En troisième lieu, en Bulgarie, il existe un sérieux problème avec les travailleurs âgés qui sont à la veille de leur retraite. D'un côté, certains estiment que la rémunération des travailleurs âgés constitue une discrimination vis-à-vis des jeunes en raison de la prime d'ancienneté qui s'ajoute à leur salaire de base.

D'autre part, les indemnités prévues par la loi et dans le cadre des négociations collectives lors du passage à la retraite poussent les employeurs à refuser d'embaucher des salariés âgés au prétexte qu'ils coûtent cher à l'entreprise.

Nous sommes particulièrement satisfaits de cette partie du rapport global du Directeur général qui insiste sur les formes existantes de discrimination

au travail touchant les salariés âgés, et nous saluons les orientations principales proposées pour surmonter ce problème.

En dernier lieu, je dois souligner que certains anciens mécanismes de régulation administrative concernant la rémunération du travail créent des conditions de traitement inégales entre le secteur privé et le secteur public.

L'Etat se permet de réguler et d'encadrer strictement les salaires dans le secteur public par des critères et indicateurs qui touchent directement le droit à la négociation collective, y compris jusqu'à une date récente par la suppression des conventions collectives de branche, avec comme argument la stabilité macroéconomique et financière du pays.

De telles réglementations sont imposées malgré l'opinion négative et unanime des représentants des syndicats et des employeurs qui prêchent pour l'élimination de telles formes de régulation de salaire.

En conclusion, je tiens à vous assurer que les syndicats bulgares tiennent en priorité à assurer à la population bulgare un travail et une existence digne. Nous allons continuer à mener notre lutte pour l'adoption des normes internationales concernant les droits des salariés, tout en poursuivant nos efforts en vue de rendre notre pays digne de l'Union européenne.

Je souhaite à la Conférence internationale du Travail un plein succès dans ses travaux. La Conférence va sans doute réaffirmer le droit au travail décent des travailleurs et des salariés, condamner catégoriquement toute forme de discrimination relative aux emplois et aux métiers, élaborer les bases d'une meilleure réglementation du travail pour le secteur de la pêche, contribuer au renforcement de la capacité de l'OIT à promouvoir le développement durable des entreprises.

Merci pour votre attention.

---

Mr. MESKOV (*Minister of Labour and Social Policy, The former Yugoslav Republic of Macedonia*)

---

It is my honour to address this session of the International Labour Conference. I would like to thank the Director-General, Mr. Somavia, for the very comprehensive and important Report he has submitted to the Conference.

The Republic of Macedonia is one of the countries that have ratified all of the fundamental ILO Conventions and is committed to the Decent Work Agenda in line with sustainable development and its three pillars of economic development, social development and environmental protection.

The Government of the Republic of Macedonia is focusing its national policies on the creation of employment and economic growth. For these reasons, the Government adopted the National Employment Strategy 2006–10 and the National Action Plan for Employment 2006–08.

What is most important is that the social partners are actively involved in the preparation of these documents, because the Government acknowledges that social partnerships are essential for the success of its economic and social policies.

Furthermore, the Strategy and the Action Plan are adopted by the Economic and Social Council, which is the highest form of tripartite social dialogue in the Republic of Macedonia.

Recognizing the importance of employment creation, especially for young people, is the best way to fight poverty, and the Republic of Macedonia is

determined to create all necessary conditions to attract investment in order to create better jobs.

The Government has already reduced the tax rates to among the lowest levels in the world, thus creating excellent business conditions for possible investors.

At the same time, we are creating more labour legislation, which is necessary in the globalized world. We are working on labour legislation which is flexible and at the same time provides full respect for workers' rights.

Of course, all these measures can only be implemented through social partnerships and in full respect of the opinions of both the employers and the workers. We all have the common goal of achieving sustainable development. Globalization offers us both the challenge and the opportunity to make this world a better place.

---

Mr. EASTMOND (*Minister of Labour and Civil Service, Barbados*)

---

My delegation and I are pleased to note that this year's Global Report under the follow-up to the ILO Declaration on Fundamental Principles and Rights at Work, focuses on tackling the challenges associated with equality in the workplace. These challenges are many ranging from common forms of discrimination, such as those related to gender, race, religion, disability and age, and the newly emerging forms such as genetic discrimination and discrimination based on lifestyles. It is also encouraging that the Director-General's Report highlights the need for sustainable development, that is, balancing the needs of people with the environment to ensure that generations following will have a preserved and healthy environment in which to live and work.

It is heartening to note that the United Nations Economic and Social Council (ECOSOC) High-level Segment embraced the ILO's goal of decent work for all in July of 2006. Moreover, the Director-General in his Report has placed squarely on the ILO's agenda the importance of sustainable development. These factors will have several positive impacts on the world of work and propel the ILO towards its goal of decent and productive employment for all. Further, I believe, that the time is right for the ILO to be given the opportunity to exert greater influence on policy and programming in regional and international institutions.

Let me state at this point that the promotion of equality at work has the potential, not only to contribute towards the ILO's goal of decent work for all, but to move us closer to the eradication of extreme poverty and hunger, the promotion of gender equality and the elimination of the stigma and discrimination associated with HIV/AIDS.

Let me also state that the negative impact which inequality and discrimination at work has on a society is extremely real and evident. In Barbados, for example, in order to address any inequalities in society, the Ministry of Labour and Civil Service, along with the social partners, is working on labour legislation in the areas of sexual harassment, the employees' right to notice of termination, the right to appeal against unfair dismissal, and safety and health in the workplace. In addition, new ways are being sought in which to ensure that equal opportunities exist for all workers, whether in the formal or informal economy.

Understandably, in order to monitor the effectiveness of policies and programmes, labour market

information systems must function effectively. For example, data relating to wages, gender and educational attainment will assist in identifying and eliminating areas where inequality of pay and promotion may exist on account of gender. In addition, access and use of administrative data may prove useful in addressing discrimination related to migrants, lifestyle and social origin. In making further inroads into the decent work deficit, the ILO must continue to provide technical assistance to developing and less developed countries in the areas of developing, managing and maintaining their labour market information systems. I know that this issue has been highlighted in the Global Report, and it is imperative that support is not merely written, but provided to deal with the development and management of effective labour market information.

I now wish to turn my attention briefly to the HIV/AIDS pandemic and the devastating impact it can have and is having on developing States, especially on the small economies of the Caribbean region. In collaboration with the ILO Programme on HIV/AIDS and the World of Work in Barbados, the Ministry of Labour has assisted other ministries and agencies in dealing with the stigma and discrimination related to this pandemic. To this end, it has been instrumental in the training of a number of persons in behaviour change communication strategies, policy development and implementation, and peer group education. Literature has also been distributed in the communities and it is hoped that these strategies will go a long way in helping to arrest this pandemic. I am aware that the ILO Programme in Barbados is coming to an end, and I urge the Director-General to continue providing assistance until the Programme becomes sustainable.

In closing, I wish to commend the ILO on its quest to ensure that it is a dynamic Organization, constantly adapting to the global changes to meet the evolving needs of its stakeholders. It should be proud of its work, which I assure you, is supported by the Government of Barbados and, indeed, the rest of the Caribbean.

---

Mr. SYED MOHAMUD (*Worker, Malaysia*)

---

The Decent Work Agenda has been touted as the response of the workers towards the many ills of globalization where there is simply too much evidence suggesting that the majority of the world population has not had an increase of its standard of living in tandem with economic growth rate.

In this time and age, we are still dealing with issues concerning abject poverty, a widening wealth gap, and major medical and environmental concerns. Needless to say, it is the poorer segment of society that bears the greater cost of this.

Players in the international community have signed trade accords, and many other global, regional and multilateral agreements, which mostly support the interest of trade and the protection of those who control capital. The one regret we must all have is that we have done virtually nothing to protect those who really need protection – the poor, marginalized, oppressed and exploited. There are vast amounts of literature which extol the virtues of successful corporations, highlighting the managerial precepts that have made them so successful.

What is the measure of success? I must very humbly ask. Could we consider pressuring people to work longer hours for less pay, sacrificing their family life and working to the detriment of the in-

terests of a larger society, something which should be lauded and emulated?

Pursuing the Decent Work Agenda is a responsibility and duty of anyone, and any institution which has genuine interest of the world population in mind. There is simply no need to compromise or for any negotiation to accede to the demand that people be treated with dignity and respect.

I am sure that everyone here would agree that capital should be working to serve the interests of people and not for people to enslave themselves for capital.

The many rights that have been fought for and we now take for granted are slowly but surely being eroded away. I would use, as one example, the issue of working hours. Many countries have in place as part of the employment legislation that workers should not be subjected to more than eight hours of work per day. What we see today is pressure being inflicted on the government to rely on this, to allow for capital to subject workers to longer working hours.

One may try to argue that such employees have choice. Do employees really have a choice? In reality, it is obvious that employees do not have a choice if they are faced with the prospect of losing their jobs if they do not agree to such exploitative practices. These days the threat of moving to a lower level cost country with a scant regard for the right of workers is always there.

We live in a world where we fight terrorism on one hand even where there is no evidence that terrorist activities have taken place in some instances. When, on the other hand, we turn a blind eye to the atrocities which are committed to children who are forced to work and to other forms of forced work through human trafficking and through continued enslavement and exploitation of the voiceless, the under privileged and the oppressed. The international community has all but ignored the violations being committed against the people and workers of Burma/Myanmar, something which there can be little excuse for. A firm commitment and focus by the international community could address this issue as well as other injustices that exist in the world. The Decent Work Agenda and trade are not mutually exclusive and can operate side by side. I would urge all of you to ensure that this session amounts to more than a place where rhetoric is announced but to work to effectively implement the Decent Work Agenda.

---

Mr. DAMDIN (*Minister for Social Welfare and Labour, Mongolia*)

---

On behalf of the Government of Mongolia and in my own name, I would like to wish every success for the activities of the 96th Session of the International Labour Conference.

Although Mongolia confronted a number of challenges and obstacles in its transition from a centrally planned economy to a market economy, in its efforts to reform social relations in the 1990s, it was able to successfully overcome these challenges and obstacles and make progress towards economic stability. In recent years our economy has grown steadily, at an average rate of 6 to 10.7 per cent, the inflation rate has decreased, and foreign trade and the overall state budget balance have recorded surpluses.

Some issues related to the Millennium Development Goals remain to be resolved, as GDP per cap-

ita continues to be low. Unemployment and poverty rates remain high. Mongolia has therefore developed and started to implement specific development policies and programmes which take into account both external and internal factors as well as its commitments made before the international community with regard to achieving the Millennium Development Goals.

Thus an economic growth support and poverty reduction strategy has been developed and approved. Furthermore, the national development strategy has been elaborated as a long- and medium-term comprehensive policy document for Mongolia. In accordance with the Mongolian decent work action plan for 2005–08 adopted by the Government, the country programme for decent work has been developed in cooperation with the ILO in order to provide technical and methodological support in implementing the action plan. The Government of Mongolia pays great attention to the promotion of tripartism and social dialogue and to ensuring public participation in the implementation of this programme, which aims at reducing unemployment and poverty and promoting decent work through efficient use of support and technical assistance from foreign countries, the ILO and other international organizations along with domestic resources.

Enactment of state legislation on the informal sector by the Mongolian Parliament creates an enabling environment for making concrete progress to ensure fundamental human rights at work, to create jobs and adapt various forms of employment, to advance the social dialogue mechanism and to improve social protection in Mongolia.

The Government of Mongolia has ratified the basic ILO Conventions in order to ensure fundamental principles and rights at work within the framework of the international normative system. It has accepted the amendment to the ILO Constitution which was adopted at the 85th Session of the ILC in 1997 and has submitted it to the Parliament of Mongolia for ratification. With the ratification of ILO Conventions Nos 29 and 105 on forced labour in 2005, Mongolia joined the list of countries that have accepted and ratified all eight core Conventions. Furthermore, preparations are under way to ratify other ILO Conventions, such as Convention No. 160 on labour statistics, Convention No. 187 on the promotional framework for occupational safety and health and Convention No. 102 on social security.

The ratification of the social security Convention will promote the reform of social welfare and insurance schemes in Mongolia and will provide an essential framework for the establishment of a development-oriented social security system. The improvement in national legislation so as to raise it to the level of international standards is one of the core conditions for promoting decent work. Therefore, as a member State, the Government of Mongolia pays particular attention to further improving the legal framework for the implementation of ratified and soon-to-be-ratified Conventions. In cooperation with the ILO, amendments to the law on the labour force and on the law on occupational safety and health are being drafted in accordance with international labour principles. I would like to express our appreciation to the ILO for its technical assistance in drafting the abovementioned legislation.

The IPEC programme, encouraging productive and decent work for youth, promoting the employ-

ability and employment of people with disabilities through effective legislation and social dialogue, is now being successfully implemented in Mongolia. The conclusion of the first two phases of the IPEC programme has contributed significantly to the implementation of public policy on children's issues, so as to enhance public awareness of child labour and to accelerate national incentives aimed at eliminating the worst forms of child labour. There is an apparent need to broaden the scope and efficiency of our cooperation in the future, especially since the Government of Mongolia has proclaimed 2007 as the year of great endeavours and a year of creation of new jobs. This will serve as a concrete step towards implementing the Decent Work Agenda, with strengthened collaboration among governmental and non-governmental organizations in the private sector.

In conclusion, within the framework of our national development strategy, a wide range of policies – such as implementing the country action plan for decent work, facilitating employment, improving labour statistics, strengthening social dialogue and reforming the social security system – will be systematically undertaken. Cooperation among member States, technical assistance and support from the ILO will certainly play a very important role in this effort.

---

Ms. PILLAI (*Government, India*)

I compliment the Report of the Director-General for advancing the Decent Work Agenda and tripartism. Especially relevant are the ILO's efforts towards achieving synergy for sustainable development. Promoting and protecting the interests of the workforce remain the cornerstone of the ILO's policies and principles. Hence, the ILO has garnered widespread support for highlighting the social dimensions of globalization.

Globalization has led to a process of increasing economic interdependence between all countries in the developed and developing world. Over a period of time, it has been observed that globalization has had a mixed impact. We therefore have to make a concerted effort to maximize the benefits of globalization and minimize its negative outcomes. This can be done if, as part of the global efforts to promote decent work, we forge closer links with the efforts of the ILO to give an impetus to an inclusive growth strategy and adopt special measures for those persons who would normally be excluded.

At the same time, without growth we cannot generate the resources needed for investment in the social and physical infrastructure, which is why India's current growth strategy and its development plan promote faster and more inclusive growth.

India has a well-established tradition of tripartism and of consulting stakeholders on all important policy matters. India also abides by its decision to work with the international community in the common effort to promote economic and social development and to achieve the goal of generating full and productive employment and decent work for all.

Here, I would just like to raise a couple of issues. The objective of promoting social transition to "green jobs" requires careful thought. While the objective itself is laudable, because it aims at promoting intergenerational equity by protecting the environment, in practice it may be used as a means of erecting non-trade barriers against developing countries. The creation of green jobs is an essential

adjunct to sustainable development. The interpretation of the term "green job" is itself varied. While, in the organized sector, it is easy to identify pro-environment measures, the same may not hold true for the unorganized sector. Further, developing countries cannot be expected to leapfrog to green technologies without adequate technical and financial support. We thus have to guard against the tendency to use carbon credits as a tool. Protection of the environment is a significant reference point nonetheless for all development programmes as there are major economic, social and human costs involved. From this perspective, we support the priority issues outlined in the Director-General's Report on green jobs, and the transition initiative, with its focus on social protection, skill training and other measures to facilitate a fair transition.

The issue of wage inequalities is relevant to the goal of profit maximization. While income equity remains an important policy objective in India, some degree of inequality in the present developmental context is inevitable. To redress this issue in India, the Minimum Wages Act 1948, updates the floor level of wages for a large segment of our workforce.

Simultaneously, efforts are being made to increase significantly skill training for the workforce to enhance their bargaining capability. Coupled with the protection given by the State, we expect that wage disparities can be absorbed by greater employment intensity. India's strength lies in labour-intensive modes of production and we have already adopted the ILO core labour standards and have ratified Conventions which are of relevance to us. However, we do not agree with the use of labour standards and carbon accreditation as non-tariff barriers against countries.

On the issue of social justice, we need to consider that priorities will always encounter resource constraints; thus distributing opportunities for access to jobs and decent work would therefore be a better goal. A better labour market assessment across the country presupposes common definitions of crucial concepts such as unemployment and wages. Different definitions often lead to different end results for the same processes, thus making the assimilation of varying labour standards into a single benchmark so much more difficult. A major initiative on the subject across nations would be opportune. It is also necessary to integrate rural and urban development based on the population dynamics in each country.

The sustainability of the reform process across nations presupposes that these have to become home-grown, intrinsic and self-propelled. In the endeavour to realize sustainable development, it is crucial that international agencies cooperate with each other in their specialized areas. We therefore warmly compliment the ILO's initiative to create an enabling environment for this kind of strategy.

---

Mr. QARQEEEN (*Government, Afghanistan*)

First of all allow me to convey my congratulations on the election of Your Excellency as the President of the 96th International Labour Conference. I am sure Your Excellency's guidance will play an important and effective role in reaching the goals for the Conference. I would like to take the opportunity to extend the full support of the Afghan delegation for the agreements and conclusions of this Conference.

The Global Report issued in the context of follow-up to the ILO Declaration on Fundamental Principles and Rights at Work is focused on the elimination of discrimination in respect of employment and occupation. I am pleased to announce that our country has ratified the ILO Equal Remuneration Convention, 1951 (No. 100), and the ILO Discrimination (Employment and Occupation) Convention, 1958 (No. 111), and has taken specific steps towards their implementation.

The new Labour Code, which has been approved by the Government, stipulates and secures equal rights and supports the rights of workers. Paragraph 1 of Article 8 of the Labour Code provides for equal pay for equal work for workers in the Islamic Republic of Afghanistan.

Moreover, the new Labour Code provides that there should be no discrimination in recruitment, salaries and allowances, occupation, profession, right to education and social protection. Also, the Code stipulates that there should be no discrimination in payment of wages.

In compliance with the ILO Vocational Rehabilitation and Employment (Disabled Persons) Convention, 1983 (No. 159), the Ministry of Labour, Social Affairs, Martyrs and Disabled, in consultation with social organizations and partners, has drafted a national employment strategy for people with disabilities, which will be approved in the near future.

Our country is reviewing the Vocational Rehabilitation and Employment (Disabled Persons) Convention, 1983, (No. 159), to take necessary steps towards ratification

To improve employment opportunities for people with disabilities, which is one of the goals in the Afghanistan National Development Strategy, an employment committee, composed of national and international organizations, has recently been set up under the supervision of the Ministry.

As far as women's employment is concerned, steps have already been taken, with the cooperation of the Ministry of Women's Affairs. Despite the fact that we attach special importance to this issue, current problems have been a major obstacle for taking sufficient steps in this regard. Nonetheless, the implementation of the National Action Plan for Women in Afghanistan, which will be signed by the President in the near future, will resolve the issue.

We are working on a programme on employment for security which contain better methods for seeking and finding employment. Policy formulation and the strategy of this programme and its incorporation in the development plans of the country, to which we have devoted a great deal of attention, are key issues.

It is worth mentioning that, taking into account the national employment problem, and in line with government policy on reduction of unemployment and social support, it was deemed necessary to equip human resources with employment skills for the national economy and integrate them into the labour market.

In accordance with the instructions of the President of our country, the National Skills Development Programme was included in the priority programmes of the Government and is operating under the leadership of the Ministry. In order to provide better services for employment, employment service centres with state-of-the-art equipment have been established in the country within the boundaries of the limited means available.

The Government of Afghanistan has undertaken efforts to provide every facility in compliance with the United Nations Millennium Development Goals and the Afghanistan National Development Strategy for the elimination of poverty and unemployment and providing employment opportunities for workers.

The Government is making efforts to reconstruct and rehabilitate infrastructures as quickly as possible. The Government encourages local and foreign investors to invest in the manufacturing and industrial sectors, and seeks to provide employment opportunities in agriculture and handicrafts.

Providing employment is one of the greatest challenges facing our country. As a consequence of imposed wars and the resultant destruction, the provision of employment opportunities is of critical importance for securing the livelihoods of millions of Afghans.

Taking into account the fact that more than 30 per cent of the Afghan labour force is facing unemployment, job creation, which plays a key role in the construction of Afghanistan, is one of the main components of the Afghanistan National Development Strategy.

However, due to financial and technical limitations, job creation has not yet reached expected levels in the development plans and policies of the country. We hope that the ILO, other international organizations and friendly countries will provide the necessary facilities and assistance to us in that regard.

The initial work on the drafting of the national employment strategy has begun. I am pleased to announce that based on the recent understanding between the Ministry and the Regional Offices of the ILO in New Delhi and Kabul, we have agreed to put the action plan for the formulation of the national employment strategy at the top of our agenda and initial work on the drafting of the employment strategy has begun. We need the technical assistance of the ILO in this regard. In the past, the ILO has extended such assistance to a large number of countries.

We have made every effort, not only in the areas described above, but we have also taken steps to ensure decent and productive work, and we have developed a significant body of labour related legislation.

It is worth noting that we have initiated discussions with the ILO on the development of a Decent Work Country Programme. I express my support for declaring this decade the Asian decent work decade.

Discussions have been started with the ILO on the development of a Decent Work Country Programme and I am pleased to announce that the Council of Ministers of the Government of the Islamic Republic of Afghanistan has given its approval for the ratification of the ILO Minimum Age Convention 1973, (No. 138).

---

Mr. JAHROMI (*Minister of Labour and Social Affairs, Islamic Republic of Iran*)

Today, the plenary sitting is taking place in an environment adversely affected by unfair globalization. Peace, security and human rights as critical to any prospects for fair development are absent from many parts of the world and, particularly, from our neighbourhood.

Out there, there are 280 million children who are still working, and around 250 million unemployed

in Asia alone, some of them are caught up in the horrendous repercussions of the war in our backyard, as well as in Lebanon and other Arab-occupied territories.

The Global Report, *Equality at work: Tackling the challenges*, also reminds us that discrimination and double discrimination, such as that against women of colour, permeates not only the sphere of labour relations, but also that of international relations.

Globalization would truly lead to prosperity for all if all nations were more or less at the same stage of development and could turn to account its benefits equally. Unfortunately, many nations lack the resources, the infrastructure and the capacity to benefit from it now. Even those few among the developing countries who have ventured to bridge their abysmal scientific and technological gap with developed countries, are in certain cases discriminately coerced to relinquish their hard-earned domestic scientific achievements.

We all need to address the challenges of the new millennium including discrimination, inequality, intolerance, unemployment, global warming and the environment, both at national and international levels. We are therefore of the view that our peaceful nuclear energy programmes, and those of other developing countries in pursuance of scientific and economic prosperity, should not be discriminated against and adversarially confronted.

The purpose of the Global Report is to provide a dynamic global picture. This should enable us to evaluate the effectiveness of the action undertaken by the Organization and the challenges we still face.

We are committed to achieving the objectives of the Decent Work Agenda and the Millennium Development Goals. Working towards economic growth, improving productivity, creating job opportunities, our Government has adopted a number of strategic initiatives. By mobilizing monumental financial grants and technical resources, it is striving to ensure equitable and sustainable employment opportunities for all.

To curb one of the highest unemployment rates in the region, we have placed employment at the centre of our economic and social policies. Creating a promising environment for growth, we managed to create almost 2 million new job opportunities within the last two years, and are striving to reduce the unemployment rate to more desirable levels within the next three years. Equal remuneration for men and women, elimination of child labour, promotion of social justice and empowerment of the vulnerable and promoting health and safety at the workplace, are being successfully implemented, too. Freedom of association, youth and women's employment, the promotion of Small and medium-sized enterprises, ensuring sustainability of the enterprises are also on the top of our agenda.

In conclusion, the Report of the Director-General, *The situation of workers of the occupied Arab territories*, as in previous years, describes the grim plight of people in the occupied Palestinian territories and in the occupied Syrian Golan. According to the Report, separation barrier, the pervasive system of permits and checkpoints and the construction of the wall put in place by the occupying power, have virtually paralysed the daily life of Palestinians. We therefore urge the ILO to provide in the regular budget for its projects in occupied Palestine so as to alleviate part of the current plight of the Palestinian people.

---

Sr. TOMADA (*Ministro de Trabajo, Empleo y Seguridad Social, Argentina*)

---

Esta es la quinta vez que me dirijo a esta Asamblea en la condición de Ministro de Trabajo de la Argentina.

A raíz de ello estuve, releyendo mi primera intervención en la 91.<sup>a</sup> reunión de la Conferencia de la OIT de 2003. Se trata de un ejercicio riesgoso sobre la consistencia y coherencia de nuestro discurso y acciones durante la gestión.

Cuatro años después, podría suscribir todas y cada una de las definiciones incluidas en esa declaración. En particular, encontré dos que fueron ejes centrales de nuestra acción, en este tiempo en que nos tocó la responsabilidad de conducir la administración del trabajo y ejecutar la política laboral del Gobierno del Presidente Kirchner.

En primer lugar, destacamos en aquella ocasión nuestra reivindicación del trabajo «como mecanismo básico de inclusión social», enfatizando que ello constituiría «el centro de las políticas públicas» en las que estábamos, y seguiremos, empeñados.

Con legítima emoción puedo decir que estos cuatro años han sido años de crecimiento ininterrumpido del empleo, de puesta en marcha de amplios programas de capacitación vinculados a la producción, de construcción de un servicio público de empleo en todo el país y de recuperación de la inspección del trabajo.

La segunda definición esbozada en esa oportunidad y que orientó, y seguirá orientando, nuestro trabajo fue la importancia que asignamos al diálogo social, a la negociación colectiva y al fortalecimiento de los actores sociales.

Prueba de ello, es un sistema de relaciones laborales abierto y participativo con 2.800 sindicatos, una tasa de afiliación superior al 35 por ciento y los 1.350 convenios colectivos que se renuevan anualmente.

Los argentinos estamos saliendo de la crisis y sentando las bases de un crecimiento sostenible de largo plazo para nuestro pueblo. Permítame señor Presidente, algunas pocas cifras.

Mientras en los años 90 se destruían casi 20.000 empresas, en estos cuatro años hubo un crecimiento neto de 66.000 empresas. La proporción de la canasta básica que podía adquirirse con un salario mínimo era del 34 por ciento, en la actualidad es del 87 por ciento.

La tasa de desempleo pasó del 27 por ciento en abril de 2003 a menos del 10 por ciento actualmente y, por su parte, el trabajo no registrado ha disminuido casi un 10 por ciento.

En los hogares de los jubilados, la pobreza descendió del 28,6 por ciento al 9,5 por ciento.

Cabe destacar que los valores y las políticas que nuestro gobierno ha impulsado para lograr estos resultados están inspirados en los principios de la OIT y han representado un marcado contraste con las políticas impuestas desde el llamado Consenso de Washington.

Por eso quiero acá, valorar la contribución de la OIT para la construcción y articulación de un discurso alternativo al producido por poderosas instancias financieras internacionales que basaron su visión en la confianza exclusiva en el mercado y su mano invisible.

No es casual que Argentina haya pasado de ser el mejor alumno del Fondo Monetario Internacional (FMI) a ser reconocida por la OIT por su compro-

miso con el trabajo decente y su vocación productiva.

Este reconocimiento es el resultado de logros que repercuten en la vida de la gente todos los días.

Con respecto a la Memoria del Director General quiero ser muy enfático. Este es el momento de desarrollo sostenible con trabajo decente. Este es el momento para sostener la necesidad de un estado presente, mediador, activo y árbitro del natural conflicto laboral cuando se trata de distribuir adecuadamente el ingreso.

Este es el momento del diálogo social con más urgencia que en ninguna otra época. No hay posibilidad de implementar políticas perdurables y eficaces sin la participación de los actores sociales. Así lo entiende mi Gobierno, promoviendo el diálogo con todos los sectores, a todos los niveles sin excepción y con toda libertad.

Avanzamos mucho, junto con los empresarios y los trabajadores, falta aún, lo sabemos y no bajaremos los brazos.

Finalmente, querría referirme a la discusión general sobre el fortalecimiento de la OIT.

Como ex Presidente de su Consejo de Administración, creo que, en efecto, debemos fortalecerla. Para mejorar, debe intensificar los actuales esfuerzos por ampliar su participación y su influencia ética en la «arquitectura internacional», desde su singularidad, dándole coherencia con los otros organismos multilaterales. Para la Argentina, el tripartismo de la OIT debe preservarse en el sistema de las Naciones Unidas.

Señor Presidente, la Argentina, a partir del 2003, colocó el empleo decente en el centro de las políticas públicas. Trasladando legítimamente los valores y principios que aplicamos a nuestra política doméstica al escenario internacional, creo que el trabajo decente debe ubicarse en el centro de las políticas globales. Esa es, me parece, la consigna más efectiva para impulsar el desarrollo global sostenible.

Esa es nuestra propuesta y nuestra convicción.

Por nosotros, por nuestros pueblos, por la igualdad, por la libertad y por la justicia social.

---

*Original Arabic: Mr. YEHIA (Worker, Palestine)*

During this session of the International Labour Conference, we hope to achieve concrete results towards improving the situation of workers in Palestine. We should like to thank the Director-General and the representatives of the Workers and the Employers in Governing Body for their statements affirming the inevitability of a solution and their goal of helping the Palestinian workers. We should also like to thank all of those who have preceded us at this podium insisting on the importance of providing an opportunity for Palestinian workers to live a decent life.

There is an Arab poet who said that one day the chains will be broken. Palestinian workers live at this moment in extremely difficult circumstances of poverty and privation, exposed to the worst forms of mistreatment, assassination and torture committed by the Israeli army. They also suffer from displacement and imprisonment. They are the victims of savage campaigns of harassment and arrest carried out by Israeli forces in Palestine. More than 11,000 have been imprisoned by the occupying forces. Israel has not ceased to violate the legality and will of the Palestinians by arresting and detaining a number of elected Palestinian officials and ministers of the

Palestinian Government, the Government of National Unity. Israel continues to shut off all access to the territories and to impede access to the labour market, in contradiction to the Paris Protocol of 1994. Israeli propaganda is spread to the effect that Palestinian workers have facilities for working inside Israel, but this is not true. There are no more than a few thousand Palestinian workers who are able to cross the "Green Line". These are violations which are taking place in plain view. Israelis are also trying to Judaize the Palestinian territories and use them to build new settlements. This limits available possibilities for Palestinians to earn their living. They are also changing the sacred nature of Jerusalem through excavations at the Al-Mosque. Israel has continued construction of its racist wall, which divides our territory into small cantons and has increased the unemployment rate, which stands at more than 50 per cent according to local standards. This has led to a two-fold increase in the poverty rate, which is now more than 65 per cent. Our workers are suffering many violations committed by the Israeli army at checkpoints, and they are suffering extortion, humiliation, physical aggression and, not to mention the destruction of productive enterprises. More than 42 per cent of companies have been affected. Given the extremely serious situation, we, the Palestinian workers, affirm first of all that we ask the ILO to take upon itself its responsibilities to Palestinian workers. We ask that the ILO work in this region with transparency and credibility, in order to avoid any repetition of the conclusions found in the Report concerning the Palestinian situation and the situation in the occupied Arab territories. This Report is simply descriptive in nature, and it is not even very accurate in its description of our workers situation. We insist upon the fact that the high-level mission which visited Palestine was simply a committee which described the situation and not a committee of investigation. This committee did not deal with Palestinian authorities and sources in a spirit of transparency. It did not advertise its visit to certain legitimate institutions, such as the Confederation of Workers of Palestine, on the basis of orders from outside the Palestinian framework given by people, who consider themselves to control our labour movement.

Secondly, we call on the organizations within the United Nations System to render justice to Palestinian workers and to help them to activate the Palestinian Fund for Employment and Social Protection on the base of standards which respond to Palestinian needs and which do not prejudice our national interests. We ask for support for job creation projects and collaboration with the social partners in Palestine, and we ask for social protection, decent work and sustainable development. We would like these projects to be not simply emergency aid projects but development projects.

We ask the Conference to denounce the Israeli occupation of the Palestinian territories, of Syrian Golan and of the Lebanese Sheba farms. Let us not forget our need and duty to support workers in Iraq, our brother country, in Sudan and in Somalia. We also ask the Conference to support the Palestinian national struggle and to consider it a legitimate struggle until we can establish an independent Palestinian state with Al-Quds as its capital and achieve the return of refugees, the suppression of settlements and the release of our courageous prisoners in Palestinian prisons.

I am privileged to make my short remarks before this eminent presence of delegates at this session of the International Labour Conference. This is a very important forum where we come together to express views, concerns, and matters of interest, as well as discussing the issue of socio-economic development. I strongly believe that the views expressed, the concerns raised here, and the discussion that takes place, will certainly help us to understand the underlying problems and help the ILO to develop and shape new policies and programmes which are essential and relevant to deal with the new challenges.

The Director-General's Report and the issues raised in it have drawn our attention. The Report has focused on various issues, with special focus on fundamental principles and rights at work. The Report points out many sectors that lag behind in terms of complaints regarding standards and improvement in working conditions and the quality of working life. Why is that so? It is because countries have their own specific conditions and do not have similar capacity for addressing the problems they face.

It has been found that over the years, countries have achieved significant development in the promotion of labour standards, improving working conditions and enhancing the quality of life for working people. However, in the changed business environment, businesses are facing problems in sustaining themselves while meeting the increased demands of workers. Failure to improve the situation is affected by various factors. However, it is not worth considering only one side of this. It is more important to understand the dynamics and the factors responsible for this and the problems being faced by business.

Most of you are aware of the situation we are facing in Nepal at present. We are passing through a period of transition which, on the one hand, provides ample opportunities while, on the other, creating immense challenges. However, we have been making efforts to address the socio-economic issues despite our various problems and the adverse business environment.

I would not like to repeat in detail the developments we have made, as our Government delegates have already shed light on those aspects. At present, our primary concern is to sustain existing employment and create conducive empowerment, while maintaining industrial peace and employment generation. The employers' organizations of Nepal are working together and actively involved in promoting good industrial relations, reducing gender disparities, eliminating child labour and developing better working conditions. A legal body is being established to work on legislative reforms, as well as to help industries and enhance the complaints procedures, labour laws and the regulations.

Youth unemployment is one of the crucial issues in Nepal. Taking into account the youth situation in the country, we have already started some work on it and are planning to implement a project on youth employment in cooperation with the ILO. We believe all these efforts are directed towards developing a decent work environment in the country.

The changed business environment and various influences have put pressure to make changes and employment adjustments. It has become necessary

to review policy and legislation. In this regard, the impetus has been given to social dialogue, with the Government and trade unions.

Distinguished delegates, efforts to establish industrial peace are our major concern. It is widely accepted that labour flexibility is required to ensure industrial growth and to respond to the global forces and emerging trends. Therefore, I would like to ask the ILO to look on the various issues that countries are facing across the globe and give its extensive support.

---

Mr. FARRUGIA (*Employer, Malta*)

---

On behalf of the Maltese Employers' delegation to this Conference, I would like to convey my congratulations on the Director-General's insightful Report. It has a sense of freshness and novelty in the sense that rather than focusing on one major theme, the Report opts to tackle a number of major issues that are interconnected in the manner that they address different aspects of the promotion of decent work for sustainable development.

The debate on sustainable enterprises, which is part of this year's Conference agenda, is a step in the right direction in that the role of business is recognized as being central to the achievement of decent work in the economy. However, the Report seems to suggest that world business is dominated by multinational enterprises, at the expense of ignoring the pivotal role of small and medium-sized enterprises, which are frequently the main generators of new investment, innovation and employment opportunities. This is definitely the case in Malta, where more than 85 per cent of enterprises are classified as SMEs. If the ILO is to cover labour issues in their entirety, the debate on sustainable business and decent work needs to come down from a rather elevated and idealized level of discussion to cater for the reality that is faced by the vast majority of enterprises, which need the support of a business-friendly regulatory environment for them to flourish and generate employment.

Certainly one major global challenge facing humanity is the conciliation of economic development and the material well-being of the world's citizens within environmental constraints. The Report rightly points to the need for a fully integrated sustainable development strategy, stating that the technological transition to sustainability can itself be a source of creation of green jobs. The point that sensitivity to environmental issues and job creation are not mutually exclusive is certainly of great relevance to Malta, as over-development may provide short-term boosts to the economy but have negative long-term consequences.

In his Report, the Director-General states: "Trade liberalization is associated with both job destruction and job creation." This certainly reflects the experience of the Maltese economy over the past few years, in particular since it became a Member of the European Union. There has been considerable job destruction as numerous low value added manufacturing units have relocated to cheaper cost destinations, and thousands of jobs were lost. On the other hand, Malta has experienced an unprecedented influx of foreign direct investment during 2007, which, together with a healthy expansion in financial services, has resulted in the creation of new jobs, a positive increase in real GDP growth and a drop in the rate of unemployment. It is a challenge for all social partners to see that the gains of these

developments are available to all society. A section of the labour force is still employed in low value added sectors, others have lost their jobs and need retraining to integrate themselves in jobs requiring new skills.

There is also a stronger need for closer collaboration and stronger dialogue between employers and educational institutions to channel the human resource into more productive channels, and to reduce the number of school drop-outs, which, in spite of substantial investment in education, is still of concern in Malta.

The Report provides a negative view of income inequality. However, it must be acknowledged that income inequality resulting from labour market forces can also be a way of encouraging job mobility to reflect the needs of a dynamic economy. Income inequality can, in fact, be a positive force as long as all citizens have the opportunity to avail themselves of better employment prospects.

The Director-General's Report makes a reference to the ILO's Constitution, which states that the organization of work cannot be separated from the organization of social responsibilities. This principle applies to all social partners, not just employers. Governments must live up to their social responsibilities through the provision of a regulatory framework that promotes enterprise. Unions also need to carry their share of responsibility in acknowledging that companies operate within a competitive environment. This is the way that social partners can work to reduce decent work deficits.

The Director-General points to regular full-time employment as an indicator of the extent of decent work deficit. I think that it is difficult to have an international benchmark to measure this. Moreover, although Malta has a relatively high percentage of its labour force in full-time indefinite employment, new demands from both organizations and workers may require a move away from traditional forms of employment. This should not automatically be interpreted as a widening decent work deficit. The concept of "flexicurity" that is being discussed in the European Union seeks to promote the interests of both employees and employers through more flexible work contracts. For example, the provision of part-time employment and temporary agency work can, together with other measures such as childcare, facilitate a higher female participation rate in the labour force.

On social protection, the Report is overambitious when it suggests a global approach to organizational solidarity across borders. It would be more realistic for the ILO to be instrumental in diffusing tripartism across nations, and through such tripartism, customized solutions to the issue of sustainable social protection can be designed, since national situations differ tremendously in their demographic characteristics, availability of resources and socio-cultural dimensions. The concept of social solidarity across borders is useful in tackling issues that small nations in particular cannot resolve on their own. A clear case in point is migration across the Mediterranean Sea. A comprehensive, transnational effort is required to address this problem, as small nations like Malta cannot be reasonably expected by the international community to handle such massive demographic movements single-handedly.

In conclusion, the tripartite model of social dialogue that defines the character of the ILO is re-

flected in the Maltese social dialogue institutions, and through the strength of this constant collaboration major challenges have been faced and surmounted. This is evident in the fact that Malta has been successful in its efforts to join the eurozone in the beginning of 2008. This achievement opens a new chapter in the history of the economic development of Malta, which has been possible through the input of all social partners. It is a clear demonstration that a convergence of ideas between government, unions and employers is possible on crucial issues to further the national interest. As the Report states, this is the basis of good governance in democratic societies and dynamic economies.

*(Mr. Barde takes the Chair.)*

---

Mr. BAAH-DUODU (*Government, Ghana*)

I am honoured to deliver this statement on behalf of the Honourable Sadique Boniface Abubakar, Minister for Manpower, Youth and Employment of the Republic of Ghana, who has had to return to Ghana to attend to urgent matters of State.

On 4 June 2007, His Excellency Mr. John Kufuor, President of the Republic of Ghana and current Chairman of the African Union, addressed this august body. In his statement, which focused on Ghana and Africa, he underscored the ILO's positive impact on the quality of life in our part of the world. It is in this context that I wish to express our appreciation to the ILO for the good work that it is doing to uplift the dignity of mankind in workplaces, whether in the formal, informal, public or private sectors. I also wish to reaffirm Ghana's commitment to the ideals and work of the ILO. We believe that the ILO provides strength, direction and support for all nations, both weak and strong, in the pursuit of good governance, fairness and equity in a world that is free thinking as a result of new technologies.

Ghana fully endorses the ILO's determination and the Director-General's effort to ensure that the Decent Work Agenda, poverty reduction, employment, achievement of the Millennium Development Goals, tripartism, social dialogue, employers' and workers' rights, and good governance, are achieved in member countries. It is against this backdrop that we commend the Director-General's Report for touching on key issues by which decent work for sustainable development could be promoted.

The Ghana decent work pilot programme aims at contributing towards the achievement of the Millennium Development Goals within our second growth and poverty reduction strategy.

The programme has had a significant impact on the income of the participants. It has also created job opportunities, especially for the poor and for operators in the informal sector, thereby improving their incomes and standard of living.

The Government of Ghana supports the ILO's principle of tripartism. In order to ensure a peaceful industrial atmosphere in the country, we have been cooperating with the social partners in arriving at very important decisions that have implications for our socio-economic development, especially in employment creation and tripartism.

Ghana has decided to implement a social protection policy, beginning from this year. To this end a national social protection strategy has been developed as a framework for government and civil society to support the extremely poor in attaining their

fundamental human rights, as enshrined in the international human rights instruments, as well as attaining other international and national goals.

This includes strategies which will facilitate early achievement of the Millennium Development Goals, the objectives of NEPAD and those of our own poverty reduction strategy. The strategy serves as a springboard for people to leap out of poverty.

The vehicle for the achievement of the social protection strategy is the livelihood empowerment against poverty programme leap. This will provide conditional cash transfers to the extremely poor with productive capacity but no alternative means of meeting their subsistence needs.

Unconditional grants will also be given to the aged, that is, those above 65 years of age, to people living with HIV/AIDS, care givers, vulnerable children and people with severe disabilities.

There are challenges in our pursuit of the aforementioned goals and commitments. We are, however, convinced that our partnership with the ILO offers us opportunities and expertise which will enable us to overcome these challenges. We are therefore going to strengthen our partnership through cooperation with and participation in ILO activities and programmes.

---

Ms. BYERS (*Worker, Canada*)

I appreciate the opportunity to address this year's Session of the International Labour Conference, and would like to briefly address some of the challenges outlined by the Director-General in his Report.

The starting point for working people is the growing gap between the very rich and the ever increasing class of the working poor.

By 12.30p.m. in Canada, on New Year's day, while many Canadians were still nursing hangovers, Canada's 100 highest paid chief executive officers had already pocketed what it will take minimum wage workers to make in 2007 altogether.

In 2004, the richest 10 per cent of families earned 82 times more than the poorest 10 per cent. In after-tax terms, the gap is at a 30-year high.

Up to 80 per cent of families lost ground or stayed put compared to the previous generation, in both earnings and after-tax terms. The poorest saw real incomes drop.

In our country, the poorest people are Aboriginal people, people of colour, people with disabilities and, of course, women. The gap is growing at a time when Canada's economy has doubled in size compared to 1981. Unemployment is at a 30-year low. More Canadian families raising children are working, and they are working longer hours. The gap between the rich and the rest of us should be shrinking, but it is not.

The growing gap, in both developed and developing economies, is the result of a globalization which profits only the rich at the expense of the vast majority of people. It is also the result of the deliberate abdication by governments, including mine, which have abdicated their responsibility to develop economic and industrial strategies to offer decent jobs and decent work for all.

Canada is losing tens of thousands of good jobs that pay family-supporting wages because our manufacturing sector is in crisis.

Since 2002, Canada has lost more than a quarter of a million manufacturing jobs, about one in ten positions. Statistics Canada recently concluded that when Canadian workers displaced by firm closures

find other jobs, they suffer an average decline of 25 per cent in annual earnings.

So, there is indeed a long way to go for working people everywhere to meet the objective of sustainable development with decent work.

While we welcome the efforts by the Director-General and the Office to bring greater coherence on the Decent Work Agenda within the UN system, more work needs to take place at the national level to reflect this progress.

Tripartism and social dialogue, quintessential to this body, represent a fundamental contribution to building that coherence.

I am happy therefore to report that the Canadian Employers Council has recently agreed to join with Canadian workers in efforts to bring the Canadian Government to ratify the Tripartite Consultation (International Labour Standards) Convention, 1976 (No. 144). We are hopeful the Government will proceed swiftly with the necessary consultations and ratification.

Also, the Supreme Court of Canada declared last Friday, for the first time, that the collective bargaining rights of workers are protected by the 1982 Charter of Rights and Freedoms and are also a fundamental aspect of Canadian society.

The ruling refers to a 2002 case, familiar to the Committee on Freedom of Association, in which the Government of British Columbia arbitrarily cancelled the contracts of thousands of healthcare workers and allowed for mass lay-offs outside the collective bargaining process.

The Justices concluded that "the Charter protects the capacity of members of labour unions to engage in association, in collective bargaining on fundamental workplace issues", and it further noted "recognizing that workers have the right to bargain collectively as part of their freedom to associate reaffirms, enhances and promotes the values of dignity, personal autonomy, equality and democracy that are inherent in the Charter".

The ruling, notably, made a clear link between Canadian rights protected by the Charter and those in international treaties signed by Canada as a member of the United Nations and the International Labour Organization.

The Justices declared "the Charter should be presumed to provide at least as great a level of protection as is found in the international human rights documents that Canada has ratified".

Canadian working women and men look forward to decisive action by all levels of government and the day when these rights are respected in both law and practice.

Finally, we welcome the improvements to the very important work of the Committee on the Application of Standards over the last couple of years and look forward to ongoing efforts.

Unfortunately, this year, despite the ongoing and dramatic situation faced by Columbian workers and their trade union representatives despite the evidence of the existence of black lists of trade unionists, despite the evidence of collusion by both government officials and multinational enterprises with paramilitary forces, Colombia was not on the list of cases in front of the Standards Committee.

This setback to the Organization is not only regrettable, it undermines its very credibility in the eyes of people everywhere.

Nonetheless, we look forward to moving ahead with a stronger, more effective ILO, with the support of all, in the years to come.

---

Mr. ANGELO (*representative, European Confederation of Management Staff*)

---

First of all, as President of the International Confederation of Management Staff, I wish to thank the ILO for this invitation to the 96th Session of the International Labour Conference and to give our contribution, as in previous years.

I wish to intervene on the issue of the Global Report, *Decent work for sustainable development*. Within the framework of the Lisbon Strategy, the European Union has launched the challenge to make Europe the most competitive area in the world as a knowledge-based society.

Managers have a key role to play regarding this topic. Their involvement is indispensable for implementing a "quality jobs" policy.

We have promoted several initiatives in order to create a network of different players – schools, universities, research institutes, companies and employees' unions – in order to promote and create more and better jobs or, as we prefer to say, better and more jobs. In fact, only professional skills and capacities can ensure secure jobs for life. That is why knowledge is the first priority for all workers. But nowadays, that alone is not enough. We need lifelong learning in order to keep knowledge updated in response to the changes coming from new technologies, and we need to change the entire production systems in a sustainable and environmentally friendly way.

We think that the ILO is in a very crucial position to promote this goal at the international level. In this regard, our Confederation, as representative of managers and professional staff, also plays a key role at company level as a bridge between employers and workers.

---

*Original Arabic: Mr. ALJABRI (Worker, Oman)*

---

I am pleased to speak to you on behalf of the workers of the Sultanate of Oman. I spoke to you last year at the 95th Session of the International Labour Conference on behalf of the main commission representing the workers of the Sultanate of Oman, whose establishment was the first step towards trade union activity. I am therefore particularly pleased to be here again today as representative of the General Federation for Oman Trade Unions, which was established following the promulgation of a Royal Decree issued by the Sultan of Oman, allowing workers to form trade unions that protect their rights and interests and represent them on matters pertaining to their work. The Decree further allows for different trade unions to associate and form a general federation of trade unions to represent them in local, regional and international bodies.

The workers of the Sultanate of Oman have welcomed this reform of our labour legislation and the decisions taken in respect of the right to organize, the right to collective bargaining and the right to peaceful strikes and lockouts. It illustrates the Government's timely and constructive efforts to modernize legislation in accordance with international standards. The reform upholds the rights of all partners in accordance with the ILO Declaration of Fundamental Principles and Rights at Work, especially the Freedom of Association and Protection of the Right to Organise Convention, 1948 (No. 87),

and the Migration for Employment Convention (Revised), 1949 (No. 97). Legislation is currently being drafted that aims at modernizing provisions relating to health and safety at work as a means to strengthen the sustainable development of enterprises.

The next stage will be to assist new unions in Oman in building democratic institutions that can act in partnership with employers to achieve social, political and economic development. Our priorities will be the following: First, to promote a culture of trade unionism, collective bargaining and confidence-building between the social partners by way of seminars, workshops and on-site visits. Second, we aim at building the capacity of trade union leaders in terms of their organizational and management skills at both national and workplace levels. Third, to improve trade union leaders' representation and collective bargaining skills. Fourth, to incorporate tripartism in all employment negotiations, on the understanding that participation is the cornerstone of democracy. Fifth, to promote training and education for workers to help them deal with modern technological challenges and to improve productive capacity. Sixth, we intend to strengthen the role of women in the work of trade unions.

The General Federation for Oman Trade Unions, in cooperation with the ILO, has started implementing a project to establish trade unions, based on an action plan formulated in 2007. The project aims at setting up a national committee composed of representatives of local trade unions to disseminate information on the work of the General Federation for Oman Trade Unions by way of organizing a national conference before the end of 2007. We are also cooperating with a number of regional and international unions to prepare a five-year strategy for the FEDERATION, which includes a programme of action to promote trade union activities at the highest level, thus ensuring that trade unions can operate freely without undermining Oman's development goals.

We welcome the progress made by the ILO in implementing the Action Plan on the Elimination of Discrimination at Work (2004-07) and in closing the gender wage gap. We urge the Organization to continue its efforts to eliminate all forms of discrimination and to do its utmost to strengthen the principle of equality at the workplace. In application of the principle of equal opportunities, the General Federation for Oman Trade Unions is developing a project intended to promote the involvement of women in trade unions.

In conclusion, I would like to reiterate our appeal to the Director-General of the ILO to take account of the observations made by the Arab group on his Report on the situation of workers of the occupied Arab territories, and our call on the Organization to continue to play its crucial role in protecting workers who are suffering discrimination in those territories.

---

Mr. BORHANI (*Worker, Islamic Republic of Iran*)

---

Before I begin my speech on behalf of the largest workers' organization of the Islamic Republic of Iran, the Supreme Islamic Labour Council, I would like to pay tribute to the efforts undertaken by the ILO, and particularly by Mr Somavia, to improve the situation of workers throughout the world. I would also like to take this opportunity to pay tribute to the memory of the workers who, on 1 May

1886 in Chicago, shed their blood to defend their rights in the fight against exploitation and, in so doing, watered the seed that eventually grew into the ILO. Although over a century separates us from this event, we must admit, sadly, that the workers remain a vulnerable and fragile segment of society, all too often suffering the consequences of inter-State struggles and economic sanctions. As a result of its mandate, its importance and its effectiveness, it is vital that the ILO should protect these workers.

Although time is very short here, there are a number of points that I wanted to share with you.

Firstly, Iranian workers request and hope for support from the ILO in order to ensure the implementation of the Freedom of Association and Protection of the Right to Organise Convention, 1948 (No. 87) and the Migration for Employment Convention (Revised), 1949 (No. 97), not only in Iran but throughout all the member States.

Secondly, the Supreme Islamic Labour Council wishes to encourage the amendment of Chapter VI of the Iranian Labour Code concerning union representation and to ensure that it complies with relevant international standards. The Council also intends to work towards the establishment of a national confederation, taking into account the specific characteristics of Iran, bringing together all workers' organizations, both small and large, and all professional guilds. Ultimately, in order to help the workers negotiate and defend their rights as well as possible, the Supreme Islamic Labour Council puts its hope in membership of international workers' organizations. Here, too, assistance from the ILO would be very valuable to us.

Thirdly, the ILO is also setting up training programmes and workshops in order to build up its Members' skills to promote the sharing of knowledge. We hope that Workers' delegations will be able to participate in these training sessions and to derive the maximum possible benefit from the resources made available by the ILO.

Fourthly, generally speaking, employment remains a major concern for a number of countries where, with the increase in population figures, the transfer of knowledge, science and technology, and people's legitimate expectations of obtaining decent work, there is an assumption of a decent wage for decent work. The issue will have to be tackled in a professional way, and the ILO will have a major role to play in giving the necessary directions and guidance for optimal management of human resources, respect for workers' rights and equality at work.

Fifthly, world trade today would have us suppose that access to technology should be equal between countries (that is what the phrase "world trade" would suggest), but instead, it has become a threat to developing countries and third world countries as a result of the interference of certain multinationals in the market and the consequent deluge of imported goods. There is a growing gap between the very rich, who are becoming richer, and the poor, who are becoming poorer. As the ILO exists to guarantee the protection of workers and is therefore a major actor in protecting human rights, we hope that it will draw up coherent strategies and policies in order to commit itself even more to protecting human rights and to put an end to opportunist profiteering.

Sixthly, in conclusion, I would like to thank all the organizers of this 96th Session of the ILC and, in particular, Mr. Somavia and the Governing Body

of the ILO, and we hope that one day we will see justice for all and equality at work, the liberation of the occupied territory of Palestine by the Israelis and an end to the killings that are taking place in Iraq, Afghanistan and Colombia, among other places. In actual fact, the Iranian workers reaffirm their support for the Colombian workers, who do not enjoy fundamental freedoms. Their representatives are all too often arrested, have their goods seized and cannot bargain to make their legitimate rights respected. We hope that the ILO, together with the international community will be able to put an end to this intolerable situation.

---

*Original Arabic: Mr. AZOZ (Worker, Syrian Arab Republic)*

---

I would like to assure those present of the interest of our Syrian workers' delegation in continuing co-operation with everyone for the sake of our mutual interest in building a world that is free from any exploitation and manipulation.

This is a good opportunity to announce to you that last year saw considerable achievements for the benefit of the working class and people in Syria in various aspects of workers' lives. In particular, progress was made in enhancing the participation of working women in social and economic life, and their equality with men in regard to all rights and obligations. Our achievements also included providing decent jobs for citizens, especially young workers, and eliminating the worst forms of child labour. Syria was one of the first countries in the world to ratify the international Convention. We are proud to say that Syria is fully committed to the moral principles contained in that Convention and to countering any violation of its provisions.

In cooperation with the other social partners – the Government and employers – our union movement endeavours to ensure strict compliance with all of the Conventions ratified by Syria. This is especially so given that our country seeks to achieve comprehensive development which requires the efforts of all citizens in pursuit of the development and modernization policy under the leadership of President Bashar Al-Assad.

Despite this glamorous picture of the economy of our country, we assure you that our struggle for development is not free of troubles and obstacles. This is manifested in particular in the continuing Israeli occupation of our people and land for 60 years, and about 40 years of Israeli occupation of a beloved part of our Syrian land, the Golan Heights. The occupation forces are practicing various forms of persecution against our people, in full sight of all the world, and clearly flouting UN charters and resolutions, and especially the Fourth Geneva Convention. Many of the governments and speakers who took the floor here say they want peace, but in fact some are using every means to destroy other countries and violate their rights. Our captive people are living in a tragic situation in the prisons of the occupation. We call on the international community and all its honoured establishments and institutions, especially the International Labour Conference, to take a clear moral stance towards the practices of the criminal Israeli occupation against our people in the occupied Golan Heights. We also call upon them to condemn the policies and practices of the Anglo-American occupation forces in Iraq, who say they came to bring peace, but only brought destruction. All honourable and free people should affirm their solidarity with the Palestinian

Arab people in their legitimate struggle for liberation and the establishment of an independent state with Al-Quds as its capital. They should also stand by the Iraqi people in their legitimate struggle for the liberation of their country and recovery of its national sovereignty.

We appreciate all the efforts and activities of the ILO, especially its prominent role in enhancing and protecting union rights and freedoms, and also its initiatives in helping developing and poor countries in capacity building for trade unions and technical personnel. We also appreciate the role of the Director-General of the ILO and his wise guidance to the fact-finding commission he sends to the countries of our region in order to investigate the situation of workers and employers and Arab citizens who are under the occupation of Israeli forces in Palestine, the Golan Heights and the occupied Lebanese Shebaa Farms.

We believe in the importance and role of ILO in international life. We are committed to its principles, which we have ratified without any pressure. We are sure that the world would be a safer, better and a more stable place if everyone were committed to international labour principles, especially those forces and countries that speak about justice, humanity and human rights while at the same time violating the rights of the weak, under the pretext of many lies that are obvious to everyone. We are always ready to cooperate with all sincere and faithful people in achieving the principles and goals upon which the ILO was founded.

Finally, I wish you all every success and blessing.

---

Mr. ALAM (*Worker, Bangladesh*)

At the very beginning of my speech in this plenary session on the report of the Chairman on the Global Report presented before the 96th International Labour Conference I congratulate you and all of your colleagues here in the ILO Office for presenting such a report and express heartfelt gratitude to you all, along with all distinguished delegates, dignitaries from different countries of the world, on my behalf, and on behalf of all working people in Bangladesh. I also express my solidarity to the workers of Palestine and Iraq under foreign occupation for their patriotic fight for livelihood.

I listened to your report with all my attention and also I tried to go through the Report of the Director-General. I find these excellent with all the important aspects of ILO objectives, initiatives to meet them and firm commitment to working to eliminate all sorts of discrimination with regard to employment and occupation, based on sex, race, creed and belief. But it is hardly possible to make a critical appreciation of the Report in the short time allocated for discussion. Hence I intend to make some comments not on your Report but on the future initiatives of the ILO which could enable it to establish a friendly image in the mind of workers of developing countries, like my country Bangladesh.

Although we all are aware of the fact that the ILO, from its very inception, is a tripartite body, which includes workers, employers and the governments, understandably a common belief has developed among the workers that the main objective of the ILO is to safeguard the interest and rights of the working people. It is objectively correct that the other two parties within the ILO are not as vulnerable as the workers. The first party, government, is at the helm of the constituent country, having all the

authority to rule the country and make the laws. The second party, employers, have the wealth, and owning the industry possess the right to hire and fire the workers. The third party, workers, is the only vulnerable group with only manpower to sell and only finding strength in organization, unity and solidarity. Hence obviously the ILO is an international forum of the three parties that are not equal in strength, but to date it seems to us that ILO the ILO tends to act impartially in the view of natural justice and equity. Now we are reasonably afraid of the new initiative, according to which from now on the ILO, to implement its Decent Work Country Programme, decided to work with the WTO, IMF and some other world organizations like these.

Unlike the ILO, the working people of the underdeveloped countries have lost their trust in these international organizations, for a number of reasons. Because as per the prescription of these organizations, the so-called deregulation and structural readjustment in developing countries has thrown thousands of workers out into the street, jobless. Many of our viable enterprises were closed down by their prescription. It has already been proved that all their initiatives were aimed at the profitability of the multinational corporations, ignoring the national interest of the concerned constituent country and not in the interests of the workers. Hence we are very much concerned that the ILO may also lose its impartial character of safeguarding the interest of workers of the world by submitting itself to the interest of the transnational corporations.

In this perspective, I would like to reiterate that, the Decent Work Country Programme, or any initiative to eliminate any sorts of discrimination must be taken in consideration with the perspective of the respective society. Because as you also mentioned in your Report, the cause of any discrimination in respect of employment or occupation or in enjoying any fundamental social rights exists in the core of the society. So we must not forget that discrimination in a society is in fact the mere manifestation or symptom of the disease, not the cause. We cannot make an impoverished society lacking the means to meet the fundamental needs of man, with severe exploitation and with a gulf of difference between haves and the have nots, free from discrimination. And hence, to get rid of it or to eradicate discrimination from society, we have to think how to root out the basic reason for this illness. Without fighting simultaneously to defend economic, social and cultural rights, efforts to eliminate the discrimination in respect of employment or occupation based on gender, caste and creed, race and beliefs will be futile.

Finally I urge to you and the ILO Governing Body on behalf of the working people of the world in general, and the workers of Bangladesh in particular, to initiate the battle to defend the socio-economic and socio-cultural structure simultaneously and to uproot the basic reasons for society lagging behind, that is its poverty in all respects.

---

Sr. ROJAS ROJAS (*empleador, Ecuador*)

Señor Presidente de la Asamblea, señores Vicepresidentes, señores delegados de la Conferencia, en nombre de los empresarios ecuatorianos y en el mío propio, reciban ustedes nuestro cordial y respetuoso saludo.

Señor Presidente, quiero felicitarlo por esa designación hecha a usted, luego de agradecer a la OIT

por esta gran oportunidad que tenemos los sectores más importantes de nuestros países, como somos los empresarios, trabajadores y gobiernos, de poder reunirnos para analizar las situaciones sociales, económicas y políticas, por las que estamos atravesando estos sectores, que son el sustento de una sociedad.

Nuestro país, siendo su primer rubro el petróleo, por ser un país petrolero, tiene también una vocación eminentemente agrícola, ya que el 65 por ciento de los ecuatorianos nos dedicamos a las actividades agropecuarias y, por ende, es una de las fuentes de trabajo más numerosa e importante del Ecuador.

Desde hace más de tres décadas en que nuestro país volvió a la democracia hemos tenido diferentes gobiernos, de diferentes tendencias con muchos ofrecimientos de campañas como baratillos de pueblo, pero cuando han llegado al poder se han olvidado de sus ofrecimientos con su pueblo.

Esto ha hecho que en estos últimos años no haya habido estabilidad política ni económica en nuestro país trayendo como consecuencia situaciones graves para el ecuatoriano, tanto para los empresarios como para los trabajadores y para sus familias.

Señor Presidente, soplan nuevos vientos en América Latina, específicamente en nuestro país, el Ecuador. A partir de enero del 2007 tenemos un nuevo presidente que en toda su oferta de campaña ha ofrecido cambios a favor del pueblo, y está demostrando que en un país con decisión política puede cambiarse, y a partir del 15 de enero el Economista Rafael Correa, Presidente de los ecuatorianos comenzó a dar los primeros cambios. Por ejemplo: convocar a una asamblea constituyente, bajarse el sueldo como Presidente al 50 por ciento y decidir que nadie debe ganar más que el Presidente, es loable y digno de aplaudir porque en un país tan pobre en donde existe un salario unificado de 170 dólares mensuales para los trabajadores no se justifica que un político gane 12.000 o 16.000 dólares mensuales mientras otros se mueren de hambre.

Otro punto importante son los créditos, micro créditos agrícolas artesanales a un interés del cinco por ciento anual, a cinco años de plazo, el incremento al bono de la vivienda, el incremento al bono de la pobreza, son algunos de los compromisos que está cumpliendo nuestro Presidente.

No podemos dejar de reconocer, como empresarios responsables, el abuso de algunos colegas que hacen trabajar a los niños, en especial en agricultura, en el cultivo del banano y las flores. Hay que resaltar que otro mal que agobia a nuestro país es la fuerte emigración a los países de Europa y Estados Unidos de América, que desde hace una década se viene dando en Ecuador. Esto ha traído como consecuencia problemas muy graves como la desintegración familiar, un problema social muy grave en nuestro país.

Por esto creemos que hoy más que nunca, los sectores aquí representados del Ecuador tenemos que apoyar al gobierno para combatir un mal que cada día se agrava más, que es la corrupción. Por eso quiero llamar a mis compatriotas participantes en la Conferencia a unir filas con la decisión del Presidente de la República del Ecuador que es terminar con esa lacra, porque si no la exterminamos de raíz será un mal incurable.

Queremos agradecer el esfuerzo que está haciendo la OIT para erradicar el trabajo infantil y la trata en Ecuador; por eso se hace necesario que se apoyen

con fuerza las iniciativas que tiene nuestro gobierno.

Después de todo lo manifestado ante esta Conferencia, tengo que manifestarles que se hace muy imperioso e importante que nos unamos todos los empresarios, trabajadores y gobierno para conseguir juntos un mañana mejor para el futuro de nuestros hijos, en donde no existan niños trabajando, en donde los compatriotas que emigraron regresen a trabajar en nuestro país y en donde existan fuentes de trabajo con salarios dignos, y evitar así la explotación del hombre por el hombre y lograr que los recursos naturales que tenemos en gran cantidad sean para todos los ecuatorianos.

Para concluir, quisiera tratar de explicar que la gran intención del sector agropecuario al cual pertenezco, es que el ahorro de hoy se convierta en una inversión del mañana y en una fuente de trabajo digno del pasado mañana.

---

Mr. DAVE (*Worker, India*)

---

I take this opportunity to congratulate the ILO and its Director-General for giving a new direction to the world of work by taking up the subject of the elimination of discrimination in work, as an extension of its Decent Work Agenda.

India had a glorious past where labour was considered a dignified activity. "Work is worship" was the slogan of our ancient labour. Indian mythology refers to Vishvakarma as the one who invented many skilled labour activities. He was raised to a godly position. The most ancient and exhaustive script of the world, Rigveda, refers to Bribu, the carpenter leader, enjoying the status equal to that of the king. Thus work can be decent and dignified as well. People should be able to pursue their material well-being and spiritual development together, as referred to in the Report of the Director-General.

Coming to the present times, the decent work gap, resulting in a sizeable section of labour being vulnerable to discrimination, is the greatest challenge faced by the world of work. The Director-General in his Report has rightly stressed the discrimination of women workers. The Report also enumerates migrant workers, disabled persons and tribes, besides racial and ethnic discrimination, as the global groups vulnerable to discrimination. I would like to add to the list some of the widely emerging exploited groups who are subjected to extreme forms of discrimination, especially in the present context of globalization. They are unsecured workers in the name of contract labour, temporary and casual workers and a wide range of unorganized sector workers, workers in agriculture, plantation workers, fishermen, etc. These are sections of workers who do not enjoy protection under any law. They work with discriminatory wages, longer working hours, inhuman service conditions, including forced labours, and a lack of job security, social security, safety and equality. Innumerable studies and reports have come out showing the tragic and discriminatory conditions in which they strive for a livelihood. They are islands of poverty and backwardness in social life. Hence I would request the Director-General to include in the Report, with the required importance, the plight of these vulnerable groups.

The issue of work in the fishing sector, one of the most backward groups, has been rightly taken up for discussion in this session of the International Labour Conference.

Trends of discrimination start from the run for profit in the name of the reduction of labour costs. The Director-General's Report rightly discusses the efforts made to enlighten the social partners about cost reductions while also removing discrimination.

The concept of decent work in its volatile form should be given much more practical shape by distinguishing its essential ingredients. Decent work should necessarily include five basic rights at work, these being decent wages, decent service conditions, social security, safety and welfare.

It is a fact that there is a fear psychosis among workers everywhere about the onslaught of globalization that brings jobless growth. Every country has felt that the evident face of globalization is massive employment loss, mainly due to the closure of enterprises in the organized sector, and wiping out the village and small-scale industries in the unorganized sector. New employment created is meagre when compared to the massive job losses. In spite of glittering publicity, fair globalization still looks like a distant mirage. Hence international compulsions in new names like social clause, social labelling, performance standard, etc. will be more misused than used. Let us encourage national compulsions through appropriate stringent legislations, government labour machineries, etc.

When we talk about the concept of decent work, spokesmen of globalization explain the position of labour with the undignified term "labour market". This term implies that the worker is a mere commodity for sale in the market. It does not accept the labourer as a human being. We strongly raise our objection to the ILO also repeating the same undignified term in many of its documents. Hence, I would request the Director-General to give direction to the Office not to use the term "labour market" in any of its documents hereafter.

Finally, we welcome the concept of sustainable enterprise taken up for discussion at this session. Sustainable enterprise and decent work should go together as two sides of the same coin. Contented workers, through decent work, are one of the key elements conducive to sustainable enterprise.

Growing recognition of the central role of the private sector should not mean that government intervention is reduced. A more holistic view is required.

In conclusion, if the project of decent work and the action plan against discrimination are pursued with Himalayan vigour, we hope a new beautiful world of work will emerge. I am sure we will succeed in that endeavour.

---

Mr. CHIBEBE (*Worker, Zimbabwe*)

I wish to congratulate the Director-General on his excellent Report. The theme, *Equality at work: Tackling the challenges*, is most befitting, especially to the developing world in the face of globalization.

The Zimbabwe Congress of Trade Unions (ZCTU), has taken a keen interest in fighting against discrimination, be it at the workplace, or in society in general. At the workplace, the ZCTU has been fighting to address economic fundamentals so that workers, without exception, receive a living wage.

This was after having observed the huge income disparities between the highest paid chief executives and the lowest paid workers. The rich are getting richer and the poor are getting poorer. To us, this was, and is, discrimination which has to be brought

to an end. There has to be equitable distribution of income at the workplace.

In Zimbabwe, we have to this end called for the setting up of a commission of inquiry to examine scientifically the otherwise cancerous development mentioned above, before it cripples the nation.

As regards the labour courts in Zimbabwe, victims of discrimination at the workplace have serious misgivings about the pace at which cases are dealt with. Cases commonly take up to five years before they are finalized, thereby frustrating the victims. This flies in the face of the law of natural justice, as justice delayed is justice denied.

On HIV/AIDS, the ZCTU would like to thank the ILO for the support given to the three social partners, which culminated in the partners agreeing to set up the National AIDS Council, with funding from employers and workers at the rate of 3 per cent from either party. We are, however, saddened by the Government's refusal to allow workers to choose their own representatives on the board.

Lastly, we would like to take this opportunity to thank the ILO and the international community for their solidarity and for the support given to the workers of Zimbabwe during these trying times.

We hope that this solidarity and support will continue until such a time as the Zimbabwean workers enjoy all the freedoms enshrined in the ILO Conventions.

This must be through the promotion of genuine and participatory social dialogue, free from discrimination.

---

Sr. ROJAS (*trabajador, Paraguay*)

En nombre de la Coordinadora de Centrales Sindicales del Paraguay, queremos expresar nuestra preocupación con relación a la gestión gubernamental en el ámbito laboral, económico, social, político y cultural, que sigue siendo ineficiente, y lleva al deterioro en el nivel de vida de los trabajadores con serias consecuencias sociales.

La desidia, la inacción y la ineficiencia de la administración estatal ha imposibilitado todo tipo de avance positivo. Por el contrario, la precariedad laboral, el aumento de la economía informal, el crecimiento del desempleo y el deterioro del poder adquisitivo del salario tiene como resultado impactos negativos en el bienestar de los trabajadores y sus familias que siguen en la migración obligada como grave violación a los derechos humanos.

La anunciada recuperación de la macroeconomía no tuvo un impacto positivo en la población. El cierre de empresas, especialmente pequeñas y medianas, sigue en aumento. Es nula la inversión en el sector productivo por falta de créditos blandos y a largo plazo. No existe política de reforma agraria integral. Estos factores imposibilitan la creación de empleo.

El aumento de la población económicamente activa nos presenta una situación caótica y un cuadro desolador.

En pleno siglo XXI miles de trabajadores, hombres, mujeres e incluso niños, siguen desempeñando tareas de 12 a 16 horas por día sin el descanso compensatorio que la ley prevé. Sólo el 40 por ciento de los trabajadores en relación de dependencia perciben el salario mínimo vigente. El 50 por ciento de los trabajadores formales no posee seguro social, no se respeta la estabilidad de la mujer embarazada ni tampoco la estabilidad laboral conseguida luego de diez años de servicios.

Los múltiples reclamos realizados por nuestra coordinadora al Ministerio de Justicia y Trabajo no han llevado a los cambios esperados. El derecho a un trabajo decente, la erradicación del trabajo infantil y el trabajo forzoso a que son sometidos los indígenas, y el tener un salario digno sigue siendo una utopía en nuestro país.

Otro aspecto negativo es la politización de las decisiones para la inscripción y legalización de los sindicatos, ya que la influencia e injerencia de políticos con intereses mezquinos, así como de empresarios privados inescrupulosos dilatan, e inclusive impiden, la inscripción de los sindicatos en el registro ministerial, hecho que conspira frontalmente con el derecho a la libertad sindical de los trabajadores; en algunos casos se objetan hasta las firmas de los participantes en asambleas y se realizan dictámenes jurídicos sobre la base de suposiciones, ocasionando serio trastorno y perjuicio a los sindicatos, convirtiéndose en jueces y parte, lo que es admitido por la autoridad administrativa del trabajo.

La soberanía nacional ha sufrido un duro golpe con la entrega de nuestro territorio, con población incluida, en Puerto Casado a una empresa multinacional al servicio de la secta Moon. La judicialización y criminalización de los reclamos sindicales y sociales es un grave retroceso al pleno cumplimiento de la libertad sindical y de la estabilidad laboral.

El poder judicial, respondiendo a intereses económicos, saca fallos en flagrante violación a los Convenios de la OIT núms. 87, 98, 29, 105, 182, 97, 95, 138 y 111 entre otros.

A raíz de esto y de la implacable persecución a los dirigentes y activistas de las organizaciones constituidas o a constituirse, la tasa de sindicalización ha descendido nuevamente a niveles alarmantes con el silencio cómplice de la autoridad administrativa del trabajo.

Finalmente, denunciemos la desaparición forzosa del trabajador de la prensa, Enrique Galeano, desaparecido hace más de un año, y cuya responsabilidad es atribuida al Gobierno por el Sindicato de Periodistas del Paraguay por este atropello a la libertad de expresión.

---

Mr. SAN (*Employer, Myanmar*)

It is a great pleasure for me to have an opportunity to address this auspicious Conference. There have been many changes all over the world as a result of globalization.

These changes are more conspicuous in more open societies and free economic systems. Goals, ideas and knowledge flow more freely than before in the globalization process. While the developing countries have found it more and more difficult to find satisfactory solutions to the economic problems, the developed countries that have been in the globalization process earlier than the developing countries have been enjoying already the benefits of globalization.

A developing country like Myanmar has not been able to enjoy the full potential of globalization. Furthermore, it has to give priority to the solution of the issues related to the ILO and the implementation of the measures on Myanmar adopted by the ILO. Due to sanctions on Myanmar, workers are facing many problems. On the other hand, the employers have to find solutions to the problems faced by the workers and are therefore unable to pay attention to

the problems of their own enterprises and businesses.

In the view of my delegation, the creation of employment opportunities is most essential to solve the problems being faced by the workers. We will not be able to create employment opportunities if we cannot run our industries and factories continuously. Lack of adequate investment due to the sanctions imposed on Myanmar has been a huge obstacle to the continuous running of our factories and to the necessary expansion of our businesses, thereby lessening our ability to create job opportunities. Lack of investment has become a serious problem, even affecting the production process and eventually leading to its stoppages.

I should like to take this opportunity to express our strong support for the Report of the Director-General. We are of the view that the promotion of decent work for sustainable development gives rise to industrial peace and will lessen disputes between workers and employers.

Leaving aside promoting decent work, due to sanctions imposed on Myanmar, factories have to be closed, production has to be stopped, the workers were retrenched and laid off. This is the reality in Myanmar unknown to the international community.

On behalf of the employers of Myanmar, I wish to bring the present situation of the employers and workers of Myanmar and their difficulties and hardships to the attention of the Assembly because we strongly feel that this situation deserves the attention and assistance of an organization like the ILO.

---

Mr. MANUFOLAU (*Worker, Fiji*)

I am happy to assure you of the cooperation and support of the Fiji delegation in completing the tasks which face all of us here in the International Labour Conference.

On 5 December 2006, Fiji was faced with a fourth coup by the commander of the Fiji military forces, who took over the Government after citing that there was progressive corruption in the Christian-led Government. However, he had Ministers in his Cabinet who had been incarcerated for the overthrow of the elected Government in 2000. Fiji has seen four coups in the past 20 years and no one can honestly say that the coup cycle has ended.

Whatever reasons one has for putting the country through this mode of getting power, the inescapable consequence is widespread suffering for the people. Within this, workers are always the most vulnerable. Employers have the opportunity to cushion the effects of such events through various methods, including redundancy of workers or reduced hours of work for their workers. The workers themselves are left with no such flexibility. The Congress has accordingly resolved to consider methods that are aimed meeting at the immediate needs and interests of the workers and other, broader issues. Since the unfortunate event of 5 December 2006, we have endeavoured to maintain dialogue with the military and, subsequently the military-appointed administration and other stakeholders, despite our reservations on the legality of the current administration. We have taken the view that we have a responsibility towards our members, who often suffer the most in such situations. We believe that by accepting the administration and its government irrespective of the legality of the circumstances in which it was brought about, we can ensure that the livelihoods of our workers are largely protected.

The Fiji Trade Union Congress expresses deep concern at the announcement by the interim Government to reduce civil servants' pay by 5 per cent, including for teachers, health workers and others. The Congress has called on the interim Government to review its decisions and engage in consultation with the public sector unions to explore additional solutions to manage government expenditure. It has also called on the Government to establish and implement an approach and timetable for the re-establishment of parliamentary democracy as soon as possible.

It also calls on the Government to ensure that the rights, liberties and freedoms of all citizens of Fiji are upheld, including freedom of association, freedom of speech, freedom of assembly and other acts enshrined in Fiji's 1997 Bill of Rights. The interim Government has adopted the Industrial Relations Bill as an Act. This matter had been pending for more than nine years. The Congress has welcomed this decision by the interim Government. However, the Employment Relations Act is in violation of the ILO Freedom of Association and Protection of the Right to Organise Convention, 1948 (No. 87), in various ways.

The Congress pays tribute to the Freedom of Association and Protection of the Right to Organise Convention, 1948 (No. 87), and the Right to Organise and Collective Bargaining Convention, 1949 (No. 98), which guarantee freedom of association, the right to organize and collective bargaining as the primary focus of the relationship between Government and the two social partners. This is promoted by the 1997 Fiji Constitution. When these two fundamental rights are observed, other critical issues will automatically fall into place. However, in practice there are restrictions on this right, in particular, the failure of legislation to ensure that employers comply with judicial orders requiring them to recognize trade unions, and illegal and interfering practices to deny the right to organize in hotels and export processing zones, in particular through the declaration by Government that strikes are illegal despite unions following the provisions of the law. Moreover, in practice there are administrative restrictions on the rights set out in various provisions of the Freedom of Association and Protection of the Right to Organise Convention, 1948 (No. 87), and the Right to Organise and Collective Bargaining Convention, 1949 (No. 98).

This concludes my brief presentation. We look forward to the opportunity to discuss other matters not included here as part of the agenda of the 96th Session if the occasion presents itself. I wish to thank you and the other officials for your kind cooperation with our delegation in making our visit here pleasant and successful. I express our appreciation to the other delegates for their presentations and for the opportunity to meet with them in an atmosphere of comradeship. May the rest of the 96th Session of the ILO Conference 2007 be completed efficiently and successfully.

---

M. BOYER (*gouvernement, Haïti*)

J'ai l'insigne honneur, en ma qualité de chef de la délégation haïtienne, d'adresser à l'endroit de la présidence de ces assises les meilleures félicitations du gouvernement et de tous les travailleurs et travailleuses de la République d'Haïti.

Le gouvernement a reconnu toute la justesse et l'importance des thèmes placés au centre des dis-

cussions prévues au cours de la 96<sup>e</sup> session de la Conférence internationale du Travail. Aussi retient-il avec satisfaction que ces thèmes s'inscrivent dans le prolongement des actions initiées depuis son installation, en juin de l'année dernière.

Je me permettrai d'attirer particulièrement votre attention sur les domaines qui constituent le champ privilégié des actions entreprises par le gouvernement. Il s'agit de la protection des droits de l'enfant, du renforcement du dialogue social et de la réforme du système de sécurité sociale.

Le gouvernement est parvenu, à titre de réalisations concrètes, à la tenue d'un symposium réunissant plus de 300 acteurs en vue de la validation du Plan national de protection de l'enfant; la réhabilitation physique et la modernisation du système de gestion du Centre d'accueil de Carrefour, améliorant ainsi ses conditions et sa capacité d'accueil; l'organisation d'un séminaire de formation sur la protection des droits de l'enfant à l'intention de quelque 70 cadres du secteur public concernés par la mise en application des lois et conventions relatives aux droits de l'enfant; la soumission et la ratification des conventions n<sup>os</sup> 138 et 182 portant respectivement sur l'âge minimum et les pires formes de travail des enfants; la réunion de toutes les conditions en vue de la mise en place de deux institutions clés: il s'agit du Conseil d'administration des organes du système de sécurité sociale (CAOS) et du Conseil national pour la réhabilitation des personnes handicapées (CONARHAN), dont la composition fait intervenir, entre autres, les représentants des secteurs syndical et patronal.

Le gouvernement a, entre autres, réalisé la redynamisation de la commission tripartite qui planche actuellement sur un menu particulièrement intéressant. Il s'agit de la refonte du Code du travail et de la révision du salaire minimum.

Il faut citer également la création d'un secrétariat d'Etat à l'intégration des personnes handicapées rattaché au ministère des Affaires sociales et du Travail, l'élaboration des termes de référence du plan directeur de la réforme du système de sécurité sociale, la réalisation d'un inventaire des lois sociales qui ont vu le jour depuis l'indépendance en 1804 jusqu'en 2004, l'étude et la soumission au parlement des conventions n<sup>os</sup> 135 et 151 relatives à l'exercice de la liberté syndicale au sein de la fonction publique, la mise en place des mécanismes devant permettre un dialogue permanent avec les organisations syndicales et patronales en vue de leur implication et de leur pleine participation dans la gestion de la chose publique, la consécration du mois d'avril 2007 en l'honneur des travailleurs et des travailleuses à travers une série d'activités ponctuées de conférences, d'échanges d'informations et clôturées par une cérémonie officielle autour de laquelle plus 14 travailleurs, chefs d'entreprise et ouvriers, ont été décorés de l'ordre national du travail. Il s'agissait pour le gouvernement, à cette occasion, d'envoyer un signal clair sur la fonction sociale que représente le travail, cette valeur fondamentale au sein de la société.

Dans ce domaine comme dans bien d'autres, le gouvernement est particulièrement actif et s'attelle sans relâche à la construction d'une paix durable et à la création d'un climat stable, favorables aux investissements générateurs d'emplois et de revenus stables. Il s'avère donc nécessaire que soit mis en œuvre un ensemble d'autres programmes, en partenariat avec les secteurs nationaux concernés.

Le gouvernement haïtien est donc plus que jamais déterminé à remplir ses engagements. Mais, face à des contraintes de taille dans lesquelles il évolue, il réitère sa volonté manifeste de s'engager sur la voie du progrès social, tout en misant sur la coopération internationale qui offre des facilités en matière d'assistance technique et financière.

Que tous les gouvernements et toutes les organisations d'employeurs et de travailleurs assument leurs responsabilités en se mettant ensemble avec l'OIT pour la création d'un monde plus juste et plus prospère.

---

Mr. KIKA (*Employer, Albania*)

I am very honoured to participate in the 96th Session of the International Labour Conference, on behalf of the organizations of Employers of Albania.

I would like to thank you for the opportunity to present the role of tripartite cooperation and social dialogue in Albania. Tripartite cooperation and social dialogue are based on a reliable legal system, on a well functioning economy, on the stable relations between employers and employees and also on a high level of social protection and qualification.

Tripartitism, as a phenomenon, plays an important role in the formulation of work politics, in the stimulation of social justice and the monitoring of work standards. This process can be achieved through dialogue and understanding. For these reasons, today tripartitism and social dialogue are considered part of good governance in globalization.

Partnership and dialogue are also in accordance with the principles of market economies because of their influence in the creation of a productive business and investment environment. They are a useful means to find the desired solution to economic and financial problems.

There can be no successful State policies and development strategies without the participation of the business sector, which invests, and employers, who activate the move of capital. This can be achieved only through the stimulation and consolidation of bilateral and trilateral social dialogue.

The sincere and serious cooperation between the social partners is now reflected in the Labour Code of the Republic of Albania, in which the demands of the business and the private sectors and also the ILO Recommendations and Conventions, have been given special consideration.

The will and engagement of the Government and its social partners for the development and strengthening of social dialogue manifest themselves in the common efforts to increase the efficiency of the consulting sessions in the National Labour Council of Albania, as the highest institution of social dialogue in the country.

This three-party institution has increased its own role, reputation and authority, and more specifically the role of its social partners, through adequate information, consultations and dialogue, which are key elements for social development and the harmonization of the interests of all parties involved, and are important factors for the socio-economic development of the country.

Where the role of the social partners is concerned, other important institutions are: the Fiscal Policy Committee, Social Insurance Institute, Social Protection Institute, National Employment Service and National Vocational and Training Agency.

Employers, trade unions and the Albanian Government have showed an increasing sensitivity to-

wards relationships with each other, expressed specifically through the ongoing consultations at all levels on the most fundamental issues such as improving the policies for social and economic development, the implementation methods, work and employment conditions and social security.

The tripartite Conference, social partnerships and the fight against informality, held in Tirana, are additional evidence of the high sensitivity demonstrated by the Albanian Government and its social partners in their efforts to combat economic informality, in order to create a healthy business environment, the necessary conditions for free and honest competition and the required social, legal and political circumstances for free, honest and compensated labour.

Having followed the significant engagement of the ILO and the positive outcomes that have resulted from this partnership, I would like to emphasize the importance of ILO initiatives and point out its success stories. I trust that such initiatives will continue in the future and that the Organization will increase its regional influence, and similar endeavours will serve to stimulate the creation of a spirit of cooperation, respecting universal rights and freedoms within the liberalization and integration process occurring in the south-eastern European region and beyond.

---

*Original Arabic:* Mr. ALMAHFOOD (*Worker, Bahrain*)

Allow me on behalf of the workers of Bahrain, and particularly the General Federation of Bahrain Trade Unions, I would like to pay tribute to all those participating here. I would also like to thank Mr. Juan Somavia, the Director-General of the ILO. I would like to thank him for the very wise way he has guided the preparation of this session of the International Labour Conference. We are very satisfied with the Director-General's Report. I think it highlights one of the most important dramas afflicting humanity, namely discrimination, which is the source of many problems in the area of rights, equality, justice, liberty and democracy, and also has a significant effect on mankind's development, abilities and productivity.

We support the Director-General's Report and in particular the main points it makes. I will concentrate on those points, particularly with regards to the Kingdom of Bahrain.

Our Kingdom is engaged in political and legislative reform and has been since 2001. We have seen the creation of trade unions and the General Federation after many years of struggle and many reforms have been made to legislation and the collective bargaining mechanism and to the labour market. We have also created an unemployment benefit fund.

Despite all the initiatives and policies that we have in our Kingdom, we should not be blinded to the dangers and hazards still affecting workers in Bahrain.

First of all, on discrimination, our Government insists on banning the right to organize in the public sector. This constitutes blatant discrimination between workers in the various production sectors. The General Federation has submitted a complaint against the Government of Bahrain in this regard to the ILO Committee on Freedom of Association. Our Government has maintained its position of not granting the public sector the right to organize and has refused to amend the relevant provisions of the

trade unions act which would allow us to attain this goal and put an end to this discrimination.

It is true that the Director-Generals' Report deals with new forms of discrimination, but the flagrant discrimination against workers in Bahrain is something which should be examined. Another form of discrimination exists in the private sector and in public administrations, namely discrimination between unionized and non-unionized workers. They are often dismissed or threatened with dismissal. The most recent example happened only in March 2007. A series of instructions has been issued by the civil service management to all public institutions requesting them to investigate and take action against any civil servant who undertakes trade union activities. Let me stress that Bahrain must ratify the Freedom of Association and Protection of the Right to Organise Convention, 1948 (No. 87) and the Right to Organise and Collective Bargaining Convention, 1949 (No. 98). I think we also need to address the right to strike, once all negotiation measures have been exhausted. Our Government has introduced a range of amendments to the provisions on the right to strike contained in the trade unions act. In accordance with these amendments, the Government has the power to determine where strikes are possible. The Government has subsequently banned strikes in a range of sectors where, in fact, workers are entitled to strike, pursuant to internationally recognized standards set by the ILO. Our Confederation has therefore submitted another complaint to the Committee on Freedom of Association because we feel that this is a flagrant violation of workers' rights.

On the economic front, the privatization plan for many government and state companies is harming workers' rights. Many workers have lost their jobs or been forced to take early retirement. These practices are unfair to workers. Rather than concentrating its efforts on administrative reform and on ending corruption in the public sector, the Government simply chose to dismiss people.

---

Mr. KALAJA (*Worker, Albania*)

I am privileged to make a brief speech on behalf of the Albanian trade union organizations, which have played and are currently playing a very important role in the consolidation of democracy, after 50 years of dictatorship.

Since I appreciate the remarkably important role of the ILO in the democratization of my country, I will start my address by expressing gratitude to the International Labour Organization, which has contributed to the evaluation of working relations in Albania. The ILO Conventions ratified by Albania have helped us in our work and we feel responsible to constantly ask and fight for their implementation for the benefit of Albanian employees. These Conventions have raised our awareness on the great responsibilities that we have as representatives of the Albanian labour world, where, to be frank, the problems are still present and the social situation has not yet been standardised.

Although there have been successes in the functioning of social dialogue and in raising the role of the National Labour Council as a tripartite organism, and although the issues discussed in this institution are mainly focused on industrial relations and their enhancement, I would like to say that we still have to learn and assimilate from the experience of our colleagues from countries where democracy is

consolidated and the ILO has operated for many years.

I am of the opinion that it might be of interest to emphasize that, by respecting social dialogue and the partnership with the Albanian Government, we have reached many positive results in important budgetary sectors, as was for example the significant increase of wages by 20 per cent in the education sector, and also an increase of 25 per cent in the health sector. There is also a significant increase in retirement pensions, considering that the number of retired persons is very high as compared with the employees who contribute to the social insurance scheme.

We would also consider a success the draft law concerning early retirement for difficult professions, which has been initiated by the Union of the Independent Trade Unions of Albania (BSPSH) and is currently under the consideration of parliamentary commissions. We are convinced that through this initiative we are working to solve a social problem, related to a class in need and without any employment perspective due to age.

Making a thorough analysis of trade union operations in the past 16 years since the fall of the communist regime and the establishment of the market economy, we see that the socio-economic environment caused a reduction in the intensity of the trade union movement. This is not only an Albanian phenomenon, this is also seen in all trade union movements in Eastern and Central European countries.

It is indispensable that, during this period of globalization and the new positions that trade unions should occupy, we must work intensively to reform and strengthen our structures, to be able to face challenges in this period.

There is no doubt the ILO should take a leading role in this very big initiative.

As I come to the end of my presentation, I would like to stress that from our past experience we have structured a strategy on improving the forms and methods of institutionalizing relations with our social partners and the Government. So, by considering social dialogue as the key to agreement with the social partners, we have had achievements so far and we think that this is the strategy we are going to follow in the future. We have agreed on a set of necessary documentation in order to sign an agreement with the Government and the employers to solve some urgent social problems, thus bringing the three partners together to safeguard a social climate which serves the well-being of Albanian people.

Thank you again for giving me the opportunity to speak at this event and express the opinion of the Albanian trade unions.

---

Mr. SUBASINGHE (*Worker, Sri Lanka*)

I wish to convey our deep appreciation to the Director-General and the Governing Body for their persistent follow-up to the Declaration on Fundamental Principles and Rights at Work, and in promoting the Decent Work Agenda, which is further evident from Report V, "Strengthening the ILO's capacity to assist its Members' efforts to reach its objectives in the context of globalization" introduced to this session.

As pointed out by the Director-General, it is the logical follow-up after what was revealed by report of the World Commission on the Social Dimension of Globalization.

Introducing this Report the Director-General has underlined the need for stronger national and international collaboration, and the need to boost the collective influence of the ILO and its tripartite membership to achieve better national and global governance, in pursuing the four strategic objectives of decent work: promotion of rights at work, employment, social protection and social dialogue.

Last year, Sri Lanka was able to formulate a Decent Work Country Programme followed by a decent work action plan, along with relevant identifying criteria, a project which was actively promoted by the Ministry of Labour with the assistance of the ILO Office in Colombo and in collaboration with tripartite constituents. So far, however, the Decent Work Country Programme has not gone very far beyond the precincts of the Ministry of Labour, and remains in our view, a statement of directive principles without an active operational, national framework. We believe that it is necessary to set up a national tripartite mechanism to oversee and monitor its implementation.

The Decent Work Country Programme should be linked with the development objectives and plans of the Government. Regrettably, in our case, this is still a grey area and is confined to a large document entitled "The Ten-Year Horizon Development Framework" announced with last year's government budget. It is more an expression of vision than an economic plan. Any further progress in this regard is hampered by the acute financial and political destabilization brought about by an escalating war with the insurrectionist Liberation Tigers of Tamil Eelam (LTTE) who are fighting for a separate state in the north and east of the country. This armed conflict has been going on for over 20 years, claiming to date over 65,000 lives on both sides.

In 2006 Government's military expenditure was over 15 per cent of its revenue, and what was left for public investment was less than the wage bill for public servants. After the LTTE air raids about a month ago with low flying aircraft near the capital and the international airport, the tourist industry has almost ground to a halt.

The international rating for Sri Lanka as a zone for investment has plunged to a new low. In such circumstances there is little hope for the Decent Work Country Programme to take off in a coherent manner, even if it were to receive the due official recognition that we are asking for.

The economic impact of the above mentioned factors have seriously worsened the living conditions of the working class. The annual inflation rate is running at 16 per cent even according to official figures. The prices of consumer goods has skyrocketed. Although the Central Bank of Sri Lanka claims that the GDP growth rate last year was 7 per cent no such growth appears to have taken place according to many observers. The same Central Bank sources admit that the real wages of private sector employees continued to decline. Today the average monthly wage of a private sector employee is around US\$55 while the minimum wage stands at less than US\$50.

The country's priority today is a negotiated political solution to end the ongoing war. Although no one disputes this, peace is getting ever more distant in our opinion. Ten major trade unions recently wrote jointly to the Government regarding its urgency, however there is no appreciable response so far. The status of the conflict, which is continuing,

is one where fighting terrorism has assumed the foreground while the ethnic dimension which gave rise to it, has receded to the background. We expect to discuss this matter with employer organizations, to explore the possibility of a joint course of action. The subject of a political solution to Sri Lanka's ethnic conflict has always been controversial, encompassing a wide variety of views. Now a new dimension has arisen. The atmosphere is highly charged in the context of intensified military conflict. In the tripartite meetings at which the Decent Work Country Programmes was discussed, the subject of war and peace was left out.

I take this opportunity to express our deep appreciation of the services of the ILO Office in Colombo, and the ILO Area Office in New Delhi, who have always been helpful in the endeavours to strengthen tripartite dialogue and for their all-round efforts to advance the goals of decent work in Sri Lanka, while assisting our trade unions in the development of their capacities.

---

Mr. FOLLO (*Worker, Ethiopia*)

---

First of all, I would like to express my gratitude to the ILO on behalf of the Confederation of Ethiopian Trade Unions (CETU) and for myself for this opportunity to deliver a speech to this important Conference.

We all know that trade unions are organizations established to safe guard the interest of workers. They have come into existence by the mere fact of the realization that workers are unable to make their aspiration for better life a reality in solitude unless they join together and manage to set up organizations that can safeguard their interests, turn their dreams into reality and attain their goals.

The Confederation of Ethiopian Trade Unions is the only vanguard trade union that has been permitted to carry out its obligations for the well being of Ethiopian workers.

Currently, like many developing countries, in Ethiopia we have a lot to do with respect to the global Decent Work Agenda. Some of the most serious problems hovering in the workplace include occupational health and safety including HIV/AIDS. Moreover, even though the Federal Constitution of Ethiopia and the Labour Proclamation fully acknowledge the right of industrial workers to get unionized and promote their interests without any intervention whatsoever, we have problems with respect to application. More importantly, unionization is cumbersome in the flourishing private sector.

The Confederation of Ethiopian Trade Unions would like to extend its reverence to the ILO for the attention it has devoted to the African continent, which can be exemplified by the Eleventh African Regional Meeting of ILO member States in Africa (Addis Ababa, 2007) and the African Union Extraordinary Summit of Heads of State and Government on Employment Creation and Poverty Alleviation in Africa (Ouagadougou, 2004), which have set the framework for the ILO's work in Africa. The Eleventh African Regional Meeting was earthed by the Ouagadougou Summit, where we adopted a set of conclusions that identified the main challenges facing the continent and endorsed the Decent Work Agenda as an effective strategy for Africa to tackle these challenges.

In addition, the Confederation of Ethiopian Trade Unions witnesses that, at the Eleventh ILO Regional

Meeting, His Excellency Mr. Somavia, the ILO Director-General, delivered a report that was fruitful and well considered.

On similar accounts, the Confederation of Ethiopian Trade Unions acknowledges the relentless help that the ILO Regional Office is giving to the Confederation on a number of issues such as decent work for youth and the social dialogue, HIV/AIDS and the world of work and others.

At the present time, most of the developing countries, including the Ethiopian Government, are engaged in multilateral and regional trade negotiations, all of which demand the liberalization of the countries' trade regimes and the eventual elimination of tariff barriers. The most prominent negotiations are at World Trade Organization (WTO) level and for the New Economic Partners Agreement (EPA). The massive wave of trade liberalization that has been undertaken since the mid-1990s and the further tariff dismemberment under EPA has generated an interesting and continuous debate in terms of its impact on the performance of the domestic manufacturing sector and on the labour force. To this end, the Confederation of Ethiopian Trade Unions has commissioned research which has come to the conclusion that if Ethiopia joins the EPA, by 2008 26,000 workers in the textile and leather industry of Ethiopia will be laid off. As a result, the Confederation of Ethiopian Trade Unions recommends that developing countries be given considerable time for self-adjustment prior to application of the trade agreements.

I believe that without a precautionary understanding of the impact of trade liberalization on labour, it is simply inconsistent to discuss the issues of decent work, HIV/AIDS, and poverty reduction in Africa.

Finally, the Confederation of Ethiopian Trade Unions strongly believes that the ILO in general and the Regional Office in Addis Ababa in particular will keep on with its support and integration in a participatory manner.

---

*Original Serbian: Mr. NINKOVIC (Employer, Serbia)*

The Report of the Director-General of the International Labour Organization elaborates on issues that the ILO will deal with over the few years to come. The processes that have started are of such a kind that they need to be fully perceived from all angles and solved using the best, most efficient, and viable solutions. Without appropriate mechanisms and well-qualified institutions that can implement such solutions in the world of labour and capital, these goals will not be achieved.

Globalization is a process that imposes the need for objective identification of consequences that involved. National economies must develop an approach that will allow them to enter world markets on the basis of adopted and existing standards. Social security represents part of this process, through which poor and developing countries are enabled to develop a minimum of social standards the circle of poverty. At the same time, social security approaches must be subjected to real frameworks and the possibilities of each particular national economy. There is no universal and single approach for social security issues applicable to all countries. This issue is primarily national, so suggestions for finding some universal approach to social security are not realistic and do not contribute to solving what is a very complex issue.

We should not forget examples of the excellent systems in Nordic countries; these examples are, however, far from real possibilities of a large number of developing countries and countries in transition. National programmes that imply the recognition of the possibilities of individual countries appear to be realistic and the only possible approach to solving these problems.

The management of the world of work and its modernization are of great importance. Employers' organizations should have support in recognizing the needs of their members and, within the strong legal framework of a State, they should, together with representatives of workers, create a relationship of trust and responsibility for the improvement of a business environment and to further the development of their economy. Within such an approach, it is important to ensure a balance and reality between flexibility of needs and security of jobs. Practice demonstrates that there is a need for certain old standards to be revised and adjusted to meet new needs, with simultaneous adoption of new standards which will enable a more flexible market approach to market, and a better introduction into the global economy. ILO standards represent an excellent basis for the development of modern ways of labour management in the world and they provide a framework for all member countries to achieve a balance between flexibility and job security.

ILO Conventions and Recommendations in almost all member countries are already included in a legal framework of labour legislation, and even in those countries that have not yet ratified certain Conventions and Recommendations. ILO assistance in setting up legislation and ensuring that international labour standards are applied relies, above all, on the national experience of all member countries, whereby each country is given the possibility to find a realistic way towards its introduction into the international community. The Union of Employers of Serbia will try, in cooperation with other employers' organizations in the region and with the ILO, to enable Serbia to overcome obstacles in the best possible way to its accession to the European Union and Atlantic integration.

Regional connection and development provides an opportunity to end the transition process in the most efficient way, and to ensure that Serbia is part of Europe where it has always belonged. Good management in solving existing challenges and the further adjustment of domestic legislation to the legislation of the European Union, represent challenges that demand all social partners to adjust themselves to the new conditions of the market economy and to assume, in that way, their own part of the responsibility on the road to globalization.

---

*Mr. KYRITSIS (Worker, Cyprus)*

Before I begin my intervention allow me to convey to you the warm greetings of Cypriot working people who hope that the results of this Conference can contribute to an important degree to the strengthening of the position of working people. In our opinion, the Report of the Director-General of the International Labour Organization very correctly deals with a common goal of the promotion of decent work for sustainable development. Contemporary, international reality reminds us of the ILO position that work cannot be a commodity, and that social justice is the foundation of peace. We consider that totally correct. The assessment in the

Report that globalization, in the manner in which it is taking place, is a procedure which can in no way safeguard dignity at work. It is also our own conviction that social inequality, which is becoming more acute due to the unjust distribution of wealth, represents a serious threat to decent and sustainable development.

It is clear that the policies presented as recipes for the idealization of the neo-liberal model for economic development, are recipes that have failed, precisely because they are totally based on the belief that the uncontrolled market can substitute social policy and social intervention. However, what is worrying working people and their trade union organizations is the measures that are being taken so that the declaration for the enforcement of policies to promote the goal of dignified work will be implemented as the Report of the Director-General envisages.

At a time when even the very right to work, and the right to form and join a trade union, are under threat in many countries, and when the regulation of labour relations and the undermining of the social State constitute the dominant policy and at a time when permanent and full employment, as well as regulated working time, are under attack, the implementation of the goal of decent work requires a real break from neo-liberal recipes.

For decent work to take root in practice, a favourable international and institutional framework is needed that will not destroy but protect the accumulated gains of economically active society in the field of labour relations, and that will promote the idea of social solidarity and the fair distribution of wealth.

Mr. President, ladies and gentlemen, I would also like to refer to the Report of the Director-General in relation to the situation of the working people in the Occupied Arab Territories. We express our satisfaction regarding the intense interest shown concerning the continued vicious violation of the labour and human rights of the Palestinian people. We call on the ILO to continue to follow the situation until the Government of Israel conforms to international law and fully implements the labour, social and national rights of Palestinian working people. Concerning our own country, Cyprus, for 33 years the goal of decent work for all Cypriots has unfortunately been impeded by the occupation of a large part of our country by Turkish troops, despite the resolutions and decisions of the United Nations. The desire and demand of Cypriot working people has been expressed through the decision of the Cypriot All-Trade Union Forum composed of nearly all the trade unions of our country, both Greek Cypriots and Turkish Cypriots, that the solution of the Cyprus issue must provide complete freedom of movement in our country, the right to freely choose an employer with the same terms of employment for all Cypriots, quality in social insurance and social rights, irrespective of national origin, religion, language, colour or race. We look forward to the help and support of the ILO and its member organizations so that the hour of reunification, independence and decent work for all can also come for Cyprus as soon as possible.

Thank you and my best wishes for the Conference.

---

Sr. RICCI (*empleador, Guatemala*)

Saludo la iniciativa del Director General de abordar varios temas que merecen toda nuestra atención y a los cuales no podré referirme por razones de tiempo, limitando mi intervención a los que considero más apremiantes para los empleadores de mi región.

En primer término, en el Informe se hace referencia a las empresas sostenibles y la necesidad de equidad. Viniendo de un país donde la informalidad de la economía alcanza ya cifras escandalosas del 75 por ciento de la población económicamente activa (PEA), debe empezarse por resolver los problemas que impiden la creación de pequeñas y medianas empresas capaces de generar empleo digno para incorporar a la formalidad a esa población que actualmente no está cubierta por las leyes laborales, no goza del derecho de negociación colectiva y de la protección social. Desde luego que para ello se requiere fomentar un clima favorable para la inversión privada, nacional o extranjera.

Vemos con satisfacción que el informe citado por el Director General en su Memoria, y que fuera elaborado conjuntamente por la OIT y la OMC, hace una valoración positiva en cuanto al comercio y a la estabilidad financiera como elementos generadores de esas condiciones.

No obstante, vemos con mucha preocupación cómo en nuestra región se manejan discursos contrarios a la evidencia histórica que pretenden atribuir al libre intercambio de bienes y servicios conforme reglas claras y dentro de un sistema democrático, todo ello generador de riqueza y empleos dignos, las consecuencias de vicios derivados del pasado tales como la corrupción, el mercantilismo y el clientelismo político, por citar alguno solamente. Esos discursos que se vienen materializando en regímenes de corte populista, no hacen sino volver al punto de partida, esto es, más corrupción, más mercantilismo y más clientelismo político y a la postre más pobreza.

A este respecto, vemos que la OIT está llamada a jugar un papel de primer orden conjuntamente con los demás órganos del sistema de Naciones Unidas, y en esto también coincido con la Memoria del Director General en la orientación y sobre todo salvaguarda de los principios democráticos que defiende y son pilares de esta casa. La defensa decidida y sin vacilaciones de la libertad de asociación, por citar uno solo de estos principios, debe hacerse a toda costa a riesgo de que esta Organización pierda su pertinente credibilidad.

El otro punto al que debo referirme es el de la modernización de la gobernanza del mundo del trabajo. Me parece adecuado el planteamiento inicial del Director General en el sentido que para los actores sociales es importante adaptar la legislación laboral a las nuevas pautas que permean el mundo del trabajo, confirmo que al menos para los empleadores lo es.

No obstante, el planteamiento inicial no me parece que la misma OIT, y menos aún los gobiernos, al menos hablo del propio y quizás algunos de mi región, estén convencidos de tal necesidad, que por otra parte sí es sentida por los empleadores que están viendo regulada su actividad por normativa diseñada para una realidad de hace 60 años.

Una vez más, allí la OIT tiene una grave responsabilidad, mostrar, con las evidencias en la mano, cómo la modernización de las legislaciones, no es

causa de precarización en el empleo por una parte y por la otra sí constituye una herramienta de incalculable valor para que los empleadores y trabajadores puedan diseñar con mayor amplitud su relación laboral.

Sabemos que la tarea no es fácil pues implica un costo político a pagar en el corto plazo, pero sus beneficios serán incalculables en el mediano plazo y es allí en donde esta Organización debe fijar su horizonte.

Finalizo haciendo un llamado al Director General y a esta Conferencia para que hagan sus mejores esfuerzos por que cese el hostigamiento del que está siendo víctima la Organización de Empleadores de Venezuela FEDECAMARAS.

---

Mr. BORGULA (*Employer, Slovakia*)

Part of social dialogue is about commonly agreed and widely accepted rules. Of high priority among the rules is the Labour Code and the related legislation, for example the Collective Bargaining Act and the Minimum Wage Act. During the last seven years in Slovakia we have had a new Labour Code and two significant amendments, changing almost the entire meaning of the Code and affecting other social legislation.

It is important to note that the current Labour Code was prepared with extensive cooperation for Slovakian employers and the ILO, whose role was perceived as a component of the heated social dialogue in the country. Our feeling as employers is that the basic law customizing relations between employees and employers becomes a political jack-in-the-box, firstly for politicians and then subsequently for the social partners too. I see the negative impact of such an approach on the basic labour legislation. The Labour Code is nowadays perceived as a pushover for a political programme of any political party and the proposed changes depend on the orientation of the party. There is only a short time available for group relations, usually no more than six months from the first draft to the approval procedure in Parliament. Changes are pushed forward without the time for deep discussion about the need for them among the social partners. The short preparation time does not allow for a deeper study of changes or even for assessing potential impact. Due to the political motivation behind changes there is usually a big fight among the social partners to gain as much power as possible, with only a limited intention to improve social relations.

Although we accept the right of election winners to make changes in society according to this political programme, we do not accept that the change should be bottom-up. This approach, disturbing the stability in industrial relations via political ambitions seems not to be unique at least among new countries in the European Union. An important focus of current conferences is on the sustainability of enterprises as a source of human well-being, and I think you will agree that the instability of relationships among social groups can undermine the sustainability of any business establishment.

It is clear that the problem of the instability of labour legislation is minor compared to the problems discussed in the Committee on the Application of Standards. But if such measures continue, there is the potential for a case too.

Another issue related to social dialogue is its quality or content. Social dialogue, is usually measured in the number of meetings held and the number of

persons represented. Depending on its structure, we can have a tripartite or a bipartite branch, or company-level social partners. From this point of view, we in Slovakia are just excellent, yet this perfection is not reflected in the results. The number of collective agreements at the branch level is on the decrease as is national coverage. The content of collective agreements, at least at the branch level, is becoming more formal and less binding. Tripartite sessions are very often composed of three monologues. The reason for this is that although everybody agrees that social dialogue is a precondition for social peace, and social peace is a precondition for the growth of the whole society, only approximately 30 per cent of social partners cover all the costs of social dialogue. In other words, 70 per cent of employers and workers are so-called free riders. Then there is the reluctance of the Government to give up part of its power in favour of sole governance by the social partners, and also the growing number of legislative provisions regulating or setting limits for issues that are normally the theme of collective bargaining. In addition, formal hearings of social partners instead of social dialogue achieve no result, yet the number of meetings make it look as if social dialogue is proving successful.

The results of social dialogue achieved at the level of a competent ministry are very often not accepted by the Governments or by the Parliament. There are no regular meetings of employers' and employees' representatives at the top level, which means that issues of common interest to the social partners are discussed in the full view of the Government. This is not about only blaming the Government, because the social partners' participation in this situation is significant, too. However, the responsibility of the Government and politicians is much higher.

My ambition is to try to focus the attention of the ILO on the problem of the equality of social dialogue. I hope I am not being too impertinent if I suggest that ILO support of social dialogue issues should focus not only on workers and employees, but on the third party in the tripartite arrangements too.

---

Ms. BANG ONSENGDET (*Employer, Lao People's Democratic Republic*)

I would like to take this opportunity to congratulate the Director-General on his successful Report, *Decent work for sustainable development*. Many parts of this Report cover real issues on the creation of more opportunity for all people. The Report mentions how to create more opportunity for all people in the society.

As the Lao employers, we are involved in business, training and creating employment for people in Laos. We are very much interested and need to take into account these discussions among the business sector, such as the issue of sustainable enterprises. This is very important and useful to help Lao employers provide more opportunity for improved working conditions and create more work for all people in our country.

During this period of economic development, individual business units in Laos have been using technology and introducing their workforces to that technology at an appropriate rate. Employers also encourage employees to build their capacity and treat them equally: it does not matter if they are men or women.

At the moment, the Government of the Lao People's Democratic Republic proposes to study such instruments as the Equal Remuneration Convention, 1951, (No. 100), and the Employment Injury Benefits Convention, 1964, (No. 121), and the employers would like to express their agreement with the Government of Laos that we are ready to participate in tripartite study of the two ILO Conventions in the Lao People's Democratic Republic.

We approve the ratification of the Minimum Age Convention, 1973 (No. 138), and the Worst Forms of Child Labour Convention, 1999, (No. 182). These two Conventions require enterprises in the Lao People's Democratic Republic to ensure that they will never use child labour nor use young people's labour inappropriately. Moreover, in supporting these two Conventions as Lao employers, including the business community in Laos, we continue to coordinate and cooperate with the Government and with the ILO's International Programme on the Elimination of Child Labour. We also continue to promote employment opportunities for women in all areas of business; we want this to be more acceptable in business society.

The Lao employers would like to thank the ILO for all the technical support it has provided to the Lao employers' organizations. We still need the ILO to continue to assist us to further strengthen the contribution of the Lao employers' organizations.

On this occasion, on behalf of the employers of Laos, we would like to congratulate you all on the success of the International Labour Conference and wish this Conference a successful completion.

---

Mme LUKIANA MUFWANKOLO (*ministre du Travail et de la Prévoyance sociale, République démocratique du Congo*)

---

La 96<sup>e</sup> session de la Conférence internationale du Travail offre à la délégation tripartite de la République démocratique du Congo l'opportunité de venir à la tribune de l'auguste assemblée des Etats Membres de l'OIT pour transmettre chaleureusement à tous les salutations du Congo nouveau.

Une République démocratique du Congo nouveau, car ayant accédé depuis le début de cette année 2007 à de nouvelles institutions par l'organisation d'élections libres et démocratiques à tous les niveaux, et cela après quarante-cinq ans d'une quête inlassable dont la fracture socio-politique et économique est comptée parmi les plus douloureuses et meurtrières de l'histoire des nations du monde.

C'est donc avec un espoir particulier que la République démocratique du Congo, à travers ma modeste voix, voudrait Monsieur le Président, vous féliciter ainsi que tout votre bureau pour votre élection à la direction brillante de ces grandes assises du monde du travail, dont les points à l'ordre du jour rejoignent les intérêts de croissance de la République démocratique du Congo.

Par la même occasion, nous présentons nos vives félicitations au Directeur général du BIT pour son excellent rapport et pour les activités réalisées par l'OIT au cours de l'exercice écoulé, activités dont notre pays est bénéficiaire à travers un dynamisme particulier insufflé notamment par l'organisation du premier Forum national sur l'emploi.

Monsieur le Président, l'année 2007 ouvre une ère de tous les espoirs pour la République démocratique du Congo, laquelle requiert la consolidation et la stabilisation du processus démocratique entamé.

A cet égard, gouvernants, gouvernés, partenaires en développement s'accordent à dire que l'objectif majeur actuel pour ce renforcement est le changement social avec comme stratégie le travail décent pour tous.

L'espoir de sauver le Congo à cette époque par la création d'emplois décents et durables se manifeste au travers d'une forte volonté politique exprimée au sommet de l'Etat. En effet, notre chef de l'Etat élu a proclamé l'emploi comme l'un des cinq chantiers majeurs de son quinquennat. A son tour, notre Premier ministre a déclaré que l'emploi est non seulement une priorité dans le programme de son gouvernement, mais la priorité des priorités.

Au regard de ce grand chantier prioritaire que devient l'emploi en République démocratique du Congo, les questions inscrites à l'ordre du jour de la présente session de la Conférence internationale du Travail, et particulièrement les huit questions mises en exergue dans le rapport du Directeur général pour la promotion de l'Agenda du travail décent et pour affermir les stratégies du BIT, ont retenu toute l'attention de mon pays.

En effet, ces questions évoquées par le rapport du Directeur général du BIT confirment de graves problèmes dans le monde du travail du Congo, lesquels atteignent, nous devons le reconnaître, les dimensions d'un fléau, tant au niveau de l'importance du taux de chômage que de la précarité même des quelques emplois existants.

Pour contribuer à dégager des solutions appropriées durables, le ministère du Travail et de la Prévoyance sociale qui en a reçu mandat s'attelle à organiser le premier forum national sur l'emploi. Ce forum, haut lieu du dialogue social par une large approche participative, prévu au mois de juillet prochain, sera une occasion donnée aux partenaires traditionnels du monde du travail, aux différents acteurs et couches de la population, de réfléchir sur ce que doit être la politique congolaise de l'emploi. Ce sera aussi l'occasion pour le gouvernement de signer un pacte avec toute la nation pour la réalisation d'un ensemble de huit grands programmes cadres de création d'emplois durables et décents.

Ce programme, qui concerne notamment l'emploi des jeunes, l'entrepreneuriat féminin, l'entrepreneuriat coopératif, la capitalisation des secteurs porteurs d'emplois, tenant compte des personnes avec handicap ainsi que celles frappées du VIH/SIDA, la réforme et l'extension de la sécurité sociale, suppose un financement pour lequel mon pays pour les diverses raisons évoquées ci-dessus a besoin d'assistance, tant d'une assistance directe en termes d'appui technique, matériel et de renforcement des capacités de ressources humaines que d'une assistance indirecte en termes de plaidoyer auprès de tous les intervenants potentiels.

Monsieur le Président, pour ce qui est des autres points à l'ordre du jour, mon pays soutient ce qui suit: les efforts pour la réalisation des différents programmes en faveur des pays Membres et le renforcement des capacités de l'OIT auprès de ses différents Membres dans le budget 2008-09, les instruments préconisés en matière de pêche, car avec ses milliers de kilomètres carrés de plans d'eau la République démocratique du Congo cherche à quitter la pêche artisanale pour accéder à une pêche intensive, industrielle, susceptible de répondre aux besoins de la population, enfin, la question pertinente concernant la promotion des entreprises durables issue des présentes assises.

Monsieur le Président, malgré sa situation de pays venant de sortir d'un conflit, la République du Congo a le souci d'appliquer les normes internationales du travail. En effet, mon pays a transmis les rapports sur l'application des normes jusqu'à l'exercice 2006.

Eu égard à tout ce qui précède, le BIT sera d'un grand secours pour mon pays qui vient de renouer avec ses obligations vis-à-vis des organisations internationales après une éclipse de quatre années. En ce moment où le BIT/PRODIAF célèbre ses dix années d'existence, le gouvernement congolais joint sa voix aux autres Etats Membres pour souhaiter à ce programme plein succès pour les jours à venir.

En effet, outre le nouveau Code du travail adopté entièrement par consensus tripartite grâce au dialogue social, les résultats satisfaisants obtenus au Katanga dans la lutte contre les pires formes de travail des enfants influent positivement sur l'amélioration des conditions de travail dans le secteur minier. Le gouvernement congolais sollicite auprès du BIT l'extension du programme à d'autres provinces du pays avec un bureau à Kinshasa.

Pour terminer, la République démocratique du Congo exprime toute sa reconnaissance au BIT, particulièrement à ses bureaux de Yaoundé et de Kinshasa, ainsi qu'aux pays Membres pour l'appui dont elle continue à bénéficier dans divers domaines en rapport avec la promotion de la paix, de la démocratie, de l'emploi et du travail décent.

Nous vous souhaitons plein succès à la 96<sup>e</sup> session de la Conférence internationale du Travail.

*(Mr. Sulka takes the Chair)*

---

Sr. ESPAÑA SMITH (*empleador, Bolivia*)

---

La excelente Memoria presentada por el Director General trae este año, entre otras novedades, la de referirse no sólo a un tema —como era habitual en ese documento— sino a ocho cuestiones, todas ellas importantes. Sin embargo, quiero centrar mi intervención en destacar fundamentalmente el tema del fomento de las empresas sostenibles, cuya importancia se denota por la directa conexión que tiene con el mayor desafío de carácter global que actualmente enfrenta a las economías y el mundo del trabajo, el del empleo, también como medio esencial para reducir los acusados índices de pobreza.

En efecto, no se conoce, señor Presidente, un instrumento mejor para generar empleo que el de la empresa y, particularmente, el de la empresa privada por su reconocida aptitud de gestión, de gestión sustentable y su capacidad autónoma de generar empleo: empleo productivo y libremente escogido, o trabajo decente, como proclama la OIT.

En ese entendido, un conjunto de 15 instituciones privadas ha conformado recientemente en Bolivia una asociación dedicada a la promoción en el país de una cultura emprendedora, del espíritu emprendedor, conscientes, además, de que el potencial del emprendimiento no se dirige únicamente a crear empleo asalariado de corte tradicional sino que, adicionalmente, favorece la creación de otros tipos de ocupación y de servicios a tono con las tendencias y demandas del mercado laboral de nuestros días, tan diverso y dinámico.

Ese esfuerzo no ha sido, hasta el momento, secundado por los poderes públicos en Bolivia, en parte por la reciente iniciación de este movimiento. Ojalá que en el futuro concite el respaldo gubernamental, a pesar de que la política económica que

pretende ejecutar el actual Gobierno asigna al sector privado un papel desmerecido e irrealmente secundario.

Los empleadores bolivianos respaldan, señor Presidente, la introducción de políticas públicas en el país que tengan un carácter inclusivo, siempre que no conlleven el establecimiento simultáneo de nuevas exclusiones.

Como apropiadamente se afirma en las conclusiones de la Comisión respectiva en esta Conferencia, las empresas requieren fundamentalmente reglas claras, estables, el cumplimiento de contratos y el cumplimiento de las obligaciones sociales, es decir, que requiere, en suma, la vigencia del estado de derecho que otorga a todos seguridad jurídica. Constatamos que, al presente, el entorno empresarial en Bolivia no goza de esa seguridad.

Las empresas y sus trabajadores requieren, por otra parte, que la política laboral sea administrada bajo los principios centrales que sustenta la OIT, es decir el diálogo social, la consulta y el tripartismo. Debemos lamentar que tales principios ya han sido reemplazados en Bolivia por una actitud gubernamental absolutamente unilateral.

De esa forma, se ha instaurado un régimen de virtual inamovilidad — el más rígido de la región — y se han atribuido para ese efecto facultades jurisdiccionales a funcionarios administrativos, a través de simples decretos del poder ejecutivo y hasta por meras resoluciones ministeriales que contradicen y derogan leyes de la República, violando la estructura jerárquica de las normas que establece la Constitución Política del Estado.

Tanto al introducir ese régimen de inamovilidad laboral, que rige solamente para el sector privado, como al intervenir por otra parte en el área de las remuneraciones, disponiendo incrementos — que la ley reserva a la negociación entre los interlocutores sociales — e inclusive, al fijar el salario mínimo sin observar los mecanismos de consulta que estipulan los convenios de la OIT, se ha vulnerado el principio de legalidad.

Debo dejar en claro que, con estas afirmaciones, no se objetan los montos de la remuneración, no se objetan los montos del salario, sino la forma irregular de su tratamiento. Hemos expresado a nuestras autoridades que ese tipo de medidas, antes que fomentar el empleo, lo perjudica.

Desalienta la creación y el mantenimiento del empleo, y tiende inexorablemente a estimular la creciente informalidad que constituye un segmento obviamente desprotegido.

En el Programa de Trabajo Decente que se aplicará en Bolivia durante este año y el próximo, se ha consignado un examen de la legislación del trabajo con miras a su reforma. Nos existe la esperanza de que, con la asistencia técnica de la OIT, se encare esa reforma con sucesión a los principios y metodologías que propugna esta casa, y que a base del diálogo social y el tripartismo se arribe a fórmulas concertadas, equilibradas y equitativas. Esperamos finalmente que, como resultado de los debates acerca del fomento de las empresas sostenibles, se arribe a conclusiones prácticas y a políticas concretas, mediante las cuales la OIT pueda continuar contribuyendo positivamente a la promoción de un entorno empresarial que propicie un mayor desarrollo económico y un sólido crecimiento del empleo.

Public Services International (PSI) will celebrate its 100th anniversary in September 2007. With our 650 affiliates in over 150 countries, we advocate, together with civil society, user groups and, where appropriate, public authorities, the essential role of public services in sustainable development and in the achievement of the Millennium Development Goals. PSI welcomes the recent report on trade and employment prepared jointly by the ILO and the World Trade Organization (WTO). It was an overdue first step in developing a joint analysis on the impacts of trade policies. We encourage the ILO to continue this cooperation and to assist the WTO in conducting employment impact studies of key developments and to include these assessments in the trade policy reviews of member States. PSI also welcomes the policy forum between the ILO, the International Monetary Fund (IMF), the World Bank and the WTO to develop greater policy coherence around the Decent Work Agenda. PSI would welcome the inclusion of a specialized agency on gender equality in this forum as well.

We support the views expressed in the Director-General's Report, which questions the validity of fiscal and monetary prosperity programmes which have resulted in extremely-low public service pay and pose serious challenges for the recruitment and retention of qualified staff. PSI argues that water and other essential services such as health should not be treated as a commodity to be sold for profit but as a human right and public good. PSI promotes the public ownership and management of water and sanitation services and argues, together with an increasing number of civil society organizations, that the Millennium Development Goals on water will not be met without substantive investment in public delivery. PSI urges caution to those who advocate public-private partnerships as a means to deliver on commitments to sustainable development and decent work. PSI welcomes the Global Report on tackling equality. While the Report refers to the importance of a national legislative framework and appropriate machinery, PSI also considers that more attention should be paid to the role of the public sector in creating an enabling environment for equality and equal opportunities. The Report provides a great focus on the issue of discrimination on grounds of sexual orientation, an issue to which PSI has also called attention for over two years. PSI is also working with the affiliates, particularly in the Inter-American region, on issues of racism to promote the draft convention of the Organization of American States against Racism. We look forward to continuing our cooperation with the ILO on these issues. We see with dismay that, yet again, this year the Workers' delegation to the Conference has the worst record on gender representativity. In our opinion, it is indeed time to tackle inequality. It is time for affirmative action measures here at the Conference.

On 10 and 11 July this year, the Belgium Government will host the global forum on migration and development in Brussels. PSI notes with regret that there is very limited space for trade union participation in this process. It also would argue for a strengthened role for the ILO in this forum, to ensure that labour migration is addressed within the framework of international human rights norms and labour standards. PSI appreciates the vital role of

the International Labour Standards Department and the ILO supervisory mechanisms. The number of complaints of severe violations and repression against public sector trade union leaders remains unacceptably high. PSI requests the ILO to maintain its resource levels for this area of work. PSI is particularly concerned about the violent attacks on the Korean Government employees' union and the failure of the Korean Government to implement all the recommendations of the ILO's Committee on Freedom of Association.

We recall that the situation of violence and repression in Colombia remains acute, with 72 trade unionists assassinated in 2006. PSI deeply regrets that the case was not brought to the attention of the Conference Committee this year. PSI is also associated with an important case against the United States Government concerning the prohibition of bargaining rights in North Carolina, and calls on the United States Government to review its position and implement the Committee's recommendations. PSI is also associated with a case concerning harassment against the autonomous public sector unions in Algeria and is concerned about violence and the intimidation of autonomous trade unions in other parts of the Maghreb and Arab region. Finally, PSI has called on the international community on a number of occasions over the last year, in particular the European Union and the United States Government, to release funds earmarked for development assistance to Palestine. The Director-General's Report provides graphic information about the deterioration in living standards for the population as a whole as a result of the non-payment of wages to 160,000 civil servants. The Government of Norway is to be commended for its recent decision to release humanitarian aid.

Sr. CELI VEGAS (*representante, Centro de Intercambios y Cooperación para América Latina*)

En nombre del Centro de Intercambios y Cooperación para América Latina (CICAL), les transmito mis cordiales saludos a todos los participantes de esta digna Asamblea y felicito a los miembros de la Junta Directiva por su brillante conducción de las reuniones.

El Informe del Director General de la OIT: *La igualdad en el trabajo: afrontar los retos que se plantean*, muestra los frutos de la concatenación de los esfuerzos destinados a atenuar las discriminaciones derivadas de la globalización en un mercado altamente competitivo.

El trabajo de los migrantes, como una de las expresiones de las discriminaciones que sufren los trabajadores, forma parte de la agenda de la OIT. Los trabajadores migrantes son a menudo objeto de discriminaciones en razón de su color, raza, religión, real o supuesta, o de una combinación de estos factores, y pueden ser desfavorecidos por el simple hecho de ser migrantes.

Los derechos de los migrantes han tenido una evolución hacia la igualdad en varios instrumentos internacionales. La Convención Internacional sobre la Eliminación de todas las Formas de Discriminación Racial, aprobada por la Asamblea General de Naciones Unidas en 1965 y que entró en vigor en 1969 es el punto de partida. Diversas iniciativas y resoluciones de organizaciones regionales e internacionales han contribuido a la Convención Internacional sobre la protección de los derechos de todos los trabajadores migratorios y de sus familiares

adoptada por la Asamblea General de las Naciones Unidas en su Resolución 45/158 del 18 de diciembre de 1990, y que entró en vigor en el año 2003.

Muchos son los derechos consagrados en estos textos internacionales, tanto en los Estados de origen, como en los de tránsito y de recepción. El derecho a la vida, a la libertad de conciencia, expresión, religión, seguridad personal, así como a los mismos derechos que tienen los nacionales ante los tribunales de justicia, entre otros, se encuentran protegidos en el ámbito internacional. Las inconsistencias del tratamiento de los migrantes se encuentran en las políticas nacionales.

Según la OIT, los movimientos de hombres y mujeres en la búsqueda de mejores posibilidades de empleo en el extranjero, de los cuales se estima 86 millones de individuos — 32 millones en las regiones desarrolladas — deberán aumentar en los próximos años. En Europa occidental, el 10 por ciento de la mano de obra se compone actualmente de migrantes. Las discriminaciones de las cuales son víctimas los trabajadores migrantes se manifiestan notablemente por el hecho de que son numerosos, independientemente del nivel de calificaciones, en empleos peligrosos y degradantes, donde la protección es a menudo parcial o ausente de derechos.

¿Cómo hacer compatible la migración exacerbada por la globalización y las políticas nacionales? Ese es el dilema que afrontan los dirigentes de los países desarrollados y en vías de desarrollo. Los acuerdos de integración regional económica parecen otorgar una protección a cierto tipo de migrantes. El cuadro jurídico de la Unión Europea acuerda la igualdad de oportunidades y de tratamiento a los trabajadores migrantes de terceros países que residen legalmente en la zona. Sin embargo, existe una masa de trabajadores en situación irregular y que desarrollan actividades domésticas u otros servicios útiles a la comunidad pero que, por carecer de autorizaciones para trabajar, se encuentran sometidos a los abusos de las autoridades, de los empleadores y a veces son víctimas de las mafias internacionales.

Los temas migratorios son incluidos en las negociaciones de los acuerdos de asociación comercial regional. La migración es aceptada o tolerada cuando la transferencia de recursos humanos aporta elementos positivos al desarrollo del país receptor de migrantes. La migración es rechazada o criticada cuando genera una economía informal. Estas visiones de la migración es necesario confrontarlas con las realidades de los países.

Las organizaciones de la sociedad civil juegan un rol importante como catalizador para sensibilizar a los Estados en la aplicación de los estándares internacionales adoptados por las convenciones internacionales.

---

Sr. GÓMEZ (*representante, Central Latinoamericana de Trabajadores*)

---

Mientras gobiernos, empleadores y trabajadores hablamos de trabajo decente, en la práctica nos encontramos con que el común denominador en la gran mayoría de países es el trabajo indecente, caracterizado por la precariedad, la inestabilidad, la baja remuneración, así como la práctica y la desaparición de una relación directa capital-trabajo por la vía de la contratación civil, las cooperativas de trabajo asociado, los sistemas de contratistas y empresas temporales, las nóminas paralelas y todos aquellos métodos que gobiernos y empleadores se

han ingeniado para burlar los derechos de la clase trabajadora.

En América Latina y el Caribe es imposible establecer una relación coherente entre trabajo decente y desarrollo sostenible, cuando en la mayoría de los países el común denominador es la aplicación del consenso de Washington, con sus secuelas de privatizaciones, ajustes estructurales, desempleo y empobrecimiento de los trabajadores y poblaciones en toda la región.

Quienes defendemos los principios originales que dieron vida a esta casa común no podemos guardar silencio frente a las constantes violaciones que de manera continua vienen ejerciendo empresarios y gobiernos en contra de los convenios fundamentales de la OIT, tal como pudimos constatarlo a instancias de los informes presentados por la Comisión de Expertos y cuyos casos más flagrantes fueron objeto de intensos debates en la Comisión de Aplicación de Normas.

Debemos expresar nuestras preocupaciones como organización continental, por cuanto que mientras que el señor Director y la Oficina hablan y propician sistemas de trabajo decente, desarrollo sostenible y de tripartismo, es evidente constatar un clima permanente de violaciones constantes a la libertad sindical, tal como ocurre en países como Guatemala, El Salvador, Costa Rica y Colombia, entre otros.

Precisamente en el caso específico de Colombia, en nombre de la Central Latinoamericana de Trabajadores expresamos nuestra solidaridad para con el sindicalismo colombiano, teniendo en cuenta que, fruto de un absurdo, en la Comisión de Aplicación de Normas no fue posible incluirla en la lista de países llamados a declarar y rendir un informe ante la Comisión, frente a las graves violaciones a la libertad sindical, los derechos humanos y el irrespeto que de manera constante impacta al sindicalismo en Colombia, especialmente en lo relacionado con el derecho a la vida.

Huelga afirmar que es indispensable hacer un alto en el camino para impedir que continuemos en una carrera desenfrenada hacia el abismo, producto de los fenómenos de la precarización de los sistemas de contratación de los trabajadores, la reducción de los salarios, el desmonte de los sistemas de seguridad social, situaciones éstas que, en el marco de la globalización capitalista, vienen dejando a la clase trabajadora sin un mínimo de derechos, atentando así contra la democracia, la paz y la convivencia pacífica en todo el planeta.

No olvidemos que la paz sólo puede construirse teniendo como fundamento la justicia.

El abismo cada vez mayor entre quienes hacen ostentación de riquezas, no siempre bien habidas, y la miseria reinante en la inmensa mayoría de nuestros pueblos, las reducciones en los ingresos de la población, la informalización de la economía y la precariedad laboral, pueden ser en el corto plazo el detonante más peligroso para la estabilidad democrática en cada uno de nuestros países.

Así como hemos condenado el bloqueo norteamericano a la isla de Cuba, en esta ocasión hacemos un nuevo llamado al señor Presidente en funciones de Cuba, comandante Raúl Castro, para que libere al compañero Pedro Pablo Álvarez y los seis compañeros sindicalistas presos en la isla por haber constituido un sindicato independiente.

We have carefully read the Report of the Director-General, Mr. Juan Somavia, on the situation of workers in Palestine and other occupied Arab territories presented to the Conference. While we would like to express our gratitude for the continuous interest given to the implementation of the resolutions adopted by the Conference in 1974 and 1980, we should like to make some observations concerning the style and content of the Report.

First, with regard to the style, the Report is entitled “the situation of workers of the occupied Arab territories”, whereas it should be entitled “The situation of Arab workers in Palestine and other occupied Arab territories”. It is crucial to define these workers correctly and to specify their geographic locations.

Second, as in previous reports, the terminology used in the Report is inconsistent with the terms recognized at the international level. In this Report, we find expressions such as “the Palestinian population and people”, instead of “Palestinian citizens”. Yet, defining the identity of Palestinians and their citizenship is of prime importance, in accordance with international law. We could make a similar observation with regard to the use of the expression “the Syrian Arab people”, rather than the expression “Syrian citizens of the occupied Syrian Golan”. Defining their identity is of the utmost importance, particularly when these citizens live in their homeland, Syria, part of which is occupied by Israel.

Third, the Report limits itself to describing the plight of Palestinians and Syrians in the occupied territories, but remains silent about the root causes of the current situation, namely the Israeli occupation and the policies of closure, repression, confiscation of lands, road blocks, collective punishment, forced displacement and economic and social exclusion. These policies have led to the current tragic situation of workers and their families, who struggle to survive on extremely limited resources in a very difficult security situation that undermines all human dignity. We therefore urge the International Labour Conference and the ILO Governing Body to take measures to ensure respect for the rights of Palestinian and Syrian workers and to put an end to the deplorable Israeli practices, which are a violation of the right to decent work and human values.

Fourth, the Report does not mention the resolutions of the United Nations Security Council and General Assembly, which consider Israel’s decision to annex the Syrian Golan to be null and void and to have no legal consequences. This should be mentioned to remind the international community that it must ensure the follow-up of its resolutions adopted under the Charter of the United Nations and international law. It is legitimate to ask, is the ILO not a United Nations agency and part of the United Nations system?

With regard to the content, the high-level mission has conducted consultations with various stakeholders in Palestine and other occupied Arab territories, especially with the Palestinian Minister of Labour, the Palestine General Federation of Trade Unions and other relevant bodies, to gain an insight into the situation of workers. The mission failed to make it clear that the practices used by the Israeli occupying forces against Palestinian workers undermine human dignity and breach the standards

adopted by the ILO and ratified by all States. The mission also fails to mention that the separation wall, which had been declared illegal by the International Court of Justice in its Advisory Opinion, undermines the interests of workers and their families. Furthermore, the increasing number of checkpoints, which restrict the free movement of people and economic activities, enclose Palestinian and Syrian citizens in an open prison and take away their right to freedom and their right to work.

Attributing the same degree of responsibility for the situation to the occupying power, Israel, and the Palestinian and Syrian workers that are subject to this occupation is unjust, because Palestinians and Syrians were attacked on their own lands by a foreign occupation power that has undermined their human dignity. The double standards applied in the debate on the situation in Palestine and the occupied Arab territories are deplorable. We call on the international community to step up efforts to find a lasting solution, by putting an end to the occupation and restoring justice and peace.

The Arab peace initiative, which was proposed in Beirut in 2002 and relaunched in 2007 in Riyadh, can provide a basis for comprehensive peace, including the withdrawal by Israel from the occupied Arab territories to the boundary lines of 4 June 1967 and the negotiation of the various issues. Israel’s failure to seize this historic opportunity pushes peace even further out of reach and plunges the region into a catastrophic situation.

In the light of Israel’s daily aggression in Palestine, the Syrian Golan and the Lebanese Shebaa Farms, we call on the Conference to recommend to the Governing Body to take measures against Israeli practices that violate the principle of decent work.

Similarly, we call on the Director-General to implement the enhanced programme technical cooperation for Palestine, and take the necessary measures to ensure that the Palestinian Fund for Employment and Social Protection has sufficient finances. To this end, the Fund should be made known beyond the bounds of the ILO, with a view to attracting new donor States and organization to meet the needs of the tripartite partners in Palestine. While we are aware that the deteriorating situation calls for urgent relief, emergency assistance must not be mistaken for a lasting solution.

---

*Mr. JENNINGS (representative, Union Network International)*

---

UNI Global Union represents the fast-growing services sectors. Our membership is seeing labour markets being transformed, with millions of new jobs being created in knowledge-intensive services sectors.

The ILO this year has transformed sectoral activities, and we are delighted with the new initiative. The ILO will create policy dialogue forums throughout the services sector. We will start with commerce this year and create others covering the issues of finance, information, communications technology, property services and the broader media.

To us, this means that the ILO becomes truly relevant to the labour market of tomorrow. We welcome the Director-General’s admission that we cannot reach sustainable globalization if overall policy direction does not change. It is time to press the delete button on the Washington Consensus.

The jury is on globalization, declining wages and GNP, growing inequity, and the rapacious global

financialization, all of which make the planet's ills worse.

In 2006, record mergers took place, driven by a private equity deal culture which saw the long term as being a couple of years. Not sustaining the planet, but sustaining luxury lifestyles for the few. Businesses were bought and taken off the stock market and regulatory radar into a secret world of value extraction in off-shore tax havens, affecting and impacting the public expenditure plans for governments everywhere.

A leading private equity leader observed last week, "Our office cleaner faces a higher tax rate than private equity". Well, my organization, UNI Global Union represents those cleaners, and we want change. Tomorrow, around the world, we have a UNI Global Action Day to support low-paid cleaners and security guards around the world. The ILO should be leading the campaign to introduce minimum wage rules everywhere.

We endorse the call in the Director-General's Report for a further investigation of the impact on the global economy of private equity and hedge funds. Indeed, we would like to suggest that the ILO should organize a crash course on core labour standards and an ILO multinational declaration for private equity practitioners because, in my discussions with them, they have not got a clue.

We welcome the commitment of the ILO to undertake a major research and policy effort on green jobs. Green jobs and respect for core labour standards go hand in hand. A better carbon footprint, yes, but no stamping on union rights. We welcome this strong G8 message on respecting core labour standards. We consider this a brilliant success for the ILO and the Decent Work Agenda. I would say, Mr. President, that this clears the way for the President of the United States, George W. Bush, now to endorse the Employee Free Choice Act on Capitol Hill. And this will give American workers a real and fair opportunity and chance to join trade unions and to organize themselves into trade unions. And this same message should be addressed to Wal-Mart, to Lidl, to G4S, to Oracle, Dell and IBM, and all those private equity firms should comply with the G8 message and the standards and the core labour standards of the ILO. At UNI Global Union, we have signed 20 global framework agreements with multinational companies and more are on the way. We want the ILO to promote these agreements as the employment ministers did at the G8 during the 30th anniversary celebration of the ILO Declaration on Multinationals.

Finally, we are angry that so many Governments pledge their support here, and do the opposite at home. The ILO Committee on Freedom of Association has found the Greek Government guilty of undertaking a coup against pension fund administration in the Greek banking sector. The ILO's decision is clear: bring together the parties, the employees and the bankers, within the framework of collective bargaining. I went to Athens. I met the Minister. He promised to implement the ILO decision, but that promise has not yet been fulfilled. We are dissatisfied that the Government is not treating this with the urgency required. This morning, the Greek Minister of Economy and Finance, Mr. George Alogoskoufis, informed us that the Greek Government's undertakings would be carried out in full at a time of their choosing. I would like to point out that UNI and the ILO are not external factors, as implied

by the Minister. Our message to the Minister is: it is time to act. Our affiliates in UNI consider that there are no grounds for further delay, and a meeting must now take place between the interested parties, as was previously agreed by the Minister. We will be following developments closely.

Finally, we congratulate the Director-General on his excellent Report and on the very skilful way that the ILO has mainstreamed its work throughout the multilateral system.

---

Mr. BAILEY (*representative, Federation of International Civil Servants' Associations*)

---

Thank you very much for inviting me to speak on behalf of the Federation of International Civil Servants' Associations, or FICSA. My name is Christopher Bailey. I work in the Knowledge Management Department at the World Health Organization just down the road, I am your neighbour, and presently I am the FICSA Regional Representative for Europe.

Long before I started work at the UN, I had been a member of two trade unions from other professions. Today, I am an international civil servant, a manager and an elected staff representative. I say this because, although I am representing a federation of UN staff associations and unions, I am also an individual hired to do a job that I am passionate about and one that I have a few specialized skills in that might be of use to others.

I would imagine, and I would hope, that everyone in this room could describe themselves similarly.

What is unique about UN organizations and specialized agencies is that we share the same self-selection factor. We are here because we want to help and our skills have been recognized as a potential contribution. It is a great honour and rare privilege. But one thing we have never taken for granted from the inception of the UN system was the basic set of human rights of UN staff to speak freely, to assemble freely and to benefit from a working justice system.

These had to be won by individual staff members of the UN over the years. These people did not face the hardships that many people in this room have faced, but we have struggled in other ways to ensure that the rights of international civil servants are recognized by the international organizations.

We have had some victories, victories that have been inspired by people like you, your colleagues and your predecessors and I would like to express our appreciation to the ILO for the example that is set.

We have all benefited by your struggles from the principle of the eight-hour workday to the prohibition of child labour down the line. Although a staff committee was established as early as 1928 and at the UN secretariat in 1947, yet even with the ILO Freedom of Association and Protection of the Right to Organise Convention, 1948 (No. 87), and the Right to Organise and Collective Bargaining Convention, 1949 (No. 98), in practise staff associations and unions in the UN have been allowed to practice these and other rights only to varying and limited degrees, based on the level of tolerance of individual administrations.

Establishing these fundamental human rights as rights that UN workers share had to be earned and has been documented through the rich history of ILO cases in the work of FICSA.

But the point is, little by little, person by person, case by case, the basic human rights of assembly, of speech, of due process, had to be won and re-won within the UN itself and can never be taken for granted.

Today, individuals at the UN, staff and managers, find themselves in the labyrinthine system of self-administered justice, of ombudsmen and review panels and appeals boards, a system which more often does not mete out justice, but rather prolongs by years indecision until the participants leave the organization or give up.

How many of us in the UN have experienced or know someone, both staff and managers, whose health and career and effectiveness have been diminished as justice delayed slowly and silently becomes justice denied?

To this end, FISCOSA supports the changes adopted by the UN General Assembly to reform the administration of justice at the UN and would urge other organizations to reform their internal procedures to include mediation and other forms of conflict prevention, but also to provide free legal advice to staff members and managers who are involved in administrative of conflict.

We, at the UN, must remind ourselves of why we are here and why we believe that by giving our talents in the service of others we will benefit others as well as ourselves as part of a dynamic, living, global community and then apply that notion to how we work within the UN and how we organize that work. Put simply, we must practise what we preach.

---

M<sup>me</sup> FRANÇOIS (*représentante, Fédération internationale des ligues des droits de l'homme*)

---

La Fédération internationale des ligues des droits de l'homme, dans le cadre de son programme conjoint avec l'Organisation mondiale contre la torture (OMCT), l'Observatoire pour la Protection des défenseurs des droits de l'homme, exprime sa vive préoccupation quant aux violations par certains Etats de leurs obligations internationales découlant de la Constitution de l'OIT et des conventions n<sup>os</sup> 87 et 98.

Dans un certain nombre d'Etats, en effet, les défenseurs des droits économiques, sociaux et culturels sont régulièrement victimes d'assassinats, de menaces, de mauvais traitements, d'arrestations ou encore de détentions arbitraires. Les dirigeants syndicaux sont les premières victimes de cette répression, leur engagement pour un meilleur équilibre social et une meilleure répartition des richesses étant souvent considéré comme un obstacle à la croissance économique par de nombreux acteurs.

En Afrique, les défenseurs de la liberté syndicale, qui dénoncent les mauvaises conditions de travail, la corruption, la mauvaise gestion et l'exploitation abusive des ressources naturelles, sont fréquemment confrontés à de sérieuses représailles de la part des autorités.

Ainsi, Monsieur le Président, nous sommes particulièrement préoccupés par la situation à Djibouti, où de nombreux dirigeants syndicaux ont été licenciés, arrêtés et poursuivis judiciairement depuis plusieurs années.

En Guinée-Conakry, une vingtaine de dirigeants syndicaux ont été arbitrairement détenus dans un contexte de grève générale au cours des mois de janvier et février 2007. Nombre d'entre eux ont été passés à tabac à cette occasion.

Au Zimbabwe, les autorités continuent de réprimer tout mouvement social visant à dénoncer la détérioration du niveau de vie et les atteintes aux droits sociaux. Au cours des dix-huit derniers mois, des centaines de dirigeants et militants syndicaux ont ainsi été détenus, interrogés, violemment maltraités, ou encore intimidés par les forces de l'ordre à travers le pays.

En Amérique latine, de nombreux syndicalistes continuent de faire l'objet de harcèlement, de poursuites judiciaires, de mauvais traitements, de tortures voire d'assassinats.

Ainsi, en Colombie, la situation des dirigeants syndicaux reste extrêmement préoccupante, leurs activités continuant d'être stigmatisées et considérées comme subversives. Dernier exemple en date, le 7 février 2007, M<sup>me</sup> Carmen Cecilia Santana Romana, épouse du premier vice-président de la Centrale unitaire des travailleurs (CUT), a été assassinée à son domicile. Nous avons également recensé de nombreux assassinats de dirigeants syndicaux au Guatemala ou encore récemment au Mexique.

En Asie, malheureusement, la situation n'est pas meilleure, le nombre de cas d'agressions, de menaces, de harcèlement et de détentions arbitraires à l'encontre des syndicalistes et des dirigeants syndicaux étant en constante augmentation.

Il en va ainsi au Cambodge où la plupart des mouvements de grève ont été réprimés en 2006 et plusieurs dirigeants ont été détenus arbitrairement. J'aimerais citer le cas de M. Hy Vuthy assassiné le 24 février 2007. Il était président du Syndicat libre des travailleurs du Cambodge à l'usine Suntex et il a été tué alors qu'il quittait son travail.

En Chine également, les autorités continuent de réprimer de façon quasi systématique toute tentative d'établir des syndicats libres. J'aimerais citer le cas de M. Yao Fuxin, militant de la cause ouvrière dans la province du Liaoning, qui est détenu depuis mars 2002 et qui ne devrait être libéré qu'en mars 2009 alors que ses conditions de détention sont extrêmement précaires.

En Corée du Sud, depuis la promulgation en mars 2006 d'une directive intitulée Directive relative à la transformation des organisations illégales en syndicats légaux, le ministère de l'Administration gouvernementale et de l'Intérieur a durci ses mesures de répression à l'égard de nombreux syndicats, et notamment du Syndicat des fonctionnaires coréens (KGEU).

En Iran, dans un contexte de répression croissante envers les syndicats, les dirigeants syndicaux ne sont pas épargnés. Je citerai juste le cas de M. Mansoor Osanloo, président de l'Union des chauffeurs de la compagnie de bus de Téhéran, qui a passé plus de neuf mois en prison l'an dernier.

Aux Philippines, également, la répression continue notamment par le biais d'assassinats et de violences.

Enfin, concernant la région du Moyen-Orient, j'aimerais mentionner la situation en Egypte où le siège du Centre des services des syndicats et des travailleurs (CTUWS) vient d'être fermé le 22 avril au Caire sur décision administrative.

En Iraq, nous avons également recensés récemment plusieurs assassinats de dirigeants syndicaux.

Face à ce grand nombre de violations des instruments internationaux en matière de droits économiques et sociaux, nous appelons la communauté internationale à œuvrer afin que la liberté syndicale

soit pleinement respectée, et ce en toute circonstance.

---

Mr. HARRIS (*representative, Education International*)

---

No one dares to contest today that children should be learning, not working. And we reaffirmed that principle two days ago on “World Day against Child Labour”. But not so long ago, child labour was accepted in many parts of the world and one of the great achievements of the ILO has been to establish that child labour is not acceptable. The ILO plays a key role through IPEC in turning that principle into practice.

Education International (EI) participates with our fellow global union, the International Union of Food, Agricultural, Hotel, Restaurant, Catering, Tobacco and Allied Workers’ Associations (IUF), in a joint industry union foundation to eliminate child labour in the cocoa industry. And that is just one. The EI is also a permanent member of the Global Task Force on Child Labour.

This is practical work. Moving from principle to practice remains the big challenge. Last year’s ILO Report showed that progress had been made but there is still a long way to go and we call on governments to renew their efforts.

The elimination of child labour is closely linked with the campaign to achieve education for all. Yet the latest reports show that many countries are falling short. In just two weeks from now we will be at exactly the half-way point in the 15-year programme to achieve the Millennium Development Goal of primary education for all by the year 2015. Seven-and-a-half years have gone by since the governments of the world made that commitment. Yet the monitoring reports that come in now show that most countries are still far from the half-way mark. There are several reasons for this shortfall.

The first is failure to engage with the social partners at national level. Education unions can contribute mightily. Our members are ready to do so. But too often governments keep them at a distance instead of engaging with them. The second reason is that the conditions of teachers in developing countries are often just appalling. Teachers, too, need decent work so that they can fulfil their vocation and provide quality education. But teachers often have to take extra jobs just so they and their families can survive and the education of the children suffers. The third reason is that there are too many stopgap solutions, engaging unqualified people, the so-called volunteers and the like. Putting a body in front of a group of children is not education. Education is about quality, about basic minimum standards. Fourthly, we need to confront the growing shortage of qualified teachers. UNESCO estimates a shortage of 18 million by 2015 unless major efforts are made to step up training and recruitment. The ILO’s action programme is one contribution, but still a far too small contribution to this effort.

All of these issues – the participation of the social partners, decent working conditions, properly quali-

fied teachers and the looming shortage of teachers – are covered in the important Report presented to this Conference just a week ago by the Joint ILO/UNESCO Committee of Experts on the Application of Recommendations concerning Teaching Personnel. This Committee has shone a spotlight on the failings of States in each of the areas that I have highlighted.

The facts alone, the expert analysis is presented with great clarity. What more does it take for governments to act? A major issue concerning all States is migration and mobility. The EI understands that the unions are concerned by the impact on our schools and the need for resources and policies which enable schools to respond well to that impact and, secondly, growing migration and mobility within our own profession. The ILO has done valuable work on the rights-based approach to migration. We are urging the OECD, in particular, to draw upon the ILO’s work in its new major policy study on migration.

The EI, like other global unions, will continue to advocate an approach to migration and other issues based on non-discrimination. When we call for respect for the Universal Declaration of Human Rights, we mean what we say. We do mean respect for trade union rights. It is time for the Government of Ethiopia, for example, to respect the findings of the ILO’s Committee on Freedom of Association. It is time for trade union rights to be respected in Colombia, in Cambodia, in Myanmar and in many other countries. The previous speaker has just outlined many cases. We mean respect for the rights of women. The message from the ILO Global Report, *Equality at work: Tackling the challenges*, is clear. We mean non-discrimination on any grounds. We cannot and will not accept discrimination against teachers on the basis of their sexual orientation, as is being proposed right now by a European government whose President was actually scheduled to be here this week.

Finally, Education International is proud to play a key role in the new Council of Global Unions. With the trade union movement, which is on the move, which is mobilizing, we will be constructive and practical. We agree with Philip Jennings’ comments on the ILO’s new approach to sectoral activity, that is to take the ILO agenda into the real world, into the workplace and we will work with governments and employers to achieve that. And we will, in doing that, be steadfast in our determination to defend the principles that underpin the ILO and its role in the international community: justice, equity, respect for rights and firm opposition to all forms of discrimination.

---

The PRESIDENT

---

We have concluded the general debate on the Reports of the Chairperson of the Governing Body and of the Director-General. Very many thanks to all of you for your contributions.

(*The sitting adjourned at 8.25 p.m.*)
